

CRISPR

The Technology That Changes & Re-Writes Your DNA

Part 1

If you got a Covid-19 vaccine, you got something other than a vaccine. When you find out what you really had injected into your arm, you have serious reason for concern. The so-called vaccine is not a vaccine, and legally cannot be promoted as a vaccine. It is “Gene Therapy”.

Several prominent physicians, doctors, *Sons of Liberty Media*, Health and Wellness expert Kate Shemirani, her colleague Dr. Kevin Corbett, and I have postulated that the current experimental mRNA injection for coronavirus, aka COVID-19, could alter one’s genetic code or DNA. Bill Gates stated it, which was included in the video “[Human Genome 8 and mRNA Vaccine](#)” on Brighteon.com. It is one reason the term “experimental human genome altering mRNA injection” has been used to describe the jab being foisted onto the mostly unsuspecting public. They are not about to tell the public about CRISPR and 5G and the fact the mRNA does not have a “kill” switch!

While many in the media, Dr. Anthony Fauci and his merry band of chronic liars, and “fact checkers” have declared this claim as false, a video of a TEDx Beacon Street talk by Tal Zaks, chief medical officer of Moderna, Inc., one pharmaceutical company manufacturer of the experimental mRNA technology injection, confirms mRNA injection for COVID-19 **can** change your genetic code or DNA. This TEDx Beacon Street talk occurred in 2017. H/T to YouTube channel Silview Media Backup Channel.

Zaks calls it “**hacking the software of life**”. In the first minute of the video Zaks states, “we’ve been living this phenomenal digital scientific revolution, and I’m here today to tell you, that **we are actually hacking the software of life**, and that it’s changing the way we think about prevention and treatment of disease.” [Emphasis mine.] He even repeats that they (Moderna) think of it like an “operating system”, which the [Moderna website indicates as “Our Operating System”](#). He is equating it to a computer program!

At one minute in, Zaks states, “In every cell there’s this thing called messenger RNA or mRNA for short that transmits the critical information from the DNA in our genes to the protein, which is really the stuff we’re all made out of. This is the critical information that determines what the cell will do. So we think about it as an operating system. **So if you could actually change that, if you could introduce a line of code, or change a line of code**, it turns out, that has profound implications for everything, from the flu to cancer.” You have no idea to the length he is referring to about CRISPR/Cas9!

When “changing” a line of code or “introducing” a line of code” (referring to DNA), the “code” or DNA is then altered, meaning the individual or “subject” has now had their genome changed to what the “scientists” have coded. The individual or subject is no longer a creation of God but a creation of man, meaning the individual or subject could be the object of a “patent”. He goes on to say, the mRNA would tell the cells to “code” for the protein of the “virus”. This “viral protein” is foreign to the body. The individual’s body is making a foreign protein the immune system is to attack. When the body makes a protein the immune system then attacks, your immune system is attacking a protein your body is making, meaning what is occurring in an “auto-immune response” or “auto-immune disease”.

This has been repeated a number of times by experts, physicians, nurses and countless others. As readers can see, none of us were “whistling Dixie”. Zaks talks about turning this system on; however, there is no way to turn it off. When do the cells know to stop making this “viral protein”? The cells don’t; therefore, this continues for the duration.

In a normal vaccine, the immune system attacks the limited amount of “particles” in the adjuvant to produce antibodies or immune response that the body can recognize at a later time if the individual comes in contact with the same or similar “particle”.

The study Zaks cites at the 3:12 minute mark can be found and read [here](#). The abstract is contained on the [NIH Pub Med Library website](#). In the full text of the study on ResearchGate, the mention of “Luciferase” occurs on page 10. A crucial piece of information in this study is contained on page 4 – “Ferrets immunized with 200 micrograms and challenged [exposed to influenza H7N9 via IN (intranasal)] on day 49 had viral loads below the level of detection”. If a viral load was “below the level of detection”, two questions emerge: 1) did the ferrets even contract H7N9 through intranasal challenge; and, 2) if a viral load is below the level of detection, how do you know the animals even had a viral load? This would bring into question the efficacy of the injection.

Moreover, the studies Zaks cites as occurring in humans only lasted approximately 18 months. They were stopped because the animals in the study all died!

