

# 5G Still Coming to Your Neighborhood And Its Implications / Issues

The roll out of 5G continues to threaten human life and the public be damned reigns supreme with virtually every bump in the road until it saturates the global spectrum. This first issue is about how a little-known rule could alter your neighborhood and endanger your health.

The federal government has ensured that 5G can come to your neighborhood whether you like it or not. A recent rule change allows the telecoms industry to turn consenting private residences into cell towers, endangering the health of the neighborhood. The only way to fight back is to talk to neighbors who may be considering adding an antenna to their house to inform them of the facts that industry is conveniently leaving out.

Chances are you have not heard about background on the OTARD rule, an acronym for “over the air reception device.” Originally, the rule prohibited local municipalities from restricting the installation of satellite dish antennas and other antennas on private residences for reception of TV signals; it didn’t apply to devices that also transmit signals. The FCC recently implemented changes to the rule that allows industry to install wireless transmitting antennas on private homes; and since this would be done on private property, it circumvents the need for companies to meet local zoning and environmental requirements. There is also no requirement to notify neighboring property owners. The OTARD rule has thus been changed from a pro-consumer rule to a pro-industry rule.

The Telecom companies are now reportedly going around neighborhoods with deceptive offers like: “*Earn \$600 – Get paid for doing nothing while helping your community. Be the first person to provide Internet of Things coverage in your neighborhood.*”

For some, this may be a tempting offer. Industry may even offer benefits like free internet...but they may also charge you for the electricity used by the antenna. We just don’t know. But it is certain that wireless companies are not telling property owners that they could be held liable if their neighbors experience negative health effects due to the radiation coming from these antennas.

While the telecoms industry has insisted for decades that cell phones, and now 5G networks, are completely safe, there are mountains of evidence to suggest otherwise. I have covered a lot of this evidence in previous articles linking EMF radiation to altered

metabolism, cancer, cardiovascular disease, DNA damage, impaired sperm function, cognitive impairment, neurological damage, and many more health conditions.

For these reasons, insurers rank 5G EMF radiation as “high risk,” and due to these risks, most insurance plans include an “electromagnetic field exclusion” - that is, insurance plans do not cover injuries related to wireless radiation. **Telecoms cannot offer homeowners insurance against liability from the antenna causing physical harm to others because this insurance doesn’t exist. The Telecoms self-insure their liability since reinsurance companies such as Lloyds of London, Swiss Re, AIG, over a decade ago decided not to insure wireless energy.**

Unless immediate action is taken, we will be exposed to radiation generated by wireless devices on an unprecedented scale. Especially concerning is that 5G networks that are being rolled out use short millimeter waves, which cannot travel as far as longer waves. This means that more “small cell” towers are needed to create a network, which is why the telecoms industry needs to turn private homes into cell towers. Some neighborhoods would see dozens of small cells installed, all of them emitting microwave radiation. These towers will also emit the lower 4G frequencies, since 5G rollout is still ongoing.

There are particular dangers with 5G networks. It has been pointed out that Israeli researchers found that our sweat ducts act as antennas for millimeter waves, meaning we would absorb more of this energy into our bodies. Millimeter wavelengths are also used in crowd control systems, making people caught in the high-powered millimeter wave feel like their skin is on fire. No independent research has confirmed the safety of 5G networks.

The U.S. government’s own National Toxicology Program released the results of a \$30 million, ten-year project looking into the link between cell phones and cancer. It concluded that “there is clear evidence that male rats exposed to high levels of radiofrequency radiation (RFR) like that used in 2G and 3G cell phones developed cancerous heart tumors.” Again, 5G networks dramatically increase these exposures due to the increased number of “small cells” which will blanket neighborhoods with EMF radiation. The distance between the small cells will be 200-300 feet.

An additional issue is that it’s nearly impossible to effectively sue the wireless companies themselves. A close look at city and municipal contracts shows that it isn’t Verizon, for example, doing business, but a smaller LLC that is created by Verizon to do business in a particular location. This insulates Verizon from being liable for huge amounts in damages. If a lawsuit is successful, you’re raiding the coffers of a “Verizon New York, Inc.” or a smaller company “doing business as” Verizon. ANH is, however, joining Safe Technology Minnesota in submitting an amicus brief in support of Children’s Health Defense’s lawsuit challenging the FCC for adopting the OTARD rule changes.

A better strategy is to engage with neighbors considering telecoms offer of satellite installation and asking questions: are they aware that insurance against health effects from EMF radiation doesn't exist? If a neighbor, or neighbors' children, gets sick from the radiation emanating from the antenna on their house, can they afford a legal defense? Are they aware of the myriad health dangers associated with EMF radiation? Are they on the hook for the electricity taken up by the antenna? Perhaps proactive action to discuss the issue with neighbors before the industry makes the offer can inoculate neighborhoods from industry propaganda. Friendly but frank conversations about this issue may be the only way to prevent your neighborhood from being blanketed with EMF.

This is characteristic of government regulators nuancing their actions against the public. Big Tech and its Federal Communications Commission (FCC) toadies have used a fraudulent test to license cell phones, wireless technology and now 5G to push a technology that causes catastrophic biological damage.

The Tech Giants have us addicted to devices they claimed were safe because these devices, especially 5G, are the vital cornerstone for billionaire data miners and the surveillance state. Totalitarians use this technology to enforce obedience, and Big Data uses it to filch and monetize our information.

Here is the chicanery the FCC and Big Telecom use to con us into believing that our cell phones and wireless devices are safe, for adults and children: The FCC, other governments around the world and Big Telecom use a crash dummy named SAM (Specific Anthropomorphic Mannequin). They fill SAM's plastic head with liquid to test 5G safety. This is 1996 science, and the human head is not a mannequin.

The FCC then measures the thermal change in the brain of the dummy using "Specific Absorption Rate" (SAR). If 30 minutes exposure to cell phone radiation does not raise the temperature of SAM's liquid-filled cranium by more than one degree Celsius (known as the "thermal effect"), the FCC considers the cell phone safe.

This thermal hypothesis which has been promoted by industry engineers and physicists is false.

To the FCC and Big Telecom, we are the dummies. Biomedical experts and scientists agree that measuring for thermal effects is not a valid and biology-based safety test. Our brain is not liquid, but a complex bio-electrical system that has been demonstrated to be vulnerable to damage from the pulsed and modulated electromagnetic fields and radiation emitted by wireless devices.

Studies based on brain scans, MRI and EEGs provide irrefutable evidence of harm from wireless devices' non-thermal exposures. Cell phones and wireless devices can change brain wave activity, impair blood flow to the brain, damage the blood-brain barrier, interfere with brain cells communication and break brain cells' DNA. Clearly, we are not SAM.

This test does not even protect from thermal damage — SAM's is based on the gigantic noggin of a 220 lb., six-foot tall adult male military recruit. SAM's head is relevant to only 3 percent of the population.

Children have smaller and thinner skulls than SAM and absorb substantially more radiation than adults. Research confirms a 10-year-old absorbs more than 150% higher radiation than the SAM dummy.

Children represent a significant portion of the consumer market for wireless smart tech devices, and Big Tech is pushing these devices on babies at increasingly exceedingly early ages.

SAM, adopted by the FCC in 1996 when the only commercially used wireless devices were cell phones, measures for only short-term exposure of 30 minutes from one device. It fails to address longer and chronic exposure from numerous sources, which is the real exposure we are now facing.

Judge Patricia Millet of the U.S. Court of Appeals of the D.C. Circuit recently echoed this criticism of the FCC testing method in the hearing in the Children's Health Defense case against the FCC.

The case, which was initiated by Dafna Tachover, director of Children's Health Defense's 5G and wireless harms project, challenges the FCC health and safety guidelines, including the SAM testing and the "thermal only" hypothesis.

This test and the thermal construct are essential for the telecom industry in order to continue to sell their products and for those who engage in data mining, including companies that mine our data for profit and the U.S. government, which uses the data for surveillance purposes.

To expose the fraud of the FCC and the telecom companies, Children's Health Defense joined WeAreNotSam, an international campaign. Follow @WeAreNotSAM and help expose the dummy testing. It is time for real and biology-based safety testing.

One of the most forbidden topics on the planet right now is the connection between Covid-19 and 5G technology. That occurred shortly after the "Diamond Princess" outbreak of the Coronavirus.

We know the prescribed PCR tests are not detecting the Covid-19 genome. According to the CDC's own literature, the tests do not rule out bacterial infection or other viruses. They are detecting all varieties of coronavirus, including the common cold – and counting it as Covid-19. The PCR tests were rigged so as to diagnose anyone tested as having Covid-19. We now know from the work of Dr. David Martin the entire Covid-19 was a scam of global proportion to create a perpetual money-making scheme.

And it has been pointed out for months that the geographical locations experiencing the most cases of Covid also seem to have active 5G technology. After a video went viral, in which David Icke suggested that 5G is somehow responsible for positive cases of Covid-19, YouTube deleted it and began deleting all videos on the subject, including a video we made, that pointed out how on October 30th of 2019, Wuhan became the first major testbed of 5G technology.

