

By Their Sorceries Were All Nations Deceived!

Revelation 18:23

I have been saying for thirty years, that the governments of the world are in collusion to reduce their population which was established at the Rio Summit of Agenda 21 held in Rio de Janeiro, Brazil. But first some background of the event few today knew took place.

The UN Conference on Environment and Development that took place in Rio de Janeiro (Brazil) in June 1992 is referred to as the Rio Summit or the Earth Summit (1992). It was convened to discuss issues related to development and the environment. Representatives from over 178 countries were in attendance.

The theme coming out of the Rio Summit Agenda 21 was named **“Sustainable Development”** which has remained the primary agenda of Prince Charles of Wales ever since convened by the Royal Society. Wording of the Summit documents were so controversial and it resulted in protests around the world. It goes without comment that **“Depopulation”** was the driving force of the Rio Summit. This can be seen in the fact it remains the **#1 Goal**; however, its subtlety comes in how it is phrased in positive terms. The issue of poverty has been around so long that even Jesus Christ said that we would always have the poor with us. –(Matthew 26:11; Mark 14:7; John 12:6).

GOAL 1: NO POVERTY

High fertility rates can trap countries in poverty. The World Bank has warned that extreme poverty will not decrease in 2021 due to population growth eclipsing economic growth in the poorest nations. Large family size and poverty often go hand-in-hand. People living in deprived areas are usually not empowered to choose the number of children they have and in some cases feel the need to have many so they can be provided for in their old age. When people are poor and have many children, they cannot invest enough in each child which often leads to kids not being able to attend school and girls getting married off as child brides. Women are also less able to gain financial

independence when they have many children to look after at home. Ensuring everyone is empowered to choose small families is key to eradicating poverty.

Goal #2 is Zero Hunger and Goal #3 is Good Health and Well-Being.

You are the Messiah and you better do what Satan is empowering you for his saving the planet! Prince Charles of Wales and Nathan Rothschild

Prince Charles has made his position crystal clear over the years and his egalitarian language belies his real views. He, like his father, were eugenicists at heart. Charles is less uncouth and exhibits a more polished refined demeanor to hide his loathing of humanity than his late father the husband of Queen Elizabeth II. Charles has held a self-image that somehow that he must save the world from collapse. His self-proclaimed “purpose” is public record from years past. His presence at the annual Climate conference meetings COP26 in Glasgow, Scotland became more forceful in his address but he has yet to understand that humans are only a small presence when it comes to climate change. The Prince seems to miss the difference

between carbon-dioxide and carbon-monoxide, which by the way is significantly different in our carbon footprint!

The point of the 1992 Rio Summit is that 105 countries did commit to back then an agreed informal treaty whereby they would commit to reduce their countries population; however, each country agreed to refrain from discussing publicly how they would go about achieving their pledge commitment. **This afforded the 105 countries in agreement to their position to deny, or maintain plausible-deniability should the informal agreement become public knowledge.**

Plausible-deniability is the ability of people, typically senior officials in a formal or informal chain of command, to deny knowledge of or responsibility for any damnable actions committed by members of their organizational hierarchy. Many documents about the Rio Summit have been taken down or portions removed from the Internet due to the provocative content and implications.

Each nation would decide its own method of choice how to reduce the population. The UN would be the global organization to facilitate each nation's plan and to act as an intermediary of sorts to bridge communications throughout the implementation of methods via the Club of Rome.

Peter Kirby tells in his book ***'Chemtrails Exposed: A New Manhattan Project: 2nd Edition'*** aerial spraying of pathogens, toxic chemicals and heavy metals are done through the UN's oversight and are "remote controlled" aircraft on behalf of the U.S. government.

Coincidentally, I suppose, chemtrail spraying began shortly after the 1992 Rio Summit. Public Law 105-85 prohibited such spraying and was passed on November 18, 1997, banning such aerial dispersals of chemical and biological agents, and yet they continue to this day.

The North American continent has been chem-trail poisoned for close to thirty years with heavy metals, toxins, pathogens, and a wide assortment of biochemical weapons and the public still has its heads in the proverbial sands. The HAARP system has been used in conjunction to experiment on life form on the continent, doing irreparable harm to the eco-system, human and animal life form.

Dane Wigington, hosts the [Geoengineering Watch.org](http://Geoengineering_Watch.org) web page, which is a library of data on the crimes being conducted by our own government in the efforts of reducing the population.