At about the 4:00 minute mark, Zaks begins discussing mRNA vaccines for cancer. Immediately following that, Zaks discusses a children’s condition where a gene or “code” is missing that causes production of a certain enzyme critical for metabolism where the current treatment is to transplant an entire organ – in this case, the liver. Zaks proposes to inject mRNA that codes for the missing gene, a gene contained in DNA on the human genome, it would “correct” the genetic defect.

Ask this question: what causes the cells/body to produce needed enzymes/proteins? Zaks answers that by saying the genetic code or DNA. So, mRNA has to alter a genetic code or the DNA for the body to produce the proteins of COVID-19 for the body to mount an immune response.

Out of the words of Tal Zaks of Moderna, mRNA can alter the human genome. Whether by design or “unintended consequences”, this technology is being used to do just that. He calls this “information therapy”; although, some would call it “mad science”. In attempts to “rewrite” genetic code to correct defects, studies have shown there were “cascading failures”. In other words, changing one “defective gene” in one genome caused other genes to “fail” or cause problems. And, it was not just one subsequent gene becoming defective, but many. This is more than likely why there are over 400 adverse events surrounding the experimental mRNA injection.

So, the next time someone claims these “vaccines” do not alter the human genome or DNA; you can refer that individual to Tal Zaks of Moderna, Inc. who claims otherwise.

For nearly a year now, I have been told by many people that you cannot change our DNA. My daughter-in-law thinks I do not know what I am talking about. She refused to read the evidence revealed by Moderna in 2020 that states their vaccine is in fact, “A Delivery System”. When I first read the Moderna statement last summer, my first question was, what is it that they are going to deliver in their “Delivery System.”

In the many articles that I have written on 5G EM wireless communications and Covid-19, I shared how 5G EM wireless energy could be beamed into the human cells through a process called “Electroporation”. 5G EMF is part and parcel of the military ADS or “active-denial-system”. Below is a larger truck mounted version of this ADS.

Informally, the weapon is also called the heat-ray since it works by heating the surface of targets, such as the skin of targeted human beings. Raytheon had marketed a reduced-range version of this technology. The ADS was deployed in 2010 with the

United States military in the Afghanistan War, but was withdrawn without seeing combat. There are smaller versions mounted on the smaller Humvee platform.

The ADS works by firing a high-powered (100 kW output power) beam of 95 GHz waves at a target, which corresponds to a wavelength of 3.2 mm. The ADS millimeter wave energy works on a similar principle as a microwave oven, exciting the water and fat molecules in the skin, and instantly heating them via dielectric heating. One significant difference is that a microwave oven uses the much lower frequency (and longer wavelength) of 2.45 GHz. The short millimeter waves used in ADS only penetrate the top layers of skin, with most of the energy being absorbed within 0.4 mm (1/64th inch), whereas microwaves will penetrate into human tissue about 17 mm (0.67 inch). Although described as a non-lethal crowd repelling weapon, it can deliver lethal energy if needed. It can kill you if needed!

My daughter-in-law is dead wrong but she chose to get the “vaccines” anyway. The hospital at which she works likely insisted that hospital employees be vaccinated for the “imaginary” Covid-19 virus. I say “imaginary” with good evidence that it has never been isolated and confirmed by the Koch Postulates. Others have chosen to follow the government and media’s cajoling to get the “vaccines” as well. My wife’s sons, and grandsons, (all first-responders with volunteer fire departments) got their shots. What I know does not make me feel any better but it will make a difference for me and my wife. We have no plans to take any vaccine, or so-called vaccine, or submit to any tester, under any circumstances. Any virus with a 99.995% recovery rate becomes suspect when the nations of the world are locked down over it. The mass of humanity are fear-mongered into social distancing, wearing useless masks, and coerced into being vaccinated smells worse than the real thing. Wearing face diapers violates OSHA laws and the insanity of mind control has been unbelievable.

Almost all of what I know about the so-called Corona virus, designated Covid-19 has come from published sources, videos, patent abstracts, and books that I have read on viruses, vaccines, immunology, DNA, genetics, biochemistry, molecular biology, and the evidence from overlapping scientific fields. But first I want to let you read and hear what the CEO of Moderna had to say. Moderna is Dr. Anthony Fauci’s favorite vaccine of choice from his own words last year. Fauci is financially invested in Moderna! He will earn millions from his royalties on the patents he owns.

