

A Berean's Approach In Understanding the 5G/Corona Virus Dilemma

The late Dr. Chuck Missler often noted Acts 17:11 in his Bible teachings: ***“These were more noble than those in Thessalonica, in that they received the word with all readiness of mind, and searched the scriptures daily, whether those things were so.”*** This guide line instruction can likewise be quite effective in many different areas of study and help us in resolving questions that seem to be a paradox. The dictionary definition of a “paradox” is: *a seemingly absurd or self-contradictory statement or proposition that when investigated or explained may prove to be well founded or true.*

When puzzled by what may seem to be mutually exclusive issues and yet in their larger context appear to be very much related one has to step back and examine the known facts and evidence; focus on the contradictions, any inconsistencies, do a 360-view of the issue and ask the Lord to guide us to the truth. What I am about to discuss is not whether **5G** is harmful or not. The evidence overwhelming confirms that **5G** is harmful. Instead we are discussing at this point in time whether **5G** is the hidden reason by the Coronavirus pandemic. It is important to make this distinction..... It took me a couple weeks to confirm my suspicion, and I addressed that issue in two articles, **“The Best Wi-Fi at Sea! Part 1”** posted on 4/17/2020 and **“The Best Wi-Fi at Sea!, Part 2”** posted on 4/30/2020. I had become highly suspicious of events that were related to the Diamond Princess cruise ship, where a Japanese passenger on the Diamond Princess became sick and when the cruise ship docked at its first stopping point of Hong Kong went to a Chinese hospital where he was diagnosed as having the Corona virus.

5G is one of the most diabolical agendas in the history of civilization. Unlike many conspiracy websites, which only want to focus on the world we see, we are aware that there is another dimension which is increasingly exerting its presence through the 1% of the 1%, that being what we cannot see! In fact, nearly all of these dilemma fall into this category of the invisible, hence it was the title of Dr. Arthur Firstenberg's book: *‘The Invisible Rainbow: The History of Electricity’*. He considers **5G** an Extinction Level Event, and with substantial reason to do so.

David Icke is no stranger to controversy and on April 2, 2020, he may have become one of the most influential men on earth to affect the narrative, that the cause behind the coronavirus pandemic, is the rollout of the **5G** network. David Icke was not a new name for me as I had read his 1999 book, *‘The Biggest Secret: The Book That Will Change the World’*. David Icke is not a Christian and one would likely to have reason to reject some of what he writes about; however, it was David Icke's book that noted that Adolph Hitler was a Rothschild! Reading and listening to David Icke is like eating chicken, eat the chicken and throwing away the bones. The point about David Icke is important and

in a couple of pages you will understand why he became the lightning rod in this scenario of **5G** and the alleged Corona virus scam-demic.

What you first need to know is that a virus is not a virus until it has first been captured, quantified and reproduced in a petri dish in a bio-lab facility. Louis Pasteur was a fraud and never proved the “Germ” theory, and that he admitted this in his death-bed journals. This point stands apart from the likes of Dr. Anthony Fauci, who never proved that AIDS caused HIV, despite his cocktail of drugs given to people with AIDS. **The simple fact is that you cannot confirm a virus exists unless it is captured in a lab setting and confirmed by replication in a petri dish.** Dr. Judy Mikovits and Dr. Zack Bush, and many others have tried to expose the crimes of Dr. Fauci.

Quoting from an article in ‘*Scientific American*’ by Luis P. Villarreal on August 8, 2008, “From single-celled organisms to human populations, viruses affect all life on earth, often determining what will survive. But viruses themselves also evolve. New viruses, such as the AIDS-causing HIV-1, may be the only biological entities that researchers can actually witness come into being, providing a real-time example of evolution in action.” Dozens of scientists have challenged Dr. Fauci’s basis for AIDS as the cause of HIV, yet the various health organizations shut-off debate thirty years ago because the literature submitted by Dr. Fauci was accepted without peer review analysis and validation that proof his study was true. This obstacle has forever been the central issue of Dr. Fauci’s patented so-called viruses and part of his fraudulent work.

As noted by the virologist and scientist Dr. Judy Mikovits, whose work was stolen by Dr. Fauci, her immediate superior at the NIH. Dr. Faucet and a Dr. Robert Gallo (deceased) then plagiarized her work passing it off as that of Dr. Gallo. Dr. Fauci and Dr. Gallo then created an expensive cocktail of drugs to give to his HIV patients, and which the pair profited from immensely,

HIV stands for “human immunodeficiency virus.”

“Immunodeficiency” means the systems that fight illnesses in your body aren’t working the way they should.

Your immune system has things called CD4 or T-cells that help keep you healthy. HIV attacks these cells. The virus copies itself over and over, killing your CD4 cells. Without them, you’re more likely to get infections from bacteria, viruses, and fungi. Treatment called antiretroviral therapy (ART) stops the destruction of these cells.

You can get HIV through direct contact with: blood, semen, vaginal fluid, breast milk, or through a fake vaccine “injection”. This is where it becomes absolutely essential to take **NO VACCINE!** The most important point to understand is that a pathogen cannot be called or labeled a virus without first identification and quantifying it through replication in a petri dish, otherwise it cannot be labeled a so-called virus. I repeat this because the public health organizations like CDC, NIH, WHO, control the narrative because of their so-called expertise. In essence, they are playing God and we can’t challenge God!

Although not publicly known or widely reported, we know from military sources which have confirmed the Pirbright Institute in Surrey, UK, they modified its potency through the addition of four elements of SARS and HIV. The seed was planted and in the years to come millions will likely die prematurely, unaware of what will really killed them. 65-million Americans were given the polio vaccine in the 1950s, and the polio virus was laced with SV-40, which caused millions to die of cancer years later. I have examined hundreds of documents, books, and studies as a result of what occurred in Wuhan, China in the fall of 2019. In returning to the paradox of how **5G** and the Corona virus is being made into a “straw man” argument, we turn to a presentation that was given by David Icke on British television

David Icke was interviewed by ‘*London Real*’ an organization led by Brian Rose, an ex-city banker, whose primary purpose is to introduce people to subject matters very seldom given any airtime by the mainstream media. Rose's story is an incredible one where starting his video-interview business in his bedroom, he has grown his alternative media empire to an incredible level of online visibility.

In the interview Icke spoke extensively on a broad range of aspects relating to the coronavirus pandemic, but the critical period of this conversation was when he alluded to the effect of electro-magnetic waves. The context of the discussion conveyed his impression that there was a link between **5G** and the cases of coronavirus, citing Wuhan as evidence for this. We now know this is true from documents in the NIH's own research library files. The term is called “Electroporation” Electroporation, or electropermeabilization, is a microbiology technique in which an electrical field is applied to cells in order to increase the permeability of the cell membrane, allowing chemicals, drugs, or DNA to be introduced into the cell (also called electrotransfer).

Within 24 hours of the extensive interview being uploaded to ‘*YouTube*’ and ‘*Vimeo*’, an executive decision was made in both organizations to pull the videos of their platforms. Subsequently, news articles were then published by the ‘*BBC*’ and a number of national newspapers, pouring scorn over David Icke and his assertions that there was a conspiracy to cover up **5G** as the reason for the pandemic.

However, what many people don't realize is that it wasn't the availability of this on ‘*YouTube*’ or ‘*Vimeo*’ which let the cat out of the bag amongst the pigeons. Instead, it was the fact that ‘*London Live*’ (a UK terrestrial channel) screened the interview giving it unchartered and significant access to the mainstream UK population. ‘*London Live*’ is owned by the Russian businessman Evgeny Lebedev, who also owns the ‘*Evening Standard*’ and ‘*Independent*’ newspapers.

The David Icke interview revealed how important freedom of speech is because the *BBC* article included the following statement from ‘*YouTube*’ not long after they had deleted the interview from their video sharing platform. If there was ever a statement that defined the character of a tyrannical dictatorship then the following statement exuded it all.

"Now any content that disputes the existence or transmission of Covid-19 as described by the WHO (World Health Organization) and local health authorities is in violation of YouTube policies." Essentially the *World Health Organization* sets the narrative and there is no room for dispute, discussion or debate.

Some of the headlines from national newspapers which poured scorn on the interview were:

FAKE VIEWS Sick YouTube coronavirus videos claiming '5G caused COVID-19' rack up MILLIONS of views

LOGGED OFF YouTube bans all 5G conspiracy theory videos after 'misleading' David Icke interview linked internet to health crisis

Soon after 'You Tube' had gone on the warpath then the social mobile app company, 'WhatsApp', came out with a new limit on message forwarding to tackle the spread of what they felt was misinformation about coronavirus and **5G**. Soon after *Facebook* followed, removing the video after being contacted by 'ITV News.'

Some weeks ago, other work published on previous coronavirus disclosures projects were suspended until we had this overturned. Clearly the mood of the mainstream media and national governments is much more intolerant than previous occasions. Coronavirus has changed a lot of things and the world we are in now will never return back to the old normal, because it was merely a precursor to the NOW agenda.

The David Icke interview followed an audio that was put out which went viral. The audio clip from a presentation made by a Pastor Jonathon of a church in the UK, made the same assertion that the symptoms being experienced had nothing to do with any rogue virus but were simply symptoms caused by the extensive global rollout of **5G**.

Just like David Icke much of what Pastor Jonathon had to say was refreshing and informative, in regards to the coming deceptive functionality of **5G**, and also the electromagnetic and metaphysical aspect of human beings as receivers of electronic signals which could be manipulated. Just like David Icke he believed that **5G** was the sole reason for the outbreak of Covid-19.