'CHEMTRAIL LAW' PASSED IN 1997 ✕

PUBLIC LAW 105—85—NOV. 18, 1997: USE OF HUMAN SUBJECTS FOR TESTING OF CHEMICAL OR BIOLOGICAL AGENTS

"(1) any test or experiment involving the use of a chemical agent or **biological agent** on a civilian population; or
(2) any other testing of a chemical agent or biological agent on human subjects.
(e) **BIOLOGICAL AGENT DEFINED.**—In this section, the term "biological agent" means any micro-organism (**including bacteria, viruses, fungi, rickettsiac, or protozoa**), **pathogen, or infectious substance, and any naturally occurring, bioengineered, or synthesized component of any such micro-organism, pathogen, or infectious substance**, whatever its origin or method of production, that is capable of causing—
(1) **death, disease, or other biological malfunction** in a human, an animal, a plant, or another living organism;
(2) **deterioration of food, water, equipment, supplies, or materials of any kind; or**
(3) **deleterious alteration of the environment.**" - quote from the law.

This "law" is publicly available for everyone to read, you have been "informed".
Because you have not contested it (that's what the courts are for), you have provided your "consent". This law is part of a contract between you and the government.
When the terms of a contract are known and uncontested, it's called "acquiescence." ☺

I have shared all of the preceding information as a preface to what has surfaced on the Internet in the past few days in regards to highly suspicious contractual relations between the Pentagon and Big Pharma. Pfizer claims to own the government on the vaxxes!

The link immediately below was posted on May 22, 2022, in the form of a Bitchute video. It opens with a whistleblower lawsuit that has turned out to be one of those side deals the DoD does to hide something from the public eyes in the media. This Bitchute video is highly suspect of military complicity in the poisoning of the public through vaxxes labeled as "Gene" therapy and authorized under the EAU by the FDA.

This new video augments and corroborates the report of my special segment entitled [Get Ready For The Next \(Man-Made\) Virus: Marburg Pathogen](#) which I posted just four days ago on my web page www.pastorbobreid.com. If the below eye-opener claim by Pfizer does not suggest a massive depopulation conspiracy between the U.S. Government and Big Pharma then I welcome a plausible answer! The government is supposed to work for the people and that does not mean to commit genocide against its citizens. Click below link:

PFIZER: VAX WAS PROTOTYPE FOR DOD, EXEMPTING THEM FROM FALSE CLAIMS ACT & WHISTLEBLOWER LAWSUIT

<https://www.bitchute.com/video/vEEgO3kFkAo9/>

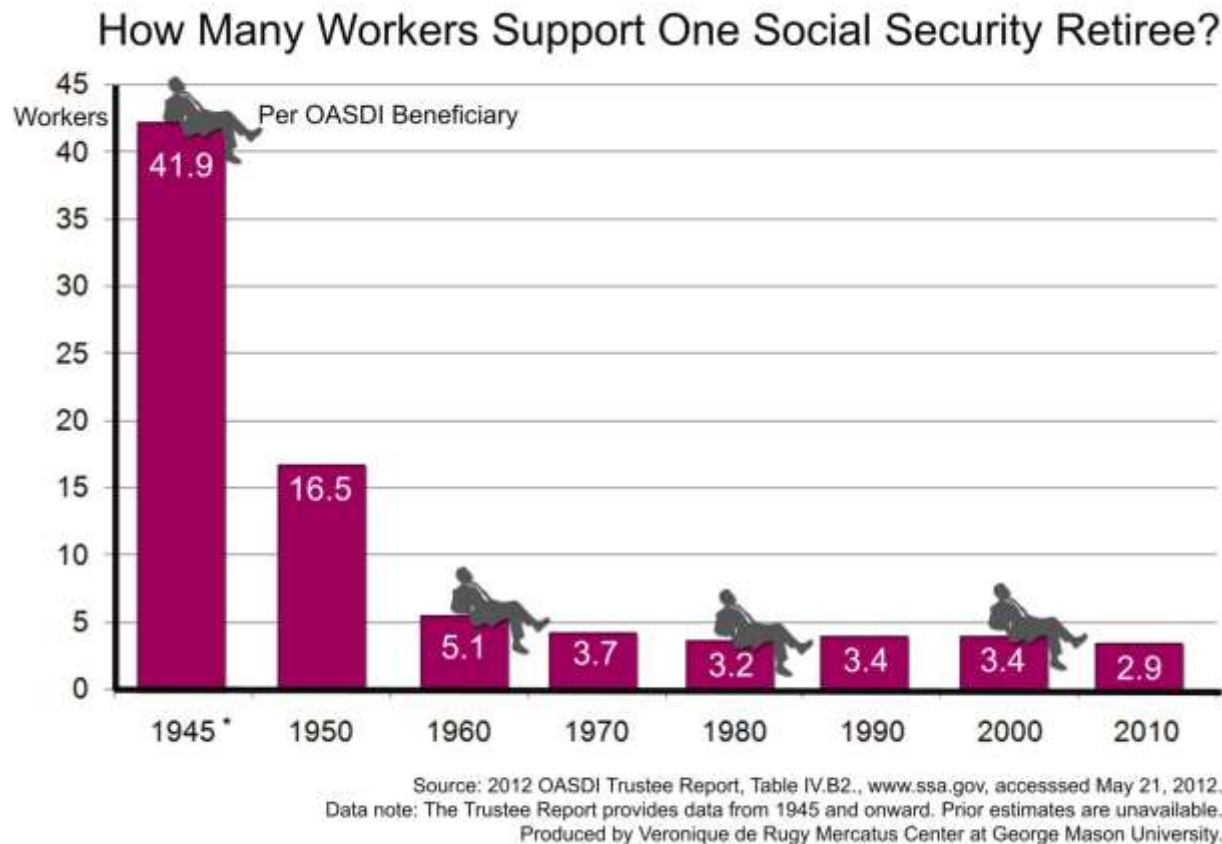

The U.S. Government has a Social Security unfunded liability that is projected to be \$17.5 trillion dollars. The Medicare unfunded liability is actually projected to be much higher. Medicare actually has parts A, B, and D, Part A funds hospital care. Part B funds Medical visits, and part D funds prescription drugs.

This is on top of the already existing \$30 trillion dollars of the National Debt. As early as 1983, I was of the view that I would never see my Social Security but this was way before I retired and what I have learned since then. In 1999 the people at the highest level of the government decided that the country would never be able to pay off the National Debt, which in their way of bean counting included Social Security and Medicare/Medicaid. Dr. David L. Martin says the government could have taken measures in 1999 to keep the system afloat through a combination of raising withholdings rates and lengthen the work years until retirement eligibility for retirement at full benefits.

With fewer and fewer workers contributing into the Social Security Trust Fund (which was stolen to pay for the wars since 1990), the nation needs all the illegal immigrants they can flood the country with to keep the Social Security System afloat a few more years. The worker-to-beneficiary ratio has been on a steady decline for more than a decade, and will continue to slide until about 2035. That's a decline from 2.8 workers to 1 beneficiary in 2017 to 2.2-to-1 by 2035. This is why the system is broke and cannot be fixed. The powers at be decided not to try to fix it but simply allow the system to go broke around 2026 or 2028. But a scientific discovery changed the picture in 2013. This scientific discovery provided the powers at be an exit ramp from the government's social contract with Americans.

What became critical in the past twenty-five years has been due to the influx of immigrants [legal and illegal] receiving benefits without having met the standard requirements of working years/quarters to be eligible to receive full benefits. Waivers have been issued to millions of immigrants from Afghanistan, Iraq, Syria, and other countries where war and civil unrest led to the influx of those seeking asylum in the U.S. There is an estimated 20-million illegals that have been coming across our borders and the government has been resettling them across the fruited plane, and providing them financial support

from the Social Security Trust Fund [non-existent according to George W. Bush when he was in the White House]. These illegals are flown into smaller airports around the country and then bussed to Catholic Charities facilities for resettling near you.

Now back to the scientific discovery now that will explain much the public does not know about or for the most part have not heard about. Many see CRISPR-Cas9: The most important discovery of the century.

CRISPR-Cas-9 is a method of genetic editing, and one of the most significant scientific discoveries of the millennium. The two scientists who discovered it, Emmanuelle Charpentier and Jennifer A. Doudna, were awarded the 2020 Nobel Prize in Chemistry (also the first all female Nobel prize winning team) for their pioneering discovery of the mechanism. In this article I will explain how it works, and some of its applications.