Enabling Drug Discovery & Development

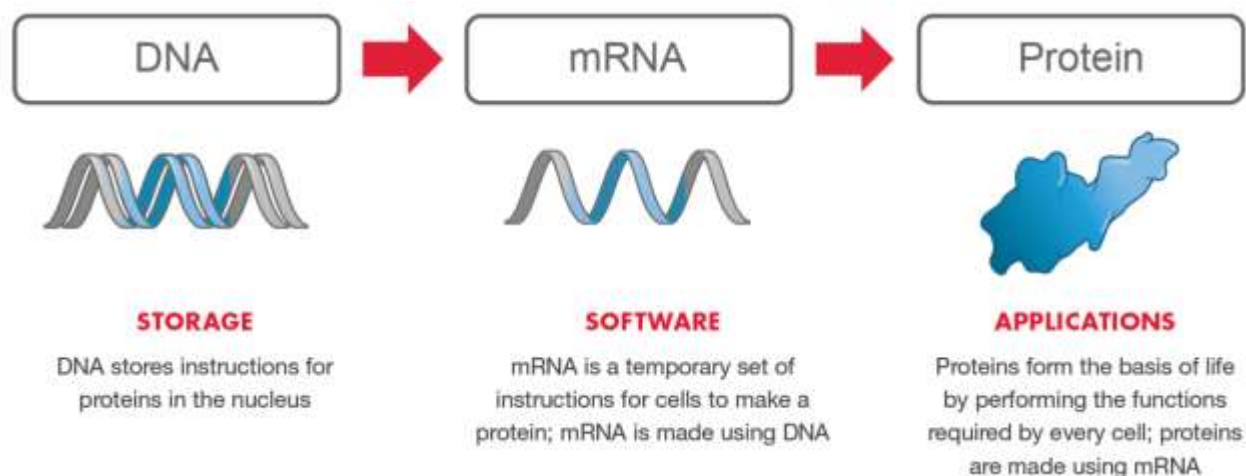

We built Moderna on the guiding premise that if using mRNA as a medicine works for one disease, it should work for many diseases. And, if this is possible – given the right approach and infrastructure – it could meaningfully improve how medicines are discovered, developed and manufactured.

Our Operating System

Recognizing the broad potential of mRNA science, we set out to create an mRNA technology platform that functions very much like an operating system on a computer. It is designed so that it can plug and play interchangeably with

different programs. In our case, the "program" or "app" is our mRNA drug - the unique mRNA sequence that codes for a protein.

We have a dedicated team of several hundred scientists and engineers solely focused on advancing Moderna's platform technology. They are organized around key disciplines and work in an integrated fashion to advance knowledge surrounding mRNA science and solve for challenges that are unique to mRNA drug development. Some of these disciplines include mRNA biology, chemistry, formulation & delivery, bioinformatics and protein engineering.

Our mRNA Medicines – The ‘Software of Life’

When we have a concept for a new mRNA medicine and begin research, fundamental components are already in place.

Generally, the only thing that changes from one potential mRNA medicine to another is the coding region – the actual genetic code that instructs ribosomes to make protein. Utilizing these instruction sets gives our investigational mRNA medicines a software-like quality. We also have the ability to combine different mRNA sequences encoding for different proteins in a single mRNA investigational medicine. [This is done with 5G and CRISPR.]

We are leveraging the flexibility afforded by our platform and the fundamental role mRNA plays in protein synthesis to pursue mRNA medicines for a broad spectrum of diseases.