In late June, a new research paper entitled, "5G Technology and Induction of Coronavirus in Skin Cells" was published. This paper gives a scientific explanation of the relationship between 5G technology and the coronavirus.

Unlike 4G or other radio waves, the 5G millimeter waves can penetrate the nucleus of a cell. The DNA then acts as an inductor. It reacts to the 5G waves by producing an electromagnetic field. Like a shadow, the shape of the electromagnetic field reflects the hexagonal and pentagonal shapes of the DNA base pairs.

**This electromagnetic field produces holes in the cellular liquid. hexagonal/pentagonal voids are created in the nucleoplasm. And to remedy this disturbance, extra bases are created to fill the voids. These bases then join together, to produce coronavirus-like structures in the cell, which will "read" as a positive case of Covid-19.**

### THE EXOSOME

The exosome was discovered in 1983. Exosomes are created naturally within the cell to clean and repair cellular damage. Both exosomes and COVID-19 are the same size and shape. They both have the same ACE-2 receptor. And they both contain RNA.

Exosomes behave and appear the same as a virus. Some scientists even claim that the so-called virus is, in fact the exosome. The evidence is building a case that this is in fact the cause of Covid-19.

**Since the discovery of the exosome, over 200 microbiologists have been murdered, committed suicide or died in a suspicious manner. From this and others involved in cancer research and Nagalase in children's blood streams, it would suggest that being a microbiologist is a hazardous occupation.**

If you question this mystery, you're labeled a "Conspiracy Theorist". And if you question the unproven Virus Theory, you're labeled a "Science Denier". German virology Stephan Lanka exposed the scam in 2020. Dr. Stefan Lanka, virologist and molecular biologist, is internationally mostly known as an "AIDS dissident" (and maybe "gentechnology dissident") who has been questioning the very existence of "HIV" since 1994. In the past years, however, he stumbled over a breathtaking fact: Not even ONE of the (medically relevant) viruses has ever been isolated; there is no proof of their existence. He offered a \$100,000 prize if anyone could produce, and no one has made a claim to the offer. It seems that after three years of struggle in court, the Ravensburger Measles process has finally reached its endpoint. Extremist anti-vaxxer

Stefan Lanka, who denies the existence of harmful viruses, had set out a reward of 100,000 euros for scientific proof that there is such a thing as a virus that causes measles. The young doctor David Bardens provided Lanka with six articles that show this, but Lanka denied that this evidence met the criteria of his challenge. Unfortunately, the likes of Dr. Anthony Fauci have brainwashed the public into believing the Covid-19 is a threat to human life.

Today the only socially-acceptable solution that you're allowed to accept is an experimental vaccine that will alter your DNA, which ultimately raises the question, "*Who owns your body?*"

YouTube announced April 12, 2020 that it will delete videos from its platform if they promote the idea that there is a correlation between the spread of the COVID-19 disease and 5G networks, according to Business Insider.

Ridiculous as it may seem, many people seem to believe that the new cellular network technology is influencing and aggravating the spread of the novel coronavirus, so much so that 5G masts have been burned down in parts of the UK. These acts have pushed the UK government to call on social networks to prevent the spread of alleged false information regarding 5G and the virus, and it seems that YouTube is ready to respond.

YouTube has previously cracked down on videos that promote false cures or treatments for diseases, and it's doubling down on those policies for COVID-19. A spokeswoman told Business Insider:

*"We have clear policies that prohibit videos promoting medically unsubstantiated methods to prevent the coronavirus in place of seeking medical treatment, and we quickly remove videos violating these policies when flagged to us(...)."*

The company is also working to promote useful information about the outbreak, using data from the World Health Organization and the NHS in the UK.

However, as we've seen before, YouTube may allow certain "borderline" content that contains theories about 5G-related health issues, as long as they don't mention COVID-19. That content may still be demoted in order to be harder to find or monetize, but it won't be outright banned.

## **Study Shows Direct Correlation between 5G Networks and “Coronavirus” Outbreaks**

April 24, 2020

At last, the first study has emerged regarding the very clear relationship between “coronavirus” outbreaks and the presence of 5G networks.

Study of the correlation between cases of coronavirus and the presence of 5G networks

**Author: Bartomeu Payeras i Cifre1**

**Available at [www.tomeulamo.com/fitxers/264\\_CORONA-5G-d.pdf](http://www.tomeulamo.com/fitxers/264_CORONA-5G-d.pdf)**

Translated from the Spanish by Claire Edwards

Date: March-April 2020

The COVID-19 pandemic and its effects in early 2020 have surprised scientists and politicians. If any study aimed at understanding the phenomenon and which consequently may help to clarify the causes of the pandemic is carried out, it should be promoted and/or taken into consideration. The correlation between cases of coronavirus and the presence of 5G networks has been addressed in alternative media and social networks. It is noteworthy that, at least in Spain, the media have not covered the scientific studies on the subject of 5G, nor asked the government any questions about this in the daily press conferences that it conducts to report on the state of the situation. The team of scientists advising the Spanish government has also failed to raise this issue.

It is common sense that the ability to demonstrate this correlation would be very important data to contribute to the understanding of, and the solution to, the problem.

### **Objective**

To assess whether a correlation exists between cases of coronavirus and the presence of 5G networks. Without entering for the moment into subsequent cause-effect approaches in the case of positive results. Given that there is a sufficiently large statistical sample, it is possible for the results obtained to have a high level of reliability.

### **Material and methods**

The study has benefited from the official statistical material published daily, which is a basic and valuable tool. It should be noted that in these publications, the methodology used for counting cases of coronavirus infections does not generally provide real data. In Spain and many other countries, it has not been calculated as there are not enough tests for such analyses. However, this does not alter the results of this study since it is based on the comparative rather than the absolute method of infection. Therefore, in order to avoid statistical error, we will compare the density value of confirmed cases of coronavirus (expressed in number of cases per 1000 inhabitants) instead of absolute values. Since the criterion for counting used by the health authorities within the same state or city is the same, the comparison of published values for different cities or regions will be equally reliable for statistics. Comparisons between different countries of confirmed cases, excluding asymptomatic cases, will be equally reliable. The possible exception of some non-transparent country that could manipulate the publication of its data is beyond the control of this study.

The method used was to compare the incidence (no. of cases per 1000 inhabitants) between countries with and without 5G technology. Between regions of the same country with and without 5G technology. Between cities of the same state with and without 5G technology. Between different neighborhoods of the same city with the 5G network map of that city. Comparing states with common borders with and without 5G

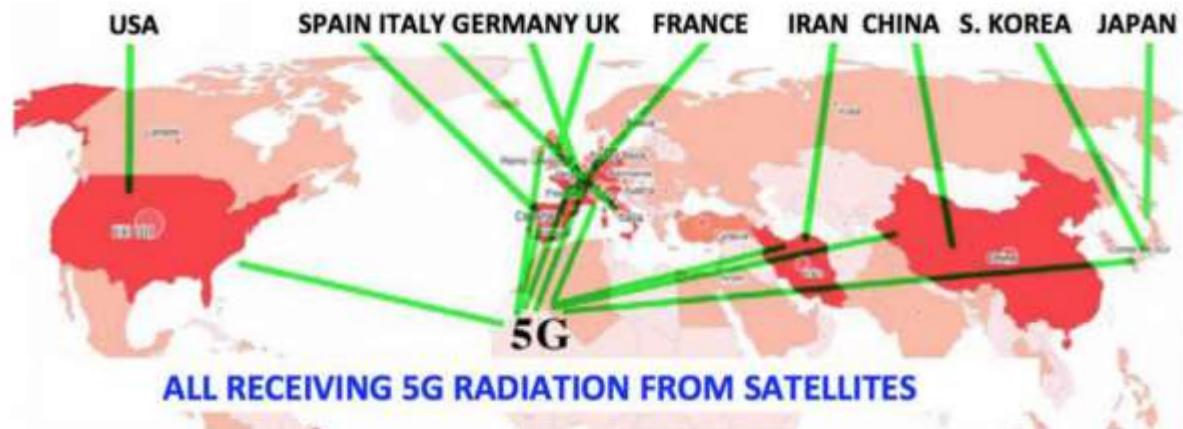

technology. Comparing the case of one state within another, as is the case of San Marino.

