

CDC Deception Scam On Covid-19 / 5G Sickness

This article refutes the claims of the CDC, NIAID, NIH, and their respective directors along with the bovine excrement super-spreader of Microsoft Bill Gates. I have included a number of pieces of information that suggest the public has been deceived about the truth concerning the so-called Covid-19 virus. IT IS ALL A GLOBAL SCAM and this should serve as a warning to those thinking about taking any vaccines.

Nov 21 (Reuters) – The U.S. Centers for Disease Control and Prevention (CDC) said on Saturday it recommended that all people avoid cruise ship travel as the risk of COVID-19 on liners is very high.

The CDC advised passengers who decide to go on a cruise should get tested 3-5 days after their trip and stay home for 7 days after travel, even if they test negative.
<https://bit.ly/2US9P5O>

Last month, the agency issued a framework for a phased resumption of cruise ship operations after a no-sail order issued in March in response to the novel coronavirus pandemic was to expire.

The CDC said earlier that from March 1 through Sept. 28, data showed “a total of 3,689 confirmed cases of COVID-19 or COVID-like illness cases on cruise ships and 41 deaths.”

To me, this statement by the CDC borders that of a confession “disclaimer” that taking a cruise can or will result in being diagnosed with the Corona virus, given the reported confirmed cases of infection and death! Think about it, 2019 was a record year for the cruise industry, and yet there were no “infections or deaths” from what was only installed on the 320+ cruise ships that sail the blue seas, i.e., the addition of 5G EMF RF radar antenna. This latest addition of enhanced global communications for Wi-Fi, Video, and Cell communications was installed during the summer of 2019 and activated in the fall of 2019.

The medical evidence was further confirmed November 20th, 2020, that the U.S. Navy reported that **15,000 U.S. sailors were infected this year through November 18th**. Oh yes, and all those U.S. Navy vessels are equipped with the latest 5G enhanced radar antennas, distinctively sporting their large white globes which shield the radar antenna from the weather elements of dust, fog, rain, snow, sea mist, cloud coverage, etc. 5G has an Achilles Heel: It uses a millimeter narrow-band wave spectrum, like a school-teacher’s laser pointer used in the classroom. A person placing a sheet of copy paper in front of the signal beam can break all communications. The only way to get

around the issue is to install those protective globe covers and modulate the energy level needed to breech the plastic globe cover.

Norwegian-owned cruise-ship operator SeaDream Yacht Club has canceled all sailing for the remainder of 2020 after positive COVID-19 test results onboard one of its cruises, it said on Tuesday, dealing a fresh blow to the cruise industry.

The decision follows an outbreak of the novel coronavirus aboard a voyage of its SeaDream I vessel in the Caribbean last week.

"7 guests and 2 crew members have tested positive for Covid-19 by Barbados health authorities," SeaDream said in a statement.

Requirements for multiple negative PCR tests from guests before boarding had not been sufficient to prevent COVID-19 onboard, it said.

"The company will now spend time to evaluate and see if it is possible to operate and have a high degree of certainty of not getting COVID," it said.

SeaDream Yacht Club said in September it planned to become the first luxury cruise operator to resume sailing in the West Indies, with 22 voyages planned from Nov. 7 onwards. The SeaDream 1 was in Barbados, tropical waters where the temperatures were in the mid-to-high 80-degree range, with rain on Wednesday, November 18th, when it reported 7 passengers and two crew members were reported sick. The picture on page 3 is of the SeaDream II, sister ship of SeaDream 1.

Cruise ships were home to some of the earliest clusters of infections of the novel coronavirus as it spread globally early this year, shutting down much of the cruise industry. The cruise industry generates \$150-dollars a year. Yet, Carnival Cruise is selling two of its cruise ships, and notes this; it is sending 16 more to the scrap yards in Turkey!

SeaDream Yacht Club, founded by Norwegian investor Atle Brynestad, operates two luxury vessels, each with a capacity of up to 112 passengers.