Further investigation reveals that both David Icke and Pastor Jonathon's views may have been influenced by a video filmed in early March 2020 at a US health conference. The video shows a presentation by Dr. Thomas Cowan and was published by the *account Parents for Healthcare Rights*. Since then, Cowan has been put on disciplinary probation. In the video, Dr. Thomas Cowan claims that the viruses in cases being reported are the secreted waste products from cells that are poisoned. Some of the poisoning, he said, comes from electromagnetic fields. Dr. Thomas Cowan quoted Dr. Arthur Firstenberg's book and research, "*The Invisible Rainbow: The History of Electricity*", which makes the case for a causative relationship between Sunspot and electricity and harm done to all life forms. I have read the book and affirm Dr. Thomas Cowan's medical assessment!

And finally, another doctor who has also been a significant influence behind David Icke and Pastor Jonathon's assertions, is Dr. Andrew Kaufman, who comes to the conclusion that Covid-19 is not a virus but an exosome which exists normally in our lung cell fluid.

"The issue with the prophets of the 5G-Coronavirus conspiracy is not denying that 5G will facilitate devastating draconian changes to global control, but that 5G being responsible for Coronavirus is simply not sustainable through the lens of cross examination"

Much of what David Icke and Pastor Jonathon discuss about is absolutely correct, in regards to "beyond coronavirus" and "what next." So it's very important that you fully understand this point lest you fall into ignorance like some who have the inability to know that we can agree and disagree with the same person on particular key points. To some extent we are all in agreement on the end goal it's simply a matter of disagreement on the finer points in the journey to the ultimate destination.

Where my articles on 5G differed from those of David Icke and Pastor Jonathan [a former telecom manager for *Vodafone*] was to include scientific/medical data on how **5G** when "modulated" [energy volume increased or decreased] impacts the oxygen

absorption into the blood of deceased victims. 90% or greater of the deceased Covid-19 alleged virus were age 65 or older and also had comorbidity pre-existing health issues and weakened immune systems. A few pages down, I have shown an oscilloscope-screen reading of what **5G EMF does to the oxygen levels when “modulated” up to 60 gigahertz. It absorbs or consumes 98% of the available oxygen in whatever container it is found in, this could be an oxygen tank container, or a pair of human lungs!** It is instant death!

The simplest way to prove whether **5G** is the direct cause of the pandemic is simply to find out where **5G** has been rolled out globally and then compare this against the cases and deaths of coronavirus in the respective countries. In this analysis, we have to address opposing arguments that in theory are reasonable and practical such to believe they in fact destroy the view that **5G** is the causative factor for the outbreak of the alleged Corona virus outbreak around the world. Conversely, I will attempt to disprove the various views that have been offered to explain away **5G** as the cause of the virus.

I am giving what we might call the “Devil’s Advocate” view or position, since the telecommunications industry has really used “Strawman” arguments to negate the **5G** medical theory of Dr. Thomas Cowan and others.

So you would assume that

1. Countries with the highest cases and mortality would be the ones with a significant density of live **5G** networks.
2. Countries with the lowest rates of cases and mortality would be the ones with the lowest density of live **5G** networks.
3. Countries with no live **5G** networks as of yet would have minimal/no levels of cases and mortality.

As of May 22nd, 2020 (5am U.S. EST) the 11 countries with the worst cases of coronavirus were as follows on the chart on page 7 below. (Obviously we are now in August 2020, but the more months elapsed since May have provided even more confirmation of our conclusions.

Keep in mind when looking at this chart, the data does not guarantee accuracy, given the many flaws and dishonest data reporting, such as false positives, false test readings, deliberate inflation of case reporting, etc., all of which raises red flags to what has been an intentional deliberate attempt to inflate the numbers. That was further rigged by state medical authorities advising health professionals and hospitals to report unrelated deaths as being labeled Covid-19. They used a Medicare payment rate three times for a patient placed on a ventilator, than what was paid for someone simply treated as a virus patient. The Virus issue has been a medical debacle of corruption and fraud, and lacking credible statistical reporting.

#	Country, Other	Total Cases	New Cases	Total Deaths	New Deaths	Total Recovered	Active Cases
	World	5,210,478	+19,982	334,891	+718	2,092,878	2,782,709
1	USA	1,621,196	+294	96,359	+5	382,244	1,142,593
2	Russia	326,448	+8,894	3,249	+150	99,825	223,374
3	Brazil	310,921		20,082		125,960	164,879
4	Spain	280,117		27,940		196,958	55,219
5	UK	250,908		36,042		N/A	N/A
6	Italy	228,006		32,486		134,560	60,960
7	France	181,826		28,215		63,858	89,753
8	Germany	179,021		8,309		159,000	11,712
9	Turkey	153,548		4,249		114,990	34,309
10	Iran	129,341		7,249		100,564	21,528
11	India	119,419	+1,193	3,599	+15	48,957	66,863

Now the question is what type of rollout are we comparing this against. A full live rollout or a **5G** test/pilot phase? Obviously we need to look at the live full rollout as this is what is going to cause maximum impact if we are looking at a true correlation. If looking at full live rollouts then we notice something very unusual.

Click below where it says "*Click here for the Ookla 5G Map*" and it will open up a separate website which is an official in "real-time" statistical count of **5G** deployments across the world. (Zoom in and out using the +/- buttons you see on the screen when you get there).

If you do this you will be one of the 25% of people who actually will be willing to test out what we are showing you. Only a small percentage of people will wish to know the truth.

Look at the edge of France and you will see a number around 837+ (it changes if more **5G** installations have been added). If you keep zooming in you will eventually see that of the 837+, around 640+ corresponds to all the live **5G** network deployments in Switzerland which is the country adjacent to France. Now look at France. **There are no live 5G installations.**

OOKLA 5G MAP™

The interactive Ookla 5G Map tracks 5G rollouts in cities across the globe. Updated weekly from verified public sources and Ookla data, you can follow operators' newest 5G networks on [@Ookla5GMap](#).

[Click here for the Ookla 5G Map - Tracking Live 5G Network Rollouts Around the World](#)

See the latest live 5G rollouts across the world with our interactive 5G map. We're tracking 5G cellular networks so you don't have to. The Ookla 5G map will be updated with new cities as we see results.

Now look at Iran. You will see there are absolutely **no live 5G installations** in Iran. In fact the only countries in the Middle East with live **5G** installations are Saudi Arabia, Kuwait, Bahrain, Qatar, Oman and the United Arab Emirates.

Looking at the numbers, we see that France and Iran appear in the list of the top eleven nations creating an anomaly which negates the theory that **5G** is the primary source of the large number of virus infections. This begs the question, why is this the case?

Are you seeing what we are seeing? France has **no live 5G networks** but over **181,000 cases of coronavirus** and Iran has **no live 5G networks** but over **121,000 cases of coronavirus**. The obvious question is, if coronavirus is caused by **5G** as

many people are suggesting, then how can you have 2 large countries with significant populations and with significant cases of coronavirus, yet there is no live **5G** network?

The Satellite Argument:

When these findings were made public into various conspiracy based forums the only credible answer we got back was that it could be satellite technology emitting **5G**....However this is an objective which is a work in progress with next generation companies such as *SpaceX*, *Kuiper Systems* and *Oneweb*. There is certainly no evidence that these organizations have reached such capabilities as there is still a lot of regulatory work in play in how to harmonize the work of satellite web services with land based internet service providers to avoid conflict of interests. Also there are a significant number of receivers required on the ground to complete the communication pathway loop. Whilst *SpaceX* is setting the pace they certainly cannot be targeted with the blame for the dramatic rise of coronavirus cases in France and Iran in February and March 2020. If you check out founder Elon Musk's comments in March at Satellite 2020, it clearly conveys that the ability to offer satellite **5G** web services is something which is still future.

It is also a weak arguments as suggested by some and posted such as "France and Iran" do have a live **5G** network, it's just that it hasn't yet been updated on the **5G** rollout website above.

But what stands out in my research findings is the fact that none of the studies reveal details about the "**Modulation**" factor. It would be unknown, hard to confirm, whether any **5G** network is modulating the energy level of its **5G** networks. To keep any 3G, 4G, including **5G** systems, electricity demand would be kept at minimal energy consumption output, and at a level that would not necessarily be reflected in the data such that it could throw off the correlation relationship between **5G** and cases of the Corona virus. In other words, did France and Iran even have the ability or reason to modulate their **5G** network to the danger or life-threatening level range.

I am suggesting the possibility that France and Iran were intentionally used to confuse the bigger picture so as to support or make the case of a "Strawman" argument that **5G** does not cause the Corona virus and thus negates the case for the theory that **5G is the causative element for the virus**. If you wanted to throw the world off the scent and you knew that **5G** was going live worldwide, what better way to create confusion than to "stand down" your **5G** networks in France and Iran. You would then be able to refute the **5G** theory by presenting the fraudulent data being compiled.

More likely, neither country was operational and construction of their **5G** infrastructure was not close to being finished which excludes France and Iran from being an argument to refute **5G** as the Corona virus outbreak and the death of citizens in France and Iran. Nor can we rule out how the virus might have been released into these two countries. I am saying that the telecom industry could potentially "rig" the event to refute what we know about **5G** as the causality issue for the Corona virus.

The issue of air pollution of Wuhan, China is among the worst in the world and is considered to be a contributing factor in China. We have no data available that would tell us whether air pollution is something to take into consideration with France or Iran. Dr. Zack Bush has raised the issue of air pollution in China's industrial region, and particularly that of Wuhan, China, suggesting officials are not factoring in Wuhan's air pollution.

