

# A Universal 'AIDS'

## SARS-CoV-2, the Spike Protein, and the Slow, Progressive Destruction of Infected Cells

7-24-23

I dedicate this post to the memory of Luc Montagnier. (Author Anonymous)

AIDS is known as Acquired Immune Deficiency Syndrome because of the EFFECT of the HIV virus, not because of what the virus DOES. The HIV virus, which causes AIDS, destroys the cells which it infects. The virus infects CD4 T-Cells. Over time, when the number of CD4 T-Cells reaches a low enough number, the body can no longer defend itself and AIDS sets in. HIV does not cause your immune system to malfunction on a systemic level. HIV slowly destroys one of the critical components of your immune system, causing it to fail.

Now, what type of cell a virus infects is called Tropism. The HIV virus infects CD4 T-Cells. The SARS-CoV-2 virus and its Spike Protein infect virtually EVERY cell.

Do you understand what is happening? This explains EVERYTHING!

Based upon the Spike Protein's tropism, let us look at what happens when we have the slow, progressive destruction of different cell types.

### **CARDIOMYOCYTES**

Loss of cardiomyocytes plays a critical role in the pathogenesis of heart failure. With fewer myocytes, the heart is unable to sustain efficient contraction. Much attention has been focused on understanding mechanisms of cell death in myocytes with the ultimate goal being to reduce the extent of injury and improve function in the failing myocardium. Both necrosis and apoptosis contribute to loss of myocytes, and this loss of cells is a hallmark of cardiac pathologies, including ischemia/reperfusion, myocardial infarction, and heart failure. Apoptosis is a highly regulated process that is activated via death receptors in the plasma membrane or via permeabilization of the mitochondria. Necrosis is generally viewed as an uncontrolled process that leads to mitochondrial swelling, cell rupture, and subsequent inflammation.

Cell Death in the Myocardium: My Heart Won't Go On  
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4074399/>

### **NEURONAL CELLS**

Neurodegeneration is a slow and progressive loss of neuronal cells in specified regions of the brain and is the main pathologic feature of Alzheimer's disease, Parkinson's

disease, etc. The underlying pathophysiology of these neurodegenerative diseases is oxidative stress from impaired mitochondrial function, deposition of aggregated proteins, neuroinflammation, and activation of apoptotic factors.

Quercetin and antioxidant potential in diabetes

Francis I. Achike, Dharmani D. Murugan, in Diabetes (Second Edition), 2020

### **PANCREATIC BETA CELLS**

Beta cell insults include cytokine-induced inflammation, obesity and insulin resistance, and overconsumption of saturated fat and free fatty acids (FFA). A progressive decline of beta cell function leading to beta cell exhaustion precedes beta cell demise (Ferrannini, 2010; Talchai et al., 2012). Loss of beta cell mass and function are central to the development of both type 1 and 2 diabetes (Stoffers, 2004).

Beta Cell Dysfunction and Insulin Resistance

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3608918/>

### **MUSCLE CELLS**

Sarcopenia is the age-related progressive loss of muscle mass and strength. The main symptom of the condition is muscle weakness. Sarcopenia is a type of muscle atrophy primarily caused by the natural aging process. Scientists believe being physically inactive and eating an unhealthy diet can contribute to the disease.

Sarcopenia

### **ENDOTHELIUM** (Why Spike Protein Disease Resembles Graft vs. Host Disease)

#### **Endothelial Cell Death Contributes to Vascular Remodeling, Autoimmunity and Inflammation**

The presence of dying renal cells in association with AKI or rejection episodes has been known for decades. However, the characterization of molecular pathways controlling regulated renal cell death responses is still an evolving field. Two major types of programmed cell death, apoptosis and necroptosis, have been characterized in association with AKI (23, 26, 65-73), although various death and inflammatory pathways such as ferroptosis and pyroptosis also likely contribute (74-76).