5G Wireless satellites enabled the cruise industry to offer its customers worldwide global communication for cell phone, Wi-Fi data, and television/radio communications around the world. Previous to the installation of 5G, cruise ships had a blind spot, which amounts to 10-15% of the extreme latitudes of either polar region. If you were taking an Alaskan cruise, it meant limited communications. 5G eliminated this blind spot and virtually all 320 cruise ships in service were equipped with the enhanced communications technology of 5G. Now they are faced with a number of options:

1. Remove the new 5G Wireless completely
2. Operate 5G at diminished levels by modulating at reduced energy levels
3. Go bankrupt and scrap their cruise ships

Keep in mind that 5G when operated at greater than 5-Gigahertz [just above what is emitted by a smart phone and less than an airport security body scanner at 10-Gigahertz] the risk for sickness and death escalates significantly. It is a medical fact that 5G modulated and turned up to 60-Gigahertz will consume 98% of the oxygen in a person's lungs. This fact is extremely important variable in understanding as to who gets sick or dies. The other two important factors that are extremely important is the age of the person and the distance between the 5G antenna and the person's cabin.

Those who really were victims of Covid-19, all suffered blue complexions and actually died of Hypoxia, or the loss of oxygen. The data accumulates with the passing of time, and that this is really due to the absence of oxygen.

As it continues to build and implement its plan to meet the requirements of the [Framework for Resuming Cruise Ship Operations Order issued on Oct. 30](#) by the Centers for Disease Control and Prevention (CDC), today Carnival Cruise Line notified guests and travel agents that it has canceled additional 2021 cruises, including:

- All embarkations from U.S. homeports from Jan. 1-31.
- Additionally, Baltimore, Charleston, Jacksonville, Long Beach, Mobile, New Orleans and San Diego embarkations through Feb. 28.
- Embarkations on *Carnival Legend* out of Tampa through March 26.

According to [a press release](#), Carnival is in the process of building a gradual, phased-in approach to resume guest operations, which will focus initially on Miami and Port Canaveral, to be followed by Galveston. Consistent with CDC protocols, *Carnival Horizon* arrives in Miami this week, and *Carnival Breeze* will be the next ship back to the U.S. In total, 16 Carnival ships are currently following the CDC process for an eventual resumption of guest service in the U.S. in 2021, including *Carnival Conquest, Dream, Ecstasy, Elation, Freedom, Glory, Liberty, Miracle, Panorama, Pride, Sensation, Sunrise, Sunshine and Vista*.

The ship *Mardi Gras*, which is under construction in Finland, is still expected to enter service in 2021.

With this announcement, Carnival's operations are paused in the U.S. through Jan. 31, 2021. Carnival previously cancelled operations in Australia through March 2, 2021.

"We are committed to meeting the CDC requirements and keeping our guests and business partners informed of our progress," said Christine Duffy, president of Carnival Cruise Line. *"The entire Carnival team appreciates the great support of our guests,*

travel advisors and business partners, and local officials in our homeports and destinations.”

COVID: The Virus That Isn’t There: The Root Fraud Exposed

by Jon Rappoport

Jon Rappoport posted this in a follow-up to [an](#) article he posted the day before, in which he exposed the fact that the CDC does not have the COVID coronavirus in its possession, because it is “unavailable.” *“Their word, not mine.”*

The CDC is admitting the virus hasn’t been isolated. In other words, its existence is unproven. [This confirms the CDC has not used the “Gold Seal” standard to follow the Koch Postulates, a prerequisite to call any pathogen a virus.]

You need to realize the CDC, during its own published confession (see below), is discussing this explosive situation in the context of instructing the world how to perform the PCR test.

The test to detect a virus that isn’t there.

This would be on the order of NASA issuing a guide for navigating a fleet of ships to a planet whose existence has not been established—and the population of the whole world is going to board those ships for the voyage.

The CDC is saying: here is how you detect the virus in a human, here is the test on which we’re going to rely, here is the test on the basis of which we’re going to identify all case numbers and demand all lockdowns—except we don’t have the virus.

Why don’t they have it?

Because they can’t isolate it. That’s obvious.

If they could isolate it, they would.

Let’s not tap dance around this central fact. Let’s not make excuses for the CDC. They have a problem the size of Jupiter. It’s their problem, not ours. But they’re foisting their problem on us, in the form of a STORY ABOUT A PANDEMIC. AND ALL THE LOCKDOWNS THAT FLOW FROM THE STORY.

To say this is unacceptable is a vast understatement. The CDC is committing a crime that has no bounds.