– The data for each chart were taken on the same day. Graphic results and data published below:

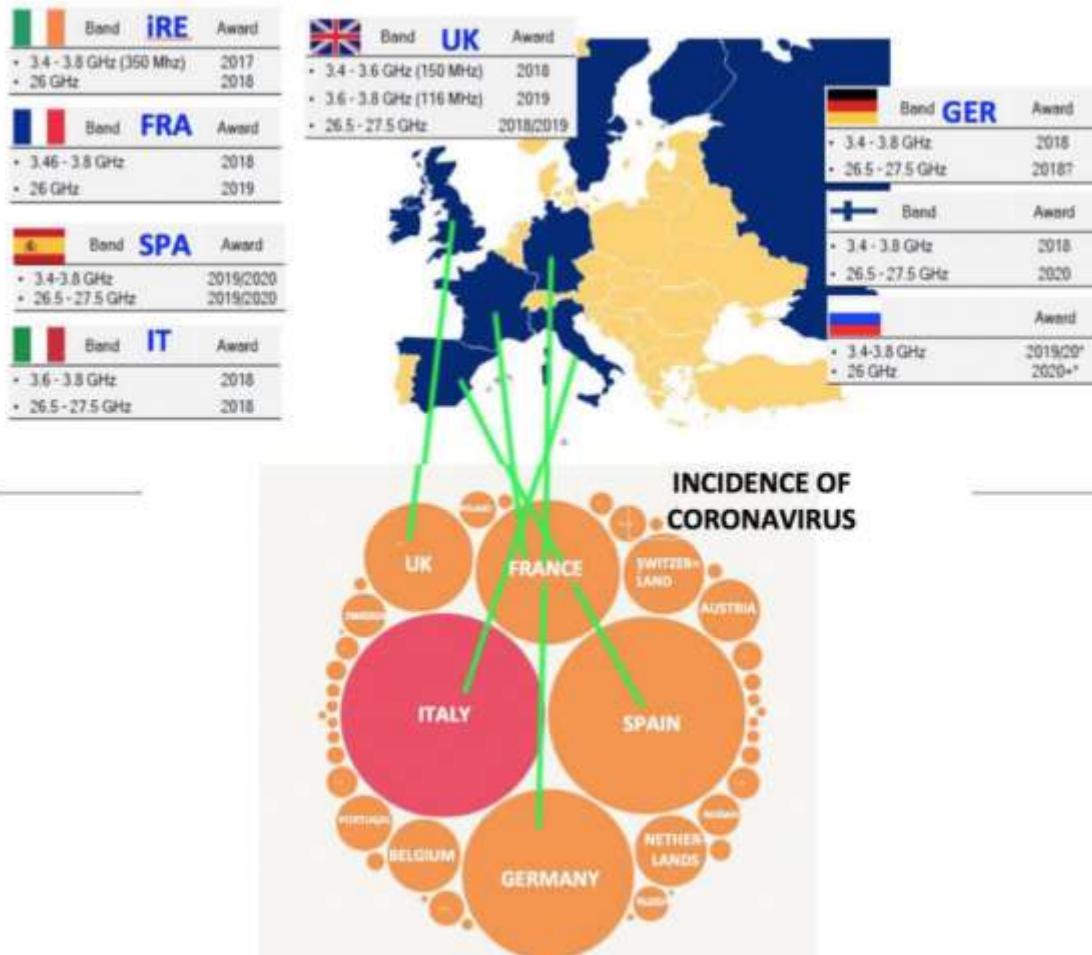

1.

1. Chart of the 9 countries with the most infections worldwide.
2. Chart and rates of infection of the 5 countries with the highest incidence in Europe.
3. Chart and rates of infection of 4 nearby countries at the same latitude: Portugal, Spain, Italy, Greece.
4. San Marino: comparison of rates of infection with Italy and Croatia.
5. Italy: Incidence chart and 5G network.
6. Spain: 5G coverage chart and rates of infection.
7. Barcelona: Charts with 5G coverage and rates of infection.
8. Madrid: 5G coverage charts and rates of infection.
9. New York: coronavirus incidence chart and 5G network.
10. “Border effect” between Mexico and the USA.
11. Canada, USA and Mexico: chart of 5G networks and rates of infection.
12. Africa: 5G network chart.
13. Persian Gulf: 5G network and US military bases.
14. Chart and rates of infection of China and neighbouring countries.

## 1. CHART OF THE 9 COUNTRIES WITH THE MOST INFECTIONS WORLDWIDE

## **2. CHART AND RATES OF INFECTION OF THE 5 COUNTRIES WITH THE HIGHEST INCIDENCE IN EUROPE**

### 3. CHART AND RATES OF INFECTION OF 4 NEARBY COUNTRIES AT THE SAME LATITUDE: PORTUGAL, SPAIN, ITALY, GREECE

Comparison of no. of infections per 1000 inhabitants in 4 countries  
near the same latitude and using 5G networks

The average for Spain and Italy is 2.4.

The average for Portugal and Greece is 1.09.

**Conclusion: the two countries with 5G have 220% more infections.**

*Note: data for 4 April 2020*

#### **4. SAN MARINO: COMPARISON OF RATES OF INFECTION WITH ITALY AND CROATIA**

No. of cases per 1000 inhabitants (Daily data *El País* 13.4.20)

**ITALY**                   **SAN MARINO**                   **CROATIA**  
2.59                   10.56                   0.39

**Result: San Marino - the first European state with 5G technology - is the state with the highest no. of cases per 1000 inhabitants. 4.07 times more than Italy and 27 times more than Croatia, which does not have 5G.**

# San Marino set to become the first 5G country

Following the signing of a Memorandum of Understanding (MoU) with Telecom Italia, San Marino is set to become the first country to go fully 5G.

Telecom Italia intend to use San Marino as a testing ground for the next generation of wireless tech.

**“Why San Marino? Because the self-contained nature of the state, and its relatively few restrictions on the use of radio frequency makes it the ideal place to test the latest development in telecoms connectivity.”**

**“Telecom Italia intends to double the number of its mobile sites within the country and will additionally install a network of small cells in downtown San Marino.”**

**<https://www.fircroft.com/blogs/san-marino-set-to-become-the-first-5g-country-72001910124>**

# Most infected Coronavirus countries: San Marino, Italy, Norway, S.Korea, Switzerland, Iran

Juergen T Steinmetz March 15, 2020 04:34

“Considering very small countries included the worst outbreak in the world is currently recorded in San Marino with 101 cases in a country of 33,400.”

<https://www.eturbonews.com/567130/most-infected-coronavirus-countries-san-marino-italy-norway-s-korea-switzerland-iran/>

The top 5 Coronavirus countries no longer include China. Currently, Coronavirus is terrorizing 152 countries and territories around the world. Most media reports the worst outbreaks by the number, which is not really giving the public a clear picture.

100 sick in a country like China is different from 100 sick in a country like San Marino.

Considering very small countries included the worst outbreak in the world is currently recorded in San Marino with 101 cases in a country of 33,400. It means calculating by population it would calculate to 2994 cases in a million.

If not considering countries with less than a million people, the worst outbreak currently is in Italy with 349.9 cases per million, followed by Norway with 204.6 cases per million.

"Considering very small countries included the worst outbreak in the world is currently recorded in San Marino with 101 cases in a country of 33,400."

<https://www.eturbonews.com/567130/most-infected-coronavirus-countries-san-marino-italy-norway-s-korea-switzerland-iran/>

## 5. ITALY: INCIDENCE CHART AND 5G NETWORK

For a reliable study, the figures for infections per 1000 inhabitants for Turin, Milan, Bologna, Rome, and Naples should be compared with those for other cities without 5G  
(Vodafone data only)

**For a reliable study, the figures for infections per 1000 inhabitants for Turin, Milan, Bologna, Rome, and Naples should be compared with those for other cities without 5G (Vodafone data only)**

## 6. SPAIN: 5G COVERAGE CHART AND RATES OF INFECTION

Data for cities with 5G should be related to the number of infections in those cities. Since data by city are not available, the comparison has been made with data for autonomous regions. This causes the data of the capitals to be diluted with those of their region.

This is why the comparison in autonomous regions with one or two provinces is more significant: Extremadura, Murcia, Madrid, Navarra, Rioja, Balearic Islands, Asturias or the Canary Islands. Also in Euskadi since the three capital cities have 5G.

TOWNS WITH 5G

CORONAVIRUS INFECTIONS (for autonomous region)

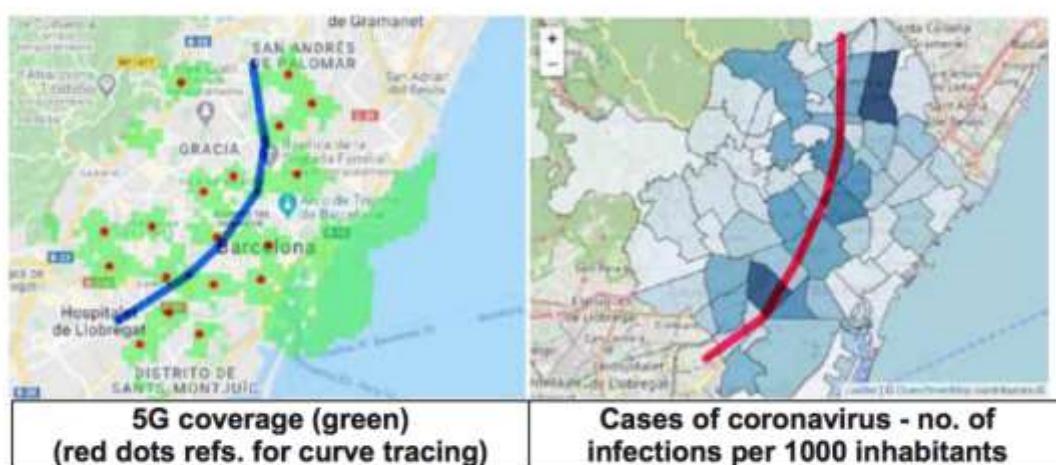

Infections per 1000 inhabitants Spain: 2.4

Madrid: 5.4 Catalonia 3.2 Navarra 4.5 Logroño: 6.62 Aragon: 2.3 Euskadi: 3.7

Extremadura: 1.7 Balearic Islands: 1.02 Murcia: 0.8 Ceuta: 0.8 Canaries: 0.7

## 7. BARCELONA: CHARTS WITH 5G COVERAGE AND RATES OF INFECTION

Correlation of no. of infections per 1000 inhabitants with 5G

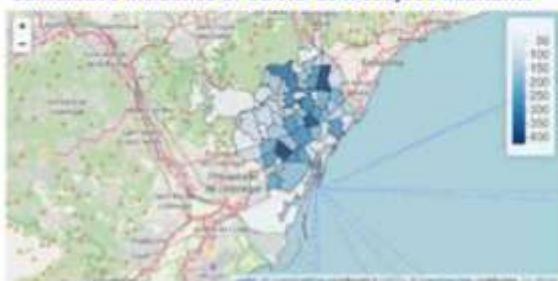

(Data 10 April 2020)

