

5G and Crimes Against Humanity

Part 3

It is 5G 60-gigahertz EMF toxic radiation.

I have stated that this fraud of the Corona virus is a classic example of the Hegelian Dialectic (Problem-Reaction-Solution). In academic terms it is called (Thesis-Antithesis-Synthesis). Now if you have read the first two segments of this, you will be far ahead of the low information crowd or as Hillary Clinton calls them, “the deplorables”. But let me get serious here for another installment in learning the truth.

Are you aware that Russia does not have a pandemic of COVID-19? They have had a few cases where Russians were in the west and returned home with diagnosis of the Corona virus. But this begs the question, why no pandemic in the mother land? Simply, one reason only and that is Russia has not deployed 5G 60-gigahertz EMF for public application use. That is the reason; they only use it in military applications.

The continent of Africa has also remained largely unaffected by the Corona virus, and again, they have not been in any reason to install the 5G system. Think about it, the world’s poorest and unstable health system in the world are not likely to purchase thousand dollar I10 cell phones, or download to a portable TV set in the bush county to watch re-runs of Dallas!

Israel was the first country to develop the 5G 60-gigahertz EMF system and their Kneset (senate) banned it from use in Israel. They have had several hundred cases of the Corona virus and as of March 27th, 2020, they have had 10 deaths. The first cases were all elderly with compromised immune systems. One was supposed to be a survivor of the Holocaust according to an Israeli news site. I don’t know whether we can believe this since the Zionists always play up the Holocaust “card”. My Christian brothers and sisters please wake up and do not afraid. This is all about a \$59-billion business investment in a technology that is an Extinction Level Event.

The Corona virus is really a consequence, not the disease. The real disease is the 5G 60-gigahertz EMF radiation poisoning. When you get a fever, it is God’s way of fighting off something of affecting your health. A fever is the consequence, not the health issue!

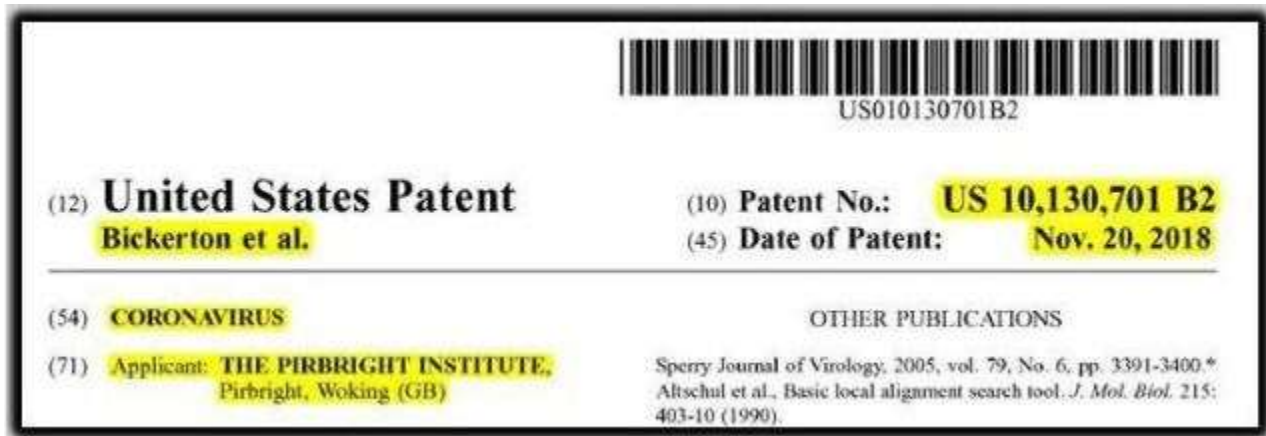

The American people are being played just as was the case with Xi Jinping of China. The Rothschild's in the UK are the culprits and as I have been sharing the research of what is being learned from medical patents, sources of vaccine funding, research on virology, Eugenics, population control, etc. We are all the victims of a global plan to rid the world of all but 500,000,000 from the planet.

The new man-made version of SARS (version 2), called Corona Virus ID 19, is only a “pandemic” because the Chinese let it spread to 190 nations before admitting they even knew it had been released in their country. The Chinese are so naïve that they don’t even know who released it. It was, of course, the “usual suspects” – the Queen of England (Privy Council) and her Pirbright/Merial virus-makers. The Brits have been using Africa, China, and many other countries for their experiments in biological warfare which creates the myth of “person zero”, or the one person who supposedly mixed human and animal viruses together – somehow.

Let’s be clear about this, it is a “Plan-Demic”. The WHO uses the word pandemic, but it does not even meet their own definition of a pandemic.

Essentially, most pandemics or epidemics are from man-made customized viruses. This has been a major tool for invisible warfare since the time of Burroughs-Wellcome Drug Company starting their experimentation with injecting viruses and diseases into unwitting subjects since 1902.

The newest custom-man-made SARS virus that produced the hysteria and panic of the COVID-19 insanity is just another attempt at perfecting the yearly influenza deaths that the bio-warfare department at Pirbright has been trying to do for decades. This new attempt is lame, but the response to the propaganda has been astoundingly effective that has caused the whole world to be locked down over a virus that is no more powerful than the common yearly flu. Don't be fooled, this is a false flag attack by the Brits to continue their coup against Donald Trump – who the globalists see as the death of the nasty virus called "Globalism."

If you take a look at the statistics below, you will see that it is self-evident that this COVID-19 is nothing to worry about and certainly nothing to crash national economies over. It is a hoax. It is another attempt of the British eugenicists to kill more people and depopulate the world. Don't fall for the propaganda of this yellow journalism that has, once again, created a war from a tiny battle. It is a hoax but with deadly consequences. It is a Crime against Humanity!

This is simply another attempted coup against Trump, the leader of the populist movement world-wide.

You will also find a list below of approved medical drugs and treatments for viruses that are often 100% effective at stopping a corona virus. These treatments are used effectively all over the world – except in the USA. The CDC and NIH won't let these treatments and drugs even be tested, let alone used. They don't want to heal anyone.

Just look at the drug for Malaria, chloroquine sulphate, which also works to heal COVID-19 if used in conjunction with other drugs. The CDC and NIH have had 20 years to "START" their studies on this drug to help stop viruses – but they refuse. This drug alone could stop the CDC/NIH vaccine racket. This is indicative of the complete control "big pharma" has over American citizen's bloodstream. Every day we get closer to a CDC martial law controlled country. The CDC is a private corporation that made between \$4.1 and \$8 billion off of their privately owned 56 vaccine patents last year. Does anyone smell a rat? It is time to remove the corporate viruses from the CDC and NIH.

Coronavirus 19 Cases to March 25th, 2020:

**Coronavirus Cases world-wide: 460,487
Deaths 20,831**

**Coronavirus Cases in the US: 65,652
Deaths: 931**

US Flu (Influenza) Deaths

During the 2019-2020 U.S. Flu Season so far there have been:

23,000 – 59,000 flu deaths

38,000,000 – 54,000,000 flu illnesses

17,000,000 – 25,000,000 flu medical visits

390,000 – 710,000 flu hospitalizations

Pneumonia in the US in 2017

There were 2.56 million people who died from pneumonia in 2017 world-wide. Almost a third of all victims were children younger than 5 years, it is the leading cause of death for children under 5. There were 49,157 U.S. deaths in 2017.

1,300,000 hospitalizations in 2017

2,560,000 deaths world-wide in 2017

49,157 U.S. deaths in 2017

Biological Warfare

Wake up and realize that every fowl virus or illness known to man has been turned into a biological weapon. Just some of the diseases considered for or known to be used as a biological weapon include anthrax, ebola, Marburg virus, plague, cholera, typhus, Rocky Mountain spotted fever, tularemia, brucellosis, Q fever, machupo, Coccidioides mycosis, Glanders, Melioidosis, Shigella, Psittacosis, Japanese B encephalitis, Rift Valley fever, yellow fever, and smallpox.

Successful Anti-Viral Drugs Forbidden by CDC & NIH

The CDC and NIH are lying to us. **There are no known vaccines for viruses — they simply don't exist and yet all of the CDC and NIH time and money is spent on creating vaccines. Both “big pharma” institutions (CDC/NIH) ignore that fact and don't allow any research on drug treatments that have been shown effective against viruses. Any of the treatments below that have a drug name in parenthesis after its name is an approved treatment plan in many, many other nations, beside the CDC/NIH controlled United States of America.**

Some of the most effective and promising anti-viral drugs:

Remdesivir, Oseltamivir (Tamiflu), Zanamivir (Relenza), Abacavir for HIV, Amprenavir (Agenerase) for HIV, Amantadine, Rimantadine, Galidesivir, Interferon, Reverse Transcriptase Inhibitor, Cidofovir, Combivir, Daclatasvir (Daklinza), Darunavir, Dolutegravir, Acyclovir

(Aciclovir) for herpes/Chicken Pox, Atazanavir, Adefovir for Hepatitis B, Balavir, Baloxavir marboxil (Xofluza), Boceprevir (Victrelis), Amantadine for influenza, Doravirine (Pifeltro), Elvitegravir, Entecavir, Etravirine (Intelence), Famciclovir, Fosamprenavir, Ganciclovir (Cytovene), Ibalizumab (Trogarzo), Imunovir, Indinavir, Letemovir (Prevymis), Lopinavir, Nelfinavir, Nexavir, Norvir, Penciclovir, Peramivir (Rapivab), Raltegravir, Rilpivirine (Edurant), Ritonavir, Saquinavir, Simeprevir (Olysio), Sofosbuvir, Telaprevir, Trizivir, Telbivudine (Tyzeka), Tenofovir alafenamide, Tenofovir disoproxil, Tenofovir, Tipranavir, Valaciclovir (Valtrex), Valganciclovir, Zanamivir (Relenza)

Other Anti-Viral Treatments Hidden by the CDA & NIH:

Ampligen, Arbidol, Atripla, Biktarvy, Cobicistat (Tybost), Delavirdine, Descovy, Didanosine, Docosanol, Ecoliever, Edoxudine, Efavirenz, Emtricitabine, Enfuvirtide, Fomivirsen, Foscarnet, Fosfonet, Ibacitabine, Idoxuridine, Imiquimod, Inosine, Interferon type I, Interferon type II, Interferon type III, Lamivudine, Loviride, Maraviroc, Methisazone, Moroxydine, Nevirapine, Nitazoxanide, Peginterferon alfa-2a, Peginterferon alfa-2b, Pleconaril, Podophyllotoxin, Pyrimidine, Ribavirin, Rimantadine, Stavudine, Trifluridine, Tromantadine, Truvada, Vicriviroc, Vidarabine, Viramidine, Zalcitabine, Zidovudine.

Influenza as Eugenics

The first influenza pandemic was recorded in 1580, and since then, influenza pandemics occurred every 10 to 30 years.