Endothelial Dysfunction in Kidney Transplantation

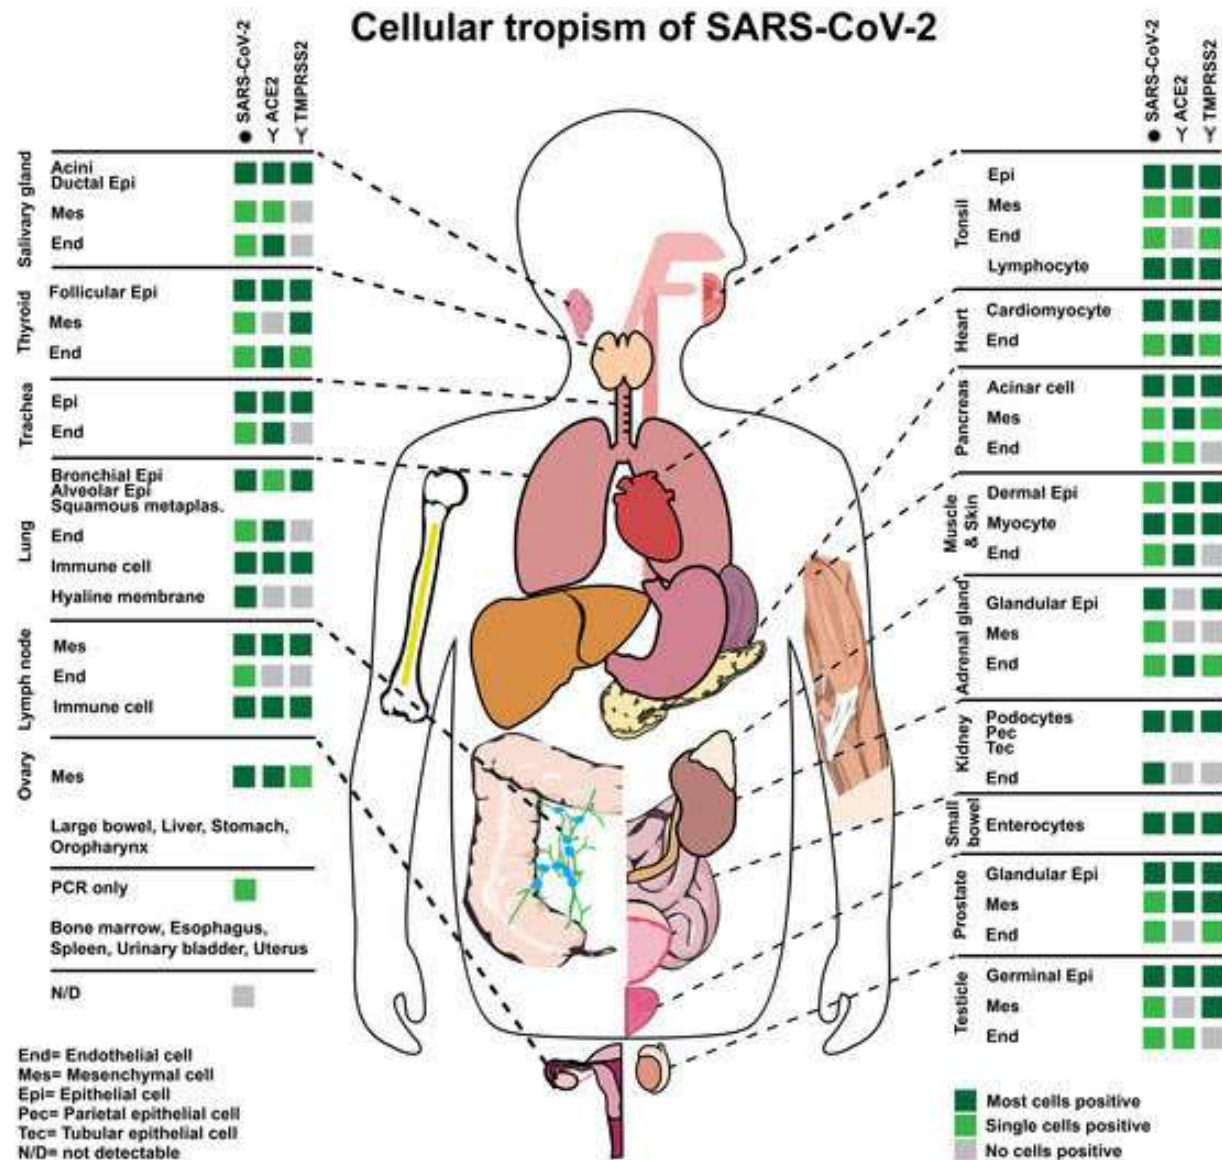

<https://www.frontiersin.org/articles/10.3389/fimmu.2018.01130/full>

Now do you see what is happening?