For months, I've been writing about the "missing virus" and the studies that should be done to prove it exists—real-world studies that have never been done and will never be done. Now, here is the smoking gun.

I'm aware that many scientists and doctors, who are otherwise exposing the pandemic as a fraud on legitimate grounds, don't want to touch what I'm revealing here. I would remind them that, months ago, when some of us were already exposing the PCR test as unreliable and useless and deceptive, THAT ISSUE was too hot to touch. But now it isn't.

The issue of the existence of the SARS-CoV-2 virus may seem as if it's too hot, but it isn't. It's time to launch a full-on attack. Immediately.

The truth is only bitter for those who are hiding it.

I'm also aware there are people who have been building scenarios about how the virus is "activated." Certain frequencies wake it up, and so on. Well, the question is: WHAT VIRUS? THE ONE THAT ISN'T THERE?

Still other people would say, "Then what are all these scientists sequencing in their labs, if it's not the virus?" Again, not our problem. They might start with a piece of RNA, and then claim, without proof, it's part of SARS-CoV-2; and they go to work on it. They claim anything they want to. It's not science.

If a mechanic says he has a piece of a fender from a car that has never been seen before; if he claims he knows the car exists; but he can't show you the car; are you going to buy his story? Are you going to invest your life-savings and life-savings of your family and friends in this car he admits is "unavailable?" Are you going to invest and go broke and sit in your home and wear a mask and keep your distance from other people and close your business and declare bankruptcy? Are you going to consent to that?

Another question that arises: if the virus is missing and has never been isolated, has never been proved to exist, what are they putting in the COVID vaccine? That's a question that should be answered by law-enforcement agencies raiding many facilities and seizing materials and finding honest scientists who will discover what is really in the COVID vaccine brews. Waiting for that to happen...the sun could go dark first. In the meantime, do you want to take the shot in the arm?

Some people have claimed there are "animal models" which prove the coronavirus exists and is harmful, because the animals become sick, when they are "injected with the virus." This is incorrect on two counts.

First, the animal models are supposed to progress through various species, until they arrive at animals that most closely resemble humans; chimps. The animal models being cited are mice or hamsters, which are very, very low on the totem pole.

Second, what are these mice being injected with? It's supposed to be pure virus. But instead, it's a soup which contains all sorts of material, including chemicals. The chemicals could be causing the animals to become ill.

Here is my breaking story about the virus that isn't there, from yesterday:

The Smoking Gun: Where is the coronavirus? The CDC says it isn't available.

The CDC document is titled, "[CDC 2019-Novel Coronavirus \(2019-nCoV\) Real-Time RT-PCR Diagnostic Panel.](#)" It is dated July 13, 2020.

Buried deep in the document, on page 39, in a section titled, "Performance Characteristics," we have this: "Since no quantified virus isolates of the 2019-nCoV are currently available, assays [diagnostic tests] designed for detection of the 2019-nCoV RNA were tested with characterized stocks of in vitro transcribed full length RNA..."

The key phrase there is: "Since no quantified virus isolates of the 2019-nCoV are currently available..."

Every object that exists can be quantified, which is to say, measured. The use of the term "quantified" in that phrase means: the CDC has no measurable amount of the virus, because it is unavailable. **THE CDC HAS NO VIRUS.**

A further tip-off is the use of the word 'isolates.' This means NO ISOLATED VIRUS IS AVAILABLE.

Another way to put it: **NO ONE HAS AN ISOLATED SPECIMEN OF THE COVID-19 VIRUS.**

NO ONE HAS ISOLATED THE COVID-19 VIRUS.

THEREFORE, NO ONE HAS PROVED THAT IT EXISTS.

As if this were not enough of a revelation to shock the world, the CDC goes on to say they are presenting a diagnostic PCR test to detect the virus-that-hasn't-been-isolated...and the test is looking for RNA which is PRESUMED to come from the virus that hasn't been proved to exist.

And using this test, the CDC and every other public health agency in the world are counting COVID cases and deaths...and governments have instituted lockdowns and economic devastation using those case and death numbers as justification.

If people believe "you have the virus but it is not available," and you have the virus except it is buried within other material and hasn't been extracted and purified and isolated, these people believe the moon is made of green cheese.