Coronaviruses are a large family of viruses that cause illness ranging from the common cold to more severe diseases such as Middle East Respiratory Syndrome (MERS-CoV) and Severe Acute Respiratory Syndrome (SARS-CoV). A new strain of coronavirus (SARS-CoV-2) causes Coronavirus disease 2019, or COVID-19. Common signs of infection include respiratory symptoms, fever, cough, shortness of breath, and breathing difficulties. In more severe cases, infection can cause pneumonia, severe acute respiratory syndrome, kidney failure and even death.

Middle East Respiratory Syndrome (MERS-CoV) was transmitted from dromedary camels to humans.

Severe Acute Respiratory Syndrome (SARS-CoV) SARS-CoV was transmitted from civet cats to humans, was identified in 2003.

Russian Flu (1889-1890) H3N8 and H2N2, began in May 1889 in Uzbekistan. By October, it had reached Tomsk and the Caucasus. It rapidly spread west and hit North America in December 1889, South America in February 1890, India in February 1890, and Australia in March 1890.

1,000,000 deaths

Spanish Flu (1918-1920) H1N1 pandemic lasted from March 1918 to October 1920. It started in US troops training at Camp Funston, Kansas. By October 1918, it had spread to all

continents, and eventually infected about one-third of the world's population, 500 million people. In six months, some 50 million were dead. About 17 million died in India, 675,000 in the United States and 200,000 in the UK.

50,000,000 – 100,000,000 deaths

Asian flu (1957–58) H2N2 avian influenza virus first identified in *China* in late February 1957. It caused about 2 million deaths globally. The Asian flu spread to the United States by June 1957 and caused about *70,000 deaths in the US*.

1,000,000 – 4,000,000 deaths

Hong Kong Flu (1968-69) H3N2 virus first detected in *Hong Kong* in early 1968 and spread to the United States later that year. This pandemic of 1968 and 1969 killed approximately one million people worldwide. It caused about 34,000 deaths in the United States.

1,000,000 deaths

Avian Flu (February 2004) H5N1 avian influenza virus was detected in birds in Vietnam, increasing fears of the emergence of new variant strains. In October 2005, Avian Flu was identified in Turkey, Russia, Mongolia, China, Romania, and Greece. By November 2007, cases had been identified across Europe. However, by the end of October, only 59 people had died as a result of H5N1, which was atypical of previous influenza pandemics.

59 deaths

Swine Flu (2009-10) H1N1 virus first detected in Mexico in 2009 and spread to the United States later that year. This pandemic killed around half a million people worldwide. It caused about 12,000 deaths in the United States.

500,000 deaths

H1N1 Variant (2009) the variant had spread widely with cases reported in Canada, the US, New Zealand, the UK, France, Spain and Israel. H1N1 Variant reached pandemic proportions, with nearly 30,000 confirmed cases worldwide in 206 countries reporting over 503,536 laboratory confirmed cases.

6,250 deaths

Other Man-Made Deadly Viruses

Viral Hemorrhagic Fevers: Ebola, Lassa fever, Rift Valley fever, Marburg virus disease and Bolivian hemorrhagic fever are highly contagious and deadly diseases, with the theoretical potential to become pandemics.

Zika Virus (2015-16) began in 2015 with over 1.5 million cases across more than a dozen countries in the Americas. The World Health Organization warned that Zika had the potential to become an explosive global pandemic if the outbreak was not controlled.

Tuberculosis – One-quarter of the world's current population has been infected with *Mycobacterium tuberculosis*, and new infections occur at a rate of one per second. About 5-10% of these latent infections will eventually progress to active disease, which, if left

untreated, kills more than half of its victims. Annually, 8 million people become ill with tuberculosis, and 2 million people die from the disease worldwide. In the 19th century, tuberculosis killed an estimated one-quarter of the adult population of Europe; by 1918, one in six deaths in France were still caused by tuberculosis. During the 20th century, tuberculosis killed approximately 100 million people.

8,000,000 deaths per year

HIV/AIDS (1981) Appears early with flu-like symptoms, then enlarged lymph nodes, fever, weight loss, infections, and tumors. Near normal life expectancy after contraction with treatment — 11 years life expectancy without treatment. There are 37.9 million people living with HIV with 770,000 deaths in 2018. HIV originated in west-central Africa during the late 19th or early 20th century.

32,000,000 deaths

Now, let's start looking at the real face behind the coronavirus fraud.

Most Americans are probably aware that the coronavirus pandemic has caused schools in several states to be closed and students being forced to take virtual online classes. Unfortunately, most Americans may still not be aware that American Academy of Pediatrics and other health experts have warned that [children are more vulnerable](#) to wireless radiation exposure –including **Bluetooth, Cell Phone and Wi-Fi** – because they are smaller, their skulls are thinner, and their bodies are still developing.

Wi-Fi exposure health risks include [reduced immunity to illnesses](#) which is especially worth considering right now. Exposure can also [disrupt the blood brain barrier](#) which can cause it to leak. Also worth considering – there is still no “safe” level of wireless exposure that has been scientifically determined for kids or pregnant women. That’s why doctors, educators, and parents in the U.S. and worldwide have been fighting for schools to replace Wi-Fi in schools with wired internet (see [1](#), [2](#), [3](#)) for many years already.

There’s no doubt that education is beneficial to children. But forcing them to be exposed to harmful wireless radiation in order to be educated is cruel and unnecessary. Regardless, one [FCC Commissioner has already recommended that schools provide WiFi hot spots](#) to families with school children to install in their homes. Cuckoo Cuckoo! Now an Illinois school district has set up Wi-Fi hot spots in stationary school buses for students.

From [WILL-AM Urbana, Illinois](#):

A southern Illinois high school district outfitted four of its school buses with Wi-Fi hot spots to provide internet access to students while public schools are closed during the coronavirus pandemic. Bus drivers in the Belleville Township system park their vehicle at seven parks around the community for three hours on weekdays.

“People can just pull up, come up and download the information they need for the day and then go,” said BTHS District 201 Assistant Superintendent Brian Mentzer.

Mentzer said a member of the district’s IT department came up with the idea as educators in the district discussed how they’d transition to an online learning model.

“And everybody’s heads nodded like, yeah, that’s a great idea,” he said.

Never thought the WiFi enabled buses would be deployed for this! [#ilschoolsstepup](#)
<https://t.co/xfUMI4LyGI>

— Melissa Taylor (@melissat1130) [March 17, 2020](#)

Nope. Not a great idea, Melissa. For many years already Silicon Valley parents have been sending their own kids to private low-tech schools AND sometimes taking extreme measures to [reduce their kids’ use and exposure to tech.](#)

If 6 of 7 COVID-19 Cases Are Not Being Reported as One Study Suggests — The Current Mortality Rate Sinks to Flu-Like Levels.

The coronavirus continues to hit the senior population and those with prior health disorders the hardest.

The US coronavirus mortality rate dipped to 1.25% on Sunday using deaths (396) divided by confirmed cases (38,167).

The mortality rate for the coronavirus in the US continues to fall as more and more Americans are being tested.

12 days ago the US coronavirus mortality rate was 4.06%

Today the mortality rate is down to 1.25%!

4.06% March 8 (22 deaths of 541 cases)

3.69% March 9 (26 of 704)

3.01% March 10 (30 of 994)

2.95% March 11 (38 of 1,295)

2.52% March 12 (42 of 1,695)

2.27% March 13 (49 of 2,247)

1.93% March 14 (57 of 2,954)

1.84% March 15 (68 of 3,680)

1.6% March 17 (116 of 7,301)

1.4% March 19 (161 of 11,329)

1.25% March 20 (237 of 18,845)

01.25% March 22 (396 of 38,167)

Yossi Getetner posted a list earlier in the week. But this number may actually be much lower. Hospitals and urgent care clinics are turning potential COVID-19 victims away on a daily basis. We all now know someone who was told not to come in to be tested because officials were only concentrating on the seriously ill.

That means the current mortality rate is SIGNIFICANTLY lower if you factor in ALL OF THE CASES that are not being reported, and where people are not feeling sick enough to be tested.

That number could be 6-7 times higher than the current number of 38,167 as a recent study suggests.

That puts the coronavirus mortality rate in the US at 0.1% to 0.2%. This is similar number to a flu virus.

Thanks to the fraudulent numbers by the WHO at the beginning of March the global economies are in a complete meltdown over the coronavirus panic.

PERSPECTIVE:

**** The 1918 Spanish Flu Pandemic killed 675,000 out of US population of 103,268,000 or about — 1 in 200**

**** The 2020 Coronavirus has killed 458 (so far) out of a population of 333,546,000 or a little more than — 1 in a million.**

As we have reported several times now — the Director of the World Health Organization created an international panic when he miscalculated the coronavirus mortality rate at 3.4%. The controversial Ethiopian politician and Director General of the World Health Organization (WHO), Tedros Adhanom Ghebreyesus, claimed in a press conference in early March that the fatality rate for the coronavirus was many multiples that of the fatality rate of the common flu.

This egregiously false premise has led to the greatest economic panic in world history. The Director General of the WHO spoke on March 3, 2020 and shared this related to the coronavirus:

“While many people globally have built up immunity to seasonal flu strains, COVID-19 is a new virus to which no one has immunity. That means more people are susceptible to infection, and some will suffer severe disease.”

“Globally, about 3.4% of reported COVID-19 cases have died. By comparison, seasonal flu generally kills far fewer than 1% of those infected.”

The problem is his statement is false. It was not accurate!

THE NUMBERS JUST DON'T ADD UP: Nearly 500,000 Went to a Hospital in 2018-19 Flu Season But Today There Are Not Enough Hospital Beds for Coronavirus Patients?

Really, What is going on? The data just don't add up. The MSM and Democrats claim there are not enough hospital beds for the current 85,000 people identified with the coronavirus, many of whom will never even enter a hospital due to their relatively minor condition. Also, in 2018-19 there were plenty of beds for the nearly 500,000 patients that spent time in hospitals, due to the flu.

Via the CDC – there were 490,000 hospitalizations during the 2018-2019 flu season.

CDC estimates that the burden of illness during the 2018–2019 season included an estimated 35.5 million people getting sick with influenza, 16.5 million people going to a health care provider for their illness, 490,600 hospitalizations, and 34,200 deaths from influenza (Table 1). The number of influenza-associated illnesses that occurred last season was similar to the estimated number of influenza-associated illnesses during the 2012–2013 influenza season when an estimated 34 million people had symptomatic influenza illness⁶.

[Michigan's Democrat Governor THREATENS All Doctors and Pharmacists who Prescribe or Dispense Hydroxychloroquine for Coronavirus Patients](#) .

And yet the media want you to believe the US will run out of hospital beds during the coronavirus. This is not likely.

To all Americans: please ask this simple question your elected officials at the Federal & State level: <https://t.co/0jXzRk6POG>

— Ned Nikolov, Ph.D. (@NikolovScience) [March 27, 2020](#)

The data to date show that most individuals with the coronavirus suffer from very mild conditions. The panic-driven [Washington Post](#) even reported that 82% of these individuals with the coronavirus suffer from mild conditions.

