

Additional 5G Information On the Coming Catastrophe to Humanity Part 2

The Most Comprehensive 5G Exposé: The Ultimate Weapon of Depopulation

Electronic Pollution is Killing Us. We live in an increasingly irradiated environment (radiation soup) with all the smartphones, tablets, Wi-Fi... Electronic Pollution is Killing Us.

We live in an increasingly irradiated environment (radiation soup) with all the smartphones, tablets, Wi-Fi networks, and cell towers and their microwave transmissions.

People, especially teenagers and young people, are increasingly dying of brain cancer because of the increased exposure to EMF/RF radiation, according to RF Safe and the UK *'The Telegraph'*.

More and more Israelis, including children, report various aches and medical conditions, which emerge when they are in the presence of mobile phones, Wi-Fi routers or cell towers, according to Israel *'Hayom Newspaper'* (Does Radiation Hurt? *Israel 'Hayom Newspaper'*, December 26, 2014).

Firefighters shared their testimonies of damages after cell tower was installed near their station, according to Collective Evolution.

5G will emit 10 times more radiation as it will use frequencies which are “ten times higher than those used by current network technologies” according to *‘Euronews’*. 5G uses millimeter waves that are known as extremely high frequency.

Although they “only” penetrate a few millimeters into the body and this is being used to quell any opposition by the telecom and other industries, *“our skin is the biggest organ in the body and is linked to numerous things including immune response,”* Leszczynski explained (Euronews).

These high frequencies will not replace the current ones but will be added to the existing network. A spokesman for the World Health Organization (WHO) told *‘Euronews’* that *“To account for the increase in the volume of information that will be transferred by 5G networks, more spectrum at higher frequencies will be required”*; namely, it will require installing many more cell towers.

This microwave radiation surrounds us and leads to decrease in fertility (sperm count decrease), which seemingly may be related to the depopulation agenda (See Agenda 21). It was discovered that sperm is damaged even from very low radiation rate at 0.00034 - 0.07 micro-watt per centimeter, according to the Biolinitiative 2012 Reoprt.

Martin Pall, PhD, an expert on human effects of RF radiation, warns that humanity is approaching extinction due to infertility with the level of radiation we’re exposed to these days:

“DNA damage known to be produced by these EMFs occur in human sperm and may also occur in human eggs, leading to large increases in mutation in any children born. It is thought that an increase in mutation frequency of 2.5 to 3-fold will lead to extinction because of accumulation of large numbers of damaging mutations.”

“We may already be over this level, and if so, simply continuing our current exposures will lead to eventual extinction. Further increases in exposures will be more rapidly self-destructive.”

According to *‘Nexus’* Magazine, both the cellular masts and 5G satellites will utilize a system called the “phased array”, in which “antennas are co-ordinated to radiate pulses in a specific direction and in a specified time sequence. This allows a concentrated beam of radio waves to enable signals to be sent or received.

Because the beams are concentrated in this way, this adds to their power, which means they are able more easily to penetrate buildings. But it also means that any living creature that gets in the way of such a concentrated beam will be subjected to a powerful dose of extremely “high frequency radiant electricity.”

What Is a Smart City?

According to Dr. Cindy Russell (The Bulletin January/February 2017), *“Smart Cities have comprehensive digital connectivity by installing a massive wireless sensor network of almost invisible small cell antennae on light posts, utility poles, homes and businesses throughout neighborhoods and towns in order to integrate IoT with IT.”*

TechRepublic explains that smart cities are “connected” ones which means they collect data from IoT sensors in streetlights and other devices to supposedly provide “better services and better communication”; especially, they emphasize this will improve municipal services.

What Is IoT?

IoT stands for Internet of Things. This means more devices and appliances that will have microchips in them will send signals to a centralized system where all this data will be gathered, analyzed, and stored for purposes unknown to us. It is dubbed “the next big thing”, according to Wired.

However, it also poses serious health risks, as it will create *“an expanded electromagnetic microwave blanket above each city.”* according to ‘The Bulletin’.

How Is 5G Wireless Technology Connected to “Smart Cities”?