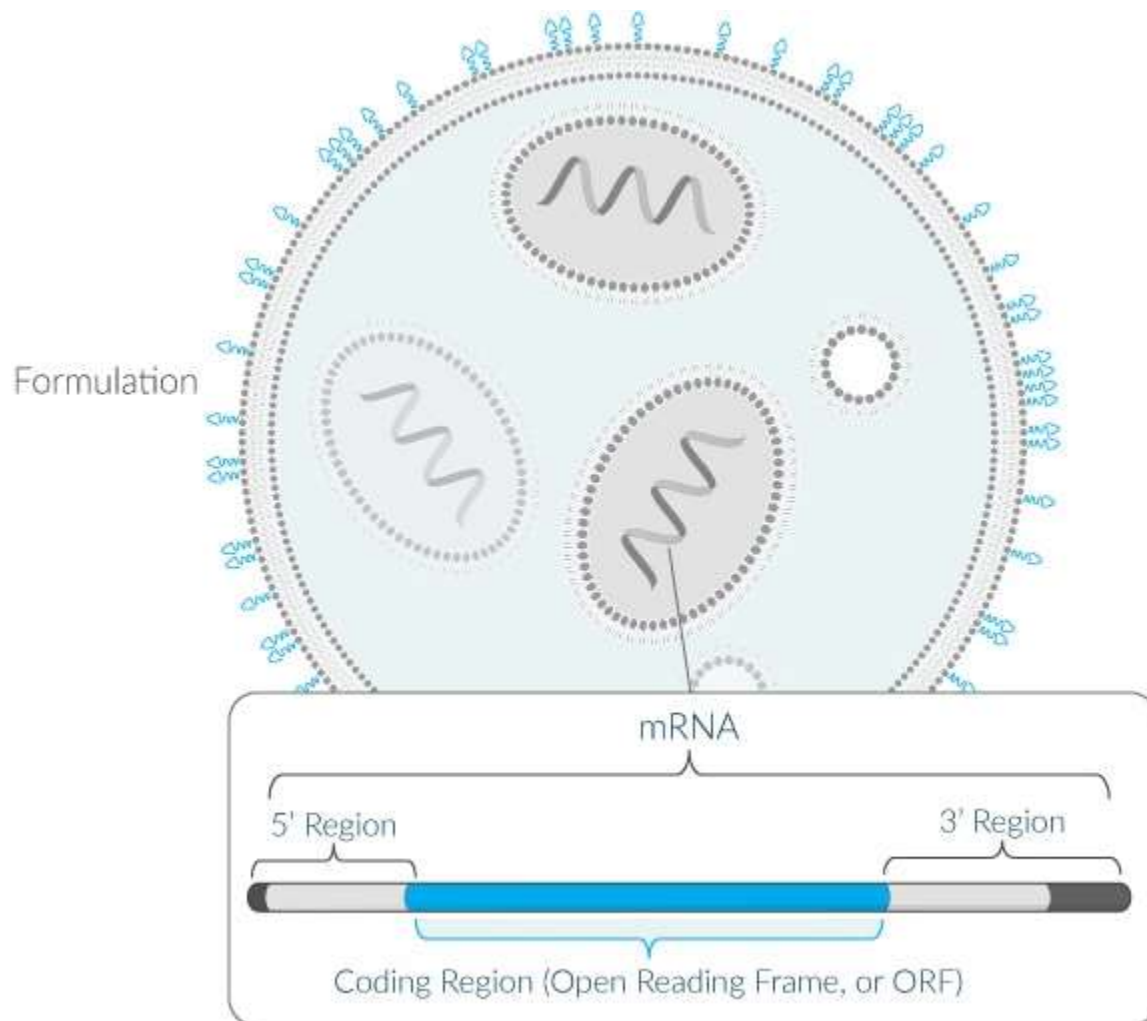

Within a given modality, the base components are generally identical across development candidates - formulation, 5' region and 3' region. Only the coding region varies based on the protein/s the potential medicine is directing cells to produce.

Learn how our [Research Engine](#) and [Early Development Engine](#) are enabling us to fully maximize the promise of mRNA to meaningfully improve how medicines are discovered, developed and manufactured.

Overcoming Key Challenges

Using mRNA to create medicines is a complex undertaking and requires overcoming novel scientific and technical challenges. We need to get the mRNA into the targeted tissue and cells while evading the immune system. If the immune system is triggered, the resultant response may limit protein production and, thus, limit the therapeutic benefit of mRNA medicines. We also need ribosomes to think the mRNA was produced naturally, so they can accurately read the instructions to produce the right protein. And we need to ensure the cells express enough of the protein to have the desired therapeutic effect.

Our multidisciplinary platform teams work together closely to address these scientific and technical challenges. This intensive cross-functional collaboration has enabled us to advance key aspects of our platform and make significant strides to deliver mRNA medicines for patients.