Here is an excerpt from an article on **February 28th 2020** from "The Japan Times"
"France has yet to start rolling out its **5G** networks but the top French mobile operator, state-controlled *Orange*, has already chosen *Huawei's* European rivals, *Nokia* and *Ericsson*. Smaller operators *Bouygues Telecom* and *Altice Europe's SFR*, whose existing networks rely heavily on *Huawei*, are urging Paris to clarify its position on *Huawei*. France says it will not discriminate against any vendor but requires all suppliers to be screened so they can secure a green light from the cybersecurity agency, which is examining *Huawei* equipment. Sources close to the French telecoms industry say they fear *Huawei* will be barred in practice even if no formal ban is announced."

Till this very day the Iran/France anomaly has been swept under the carpet with a number of feeble explanations such as the rollout data is deliberately false (a convenient narrative when there is no other alibi) and some have stated that Iran and France have been conducting Beta-testing pilot projects. But when asked these people in the forum "*did you know that test pilots had been rolled out in various parts of Europe from 2 years ago, so where was an outbreak of coronavirus then*" there is simply no response.

Keeping in mind that the Pirbright Institute hijacked China's **5G** network in Wuhan by way of satellite, the release of the virus into France and Iran could be achieved through other ways, i.e., human carriers, intentionally infected, or transporting pathogens into areas where population density would enable its spread throughout France and Iran.

In regards to Iran, on the 13th of February, 2020, Iran's telecom minister said the following:

"The regulatory is introducing the rules ... we hope we could implement a first version of the 5G network in Iran next year and start offering services," said Jahromi. (french.presstv.com)

Both statements categorically undermine any attempt to push the narrative that **5G** is already live and operational in each of these countries. There is more to this than what we have been told. For example, there is data that shows that 3 different strains of the virus entered into the U.S. from two different directions. Two strains were documented as coming by way of the West Coast in three states, and a third strain came into the U.S. via the East Coast. This becomes prima facial evidence that the Corona virus was manmade and introduced in a manner to ensure its spread quickly far and wide throughout the U.S.

I have pointed out twice so far in this article, and in case you do not know this, I will share this again in more clinical detail.

Below is the clinical medical virology definition of what constitutes a legitimate virus. This is a medical indisputable fact. Dr. Fauci is a LIAR, A JESUIT LIAR, AND A DEMONIC LIAR!

To prove the existence of a virus you need to do three things. First, culture cells and find a particle you think might be a virus. Obviously, at the very least, that particle should look like a virus. Second, you have to devise a method to get that particle on its own so you can take it to pieces and analyze precisely what makes it up. Then you need to prove the particle can make faithful copies of itself. In other words, that it can replicate.

In Iceland their scientists have found that the virus mutated 246 times since it was isolated in Iceland. That was as of several weeks ago so who knows how many more mutations it has made in the last 3 weeks. There will be no safe vaccine for this just like there is no vaccine for HIV. The Iceland study disproves the existence of a Corona virus.

All of this for a virus that has a 99.98% survival rate. This Covid-19 operation is not about your health, it is about absolute control of the global population!

The American Intelligence Media reported back in February, 2020, on how the Pirbright Institute in Surrey, UK [funded by Bill Gates and owned by Rothschild family members] is patent holders of the Covid-19 virus since 2018. What AIM revealed about the Rothschild plan, the virus or something like a virus was weaponized and it was released in China so as to provoke a war between China and the U.S., and through satellite transmission, hijacked the “model” city 5G network for the city of Wuhan.

The Pirbright Institute through satellite remote control turned-up [modulated] the energy level of the 5G network to a level where the 5G effectively executed, largely Chinese dissidents within the Chinese population dropping them in their own footprint.

The Chinese were all given mandatory vaccines last fall, September, 2019. The vaccine contained replicating, **DIGITIZED** (controllable) RNA which were activated by **5G 60Ghz mm waves** through “**Electroporation**” that were just recently turned on in Wuhan (as well as all other Countries using **5G 60Ghz**) with the “smart dust” that everyone on the globe has been inhaling through Chemtrails for the past 25+ years. That’s why when they say someone is “cured”, the “virus” can still be “digitally” reactivated at any time and the person can literally drop dead in their own footprint.

Let me expand on the term “smart dust” I noted. Chemtrails have been sprayed for 25+ years, the main element in the spraying is nano-particle aluminum, and when breathed in accumulates in the brain. Aluminum is an excellent [the best] natural antenna, for **5G**

technology. We ALL are a walking antenna [receiver] for satellite communications in the near future.

The “*Diamond Princess*” cruise ship was equipped with **5G 60Ghz**. It’s basically remote assassination. Americans are currently breathing in this “smart dust” through Chemtrails. Think of it like this..... add the combination of vaccines, chemtrails (smart dust) and **5G**; and your body becomes internally digitized and can be remotely controlled. A person’s organ functions can be stopped remotely if one is deemed non-compliant. Wuhan was a test run for Bill Gates ID2020. The elite call this **5G 60Ghz mm** wave the “V” wave (Virus) to mock us. President Trump has created a space force in part to combat this weaponized space technology. We need to vehemently REJECT the attempted “mandatory vaccine” issue because our lives depend on it.

The photo-op here between Bill Gates and China’s premier Xi Jinping did not occur casually, it had something to do with the globe-trotter Bill Gates and his well-known agenda of depopulation. China has the greatest reason for depopulation tools!

The question has been raised as to why the Rothschild’s would want to start a war between China and the U.S., since the House of Rothschild has a Rothschild-central bank in both countries? The fact that China has a Rothschild central bank, does not guarantee they can completely control the country, the same is the case in the U.S. The Rothschild central bank in the U.S. is our Federal Reserve System, which controls interest rates and credit.

The similar banking system has been in China going back more than 25 years. What you need to know and understand about the Rothschild’s is that the Rothschild system is not designed to exercise a choke hold on the money system. In simple terms, “**they do not want to kill the goose that lays the golden eggs.**” The Rothschild’s plan is to control every single nation’s money supply in order to create and establish a global “digital currency”. There are four nations that do not have a Rothschild-controlled

central bank: **Cuba, Iran, North Korea, and Syria.** Venezuela also represents a problem in their break-away from the Western ties. This explains the focus on these countries over the past twenty years.

The two largest economies in the world are China and the U.S. This presents a huge problem for the House of Rothschild, both by sheer population size and their economic GDP share in the world economic system. If the Rothschild's could provoke a war between these two economic giants, no other country has the will or ability to resist the Rothschild's globalist grand plan. A war between the two could result in the mutual destruction of the two countries economic engines that drive the world's trade and commerce. On August 10th or 11th the U.S. deployed 3 B-2 bombers to Diego Garcia! We can only guess what the reason might be for this deployment.

It is essential that you understand that the House of Rothschild, for more than 250 years has profited by provoking and funding wars; i.e., lending to the warring nations for their weapons and munitions for war; and, then lending to the same warring parties for reconstruction of what was destroyed by war. Let us get back to how this was created to provoke the war plan.

The first thought that entered my mind was that those behind this were looking to get the benefit of surprise, in support of their pandemic theory and to disrupt the scientists attempting to determine what was happening. We cannot rule out other means of introducing the virus to the U.S.; and, this would prove possible in France and Iran as well. At this point in time, we know that the Rockefeller Institute planned such an event back in 2010 under the code word name of "Lockstep". It was to serve as a phase 1 of a larger plan to bring in global government. This is part of Agenda 2030 and the World Economic Forum's 4th Industrial Revolution. There is much more to this than what we first knew in January of 2020!

The Migration Argument:

The migration argument is that it's possible that French or Iranian people who were abroad who were contaminated with the virus, then came back to their own country and contaminated others, so it's possible for a country to become infected through contagion even though they have no **5G** network. But this argument self-defeats itself because both David Icke and Pastor Jonathon are saying that it's not even contagious because it's not a real virus that's transmissible. They believe that the contagious aspect is artificially designed to instill fear and protect the concept of lockdown, whilst **5G** is rolled out with the majority of the unsuspecting population indoors, that's their argument.

Both David Icke and Pastor Jonathon believe the body is exhibiting symptoms of a virus in which it's really exosomes and not an actual virus. But you cannot have your cake and eat it. **Either it's a contagious virus or it's not. You cannot say it's not really a contagious virus (because it's an exosome) but then use the argument about it being contagious to justify the migration argument.**

The Migration Argument is another of those ways offered up to help reconcile or resolve the apparent anomalies that have been offered up to explain away the **5G theory as the cause of the Corona virus**.

There are probably another dozen examples of inconsistencies we could show in regards to correlating data between **5G** global rollout and Covid-19 cases? For instance Pastor Jonathon said Russia had no cases of coronavirus because they don't have a live **5G** network, but maybe he bolted before the horse because Russia now has 325,000 cases even though there is no live **5G** network as he himself stated. Russia uses **5G** as a military weapons system and not for civilian purposes. On August 10th, 2020, it was announced by Russia's president, Vladimir Putin, a vaccine is ready now! Virologists have stated it takes no less than seven years to produce an effective vaccine.

