

# 5G News Update

Part 3  
February 12, 2022

ETNO, an industry body that represents European telecom operators, finds that the share of Europeans reached by **5G** has doubled from 30% in 2020 to 62% in 2021.

This doubling of population coverage was accompanied by an increase in investment. According to ETNO, Europe recorded its highest investment effort in four years, hitting €52.5bn in Capital Expenditure (CapEx) in 2020 across the whole telecoms sector.

Yet compared to other international markets, Europe's **5G** rollout is trailing. **5G population coverage has reached 93.1% in the US and 93.9% in South Korea.** Virtually all this infrastructure for **5G** was rolled out while the world was living in fear of a so-called "*novel rogue virus*". It was of such importance, telecom installers worked six and seven days a week with a government "*essential service*" waiver, when local economies were shut down like a bank vault on Friday. Swarms of police cars blocked church parking lots on Sunday mornings in Louisville, KY to block congregational parking. Police fined churches for attempting to hold worship services or musical services. None of it made much sense to people but "*Fear*" enabled the march to tyranny to continue.

**As 5G Is Ushered In, Evidence Americans Are Already Bathing In Toxic Radiation, With Overt and Covert 'Electronic Weapons' Making Us Ill and Killing Us for Decades**

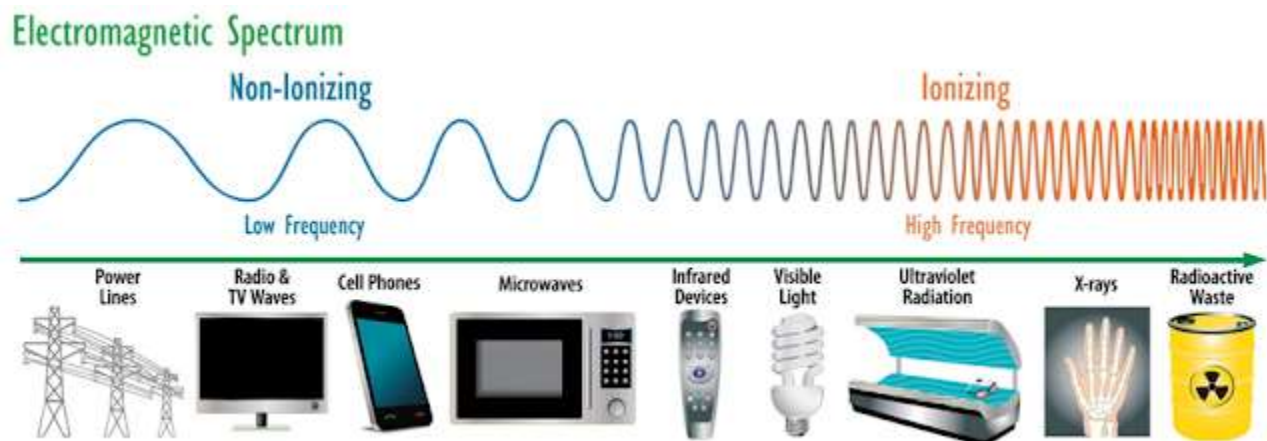

**By Alan Barton - All News PipeLine**

The Magnetron tube – that is the primary operating source of the microwaves inside your “radar range” or microwave oven. Usually operating at 4.1Kv (Kilovolts, or 4,100 volts) with varying output current levels depending on the “wattage” yours is rated at. Most seem to be in the 600 to 1200 watt range, with some higher power and some lower power models available. A few years ago there seemed to be a lot of talk about how safe they are, and even many writers saying they should not be in your homes, but why? [The FDA says](#) that “Microwave radiation can heat body tissue the same way it heats food. Exposure to high levels of microwaves can cause a painful burn. Two areas of the body, the eyes and the testes, are particularly vulnerable to RF heating because there is relatively little blood flow in them to carry away excess heat. ....Most injuries related to microwave ovens are the result of heat-related burns from hot containers, overheated foods, or exploding liquids. **Most injuries are not radiation-related.** That said, there have been very rare instances of radiation injury due to unusual circumstances or improper servicing. In general, microwave oven radiation injuries are caused by exposure to large amounts of microwave radiation leaking through openings such as gaps in the microwave oven seals” with some special warnings about heart pacemakers in the early ovens. Not much of a problem according to our government with regulations saying they cannot put out more than 5 milliwatts (or 0.005 watts) per square centimeter. But microwave ovens still present a powerful source of microwave radiation even though it is mostly shielded from us so you need not worry too hard about cooking your brain anytime soon.

*Magnetron tube for a microwave*

EMF – *Electric and Magnetic Field* – [The National Institute of Environmental Health Sciences](#) has an easy to understand informative overview of what that term means. Basically, any operating electric system has some electric and magnetic forces surrounding it just from the electrical energy entering because an electric field is generated along with its corresponding magnetic field that is at right angles to the electric field. I do not want to go too far into the details but suffice it to say any electric system has EMF radiation associated to some degree or the other; even a power cord has both an electrical and magnetic field when energized. Generally EMF is grouped into two primary categories; Non-ionizing and ionizing primarily based on its frequency. We won't bother with the ionizing type here because that is in the very high frequency ranges of sunlight, x-rays, gamma rays and so forth; but radio waves, microwaves, cellphones, the household 60 cycles AC in your home, computers, Wi-Fi and the like are non-ionizing EMF radiation.

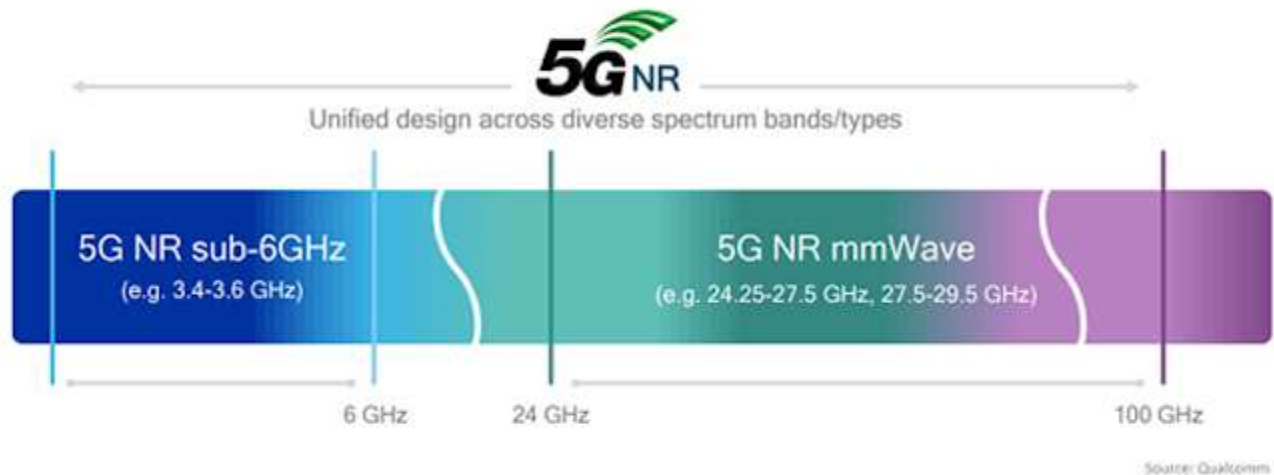

Note in the second video below how much stronger the EMF is in proximity to a **5G** cell tower, and then compared to the output of a **5G** cellphone. We are surrounded, we are bathed deeply in RF radiation from many sources. The video shows the immediate strengths, but does not allow for accumulated radiation levels or effects. That is the great error in his assuming they are not dangerous. Microwave ovens cook not just by the immediate power output but by the continuous accumulating energy imparted to the food inside, and airline crews are given exposure levels on a time basis to indicate harmful radiation just as nuclear power station workers are. That is why people that are always on their cellphone have far higher incidences of brain cancers. While the [government states that there is no difference](#) worthy of note, we have all witnessed especially lately how little we can trust them. Rather, let us look inside the industry studies for a more pragmatic observation and keep in mind the nature of prolonged exposures have. [Electromagnetic Radiation Safety](#) on their website states in an article titled "*Brain Tumor Rates Are Rising in the US: The Role of Cell Phone & Cordless Phone Use*" that Glioma, the most common malignant brain tumor, has increased most noticeably in the 20-29 year age group; and that Meningioma, the most common form of non-malignant brain cancer, has increased considerably as well in most age groups with higher usage corresponding to higher cancer rates. And this is all before the new **5G** cellphone networks are considered.