CRISPR-Cas9 is a natural process, only recently harnessed in labs. When viruses attack a bacterium, the bacterium cuts a section of the virus's DNA and stores it. When the same type of virus attacks again,

the bacterium copies the stored viral DNA into a section of RNA called guide RNA, which seeks out its matching sequence on the virus's genetic code. This directs an enzyme called Cas-9 towards this sequence. Cas-9 then cuts this section of the virus's DNA, and stops the virus from reproducing. In 2011, Emmanuelle Charpentier discovered the mechanism in the bacteria *Streptococcus pyogenes*. In 2012, Jennifer A. Doudna and Emmanuelle Charpentier figured out how to program this mechanism to turn genes off and on. **They can also be used to cut out sequences of DNA and splice new ones in.**

Note especially this last sentence above. I will be returning to it and explain how this is being turned and used against humanity.

CRISPR-Cas9 has virtually unlimited applications. CRISPR is much easier and quicker than previous methods of genetic modification. Another crucial difference is that while recombinant genetic modification introduces DNA from entirely different species to obtain certain traits, CRISPR can be used to redesign the genetic code of an organism to get the same trait without having to introduce genetic material from another species. There has been considerable resistance to genetic modification, as it is viewed as unsafe, despite wide scientific consensus that the danger is minimal. However, CRISPR simply alters an organism's own genetic code, which farmers have been doing through selective breeding for around 12,000 years, albeit at a vastly slower pace.

One of the main applications of CRISPR is in agriculture, especially in plants where ethical concerns are considerably less than in animals. A team in Japan has used CRISPR to extend the shelf life of tomatoes by turning off genes that control ripening, potentially reducing food waste. CRISPR can also be used to cure diseases. This is achieved by editing genes that cause the disease, or editing genes to produce a resistance against the disease.

Recently, a clinical trial used CRISPR gene editing to successfully treat transthyretin amyloidosis, a genetic disease that causes heart disease, pain and death. It is caused by a build-up of a protein called transthyretin. CRISPR editing reduced the production of this protein in the liver, helping to treat the disease. This could work for virtually

all genetic diseases, such as sickle cell anemia, cystic fibrosis and hemophilia.

One of the more ethically questionable uses, but one that could save millions of lives, is altering disease vectors. A disease vector is an animal that carries a disease. For humans, mosquitoes are by far the most deadly, killing over 700,000 people a year. The most deadly disease carried is malaria, which kills 600,000 people a year. Mosquitos can also carry Zika, West Nile Fever and dengue fever among many others. CRISPR could be used to alter the genetic code of mosquitos to ensure that their offspring will be sterile. If enough were released, a population of a mosquito species could be made extinct in a generation (around two weeks). Luckily, few species actually carry disease, only a few species of the Anopheles genus carry malaria. All mosquitoes have similar ecological roles, so making a few species extinct would have very little impact on the ecosystem, and save a huge number of human lives.

However one area that has particularly large ramifications is ‘human germline genetic engineering’, genetic modifications that could be inherited. This has actually occurred. In 2018, a Chinese scientist called He Jiankui announced that he had used CRISPR technology to genetically modify two babies called Lulu and Nana to make them immune to HIV. There was widespread outrage and Chinese authorities sentenced him to a \$430,000 fine and three years in jail. The World Health Organization has issued a call to halt all work on human genetic modification. The ethical impacts of having the very real power to create superhuman is massive and outside the scope of this article.

To conclude, CRISPR technology has the potential to do massive amounts of good, but also has the power to play God and profoundly alter the nature of life on Earth. Therefore, the world needs to ensure that this power can be regulated for the good of humanity.

This discovery is not without inherent problems of its own but our concern is what can be done with it when in the hands of people like Dr. Anthony Fauci, Bill Gates, the WHO, Dr. Peter Daszak of the Eco-Alliance, the CCP in Wuhan, China, and other Eugenicists that have

projected their message through the Georgia Guidestones, which calls for reduction of the world population to a half billion.