It sounds so wonderful; however, mRNA vaccines will be the thalidomide of our generation. Dr. Andy Wakefield, of the UK warns, *"This is not a vax, it is irresponsible genetic modification."*

Are the various Covid vaccines a genocidal bioweapon, covert tool of transhumanism, debilitating gene-altering drug, or all 3? From my perspective, they are all in the picture. That may be the chief reason for the confusion that seems to prevail in the minds of the experts as they weigh all the evidence and data. The Millennium Report posted a few days ago a State of the Nation report asking that very question:

GLOBAL COVID VACCINE PSYOP DESIGNED TO DECEIVE HUMANITY INTO TRANSHUMANISM AND WORSE

Posted on [March 14, 2021](#) by [State of the Nation](#)

Are the various Covid vaccines a genocidal bioweapon, covert tool of transhumanism, debilitating gene-altering drug, or all 3?

No one has ever seen before the blatant medical gas lighting of the whole human race.

[State of the Nation](#)

The unparalleled superlatives not only never cease where it concerns the **CORONAhoax**, they get even more extreme by the week.

Let's be clear: *The Powers That Be* desperately overreached in their utter desperation to deceitfully drug the entire global population with the Covid 'vaccines'. About this stark reality there is no doubt.

The unprecedented reports of vaccine injuries and deaths, in the wake of so many vaccination campaigns around the world, proves that the drive to jab every person on

Earth was a preplanned criminal conspiracy hatched at the highest levels of the *World Shadow Government*.

[COVID-19 VACCINE: A Slow-Motion Genocidal Bioweapon...](#)

The meticulously choreographed and expeditious roll-out of so many different variations of the Covid injections worldwide **only confirms that this psyop was an orchestrated black operation to poison and kill, injure and sicken humanity.**

Why, really?

But to perpetrate such a brazen naked aggression against humankind — IN BROAD DAYLIGHT, NO LESS — undoubtedly reveals that there is a much more hidden agenda behind [OPERATION COVID-19](#).

In other words, this obvious *Plandemic* is not even about implementing the highly nefarious scheme explained in the following exposé.

[FUNVAX: Globalist Plot to Mandate COVID-19 Vaccine Exposes Shocking Satanic Conspiracy](#)

Yes, the *New World Order* globalist cabal does have great urgency to subjugate the global population with annual FunVax injections, but even that, quite astonishingly, is not the real end goal.

Then what is it?

The power elite knows that something very ominous and exceedingly time-sensitive IS ON THE [EVENT] HORIZON. Otherwise, they would never have deployed the COVID-19 bioweapon across the planet with such a cavalier attitude and vulnerable biowar approach.