The [FCC wants amateur radio operators](#) to evaluate the RF (Radio Frequency) exposure rate their stations have, and that is not because there is no risk from poorly maintained equipment or poor station design and operation. It is there because there is an actual risk factor of RF exposure, although in most cases very little risk. The point is that it exists and it is proximity to the source that determines the radiation levels you are subject to. See also the [OSHA page](#) on Radio Frequencies and microwave radiation.

EMF in the RF range has been used as weaponry in many forms, including microwave emissions to disorient US embassy workers, energy beams to disrupt ordinance, very high powered units to destroy communications and other systems and much more. As used in the much higher frequencies of light in a collated beam, lasers are very deadly. *“EMF exposure levels are monitored and enforced at the global, national, and local levels in a varied patchwork of procedures by multiple organizations, depending on where you live..... ICNIRP is a non-governmental organization recognized by the [World Health Organization \(WHO\)](#).... The ICNERP guidelines currently specify that people at work shouldn't be exposed to current electric densities in the body's head, neck and trunk of greater than **10 mA m-2 (the “basic restriction”)**.....**A lower limit of 2 mA m-2 is given for the general population to account for children and people who may be more sensitive**”* is how [Health line covers](#) this in their recent article wondering if you should be worried about EMF levels. Please note that the U.S. standard of 5 milliwatts per square centimeter is in between the workplace and the general population limits of the above if you consider that 1 mill watt equals one milliamp at a 1 volt rating. *“A milliamp ere is one 1/1000th of an ampere. **It's the level above which electric and magnetic fields have on bodily tissue and cognitive brain function**”* according to the [NIH study](#) that this information was taken from while the EPA *“takes a difference stance on low levels of EMF radiation. The EPA states in its [EMF Guidelines](#) that it neither recommends nor imposes limits on low-level EMFs because there's no scientific evidence that low levels of electromagnetic radiation damage human health.”* So it would seem that the Feds cannot get any consensus on the matter, which is not a surprise.

The NIH (National Institute of Health) published a study saying that *“**Microwave frequency electromagnetic fields (EMFs) produce widespread neuropsychiatric effects including depression**”* and continued on saying *“microwave/lower frequency electromagnetic fields (EMFs) act via voltage-gated calcium channel (VGCC) activation. Calcium channel blockers block EMF effects and several types of additional evidence confirm this mechanism. Low intensity microwave EMFs have been proposed to produce neuropsychiatric effects, sometimes called microwave syndrome, and the focus of this review is whether these are indeed well documented and consistent with the known mechanism(s) of action of such EMFs. VGCCs occur in very high densities throughout the nervous system and have near universal roles in release of neurotransmitters and neuroendocrine hormones. **Soviet and Western literature shows that much of the impact of non-thermal microwave exposures in experimental animals occurs in the brain and peripheral nervous system, such that nervous system histology and function show diverse and substantial changes.**”* This is the cause of the Embassy personnel that have had such a difficult

time while in our embassies around the globe. This is a weapon of war they are being impacted by. “...*the mechanism of action of microwave EMFs, the role of the VGCCs in the brain, the impact of non-thermal EMFs on the brain, extensive epidemiological studies performed over the past 50 years, and five criteria testing for causality, all collectively show that various non-thermal microwave EMF exposures produce diverse neuropsychiatric effects.*”

As **5G** frequency spectrum ranges from about 700 MHz (700 Mega Hertz) up to 100 GHz (Giga Hertz) we need to look at specific carriers usage to be accurate, but what is needful at the moment is that they are all in Ultra High (UHF) through microwave frequencies and that means a number of things important to know. Specifically, that they are line of sight only, that the energy dissipates quickly in the atmosphere and even quicker through any blockages such as tree leaves, building walls, and so forth. Higher frequencies equal more sensitivity to the effects of the radiation as well as closer distances from the radiating elements. And that means a much higher propensity to do physical damage to our bodies. The **inverse square law** states that the magnitude of one's exposure to RF or EMF radiation drops proportional to the square of one's distance from the source. That is illustrated nicely in the video below showing the effects of radiation leaking from microwave ovens, the first video below. That is why you need to be fairly close to your cellphone (and remember the accumulative effects too) to have the possibility (or should that be probability) of cellular damage from the radiation it emits. It appears that the higher the frequency and the higher power required making those higher frequencies work properly is the largest **factor in the 5G networks being so dangerous.**

This also means that the **distance you are from any RF EMF is the key** to your safety. "If you want to be completely **safe from EMF radiation, distance is the only sure-fire way.** The only problem with that is that it is virtually impossible to get away from all EMF emissions today unless you live at the North Pole with no cell phone and no electricity. **The wise solution is to know where your sources are and reduce all levels in your daily environment to safe levels.**" And since that is not feasible, we must do what we can to maintain our distance from strong sources of **5G.**

But there may be a slim glimmer of hope, but I will not put any funds betting on it actually amounting to much. 'Natural News' commented on a story by 'The Epoch Times' and said "...it has been known for quite some time that **cellular radiation of all kinds is dangerous to wildlife as well as to people.** And yet the federal government has turned a blind eye to the science and instead promoted the interests of Verizon, AT&T and T-Mobile.

*"We have more than enough research to trigger new regulatory action to protect wildlife," a spokesperson from EHT is further quoted as saying.*

*"The FCC should have done a full review of the environmental impact of **5G** network deployment before streamlining hundreds of thousands of **5G** cell towers across the nation."* They also quote CNN in this snippet; *"With **5G** coming to neighborhoods across the country, the **levels of wireless radiation will significantly increase,**" warns Davis, who believes that the time is now to act.*