JUST AS AIDS IS THE EFFECT OF HIV'S DESTRUCTION OF CD4 T-CELLS, ALL THE PATHOLOGIES BEING OBSERVED POST SPIKE PROTEIN EXPOSURE ARE THE EFFECTS OF THE SPIKE PROTEIN'S DESTRUCTION OF VIRTUALLY EVERY CELL TYPE!

We are dealing with an "AIDS" of universal scope. We need to understand if this virus is acting like HIV and other latent viruses. Is it slowly, inexorably destroying everything it touches? Cell By Cell.

I pray not.

When I first read this article, which was posted on Rense.com, I kept looking for the name of the writer but it is anonymous. I believe this to be accurate and from my own coverage of the scandemic from day 1, this is a strong indictment of those engaged in "Gain-of-Function" work with the SARS-CoV-2 virus. All of the articles on "Gain-of-Function" confirm the efforts were to increase its lethality which in turn attacks and destroys our natural "God-given" immunity.

In the past four years, I have read every book on virology by Judy Mikovits, and by other authors as well. I have read her book *'Plague'*, *'Ending Plague'*, and *'Plague of Corruption'*. Why do I mention particularly Dr. Judy Mikovitz? Because Dr. Judy Mikovitz has had the proof since in her cancer research work as a young Ph.D. under Dr. Anthony Fauci; she learned the public blood supply had been contaminated during the early 1980s. Dr. Judy Mikovitz has been on the record to state that 55-million people in the U.S. will die because they received the HIV gene GP120 and the XMRV monkey strain virus in blood transfusions from contaminated blood. The blood supply was never screened for HIV until many years later.

Dr. Mikovitz says under no circumstances should anyone ever receive a vaccine because of the cell line that grows in your body. Our immune system handles these issues without the need for vaccines. Because the vaccines contain the spike protein mRNA the human immune system goes into overdrive and ultimately wears out from constant attack on the pathogen of the vaccine. Those who received HIV contaminated blood during the 1980s saw their health decline to the point they developed full-blown AIDS. Dr. Mikovitz said HIV was not a death sentence so long as a person followed a protocol of treatment with a combination of drugs. She cites the case of the pro-basketball player, Magic Johnson who has survived more than 25 years with the pathogen known as HIV1. The cost of his treatment is expensive but he is still alive today.

SARS-Cov-2 was weaponized at Fort Detrick, MD and shipped to Wuhan, China in vials. A short 9-minute video of Dr. Judy Mikovitz is linked here below:

[Dr. JUDY A. MIKOVITZ, PHD. – THE TRUTH ABOUT SARS-COV-2 ...](#)

The late French virologist Dr. Luc Montagnier stated that the SARS-Cov-2 virus was weaponized by the insertion of 18 fragments of the HIV1 genome and 4 fragments of the SARS-Cov-2. A team of Indian scientists discovered the HIV1 genome and the SARS-Cov-2 genome in early 2020, and their work was verified by Dr. Luc Montagnier about March, 2020. An article about Covid being a Retrovirus was published in the December issue of *'Entangled'* magazine, a publication dealing with leading-edge science.

If one goes to this link you will learn the extent of the so-called Vaxxes have been administered since the beginning of EUA jabs:

[USAFacts](#)

<https://usafacts.org/visualizations/covid-vacci...>

[US Coronavirus vaccine tracker | USAFacts](#)

Web52 rows · Jul 14, 2023 · In the US, **984,444,295** doses have been distributed so far, with **68%** or 676,728,782 of the doses used.

At least **270,227,181** people or **81%** of the population have received at least one dose.