These Satanic worshippers have a strange ethic one in which they have to tell you in advance of what they are going to do. It is referred to as **“Projection”** or **“Predictive Programming”**. This need then is projected through symbology, art, movies, television programming, music lyrics, etc. We see this in people such as William & Melinda Gates, Dr. Anthony Fauci, and through secret societies such as Freemasonry and Skull & Bones. This weird egotism is flaunted by their language. **Bill Gates said that the next virus will get our attention.** They are anxiously eager to tell you what is coming next as if they want to inflict more pain through fear-mongering. The Monkeypox is the newest man-made virus! **They know what fear-mongering can do to human stress levels in people to accelerate mortality. Stress is one of the four factors in activating Mycoplasma the “Death Gene” (Pastor Bob’s term for this parasite!).**

At this point I want to go back to that sentence above I noted: *“They can also be used to cut out sequences of DNA and splice new ones in.”*

Since the human Genome was mapped at the turn of the millennium, geneticists, it was inevitable that it would be only a few years before CRISPR-cas9 would be discovered. This technology has lowered both time and costs in what it can do for those in the field of genetics.

It was another Nobel Peace Prize winner who confirmed that 18 fragments of the HIV1, HIV2, and 4 fragments of SARS2 had been meticulously injected into the gene of the common cold virus. Dr. Luc Montagnier, the French biochemist who received the 2008 Nobel Peace Prize for medicine, was the first to discover the HIV virus. In another article on Covid-19, I shared the genetic sequence code map found by a group of Indian scientists in March of 2020. Dr. Montagnier died at the age of 89 from cancer this past February.

At this point I will depart some from the known and provable to that of a hypothetical thesis. We do know that Bill Gates has had a working relationship with the DARPA, CIA and the DoD. Bill Gates is a proponent of vaccines, financially invested in the industry, citing his

investment provided a 20-to-1 return on investment. Bill Gates would have learned about CRISPR-cas9 within days of its announced discovery. We do know that both Bill Gates and Richard Rothschild hold patents on the Coronavirus known as Covid-19, years before it was declared a pandemic.

Dr. David L. Martin has identified over 4,000 patents related to the key people doing the research on SARS-Cov2 back to the 1990s. He presented all that evidence to the U.S. Dept. of Justice several years ago but the DoJ has sat on what is the “slam dunk” case for prosecution of Dr. Fauci. As Dr. David L. Martin has said, *“A single course case victory would end the entire virus scam in its tracks and make the pharmaceutical industry liable for damages.”*

My hypothesis is that there exists a conspiracy between Bill Gates, Dr. Fauci, the World Health Organization, the Pirbright Institute in Surrey, UK, the CIA, DARPA, and the DoD to “weaponize” a benign virus, to splice in new DNA sequences of HIV1, HIV2, and SARS2 into what many refer to as the common cold virus, thus using the **gain-of-function** of the inserted genome fragments to increase the virility of the virus. In the background of all this, most of those who died had comorbidity issues, or related health issues. Quite a few studies show that upwards of 90% of Covid-19 deaths had other life-threatening health issues that led to their death.

The government is saying that a million U.S. citizens have died as of the results of Covid-19. The VAERS data reports the average age of those who have died so far from this virus is 73 years of age. The fact that those who first died of this pandemic were passengers on the cruise ship “Diamond Princess”. Over 700 passengers and crew were infected with the Coronavirus and 15 passenger died while sequestered at sea on the cruise ship for nearly a month. Those who died were elderly in their 70s and 80s. The “Diamond Princess” had been equipped with new 5G wireless communications a few months before it began its Asian Pacific cruise.

I have addressed the issue of 5G wireless EMF elsewhere many times, however, entangled in the Covid cover story, is the matter of those nations who signed on to the informal agreement treaty to lower their own nation’s population. Covid-19 never came close to the projected