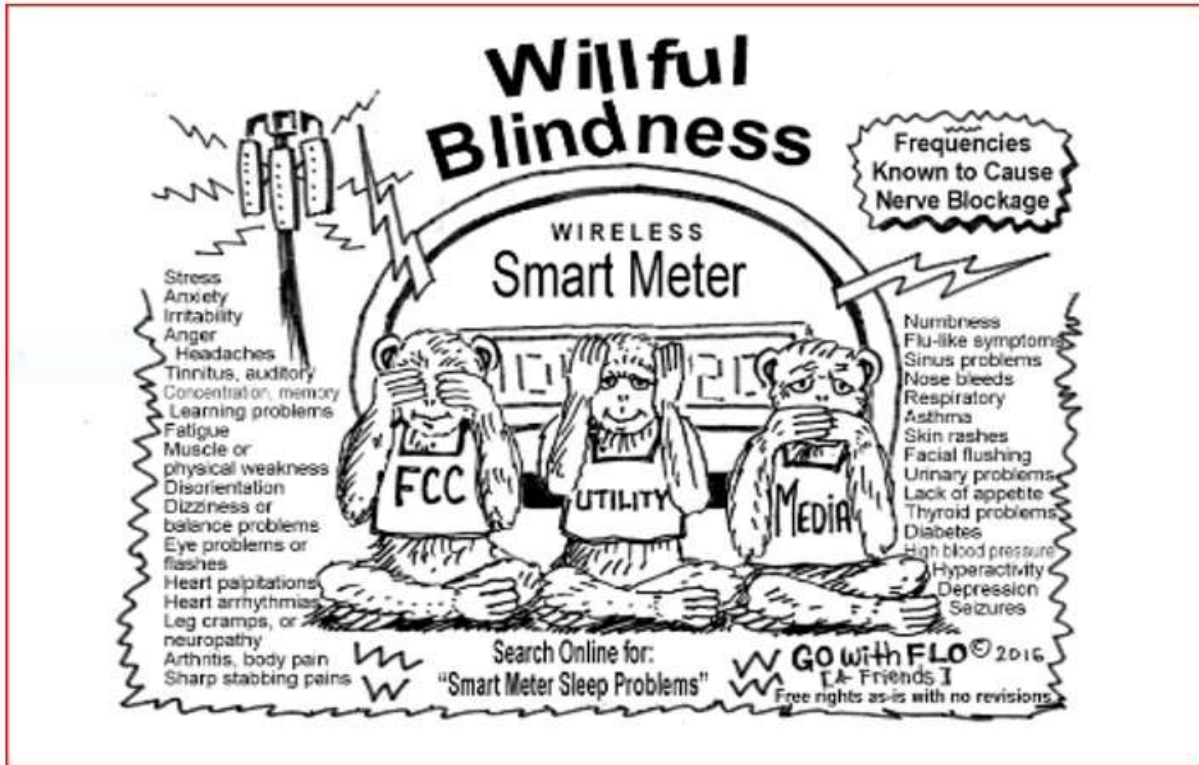

*"We do not have the luxury of time to continue to debate this issue with the wireless industry. Adults, children, pets, wildlife, and our environment are all vulnerable."*

True enough, and we haven't even broached the ideas of how it reacts to the impurities and systems imbedded in the Covid murder weapon, the vax commonly known as the Kill Shot. There has been much written on it, but I am as of yet not satisfied with the science involved so I will leave it at this point for a future update.

Perhaps in a very dark manner we may have some benefits to our health with a hard grid down scenario, but the actual facts of it would kill off perhaps 90 to 95% of our population in the long run. Not a good trade, but seemingly in our future regardless. Until then, reducing our exposure to RF fields and other types of EMF would seem a good choice to make (as I sit in front of my computer with three monitors and ham radio equipment on the desk with Wi-Fi and the like all going on). Especially with exposure to **5G** and it's mostly unknown but predicted harsh future effects on our bio-systems.

The above excerpt appeared in the web page "All News Pipeline" and since almost every kitchen today has one of those Microwaves, it helps elucidate my larger point that **5G** is or soon will be the death knell of humanity. I was not able to copy the URL video data and include it with this segment.

Since part 2 was posted the number of countries dropping their Covid-19 restrictions has risen from 9 to 12 in one week, further proof that Covid-19 does not exist. I am not denying that something was killing people, but it was a "bioweapon" and it was created by evil men in a lab with an agenda to kill people. I have been right about **5G** all along for using Covid as a cover story for **5G**, but what joy I might have had is overshadowed by the sadness and grief millions have faced the past two years and comes in knowing that millions more are going to die from the vaxxes. Even more will die from their being bathed in constant toxic **5G** wireless EMF at dangerous levels.

### Science for Sale

In February of 2016, the widely respected Center for Public Integrity published an in-depth series exploring mercenary science entitled ‘Science for Sale. “Science and opinion have become increasingly conflated, in large part because of corporate influence. As we explain in “Science for Sale,” an investigative series by the Center for Public Integrity and co-published with Vice.com, industry-backed research has exploded — often with the aim of obscuring the truth — as government-funded science dwindles.

The momentum of scrutiny towards mercenary corrupted science has been corrupted by the telecommunications industry.

‘Natural Blaze’ has been one primary media resource for investigative journalism revealing the extent to which tobacco scientist Peter Valberg of Gradient served as a safety expert for smart meters.

The primary public researchers who were willing to discuss mercenary science have failed to extend the scope of their concern to confronting the corruption of EMF/RF/5G/IOT/IOUT science.

We are in a race to the bottom of the barrel regarding stewardship of the environment, as the wireless paradigm repeats the assaults inflicted by the wanton use of chemicals.

Only those communities, states, and nations that stop the lying have the opportunity to stop the politically charged, manufactured, perpetrator, victim, accuser, abuser dynamic.

### **British telco Vodafone has announced that it has switched on the UK's first OpenRAN site to carry live 5G traffic. Vodafone says this is the first step in delivering OpenRAN at scale in the UK.**

To celebrate the deployment of the site, the first **5G** video call over OpenRAN infrastructure was made by Vodafone UK's Chief Network Officer Andrea Dona to the Minister for Digital Infrastructure Julia Lopez on 11 January.

Julia Lopez said: *"This phone call, the first in the UK to be made using **5G** OpenRAN infrastructure, marks a big step forward for innovation in UK telecoms."*

*"OpenRAN will have an important role to play in the future of our mobile networks and I congratulate Vodafone for being the first to make it happen."*

**The operator plans to have 2,500 OpenRAN sites by 2027.**

The site, which is located in Bath was delivered in partnership with Samsung, Wind River, Dell, Intel, Keysight Technologies and Capgemini Engineering.

### **Vodafone Germany launches 5G standalone network at University Hospital**

Vodafone says this will enable the university to begin developing **5G** use cases.

German telecom operator Vodafone has launched a **5G** standalone network at The University Hospital Schleswig-Holstein's (UKSH) campus in Kiel.

Vodafone says in the future, patients at the UKSH will benefit from remote examinations, digital consultation, medical technology sensors connected via IoT, and artificial intelligence in diagnostics.

The telco also suggests **5G** could be used in the operating theatre to wirelessly link medical devices that were previously connected with cables. UKSH has also launched a competition to develop **5G** use cases in a hospital environment.

### **Commuters using railroad trains are now at great health risk to 5G Wireless Energy**

Passengers on packed trains could unwittingly be exposed to electromagnetic fields far higher than those recommended under international guidelines. The problem? Hordes of commuters all use their mobile phones at the same time. New studies are going to awe the world when they figure out the true dangers of cell tower and cell phone radiation.

## Apple to unveil low-cost 5G iPhone – media

This will be the first update to the SE model in two years

Apple is planning to release its new low-cost iPhone on or near International Women's Day, March 8, Bloomberg reported on Friday, citing sources in the company.

The company is also set to unveil an updated iPad.

According to Bloomberg's sources, the new smartphone will be the first update to Apple's iPhone SE model in two years. It will support **5G** networks, have an improved camera, and a faster processor. Apple also reportedly plans for the phone to be medium-priced, although its exact cost has not yet been revealed.

Sources say, however, that the launch date could be postponed amid production delays and supply-chain issues. Like nearly all tech firms, Apple is still overcoming the shortage in semiconductor chips, widely used in the brand's products.

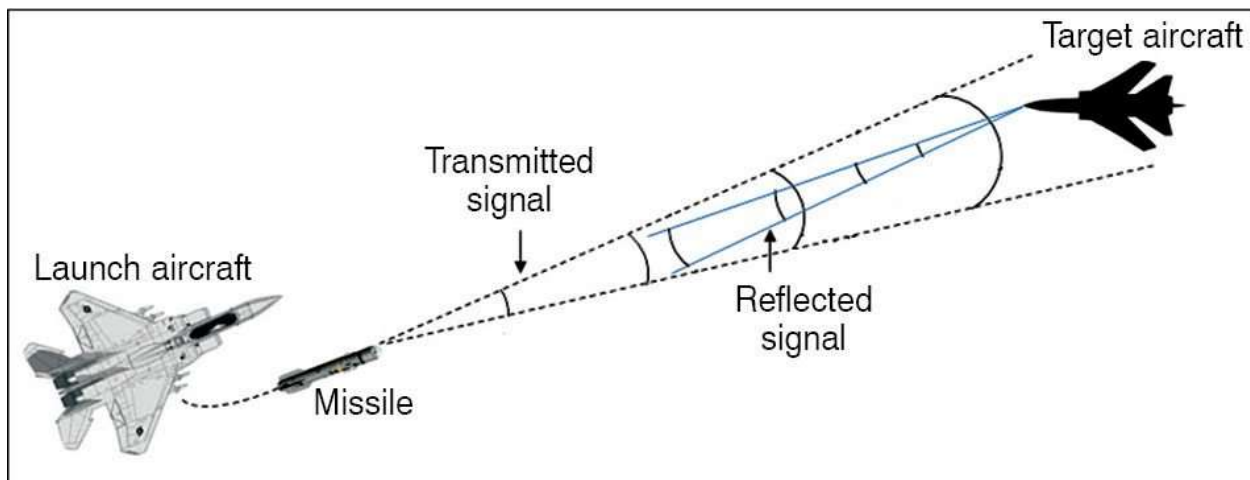

However, the company posted record sales over the holiday quarter in January and gave an optimistic forecast for 2022. The company has not responded to requests for comment, and no official confirmation of the iPhone release date has been issued so far.