Accenture states on its site that, *“The next generation of wireless network infrastructure will be built using small-cell networks employing 5G wireless technology. The Smart City applications currently leveraging today’s wireless networks are already showing significant benefits to communities, and are expected to transform local economies.”*

Smart city tyranny is coming near you. ‘The Epoch Times’ reports about the preparations to deploy the Chinese regime’s system for surveillance and controlling its citizens in Darwin, Northern Territory in Australia.

Surveillance 24/7

Not only will people suffer more from this increased radiation forced upon us without our consent or informing us, but it is also leading to complete control and 24/7 surveillance by the state just as in China’s smart cities, according to ‘TechCrunch’.

Surveillance cameras and microphones, 5G mini-cell towers will be installed on top of LED street lights, smart meters will record all actions that require electricity use, the electric appliances and wearables will come with a Wi-Fi microchips which will gather information and transmit it to a system.

This is called IOT, the Internet of Things that anything which can be connected to the system and gather information and perform surveillance on us will be connected to this system. This is what Federal Communications Commission Chairman Ajit Pai said, according to IEEE ComSoc Technology Blog:

“It’s the building block to a world where everything that can be connected will be connected — where driverless cars talk to smart transportation networks and where wireless sensors can monitor your health and transmit data to your doctor. That’s a snapshot of what the 5G world will look like.”

We are fast approaching a time in which “Big Brother” will watch you everywhere all the time. This isn’t an exaggeration. Look what happens in China, because this is the plan for all countries.

According to Rachel Cheung (South China Morning Post):

“Planners tell us smart-city initiatives will improve our lives, for example by smoothing traffic flow. But a dense web of sensors, meters and cameras allied to facial recognition programs means our every move can be tracked”

5G Connection to AI and Transhumanism

Dean Henderson, MS in Environmental Studies from the University of Montana, provides a dire warning and says that 5G is DARPA’s end game for humanity.

Henderson adds that *“Some say that Chemtrails is the means by which they are loading our bodies up with aluminum, since this is the best conductor for plugging us into the 5G “smart grid” [...] Trans-genderism is an Agenda 21 stepping stone Trojan Horse gateway to trans-humanism, which involves the integration of 5G into our very being.*

Watch the interview of Dean Henderson and Shai Danon about the real agenda behind our technologies and eugenics:

The hip-sounding Silicon Valley front men they are using to promote this Orwellian nightmare are calling it the Fourth Industrial Revolution. It seeks to integrate smart chip low-frequency weapons technology with biological processes.” This corresponds with the statement made Mooly (Shmuel) Eden, President of Intel, vision for humanity that we will all be microchipped in the future.

According to Henderson, this 5G technology leads us to the end of humanity as we will cease to be humans and become cyborgs as Mooly Eden openly stated to the audience.

“The goal is to turn us into machines which can be programmed to perform certain jobs, purchase certain things, think certain thoughts and emit negative dark emotions which will

power and normalize the permanent war Illuminati blood sacrifice into an acceptable parallel reality they call "virtual reality" or "augmented reality".

Mooly Eden, President of Intel shared his vision for humanity that every human will be implanted with a chip that without it you'll be unable to do anything, including paying for goods (in Hebrew: smalla.co.il).

When you don't have control over your means of payment (but controlled by remote control via the chip), you can imagine where it can lead. It starts with passing such laws that limit the means of payment (i.e. cash) and moving to virtual money. And, of course, it's always "in your favor".

I personally noticed how they removed the tellers from all the bank branches to only one branch in the city. Pay attention because it has already started. Intel envisions chips in the brain, according to *'Computerworld'* and thousands of Swedes have already been implanted with microchips, according to NPR.

Do you think this is too Orwellian reality? *'USA Today'* already openly discusses it that eventually everyone will be micro-chipped. It's not a secret.

Then, according to *'TechRadar'*, our data will be mined and sold as it is already done today by "giants" like Facebook, Google and other companies that gather all the information about us on the Internet.

These microchips within the electric appliances and smart meters could be monitored and shut down or hacked from afar, as it's a centralized control system. This has already happened in China as the data collected from sensors in a smart city was exposed, according to *'TechCruch'*.

What Is 5G?