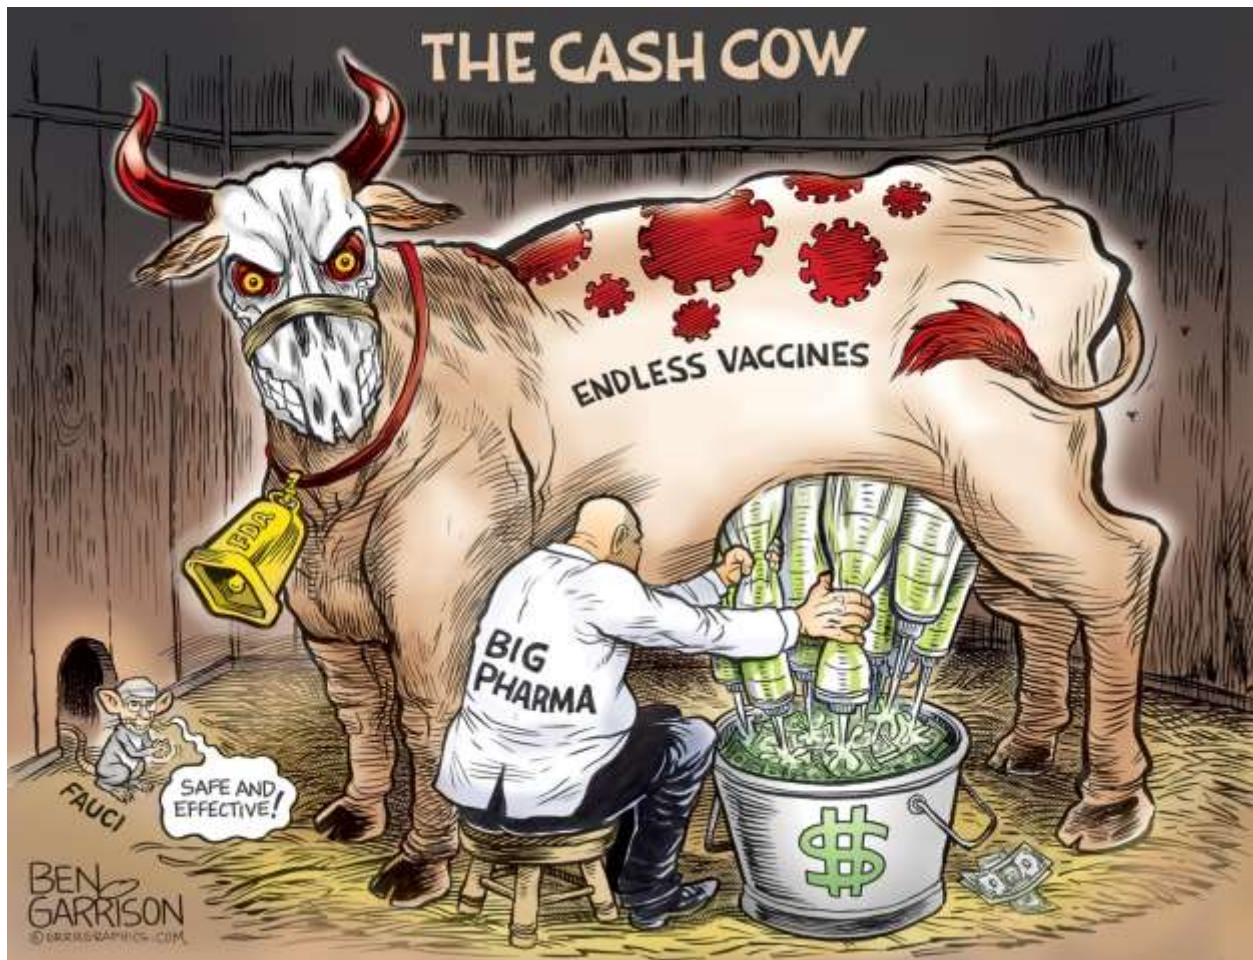

fatality level as Bill Gates and his friend at Imperial College in the UK who predicted up to 265-million deaths worldwide. That figure was “projection psychology” to function as a scare tactic to get people to take experimental vaccines [really gene therapy kill shots] that have proven to be fatal; however, not until months later when Covid-19 will not be remembered. With a death few will ever think about a possible connection between a vaxx the victim might or might not have taken last year or at some future time of an individual victim’s death.

When the WHO declared the pandemic on March 10, 2020, nations were ordered not to do autopsies of alleged Covid-19 victims. Hospitals were paid to put Covid on death certificates as the cause of death, numbers were inflated regardless of a person’s reason to be hospitalized, and now lastly, we are seeing excess deaths in various age groups. Aside from the fact that those of greatest risk of death has been in the elderly, there are high incidences of those with damaged reproductive systems, heart, lung, and kidney issues that will lead to reduced life span. All the government protocols of therapy were 100% opposite of what should have been the treatment!

It has been shown that hospitals received as much as \$100,000 for every Covid-19 patient as compensation for following the Fauci protocol, which proved to be a death sentence!