What is very much a concern is that if this is truly a **5G** cell phone, the energy of **5G** would fry its inside components like bacon in the upper 10-GHz range and higher. I am seeking to determine if this is another Apple marketing tool or if it has modulation limitations. This is something that everyone should stay away from. **The 5G system is really a weaponized microwave weapon.** As for budget priced it will most likely be in the

\$800 range, and that is not cheap for working folks. I am told Apple's low-cost **5G** iPhone, only costs \$1,999 for the base model. Wait until they mandate that everyone has a **5G** iPhone. Wait and see but I can see it coming mandated for health and safety reasons!

Watch for the moment the government requires everyone to have a **5G** cell phone, and that can't be far down the road. The endgame is to get everyone linked to the Cloud. As long as your **5G** and even 4GLTE phones is switched on or off your location can be triangulated. Phones sold in North America have come with a GPS chipset for about 20 years or so. All cell phones manufactured in the last twenty years have a GPS "locator" chip in them so they can be located or misplaced. About once a month my wife will ask me to call her phone. When I call her misplaced phone it plays the tune "Pennies From Heaven". If it is in the house she listens to where the tune is coming from.

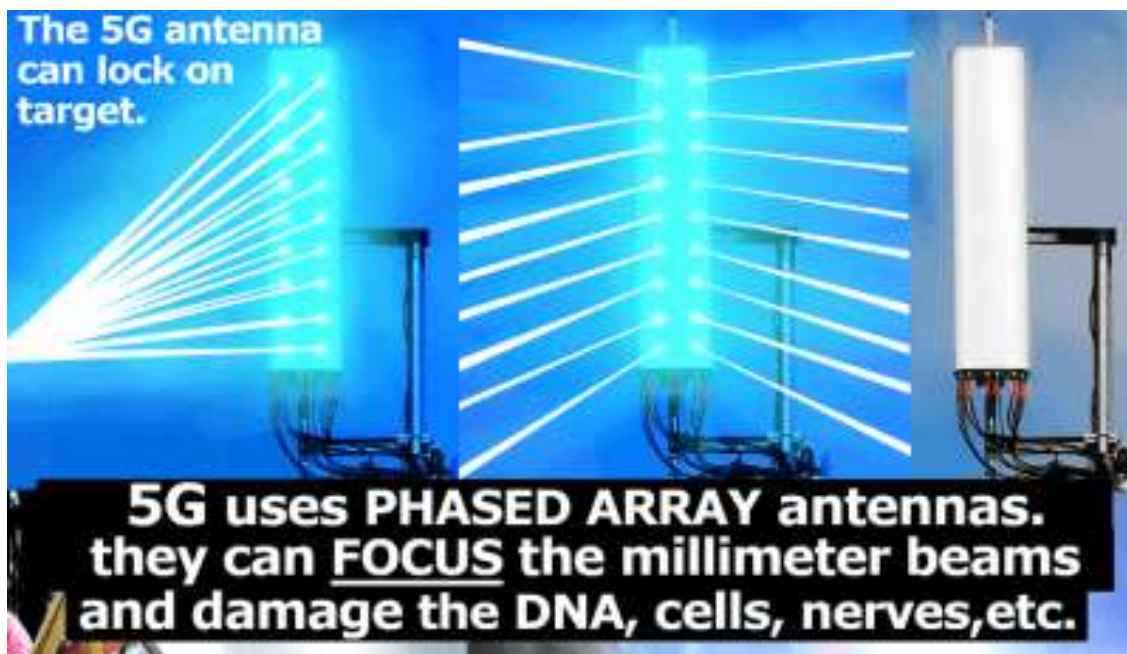

There is no getting around the fact that if you have a **5G** phone you are carrying around a target weapon of mass destruction. A **5G** phased antenna puts you into range of a **5G** transmitter base station or small cell antenna. All that is necessary is to send you a "kill shot" beam of modulated EMF by pinging your cell phone number. It would be like an U.S. Navy EA-18G "Growler" version of the F18 EWS (Electronic Warfare System) pointing a radar beam and locking onto an enemy aircraft. All an aircraft weapons officer has to do is to lock onto that radar beam window, and you can say goodbye forever! EA-18G Growler electronic attack aircraft can detect targets over longer distances and share information more rapidly than ever before. That window range is six feet. Where else do you recall during the past two years about social distancing six feet?

The illustration above is a simplified version of what is involved in weapons technology relative to the EA-18G Growler that fly off the decks of U.S. nuclear aircraft carriers. Once the launch aircraft radar locks onto the target aircraft there is virtually no evasive maneuver that will break the electronic lock on the target aircraft. In a few years these guys end up getting cancer of the testes and reproduction organs since they are sitting atop the electronic warfare weapons package. In the meantime, the DoD will not

recognize it as “service-connected” injury related, and to do so would require compensation!

## Densified 5G A Cofactor in Covid-19?

An **antenna array** (often called a '**phased array**') is a set of 2 or more antennas. The signals from the antennas are combined or processed in order to achieve improved performance over that of a single antenna. The antenna array can be used to:

- increase the overall signal gain
- provide diversity reception
- cancel out interference from a particular set of directions
- "steer" the array so that it is most sensitive in a particular direction
- determine the direction of arrival of the incoming signals
- to maximize the Signal to Interference Plus Noise Ratio (SINR)

The phased array antennas can be of various types however, there are four commonly used types:

1. Passive Electronically Steered Array (PESA)
2. Active Electronically Steered Array (AESA)
3. Digital Beam Forming (DBF)
4. Hybrid Beam Forming (HBF)

For now there is no need to go into the technical details from the previous page photo illustrations other than to **note those words above: "steerable" and "beam forming"**. The value and utility of an antenna array lies in its ability to determine (or alter) the received or transmitted power as a function of the arrival angle.

A recent study from the '*Journal of Clinical and Translational Research*' shows a correlation and reviews the potential physiological mechanisms that could be involved between densified 5G deployment and severity of Covid-19 disease symptomology.

Early on in 2020 I was posting articles on these military concepts and ideas so it's really great to finally see this being published in real scientific journals and clarifying these correlations. It was certainly sensible to me based on the simple understanding of how exposure to wireless radiation opened up the Voltage Gated Calcium Channels leading to improper balance of Calcium in the cells. Dr. Martin Pal has written about this as well. And since Dr. Pal has provided expert testimony to Congress, he presents it terms that the non-professional will understand. Despite the fact that I was a United Methodist pastor, my prior diversified work experience and educational background has not impeded the 'learning curve', if at all, it accelerated my ability to be a 'quick learner'.

While this might sound like a small issue the downstream effects of calcium imbalance are significant and this is not the only imbalance created by exposure to EMF.

What they did in this study was investigate mechanisms for WCR (wireless communications radiation, a sort of generalization for wireless exposure of various frequencies) as **a cofactor for Covid-19 infection.**

From the abstract:

By crossing boundaries between the disciplines of biophysics and pathophysiology, we present evidence that WCR may: (1) **cause morphologic changes** in erythrocytes including echinocyte and rouleaux formation that can contribute to hyper coagulation; (2) **impair microcirculation** and reduce erythrocyte and hemoglobin levels exacerbating hypoxia; (3) **amplify immune system dysfunction**, including immunosuppression, autoimmunity, and hype-inflammation; (4) **increase cellular oxidative stress** and the production of free radicals resulting in vascular injury and organ damage; (5) **increase intracellular Ca<sup>2+</sup>** essential for viral entry, replication, and release, in addition to promoting pro-inflammatory pathways; and (6) **worsen heart arrhythmias** and cardiac disorders.