5G isn't an upgrade of 4G LTE network structure. It will require "special equipment attached to lamp/light posts and power poles every fifty meters or so throughout towns and suburbs", according to Jeremy Naydler, PhD (Nexus Magazine).

The plan, according to Elon Musk and others, is to launch around 20,000 satellites that will beam 5G from space to earth, as *'Technocracy News & Trends'* states.

According to Dr. Josh Axe, a doctor of chiropractic,

"5G, also known as 5th generation mobile networks or wireless systems, is considered the next phase in mobile technology. These wireless systems are the transmitters that carry signals to our cell phones and other wireless devices.

While the public isn't operating on 5G yet, it's anticipated that over the next decade, most

wireless carriers in the U.S. will shift to 5G technology. This transition is expected to bring better coverage, lower battery consumption, faster Internet connection speeds, and the ability to support a growing market of products other than phones and tablets that feature wireless integration.”

The benefits of 5G are advertised to the public as part of the creation of smart cities, super-fast downloads (downloading a movie will take seconds instead of hours today depending on different variables), and improved speed and latency of networks that will provide other functionalities, such as remote surgeries, according to ‘EuroNews’.

This sounds so wonderful. So what is the problem with this network or new technology? 5G requires many more cell towers than those used today. Our exposure to this already dangerous radiation is going to increase exponentially and pose even greater challenge to our health.

Dr. Axe writes that from 200,000 cell phone towers around the U.S. (4G LTE technology), the number of cell phone towers is going to increase to millions of towers, as 5G requires a much denser network. CIO goes even further than this and says it *“could require cell towers on every street corner.”*

Not only will it require millions of new cell phone towers, but also thousands of satellites to provide coverage to the rural areas on earth. “20,000 new satellites that are due to transform the planet into a so-called “smart planet”, irradiating us night and day” according to Jeremy Naydler, PhD (Nexus Magazine).

This electromagnetic radiation doesn’t just bounce off our bodies or everything in the environment. If it permeates through stone and cement, these waves are surely absorbed in our bodies.

“The degree to which they are absorbed can be precisely measured in what is called the specific absorption rate (SAR), expressed in watts per kilogram of biological tissue (Jeremy Naydler, PhD, Nexus Magazine). Just imagine what happens to our bodies when we fill every space we occupy – whether it’s our homes, cars or the offices where we work in – with Wi-Fi.”

5G Is Multi-layered

5G is not a platform all built at once, but is multi-layered, built in stages. One such layer includes LED streetlights that are known to be carcinogenic and harmful to eyesight, according to France 24. The Telegraph warns that these streetlights may double the cancer risk, according to a new research.

The deployment of the LED streetlights is one of the technologies that enable 5G and smart cities, according to Navigant Research. One layer is built on the other. Wi-Fi installed on the LED streetlights with transmitters and cameras on top, turning them into mini-cell towers, according to Energy Manager Today, with 24/7 surveillance.

Smart meters, smart TVs, smart homes, where refrigerators, washing machines and other electric devices will contain a microchip that will collect data about your usage and will be sold as the social media giants and search engines do with our data today.

This makes us vulnerable because there is a central control which control these microchips and can shut off an appliance by the push of a button or the system intentionally or accidentally. A smart meter can be turned off and then you're cut from electricity.

As these technologies have never been proven safe, the growing scientific evidence suggesting immense health risks to death arising around wireless technology is a cause for concern, according to Dr. Axe.

5G Connection to Agenda 21

5G is part of the UN's Agenda 21 which is a depopulation plan aimed to depopulate 95% of the world and carried out for decades worldwide. There are many means implemented to achieve this genocidal goal, including GMOs (check the UN's Codex Alimentarius), vaccines, smart meters, irradiated food, fluoridation of the water, chemtrails (Geoengineering), and recently 5G rollout that Trump pushes as part of a "technology race".

Something which looks very suspicious is that the Elites' areas are exempt of this 5G deployment, including Trump's area of summer estate in Florida (kla.tv), while this rollout of added harmful radiation is forced upon the "common" people worldwide.

Population Projections in 2025

According to Deagel Guide to Military Equipment and Civil Aviation, two third of the U.S. population (from 300 million to 100 million people) is going to be eliminated within 6 years – from now 2019 to 2025. Check here the population projections for your country here.