This is like saying. “We have the 20 trillion dollars, they are contained somewhere in our myriad accounts, we just don’t know where.” If you don’t know where, you don’t know you have the money.

“The car keys are somewhere in the house. We just don’t know where.” Really? If you don’t know where, you don’t know the keys are in the house.

“The missing cruise missile is somewhere in the arsenal, we just don’t where.” No. If you don’t know where, you don’t know the missile is in the arsenal.

“The COVID-19 virus is somewhere in the material we have—we just haven’t removed it from that material. But we know what it is and we’ve identified it and we know its structure.” NO YOU DON’T. YOU ASSUME THAT.

Science is not assumptions.

“But...but...there is a study which says a few researchers in a lab isolated the virus...”

They say they did. But in July, the CDC is saying no virus is available. I guess that means trucks were not available to bring the virus from that lab to the CDC. The trucks were out of gas. It was raining. The bridge was washed out. The trucks were in the shop. Joe, the driver, couldn’t find his mask, and he didn’t want to leave home without it...

Science is not assumptions.

The pandemic is a fraud, down to the root of the poisonous tree.

Many physicians, virologists, researchers, contend the view that is expressed here by Jon Rappoport, Jon is a medical journalist researcher. Dr. Tom Cowan came out in July, 2020 with a new book ‘The Contagion Myth: Why Viruses (including Coronavirus) Are Not the Cause of Disease’. The case for electrical energy sickness was presented in Dr. Arthur Firstenberg’s book ‘The Invisible Rainbow: History of Electricity’. An important book on the false “Germ” theory issue, published in 2020 is the second edition of ‘Virus Mania’ by Torsten Englebrecht and Claus Kohnlein, MD. They are German nationals that expose the fraudulent virus “Germ” theory of Louis Pasteur.

The media is as much at fault for its fear-mongering. As an example, the NBC affiliate in Pittsburgh, PA, channel 11 daily email news reports predominantly reports one figure – new cases. Here is their report for Monday, November 23, 2020:

PITTSBURGH — Pennsylvania’s positivity rate has climbed to 11.1% with its seven-day case increase of over 36,000 new cases and 63 of the state’s counties with substantial transmission status, according to the Pennsylvania Department of Health.

Pennsylvania reports 4,762 new cases Monday, in addition to 7,075 new cases reported Sunday for a two-day total of 11,837 additional positive cases of COVID-19. The statewide total is now 314,401.

The state is also reporting a two-day total of 68 additional deaths bringing the number of people who have died from COVID-19 across the state to 9,870.

#COVID19 Update (as of 11/23/20 at 12:00 am):

- 11,837 additional positive cases of COVID-19 (11/22 & 11/23)
- 314,401 total cases statewide
- 9,870 deaths statewide
- 2,705,170 patients tested negative to date

— PA Department of Health (@PAHealthDept) November 23, 2020

The statewide percent-positivity is up from last week's 9.6%. Every county in the state, including those in our area, has a concerning positivity above 5% except for one county. The only exception is Cameron County.

The number of cases of coronavirus cases of kids ages 5 to 18 was also up last week, with 3,937 new cases reported.

Of the confirmed cases reported between Nov. 8 and Nov. 14, 10% provided an answer to the question as to whether they spent time at a business establishment.

Of those who did provide an answer, 1.4% answered yes, they visited a business establishment 14 days prior to onset of symptoms:

- 48% reported going to a restaurant.
- 24% reported going to some other business establishment.
- 15% reported going to a bar.
- 14% reported going to a gym/fitness center.
- 7% reported going to a salon/barbershop.
-

Pennsylvanians visiting other states are required to have a negative COVID-19 test within 72 hours prior to their return to the commonwealth or to quarantine for 14 days upon return to Pennsylvania.

Allegheny County is reporting a two-day total of 962 new coronavirus cases bringing the total number of cases in the county to 24,086.

This is the COVID-19 Daily Update from the Allegheny County Health Department (ACHD) for November 23, 2020. In the last 48 hours, 962 new cases were reported to the Health Department. Of these, 792 are confirmed cases from 4,146 new PCR tests. There are 107 probable cases.