Assuming the remaining require hospitalization (which is unlikely but conservative), then only 15,300 people currently require hospitalizations across the US. Of course this too is conservative because many of these cases in the US are already recovered and the individuals no longer suffer from the virus from China.

So the leftie Mainstream Media (MSM) want us to believe that hospital beds will be overwhelmed by the coronavirus by 15,000 patients (at most to date) but a year ago the US hospitals were not overwhelmed by 500,000 flu patients.

Other numbers from the media were based on the Imperial College report that warned that 2 million Americans and half a million British citizens would die from the coronavirus this year.

Yesterday they backtracked on their study and now claim only 20,000 in Britain will succumb to the coronavirus.

Great Britain has 29,000 flu deaths a year on average. So now they are saying the coronavirus is less deadly than a typical flu virus.

None of this passes the smell test.

COVID-19 Outbreak Is The Trojan Horse To Increase Smartphone Surveillance

**The general population
doesn't know what is
happening
and it doesn't even know...
that it doesn't know**

Aaron Kesel, an independent journalist has stated, The coronavirus outbreak is proving to be the Trojan horse that justifies increased digital surveillance via our smartphones.

All over the world, starting with China – the suspected origin of the COVID-19 outbreak – governments are increasing surveillance of citizens using their smartphones. The trend is taking off like wildfire; in China citizens now require a smartphone application's permission to travel around the country and internationally.

The application is AliPay by Ant Financial, the finance affiliate controlled by Alibaba Group Holding Ltd. co-founder Jack Ma, and Tencent Holdings Ltd.'s WeChat. Citizens now require a green health code to travel, Yahoo News reported.

China isn't the only country looking towards smartphones to monitor their citizens; Israel and Poland have also implemented their own spying to monitor those suspected or confirmed to be infected with the COVID-19 virus. Israel has gone the more extreme route, and has now

given itself authority to surveil any citizen without a court warrant. Poland on the other hand is requiring those diagnosed with COVID-19 ordered to self-isolate to send authorities a selfie using an app. Which, if Poles don't respond back in 20 minutes with a smiling face, they risk a visit from police, *'Daily Mail'* reported.

Singapore has asked citizens to download an app which uses Bluetooth to track whether they've been near anyone diagnosed with the virus; and Taiwan, although not using a smartphone, has introduced "electronic fences" which alert police if suspected patients leave their homes.

Meanwhile, here in the U.S. as reported by the *'Washington Post'*, smartphones are being used by a variety of companies to "anonymously" collect user data and track if social distancing orders are being adhered to. Beyond that, the mobile phone industry is discussing how to monitor the spread of COVID-19. If that's not enough, as this author reported for *The Mind Unleashed*, the government wants to work with big social tech giants like Google, Facebook, and others, to track the spread of COVID-19

A new live index shows the increase of the police state by Top10VPN, a Digital Rights group. Top10VPN lists a total of 15 countries which have already started measures to track the phones of coronavirus patients, ranging from anonymized aggregated data to monitor the movement of people more generally, to the tracking of individual suspected patients and their contacts, known as "contact tracing."

That's not the only live index, a company called Unacast that collects and analyzes phone GPS location data also launched one. Except this is a "Social Distancing Scoreboard" that grades, county by county, monitoring who is following social distancing rules.

As *Activist Post* previously wrote while discussing the increase of a police surveillance state, these measures being put into place now will likely remain long after the pandemic has stopped and the virus has run its course. That's the everlasting effect that COVID-19 will have on our society. The coronavirus is now classified as a pandemic by the World Health Organization, and it may very well be a legitimate health concern for all of us around the world. But it's the government's response that should worry us all more in the long run.

At the time of this report the COVID-19 virus has infected 458,927, killed 20,807, while 113,687 have recovered according to the Johns Hopkins map.

Vaccines and Retroviruses: A Whistleblower Reveals What the Government is Hiding

I am going to wrap up this segment with a report by a professional in the field provided by John P. Thomas of *'Health Impact News'*. I would not know about Judy Mikovits were it not for the fact I have been researching vaccines and their relationship to Autism and other child

disorders. I watched a 2-hour video interview of Dr. Mikovits at least a year ago, and tagged it for my archived files.

Data suggests that 6% of the U.S. population is harboring a retrovirus in their bodies that can develop into an acquired immune deficiency. This is not the well-known AIDS caused by HIV, but Acquired Immune Deficiency Syndrome (AIDS) associated with other retroviruses. These non-HIV retroviruses were unintentionally introduced into humans over the past 75 years.

It began with trials of polio vaccines and yellow fever vaccines given in the early 1930s. This is when the first recorded cases of Chronic Fatigue Syndrome and autism appeared. It involved the use of laboratory mice to prepare vaccines for human use. [1]

20 Million Americans Likely Infected with Retroviruses

Retrovirus exposure intensified in the 1970s as new vaccines and pharmaceutical products were developed. These retroviruses and related infectious agents are now associated with dozens of modern chronic illnesses – perhaps nearly all of them. In these diseases, infection leads to inflammation — and unresolved inflammation can lead to chronic disease.

The list of diseases stretches from autism to cancer and from Chronic Fatigue Syndrome to Alzheimer's. The diseases cripple the development of the young, steal the productivity and enjoyment of life for adults, and provide a slow and withering death to the elderly.

"An inefficient virus kills its host. A clever virus stays with it." - James Lovelock

The retroviruses being discussed are very clever and very stealthy. They can infect a person and stay with them for their entire lifetime. Sometimes they shorten life substantially. But, they are just as likely to bring a person to total disability and deny people the opportunity for a normal life.

Even though 20 million Americans are likely to be infected, not everyone will develop serious illness. Retroviruses in the human body are like sleeping giants. They are quiet until they are activated in immune deficient people.

Once activated, they create diseases such as Myalgic Encephalomyelitis, also called Chronic Fatigue Syndrome (ME/CFS), Chronic Lyme disease, Chronic Lymphocytic Leukemia, autism spectrum disorder (ASD), numerous cancers, and a wide range of other autoimmune, neuroimmune, and central nervous system diseases. Please see reference number 2 at the end of this article for a comprehensive list of diseases. [2]

Retroviruses can Promote A Perfect Storm of Illness

The retroviruses being discussed here do not directly cause diseases by themselves. A perfect storm of events need to come together to create acquired immune system deficiency (non-HIV AIDS). When conditions are right, the viruses create unrelenting inflammatory processes that disrupt the immune system.

The perfect storm occurs when human DNA is disturbed by retroviruses, when there are co-infections, when there is severe shock or trauma, when hormones are dysregulated, when there are genetically modified organisms and glyphosate in the diet, when there are pesticides and other toxic substances in food and the environment, and when there are genetic susceptibilities.

If some or all of these conditions occur together, then the immune system will be weakened to the point where the perfect storm occurs, and people become ill with some type of modern chronic disease.

Not everyone who has retroviruses in their bodies will develop one of these diseases, but for those who experience a perfect storm the possibility is much greater. The risks increase with age as the immune system naturally weakens.

How Did These Viruses Infect Millions Worldwide?

These viruses were most likely introduced into humans through contaminated vaccines and biological products including GMOs, human blood products, the milk of cows, and human breast milk. These retroviruses can be passed between family members through body fluids.

It is not unusual to find a family where everyone tests positive for a retrovirus, but only one person is experiencing a retrovirus-related illness. Symptom free carriers are common in human retroviral infections.

You Probably Haven't Heard Much about the Retrovirus Problem

If you have never heard about the retrovirus problem, then you can thank the CDC, NIH, FDA, and other government agencies for covering up the problem since it was first reported to them in 1991 by American immunologist Elaine DeFreitas. [3]

They did not want to alarm you. They didn't want to induce a panic, or a rebellion against the use of vaccines. They didn't want to send shock waves through the conventional medical care system and the pharmaceutical industry that would threaten their profits. They didn't want to risk a public panic among people needing blood transfusions. They didn't want to disturb the resolve of Big Pharma and political leaders working to pass mandatory vaccination laws. They didn't want to interfere with the full implementation of genetically engineered crops. They didn't want to lay the groundwork for numerous class action lawsuits from people who were harmed or who will be harmed in the next 20 to 30 years as the retroviruses continue to multiply in the bodies of infected persons.

Ultimately, government leaders didn't want us to be able to make informed decisions regarding the true risks associated with certain therapies – they preferred to keep us all in the dark. They just wanted to cover up the whole mess and act as if it never happened – but it did happen, and millions of Americans are now suffering from a plague of modern diseases that were once rare or non-existent.

Judy A. Mikovits, PhD

The information that I am sharing in this article came mostly from an interview I did with Judy A. Mikovits, Ph.D. and from the book, *Plague: One Scientist's Intrepid Search for the Truth about Human Retroviruses and Chronic Fatigue Syndrome (ME/CFS), Autism, and Other Diseases*, written by Kent Heckenlively, JD, and Dr. Mikovits.

My article will explain the history of retrovirus contamination and the government cover-up. It will provide an introduction to effective treatments for those who suffer with the illnesses mentioned above. It attempts to do what our government didn't have the political courage to do.

Retroviruses Escaped Safeguards Designed to Contain Them

Before I go any further, I need to tell you that safeguards most likely were implemented in December of 2014 to clean up retrovirus contaminated blood products and vaccines. The FDA approved technologies developed by the Cerus Corporation on that date that were specifically designed to solve these problems.

The problem was well understood by public health scientists and researchers for five years, but the problem was not made public until the FDA approved a solution. The press release from the Cerus Corporation describes some of the problems with the blood supply, and tells us about their new technologies. [4] Dr. Mikovits proved that this new technology is effective for inactivating these viruses in blood products, even though as you will soon read, she was viciously persecuted for bringing this problem to light.

[PRESS RELEASE DETAILS: FDA APPROVES INTERCEPT BLOOD SYSTEM FOR PLASMA](#)

This is good news for people who are choosing to take vaccines and for those who need to receive blood products. However, we must not forget the large number of people who were unknowingly infected by retroviruses over the past 20 or 30 years. The Cerus technology will not help them.

How did the Retrovirus Nightmare Begin?

The most recent chapter of the story began in the 1970s. It took place in research laboratories throughout the world where scientists were doing research on diseases such as cancer and HIV/AIDS.

These were the same laboratories where they were manufacturing vaccines. These labs work with mice that are genetically engineered to have immune system deficiencies, which made them vulnerable to express certain diseases. In other words, their immune systems have

been altered in such a way that they will get a certain disease when exposed to a certain pathogen or toxin.

Research activities involved injecting lab mice with human viruses to attenuate or weaken the viruses. Scientists routinely did these experiments with mice in the same laboratories where they were growing human cell lines. They believed that mouse viruses and human viruses would not interact, or travel from one part of the research facility to another.