You can see below that two thirds of Americans, as well as two thirds of Germans, and half of Israelis will disappear (or eliminated?) by 2025. The question raised is how do they know?

United States of America

How Do They Know about Such Drastic Decrease in Population?

How do they know that such a huge portion of the population will fade or die? "They", those who are behind the UN's Agenda 21, create the conditions for this disaster, according to 'OperationDisclosure' and 'GlobalResearch' that calls 5G a war against humanity.

The war against humanity today is not fought in the battlefields as in the past. According to

'GlobalResearch', it is "in the form of laser-like beams of electromagnetic radiation (EMR) from banks of thousands of tiny antennas, – and almost no one in the firing line knows that they are being silently, seriously and irreparably injured."

The following is a brave disclosure about the harmful 5G technology by Claire Edwards, a veteran UN staff member and whistle-blower:

According to care2 petition site, "The World Health Organization classified RFR's a Class 2B Carcinogenic, and the new 5G infrastructure wants to put a miniature cell tower practically in every home. These cells towers will emit RFRs & EMFs into the air we breathe. It will be like living inside a microwave." Please sign and share this petition to stop 5G rollout.

For those who don't know what is Agenda 21, please read the following articles:

MassAwakening.org

<http://www.encognitive.com> [.pdf]

If you think that this agenda of mass depopulation is too far-fetched, you can check these articles from *'GlobalResearch'*, *'NewsTarget'*, and *'HumansAreFree'*.

The Frequencies that 5G Uses Are Extremely Harmful

Moving to 5G the range of this technology is 2.45 Giga hertz, the frequency that microwave operates at.

"5G" IS A PROVEN MILITARY WEAPON

NON-LETHAL WEAPONS PROGRAM U.S. DEPARTMENT OF DEFENSE

Q9. Does this system work like a microwave oven?

A9. No. The ADS, a non-lethal directed-energy weapon, projects a very short duration (on the order of a few seconds) focused beam of millimeter waves at a frequency of 95 gigahertz (GHz). A microwave oven operates at 2.45 GHz. At the much higher frequency of 95 GHz, the associated directed energy wavelength is very short and only physically capable of reaching a skin depth of about 1/64 of an inch. A microwave oven operating at 2.45 GHz has a much longer associated wave length, on the order of several inches, which allows for greater penetration of material and efficiency in heating food. The ADS provides a quick and reversible skin surface heating sensation that does not penetrate into the target.

<https://jnlwp.defense.gov/Press-Room/Fact-Sheets/Article-View-Fact-sheets/Article/577989/active-denial-technology/>

SCIENTIFIC AMERICAN.

One difference will be that 5G may move wireless signals to a higher frequency band, operating at millimeter-length wavelengths between 30 and 300 gigahertz (GHz) on the radio spectrum. That's going to open up a huge amount of bandwidth and alleviate concerns about wireless traffic congestion. Radar, satellite and some military systems use this area of the spectrum currently but it's definitely less occupied than the spectrum currently in use. In addition, whereas 4G supports hundreds of megabits-per-second data rates, 5G is promising data rates in the gigabits-per-second range. It may not support those higher rates at all times in all places, but it will lower latency rates overall.

<https://www.scientificamerican.com/article/will-millimeter-waves-maximize-5g-wireless/>

Nothing like the 4G or 3G. Millimeter microwave technology beams? Scientists, experts, and concerned citizens all try to sound the alarm.

In the U.S., the federal government disabled municipalities and city councils to opt out of the 5G rollout and it's happening anyway. It's forced upon us. Trump allocated \$50 billion dollars for the 5G rollout in the rural areas in the U.S. So if you think of moving out of cities to rural areas, you will not be able to avoid this hazard there either.

The New York State announces on its site that \$7.5 millions are available for municipalities for smart street lighting in this state.

Lie After Lie to Convince You that It's Good for You

Part of the rationale for moving to 5G is energy savings. However, according to Byron Connolly from CIO, it will actually increase the energy costs by "150 to 170 percent by 2026.

These extra costs will be then passed onto the consumers. This is based on a study conducted by 451 Research and Vertiv that found that "The largest cost increases will be in macro, node and network data centres."