## Sectoral maps – cases per 100,000 inhabitants

A

Cumulative Incidence of COVID-19 x 100,000 habitants

B

Distribution of income

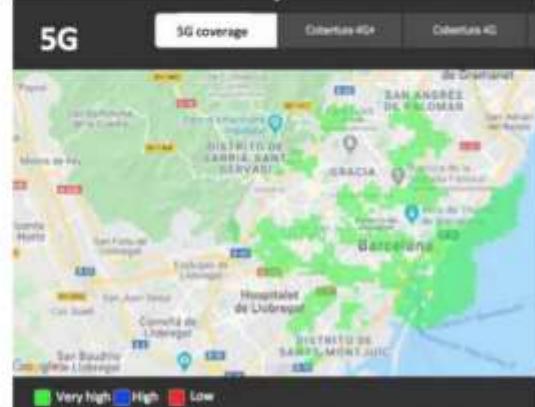

Level of average income (per capita) for 2018 by section of Barcelona

C

## Coverage maps

5G

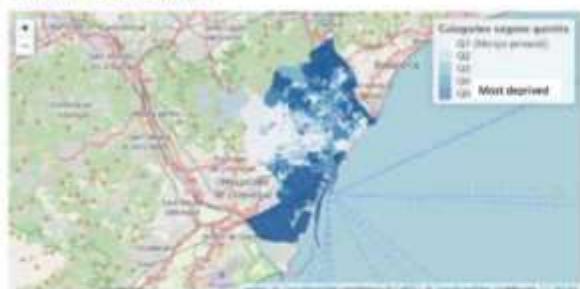

4G

C

Distribution of deprivation

Distribution of socio-economic deprivation for 2011 by section of Barcelona

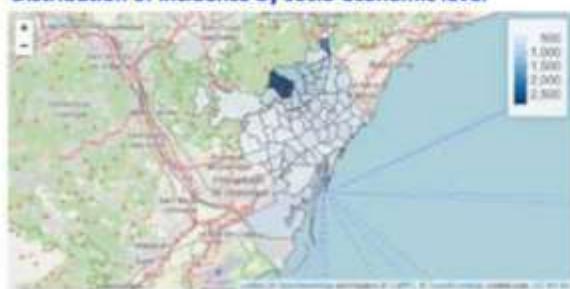

Note: the 4G coverage is general and therefore does not serve in this case to compare areas of incidence of coronavirus. However, the map of 5G is the one that best matches map A. This demonstrates that the 5G factor is decisive.

Data for 21 April 2020.  
Conselleria Salut. Generalitat Cat.

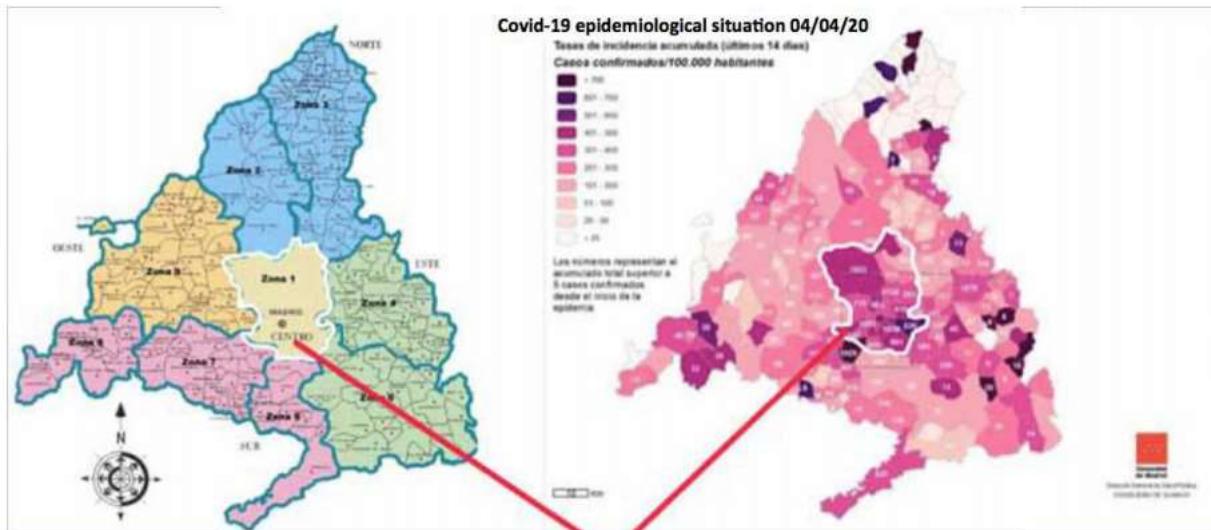

D

Distribution of incidence by socio-economic level

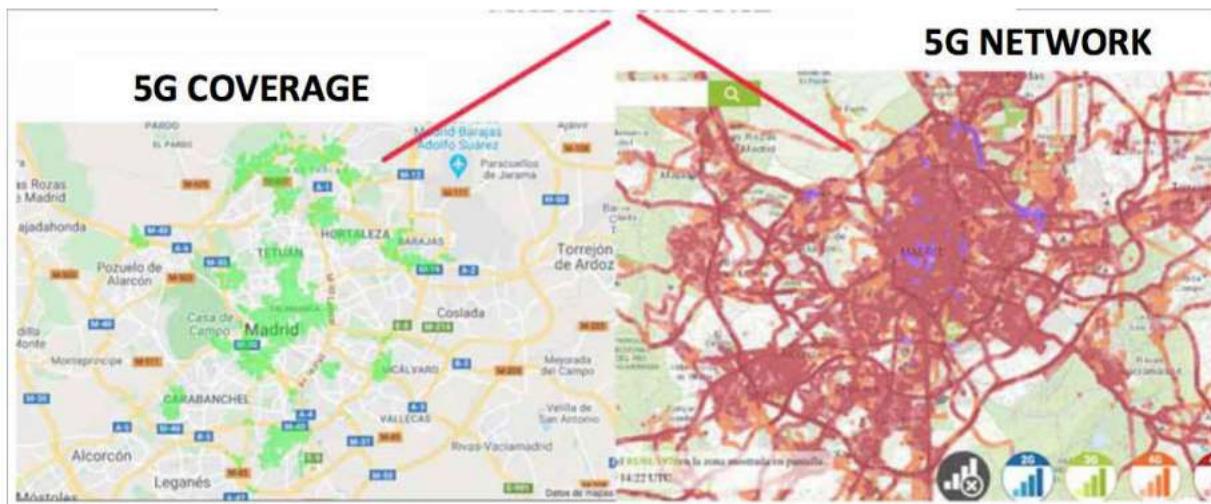

## 8. MADRID: 5G COVERAGE CHARTS AND RATES OF INFECTION

### Incidence of coronavirus

### MADRID CAPITAL

## 9. NEW YORK: CORONAVIRUS INCIDENCE CHART AND 5G NETWORK

**COVID 19 – 5G correlation  
No. of cases per 1000 inhabitants**

## 10. "BORDER EFFECT" BETWEEN MEXICO AND THE USA

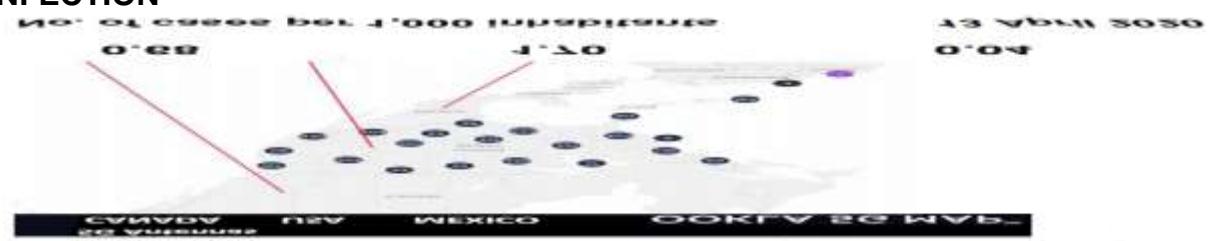

*Data for 3 April 2020 – infections per 1000 inhabitants*

California	Arizona	New Mexico	Texas	Mexico	USA
0.28	0.31	0.20	0.18	0,012	0.814

The average for the 4 U.S. states is 0.242, which is over 2,000% more than Mexico.  
The average for the U.S. is 0.814 or 7.000% more than Mexico.