This study references and seems to be building upon a study from earlier in 2021 by Angela Tslang and Magda Havas which investigated the correlation of statistics on death and sickness based on exposure to densified mmW **5G** (millimeter wave is the higher frequency bands of **5G** that are more infrastructure dependent and therefore have only been deployed in larger cities that have managed to develop the invasive infrastructure required for this.

From that study you can see the details:

COVID-19-attributed case and death rates for the U.S.A. were analyzed through May 2020 in three ways – for all 50 states, the country's largest counties, and the largest counties in California – and found to be statistically significantly higher for states and counties with compared to those without **5G** millimeter wave (mmW) technology. **5G mmW index was a statistically significant factor for the higher case and rates in all three analyses, while population density, air quality and latitude were significant for only one or two of the analyses.** For state averages, cases per million were 79% higher (p = 0.012), deaths per million were 94% higher (p = 0.049), cases per test were 68% higher (p = 0.003) and deaths per test were 81% higher (p = 0.025) for states with vs. without mmW. For county averages, cases per million were 87% higher (p = 0.005) and deaths per million were 165% higher (p = 0.012) for counties with vs. without mmW.

The newer study got into the gory details of where the first "outbreaks" were and the **5G** technology in that area:

COVID-19 began in Wuhan, China in December 2019, shortly after city-wide **5G** had "gone live," that is, become an operational system, on October 31, 2019. COVID-19 outbreaks soon followed in other areas where **5G** had also been at least partially implemented, including South Korea, Northern Italy, New York City, Seattle, and Southern California. **In May 2020, Mordachev [1] reported a statistically significant correlation between the intensity of radiofrequency radiation and the mortality from SARS-CoV-2 in 31 countries throughout the world. During the first pandemic wave in the United States, COVID-19 attributed cases and deaths were statistically higher in states and major cities with 5G infrastructure as compared with states and cities that did not yet have this technology [2].**

In this study they will go on to discuss WCR as a persistent environmental stressor and emphasize it as a factor in weakening the host making it more likely to submit to the disease but don't go as far as considering the symptoms that are right now referred to as Covid-19 as a potential radiation sickness syndrome.

It's understandable that they don't go there because even authors like Beverly Rubik and Robert Brown at least want to get their work published somewhere and deviating from the germ theory of disease is like heresy in the scientific community.

We explore the scientific evidence suggesting a possible relationship between COVID-19 and radiofrequency radiation related to wireless communications technology including fifth generation (5G) of wireless communications technology, henceforth referred to as WCR. WCR has already been recognized as a form of environmental pollution and physiological stressor [3]. Assessing the potentially detrimental health effects of WCR may be crucial to develop an effective, rational public health policy that may help expedite eradication of the COVID-19 pandemic. In addition, because we are on the verge of worldwide 5G deployment, it is critical to consider the possible damaging health effects of WCR before the public is potentially harmed.

They go on to discuss the wide range of frequencies that have been used for so called 5G rollouts (600 MHz to up close to 100-GHz which is higher than I've heard of in actual commercial use). Any frequency range higher than 20-GHz is health and life-threatening. It is a well-established medically proven fact that 5G 60-GHz consumes 98% of the oxygen in the lungs, and results in immediate death.

It does appear that there have been challenges in deploying full scale mmW 5G due to the infrastructure dependence these high frequency technologies have. The reason is simple, the higher the frequency the shorter the transmission (but also the more data they can pack on the signal) so this means that the mmW 5G such as was deployed in Wuhan, China required antennas basically on every block (tens of thousands of them in the city).

Since the real reason that globalists and big-tech wants 5G (regardless of whether the public wants it) is to build out the totalitarian surveillance grid they would prefer the mmW 5G because it has the capability of sending them more data about you that they can either serve to their advertisers or to your totalitarian government for monitoring its citizens depending on how far they get with their plan of global governance and Agenda 2030.

Reading through their description of Covid-19 syndrome is very interesting:

Ing et al. [4] determined 80% of those affected have mild symptoms or none, but older populations and those with comorbidities, such as hypertension, diabetes, and obesity, have a greater risk for severe disease [5]. Acute respiratory distress syndrome (ARDS) can rapidly occur [6] and cause severe shortness of breath as endothelial cells lining blood vessels and epithelial cells lining airways lose their integrity, and protein rich fluid

leaks into adjacent air sacs. COVID-19 can cause insufficient oxygen levels (hypoxia) that have been seen in up to 80% of intensive care unit (ICU) patients [7] exhibiting respiratory distress. Decreased oxygenation and elevated carbon dioxide levels in patients' blood have been observed, although the etiology for these findings remains unclear.

From my studies all these symptoms have been previously attributed to the "cumulative exposure to wireless radiation" but I'm sorry that I don't have at hand specific references to that except to suggest reading the book *'The Invisible Rainbow'* by Arthur Firstenberg which has extensive references on these topics. I am a lone ranger at this and never foresaw the need to catalog or index the more than 65,000 documents and 50,000 emails on all of this over the past few years since 2012. I started out in July, 2010 investigating Wi-Fi when I developed blisters on my lower legs and leakage of lymph fluid within five days of the Wi-Fi installation by Verizon.

Aside from that I'd like to point out that for many decades powerful entities have thrived on blaming disease conditions on invisible viruses to skirt liability and they have largely managed to get away with such tactics. I believe this is a perfect example of that and it's especially apparent in the above quoted paragraph because these scientists that write about "Covid-19 can cause insufficient oxygen levels (hypoxia)..." have no basis for assertion that a virus causes this as they have no proposed mechanism, however there is a mechanism for explaining hypoxia as radiation poisoning!

While they didn't discuss this in the current study they did review a ton of previously published studies and correlated the effects of exposure to wireless radiation and the effect attributed to Covid-19 side by side and showed that they have very similar symptoms.

They compared these five areas: Blood Changes, Oxidative Stress, Immune System Disruption & Activation, Increased Intracellular Calcium, and Cardiac Effects.

The results are rather revealing to the critically minded.

Here's an example with Blood Changes:

#### **Blood changes from WCR**

Short-term: rouleaux, echinocytes

Long-term: reduced blood clotting time, reduced hemoglobin, hemodynamic disorders

#### **Blood changes from Covid-19**

Rouleaux, echinocytes

Hemoglobin effects; vascular effects

→Reduced hemoglobin in severe disease; autoimmune hemolytic anemia; hypoxemia and hypoxia

→Endothelial injury; impaired microcirculation; hyper coagulation; disseminated intravascular coagulopathy (DIC); pulmonary embolism; stroke

Looks pretty similar eh?

With this in mind hopefully we'll be seeing similar studies published showing the similarity between the symptoms attributed to Covid-19 and the adverse effects of the Covid-19 shots!

As more studies are published you'll be seeing more of these reviews here. Please note that I've renumbered the references below so they make more sense since some of these are secondary references mentioned in some of the quotes used herein.

## Former Vodafone Boss Blows Whistle on 5G Corona Virus Agenda

Former Vodafone Boss Blows Whistle on **5G** Corona Virus Agenda (Video & Transcript)!! This is the largest global cover-up in history for the impact on human beings, based on technological advancements.

February 5, 2022

The transcript testimony that follows first appeared on the Internet in the spring of 2020. It has since been re-posted. It is one of hundreds of videos and transcripts that I have saved over the past two years. The re-posting has saved me a huge amount of time to locate it in my files which contain 65,000 documents, 50,000 emails, and 700 video files.