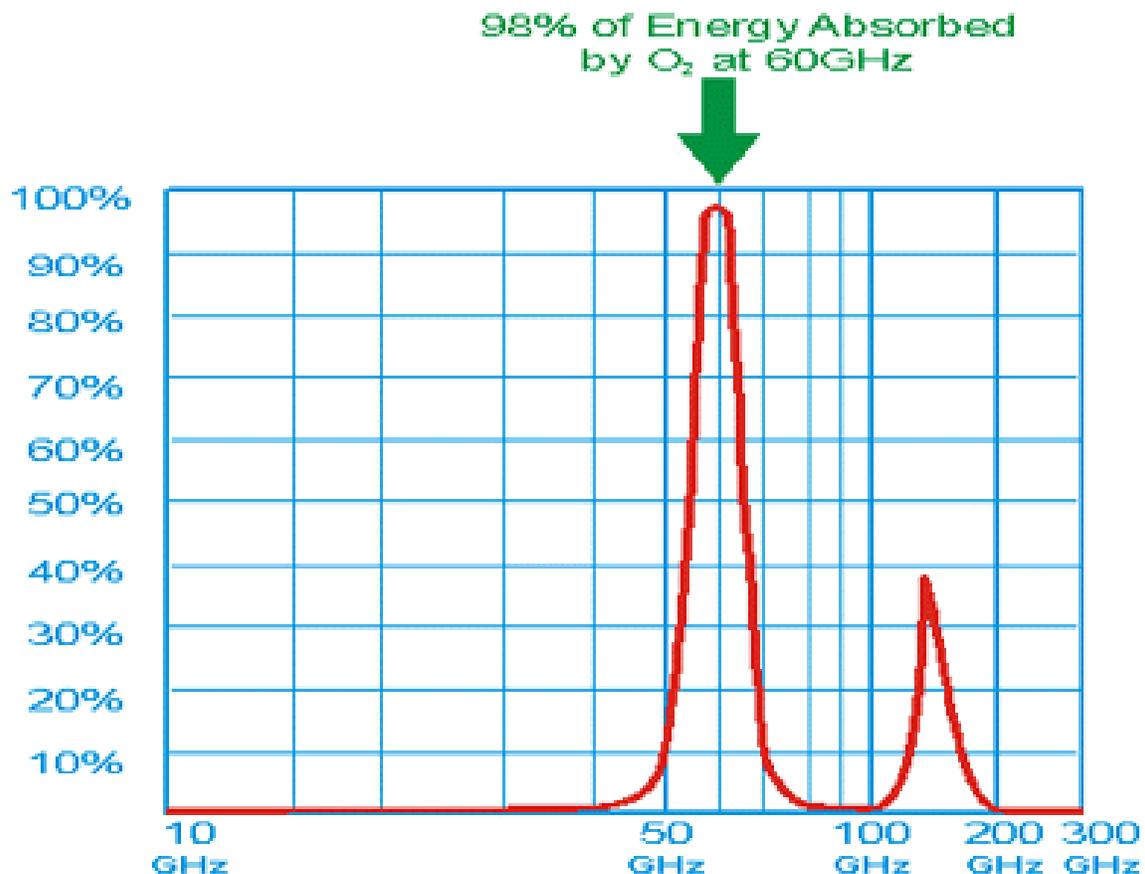

Additionally, why is there no evidence anywhere that coronavirus patients have been suffering from the usual symptoms of high level radiation such as headaches, migraines, earaches, insomnia, vertigo etc.? How can the body's reaction in all these thousands upon thousands of cases simply be flu like in nature and all focused on the lungs and bronchial tracts?

The live rollout of **5G** in the UK began in May 2019 and continued throughout summer 2019. Can anyone explain why there were no cases of coronavirus last year in the UK? Why was the live **5G** network rolled out with *EE, O2, Vodafone* and *BT Mobile* and yet no reports of anything resembling an outbreak of a flu-like virus? Could it be that in the UK, the **5G** technologies were not operating at 60Ghz level for a specific reason? The UK is owned and controlled by the House of Rothschild, since 1820! I've went into great detail in other articles on this topic. The Queen and the Royal Family are not even legitimate heirs to the throne of England according to a number of reports. The telecoms, *EE, O2, Vodafone* and *BT Mobile* do not "**Modulate**" their **5G** systems for obvious reasons. As the oscilloscope screen image below shows, you can operate cellular energy safely at lower levels of energy without "Modulating" the energy volume to the point that which it consumes all the oxygen in the area.

Essentially, it is this **frequency modulation** which becomes the unknown factor, the overlooked factor or cause, the reason why **5G** technologies can be made to appear to have no effect on public health, virtually seem harmless.

5G technology networks are constructed similar to the electrical grid patterns of any American city. The networks are centered around large base-stations, and further divided into smaller sub-stations. Entire segments of electrical power are based upon the real estate needs, and thus are divided by the demand for electrical power needs. Power distribution is tailored to a particular area consumption demands. Each base-station and sub-stations are modulated or amplified to the particular need of the geographical real estate needs, as shown in the illustration below. The illustration shows both a **5G** master base station and **5G** secondary base station in the illustration.

That said, the end-game here is to have a system that can be activated into a weapons-grade-level range at the click of a switch or the turn of a dial. The chart on the next page is the “KEY” to understanding what can be done when “Modulated” to a higher energy level. **5G** technology can be “Modulated” as a weapons system or as a communications system, which the elite do not tell of that capability.

It is easy to see that the 10GHz level above is virtually harmless, however, when you turn up [modulate] the energy level, from say 40GHz to 50GHz, the water molecules begin to dance in your body [heat up], like tea in the microwave. The 60GHz level is a critical energy level which sucks up the oxygen in your lungs and so you expire from lack of oxygen.

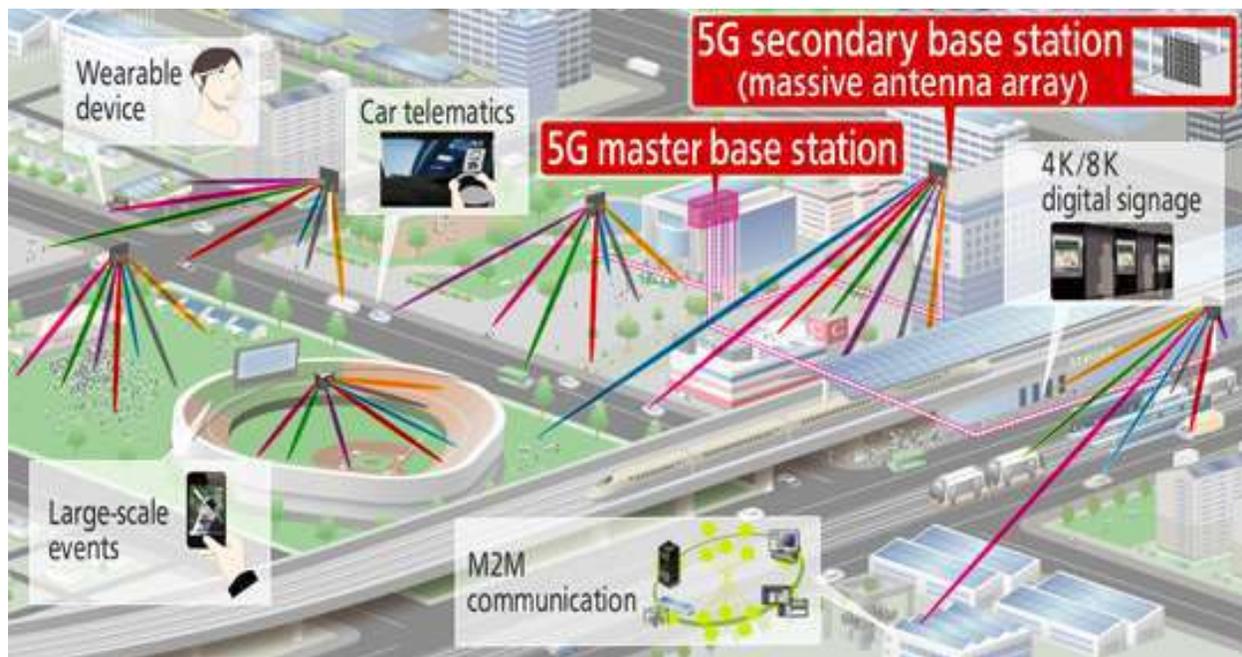

5G was introduced decades ago as a military weapons system. One of the best examples to watch is demonstrated in YouTube videos that demonstrate the use of **5G** technology to disburse protesters. It was used to do exactly that when the G20 nations had their annual meeting in Pittsburgh, PA nearly 20 years ago.

Military demonstrations of the Active-Denial weapon system would have you believe this is a harmless burning of the skin sensation that leads to protestors fleeing the effects of the microwave energy being beamed at the protestors. The illustration below shows how the Active-Denial system works. What is not widely known is that this weapon is designed for more than just crowd control and disbursing protests, etc. It is not

publicized for its lethality, only that it can scatter crowds. It can be “Modulated” if needed to deliver a death dosage of **5G** energy! Those who refute the **5G** make statements like this below.

The argument that 5G is behind Coronavirus is understandable. The general man on the street needs answers in a time of grave uncertainty and even through there are clear holes in the 5G-Coronavirus theory the majority won't have the foresight or patience to cross check and do their homework. It's an easy theory for willing people to believe it because by 5G rollouts taking place alongside Coronavirus cases it's what makes sense.

As I have tried to bring this to your awareness and attention, the key to understanding how **5G** is presented as being benign comes in how the energy level of **5G** is “Modulated”. It was this illustration that became my aha moment. It is so obvious that it can be easily overlooked. I wondered how people at the Pirbright Institute in the UK could influence the people on the streets of Wuhan, China, almost 7,000 miles away. The facilities at Surrey, UK have 23 operating satellite dishes and when I saw photos of the communications up-link, it became crystal clear for me what the capabilities are.