## 11. CANADA, USA AND MEXICO: CHART OF 5G NETWORKS AND RATES OF INFECTION

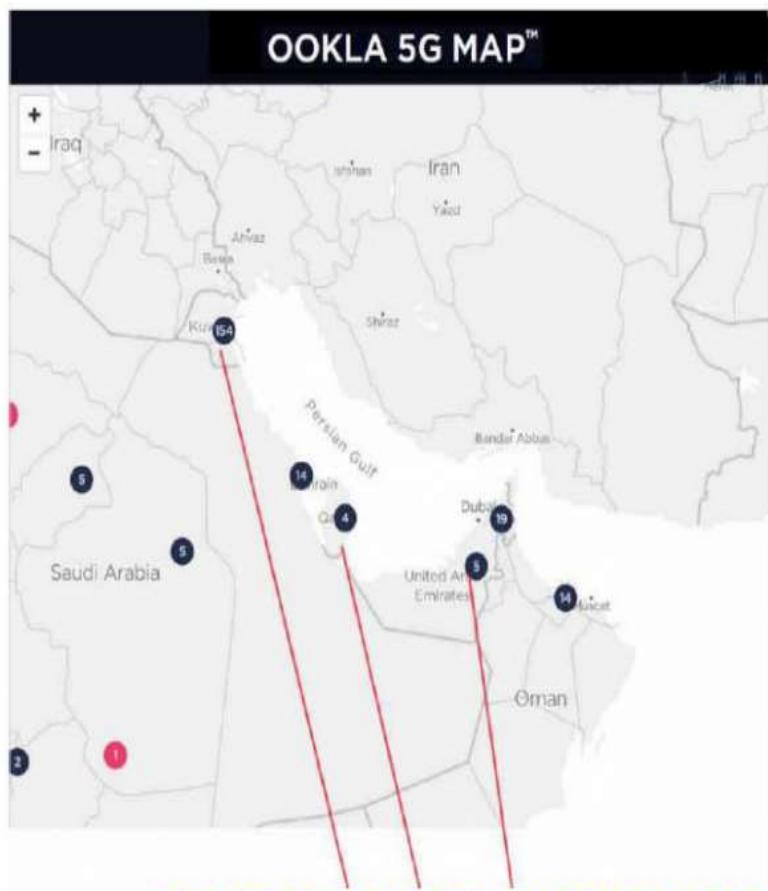

## 12. AFRICA: 5G NETWORK CHART

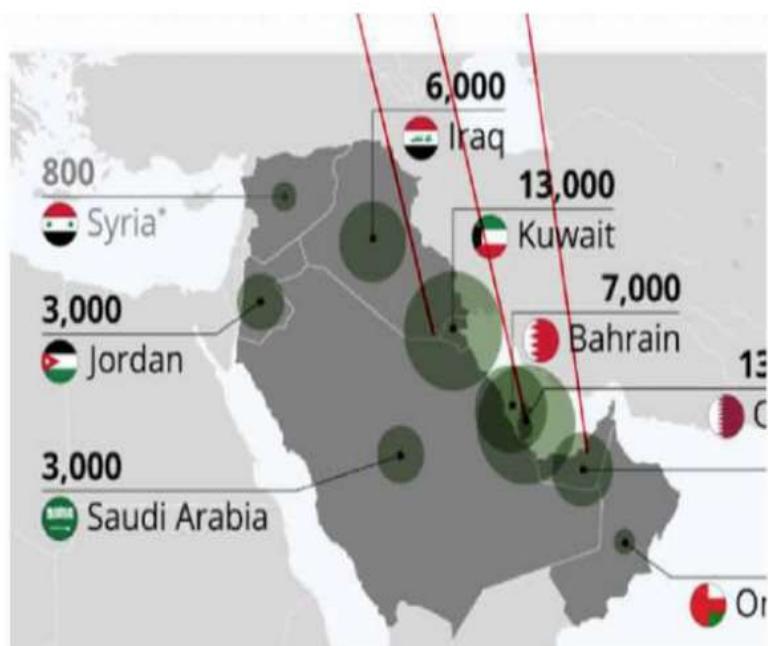

The African country with the most cases of coronavirus is South Africa, the only African country that has 5G.

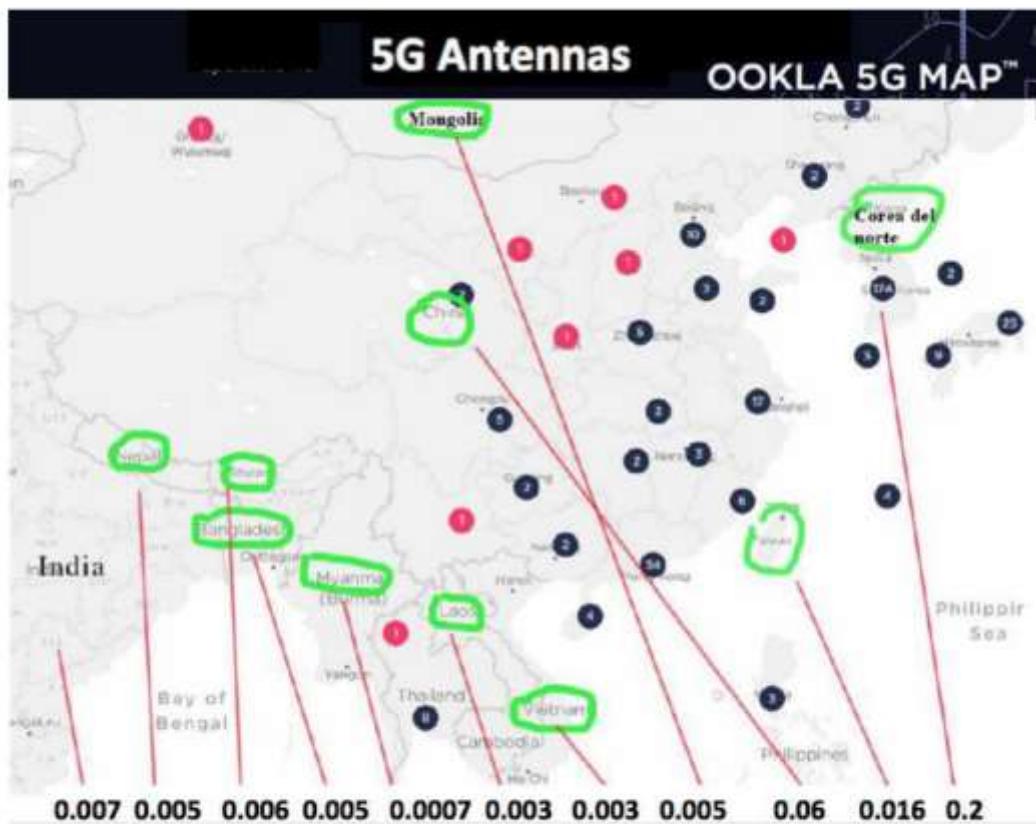

### 13. PERSIAN GULF: 5G NETWORK AND US MILITARY BASES

US MILITARY BASES IN THE MIDDLE EAST

## 14. CHINA AND NEIGHBOURING COUNTRIES: CHART AND RATES OF INFECTION

No. of cases per 1000 inhabitants, 13 April 2020.

The countries neighbouring China have approximately 10 times fewer cases per 1000 inhabitants.

### Results and discussion

To know whether or not the result obtained is that of a random phenomenon, a statistical analysis of the results of an experiment must be carried to calculate the probability of the event occurring. The probability calculation is obtained by dividing the number of favorable cases by the number of possible cases. If the result shows that it is not a random phenomenon, it shows sufficient causal reason to analyze the causes.

To eliminate any upward errors we will always opt for the most conservative numerical option.

Let us therefore calculate the probability of three of the examples analyzed above.

(a) Probability that the 9 most contagious countries on the planet are countries with 5G networks.

There are 194 countries on the planet. As of 6 March 2020, according to GSMA, there are 24 countries with 5G technology.

$\Pr = 24/194 \times 23/193 \times 22/192$  (nine times in total) =  $0.1237 \times 0.1191 \times 0.1145 \times 0.1099 \times 0.1052 \times 0.1005 \times 0.0957 \times 0.0909 \times 0.0860 = 1.47 \times 10^{-9}$  (high -9 ).

The probability is 1 in 680,000,000. **That is 1 in 680 million!**

If we include Japan, which also has 5G and rates of infection similar to those of South Korea ...the probability is 1 in 8,500,000,000. **That is 1 in 8.5 billion.**

(b) *Probability that the 5 most contagious countries in Europe have 5G networks.* There are 49 countries in Europe, among which it is currently difficult to know if they currently deploy 5G, as there are 5 that have declared a moratorium, and many others do not have operational networks although companies publish as if they were already operational when they have signed agreements. We will calculate it downwards, as a conservative option, we will assume that about 15 countries have operational 5G systems.