5G Was Developed as a Weapon

There are no safety tests and there will be no safety tests for 5G, as it was developed as a weapon system. It was meant to do harm! (Shai Danon, Raising the Vibration).

He recently interviewed Barrie Trower, a former Royal Navy microwave weapons expert (in the 1960s). When he asked him if 5G was developed as a weapon, he straightforwardly answered yes.

Watch here 8:09 minute mark:

In the documentary 5G Apocalypse – the Extinction Event, Barrie Trower explains that microwave weapons were used in the past as it is today. It is the perfect stealth weapon that the government can use when it doesn't like a particular group of people to make them sick; for example, the protesters against RAF Greenham Common, the U.S. military base in the UK or the Catholics in Northern Ireland (10 minute mark).

According to Trower, it happens all over the world. It is a weapon that you're not being aware it is used against you. A small dose of microwave radiation is more dangerous than a high dose of such radiation. It can take one to two years, but it can cause neurological damage and inflict different types of cancer.

5G uses the same frequencies as Active Denial System 5G radiation weapon, according to *'Forbidden Knowledge TV'*.

In a lecture highly censored by YouTube entitled 5G Satanic Agendas Exposed by Joe Imbriano

(B.S. degrees in Chemistry and in Biological Science), he gives more details about the 5G weapon; especially, affecting young girls' ability to conceive later on in life.

But the most important details in his lecture are the frequencies used by the 5G of 24 GHz which is the frequency of water molecule absorption and 60GHz the frequency of oxygen molecule absorption in the body! I suggest that if it's still on YouTube, download it to your computer or device. Watch here:

or here on Raising the Vibration blog:

<https://bit.ly/2WGA8KP>

In this video, Joe Imbriano explains that "LED street lighting is a directed weapon designed to attack human fertility. [Joe Imbriano can be viewed at "The Fullerton Report.com"]

LED street lighting is part of a sterilization agenda. White light at night induces sepsis, suppresses melatonin, causes insomnia, destroys health, and affects human egg quality. This coupled with microwave emissions work together to enhance the melatonin suppression."

Top secret documents about the biological effects from microwave radiation:

1. Defense intel agency (1976) – <https://bit.ly/31F4sg>
2. US Navy (1971) – <https://bit.ly/2KccT9Z>
3. Nasa (1981) – <https://bit.ly/2QXMaOK>
4. Secretary of defense about DEW – <https://bit.ly/2QXMaOK>

According to 'France 24', new findings confirm concerns that "exposure to an intense and powerful [LED] light is 'photo-toxic' and can lead to irreversible loss of retinal cells and diminished sharpness of vision," the French Agency for Food, Environmental and Occupational Health & Safety (ANSES) has warned.

If you still need more proof about the lethal frequencies that 5G uses, look no further. You can read the FCC (Federal Communications Commission Office of Engineering and Technology) document entitled Millimeter Wave Propagation: Spectrum Management Implications "For current technology the important absorption peaks occur at 24 and 60 GHz. [...] As one would expect, the loss is highest around the 60 GHz oxygen absorption peak for all elevation angles. [...]"

"Figure 7 shows the gaseous attenuation for oxygen absorption and for water vapor absorption as a function of range, over and above the free-space loss given in Figure 1. The resonances for frequencies below 100 GHz occur at 24 GHz for water vapor and 60 GHz for oxygen."

The EveryDay Concerned Citizen's had an interview with technical weapons expert Mark Steele who said "5G is a Weapons System, Nothing More, Nothing Less" [...] It's got nothing to do with

telecommunications for humans. 5g is a machine to machine connection for autonomous vehicles.” [...] Antenna systems located on street lights would be part of this network, pulsing passers-by, residents, drivers, walkers, and shoppers with unhealthy amounts of high-frequency radiation.”

Mark Steele has a background in weapons and weapons systems, an inventor, and Chief Technology officer at REEVU Worldwide Ltd. who spoke very critically about the dangers of 5G “and the recent LED Street Lights rollout in Gateshead, United Kingdom, which he says is part of the 5G rollout.” (The EveryDay Concerned Citizen).