In the past, scientists didn't worry about mouse virus contamination, because they believed that these viruses would not harm humans if they actually made their way into a human being. Scientists acknowledged the risks, but maintained the judgment that the benefits of vaccines outweighed the risks. The work of Dr. Mikovits and other scientists challenged their beliefs. They suggested the problem with mouse viruses was already out of control and the cost of the damage could destroy the economies of nations.

Other Doctors Who Warned about Retroviruses

Dr. John Coffin.

Dr. G. Stuart made the same warning in 1953, when he spoke to the World Health Organization. He was talking about the yellow fever vaccine at that time. He stated:

Two main objections to this vaccine have been voiced, because of the possibility that (i) the mouse brain employed in its preparation may be contaminated with a virus pathogenic for man although latent in mice ... Or may be the cause of a de-myelinating encephalomyelitis; (ii) the use, as an antigen, or a virus with enhanced neurotropic properties may be followed by serious reactions involving the central nervous system. [5]

In 1996, Dr. John Coffin, a leading expert on recombination in viruses, warned against transplanting cells from animals into humans to improve the functioning of the immune system of HIV-AIDS patients. He stated:

The infection is a virtually inevitable consequence of xenotransplantation and this is a very serious worry because the animals that have been chosen for doing this — the baboon and the pig — are both known to carry endogenous viruses, replication competent, but very poorly studied, that are capable of infecting human cells. [6]

Dr. Judy Mikovits and Other Scientists Discover Retroviruses now Present in 6% of Americans

Electron Micrograph of gamma retrovirus isolated from ME/CFS patients blood cells

Taken together, these data demonstrate the first direct isolation of infectious XMRV from humans and implicate a role for XMRV infection in the pathogenesis of CFS."

The original abstract of the *Science* article which was published on October, 8, 2009

Plague CH 11 p183

The long held judgement of the majority of the scientific community was proven wrong in 2009 by Dr. Judy Mikovits and other scientists who discovered that something unexpected and very harmful was happening in laboratories throughout America and the world. They discovered that a retrovirus called XMRV (xenotropic murine retrovirus) and other related retroviruses were now present in 6% of Americans and that this retrovirus was appearing in a very high percentage of people with diseases such as prostate cancer, Chronic Fatigue

Syndrome, autism, Lou Gehrig's Disease, treatment resistant Lyme disease, and Parkinson's Disease.

The term "xenotropic" indicates that the virus had a non-human origin and it is now able to live and multiply in humans. This retrovirus had an appearance that was similar to mouse virus, but it also had qualities of human virus. It was a chimera – like a mythical beast – part human and part mouse. It was accidentally created in laboratories when a naturally occurring mouse virus recombined with a human virus found in a prostate cancer culture.

This would be confirmed in 2011 by European researchers. Their 2011 article stated: One of the most widely distributed biological products that frequently involved mouse tissue, at least up until recent years, is vaccines, especially vaccines against viruses ... It is possible that XMRV particles were present in virus stocks cultured in mouse cells for vaccine production, and that the virus was transferred to the human population by vaccination. [7]

Retroviruses Released into the Air and Escape Laboratories

Model for the Induction of Neurodegeneration by one strain of MLV in an animal model

these immune pathways see in ASD and Other Chronic neurological diseases

What scientists didn't realize was the way they managed their mouse colonies and managed the production of their human cell lines created conditions in laboratories where viruses could unexpectedly mutate and recombine with one another. Even more astounding was the fact that these retroviruses could easily reproduce themselves and travel through the air.

Up until 2009, scientists didn't know that retroviruses could be aerosolized. Retroviruses that were in mice were being released into the air and travelling through their facilities to other labs where human cell lines were being cultivated. Once there, they were able to infect human cultures. They became part of the cells and part of the products that were made from the activity of the cell lines, such as the antigens used in vaccines. The retroviruses also infected lab workers.

Government Cover-up and Lies

Thus far, I have provided some very basic information about retroviruses – where they came from and how they facilitate human disease — but there is much more to the story. We need to explore why the U.S. government doesn't want you to know that many strains of retroviruses exist, and why they don't want you to suspect that they are making you sick.

I recently spoke with Dr. Judy A. Mikovits, Ph.D., to gather her inside perspective about these questions. Dr. Mikovits has dedicated her life to being a research scientist in honor of her grandfather who died of cancer when she was a teenager. Dr. Mikovits earned her BA from University of Virginia and Ph.D. in Biochemistry and Molecular Biology from George Washington University.

In her 35-year quest to understand and discover ways to treat chronic diseases, she has studied immunology, natural products chemistry, epigenetics, and virology and drug development. In just over twenty years she rose from an entry-level lab technician to become director of the lab of Antiviral Drug Mechanisms at the National Cancer Institute before leaving to direct the Cancer Biology program at EpiGenX Pharmaceuticals in Santa Barbara, California.

There in 2006, she became attracted to the plight of patients with Chronic Fatigue Syndrome and autism. In only five years she developed the first neuroimmune institute from a concept to a reality and is primarily responsible for demonstrating the relationship between immune-based inflammation and these diseases. She has published over 50 scientific papers. [9]

I asked Dr. Mikovits to summarize the retrovirus controversy and the government's effort to cover-up the existence of certain retroviruses. She stated it this way:

Evidence of retroviruses is found in 6% of the population – 20 million Americans. They were introduced through the blood supply and vaccines into the human population. These viruses are associated with many diseases. So if you look at how they [our government] are going to fix that problem — they just approved Cerus to clean up the blood supply and they just approved their filtering technology to clean up the vaccines. They want you to believe that gamma-retroviruses are all gone... [10]

Dr. Mikovits' Career Destroyed for Telling the Truth

Dr. Mikovits is not just one of the leading scientists in the area of retrovirus related illness, she stands at the center of a scientific controversy and political battle that has ended her career as a government-funded research scientist. She spoke the truth about the fraudulent use of government research money, the marketing of inaccurate retrovirus tests, Medicare fraud, the contaminated blood supply, and the harm that is associated with vaccines and their schedule of administration. Her research showed how retroviruses are linked to the plague of modern illnesses that are bankrupting the U.S. healthcare system.

The result of her unwavering determination to stick to the truth of her research and to stand up against those who want to keep the truth hidden, resulted in her being taken to criminal court and civil court. She was gagged for four years by fabricated criminal charges in Nevada, and could not speak openly about retrovirus science or the government cover-up without risking further persecution/prosecution.

The Ugly Truth the Government Opposed – Attacks Begin

The unfolding of the saga began in the summer of 2009 when she attended a meeting of scientists from the highest levels of the scientific community. All the government agencies involved with matters of human health were represented. Leaders from various research institutes and universities were present. They were experts in the field of virology and disease prevention and treatment. (See the reference at the end of this article for the list of participants.) [11]

During the time allotted to Dr. Mikovits, she described the results of her most recent research that would soon be published in the esteemed journal, *Science*. She drew an association between the XMRV mouse retrovirus and Chronic Fatigue Syndrome.

Two months later Dr. Mikovits and two other scientists presented evidence to the federal government that a retrovirus might underlie autism spectrum disorder.

When her article about gamma-retroviruses and myalgic encephalomyelitis/Chronic Fatigue Syndrome (ME/CFS) was published in October of 2009, it did not trigger government health officials to explain it to the public. Instead of acclaim, a vicious attack was launched against the findings of the presence of retrovirus in patients who had ME/CFS.

The attack was largely led by the psychiatric industry. They strenuously objected to a viral association with Chronic Fatigue Syndrome. They believed that ME/CFS was a mental illness without a physical cause. They believed that talk therapy and psychiatric drugs were the only answer for those who were disabled by this retroviral disease. They held to their belief even when patients required oxygen to survive and rarely had the strength to leave their homes because of intense weakness and pain.

A Wake-up Call to the Retrovirus Problem

HTLV-I: Pathogenesis

Genus: Deltaretrovirus (complex)

Genome: Multiple spliced RNAs for regulatory and accessory proteins

Pathogenesis:

- Asymptomatic in majority of individuals
- 5-8% lifetime risk of developing types of disease:
 - Adult T cell leukemia
 - Clonal malignancy of CD4⁺ T cells.
 - Long latency; Immune deficiency
 - Tax and HBZ needed for transformation
 - Inflammatory syndromes
 - HTLV-I associated myelopathy/Tropical spastic paraparesis
 - Uveitis
 - Arthropathy

At the 1st and only International Workshop on the XMRV retrovirus, held in September of 2010, Dr. Mikovits and a group of other scientist presented research that would become the basis for conducting an international multi-center study on XMRV retroviruses.

Among the research discussed at the meeting, was a study involving rhesus macaque monkeys that were exposed to XMRV. This was particularly valuable. It showed that the XMRV retrovirus quickly disappeared from the blood stream after exposure — presumably going into tissues. As with HIV/AIDS, immune stimulation caused the virus to reappear in the blood, where it could be detected again. The immune stimulant they used was an injection of bolus peptides that mimicked a vaccination. This provoked the virus and caused it to replicate to detectable levels, and presumably cause disease. [12]

Another study presented findings about infectious XMRV in the peripheral blood of children and their parents. The study contained 66 subjects: 37 parents and 29 children. 17 children had autism, a pair of twins had Niemann-Pick Type C (a neurodegenerative disorder), and 10 children were healthy siblings. The families lived in 11 different states. XMRV was detected in 55% of the people in the study. The age range of the infected children was 2 to 18 years. 17 of the children (including the twins) were positive for XMRV (58%) and 20 of the 37 parents

(54%) were positive for XMRV. 14 of 17 autistic children were positive for XMRV (82%). They noted that autism Spectrum Disorder (ASD), ME/CFS, and childhood neuroimmune disorders share common clinical features. [13]

This was earth-shattering news for autism parents, because it supported the theory that their children might have been harboring an undetected retrovirus in their immune cells that could be activated through vaccination. The immune challenge of a vaccination could have offset the body's delicate suppression of the retrovirus, bringing it out of hiding. For other children, a simple fever could have begun the immune cascade that led to autism. [14]

During Dr. Mikovits' presentation, she described her research and the research of others. Her research team found that 67 percent of ME/CFS patients in her study showed evidence of XMRV, and other researchers found that 86.5% of ME/CFS patients had evidence of infection by a broader group of retroviruses that were also linked to laboratory mice.

Dr. Mikovits and her team found that 3.7 percent of a healthy population showed evidence of XMRV infection, while colleagues showed that 6.8 percent of a healthy control population showed evidence of infection by a wider group of murine leukemia viruses. This meant that eleven to twenty-one million individuals in the United States were potentially infected by a group of related viruses that came from mice. [15]

Dr. Mikovits detailed how they'd found XMRV in a subset of ME/CFS patients in England, and that there was a need to understand more about replication and pathogenesis. There was also a great need to develop tools for screening and treatments. In response to a question about research controls from Dr. Francis Collins, head of the National Institutes of Health, Dr. Mikovits indicated that 5% of control samples taken from the London Blood Bank were positive for XMRV. [16]

When all the data and all the findings from this conference were put together, it was easy to see that there was a serious problem with retroviruses in the general population of the United States and Europe. The blood supply was contaminated, families were infected, and a very high percentage of people with ME/CFS, autism, and other diseases also had XMRV and similar retroviruses. Many other people had these viruses, but most were not yet sick.