$\Pr = 15/49 \times 14/48 \times 13/47 \times 12/46 \times 11/45 = 0.00157$ .

The probability is 1 in 637.

(c) The case of San Marino is highly significant. It is located within the Italian territory, with a similar culture, economy, and social level, but presents much higher rates of infection. The only difference is the time of exposure of its citizens to 5G radiation, because it was the first state in the world to implement such technology on 4 September 2018, while in Italy it was 5 June 2019. This opens the door to debate about the likely influence of 5G on the increase in the rates of infection.

$\Pr = 1/194 \times 1/194$ .

The probability is 1 in 37,636.

These figures are eloquent enough to make calculating the other cases unnecessary.

The results for the city of Barcelona (pp. 7-8) indicate that sociological factors do not have a significant influence on the rates of infection, but if we see a clear relationship with the 5G coverage map, which added to the 4G coverage, gives us a correlation between mobile coverage and the proportion of cases of coronavirus. If more data were available, this study should be extended to other cities.

## **Findings**

1. The results obtained demonstrate a clear and close relationship between the rate of coronavirus infections and 5G antenna location.
2. This study does not analyze the beneficial or harmful effects on humans of 5G electromagnetic radiation. However, it does indicate a possible cause-effect in the current pandemic.
3. A “border effect” is significant, original and unique to this pandemic: it presents marked differences between contiguous states with and without 5G installation. it is

particularly significant that the countries bordering China have very low rates of infection. One may also compare between Mexico and the USA or between Portugal and Spain, etc.

4. The case of San Marino is particularly significant. It was the first state in the world to install 5G and therefore, the state whose citizens have been exposed to 5G radiation the longest, and suspiciously, the first state in the world with infections. The probability of this happening is 1 in 37,636.

5. In the cities studied, Madrid, Barcelona and New York, this correlation is also observed. In the study of the city of Barcelona (pp. 7-8), it can be seen that the socio-economic factor plays a significant role.<sup>2</sup>

6. It is very significant that on the African continent, with scarce health resources but without 5G, the rate of infection is very low, except for some antennas in South Africa, which also presents the highest rates of infection in Africa.

7. The rates of infection are diluted. The rates of some regions are influenced by cities with 5G, but the rates of infection of these cities are diluted in those of the region to which they belong. So it is more significant, as is the case of Spain, to compare uniprovincial autonomous regions, than among those that are formed by 3 or more of the old provinces. Thus we see that some regions with 5G such as Rioja, Madrid and Navarra, have rates between 4 and 8 times higher than others without 5G. The same is true in other cities around the world where the 5G network does not cover the entire territory of the state or region.

8. These data and results have the value of being taken "in vivo", not based on prospective or laboratory studies. Never before have we had so much epidemiological information about a disease in humans to be able to produce scientific studies. A means of answering the question of cause and effect would be to disconnect the 5G networks, at least as a preventive measure, and see the results of the evolution of cases of coronavirus. So would studying the rate of infection in a state that declared a 5G moratorium after the pandemic started and studying if the statistics change. Given the evidence presented here, the data and conclusions of this study urgently need to be given due consideration. Given the current gravity of the pandemic, the media and political and health authorities have a responsibility to take urgent action. A failure to act in the face of the findings of this study could be considered negligent at the very least and very possibly criminal.

**Exposing The Establishment Daily  
COVID-19 AND RADIATION SICKNESS HAVE SAME DEADLY  
SYMPTOMS! COINCIDENCE?**

[April 23, 2020 The Marshall Report](#)

The symptoms sure match radiation sickness, and the protective gear to fight it seems to match that of those in Japan during their nuclear disaster? Dr.'s Fauci and Birx sure aren't dressing up outside like this.

Wuhan bio workers dressed in what looks like radiation suits? Something deadly serious going on.

Japan workers in their radiation suits working at nuclear reactor site.

We were last to get it perhaps because President Trump did not allow China to bring their Huawei, alleged stolen 5-G technology from US Military, into the USA. Meanwhile, Italy, Spain, UK, Princess Cruise Ships and a few others rolled out Huawei 5-G along with Wuhan in a celebratory fashion that led to a pandemic of COVID-19. Still, there are many using 5-G technology here or at least they have 5-G phones and we were the last to get it? In the mist of all the pandemic, I heard the President was working on 5-G protection before it is to be officially rolled out in the US. With conflicting pieces of hearsay, I found there are companies selling radiation protective devices called micro-processors to PROTECT BIOLOGICAL OBJECTS (like humans) FROM THE NEGATIVE INFLUENCE OF TECHNOGENIC ELECTROMAGNETIC RADIATION!

If technology companies are agreeing that cell phones and computer devices cause radiation sickness it only makes sense to ask the next question – What's really going on with the BIRDS DROPPING DEAD AND PEOPLE WITH ACUTE RESPERATORY FAILURE?

Birds drop from the sky bleeding internally from 5-G tests. What is it doing to us? So now they have found the virus (that won't be named) attacks the blood and robs it of oxygen. That is what they are saying. Let's take a look at it from a biological standpoint and a healthy dose of critical thinking and a dash of common sense.

Warning: This is for those that need to know the science, you have the option to scroll past this.

Rheological analysis (rheology) is the study of the flow of any material under the influence of a supplied flow of force or stress.

In the case of rheology and the flow of blood, biologists look at the bulk of blood cells called erythrocytes which play the leading part in changes in the flow properties of blood. This includes using parameters (a set of facts that establishes or limits how something can or must happen ) for rheology the most important parameters are:

Viscosity – the property of resistance to flow in a fluid or semifluid. i.e. the quality or state of being viscous (= thick and sticky and not flowing easily).

Aggregation – the process of combining things or amounts into a single group. How these aggregations affect things, such as a dose of aspirin inhibits the normal aggregation of platelets.

Erythrocytes – a red blood cell that (in humans) is typically a biconcave disc without a nucleus. Erythrocytes contain the pigment hemoglobin, which imparts the red color to blood, and transport oxygen and carbon dioxide to and from the tissues.

The bulk of blood cells are erythrocytes, therefore they play the leading part in changes in the properties of blood. Rheology parameters used to analyze the most important properties of blood are viscosity, aggregation and erythrocytes deformability (ED).

One of a cell's vital parameters is its reconfiguration in response to outside impact on the cell membrane caused by both external and internal environment. ED can be said to reflect, to a degree, viability of erythrocytes circulating in blood flow.

Which lead us to Electromagnetic frequencies which are outside forces that absorb oxygen from its surroundings and this action affects humans by taking oxygen from the lungs, and the blood that transports oxygen throughout the entire body. Thereby it can affect the blood viscosity , aggregation, and erythrocytes thereby impacting the physical health of humans, animals, birds, plants, and all living cellular organisms that need oxygen to thrive.

Hundreds and even thousands of birds falling from the sky all at once is not normal, and their tiny bodies bleeding from the inside from busted blood vessels and lack of oxygen is not a paranormal event. It is directly related to electromagnetic frequency surges.

Their little bodies cannot survive under EMF pulses. Neither can humans, sea life, bees, bugs and plants. As we have seen from other manmade disasters involving atomic and nuclear forces that emit radiation. The fall out just doesn't go away after the fallout cloud disappears. It remains. For the same reason it remains in your bodies unless you mitigate with alternative therapies such as those used in Chernobyl with algae, brown seaweeds, spirulina and miso soup, learned therapies from Japan. Read about how they did that here: [Nuclear Meltdown and Radiation Exposure in Japan](#)

*"Ionizing radiation happens when the atomic nucleus of an unstable atom decays and starts releasing ionizing particles. When these particles come into contact with organic material, such as human tissue, they will damage them if levels are high enough, in a short period of time. This can lead to burns, problems with the blood, gastrointestinal system, cardiovascular and central nervous system, cancer, and sometimes death."*

Full story here: [Medical News Today](#)

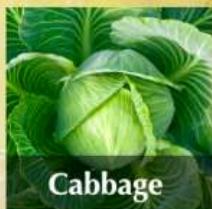

Radiation has been said to be accumulative in the body as it's' nano particle size that the body cannot eliminate through the pathways of elimination for the body reabsorbs it via these processes. But, there are ways to rid the body of radiation via putting a food source into the body that will engulf these nano particles in the intestinal tract thereby the body can eliminate them via the food source which has engulfed them inside themselves. Substances like brown algae, blue/green algae (spirulina), and ground flax seed just to name a few. These are foods and having them as well as many others in your diet daily may be a proactive step of ongoing protection and overall good health.