Overall, **230,637,348** people or **70%** of the population are considered fully vaccinated.

As of **March, 2023**, the New York Times published that more than **5.55 billion people** worldwide have received a dose of a Covid-19 vaccine, equal to about **72.3 percent** of the world population. This map shows the stark gap between vaccination programs in different countries.

Wikipedia states that as of **May 7, 2023**, **13.4 billion** COVID-19 vaccine doses have been administered worldwide, with **67.9 percent** of the global population having received at least one dose. While 4.19 million vaccines were then being administered daily, only 22.3 percent of people in low-income countries had received at least a first vaccine by September 2022, according to official reports from national health agencies, which are collated by Our World in Data.

Dr. David Martin stated on Greg Hunter's Watchdog USA program stated also, that up to 700 Million Worldwide Will Die from CV19 Vax by 2028 – Dr. David Martin *"By their own estimate, they are looking for 700 million people globally . . . the U.S. participation in that of the injected population is 75 million to 100 million people."*

Dr. Martin and Dr. Mikovits both have been falsely attacked by the so-call Fact Checkers and accused of lies, yet the facts have been confirmed for the past three years that they are truthful and accurate. Dr. Martin is known as 'the man with the bowtie'. Dr. Martin is the CEO of M:Cam, an international company that investigates the efficacy and accuracy of patent applications (that they will do what the patent holder says they will do). His company is the world's largest underwriter of intangible assets used in 168 countries.

Dr. David Martin has evidence that Covid vaxxes are in fact, "bio-weapons" and that he has some 4,000 patent documents to prove that to be true. **Dr. Martin has stated in videos assessable on the Internet that 100 million will die from the Covid injections by 2028.** Dr. Martin has been tracking the virus SARS2-CoV-02 since before the year 2000 and has followed the crimes and perpetrators along the line dating over 20 years, and needless to say, he has the evidence from their own patent claims. To read a single or a few patents does not tell the whole story of the agenda to "Depopulate" the world. It is found in the 4,000 patents that collectively tie their crimes together and what their plan is to kill humanity randomly.

Dr. David Martin joined Alec Zeck of *The Way Forward* podcast about the fundamental misconceptions that have been built into our sciences and how these have now been compounded by a domestic and international racketeering and terror campaign known as "SARS-CoV-2" and "COVID-19" and how these deliberate confusions erupt around the conversations about the existence and the nature of "viruses".

Alec asks David, *"What is your take on SARS-CoV-2 and viruses, in general?"*

To which David replies, *"As for SARS-CoV-2, there is no question in my mind that people who had every intention of disrupting and harming humanity and people who had every intention of building things that would ultimately toxify the environment, to*

*make human life more unattainable, so that they could have greater control, used a series of biological weapons creation efforts to create a branded terror campaign."*

*"The branded terror campaign was a campaign that included the term, 'SARS-CoV-2', which was the term that was necessary, because they had declared SARS-CoV-1 'eradicated' and it kinda a sux if you're going to try to sell a fear narrative to say that the thing we declared 'eradicated' is back, because that would suggest that the science that had declared it 'eradicated' was wrong. And obviously, you can't do that, if you're trying to run a terror campaign."*

***"So, SARS-CoV-2 was a branding campaign conducted during the month of February in 2020. The ICTV, which is the International Committee on the Taxonomy of Viruses, published on March 2, 2020, their official brand that said that there was a 'novel pathogen'. That novel pathogen was going to be branded 'SARS-CoV-2', so that...there was a quote 'disease' – in their words – 'caused' – in their words – by this thing."***

***"They branded the disease 'COVID-19' but they were very clear to stipulate that there was no disease; it was a set of symptoms and those symptoms were commonly associated with influenza-like illness and have been associated with influenza-like illness for 55 years. So, this idea that this was a novel disease was a branding campaign."***

***"And so, let's stipulate for this conversation that the entirety of the last 4 years was a premeditated act of domestic and international terrorism and most importantly, the perpetrators admitted to that very fact in 2015. They said they were going to make an event where the media hype would drive the public to demand a medical countermeasure called a 'vaccine'."***