The Multi-Center Retrovirus Study

Based on these findings, Francis Collins, head of the National Institutes of Health, mandated a multi-center study that would be directed by Dr. Ian Lipkin, who was the head of Columbia University's Institute of Infection and Immunity. At that time, Lipkin had been acclaimed the "World's Most Celebrated Virus Hunter." [17]

The Lipkin multi-center study would be a large scale study that on the surface would claim to investigate what was happening with ME/CFS and other neurological disorders in the United

States. However, physicians were instructed to use an unusual set of criteria to exclude patients from the study. They excluded patients with evidence of infection with HIV, hepatitis B virus, hepatitis C virus, *Treponema pallidum* (syphilis), *B burgdorferi* (the Lyme disease spirochete), medical or psychiatric illness that might be associated with fatigue, abnormal serum characteristics, and thyroid disease.

The study excluded the exact groups of patients who were most likely to be infected with the retroviruses. It looked as if the study was designed to fail.

Dr. Mikovits Fired As Research Director

Dr. Mikovits was one of the researchers involved in the multi-center study that took place during 2010 and 2011. She continued her research until the late summer of 2011 when she was asked by the head of the institute that housed her lab to approve fraudulent expenditures of federal research monies from her grant.

She also became aware that the retrovirus test, which was being marketed and sold by the owner of the institute, produced inaccurate results. She spoke out about these problems and was fired from her position at the end of September of 2011.

Jailed without a Warrant or a Charge

News report on Dr. Mikovits' arrest. Photo courtesy [KRNV News 4](#)

Dr. Mikovits was arrested 6 weeks later, and held in jail for 5 days without the opportunity for bail as a fugitive from justice. Eventually she was charged with stealing her own research notebooks. These notebooks contained all of her recent research about retroviruses. On the

day she was fired, she was locked out of her lab and offices while they were ransacked. They might have taken her notebooks, but a coworker understood what was going on and he temporarily secured Dr. Mikovits' notebooks as well as his own.

A research scientist's notebooks are a precious possession. Their value is equal to his or her professional credibility and personal integrity. The notebooks of Dr. Mikovits are important, because they contained the confidential names and addresses of every patient that had been involved in her gammaretrovirus research. They contain proof of the existence of gammaretroviruses and their connection with ME/CFS that no one could deny. Gammaretroviruses are one of the retrovirus families that cause chronic illness.

I won't go into the details of the court proceedings. But political corruption in Nevada and in the U.S. scientific research community made sure that Dr. Judy Mikovits would be silenced and financially destroyed. She and her husband lost everything. They now live in a rental unit in Southern California.

Results of the Multi-Center Retrovirus Study

Instead of finding that 67 percent of patients with ME/CFS had evidence of retrovirus infection, as Dr. Mikovits found in her study, or finding that 86.5 percent of ME/CFS patients had mouse leukemia type retroviruses as others had found – the Lipkin study found no association with disease. The Lipkin multi-center study, however, did confirm that 6% of the U.S. population is carrying retrovirus infections whether they know it or not. This finding was very significant. The study confirmed the findings from more than two decades of research, which consistently presented evidence of retroviruses in 4-6% of the population. The Lipkin study confirmed that 20 million Americans are carrying retroviruses. [18]

They didn't find an association with disease, because they excluded the groups that were most likely to have the retrovirus.

This multimillion dollar study funded with U.S. tax dollars successfully covered up the relationship between retroviruses and chronic disease, but it was not able to obscure the existence of retroviruses in the general population.

They didn't want to find an association with disease, because the government, Big Pharma, health insurance companies, and the conventional medical system did not want the truth to be revealed. The costs would be staggering if it became public knowledge that the healthcare system itself had infected 20 million people with a virus that was causing chronic illness, disability, suffering, and death.

Destruction of Dr. Mikovits' Work and Career

The publicizing of her unlawful arrest in the journal *Science*, which even included her mugshot, seriously damaged her professional reputation. This was followed by an attack on Dr. Mikovits' previously published work. Her 2009 article about gamma-retroviruses was formally retracted by the editors of the journal that published it because she dared show evidence how retroviruses remained hidden from detection, just as her research had shown more than two decades earlier that HIV could remain hidden from detection.

Dr. Mikovits has been unemployed since September 2011. Her career has been destroyed. No one will give her grant money for new research, because the government doesn't want to see any further research into any of the retroviruses that were created in laboratories and introduced into humans in vaccines, biological products, and food.

Dr. Mikovits Suffering but not Destroyed

As you might expect, Dr. Mikovits and her husband have experienced serious financial limitations during these years from the lack of employment income and the tremendous cost of legal fees. Dr. Mikovits has suffered, but her resolve has not been destroyed. She has been crushed economically, but her witness for the truth remains intact. Dr. Mikovits describes her situation this way:

Personally, we don't need much and we don't have much. There aren't many people who live a half block from the beach in the sunshine in a nice place. We are surviving, and [are ready] to do whatever it is the next thing that God wants us to do. So, I consider myself blessed. There were many dark days and I am sure there will be more dark days, but the story is not over and these viruses and diseases are not dead. [19]

Dr. Mikovits continues to conduct research. She doesn't need a lab to keep studying ME/CFS, autism, cancer and other diseases. She continues to provide consultations to patients with ME/CFS, to parents of autistic children, and to physicians who understand the truth of what her research revealed and are willing to act on it.

Dr. Mikovits and Dr. Jeffrey Bradstreet

Dr. Mikovits consulted with Dr. Jeffrey Bradstreet, M.D., who was one of the leaders in the treatment of autistic children. Dr. Mikovits describes her interaction with Dr. Bradstreet in the spring of 2015, shortly before his death. She had shared her research with Dr. Bradstreet and he had the courage to implement new treatments for his patients based in part on it. Dr. Mikovits stated:

I feel in the deepest part of my soul Jeff Bradstreet was suicided. That is shot in the chest with his own gun and thrown into that river. I saw him within two weeks of his death. We were at the autismOne conference this year and we were high fiving it. He said, "We are so close to a cure for autism."

I felt like I was back. I was in a place where I was no longer totally gun shy. I was not ducking every time I walked through a door. I was able to take my hat off. [Her hats were part of the disguise she used to hide.] [20]

Dr. Mikovits and her husband were followed, harassed, and intimidated. Someone tried to give her a gun shortly after she was fired to “protect” herself. She refused to touch it, because she didn’t want it to become a tool that someone might use to simulate her suicide as she strongly feels they did to Dr. Bradstreet and others.

Specific Questions Answered by Dr. Mikovits

I posed the following questions to Dr. Mikovits during my interview with her on December 14, 2015.

QUESTION: What would you want to tell people in America who have various neurodegenerative diseases and cancers that are associated with retroviral infection? What is your message for America concerning non-HIV AIDS?

The message is that there are a significant number of people who understand how to treat these diseases and they should understand that they are certainly not crazy and they are not imagining things. It’s certainly not genetic and it is not their fault. The most important thing is that so many people blame themselves – “If I had never let them give my kid that shot.” Don’t go there, because we can fix it.

I won’t ever give up. There are a lot of doctors around the world who trust us. They have seen the same things themselves and who are energized by our book and by the revelations [that have happened] since. We will keep on addressing the science.

These diseases are certainly not a death sentence. You don’t have to suffer forever. We are not giving up. We can end your suffering, and your potential can be used!

Please don’t kill yourself because it might seem like forever but we are not going to let it happen. I am not going to let the Lipkins of the world bury the people who were infected with retroviruses between 1975 and 2014. I am delighted that they are cleaning up the blood supply and they are cleaning up the vaccines but I am not willing to let the ones that got hurt die in vain, or have their families die. We care about all the families.

You have to try and realize that there is a bigger plan beyond you, and of course we all know there is a bigger plan beyond us, but it is hard to see sometimes in the insanity.

QUESTION: Please explain how the immune system functions in the presence of a retroviral infection and what has gone wrong when disease results?

The immune system's job is to clear pathogens. So, when the initial infection recedes, the immune system should put on the brakes so that you won't develop autoimmunity. Our immune system enables us to distinguish self from non-self — that is the whole goal. In cancer, the natural killer cells and cytotoxic T cells can't see the tumor any more. It is as if the tumor has a coat on and it is hiding from the immune system. So, the therapy is to teach the immune system to see the virus infected cell or the cancer cell [so it can do its job]. In those with diseases like ME/CFS and autism we are helping the immune system and other pathways regain their balance — their homeostasis.

That is what GcMAF does. It communicates with the macrophages. It's called macrophage activating factor, but in fact it is not really activating. It takes the amoeboid microglia — the bad guys — that are producing all the glutamate and inflammatory cytokines, and takes these microglia, and turns them back into ramified surveillance microglia. These are happy cells that are not producing all these toxic intermediates. [This means] GcMAF is actually a deactivating factor.

In the brain, the gamma-retroviruses infect the capillary endothelial cells. They don't even infect the microglia. Those infected cells produce factors which activate the macrophages and put them into an angry over-active state. When GcMAF is given it turns the angry macrophage back into a happy quiescent macrophage. This clears the damage even though the infected cells were not cleared, because we didn't target the brain endothelial capillary cells. We just quiet everything down and the virus will either become latent or we will clear it from the body. This works as long as we don't have too many infected cells that crash the entire system, as happens with HIV/AIDS. We learned that if HIV/AIDS patients get treated early enough before their immune systems are too badly damaged [they can have a normal life.]

QUESTION: In your book, *Plague*, you made the statement that as a Christian you felt that God had placed you in the middle of this controversy for a reason. Do you have any more thoughts about that at this point?

I believe in God, I trust in the promises of the Bible, and believe that there is justice from God. Thus, I don't care what anyone says, I know the truth and God knows the truth. Sometimes God places people in situations where you just simply obey. I don't pretend to understand. God did it for a reason and I trust that ultimately that is for good.

I had to see a lot of other things, and a lot of tough things about myself. This has been a very dark time, and you do question everything about your faith. I can't even comprehend the evil of some of what happened and continues to happen. But I try not to go there, I just trust God. So as far as God goes, I am good with God. I know I am not dead yet and therefore I have a job to do. I have to keep living the horrors that I live every day. Those horrors are just seeing those sick people. I must never give up trying to help them. I get to see the people who can't afford the antiretroviral drugs or any treatments — people suffering alone in dark rooms. I get to talk with this young woman later today whose entire family is sick. I see this family and

this woman who is sick-sick-sick and all someone has to do is try an antiretroviral drug or an immune modulator like GcMAF and maybe she can have a life. I see all that potential wasted, all the suffering. That's why we wrote *Plague*, in hopes of ending the suffering, not as I always thought I would in a laboratory but using the voice stolen from millions.