New cases range in age from one month to 100 years with an average age of 42 years. The dates of positive tests ranged from Nov. 10 to Nov. 22. Three tests are more than a week old.

No new deaths were reported Monday.

It is this last line of the NBC channel 11 report that becomes disturbing, and indicting and suggests the daily noon news reports are designed to scare and frighten the public so as to support the CDC narrative that this is a pandemic and people. We are after all in the cold and flu season.

Another economics web site, reported the following for November 23, 2020:

The U.S. new cases 7-day rolling average is 13.6 % HIGHER than the 7-day rolling average one week ago. U.S. deaths due to coronavirus are now 22.3 % **HIGHER** than the rolling average one week ago. U.S. hospitalizations due to COVID-19 are now 17.6 % **HIGHER** than the rolling average one week ago. Today's posts include:

- U.S. Coronavirus New Cases are at an elevated 157,471
- U.S. Coronavirus deaths today fell to an elevated **883**
- U.S. Coronavirus hospitalizations are at a record 83,870

Note in the daily post for this site above is the death figure of **883** for today. Is that especially significant for some reason since according to the United Nations World Population Prospects report, approximately **7,452** people die every day in the United States? In other words, a person dies in the US approximately every 12 seconds. In earlier articles on the Coronavirus, I included mortality rates

Can any government statistics on COVID-19 deaths be trusted? Citing an article from '*The Canadian Free Press*', major issues exist about what and how "cause of deaths" are recorded.

It is an open question now that we are learning that the highly respected, world-class Centers for Disease Control and Prevention (CDC) have been lying to us all along.

CDC openly admits that it is fudging the COVID-19 death figures. This revelation comes a few days after an article appeared here at [American Thinker](#) that New York City was lying about COVID-19 deaths. The normal rules about reporting deaths have been violated by that city in the rush to inflate the body count, presumably to steer more taxpayer money to the Big Apple.

That the CDC isn't telling the truth to Americans is no conspiracy theory: it's right out there in the open for everyone to see. The CDC openly admits that it is fudging the COVID-19 death figures.

We know this because, among other truth-tellers, a plainspoken small-town physician from Kalispell, Montana, has pulled back the curtain.

Dr. Annie Bukacek, MD, explained in a presentation how death certificates are made. (See “Montana physician Dr. Annie Bukacek discusses how COVID-19 death certificates are being manipulated,” [YouTube](#), April 6)

The system is deeply flawed.

Why should anyone care how a certificate of death is made?

Everyone should care *“today when governments are making massive changes that affect our constitutional rights and those changes are based on inaccurate statistics,”* Bukacek says.

The system is deeply flawed, she argues.

Few people know how much individual power and leeway is given to the physician, coroner, or medical examiner, signing the death certificate. How do I know this? I've been filling out death certificates for over 30 years.

More often than we want to admit, we don't know with certainty the cause of death when we fill out death certificates. That is just life. We are doctors, not God. Autopsies are rarely performed and even when an autopsy is done the actual cause of death is not always clear. Physicians make their best guesstimate and fill out the form. Then that listed cause of death ... is entered into a vital records data bank to use for statistical analysis, which then gives out inaccurate numbers, as you can imagine. Those inaccurate numbers then become accepted as factual information even though much of it is false.

This has been the way it has been done for some time, Bukacek says.

Dr. Bukacek is not the only doctor that has come forth publicly to report these deliberate fraudulent statistics. I have seen well over a dozen accounts reported by medical examiners and physicians being told to call a cause of death as Covid-19. It can't be just because Medicare pays ten times as much to a hospital for someone who dies on a ventilator than if just being diagnosed with the virus. There is something huge involved for so many people to lie and misrepresent the facts of this alleged virus, which has never once shown to be a virus. This is part of a global plan to shut down the world and institute fascist dictatorial authority. New York Governor Cuomo has to account for some 11,000 elderly lives that were snuffed out by his decisions. Events up to the present suggest that this alleged Covid-19 was about killing elderly people.

I have had four college and graduate school courses in statistics and probability and I can state unequivocally, having gone through ten pages of mortality data, it is extremely

difficult to get accurate measurements for various causes of death in relation to Covid. There is a common cliché that says figures lie and liars figure, and it is as common as a McDonald's "Big Mac".