# TOP SULFUR RICH FOODS

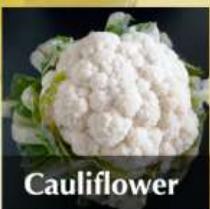

Human health can be adversely affected by exposure to radiation. This can come in the form of simple sunlight, to x-Ray exposure, to radiation fall-out. Tissue damage, whether resulting in a sunburn or in thyroid cancer is caused by "ionizing" radiation. Raising glutathione levels protects cells from damage by the most dangerous of free radicals released when ionizing radiation hits us. - **Jimmy Gutman, MD**

## Glutathione:

The Master of All Antioxidants

It's the most important molecule we need to stay healthy & to prevent disease. It's the secret to prevent aging, cancer, heart disease, dementia & more, & necessary to treat everything born from autism to Alzheimer's disease. The secret of its power is the SULFUR (SH) chemical groups it contains. Sulfur is a sticky, smelly molecule. It acts like fly paper & all the bad things in the body stick onto it, including free radicals & toxins like mercury & other heavy metals. Normally glutathione is recycled in the body — except when the toxic load becomes too great. This explains why we are in such health trouble & should consume more sulfur rich foods to support the body in healing & repair. - **Mark Hyman, MD**

DrJockers.com

It would do us well to look at radiation sickness studies and note the comparisons to radiation sickness and electromagnetic frequencies. Especially long term affects over time with low EMF's and short and long term affects with high doses of EMF's such as 4G and 5G. We now live in an electromagnetic field bubble and no one is free from the damage this causes human and all life forms.

*Excerpts from Medical News Today, on Radiation Sickness, written by Yvette Brazier:*

Symptoms: Radiation sickness can be acute, happening soon after exposure, or chronic, where symptoms appear over time or after some time, possibly years later.

The signs and symptoms of acute radiation poisoning are:

- vomiting, diarrhea, and nausea
- loss of appetite
- malaise, or feeling unwell
- headache
- rapid heartbeat

Symptoms depend on the dose, and whether it is a single dose or repeated.

A dose of as low as 30 rads can lead to:

- loss of white blood cells
- nausea and vomiting
- headaches

A dose of 300 rads dose may result in:

- temporary hair loss
- damage to nerve cells
- damage to the cells that line the digestive tract

Symptoms of severe radiation poisoning will normally go through four stages.

Prodromal stage: Nausea, vomiting, and diarrhea, lasting from a few minutes to several days

Latent stage: Symptoms seem to disappear, and the person appears to recover

Overt stage: Depending on the type of exposure, this can involve problems with the cardiovascular, gastrointestinal, hematopoietic, and central nervous system (CNS)

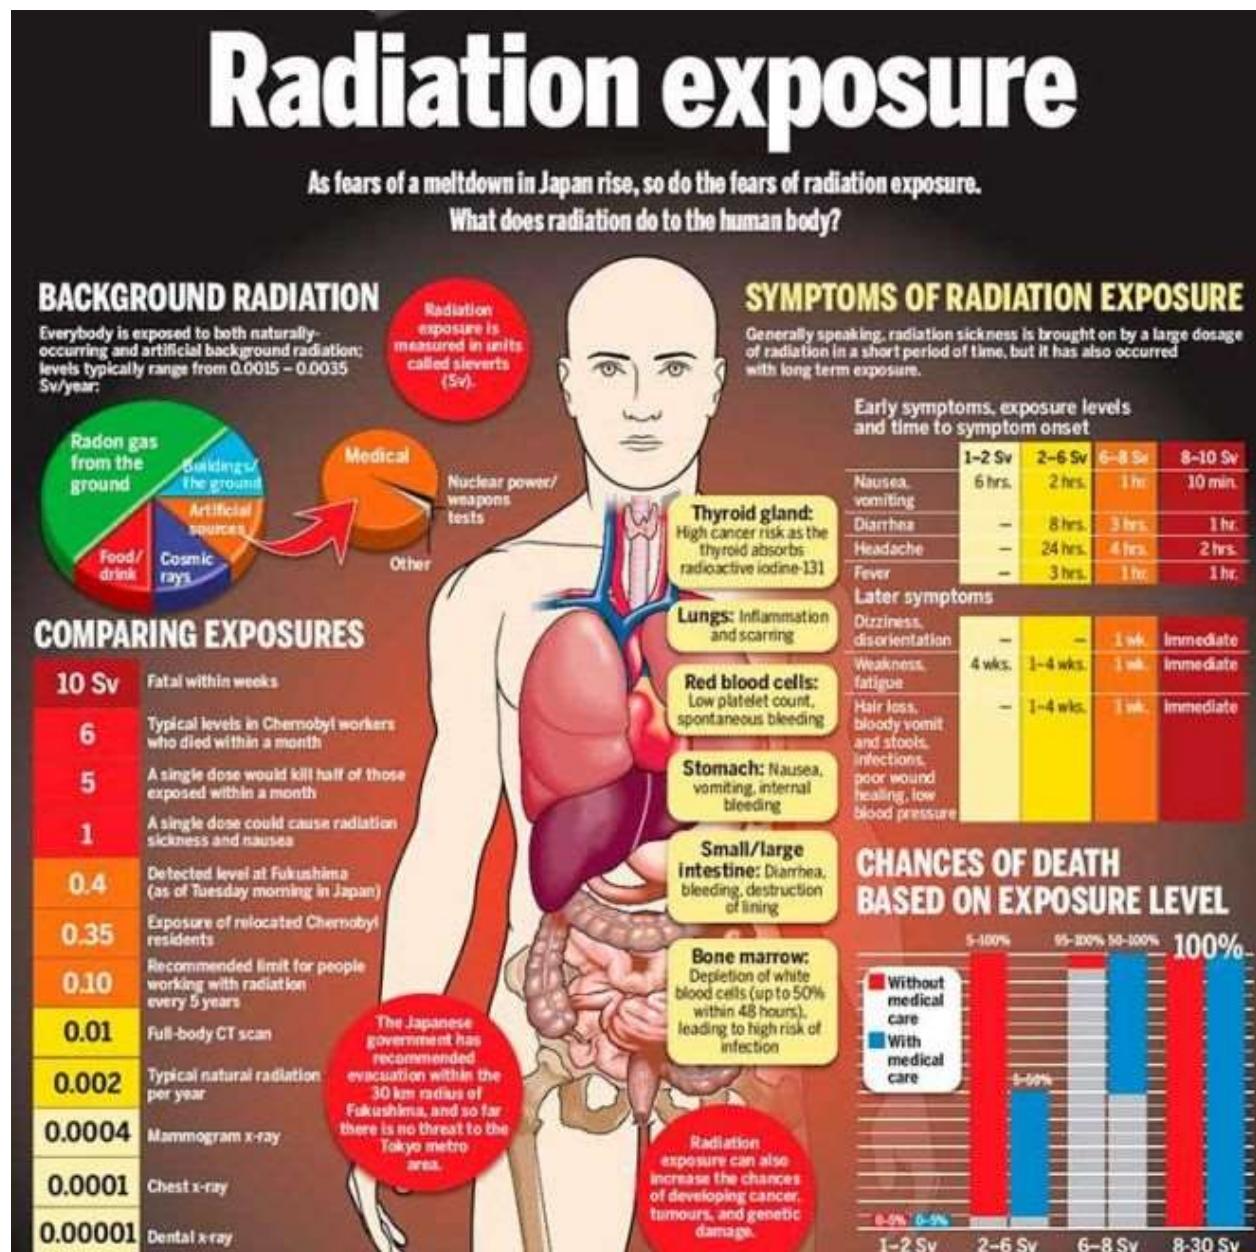

Recovery or death: There may be a slow recovery, or the poisoning will be fatal.  
Different doses, different effects.

The risk of illness depends on the dose. Very low doses of radiation are all around us all the time, and they do not have any effect. It also depends on the area of the body that is exposed.

If the whole body is exposed to, say, 1,000 rads within a short time, this could be fatal. However, far higher doses can be applied to a small area of the body with less risk.

After a mild dose, the person may experience symptoms for just a few hours or days. However, a repeated or even a single, relatively low dose that produces few or no visible symptoms around the time of exposure may cause problems later on.

A person who is exposed to 3,000 rads will experience nausea and vomiting, and they may experience confusion and a loss of consciousness within a few hours. Tremors and convulsions will occur 5 to 6 hours after exposure. Within 3 days, there will be coma and death.

People who experience repeated doses, or who appear to recover, may have long-term effects.

These include:

- \* a loss of white blood cells, making it harder for the body to fight infection
- \* reduction in platelets, increasing the risk of internal or external bleeding
- \* fertility problems, including loss of menstruation and reduced libido
- \* changes in kidney function, which can lead to anemia, high blood pressure, and other problems within a few months
- \* There may also be skin redness, cataracts, and heart problems.
- \* Localized exposure may lead to changes in the skin, loss of hair, and possibly skin cancer.

Most people are exposed to an average of around 0.62 rads, or 620 Gray each year. Half of this comes from radon in the air, from the Earth, and from cosmic rays. The other half comes from medical, commercial, and industrial sources. Spread over a year, this is not significant in terms of health.

Some activities that can expose people to sources of radiation include:

- \* watching television
- \* flying in an airplane
- \* passing through a security scanner
- \* using a microwave, computer, or cell phone
- \* Wi-Fi

[\*\*Read full article here\*\*](#)

These towers emit electromagnetic frequencies that harm living cells and surge during peak hours. Invisible enemy.

The hard truth is, even if you don't watch TV, fly on a plane, go through a security scanner, use a microwave, computer or cell phone, you cannot get away from the electromagnetic frequencies in the air waves being emitted by Gwen towers, cell towers, smart meters, and the surges these power lines throw out. We are all walking around in electromagnetic fields.