QUESTION: Do you do consulting work on an individual basis?

Yes — MAR Consulting, Inc. We post everything there. We don't charge fees. We do have contribution buttons. We put people together with doctors. We put people together with other people who have supplements or therapies that can help. We look at the patient's history. We look for the prime problem for each person, since the diseases are heterogeneous.

We put together our knowledge on supplements and therapeutics. If we can, we put them together with a doctor in their area who will work with us. We work with doctors. There are doctors that pay us just to talk with us about difficult cases. They ask us, what would you do in this case? There are patients that ask me to talk with their doctors. I can be busy 24/7.

FINAL QUESTION: What is the future for retroviral research?

The real big and sad part is that the field will die. If you don't fund it, it doesn't get done. Our government grants are policed from the beginning by the CDC, NIH, FDA and the various agencies to make sure that nobody says retrovirus. It seems like a case of David and Goliath, but I can sit here and say maybe with arrogance or simply with confidence, we know the truth and we are not going to give it up!

If you need more proof about the existence of retrovirus infection and non-HIV AIDS, and want more proof of government corruption in health research, I invite you to read the book, *Plague*.

Treatment Options for Retroviruses

People with Chronic Fatigue Syndrome, autism, and the other non-HIV AIDS diseases have been successfully treated by physicians who step out of the box of conventional medicine and who are willing to take risks on behalf of their patients.

The risks to health care workers are real. Untimely death from unnatural sources is a real possibility. Persecution from medical peers and medical boards are real possibilities. However, it always must be kept in mind that there is evidence of retroviral infection in 20 million Americans. These people have a strong likelihood of developing some form of non-HIV AIDS, and that chance increases with every day they live.

Treatment is focused in two areas. Antiviral substances (natural supplements or pharmaceuticals) are used to reduce the viral population. Anti-inflammatory agents (natural

substances or pharmaceuticals) are used to quiet the immune system and restore its normal functioning.

[20] IBID.

As warm weather begins to take hold, we hit 76 degrees in central KY today and the fear-mongering is likely to subside as the public begins to see that the numbers do not add up. At the same time we see an increase of government legislation that will very soon require mandatory vaccination unless the public wakes up. This has been one giant psyop to see how much fear would effectively disrupt life and normalcy. This was a Beta-test for a bigger event come September when the weather turns colder.

Several big-pharma companies are saying a vaccine will be available in weeks to a few months at most. The people have been psychologically conditioned to race to their doctor for the vaccine in September or October. The Corona virus has been a classical Hegelian Dialectic: Problem - Reaction - Solution! The elite create the problem, the public call for action and then the government provides the solution. This tactic has been around since the 1840's. It was first used by the Marxist Communists Karl Marx and Vladimir Lenin! The lesson you need to heed is this: DO NOT TAKE ANY VACCINE - IT WILL CONTAIN THE KILL SHOT WHICH CAN BE ACTIVATED BY 5G 60-gigahertz EMF!

Consider yourself warned!

Blessings,

Pastor Bob, EvanTeachr@aol.com

These are about to disappear as well with the coming “cashless society” 5G 60-gigahertz will fry you like a well-done burger on your backyard grill.

We are told the public wants 5G. That is less than a half-truth. The government wants greater control over peoples’ lives. It’s really about surveillance! Always ask, who benefits? The military wants driverless trucks; commercial trucking wants driverless trucks, etc. The airlines want remote controlled airplanes; the railroads have been experimenting with long-haul freight trains without engineers and conductors for five years. It’s not about whether you get your Netflix movies in 5-seconds or 3-minutes. That is all a ruse. The U.S. discovered how China controls its population with their 5G cell phones.

Recently, a number of news sources begun to discuss the obscured health effects of 5G millimeter wave technology and now we begin to learn that 5G doesn't merely represent faster speeds and more data, it takes the surveillance state to such an extreme, it beggars belief.

Brigadier General Robert S. Spalding, author of *'Stealth War'* explains, *"If you go back to 2007, when the iPhone came out, the top 5 [corporations], in market cap were AT&T, General Electric, Microsoft, Exxon, Mobil and Shell."*

"The iPhone comes out in in 2007...I had one – 3G networking – it's not a very good experience. 4G network comes out...now, you've got something, right?"

"When you took the platform, which was the iPhone married up to the 4G network, which is the pipe for data – and it was a fast enough pipe – and now, you can create the apps services and business models that in 10 years, led to the top 5 [corporations] in market cap being Facebook, Amazon, Netflix, Google and Microsoft (FAANGs)..."

"Look at that iPhone: It's a hardware-software, tightly-integrated, closed-walled system, like Steve Jobs liked – and the data was encrypted. Why was the data encrypted? Why did San Bernardino happen? Because Apple's an American company...they encrypt the phone...it's meant to be a private device. Why? It's an American product. Fast-forward to 2009. China starts to look at that and says, 'Okay, we want to dominate the next level, not just the technology, we want the app services and business models to be Chinese companies'."

“So, Huawei gets hundreds of billions of dollars to develop 5G and ZTE – and then you have Baidu, Alibaba and Tencent.”

“So, they’re there, behind the Chinese firewall. They’re protected. You can’t have the FAANGs going in there. It’s just the BATs that control the economy within China... China...”

“So, you walk into a restaurant after you’ve ordered your food and a camera picks you up and it says, ‘David, welcome. Here’s your food.’ So, you you’re starting to get the feel of what a 5G world is.”

“And what is a 5G world? The platform is the network. So, this is mobile computing, paired with the pipe. 5G is computing and networking combined, on the same platform.”

“So, this (points to cellphone) goes away. You walk outside your door and you say ‘Uber.’ You don’t get on your phone and say, ‘I want an Uber.’ The camera picks up your face or microphone picks you up...then the Uber shows up...That’s what 5G is.”

“In the Uber, there’s a camera on the car that sees you, knows who you are. Doesn’t have to ask you your name you get in and you go to wherever you want...”

“In the 4G world, this (indicating cellphone) is a platform. It’s yours. You don’t want to be built [into it]. You don’t want to be part of all of that data...If you don’t want all that data to be out there about what you’re doing, just don’t carry one of these, right? Just opt out.”

“In a 5G world, you cannot opt out...In the 5G world, not only can you not opt out, because it’s built around the city, it’s not in your phone, anymore.”

“Not only can you not opt out, you don’t know who owns the data. Everything that you do can be watched and...by 2022, there’s going to be...two people for every camera in China.”

“They have a billion...cameras in China with Artificial Intelligence for facial recognition. So all of this is getting built right now in China – and who’s helping them do it? Microsoft, Google, right? All of these companies that want to deploy this world into our country!”

“So, 4G network, 10,000 devices per square mile. 5G network, 3 million devices per square mile...the connectivity explodes.”

“So, that allows you to put devices literally everywhere, that can make your life more ‘convenient’ or can track you...you never have to carry a wallet, you never have to carry key. It’s all done on your phone. You can pay anybody anywhere for anything – and they do.”

“900 million people are on WeChat and they spend 90% of their time in-app, doing things...that’s how wired Beijing is right now.”

The Wuhan Virus And 5G 60 GHz Are Binary Weapons

It becomes necessary for people to understand the point, that the virus is more than a hoax. It was and is a “Plan-Demic”. Gene sequencing has confirmed that this virus contained two elements of SARS and two elements of HIV. The virus is a binary weapon, a bio-weapon, created in a Bi-level 4 laboratory. It was designed to kill, especially older people with weakened or compromised immune systems related to other health disorder issues.

With 1.7 billion people in the world under quarantine (and India about to make that 3 billion) and desperate to find out where on the coronavirus “curve” they are to calculate how much more pain there is, JPM has made an attempt at a (very nonscientific) visual representation of where on the curve the main COVID-19 outbreaks in the world currently stand.

The good news: China is now well into the recovery phase, although since any and every number out of China is a lie, we would ignore any reports that the covid pandemic in China is easing especially after a spate of recent indications that China is openly manipulating its infection numbers.

Also good news: Korea is almost “over the hump”, and absent new clusters emerging in the next few days, should be in recovery.

Now the not so good news: both Italy and Iran are in the “late accumulation” phase. If they fail to halt the breakout at this point as the recovery phase approaches, it will get very ugly as much of the local population could then be infected.

Behind Italy and Iran is the rest of Europe, with Spain, Germany, France, and the UK all in the acceleration phase. The onus is on them to execute successful lockdowns.

Finally, the bad news: both the US and India are at the very start of the curve and things will get much uglier in the coming weeks before they get better.

Figure 1: COVID-19: Schematic chart

Source: J.P. Morgan.

Some more observations from JPM:

Global infections accelerated 14% d/d or 45,495 new cases over the last 24 hours to 381,499 according to Johns Hopkins, implying the global curve may be gradually shifting toward an early acceleration stage. The U.S. (13,060 d/d), Spain (6,368 d/d), Italy (4,789 d/d) and Germany (4,183 d/d) reported the most new infections.

In Asia, China's Hubei reported one new infection after 5 days of no new increase. As recent infection spike in Hong Kong SAR and Singapore suggests, as long as the global infection curve is developing, premature relaxation of heightened community risk awareness could set off a rebound of a controlled infection curve or a second infection wave.

From that vantage, China's full lift on Wuhan city on 8-Apr bear's close watching in our view as infections may appear to persist in society for at least one month.

In ASEAN, 212 new cases were reported in Malaysia, taking total infection to 1,518. Our epidemiology model suggests a mid-April infection peak. Our Australian team reviewed the strategy taken by the government and introduced an epidemiology model, forecasting a possible peak in new cases around 15 April.

Finally, as we noted last night, Trump is now eager to recreate China's experience and reopen the economy in under 2 weeks to avoid a second great depression. Needless to say, this will be problematic unless the US shifts into the recovery phase by then. It may surprise the reader that JPMorganChase does modeling of the Corona virus. Well don't be. In 1968, I interviewed for an actuarial position with a bank in Pittsburgh, PA. At the time I was beginning my final year for my bachelor's degree. I was a pre-ministry student with a triple major: history, business, and computer/mathematical science. This entire Corona virus will disappear any time soon, if at all. It will condition people for taking the "Mark" of the Beast vaccine. I did a multi-segment on **"5G and the Biblical Mark of the Beast."**

MARK OF THE BEAST

- **Revelation 13:17 (KJV)**
17 And that no man might buy or sell, save he that had the mark, or the name of the beast, or the number of his name.
- **Revelation 14:11 (KJV)**
11 And the smoke of their torment ascendeth up for ever and ever: and they have no rest day nor night, who worship the beast and his image, and whosoever receiveth the mark of his name.

Even though the coronavirus pandemic has literally caused countries to shut themselves down – this hasn't stopped the "Race to 5G". In fact – the pandemic is actually accelerating it.