Now, with the aid of charts released by the CDC, as well as CDC special reports, studies by schools such as Johns Hopkins University, crime statistics from the FBI, and coverage from a Breitbart News article, consider 10 other causes of death that literally eclipse the number of daily deaths involving a rifle. For my purpose here, all I want to illustrate is the daily mortality rate for the top ten causes of death, not daily deaths in which a rifle is the cause:

1. Daily Heart Disease Deaths: 1,773
2. Daily Cancer Deaths: **1,641**
3. Daily Medical Malpractice Deaths: **685**
4. Daily Accident Deaths: 465
5. Daily Lower Respiratory Disease Deaths: 439
6. Daily Stroke Deaths: 401
7. Daily Alzheimer Deaths: 332
8. Daily Diabetes Deaths: 229
9. Daily Drug Deaths: 192
10. Flu: 152

The official daily mortality rate for Covid-19 on page 10 is listed at **883**. When compared to the daily table, from official government data, Covid-19 falls between #2 (Cancer – **1,641**) and #3 (Medical Malpractice - **685**). That is about as accurate for comparison purposes as we are likely to get.

True figures have been skewed from the very beginning, when Medicare paid approximately \$4,000 for every hospital reported Covid-19 case, and \$39,000 for every case put on a ventilator. We learned months ago that the Chinese test devices were flawed, with as many as 90% false positives, and then issues with people testing positive one moment and a day later tested negative. Elon Musk said he was tested five times and each time the results were opposite of the day before. All the evidence points to Dr. Fauci, Dr. Redfield, Dr. Birx, and Bill Gates exaggerating the data, and as Jon Rappoport reported, they never proved the virus exists.

In November, 2022, the Portuguese courts ruled that the PCR test is unable to determine a Covid-19 infection. It was not long after the Chinese delivered faulty testers that major questions arose over the inability of the health agencies to provide an accurate means of confirming infections. This is likely related to the fact that Covid-19 is one of 40 so-called viruses in the SAR-CoV-2 family. This is what we have been told. As the time has passed, the evidence mounts; and, those who note that the various health agencies are not even following the standards in determining the existence of a virus, we deserve answers. They are operating not on true science, but rather "assuming" something that is not there exists, and as Jon Rappoport states, that is not science.

We really need to be investigating the crimes of Dr. Fauci, for paying the Chinese to achieve “gain-of-function”, or increase its lethality. He paid the Chinese Communist Party \$3.7 million for work he was instructed to shut-down. Then he paid an additional \$3.7 million to finish the job. We need to know why they have been spraying us with a Chemtrail soup for the past thirty years like the Air Force sprayed Vietnam jungles with Agent Orange. We are being distracted with a fake virus, taking the focus off the 5G EMF wireless that is harming people.

The CDC holds 27 patents on vaccines earn them \$6-billion a year in profits on vaccines the state require children to have in order to attend school. In the meantime almost half of all youth, 18 and younger have allergies and other side effects from vaccines. The Amish do not take vaccines and they have the best health of all! The rate of Autism has sky-rocketed over the past three decades, from merely a blip statistic to now where 1 in every 24 boys and 1 in every 36 girls have been diagnosed with Autism.

This game of hunt-and-kill Covid cases has reached peak absurdity, especially in media culture.

Take a look at Supermarkets are the most common place to catch Covid, new data reveals. It's a story on a "study" assembled by Public Health England (PHE) from the NHS Test and Trace App. Here is the conclusion. In the six days of November studied, "of those who tested positive, it was found that 18.3 per cent had visited a supermarket."

Now, if the alarm bells don't go off with that one, you didn't pay attention to 7th grade science. If the app had also included showering, eating, and breathing, it might have found a 100% correlation. Yes, the people who tested positive probably did shop, as do most people. That doesn't mean that shopping gives you Covid and it certainly doesn't mean that shopping kills you.

Even if shopping is a way to get Covid, this is a very widespread and mostly mild virus for 99.8% percent of the population with an infection fatality rate as low as 0.05% for those under 70. Competent infectious disease experts have said multiple times that test, track, and isolate strategies are nearly useless for controlling viruses such as this.

This story/study was so poor and so absurd that it was too much even for Isabel Oliver, Director of the National Infection Service at Public Health England. She sent out the following note:

Thank you. One down, a thousand to go.