***"So, the unambiguous nature of what this is: it was domestic and international terrorism, it was collusion, it was racketeering. Back in 2015, they actually stipulated that they were going to commit the crime in 2015 and they executed the crime on schedule."***

*"The second piece of your question is actually a much more difficult one, simply because we're dealing with a piece of terminology that has morphed since it was introduced in the 14th century. Insofar as 'virus' means, in proto-Italian 'poison', do I believe there are poisons in the world, the answer, unambiguously is 'Yes!' and the reason is because I've had poisons injected into me and I know that the poison has had an effect that was the desired effect."*

*"So, insofar as do we believe that there are poisons? Absolutely, there are and there is absolutely no question that poisons are, in fact, sometimes accidental and sometimes intentionally introduced to cause incapacitation or death."*

**"Insofar as is there a micro particle coming up into the 18th century – is there a micro particle involved in the causation of disease that we then, now rebrand – and by the way, once again, it's branding – we rebrand a virus and then, we try, through the cunning use of language to subtly replace the actual multi-century use of that term, which is 'poison' – which there is – for a causative agent of anything, the answer is, 'Absolutely not!'"**

"Causation, which was invented in 1663 very specifically; causation is an illusion of the intellectually lazy. The idea that we can identify, out of the plurality of conditions in the universe, every single factor that creates the condition giving rise to a thing is as hubris-filled and delusional as the [Council of Nicaea](#) was in the 4th century, trying to pretend that they could take the infinite of the Divine and dictate, in a couple paragraphs, the sum total of what it meant to have religion."

"This idea that we can be reductionist to the point of stupidity, where we decide that we are going to pick the ontology and the frame in which we're going to understand nature – and then have the audacity of saying, 'We're gonna get to causation' – is beyond the pale of idiocy. And it's important for people in this conversation to understand, that when [Gottfried Leibniz](#) in 1663 published his dissertation, which gave us modern regression, it's important to realize that in the same year, two important things happened:

"We were actually doing heretic witch-burning and heretic trials in Europe and the guy who wrote the fundamental mathematics behind which causation, regression is derived was a Lutheran being sponsored by Catholics in a town where people were being burnt for being Lutheran."

"So, let's be abundantly clear: that there was a tiny motivation for a guy to come up with an explanation for causality, which he was commissioned to do by Catholics so that he didn't get himself burned at the stake by the exact same people who are paying him."

"And if we actually understood that causal regression is derivative of that and every single thing we call medicine and science right now is a direct derivative of a fallacy that was established and published in 1663 – if we understood that, we'd be having a different conversation."

Alec then drills down and says, "Just to be clear here, so when we're talking about a 'virus', I'm not talking about the previous definition of 'poison', I'm talking about a tiny, replication-competent, obligate, intercellular parasite consisting of a genome surrounded by a protein coat that is an infectious particle."

David replies, "100% bullshit. Everything you just said, for a simple reason: Beginning in 1768 and moving up until its codification in 1869-1870, we took a world that, once upon a time was described largely through natural philosophy and frequencies and we decided to turn it into a world defined by chemistry."

*"And here's where the problem kicks in: When [Mendeleev](#) created what we now refer to as the Periodic Table, he took upon himself the idea that, somehow or another, chemistry was the descriptor of life. And every word you just used to describe what we think we call viruses today is derived from a chemical-mediated model of a system that, by definition is not chemical."*

I'm reminded of when Clif High said that we would be digging ourselves out of the lies and misconceptions built into our sciences for at least a century once the imminent collapse of the Khazarian Mafia is complete.

The full conversation of this can be watched at the link below:

[Dr David Martin: Clarifying the Viral Narratives](#)

Click on the link above for the 80-minute education on how the public has been deceived by deception and lies, seduced into believing they are victims of a novel rogue virus!

As a final comment on the anonymous article at the top of the article, if it is true, and a growing volume of evidence is pointing in that direction, the world is likely to be minus two or three billion people by 2028. God help us all!

Blessings,

Pastor Bob, [EvanTeachr@aol.com](mailto:EvanTeachr@aol.com)