"5G carriers claim that the coronavirus pandemic has actually increased demand for wireless bandwidth and thus make it ever more important to quickly rollout 5G towers around the nation to increase wireless capacity." – Technology News Editor.

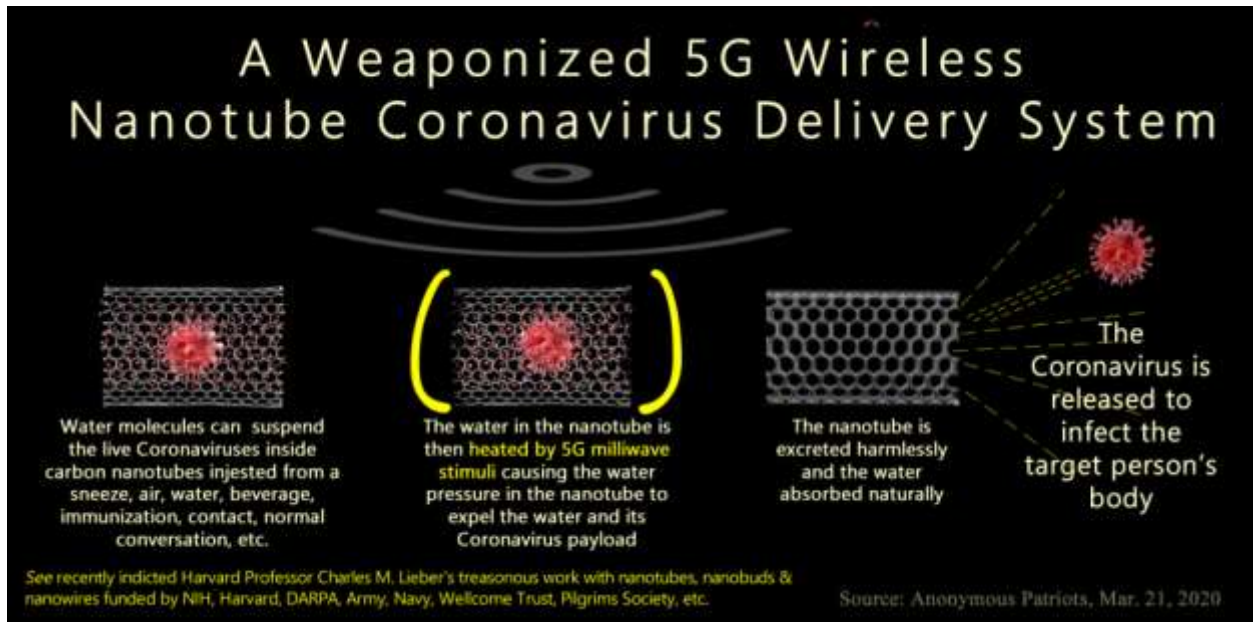

In March 2020 everything that could be moved online already has, from elementary schools to college classes, from entire company workforces to shareholder meetings. Whole cities have emptied under the coronavirus threat as businesses tell employees to work from home, students are sent indoors to learn online and every type of entertainment — from restaurants and sporting venues to movie theaters — shutters, forcing people to stay home and rely on their home broadband networks to interact with the outside world.

This switch-over is unprecedented, which begs the question: Can our current networks handle the strain? Moreover, is the coronavirus outbreak and the "social distancing" required to mitigate the spread going to become the business case for more advanced and

robust **5G** technologies for a future in which business, health care and human interaction must be at more than an arm's length?

In February 2019 the telecom industry admitted that they don't even have scientific evidence that **5G** is safe. Yet many of the powers-that-be still insist that humanity desperately needs this technology. So this desperate need even includes launching satellites to blast it from space. The telecoms argued that so long as **5G** did not burn the skin it was safe, which goes counter to the concept of **5G** 60-gigahertz microwave, which heats from the inside out. Before it even burns the skin, it has already fried the inside!

The team at American Intelligence Media and Americans for Innovation unearthed an incredible story that goes back to 2001 in which a weaponized **5G** Wireless Nanotube Coronavirus Delivery System was invented. Although I am not a scientist, those who are indicating this is how **5G** was used to deliver the Corona virus. That is huge news and answers many questions.

You are unlikely to understand much of this but it was developed back in 2001. THE SELF-ANOINTED GODS AMONG US: DARPA, C.I.A. & the Senior Executive Services (SES) directed by the Anglo-American Pilgrims Society & British Privy Council weaponized Harvard/IBM nanotubes, **5G** and social networking (to trigger weapons) for use as a bio-weapon through illegal secret meetings named the Highlands Group.

They even described their planning in a website (since taken down, archive link below)

They weaponized crypto-currency in the same meetings (Goldman Sachs, Philip J. Venables)

(...but Patriots captured the site and have since obtained sworn affidavits from whistleblowers who attended).

Let Patriot policy makers know that the SES and Pilgrims Society are planning to kill us all—just like Prince Phillip wanted—with a killer virus. How? Delivered via nanotubes and triggered by 5G via your social networking profile.

THE NEW YORK TIMES:

In another step toward post-silicon computers, IBM scientists have built a computer circuit out of a single strand of carbon.

The IBM circuit performs only a single simple operation - flipping a "true" to "false" and vice versa - but it marks the first time that a device made of carbon strands known as nanotubes has been able to carry out any sort of logic. It is also the first logic circuit made of a single molecule. Another year of research is needed before IBM can even evaluate whether a

practical computer chip can be manufactured from nanotubes, said IBM's Dr. Phaedon Avouris. This was reported in 2001, two decades ago. We can only imagine how this has advanced since and how they plan to reduce the world's population.

But the fact that the researchers were able to build the circuit raises hopes that nanotubes could eventually be used for computer processors that pack up to 10,000 times more transistors in the same amount of space. The processing power of computer chips has consistently doubled every year or two as the size of transistors continues to shrink. But current chip-making technology is expected to run up against fundamental physics limits in 10 to 15 years.

Dr. Charles M. Lieber, a professor of chemistry at Harvard, called the IBM achievement "quite significant." The effort to incorporate nanotubes in computer chips is a "great strategy and one that could be implemented relatively quickly," he said. Dr. Charles M. Lieber, is the Harvard professor arrested by the FBI for his work for the Chinese in Wuhan, China, for building a Bio4 Level lab for the Chinese government.

The IBM researchers present their findings yesterday at a meeting of the American Chemical Society in Chicago. An article describing the results will appear in the September issue of the journal Nano Letters.

Unbelievable, You are just "wet-ware"

These documents show that their authors have a total disdain for humanity. These define people as "wet-ware." In this world view, a human is merely a silicon chip surrounded by a membrane of carbon and water.

These are the people who are planning to take over the world.

Read for yourself:

Here are two lines captured from the actual patent:

This requires hardware, software and wet-ware (people)—the procedures and protocols). The PFN TRAC system is a

FIG. 2—[U.S. Patent No. 6,965,816, Col. 3, Lns. 5-6.](#)

I am including two drawings from one of the previous articles on 5G technology showing how the Internet of Things is being connected to the 5G 60-gigahertz. The technology is complex, even for those of us who have some technical background in computers and science.

We are on the threshold of a system that we cannot opt out of. Be prepared to face the decision very soon to take the Bill Gates ID2020, and I can state with accuracy it does contain the "Mark" of the Beast. Every electronic device bears a UPC bar code on it or inside it. The Chinese may have in the Wuhan Corona virus removed dissidents from society with the bio-weapon engineered by Dr. Charles Lieber and his colleagues at Harvard, Johns Hopkins,

Pirbright Institute, the University of North Carolina, the Highlands Group, the Queen's Privy Council, the CIA, SES, SERCO, Bill and Melinda Gates Foundation, the House of Rothschild.

QUATERNARY WEAPON SYSTEM: Global Pandemic Fabricated via COVID-19, 5G, Chemtrails & Vaccines
COVID-19 Bioweapon,
5G Energy Weapon,
Chemtrail Chemical Weapon
& Flu Vaccine Hybrid Weapon
All Fully Integrated Into a
Quaternary Weapon System
to Depopulate and
Lock Down Planet Earth
COVID-19 Coronavirus, 5G 60 GHz Millimeter Wave,
Chemtrail Smart Dust and Vaccine-Delivered Digitized RNA
Form a Quaternary Weapon System Launched
to Shut Down a Targeted City or Nation,
Commit Genocide, Depopulate
or Start an ELE
ELE = Extinction Level Event

**The WHO / UN Agenda
21/30 Depopulation plan
via 5-G 60 ghz millimeter
waves and Toxic Corona
"Virus" vaccine Injections**

The State of the Nation stated, *"The best way to understand why the coronavirus pandemic exploded worldwide in the very same year that the military deployment of 5G was greatly advanced in China, Italy, South Korea, United States and other IT-savvy nations is to view them both as a binary weapon system, which are then coordinated with vaccine programs and chemtrail operations to function as a quaternary weapon system."*

Only when viewed through the "quaternary weapon system" lens can the apocalyptic events of 2020 be properly comprehended and successfully responded to.

5G & COVID-19

[The Wuhan Virus And 5G 60 GHz Are Binary Weapons](#)

The following personal testimony is presented in order to gain crucial insight into what's really going on wherever a coronavirus cluster mushrooms out of nowhere ... right in the middle of a typically urban 5G-intensive zone.

The excerpt below from a previous SOTN exposé offers some critical perspective on how the direct relationship between the Wuhan coronavirus outbreak and the accelerated 5G roll-out which took place in Hubei Province during 2019. By the way, why was that military deployment of 5G in Wuhan deliberately speeded up just before the coronavirus outbreak the December?

"China was long ago set to be the 5G showcase for the world. Major metro areas and technology hubs like Wuhan were selected to be official 5G Demonstration Zones. Only such a

microwave towers would permit a citywide build-out of the Internet of Things. 2019 was the year Wuhan, the capital of Hubei, was “expected to have 10,000 5G base stations by the end of 2019, said Song Qizhu, head of Hubei Provincial Communication Administration”. [1] Then the coronavirus hit, so the whole world was told. What really happened was that a new variant of the coronavirus was released in Wuhan after the 5G experimenters saw an epidemic of 5G Syndrome explode. The 5G guinea pigs were literally dropping like flies as soon as they flipped the 5G switch. The ERs and urgent care clinics were overwhelmed. The 5G scientists watching the burgeoning public health crisis immediately activated Plan B: Blame it on a virulent flu—a bioengineered coronavirus that produces symptoms similar to 5G Syndrome.”

— Intelligence Analyst and Former U.S. Army Officer

(Source: [Wuhan coronavirus pandemic STAGED to cover-up the public health crisis caused by the intensive 5G roll-out in Wuhan in 2019](#))

The connection between **5G** and the coronavirus has been firmly established and can no longer be ignored, especially by smartphone-addicted Americans. In point of fact, many smartphone users suffer from either a low-grade **5G** Flu or full-blown **5G** Syndrome. In both cases, they are usually unaware of the primary cause of their chronic illness—their smartphone, wireless home environment and/or workplace WiFi.