When the Social Security Act was signed into law in 1935, a person could not collect Social Security benefits until age 65, even though longevity or life span was only in the middle 50s. 58.9 for a male, 62.9 for a female! Think about that for a moment. Only a small percentage lived to retirement age!

As it stands at present, Agenda 2030 has required Ireland to meet a 30% reduction of the carbon footprint of agriculture worldwide. It has to dispose of 1.5-million beef cattle, dairy cows, and lambs. This equates to a loss of a corresponding percentage of jobs (56,000 in Ireland), mouths to feed around the world, and the elimination of 2.5-billion fewer people fits the Globalist plan for Prince Charles’ Sustainable Development.

There will be around 10,000 people (taking the total of retiring males and females) turning 65 each day for the next two decades. That figure declines after 2025. However, if they die before signing up for their Social Security, the winner is the government hands down! There are 77-million baby boomers, born from 1946 to 1964. Think on that for a while!

According to the AARP, 10,000 baby boomers are turning 65 every single day, and this is expected to continue into the 2030s. This means that nearly seven baby boomers are turning 65 every minute. This is the main reason why the Social Security and Medicare programs are expected to run into financial trouble in the coming decades.

With the CRISPR-cas9 discovery, Bill Gates and his crowd can create a new virus at will in a matter of hours to days without breaking a

sweat. All they have to do is find new names for their latest virus and who would be able to challenge them. Requests by more than 100+ countries and health labs have yet to get the CDC or NIAID to produce slide samples of COVID-19 for study. You have to wonder why they have not provided the proof to many nations and university research labs for comparison purposes. The fact is they have not provided such lab slide samples because they do not exist!