Mark Steele explained in this interview published on *‘The EveryDay Concerned Citizen’* that the antenna contains “the complicated microchipset and dielectric antenna lens which is “beamforming,” a weapons capability “used in battlefield interrogation” which is now being brought to the streets. [...] IEEE, in a video describing 5G, explains that “beamforming” is indeed an aspect of 5G, a means of sending directed millimeter wave radiation directly to a target, such as for instance, a cell phone. [...]

“But what it implies also, says Mark, is the capability to direct a precision beam of high-energy pulses at a human—such as the human holding the cell phone or any humans in the way of the transmission. [...] This dielectric antenna is DEW – Directed Energy Weapon – which can transmit a beam like laser and cause unimaginable harm.”

You can see below dielectric antenna lens which is transparent and round the end of the green device on the left side of the picture:

Photo: Mark Steele

What Does SMART Stand for?

Today we have a lot of ‘smart’ attached to things like smartphone, smart meter, smart home. People think that if you have ‘smart’ attached to something, then it makes you or those who use it smart.

But actually, **S M A R T stands for Secret Militarized Armaments for Residential Technology** according to Mark Steele in the excellent documentary 5G Apocalypse – the Extinction Event.

“Smart” Devices Are Spying on Us 24/7

I found out that when the word “smart” is attached to a title of a device, it indicates that it emits radiation and conducts surveillance. These tools include “smartphones”, “smart meters”, “smart TVs” or smart home devices in general that connect to the Internet, according to The Guardian.

Smart televisions hooked up to the Internet can be used as surveillance tools. One advanced electronics company even warns customers in its SmartTV privacy policy that they shouldn’t

speaking private matters too close to their TV, according to BBC News.

According to Daily Mail, this is the disturbing phrase caught in the misnamed “privacy” policy, which allows this company to share this information with any party it sees fit: ‘Please be aware that if your spoken words include personal or other sensitive information, that information will be among the data captured and transmitted to a third party through your use of voice recognition.’

Those Who Expose the Truth Are Threatened

Today, Mark Steele, who exposes the truth about the 5G dangers is facing time in jail because of speaking the truth. This is to silence him as well as others who expose the truth about other “sensitive” issues.

He says, “My local authority Gateshead Council has orchestrated a criminal case and civil cases to silence me with the criminal appeal listed for the 28th of March 2019. They are seeking to imprison an honest citizen for speaking out about their covert activities namely the fitting of dangerous technologies that they didn’t at first comprehend due to their complete disregard of the law.” (EMF Refugee blog).

The genie is out of the bottle

“THESE FASCISTS AT THE LOCAL AUTHORITIES ARE TRYING TO TAKE AWAY YOUR FREEDOM OF SPEECH”

EXCLUSIVE

by Ian R Crane

THERE wasn’t a single LAMESTREAM reporter in court, so you’re not going to see or hear anything about this in the LAME-STREAM MEDIA.

Even though Gateshead Council would have loved to have had this hearing in secret the public gallery was once again - packed.

As with fracking, it’s important for people in communities to look at what’s being rolled out and challenge it.

It has to be a constant attack so that the industry and the government have no idea where the next challenge is coming from.

Do your own research. The reality is that this is a carcinogenic technology. It will cause cancer.

Ultimately, if we don’t

This is what Project Camelot said about this:

“Gateshead Council are seeking to get Mark Steele JAILED for asking persistent questions about the 5G Roll-out in his home town ... but each and every resident in Communities across the UK and the West need to be demanding answers from their elected representatives! 5G is scheduled to be rolled out across the UK and much of the so-called ‘Developed World’ in 2020

..."

Please support his campaign at GoFundMe.

HI I'M JOHN PATTERSON

I was a senior telecommunications officer for Telstra in Australia, responsible for the deployment of thousands of cell towers. When I discovered that the towers emit microwave radiation 50,000X higher than the legal limit, I sent a report into head office pleading them to do something. I was fired within 48 hours. So to get the word out, I took my friends tank and destroyed 8 tower sites. I was sentenced and served 20 months in jail, and I don't regret it. People need to know.

REMEMBER MY STORY

What Happened to Places Where They Activated 5G?