Now add COVID-19 into the mix. Clearly, the result is a highly consequential global predicament the mainstream media has labelled the coronavirus pandemic. However, what we’re really seeing is a new manmade plague called Coronavirus Syndrome. See: **CORONAVIRUS SYNDROME: The Ultimate Genocidal Bioweapon System**

These synchronistic developments regarding both **5G** Flu and **5G** Syndrome and the rapidly intensifying coronavirus outbreaks throughout the USA and world-at-large are well explained in the following excerpt.

KEY POINTS: **5G** Syndrome is a much more serious medical ailment than **5G** Flu. **5G** Syndrome represents a much more extensive list of severe symptoms, some of which are life-threatening. However, as the whole world has witnessed, **5G** Flu can also kill you—FAST—depending on your overall health profile and the strength of your immune system. That’s why the elderly and infirm succumb to **5G** Flu so quickly ... and children seem to have a natural immunity.

Nonetheless, it’s **5G** Syndrome that is the quiet killer because of how many symptoms will occur completely under the radar over years. Also, many of those symptoms will be routinely misinterpreted as other disease processes by medical and holistic doctors alike. This kind of

misdiagnosis and under-diagnosis by physicians everywhere has occurred over several decades regarding Electrohypersensitivity illness, often by the intentional design of the Medical-Big Pharma Complex.

Then there are those individuals who suffer from both **5G** Flu and early-onset **5G** Syndrome; they're the ones dropping like flies in Wuhan, China. Their addiction to smartphones and other wireless devices blinded them to the adverse health effects caused by the sudden influx of **5G** energies (which include extremely high radiofrequency signal ranges and ultra-strong microwave transmissions) when they flipped the switch in 2019 in Hubei Province.

In general, **5G** Flu is more of an acute illness whereas **5G** Syndrome is a long-term, chronic disease. They mutually support and feed off each other which is what makes them so dangerous and increasingly fatal. A person who has **5G** Syndrome is much more susceptible to contracting **5G** Flu. And, a person with **5G** Flu is a good candidate for developing **5G** Syndrome.

One who repeatedly gets the Wuhan coronavirus (or **5G** Flu), as many Chinese sufferers have to date, will exhibit a greater likelihood of developing **5G** Syndrome; that is, if they don't already have a case of it. The extraordinary re-infection rates for COVID-19, also known as the coronavirus bioweapon triggering **5G** Flu, offer compelling circumstantial evidence that it's really an electromagnetic radiation-driven disease more than a bioengineered coronavirus; although, it's really both co-factors working in tandem to turbo-charge each other.

Truly, the 'inexplicable' re-infection rates tell the hidden back story about this swiftly unfolding pandemic. The only plausible reason for multiple re-infections, when compared to all previously studied coronavirus outbreaks prior to the Wi-Fi era, is that the former COVID-19 patients have stepped back into their wireless environment, they live in a **5G** hotspot, they are creating their own IoT and/or they still sleep with their smartphones — TURNED ON — under their pillows.

5G Syndrome insidiously develops over a period of sustained exposure to a **5G** power grid and/or usage of even a small-scale version of a home-based IoT or a full-scale office build-out of the Internet of Things. The longer any individual sits in those unsafe levels of **5G**-disseminated EMFs and microwaves, the more likely they will experience the evolution of their own unique form of **5G** Syndrome. Eventually, they will become vulnerable to not only **5G** Flu (i.e. Wuhan coronavirus), but also to the whole host of other bioengineered flu strains and naturally occurring influenzas.

The most critical point here is that every long-term, habitual smartphone user is at great risk for developing either **5G** Flu and **5G** Syndrome, or both. During the annual flu seasons, they will be more susceptible than others to any type of influenza that passes through the neighborhood, especially one of the various coronaviruses.

(Source: CORONAVIRUS SPECIAL REPORT: Worldwide Outbreaks of **5G** Syndrome and **5G** Flu Driving Pandemic)

Super-Vaccination Agenda

First, it's of paramount importance to understand that the *Super-Vaccination Agenda* has been implemented since World War I. Secondly, that vaccines represent a profound assault against the human body often with consequences that are irreversible. In numerous cases, children are killed by these toxic formulations, just as adults can be debilitated for life by a single flu vaccine. *Does anyone know for sure what's in these Big Pharma-manufactured chemical and biological time bombs?!*

Vaccines, especially flu shots, play an integral part in this Quaternary Weapon System. The annual flu vaccine, that's aggressively pushed each and every year because it's so vital to this global depopulation scheme, contains a cocktail of harmful biological material and unsafe chemical compounds. Some of the vaccine ingredients are nano-sized particles that are both digitized and controllable by remote, which can wreak havoc with the human immune system.

The elderly are quite easily scaremongered into receiving their annual flu shot. With each flu vaccine, they are injected with "*digitized, controllable RNA*", which can then be activated by **5G**-disseminated 60-GHz millimeter wave bands. This is why older folks who get the coronavirus are totally incapacitated so quickly, with a high percentage of them dying in short order.

Even the mortality rate for young adults is increasing, especially for those who have been regular flu shot recipients and are regular smartphone users. Children in the United States are now exhibiting a much higher infection rate than other countries because of the vigorously enforced childhood vaccination schedules and wireless home environments. The extraordinarily high incidence of ADD and ADHD, Autism and Asperger's, Dyslexia and Developmental Disabilities are all proof of the extreme neurological impacts from the dangerous vaccines mandated for delicate babies and fragile young children.

The American people, collectively, are the biggest victim of the *Super-Vaccination Agenda* in the world because of the overwhelming political power and corporate influence of the *Big Pharma-Medical Complex*. Hence, a significantly higher infection rate and mortality rate can be expected from COVID-19 in all 50 states, particularly in those cities and counties with the

most vaccine compliance, **5G-intensive power grids**, **chemtrailed skies** and coronavirus releases.

KEY POINT: When a practicing physician like Dr. Thomas Cowan, M.D. (see photo above) discusses the direct connection between the coronavirus and **5G**, it's time to pay close attention. His compelling video presentation can be viewed here: [M.D. Physician Says Coronavirus Likely Caused by 5G \(Video\)](#).

Conclusion

What other conclusions to this transparent scheme to manufacture a global pandemic while staging a 24/7 panic can there be?

Yes, there are [these hidden and not-so-hidden agendas](#) being implemented during 2020; however, G E N O C I D E with the explicit intention to D E P O P U L A T E the planet on the way to a global L O C K D O W N are the main goals of the *New World Order* globalist cabal.

Here's a much more detailed discussion of this multi-decade, international, criminal conspiracy to rule the entire planetary civilization via genocidal enterprises that variously employ biological, chemical and frequency warfare: [CORONAVIRUS SYNDROME: The Ultimate Genocidal Bioweapon System](#).

Who else could fund, develop and systematically launch a "QUATERNARY WEAPON SYSTEM" over the past 100 plus years but the [International Banking Cartel & Crime Syndicate](#). That's right, no other international entity exists that could also keep this crime spree completely covered up by their wholly owned and controlled media. See: [Nothing changes until those who secretly rule US are prosecuted for 9/11, JFK, OK City, 5G, Chemtrails, Vaccines, COVID-19....](#)

[State of the Nation](#)

Editor's Note

For an in-depth treatment of this bioengineered pandemic and staged panic from the very beginning in Wuhan, China, please consult the following compilation of investigative news reports: [OPERATION CORONAVIRUS PANDEMIC: A Comprehensive Series of Exclusive Exposés, Big-Picture Analyses and Health Warnings](#)

Recommended Reading & Key Reference

For those who might disagree with my view on 5G and the Corona virus "Plan-Demic" Crimes Against Humanity, you should watch the YouTubes by Dr. Barrie Trower of the UK, former head of the UK military radar program. As a professional in the field he can answer all your doubts. There are two new books that have come out in the past two months that are devoted to this issue of EMF and toxic radiation. These are very helpful in getting to the root of the issue. These are *'The Invisible Rainbow – A History of Electricity and Life'* by Arthur Firstenberg, and *'EMF*D 5G – 5G, Wi-Fi & Cell Phones: Hidden Harms and How to Protect Yourself'* by Dr. Joseph Mercola.

Below is a Twitter message confirming that all Chinese citizens were given mandatory vaccinations in 2019. The telecom industry will go to great lengths to cover up for their crimes against humanity. At some point down the road it will suddenly dawn on the public as they begin to experience the symptoms of 5G sickness.

I hope that this will open your eyes to the dark diabolical efforts and technology being created to depopulate the world, and you need to be prepared for the Biblical "Mark" of the

Beast that will be pushed out there to alleviate the fears of millions that will believe the vaccine will be their salvation. As I said, the vaccine will be the "Kill Shot".

The Chinese were all given mandatory vaccines last fall. The vaccine contained replicating, DIGITIZED (controllable) RNA which were activated by 60Ghz mm 5G waves that were just turned on in Wuhan (as well as all other Countries using 60Ghz 5G) with the "smart dust" that everyone on the globe has been inhaling through chemtrails. That's why when they say someone is "cured", the "virus" can be "digitally" reactivated at any time and the person can literally drop dead. The Diamond Princess Cruise ship was SPECIFICALLY equipped with 60Ghz 5G. It's basically remote assassination. Americans are currently breathing in this "smart" dust through chemtrails. Think of it like this..... add the combination of vaccines, chemtrails (smart dust) and 5G and your body becomes internally digitized and can be remotely controlled. A person's organ functions can be stopped remotely if one is deemed non-compliant. Wuhan was a test run for ID2020. The elite call this 60Ghz mm 5G wave the "V" wave (Virus) to mock us. Trump has created a space force in part to combat this weaponized technology. We need to vehemently REJECT the attempted "mandatory vaccine" issue because our lives depend on it.

From reports from as far away as Finland and Iceland, we are learning that the Corona virus has mutated from its original Wuhan, China strain. The evidence revealed in this article is suggesting that the originators of the virus had the capability of making any attempts to develop a vaccine independent of the patented vaccines owned by Pirbrite Institute and the CDC.

The fact that the Corona virus was released just as the city of Wuhan was turning up its 5G 60-gigahertz system to optimum energy output is suspiciously viewed as a cover to deliver a kill shot with the initial vaccine in such a way as to hide the 5G sickness that comes at the level of 60-gigahertz. It has been shown and demonstrated that 60-gigahertz energy consumes 98% of the oxygen in the lungs preventing the hemoglobin from bonding with the oxygen molecules. Death comes instantly for the elderly, those in poor health, or compromised immune systems. It is obvious that the eugenicists behind this have enabled

the marriage of electricity with that of biochemistry, molecular biology, genetics, all to mask the real cause of death.

Reports of pathological labs where autopsies have been done suggest that many deaths are not from the Corona virus, but from health related issues. Pathologists in Milan, Genoa, and Venus are saying 89% of fatalities are from those over 80 and having a history of other health issues.

Blessings,