---

*"I was the head of the largest business unit at Vodafone. Their headquarters in Newberry between 2013 through 2015. Um, I was privy to a number of the new tech technologies that were coming down the pipe that was going to be implemented, naming-ly the internet of things, and secondly, the **5g** technology.*

*I knew a long time ago that **5g** was dangerous, but I didn't understand the correlation with the Corona virus, which I am now doing. And I want to be able to explain that to you. So what is happening, um, is a deliberate strategy to roll out **5G**, which is the fifth generation internet. Um, radio spectrum frequencies that enables mobile phones, smart phones, and all devices to function on a much faster processing ability and with the*

*introduction of AI and artificial intelligence and the internet of things, where all devices will be connected.*

*So whether it's your car, whether it's your phone, whether it's your fridge refrigerator, whether it's your electricity in your house, it's all going to be on a smart grid, effectively a type of matrix, unfortunately, sorry to use that term. So what is happening is that this technology has to be rolled out globally.*

*My companies I used to work for, and as they're running their largest worldwide business unit, um, is Vodafone, Vodafone, or in partnership with. Who way or highway, whatever you call them, the Chinese telecoms company. And they have been rolling out systematic **5g** implementation in multiple locations. What's the relevance, the frequency that they're using.*

*And I also ran a telecoms company back in 2010 through to 2013, 14. Some of you will be aware that specialized in radio spectrum that we, this is ability to take external signals. From satellites into buildings. Um, and so that the frequency that you experienced in power on your phone is the same in the building, as it is outside of the building.*

*When mobile networks were created, initially, they thought people will be on the road all the time. Hence why they were called mobile phones. But actually what happened is people use their mobile phones in buildings and the signal wasn't strong enough dependent for penetrate buildings. That's called radio spectrum.*

*And there. Um, megahertz frequencies, et cetera. So the **5g** frequency is a very high frequency, very, very, very high frequency. It is just below the classification of a weapon. Uh, and I'll tell you. The frequency that they're using, which is 10 times faster than 4g. Unfortunately, when it comes into connection with human bodies causes cell poisoning, cell poisoning.*

*So our body's trying to fight the radiation that is in the form of cell poisoning because of this frequency. It is effectively radiation. And what happens is our body. Uh, kick out the toxicity or toxins with some protein proteins and some DNA RNA from ourselves in the form of a chemical, which is called a virus.*

*And most diseases are excretions from cells that we are trying to. Pull out of our body or push out of our body and it will head towards orifices to be excreted or expunge out of our body. So I know this or a mouse. You can understand the picture I'm painting. So what's happening, sorry for the detail.*

*But this is going to take a bit of time. What is happening is. Um, **five G** the frequency and the power, which is 10 times more powerful than 4g is reacting aversely with human selves causing cells in our bodies to be poisoned toxic. And our natural defense mechanism is pushing out that toxicity in the form of a virus.*

So, what you're seeing is not Corona virus, per se. You're seeing cell poisoning manifesting with fluids, chemicals, viruses that the body is trying to, um, dispose of because it's harmful to its physical body. So all that's occurring around the world and I hear your minds thinking, well, how can that be possible?

But I'll explain in the moment. All this recur, all that's occurring in the world is a reaction to human bodies, too. The electrification of the universe through **5g satellites, 5g towers, 5g cells** that are being populated in major cities around the world. So this is what is causing this pandemic. So sorry to say second point.

This is the largest global cover-up in history for the impact on human beings, based on technological advancements. I hope that makes sense. I don't have time to quantify that. I will give you further information in a moment. So what is happening? It's not the coronavirus. It is a virus that is being produced by cell poisoning.

And therefore the fibrous that we have is really a measure or indication of ourselves, excreta, ING, toxics. This is what's killing people. So let me give you some facts that will hopefully make this compelling. So one of the first cities that Vodafone highway and some of the. Technology companies REL rolled out ubiquitous blanket, **5g**, guess where it was Wu Han China, where this coronavirus was supposedly meant to start in some fish market that is complete nonsense.

It's it started as a result of ratings. Active or radio frequencies at a high level creating radiation that was toxic to cells. And that's why people were affording over dying in the streets, et cetera. So they've tried to cover it up. So because it has a, a flute. Um, uh, characteristics, they are using coronavirus to try and hide the fact that people are dying from the **5g**, uh, frequency.

So let me just explain other major cities that rolled this out. It takes six months for this to impact your physical body. So last year, um, obviously we hadn't was the first city. Um, then Spain rolled out **5g**, Italy rolled out **5g**. So you'll see it. An uncommon level of fatalities because of the level of **5g** penetration in these countries, Italy has had more fatalities in any other countries because it is densely populated with **5g** and the older generation doesn't have the immune system to fight against it.

Let me move on because of time. So Italy has rolled it out. Spain has rolled it out. Most major cities have rolled it out around the world and countries. London is one of the biggest, uh, CCTV. And obviously they're in the process of running out more **5g**. What is the relevance of all of this? The relevance is the Corona virus is not what's killing.

It is clearly categorically, unequivocally, and scientifically proven that the radio frequencies that we are being exposed to is what are killing the people. Why are they allowing it because of multiple agendas, but primarily because **5g** is the only network with the speed to handle the future. And where we're going rapidly is a world run by AI, artificial, artificial intelligence, the internet of things, where everything's interconnected on the internet, a new global currency that coming out.

And hence why I've been pushing what I've been pushing for the last five years in Africa with our own digital currency, um, to combat what was coming. Uh, in addition to that, there will be driverless cars. There'll be a number of different things that. Um, basically need to run on **5g**, so they cannot reverse the implementation of these, this technology. And they're happy for it to, to the sacrifice, to be millions of lives around the world, just to prove the point further. Um, the cruise ships were installed with **5g**. So the people that were quarantined on the cruise ships, they were. Uh, cruise ships that had **5g**, and that's why the people were getting sick.

Hospitals have **5g**, major cities have **5g**, um, airports have **5g**. So these are places where, uh, people will automatically get sick. If they're exposed to the inordinate levels of radiation through radio stations. Um, poisoning. Okay. So let me move on. Um, we've had three pandemics in the last hundred and 20 years.

Uh, the first pandemic was in 1918, which was called the Spanish flu pandemic. This was when they implemented radio waves. Globally and increased the electrification of our universe. Guess what happens? Millions of people died six months later with a pandemic. They called the Spanish flu pandemic roll on a number of years, world war two, just after that, another pandemic, which was the implementation of radar equipment.

Globally satellites went up and mere out a plethora of different satellites. Went up into the, the, uh, what they call is the van Allen belt, um, basically where they stall and send, uh, satellites. So when that was implemented again, there were a number of deaths from the pandemic. Um, the last major pandemic was in 1968, which was called the Hong Kong flu.

Guess what they did, then they rolled out. And another level of satellite penetration in the van Halen belt, over a hundred thousand satellites that we're transmitting. Um, Radar, um, signals radar field in the cosmic field, basically. So these were satellites that were pushing telecommunications and radar, um, communication.

So we had, um, radio waves first at the beginning of the century, and then they implemented radio. Equipment and telecommunication satellites. These cause pandemics that killed multiple millions of people in the last one was in 1968. So guess what's happening now. They've rolled out **5g** and this is impacting people's lives, killing people around the world and they're covering it up in the name of, um, uh, Corona virus. So that is a fact. Please go and do your study **5g**, the implicate implications, implement of the implementation. Um, just to help you further. One of the countries, which is a huge country that has millions of people, huge country with cold weather. Russia has had no fatalities in the area of Corona virus.

Because they have not implemented **5g** on a public use yet. They've only implemented it for exclusive use by the military. Hence why they've had no fatalities just to prove the point further. You're seeing in the news now that people without underlining health issues or compromised immune systems are falling sick and dying of Corona.