There were simultaneous fires in the 5 cities in South Korea when they activated the 5G. The Hindu reported on the activation of 5G in South Korea on April 4, 2019 and look what happened next day and reported by The Telegraph on April 5, 2019.

The Sun provided a map of the five cities affected by this disaster.

There was a total media blackout on this. There were 10,000 firefighters, 20,000 soldiers involved in the rescue operation. There were many casualties. How can it be? Because they were unnatural. They were caused by EMP – Electro Magnetic Pulse which one of the results are such unnatural fires (Raising the Vibration).

How Can You Know If 5G Is Being Deployed?

As millimeter waves of the 5G don't travel well, as they beam at such high frequency that can only travel in direct line from one point to another, they can easily be blocked if there are any physical obstacles in the way, according to patents.com.

Trees can block the 5G signals so they are being cut to the stump where they deploy the 5G wireless technology. You can see in the following pictures how they cut trees in the UK, Serbia, and in other places. Please pay attention to something similar in your environment.

Massive cutting of trees in Serbia, according to Balkan Green Energy News.

Trees being cut to the stump for 5G, according to Digital Survivor.

5G Is Being Deployed in Israel

Contrary to the rumor that this technology is not deployed in Israel, it is being deployed here with vengeance, although it was partly developed in this country.

Wi-Fi is a Real Danger for All Humanity - Dr. Martin Pall

The Connection between Radiation and Miscarriages

The epidemic of cancer at Rosh Ha'ain – the residents are against the cellular antennas (in Hebrew)

“Clear Evidence of Cancer” Concludes U.S. National Toxicology Program Expert Panel on Cellphone Radiation

What Does Research Tell Us about the Biologic and Health Effects of Millimeter Waves?

The dangers of millimeter waves of nonionizing electromagnetic radiation had already been known in the 1970s. Translations from Russian of studies from the former USSR Science and Technology Biomedical Sciences (GUO 28/77) (1977) show the biological effect of millimeter radiowaves, including:

“Morphological, functional and biochemical studies conducted in humans and animals revealed that millimeter waves caused changes in the body manifested in structural alterations in the skin and internal organs, qualitative and quantitative changes of the blood and bone marrow composition and changes of the conditioned reflex activity, tissue respiration, activity of enzymes participating in the processes of tissue respiration and nucleic metabolism”.

It should be noted that “The degree of unfavorable effect of millimeter waves depended on the duration of radiation and individual characteristics of the organism.”

(Article by N. P. Zalyubovskaya, Khar’kov, Scientific Research Institute of Microbiology, Vaccines, and Sera imeni Mechnikov, Kiev Vrabchenoye Delo in Russian No. 3, 1977, pp. 116-119).

What Is Being Done About It?

Protection from EMF Exposure

According to *‘Daily Mail Online’*, scientists, including doctors from the University of Columbia, appeal to the UN “to encourage the WHO to develop stricter EMF guidelines, while also educating the public on the risks.”

According to *‘ReachMD’*, the French parliament passed a comprehensive law that “protects the general public from excessive exposure to electromagnetic waves” in January 2015. Wi-Fi is forbidden in nurseries and allows primary schools to only turn Wi-Fi for specific lessons for children under 11.

You can read here the EUROPAEM EMF Guideline 2015 for the prevention, diagnosis and treatment of EMF-related health problems and illness.

According to this organization, the treatment for EMF-related illnesses is to reduce or completely eliminate the radiation source.

According to *‘ReachMD’*, 220 scientists from more than 40 countries have signed an international appeal to WHO and the UN that calls for protection from EMF exposure.

The People Are Fighting Back

People are fighting back by sharing their experiences online. You can read testimonies of microwave sickness on 5G Information.

An ex-DHS employee reveals that the shortage for TSA personnel is due to the current 5G millimeter wave technology used that caused a huge number of agents to suffer from cancer, according to 5G EMF Dangers.

According to Alt Health Works, people in California are fighting against installing 50,000 new 5G cell towers that are forced on them even in their own backyard!

Class Action Lawsuit against the deployment of 5G in the U.S. against the FCC by Municipalities Across the USA, according to HumansAreFree.com.