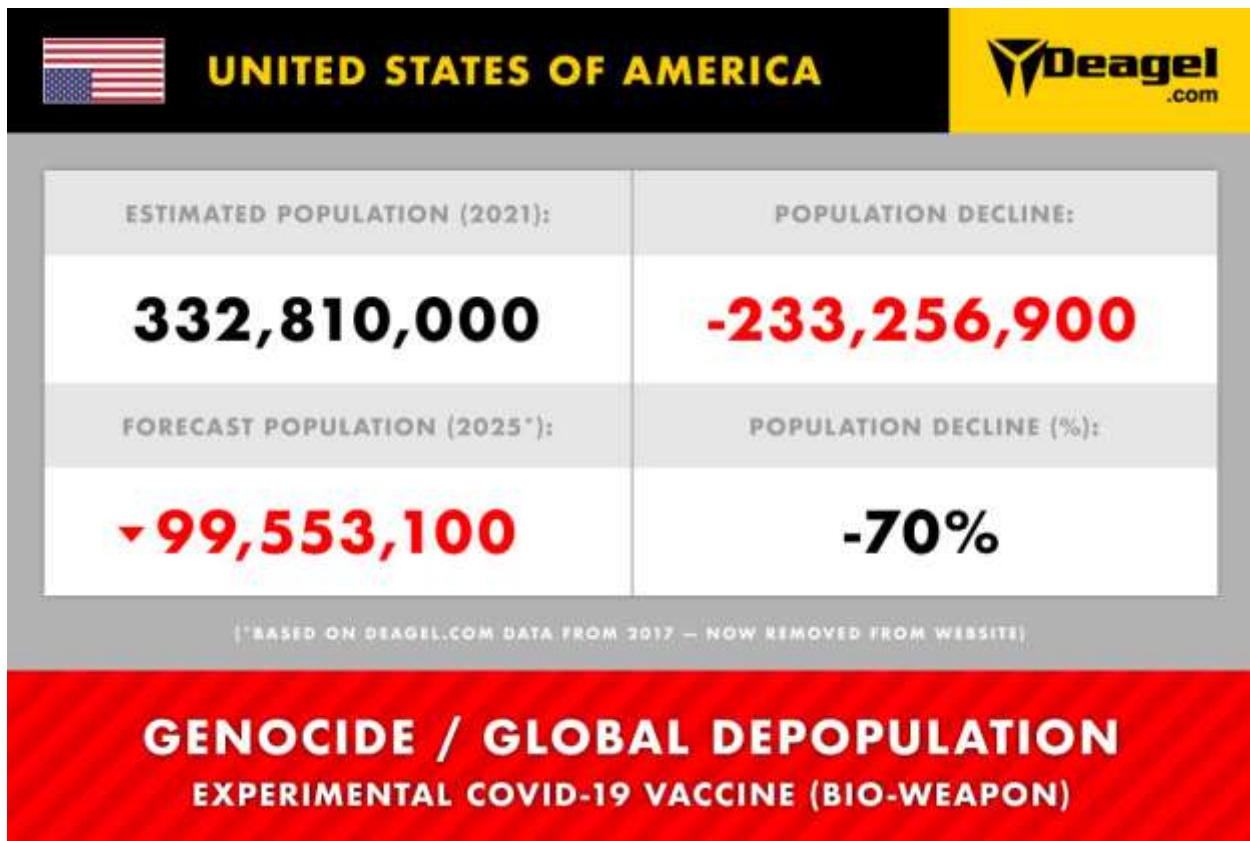

They haven't proved that it exists using their own "Gold" standard – the Koch Postulates! The Koch Postulates are the only way to prove pathogenic contagion! People and research scientists are told you have to believe us without any proof whatsoever.

77-million baby boomers become one of the greatest reasons for the powers at be to use the discovery of CRISPR-cas9 to cull the national population. To be conservative in our calculation numbers let's use a typical retiree receiving \$1,000 a month in Social Security benefits calculates out to: $77,000,000 \times \$1,000/\text{month} = \$77\text{-billion per month}$.

In previous articles I referred to the fact that the Deagel Report for more than a decade predicted the U.S. population would decline by 2025 by no less than 233-million people.

Would you believe me when I tell you that the Deagel Report page for this chart below was removed shortly after the World Health Organization declared the Covid-19 a pandemic on March 10, 2020? It is a fact and the Deagel Report was mysteriously connected with the CIA and the DARPA gang along with the Pentagon!

As a researcher on the Internet since 1996, I have checked the Deagel Report on average three times a month. I like so many others could not explain where 233-million Americans would simply disappear. Now, in May, 2022, it seems we have the answer, except they have removed the page.

Earlier this year, a simulation of a theory based catastrophe of global bankers collapsing the financial system was conducted. The tabletop experiment was similar to “Event 201,” a pandemic simulation drill held in October 2019, just before COVID-19 made its global debut.

Now, the Independent Panel for Pandemic Preparedness and Response has issued another devastating report. The panel told the World Health Organization’s (WHO) main annual session a year ago that inadequate coordination and unwise judgments had caused the COVID-19 pandemic to reach such a disastrous level.

The experts also offered a comprehensive list of actions that must be taken to defeat Covid-19 and guarantee that the world is adequately equipped for future dangers.

Following up a year later, the panel concludes that global reform initiatives in this area have been too slow and disjointed.

They claimed that the globe is still “tinkering” with the necessary adjustments, and that the inaction as a consequence is setting “the groundwork for another pandemic”, reported the ‘Express’.

**I WANT YOU
TO BELIEVE
MY BULLSHIT!**

The WHO, the U.S. National Security Council, the African and Chinese centers for disease control and prevention, and representatives from several biotechnology and pharmacy enterprises collaborated on this exercise.

The scenario was envisaged to last 18 months, during which time more than three billion people would be infected with the disease and more than 250 million would die.

While the hypothetical pandemic was just that, scientists claimed the exercise helped them come up with a number of helpful, if doomsday, forecasts for the next pandemic.

Experts have recently raised concerns about the growing dangers posed by the production of deadly diseases in laboratories, which could be unleashed into the wild either accidentally or deliberately by unscrupulous actors.

The unscrupulous actors in this case are the leaders, heads of state, prime ministers, and presidents of world states conducting war upon their own citizens. They point their finger at Vladimir Putin and call him a war criminal while they release their pathogens upon the public as their commitment to reduce the national populations of the 105 countries expecting the public to buy their bovine excrement!

It seems the best advice I could offer you is to put your trust in the Lord Jesus Christ, and trust His plan [a Reset unlike that Klaus Schwab, Prince Charles, and the House of Rothschild are planning for humanity]. DO NOT TAKE ANY VACCINES IS OBVIOUS TO WHAT HUMANITY IS BEING SUBJECTED TOO.

Do not be deceived as Jesus Christ warned his followers many times.

Blessings,

Pastor Bob, EvanTeachr@aol.com