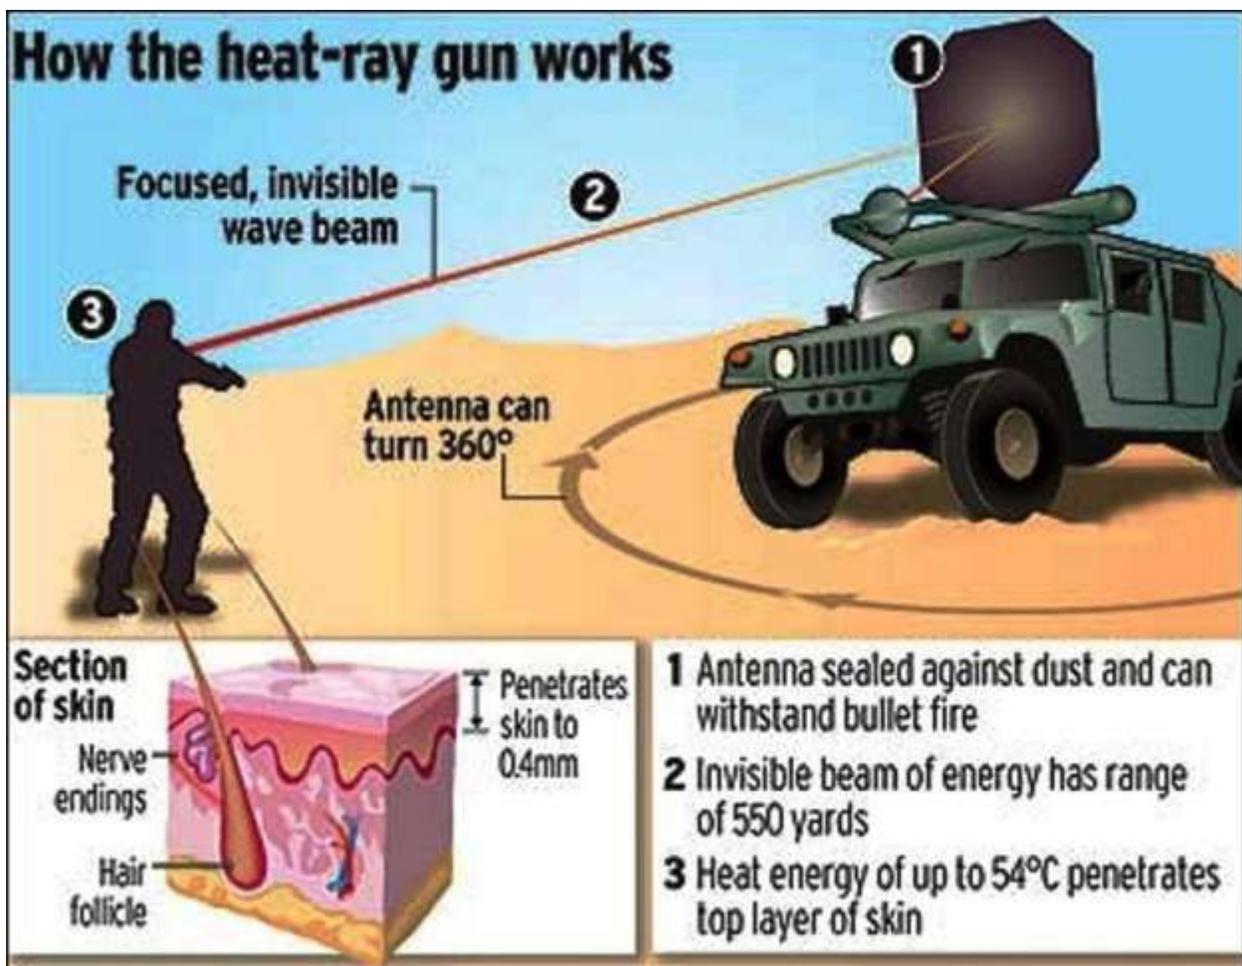

The Internet-of-Things is well described in this illustration. The telecom creator of a series of illustrations was so nice to include a visible key in our understanding the **5G** technology being rolled out. It notes the distinction between **5G** master base stations and **5G** secondary base stations. Every **5G** station is able to “Modulate” power to meet the needs of applications in its local area, yet still be part of a network system. The telecoms buy electricity from the local electrical power utility so we know cost is a factor of **5G** cellular communications.

Since the nation has been in the installation phase of **5G** infrastructure, it will be months before the energy level will rise very much. Even the telecoms are not going to waste the electrical power they have to purchase from the electrical power utility. In a recent article on **5G**, I shared that the telecoms are in discussion with electrical power supplies to actually use the electric utility power lines that runs on every street as a direct link to each home and business. The experiment now underway in Georgia is to determine if they can eliminate booster antennas on every other pole that will be needed as this system is placed into service. **5G** requires a booster antenna approximately every other house in a residential area, or roughly every 300 feet.

So is 5G Actually Harmful?

Absolutely 100% because the population is never the priority, only the agenda.

Switzerland reports harm from **5G** but it's not the coronavirus. Switzerland has the highest concentration of **5G** networks in Europe and the first reported injury of **5G** was published in the weekly French-language Swiss magazine *L'Illustré* who interviewed people living in Geneva after the 2019, **5G** rollout, with

alarming details of illness which were predominantly insomnia, tinnitus, headaches and dizziness (Nothing to do with the present symptoms of coronavirus).

On the **5G** visual map mentioned you will have seen that Switzerland has 640+ **5G** networks (Italy has only 7 **5G** networks and Spain has only 18 **5G** networks). So you would expect Switzerland to have an enormous amount of cases considering Italy and Spain both have over 220,000+ cases of coronavirus. Guess how many cases of coronavirus there are in Switzerland?.....31,000+ cases and only 1900+ Deaths.....Compare this to the 27,000+ deaths in Spain and the 32,000+ deaths in Italy....Doesn't really add up does it? Isn't the combined power of 640+ **5G** networks supposed to have caused more coronavirus chaos in Switzerland than what we see, even if we allow for the fact that Switzerland's populations is less than that of Spain and Italy. Still with 640+ **5G** networks across the country shouldn't this have caused more than what we are presently seeing in Switzerland?

I have been intentionally playing the "devil's advocate" in this analysis; I believe that we can explain away all the existing claims that **5G** is not responsible for the Covid-19 effects. Those arguing against **5G** are simply not telling the whole story, and that being the fact that **5G** is a powerful system, so powerful that in satellite point-to-point will kill you at the right energy Gigahertz rate, i.e., 60 Ghz. The chart on page 15 is all the evidence one needs to show how **5G** can drop a person in their foot print at 60 Gigahertz!

Dr. Joseph Mercola, one of the world's foremost authorities on alternative health, has mined the scientific literature to offer a radical new understanding of how electromagnetic waves impact the body, and again importantly, no mention of coronavirus or exosomes as being the typical illnesses or outputs caused, but rather conditions such as cancer, heart disease and neuropsychiatric illnesses dominating the majority of negative responses to excessive levels of electromagnetic radiation. Dr. Mercola's new book is '*EMF*D*'.

Petition to the United Nations and World Health Organization

Around 250 scientists from around the world signed a petition recently to the *United Nations* and *World Health Organization* outlining their concerns that "cellular and cordless phones [cellular networks] ... and broadcast antennas," amongst other radio frequency emitting devices, may produce cancer risks due to the electromagnetic field (EMF) radio waves they produce.

The appeal outlined: "Effects include increased cancer risk, cellular stress, increase in harmful free radicals, genetic damages, structural and functional changes of the reproductive systems, learning and memory deficits, neurological disorders, and negative impacts on general well-being in humans." (Again no mention of coronavirus)

However, even though the negative effects of radiation are a result of intended negligence (for the greater good as far as the elite are concerned) there is a far greater

danger of **5G**. Many people still are not seeing this as a radiation issue and not truly grasping the functionality it will bring and so we believe the **5G-Coronavirus** mantra is actually detracting people's attention away from where the true ultimate danger is.... *The Internet of Things*.

Human beings are extremely short sighted but for those with the patience to look at things from a long term perspective, **5G** will bring through an avalanche of new technological functionalities which will be astonishing.

“Soon everyone will need to watch out not just for eyes in the sky but spies from the sky.” Google sister company Loon has just launched a service providing 4G internet to remote parts of Kenya from stratospheric balloons at 65,000 feet. The commercial launch shows the steerable balloon technology, which Loon has been working with since 2011, is now reliable enough for everyday use. This is a powerful new capability that the Pentagon is keen to exploit.

A Loon internet balloon, which acts as a solar-powered cellphone mast, over Nevada.

High altitude balloons are cheap and has unlimited flight time, but have previously been limited to drifting with the wind. That has now changed. The stratosphere is so called because it is 'stratified,' divided into many different layers, with winds blowing in different directions at different altitudes. In principle, a stratospheric balloon can go in any desired direction simply by rising or falling to the right layer and riding the wind.

Companies like [Raven Aerostar](#) have developed the technology, which Loon use to hover their balloon over one spot to provide service to a specific area.

“The balloons dance on the winds in small loops to remain where needed,” writes Loon project lead Astro Teller.

The challenge has been developing sensors, algorithms, and software to navigate the winds reliably and precisely. The military is already exploring applications for the balloons. U.S. Southern Command has been carrying out a series of test flights with World View’s Stratollite balloons. These are able to ride winds yet stay in a very tight area, keeping a permanent watch over a particular area of interest, unlike low-earth satellites, which only pass overhead at intervals.

“We think this has the potential to be a game-changer for us,” Admiral Kurt Tidd, commander of U.S. Southern Command, told *‘New Scientist.’*

Stratospheric balloons may solve one of the U.S. military’s thorniest problems: gathering intelligence in ‘Anti-Access and Area Denial’ environments, places where the defenses are too dangerous for aircraft to approach.

The balloons are stealthy, and can fly at altitudes of 90,000 feet or more, putting them well above the reach of most surface-to-air missiles. They are also extremely hard to shoot down: there are no fuel tanks to puncture or engines to damage. Shrapnel that would destroy an aircraft simply leaves a few small holes in the balloon envelope. When a giant weather balloon drifted off course in 1998, Canadian CF-18 Hornet pilots riddled it with more than a thousand cannon shells and several rockets with no noticeable effect. British and America jets also failed to bring the stray balloon down and it only crashed after several days.