Scientists and Doctors Warnings about 5G and Wireless Technologies

Increasing number of people from all professions, ages, and walks of life from around the world experience similar symptoms due to the presence of mobile and wireless devices.

The FCC recently extended its current policy of involuntary irradiation of the public without adequately studying the potential health impact on everyone, especially, those most vulnerable to exposure to radiofrequency radiation.

These vulnerable populations include pregnant women, young children, unborn children, the elderly, teenagers, men of reproductive age, the chronically ill, and the disabled (Ronald Powell, PhD, Letter to FCC on 5G expansion).

INTERNATIONAL APPEAL STOP 5G ON EARTH AND SPACE

There are 91,382 signatures from 168 countries
In may 2019

FIGHT BACK

5G IS A CRIME AGAINST HUMANITY

Dr. Scott Eberle, a highly respected hospice physician, described his own development of electro-sensitivity in the November 2016 issue of the SCCMA Bulletin. He makes great effort to continue living his life, maintain healthy existence, working in his profession, and interact with his colleagues.

- International Appeal – Scientists call for protection from non-ionizing electromagnetic field exposure.
- Scientists and Doctors Demand Moratorium on 5G
- Letter to the FCC from Dr. Yael Stein MD in Opposition to 5G Spectrum
- In 2016, 235 medical doctors and scientists signed the 5G appeal which was submitted in 2017 to the European Commission.
- The International Appeal to Stop 5G on Earth and in Space by doctors, scientists, and environmental organizations. As of June 7, 2019, 100,091 from at least 187 countries signed this appeal.

Dr. Sharon Goldberg Testifies at Michigan’s 5G Small Cell Tower Legislation Hearing October 4, 2018

A written statement has been submitted by Planetary Association for Clean Energy, Inc. a non-governmental organization in special consultative status. It stated that “5G is cruel, inhuman and degrading treatment under resolution 39/46” (What Is 5G and the IoT?).

Cities Blocking the 5G Rollout

As people are becoming more aware of the health risks associated with 4G/5G densification, they take action worldwide. Cities call and issue resolutions for further research on these technologies before deployment.

Belgium, Brussels is the first major city to block 5G deployment due to health concerns

In the U.S., at least 7 Pacific Northwest cities pushback against 5G rollout

In Switzerland, the cantons of Neuchatel, Vaud, and Geneva halt the 5G rollout until proven safe.

Mill Valley in Northern California blocks the deployment of 5G cell towers within their town.

The Prime Minister of Poland signed the global appeal to stop 5G.

What Can We Do to Reduce the EMF Exposure?

5G devices should not be brought home at all, including 5G smartphones and routers. Try to use a “dumber” phones – landline and previous cell phone generations. I’m considering going back to 3G phone.

Grounding or earthing on a daily basis can be really good for you.

I also found some good suggestions how to reduce EMF exposure written by Dr. Joseph Mercola on Humans Are Free. Take whatever suggestions you resonate with:

Using Stetzer filters to decrease the level of dirty electricity or electromagnetic interference being generated

Connect your desktop computer to the internet via a wired Ethernet connection and be sure to put your desktop in airplane mode.

Opt for the wired versions.

Avoid carrying your cellphone on your body unless in airplane mode and never sleep with it in your bedroom unless it is in airplane mode.

Seek to radically decrease your time on the cellphone.

Mass awakening or mass depopulation?

We are our own saviors and we are the ones who will determine the final outcome.

I'm dedicating this track to all those involved in the fight for liberating humanity and earth worldwide. We are the ones who fight for our health, lives, freedom, happiness and well-being which are our birthright!

This is the second article that I received in my information sources on 5G in the past few days. It is important that this information is made known to the public for their safety and health. Robert David Steele, not-related to Mark Steele mentioned here and before, is a former U.S. Marine officer and ex-CIA case officer, and he flatly will tell you that 5G pitched as a Communications system is a deadly Weapons System. I have been covering 5G and the Internet of Things for two years. YOU NEED TO KNOW OF THE DANGERS OF 5G.

If you want to learn more about the dangers of 5G, I did an 11-part series titled: **“666,5G, and UPC Code”** Use the link to learn about the 5G technology and dangers of it: <http://jesusisthewaythetruththelife.com/node/22>