The New York Times pulled a mighty fast one with this piece: “States That Imposed Few Restrictions Now Have the Worst Outbreaks.” This would be huge news if true because it would imply not only that lockdowns save lives (which no serious study has thus far been able to document) but also that granting people basic freedoms are the reason for bad health outcomes, an astonishing claim on its own.

The piece, put together by two graphic artists and seemingly very science-like, speaks of “outbreaks,” which vaguely sounds terrible: packed with mortality. It’s odd because anyone can look at the data and see that New York, New Jersey, Massachusetts, and Connecticut lead the way with deaths per million, mostly owing to the fatalities in long-term care facilities. These were the states that locked down the hardest and longest. Indeed they are locking down again! Deaths per million in states like South Dakota are still low on the list.

How in the world can the NYT claim that states that did not lock down have the worst outbreaks? The claim hinges entirely on a trivial discovery. Some clever someone discovered that if you reflow data by cases per million instead of deaths per million, you get an opposite result. The reasons: 1) when the Northeast experienced the height of the pandemic, there was very little testing going on, so the “outbreak” was not documented even as deaths grew and grew, 2) by the time the virus reached the Midwest, tests were widely available, 3) the testing mania grew and grew to the point that the non-vulnerable are being tested like crazy, generating high positives in small-population areas.

By focusing on the word “outbreak,” the Times can cleverly obscure the difference between a positive PCR result (including many false positive and perhaps half or more asymptomatic cases) and a severe outcome from catching the virus. In other words, the Times have documented an “outbreak” of mostly non-sick people in low-population areas.

There are hundreds of ways to look at Covid-19 data. The Times picked the one metric – the least valuable one for actually discerning whether and to what extent people are sick – in order to generate the result that they wanted, namely that open states look as bad as possible. The result is a chart that massively misrepresents any existing reality. It makes the worst states look great and the best ones look terrible. The visual alone is constructed to make it looks as if open states are bleeding uncontrollably.

How many readers will even know this? Very few, I suspect. What’s more amazing is that the Times itself already debunked the entire “casedemic” back in September:

Some of the nation’s leading public health experts are raising a new concern in the endless debate over coronavirus testing in the United States: The standard tests are

diagnosing huge numbers of people who may be carrying relatively insignificant amounts of the virus.

Most of these people are not likely to be contagious, and identifying them may contribute to bottlenecks that prevent those who are contagious from being found in time....

In three sets of testing data that include cycle thresholds, compiled by officials in Massachusetts, New York and Nevada, up to 90 percent of people testing positive carried barely any virus, a review by The Times found.

All of which makes one wonder what precisely is going on in this relationship between cases and severe outcomes. The Covid Tracking Project generates the following chart. Cases are in blue while deaths are in red.

The American Institute for Economic Research recently wrote:

"Despite this story and these data, the graphic artists at the Times got to work generating a highly misleading presentation that leads to one conclusion: more lockdowns.

(My colleague Phil Magness has noted further methodological problems even within the framework that the Times uses but I will let him write about that later.)

Let's finally deal with Salon's attack on Great Barrington Declaration co-creator Jayanta Bhattacharya. Here is a piece that made the following claim of the infection fatality rate: "the accepted figure of 2-3 percent or higher." That's an astonishing number, and basically nuts: 10 million people will die in the US alone.

Here is what the CDC says concerning the wildly disparate risk factors based on age:

These data are not inconsistent with the World Health Organization's suggestion that the infection fatality rate for people under 70 years of age is closer to 0.05%.

The article further claims that "herd immunity may not even be possible for COVID-19 given that infection appears to only confer transient immunity." And yet, the New York Times just wrote that:

How long might immunity to the coronavirus last? Years, maybe even decades, according to a new study — the most hopeful answer yet to a question that has shadowed plans for widespread vaccination.

Eight months after infection, most people who have recovered still have enough immune cells to fend off the virus and prevent illness, the new data show. A slow rate of decline in the short term suggests, happily, that these cells may persist in the body for a very, very long time to come.

How is it possible for people to make rational decisions with this kind of journalism going on? Truly, sometimes it seems like the world has been driven insane by an astonishing blizzard of false information. Just last week, an entire state in Australia shut down completely – putting all its citizens under house arrest – due to a false report of a case in a pizza restaurant. One person lied and the whole world fell apart.