A new U.S. Army project aims to employ stratospheric balloons to drop a shower of electronic sensors into denied areas. Air-dropped sensors have been used since Project Igloo White covertly monitored traffic moving down the Ho Chi Minh trail during the Vietnam War. The modern versions are tiny electronic devices disguised as rocks with concealed solar cells that can keep sending back data for years.

The new project would leverage emerging Internet of Things technology for miniature low-cost sensors and communications. The aim is to monitor the ‘Cyber-Electromagnetic Environment,’ locating and tracking radio communications from Wi-Fi, cellphones, and military communication systems. This would provide data about the location of enemy units and specific vehicles. In particular, the sensors will identify and pinpoint targets for “long-range precision fires” by the Army’s new long-range missiles, which can hit targets several hundred miles away — if they know where to aim. Afterwards the sensors will provide battle damage assessment to determine what had been destroyed.

As well as various types of electromagnetic detector, the new devices may incorporate seismic sensors to detect passing vehicles. A future development may add sensors for chemical, biological, or nuclear monitoring.

Early projects required big expensive electronics; the 1960s Igloo White sensors each weighed twenty-five pounds and were the size of a fencepost. Modern ground sensors fit in your palm, and the new project wants then even smaller and cheaper, approaching the concept of ubiquitous 'smart dust' explored by DARPA.

The balloon-dropped sensors may exploit technology developed by the office of Naval Research's [CICADA project](#) to seed an area with electronic spies. Each CICADA – 'Close-in Covert Autonomous Disposable Aircraft' – is a circuit board carrying sensors folded into an aerodynamic shape like a paper plane. CICADAs would be released from an aircraft at high altitude to glide down and deliver their payload to specific GPS coordinates on the ground. Several flight demonstrations have been carried out to date, including one dropping 32 CICADAs at once. Their glide ratio is better than 3:1, so dropped from 60,000 feet they could land forty miles away.

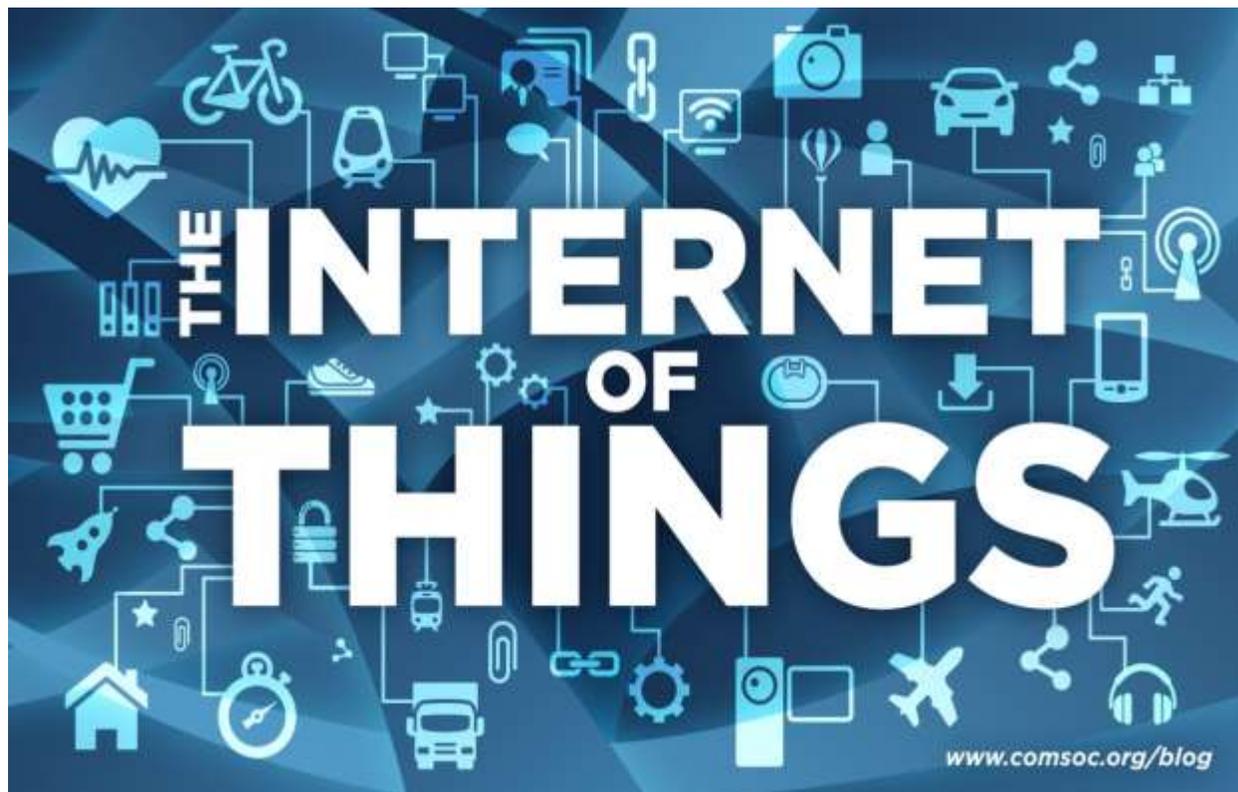

CICADA — air-dropped Close-in Covert Autonomous Disposable Aircraft developed by the U.S. Navy.

Stratospheric balloons have unlimited range, so they could drop sensors anywhere in the world. Like other unmanned craft, they are deniable, so even getting shot down is not necessarily a major problem. The U.S. did something similar in the 1950s with [Project Genetrix](#), which floated 'weather balloons' with photographic gear to spy over the Soviet Union.

Balloon-dropped sensors could provide a window into all sorts of places which are currently inaccessible. However, the new balloon developments are a two-edged sword; as Loon's new launch shows, this technology is not confined to the U.S. military. In 2017 Chinese researchers launched two drones from a stratospheric balloon. Soon everyone will need to watch out not just for eyes in the sky but spies from the sky."

It is these technologies we believe which will bring ever closer the ability for the global elite to completely own, control and dominate mankind in ways that we never thought was possible. Most significantly, the race towards the creation of self-autonomous artificial intelligence, the creation of a universal digital currency utilizing nanotechnology as the communication pathway and global surveillance (voice/facial recognition) functionalities that make what we have now look like something from the 1700s. We also believe there will be some connection to the vaccine to come in terms of digital marker tracking.

Another powerful reminder of the different moving parts behind this technological monolith is the recent approval of the *SpaceX* project by the *FCC* to deploy up to 1 million small ground antennas to communicate with the projected 12,000 satellites for

the *Starlink internet network* (headed by Billionaire entrepreneur, Elon Musk). This will create a frightening global frequency shield that no human being will be able to escape from. The project is so prolific that satellites launched by Musk may block astronomer's view of killer asteroids. SpaceX's colorful founder intends for *Starlink* to provide global high-speed broadband internet access operating with **5G**. Right now there are 358 satellites in orbit, with about 50 being deployed every three weeks.

FCC approves SpaceX to deploy up to 1 million small antennas for Starlink internet network

The *Starlink* project is the really huge issue with **5G** technology; it is the over-shadowing issue. Conspiracy theorists are proclaiming "**5G causes Coronavirus**" but this may be a distraction which is taking the heat off what the true agenda really is...which is the negative and controlling capability of *the Internet of Things* and the *Starlink internet network* could be the rocket injection that will allow the Internet of Things to become a frightening runaway monster that will be unleashed on the world population without restraint. This statement below may be only partially true; however, there is a more evil aspect that is being overlooked. I dealt with that in chapters 12, 13, & 14 of my series on the "Mark" of the Beast, posted weeks ago.

"The most dangerous aspect of 5G has nothing to do with Coronavirus or even radiation. Unfortunately the debate has blinded people to the real danger which is what the "Internet of Things" will be covertly used for."

In nearly ten years of research and study of the **5G** and its forthcoming **6G** technologies, I will suggest with strong confidence **5G** will be the energy source that will rule your lives. The military has placed in low level orbit kinetic energy weapons known as “Rods from God”, capable of inflicting tremendous devastation.

A Plan Hatched By Demonic Chief Princes

People generally don't want to hear about the demonic and satanic realm because we live in a world where people generally don't want to subscribe to a biblical world view of angels, demons, good, evil, God the creator. Yet these same people want to use quotes from Pastor Jonathon about **5G** and then completely cut out and exclude where he talks about spiritual warfare.

However, as we saw in *Corona virus Lockdown*, demonic principalities and powers already knew decades ago that corona virus was going to come in 2020 and wreak havoc on the earth after elements of this plan were dispelled to people who we believe were in contact with seducing spirits.

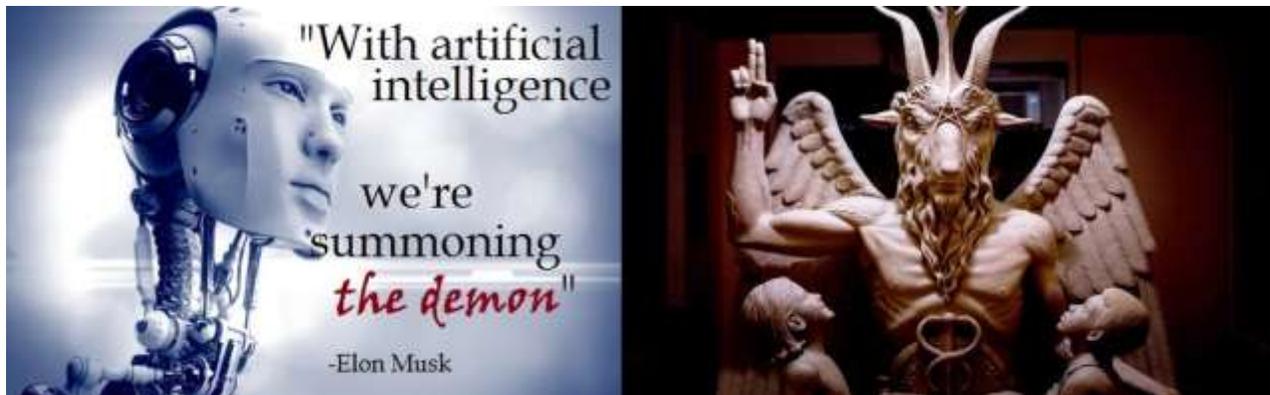

But for now, just imagine a world of the future. It is a desperate world where human beings are controlled by a single, tyrannical power. If we look behind the curtain to see what energizes this power, we find something much more sinister than a corrupt political agenda or master plan of greed. We find a plot hatched by the dark prince of the universe whose ambition is to become God as Isaiah 14:12-15 gets quite specific.