*That makes no sense that the young adult in the reason they are done. The facts are the truth is that the radiation is, does not compromise, has no prejudice, young or old, you will succumb to the power of radiation. Okay. So this is the fact of what's really occurring. This is part of their strategy because of the importance of 5g.*

*And this is a great. Phenomenon that cannot be reversed first point. So please understand. I have a lot more information. I could give you 17 minutes thus far. I wish I could give you more, um, just on that, but trust me, do some research. Um, there's some scholarly articles out there on the impact of, of, uh, There's like the Boston health, uh, group that investigated contagions.*

*And they were basically said that the, uh, one of the viruses, the Spanish flu one, and even this one is not a contagion. What they're doing is spreading it to people via the testing. Sorry, to be honest, but that's what's happening. So when you're tested, it gives them an opportunity to contaminate you with the virus.*

*Because they want to cover up the fact that millions of people will die from the excessive radio frequency, frequency, see, um, uh, um, um, uh, radiation. So basically that's what's occurring on fortunately. So where is this going? Why are they doing this? We know the technological reasons for it. They need a robust, scalable, fast, uh, capable.*

*Internet that can handle the Petra data of information about all of your movements, all of your journeys, all of your banking transactions, your identification, all the CCTV cameras around the world, et cetera, et cetera, because they need visibility on what everyone's doing. But the primary reason beyond that, what they're doing, which is Luciferic and satanic, sorry, to be honest, uh, to use that term, but what is happening is that they are implementing three new strategies.*

*One. Vaccines said the vaccines, having it toxins. And they, one of the things about vaccines, they give you the actual disease to see how the body immune system will fight and combat the disease. So they give you the disease. But in that vaccine will consist of chemicals that lights you up effectively to respond even more powerfully to the stigma.*

*So a bit like chemotherapy or radiotherapy, but in what they inject in your system enables the cells to be destroyed. That vaccine will consist of a substance that will enable the frequency of 5g to be more effective in creating more fatalities. So what you're seeing around the world is that they're buying time to build.*

*Capacity for the hospitals, for the warehouses and all the places they're going to convert into huge mortuaries effectively. So I, to be honest with you to house the millions of people that are going to die from what is happening. So God has a plan. There is a plan. Let me just quickly throw that up now.*

Okay. People are starting to worry. God has not given us a spirit of fear, panic, love and of a sound mind. No weapon formed against us can prosper. So please know that this is a weapon that has been formed, but it shall not prosper against God's people. And I'll tell you why in a moment. So these are some of the things.

Now you may or may not be aware of. That we are electromagnetic beings. I know that sounds a bit weird. I'm just not new age. I've studied it scientifically. Um, we have electric circuits. Our nervous system is really a complex network of, of, of wiring, uh, that are masterful creators. Created us to have. So brain signals up signals, information that travels up and down the body that tells you to move to sneeze, to whatever, to fight disease.

This is created by electrical circuitry. That's in our. The electrical secretary then creates chemistry or chemicals, different types of chemicals that we react to when we eat. And when we do different things, subject to us being exposed to light and different things. Uh, and, and so we, um, we are predominantly water and then there's obviously the physical mass of the body that houses everything.

But ultimately we are an electric circuit, so we react to frequencies. We respond to. Two vibrations. We respond to energy. So electromagnetic energy, I haven't got time to deal with it. Um, but basic includes gamma rays x-rays um, hence why, when they do x-rays they have to stand behind certain screens. Um, there is infrared, there is all sorts of different kinds of, of alum electronics.

Energy that is visible. One of the other visible is light ultraviolet light and visible light. So that's one part of energy. The other part is charged particles, and I won't get into that, but that's protons and, uh, also electrons and all sorts of different things that run about our universe. So I universe and we are.

Given the capacity by God, she'd had to cope with these natural forces of energy running around the very surly system and into the van Allen belt and around the world whilst of relevance. So frequencies affect our sense of wellbeing. And one of the things I'll tell you in another conversation after this is how can we combat because all of this emit frequencies, our heart are, I did a teaching on this, about the electromagnetic power of our heart and mind, um, that we do emit frequencies.

We, uh, we, we, we, we don't use those terms in Bible terms, but might power. Uh, anointing fire of God's spirit. All of these things can be scientifically proven as a electrification of our beings. Either we generate it or atmospheres affect us. That's when we get together and have corporate worship and prayer, there's a level of spiritual energy.

We call that the holy ghost, but it's a, it's a physical energy that can be felt. Um, and many things I could talk about on that, because at the time I can't, I can't reveal too much. Okay. So there is a solution that will help. To survive and to protect us and I'm developing those theories further and I will share them later on.

*So let me explain the game plan. So the game plan of, of this new order, unfortunately it is the era of the new world audit. It has commenced, and this is why the last five years I was pushing my economic model with presidents throughout Africa, um, to give them an alternative. Digital currency and economic model that can sustain them independent of the world bank independent of this new world order controlled by the 1% of the 1% elite. Now, what are they doing? So you'll see already in the news today, there is announcement of the vaccines that will come. I said there were three developments vaccines, um, which will come, which will obviously have catastrophic impact on our physical being exposed to the radiation. Secondly, the vaccines will come with a tracking device called an RFI chip.*

*It is a microchip that will be inserted at the same time as the vaccines. Um, they're not even. You know something about it. They've been quite diverse, uh, a vert about it. This will give them the ability to track. It will be presented in the name of, um, we need to know who has had vaccines, which hasn't had vaccines.*

*Um, so we can know who's safe. Who's not safe and who can be given license to travel and do different things on the basis that they're no longer a threat to humanity. Uh, based upon this, the spirits, uh, ostensible, um, uh, notion of, of, of the, uh, coronavirus, which is compete pharmacy there's, it doesn't exist in the context of what's killing.*

*Okay. So they're just using it as a means to justify where they're going. The third area, unfortunately, is the introduction. And I sold this five years ago. Hence why I've been working when I was working on the implementation of digital currency, a global digital currency, it will start with the U S and it will roll out around the world.*

*And this is why, as I've said, I developed my own block chain platform with our own digital currency, pegged to minerals in the ground. Um, so Africa could have its own independence and a currency juxtaposition to other currencies that would be strong in trading capital and financial markets. That's what your boss has been working on behind the scenes.*

*Uh, while I was preaching administrator, this is what we've been doing from a kingdom point of view. But let me say, this has hailed a new era of the mark of the beast. It is here. It is real. It is now they are expediting rapidly because they realize. There's a level of esoteric enlightenment going through the earth.*

*There's a level of technology that can false track other people's agenda, which will be contrary to theirs and they want to shut it down. So what are they doing? Systematically, systemically and simultaneously they all shutting global economies down because they want to introduce. Two things, a new level of monopoly or oligopolies please are four or five key multinational companies.*

*Amazon will be the first that Google is obviously one. Um, there'll be. That will manage the supply chain of everything that we purchase. Um, so everything is going to be*

*streamlined from food to electronics, to the flow of money and everything. Uh, so the second thing they're doing with this system is other than creating these oligopolies.*

*So they've shut the global markets down. Um, they want to make as many people as possible. Unemployed said, please do not believe these measures they're talking about, about, um, stipends and, um, um, basically grants or payments to help our self-employed or people who've been made redundant. It's not going to happen to any degree.*

*That's going to affect the livelihood of people. This is we're heading for the largest global recession. The world has ever seen because they are changing the game. So what they're bringing in now is, and I'm constantly 26 minutes, but this is important information. You must understand. They are bringing the new system, the new block chain global.*

*Digital currency, which we will not have access to, unless we can prove that we are no longer a harm to humanity by having the vaccines, which will be mandatory, they will force them on us. And secondly, they will insist that we have to take the chip. That is a part of that same simultaneous process. Why are they shutting global economies down because they want to take control back from entrepreneurs can take control back from family offices, family businesses.*

*They want to completely disrupt the fabric of society. As we know it, um, education, employment, everything will be completely different, um, in the matter of months, not even years. So this is their strategy. To ultimately control in terms of visibility, through technology, such as **5g** and the internet and all that, that gives them access to in terms of internet things and the control of money.*