Meanwhile, serious science is appearing daily showing that there is no relationship at all, and never has been, between lockdowns and lives saved. This study looks at all factors related to Covid death and finds plenty of relationship between age and health but absolutely none with lockdown stringency. “Stringency of the measures settled to fight pandemic, including lockdown, did not appear to be linked with death rate,” says the study, echoing a conclusion of dozens of other studies since as early as March.

It's all become too much. The world is being seriously misled by major media organs. The politicians are continuing to panic and impose draconian controls, fully nine months into this, despite mountains of evidence of the real harm the lockdowns are causing everyone. If you haven't lost faith in politicians and major media at this point, you have paid no attention to what they have been doing for the better part of this catastrophic.”

My family members tell me you can't change things and I should forget about my efforts to expose what really is driving the alleged Covid-19 agenda. I refuse to believe that one person cannot do anything. I write about this scam of 5G wireless energy being masked as a non-existent virus that has become the epitome of the “Silent Weapon for Quiet Wars”. I have posted as of Thanksgiving, 2020, ten segments to **“Depopulation the #1 Global Issue Since 1968”** and collectively they prove my point. I'm far from finished in this series, with loads of evidence that people are being excised [murdered] by environmental poisoning, which includes toxic wireless energy. I have written dozens of articles, shared other experts and professionals providing credibility to the lethal nature of wireless energy.

I may be past the Biblical definition of a full life; **“The days of our years are threescore years and ten; and if by reason of strength they be fourscore years, yet is their strength labor and sorrow; for it is soon cut off, and we fly away.”** - (Psalm 90:10). I have a bullseye on my back and everything you hear about 5G synthesizes to “Depopulation”. If you are over 65 you are expendable, but the people who control the WEF 4th Industrial Revolution are often themselves older than I am so their flowering speech masks the real goal is as the Georgia Guide Stones state: **“Maintain humanity under 500,000,000 in perpetual balance with nature.”**

DO NOT GET THE VACCINE!! To me, DEATH is better than being injected with the Covid-19 Vaccine. Death is not the end, but merely a door into the next phase of my consciousness. But at this point in time everyone faces the choice of where they will spend eternity. I have been a believer in Jesus Christ for almost six decades. Those who push the WEF and its 4th Industrial Revolution have replaced the Creator and replaced Him with an amazing pipe dream offering its own form of eternal life.

We who have read the Bible many times from front to back, know that We Win! The first and biggest mistake they make is to assume that they can be like God. When Lucifer tempted Eve, he promised her and Adam they could be like God.

The reader should understand that the mRNA vaccine and all of its components have a two-fold purpose for mankind.

1. Population control. Of this I have no doubt that many millions of people will die from this vaccine. This will most likely not happen immediately – no – that would be too obvious. I believe that many will die quickly, but that millions will become extremely ill with a Cytokine Storm (ultimate multi-organ shut down), and will die within weeks and months to a year or two into the Tribulation.
2. Merging humans and machines (transhumanism) Also known as Humans 2.0.

It is not accidental or incidental that the mRNA vaccine will change our DNA. Brethren, we are to be transformed into new creations. Certainly not the perfect creation of our Lord. He fashioned us in His likeness.

Satan means to fashion us in his evilness and to control us.

This is orchestrated by the devil himself. This will help him immensely when he reveals himself as the pseudo-messiah, or Antichrist. He will be able to read the minds of all transhumanists. Everything we are seeing now is in preparation of the revealing of the man of sin. Klaus Schwab, popes Francis and Sosa, eugenicist Bill Gates, the House of Rothschild, are merely captains serving their master. *“What the fourth industrial revolution will lead to is a fusion of our physical, digital and biological identity.”*

Schwab advocates putting chips in our heads so government can read our thoughts:

“And he causeth all, both small and great, rich and poor, free and bond, to receive a mark in their right hand, or in their foreheads:” (Revelation 13:16)

Martin Armstrong said, *“I’ve always wondered about the Scripture above which speaks of the “Forehead. Now we know, don’t we?”*

Martin Armstrong does not realize how close that is!

Blessings,