The book of Revelation prophesies a future government that Satan will control and use to deceive and manipulate the nations through the False Prophet and Antichrist:

"And he [the False Prophet] deceives those who dwell on the earth by those signs which he was granted to do in the sight of the beast, telling those who dwell on the earth to make an image to the beast [the Antichrist] who was wounded by the sword and lived. He was granted power to give breath to the image of the beast, that the image of the beast should both speak and cause as many as would not worship the image of the beast to be killed. He causes all, both small and great, rich and poor, free and slave, to receive a mark on their right hand or on their foreheads, and that no one may buy or sell except one who has the mark or the name of the beast, or the number of his name. Here is wisdom. Let him who has understanding calculate the number of the beast, for it is the number of a man: His number is 666." -(Revelation 13:14–18)

Revelation 13:16-18 are undoubtedly the most familiar passages in Revelation, not only to believers, but also to millions of un-churched people who know nothing about future prophecy and may never have opened a Bible.

Those who receive the “Mark” of the beast commit the irrevocable choice to reject Christ and embrace the Antichrist as God, thus reaping everlasting judgment.

Revelation 13:14-15 describes the world stage that precedes the “Mark” of the Beast. The False Prophet, the Antichrist’s co-conspirator, will perform counterfeit miracles and exercise global power as a technological leader. The most spectacular of his feats will be the Antichrist’s faux resurrection after it appears he was assassinated -(vs. 14) and giving life like “breath to the image of the beast” -(vs. 15), The manufacturing of this image is obviously significant since Revelation mentions the image six more times (Revelation 14:11: Revelation 13:7; Revelation 15:2; Revelation 16:2; Revelation 19:20; and Revelation 20:4). The ability for something man-made (the image of the beast) to then develop self-consciousness clearly points towards what Ray Kurzweil called "*the singularity*", the moment in time when man will have created self-autonomous, artificial intelligence and thus “become a creator like the God” of Genesis.

"If Satan and his territorial demonic princes already knew decades in advance, what would transpire in 2020, imagine what they will unleash on this earth in 2030 if self autonomous, artificial intelligence is birthed."

So if Not 5G Then What? - Gain of Function Projects

This is where through our research we fell upon a well-documented and proven argument in the Corona virus endgame about the true reason behind the coronavirus. From research it is clear that the origin of Covid-19 was to do with a form of transgenic experiments known as “**Gain of Function**” projects. This implicates not only China but also America. America has tried to blame China for the coronavirus outbreak but hard core, documented facts, show that the trail actually extends from Wuhan back to America and to the UK and the WHO and to..... Every large nation has a plan of depopulation, including the U.S. It is a financial necessity, and do not kid yourself if you think our government cares about you, you are living under a stone.

The full extent of these findings are based on knowledge made available to us about a combination of laboratory mishaps, the notorious history of “Gain of Function” projects

and a number of concealments and cover-ups to hide the smoke behind the fire. What also has become rather clear is that this path is much more complicated to sell to the masses than the **5G** argument. I'm not saying **5G** is not significant, on the contrary, that it is more than we can get our heads around. **5G 60Ghz** is the energy glue that binds the entire agenda. **5G** is your energy/communications control link!

Gain-of-function (GOF) projects is defined as research that:

- 1) improves the ability of a pathogen to cause disease,
- 2) help define the fundamental nature of human-pathogen interactions, thereby enabling assessment of the pandemic potential of emerging infectious agents,
- 3) informing public health and preparedness efforts, and
- 4) furthering medical countermeasure development. The first type of projects like this investigated a small number of studies using avian influenza virus that led to increased viral transmission in mammals.

Despite these important potential benefits, GOF research can pose risks regarding biosecurity and biosafety, which is why in 2014, the Obama administration decided to cut funding for such projects by putting the brakes on funding (and relevant research with existing US Government funding) of GOF experiments involving influenza, SARS, and MERS viruses in particular.

Yet this did not stop GOF projects from pressing on and key to this progression was Shi Zeng Li who some have blamed for creating Coivd-19 in the first place. Li has hiked into deep mountains across 28 of China's provinces, finding the dark places where bats live where she collect their droppings, in fact many different kinds of bat in all kinds of caves. What she found, she brought back to the *National Biosafety Laboratory* in Wuhan, Hubei province, for analysis. After more than a decade of work, she built one of the world's largest databases of bat-related viruses.

Dr. Anthony Fauci was not deterred either as what he did was illegal. He issued a \$3.5-million dollar contract to the Wuhan lab, eventually doubling that amount to \$7-million for research on this Gain of Function work.

It was that database that Shi's team turned to when the new infectious coronavirus caused an outbreak in China at the end of December 2019. Her team was the first to identify that the coronavirus that was killing people by causing pneumonia was a direct descendant of a wild strain they culled from the droppings of a fruit bat in Yunnan province, sharing 96% of genes. This led to the following publication in the February 2020 issue of *Nature Microbiology*.

As the authors of the paper explain in the full text, "*This furin-like cleavage site... may provide a gain-of-function to the 2019-nCoV for efficient spreading in the human population.*" There is an underlying implication here that is very subtle; the only possible reason for this modification is the creation of a biological warfare weapon. There are no other plausible explanations.

But here is where it gets very interesting.

In 2014, Shi Zheng Li was involved in an investigation of bat coronaviruses, specifically *gain of function* experiments involving both the SARS and bat coronaviruses, as a joint research project of the University of North Carolina and Wuhan Institute of Virology, with Ralph S. Baric (an infectious-disease researcher) as principal investigator. Documentation has surfaced that there were a number of murky things that went on.

In 2015, Ralph Baric then published a study on his team's efforts to engineer a virus with the surface protein of the SHC014 coronavirus, found in horseshoe bats in China. They found that the hybrid virus could infect human airway cells and caused disease in mice, according to the team's results, which were published in *'Nature Magazine'* November 10th, 2015.

When you look at the list of "scholars" associated with this Frankenstein of a virus, you'll see the name Zheng-Li Shi, who just happens to represent the *Key Laboratory of Special Pathogens and Biosafety* and the *Wuhan Institute of Virology and Chinese Academy of Sciences*. Of course, there were other scientists, most representing University of North Carolina, but there were also representatives from *Bellinzona Institute of Microbiology, Zurich, Switzerland* and *Harvard Medical School*.

New SARS-like virus can jump directly from bats to humans, no treatment available

Findings provide an opportunity to develop drugs and vaccines for coronaviruses before they emerges from animals to cause a human epidemic

Date: November 10, 2015

Source: University of North Carolina at Chapel Hill

Summary: A new bat SARS-like virus has been discovered that can jump directly from its bat hosts to humans without mutation. However, researchers point out that if the SARS-like virus did jump, it is still unclear whether it could spread from human to human.

And this is what Ralph Baric had to say:

"Studies have predicted the existence of nearly 5,000 coronaviruses in bat populations and some of these have the potential to emerge as human pathogens," said senior author Ralph Baric, a faculty member at the Gillings School of Global Public Health and expert in coronaviruses. *"So this is not a situation of 'if there will be an outbreak of one of these coronaviruses but rather when and how prepared we'll be to address it."*

Fast-forward to November, 2019... a breach of containment occurs at the Wuhan Institute of Virology, and patient Zero is detected somewhere between December 1 and December 12, 2019. Whilst the world blames the origin of Covid-19 on transmission from bats to humans in a meat market, US Senator, Tom Cotton, suspected there was something more than what the mainstream media was telling us.

Senator Cotton was one of the first politicians to raise the alarm about the seriousness of Covid-19 and the dishonesty of the Chinese government, as NRO's John McCormack has pointed out. Cotton emphasized at the time that China was not being transparent about the virus and its origins. Cotton further noted that Wuhan, which was the main location for the first outbreak, had a biosafety Level 4 laboratory that specializes in researching coronaviruses. Cotton specifically said that *"we don't have evidence that the disease originated there, but because of China's duplicity and dishonesty from the beginning, we need to at least ask the question to see what the evidence says."*

There is a Corona virus endgame suggesting a project collating research and analysis material which is all encompassing the origin of the Covid-19 with extensive detail from the murky collaboration between China and America through to **5G** and *The Internet of things* and **6G**, the 21st century creation of a Cyberspace Tower of Babel, leading to ultimately the fulfillment of the coming of the Antichrist. It is expected that **5G** will be with us for the next 8 years before the migration to **6G** around 2028-2030.

Many of you are probably not aware that China has officially launched research and development work for its **6G** mobile networks, confirming it will be a decade before it can be brought through to commercialization.