*If you control money, you control the power. Uh, and so that is their agenda. Um, and obviously they want to control the population. Bill gates, God bless him. Um, has resigned from his position as chairman of building, uh, the sorry, the, uh, Microsoft and. Uh, the chairman of Bill and Melinda gates foundation, he is now pushing the vaccine agenda.*

*Uh, he has developed technology. He is responsible for a lot of this. Um, so please, those who've held him as an innovator. He's innovating for the demise of humanity. Uh, vaccines have always been a danger to humanity, uh, and they contain, uh, Pathogens, I think it's called, um, the harmful to all human body.*

*Anyway. So that's, what's the. High-level summary. There's a lot of information that I've summarized just to give you the highlights of what's occurring. And what does the body of Christ do now? What do we do? Or firstly, the body of Christ is changing. This is the changing of the guard. This is now the time of the kingdom remnant to come to the four who've been prepared for such a time as this.*

*This is the time that people who were not fitting into churchy, normal restrictions. Thoughts and assignments and mandates beyond the church. This is the time that God is going to reposition them, basically where up next it's all time. Now it's a defining moment for the kingdom to rectify some of the things that are going wrong.*

*So that is one of the things you'll see around the world. There'll be a collaboration of kingdom, people who will come together. Combined resources collaborate to affect change and create an alternative system. I've been working on this for five years and there are a number of people around the world who are doing the same.*

*Secondly, you will see a change of church. Um, the, one of the reasons why I, this, the last point I'll make that there's been a ubiquitous shutdown of what. Um, prayer and, uh, congregating of religious organizations is because they are making wakes spiritually for the presentation of the antichrist we create.*

*And this is a revelation that I want to come back and teach you more on when we pray, when we. Corporately. We create a frequency. We create vibrations. We create a move of God. We call it the fire of God. We call it the power of God. We call it the spirit of God, but effectively what it is that we as spirit food.*

*Clean living beings are our generators of spiritual energy. Spiritual power might let me use terms that will not scare you. Um, power anointing. These are electrical magnetic frequencies that emanate from us. Yeah. We listened to worship and pray. It literally heals our body. So when we're in the presence of God, this is why we have.*

*Healing is a by-product because what we're exposed to physically healed ourselves. That's why he says I am the Lord, thy God, that healeth his presence alone. Heals people get healed in worship services, prophecies, and other communication, frequencies and information flows greater when we are corporately worshipping when we are praying corporately.*

*And so they have deliberately shut all of that down and. Network spiritually for want of a better term, so they can pave the way from the antichrist, uh, to come to the fore. Otherwise he would have been restricted withheld by the universal concert of prayers and worship of God's people and say, this is what's happening.*

*It's deliberate. It's not the Corona virus that is contained. Uh, sorry, contagious or a contagion that we can't congregate is because they system actually have dismantled for the first time in human history, the corporate gathering of religious people to pray and worship because it changes the spiritual atmosphere so they can have more power.*

*I wouldn't doubt if there's sacrifices and different things that are going on behind the scenes as well to empower. What this move is, and trust me, they're moving at lightning speed. Within a matter of weeks, we are going to be shocked by the revelation and the implementation of the things that they will be doing.*

*The vaccines will be a matter of months away. If not days, the new currency will be a matter of days away, months away, um, the whole new economic system, which I have created one that I'm going to implement regardless. Um, as a strategy to counter what is happening, I've been prophesied in this for 15 years, that w that the kingdom of God needs its own economic system.*

*Whilst you're all having happy clappy church and feeding. Good. Some of us have been strategizing on the blueprint of God to advance his kingdom, to save much souls alive and to preserve a posterity anyway, because of time, let me conclude here. Best thing we can do right now is to raise our frequency live clean, live righteously.*

*And remove and detox our bodies from anything that would affect the flow of God's anointing on our lives. The only counter we have is prayer and worship. It creates its own force, field of energy and force, field of frequency. Heaven's frequency will protect you to some degree whilst God is working on the strategy that he's going to implement.*

*I pray this has helped somebody share this with somebody forward. This that the world can understand this is happening, that we can pump together. Strategize as a kingdom remnant, because God said that he doesn't get involved with the affairs of man, because he gave too many into man in Genesis chapter one.*

*That's why so many heinous and terrible things happen in our world because God is not running the world. He works and influences. Good men evil prevails when good men saying nothing is they've said, so what God is trying his best to do is influence people who will live right live clean, pure hands, clean heart, not lifting up their salt onto vanity, nor swearing deceitfully with lies, not manipulating people to gain true people of God that he can speak through work through.*

*So he can have an impact on the earth, but what he has said, um, from my time in press that this now has forced his hand, that he's going to move. As God, he has to intervene as God. And I think as we ubiquitously globally, raise up our prayers and our, uh, a false thing, which helps our, uh, electromagnetic flow, by the way, uh, intermittent fasting, strengthens our immune system, which strengthens our, uh, Electromagnetic flow.*

*Electro likes lime and different things that we used, which we thought were spiritual actually are scientific. They improve the strength of our body. They strengthen us. So olive oil and different things have components that have electrolyte, uh, elements in it that strengthen our physical body fasting does that helps our immune system immensely.*

*So we can fight against the Corona fight against these radiation of the frequency, but more importantly, create a heavenly sound. That will combat what the enemy is up to for now until God implements. God bless you. We love you. This is a whole new era. This is the new thing God has been talking about, but thank God this kingdom, he will give to none other.*

*This will be hewed out the mountain without hands. It will drive away all other dispensational kingdoms like chaff in the wind. So this is our time. For us to embrace what God is doing and to be if every time we need to be fervent in spirit, serving the Lord in his now. So I encourage you. I enjoy you. I, I really plead with you.*

*Let's be unified. Let's be righteous. Let's spend time in prayer and we need to use this time. Lastly, to reset. We need to use this time to reset our priorities, reset a routine, reset our reinvestment in ourselves. Ready ourselves for what is coming. Reinvent ourselves. If we have to in line with God's purpose and raising Debra for our lives, we have to reach out to other people.*

*We need to share this information that the unbelievers will now believe what we've been saying about revelations 13 for hundreds of years, 200 years to be precise. It's the Bible was translated. We need to re-establish righteousness and our relational connection with God, like never before and reinvest in knowledge, do not waste time on entertainment, spend time reading, studying pertinent information.*

*The word of God really started to show ourselves approved at this time. The work that needs not to be ashamed, rightly dividing the word of truth. God bless you. I know this is an incredibly long. But with all due respect, this information is too important to just give you a 32<sup>nd</sup> overview, pray about it, submit it to your profits, submit it to you, your leaders, submit it to whoever, but this is the reality of what is happening, but I promise you God is going to raise up a remnant with their own kingdom currency, with their own kingdom economy, with their own banking systems, with their own information.*

*Hi. With a new type of church that the world has not seen. And I've been prophesied this for years, but I've been working behind the scenes also with a few other like-minded nobility members to effect this change that we knew was coming. God bless you. I pray this doesn't scare you. God has not given you a spirit of fear, but of power and love and of a sound mind.*

*This is our time that we stand still and see the salvation of our Lord. And we trust in our God lean, not around understanding and all our ways that knowledge is. For his directing our paths. Like you wouldn't believe this is the time we need to know that he's a strong tower and the righteous runners onto him.*

*And I've saved from radiation and frequencies that have been adversely affecting our bodies. We need to know that he is with us. Okay. They say, stay strong, stay anointed, share this information, and I'll be back to you with more details.*

*-Colin*

## Wireless Energy was first used as a Military Weapon

Its first application was as RADAR in the 1940's. In the 1970's it was used as a heart attack gun. In the 1990's it was used to send voices to the brains of the Iraqi army to surrender. Today, it is used as a Directed Energy Weapon (DEW) to start forest fires to force people off their land! In some future "tomorrow", they will flip the switch and everyone but the elite and their slaves will be dead!

As Dr. Martin Pal calls **5G**, *"It is an Extinction Level Event!"*

Blessings,

Pastor Bob, [EvanTeachr@aol.com](mailto:EvanTeachr@aol.com)