And so, what do we do? We certainly don't add Huawei 5G from Wuhan like Italy, Spain, Great Britain, and the Princess Cruise Ships did with Wuhan and their 5-G roll out last fall that seemed to have triggered a pandemic that experts are calling COVID-19.

The real fact no one can deny is the COVID-19 symptoms sure match radiation sickness. We were last to get it perhaps because President Trump did not allow China to bring their Huawei , alleged stolen technology from US Military, into the USA. Yet, there are many using 5-G technology here. Thankfully, the President is working on 5-G protection before it is rolled out bigly in the US. In the meantime, there are companies selling radiation protective devices called micro-processors to PROTECT BIOLOGICAL OBJECTS FROM THE NEGATIVE INFLUENCE OF TECHNOGENIC ELECTROMAGNETIC RADIATION! Here are a few, CLICK TO VIEW THEIR WEBSITES:

[AIRES TECHNOLOGY](#)

[Blushield Cube Active EMF Protection](#)

[QuWave](#)

Then there are also alternative methods....such as [ORGONITE](#)

I strongly suggest if we are going to be proactive during flu season that is now a yearlong pandemic, that we best get some type of bio micro-defense to protect ourselves and our family. Electromagnetic fields only complicate the health issues and many believe are the real culprit behind many of them. Meanwhile, wash your hands and see if the C.D.C. science experts have performed any testing on 5-G electromagnetic frequencies and how it affects the human body. If they say it doesn't...that will be a huge red flag. But WHO knows, they just may know a bio-processor technology company that offers social distancing protective measures to follow against these power towers. Maybe they have a mask? Body suits? Home coverings? Who knows?

In another article, in an interview between Dr. David L. Martin and German attorney Reiner Fuellmich that I posted on Wed, 07/14/2021 we now know that Covid was neither a novel (new) virus, it was not even a virus, it was created as a computer model.

[The Patents Prove It Was All a Criminal Hoax](#)

A RICO Case for the Justice Department to Prosecute!

In addition to the explosive work of Dr. David L. Martin there is another source that corroborates the virus was a hoax is that of Frances Leader.

A gold mine of mind blowing thoroughly researched revelations here from veteran Freedom Fighter Frances Leader. *"Not least among these is the confirmation that 'the vaccine has been created from a computer generated genomic sequence & not one isolated from an infected person."*

Welcome to a phenomenon that is becoming so frequent it is getting embarrassing: a government agency confirming so-called "conspiracy theorists" were right all along.

Quoting Ms. Francis Leader, *"When I read the Wuhan study in Feb 2020 I was mortified by the monkey kidney & foetal cell-lines which were used as a "culture" before rt-PCR amplification. Isolation was never satisfactory at any stage thereafter.*

*I honestly felt sick.*

*The genome sequence was computed from this.*

*I set about proving that the vaccine has been created from a computer generated genomic sequence & not one isolated from an infected person, either in Wuhan or anywhere else in the world since."*

"The Pfizer BioNTech vaccine was approved by UK MHRA (Medicines and Healthcare products Regulatory Agency) & I initiated a polite exchange of emails with them as follows:

I posted this tweet on Twitter on 24th December 2020 & my account was immediately & summarily suspended without explanation. I have appealed to Twitter to restore my account (25th January 2021) but have no reply so far:

**WITHOUT A PURIFIED SAMPLE VIRUS UK MHRA CONFESSES THAT THE PFIZER VACCINE mRNA ELEMENT IS A COMPUTER GENERATED GENOMIC SEQUENCE AMPLIFIED FROM A RNA FRAGMENT FOUND IN ONE EXPERIMENTAL STUDY FROM WUHAN (Feb 2020).**

**NO SIMILAR VIRUS HAS BEEN ISOLATED ANYWHERE IN THE WORLD SINCE.**

**THE VACCINES ARE CREATED USING A COMPUTER MODEL!**

**AFTER NEIL FERGUSON'S CATASTROPHIC COMPUTER MODEL TOOK THE WORLD INTO A SPIRAL OF LOCKDOWNS, MASKS & ABJECT FEAR – HOW MUCH FAITH HAVE YOU GOT IN A COMPUTER CREATED "VIRAL" SPIKE PROTEIN BEING INJECTED INTO YOUR BLOODSTREAM?**

A non-isolated virus means that scientifically the existence of this supposedly deadly virus has never been proven.

The whole pandemic stands and falls with this proof.

The full broadcast ‘Back to Wuhan’ with Mackey Frayer can be watched on YouTube and starts at 11:36.

**Leading Corona researchers admit that they have no scientific proof for the existence of a virus.**

- The claimed SARS-CoV-2 virus is only an alignment, a computer model.
- The end of virology is only a single control experiment away!

These questions make every virologist nervous.

- Where is the SARS-COV-2 isolate?
- A non-isolated virus means that scientifically the existence of this supposedly deadly virus has never been proven.

The whole pandemic stands and falls with this proof.

The full broadcast Back to Wuhan with Mackey Frayer can be watched on YouTube and starts at 11:36.

Leading Corona researchers admit that they have no scientific proof for the existence of a virus.

The claimed SARS-CoV-2 virus is only an alignment, a computer model.

The end of virology is only a single control experiment away!

These questions make every virologist nervous.

Where is the SARS-COV-2 isolate? It does not exist. It's all a hoax.

**My series “Plague of Fear 2020” took a year to complete. Here are the links to all 7 parts:**

In Part 1 of this series of articles, I described the shocking effects we all experienced during the first half of 2020. The surprises, lockdowns & fearmongering in the media over the so-called Coronavirus outbreak.

<https://steemit.com/news/@francesleader/the-plague-of-fear-2020>

In Part 2 I diarized the events & clues we were amassing during July 2020. The pandemic we now call **#COVID19** began to be better understood & I was able to introduce the accumulation of EMFs as a potential cause.

<https://steemit.com/news/@francesleader/the-plague-of-fear-2020-part-2>

In Part 3 I built on all that we know with daily updates & news items as they arose.

<https://steemit.com/news/@francesleader/the-plague-of-fear-2020-part-3>

**Part 4** discussed the psychological tools that have been used to terrorize the world & their impact.

<https://steemit.com/news/@francesleader/the-plague-of-fear-2020-part-4>

In Part 5 I lifted the lid on the players behind the scene & their entire GLOBAL RESET PLAN.

**Disturbing Addendum (part 6)** introduced a secret plan shared by those in the know.

<https://hive.blog/news/@francesleader/plague-of-fear-2020-disturbing-scenario-addendum>

In Part 7 I mirrored Steve Falconer's work:

<https://hive.blog/worldnews/@francesleader/plague-of-fear-2020-part-7-the-nail-in-covid-s-coffin>

**Steve Falconer** followed that up with a brilliant video:

<https://www.bitchute.com/video/IJloilKIUk1o/>

**AND!!!**

You can hear me discussing the New Pandemic Era with Mark Windows here:

<https://www.bitchute.com/video/LIqwlUrFs7db/>

As I have shared in this article, there has been a collective effort to defraud the public of the world to believe people are getting sick and dying of the Coronavirus known as Covid-19, which was patented 21 years ago, not once, but at least 71 times during those years. There are many questions yet to be fully explored, but we know with absolute certainty that the virus was created as a computer model, not from nature, or bats, or birds, or whatever.

The Telecoms and the federal agencies involved are corrupt and hiding the dangers of wireless communications, particularly 4G and the new 5G technologies. What has been

masked as a virus is nothing more than non-ionizing radiation sickness induced by low orbiting satellites beaming down frequencies from 24 GHz to 60 GHz.

As recent as Tuesday, July 13, 2021, Pfizer Industry began saying that booster shots may be required as often as monthly, speaks to the hoax they plan to continue to perpetuate upon the public world-wide. As Hosea 4:6 states, "***My people are destroyed for lack of knowledge: because thou hast rejected knowledge, I will also reject thee, that thou shalt be no priest to me: seeing thou hast forgotten the law of thy God, I will also forget thy children.***" The secondary lesson for humanity is found in this passage, as we see millions dying from the Vaxx. Never lose sight of the fact that the Virus was created for the Vaccine "Gene" editing purpose to harm and kill people.

It could take years to prosecute the crimes as laid out by Dr. David L. Martin, and, unfortunately, millions do not have time when the politicians are fear-mongering the public and their Gestapo tactics of door knocking into believing they must get the Vaxx if they can go about their lives without fear of being perceived as a Leper, arrest, abused, or placed in a FEMA camp.

Share this article as every person learning of the truth will help to expose and weaken the narrative hype of criminals like Dr. Anthony Fauci.

For over a year more than 100 countries have asked for slide samples of this imaginary virus, and the response from the CDC and other health agencies is that they do not have any, and this simply confirms they do not exist, apart from the fancy art work that appears on the Internet and media sources. Numerous professionals have argued that without meeting the Koch Postulates, there can be no claim that Covid-19 exists outside the imagination of those seeking to deceive.

The damage has been done and it will take years to unwind this crime with the public at large. What you do with this information is for you to decide; however, the lies must be met with push back. There is no need to fear the paper tiger fake virus!

# KNOWLEDGE IS KING