I believe **5G** will be the new breeding ground for draconian-based technologies that will be a game changer, but **6G** will be the demonic rubber stamp and the phase that will usher in the biblical time period in which the world will witness technology so incredible that the apostle John on the isle of Patmos described them as signs and wonders because being fast forwarded into the future there was no other words in the Greek language that he was able to call on to describe what he was seeing in his apocalyptic vision.

"power to give breath to the image of the first beast, so that the image could speak and cause all who refused to worship the image to be killed. It also forced all people, great and small, rich and poor, free and slave, to receive a mark on their right hands or on their foreheads, so that they could not buy or sell unless they had the mark, which is the name of the beast or the number of its name." Revelation 13:15-17

PAVING THE ROAD TO HELL II - High Ranking Politicians in the Grip of Ultra-Secret Masonic Lodges

There is unrest in all sectors of our global society. The symptoms are recognizable to everyone. The monetary system is bankrupt, health systems are in shambles, pension funds are massively broke and "climate alarmism" and the "coronavirus" (Covid-19) that has become an economic threat to the world, are just some of the problems why people feel ill at ease, restless and unsafe. Below the surface of official politics lies a complicated social and intellectual process that is taking place. We are dealing with the rise of a new geo-political supranational power on the world scene. By creating fear of war, disease, economic problems and destabilization of countries, they try to influence humanity in such a way that they accept a dictatorial 'New World Order', in which a computer-controlled social order rules. It will mean the end of the individual right to self-determination.

"Paving the Road to Hell 2" and "The End Time War" are stark reminders that the global agenda being mapped out is simply the following of orders that originate from a spiritual agenda"

Time is Already Ticking

If in 3 months' time you are told that vaccination is mandatory in order for you to be able to continue with your employment
able to still drop your kids off at school
able to make appointments with your doctors
able to receive hospital treatment
able to keep your insurance policies

What are you going to do? This is the question that millions of Christians are secretly thinking but too scared to confront. Many Christians believe that by not talking about it, that these uncomfortable but practical situations will go away. Others are saying the "Mark" of the Beast has nothing to do with the coronavirus and so would happily take the vaccine and allow their kids to take it too.

Maybe you are confused because these are issues that your local pastor wouldn't even know where to start. Maybe this is your opportunity to become an agent of change and help those around you get a glimpse of the true agenda.

The image above is of the X-37B, it is an unmanned smaller version of the well-recognized Space Shuttle. The thing is that [the public] we know absolutely nothing about its recent journeys into orbit for upwards of two years in length or what its mission is all about.

You can be sure that **5G**, and its successor **6G** will make you and the rest of us into my neighbor's two dogs across the street. My neighbor has two dogs, and they never leave the reservation like the illustration below. **5G** and its successor **6G** will play a key role in our being enslaved [controlled] by the New World Order. We can look to be like people's pet dogs and cats, wearing an invisible **5G** leash in the form of Bill Gates **ID2020 Hydrogel/Quantum Dot**, and restricted to the boundaries of our residences.

I share all of this, not to scare you, but to inform you what is in store for humanity, the "Mark" of the Beast is your death certificate. It is time to put your house in order and pray for God's deliverance from the Luciferian plans for his half man, half beast creature, New World Order.

The Defense Department is opening large areas of mid-band spectrum to help the United States compete with China in **5G. But is it too little, too late?**

The Pentagon will share the use of a big chunk of electromagnetic frequencies in a bid to help U.S. manufacturers bring commercial **5G** products to market faster than their Chinese competitors, DoD and White House officials announced Monday.

The military's release of the frequencies between 3.4 and 3.5 GHz is something like a giveaway of thousands of miles of prime real estate, and follows a similar decision to free up a nearby chunk of frequencies. It is the result of a 15-week effort by 180 experts working at "a record pace to develop a spectrum-sharing plan to support U.S. **5G** leadership while protecting critical national security systems," Defense Department CIO Dana Deasy said in a statement.

The right to share the frequencies with the military will likely be auctioned off, similar to the ongoing auction of Citizens Broadband Radio Service, or CBRS, spectrum auction in the 3.55 to 3.65 GHz band. That auction could fetch as much as \$10 billion.

The Defense Department controls large portions of the mid-band spectrum in the 3 GHz to 6 GHz range. It has been working with industry groups like the National Spectrum Consortium to better figure out ways to share that spectrum. And it's been conducting experiments at Utah's Hill Air Force Base on dynamic spectrum sharing — essentially, a scheme to allow non-military devices to use certain frequencies when the military isn't doing so — which may make it possible to free up more spectrum in the future.

Randolph Clark, vice chairman of the National Spectrum Consortium industry group, described Monday's announcement as important for the future of the U.S. telecom industry.

“With the merger of T-Mobile and Sprint, they are heavy in mid-band. They have a competitive advantage in mid-band, now with the [CBRS] auction...that gives other carriers an opportunity to get at mid-band dominated by T-Mobile,” he said, adding that his consortium, *“applauds the DOD for its innovation in finding additional mid-band spectrum to stay in alignment with the National Broadband”* plan.

Opening up more areas in that mid-band range, particularly between 3 and 6 GHz, is key to helping U.S. companies persuade global customers to pick them over Chinese options like Huawei.

Eric Schmidt, former CEO of Google and current head of the Defense Innovation Board, said earlier this year that the U.S. was far behind China in **5G** in large part because of the way the United States has managed spectrum.

*“With respect to **5G**, it's clear that we dropped the ball,”* Schmidt said at the Defense One Tech Summit in June. He said telecommunications companies prize frequencies in the 3-to-6 GHz range because they allow longer ranges and better penetration of signals through walls. While the United States was slow to start figuring out how the Defense Department could share more mid-band spectrum with industry, China essentially gave the equivalent frequencies to major Chinese telecommunications companies without an auction.

“They have been given a head start, which will give them on the order of 100 million 5G users within the year,” said Schmidt. *“The number of **5G** users here in America is vanishingly small... So we really did cede leadership to China...At the same time, China funded Huawei to aggressively provide new [multiple in, multiple out] antenna technology to be better than their competitors...So there's evidence that China was both smarter with the spectrum [and] smarter with respect to funding Huawei. They have a different industrial policy than we do to build these and that's the conundrum that the U.S. finds itself in.”*

In wrapping this article up, **5G** and the Corona virus are parts of a much larger but integrated plan. As I was writing chapters 12, 13, and 14 of the “**666**” series, it became evident that no one aspect, in and of itself, explained the grandiose agenda of the New World Order. The World Economic Forum has had the benefit of decades of learning how to skillfully bring about global control of the world. This becomes obvious when you compare the symptoms of **5G** and the Corona virus scam-demic.

SYMPTOMS OF 5G EXPOSURE VS. CORONAVIRUS INFECTIONS

SYMPTOM	5G	CORONAVIRUS
Sperm / Testicular Damage	✓	✓
Neuropsychiatric Damage	✓	✓
Cellular DNA Damage	✓	✓
Apoptosis (Cell Death)	✓	✓
Cardiac / Blood Pressure Disruptions	✓	✓

Defending Health, Life and Liberty

5G KNOWN SIDE EFFECTS

- DNA single and double strand breaks
- Oxidative damage
- Disruption of cell metabolism
- Increased blood brain barrier permeability
- Melatonin reduction
- Disruption to brain glucose metabolism
- Generation of stress proteins

DRJOCKERS.COM

Interestingly, I first began my study of immunology two years before the release of the so-called Corona virus in Wuhan, China. I had purchased two textbooks on the subject of Immunology and Virology. No, I am not planning on going back to graduate school but all those folks around me are scared out of their minds and driving me crazy with their unfounded fears. As a tip to the reader, every “injection” vaccine or other types of shots, (over your life, cumulatively), actually reduces your immune system. EMFs will accelerate the collective effects which will make you more susceptible to damage your ability to fight off other bacterial and pathogens which can damage your total health.

God gave us a unique “immunity” system to protect our bodies for life. Unfortunately, people like Louis Pasteur led us down a wrong path ever since. While I understand that there is literally NO SAFE VACCINE for anything, the medical world has deceived us because there is money to be made in this fraudulent science. Our natural immune system is very complex and sophisticated yet it has protected life for thousands of years without human life going extinct.

There is so much going on it is virtually impossible to keep up with it all, between the Gates ID2020 vaccine program, the **ID2020 Hydrogel/Quantum Dot**, the World Economic Forum, the release of a mystery pathogen at Wuhan, China, I was not able to include in this article more on the cruise industry. That will have to wait until I do a second part to this, as just in the last week, 3 cruise ships from outside the U.S. had to return to port after passengers were diagnosed with the Covid-19. Carnival Cruise put up for sale two of its older cruise ships. The **5G** issue and Covid-19 will not go away as some sort of a fluke. Keep in mind Covid-19 and **5G** share the same 5 primary symptoms!

Understand what defines a pathogen as a virus. On page 11 framed in a window, you have the clinical way a virologist can determine whether something is a virus or not. Hosea 4:6 is a reminder to us, ***“My people are destroyed for lack of knowledge: because thou hast rejected knowledge, I will also reject thee, that thou shalt be***

no priest to me: seeing thou hast forgotten the law of thy God, I will also forget thy children.” I will provide further evidence that confirms Dr. Tom Cowan, Dr. Mikovits, Dr. Andrew Kaufman, Dr. Andrew Wakefield are 100% correct on their understanding of this scam-demic that has the world imploding over what is no greater than the common seasonal cold.

Dr. Judy Mikovits has stated explicitly there is no safe vaccine of any kind and experience and expertise has exposed the agenda of Dr. Fauci. She sticks by her claim that a mandatory or required vaccine will result in 50 million premature deaths! Her latest interview was with Project Camelot on July 7, 2020, and every time I have a chance to listen to her I learn something new that explains the complexity of immunology, viruses, and vaccines.

Blessings,