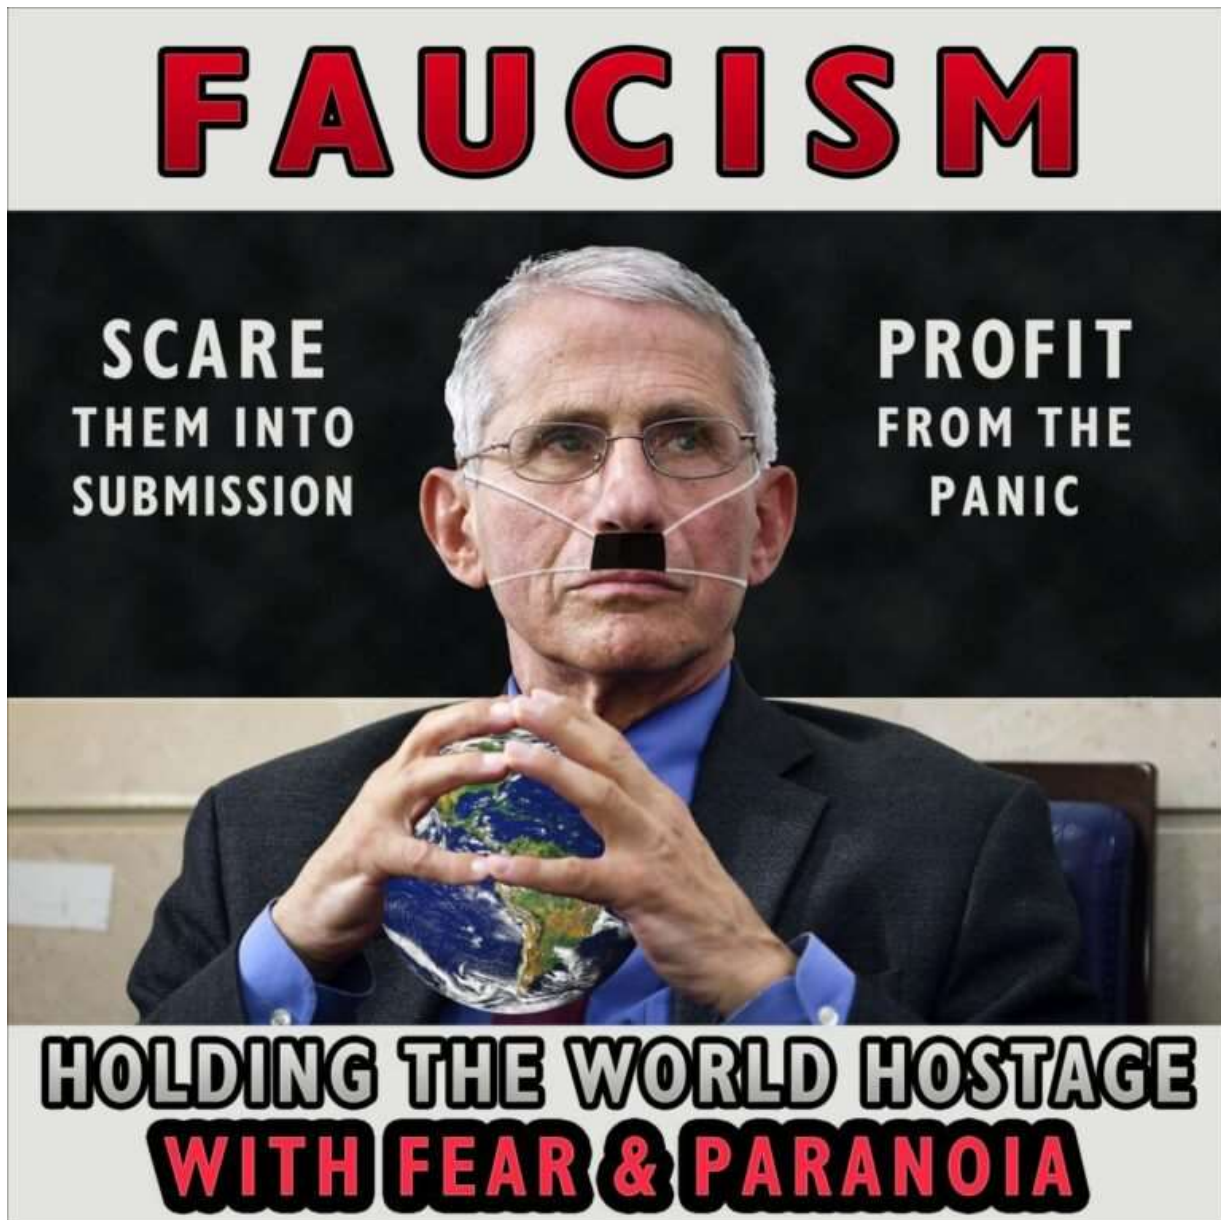

Clearly, there are countless vectors of dissemination of the fastidiously bioengineered coronavirus deceptively known as SARS-CoV-2. There are also numerous methods of propagation being employed in secret bioweapon laboratories dotting the globe. In this way, the Covid bioweapon has been launch via several means of proliferation, and yet very few are aware of this ongoing series of civilization-destroying bioterrorism.

What is essential to understand for every healthcare professional is that the deliberately mislabeled SARS-CoV-2 is not even a coronavirus. There may well be a coronavirus built into the bioweapon, but COVID-19 really produces a multi-infection syndrome that manifests differently in each infected individual. See: [COVID-19 Is NOT A Coronavirus! The Best Treatment Plans Prove It.](#)

In fact, COVID-19 has all the characteristics of a [weaponized parasite](#) which is why [Ivermectin](#) and [Hydroxychloroquine](#) are so effective. Both have been medically prescribed for decades as highly effective anti-parasitical treatments which is why HCQ is universally used to treat malaria, a disease caused by 5 different parasites in humans.

[Everything points to a COVID-19 parasite similar to those that cause malaria.](#)

Medical researchers and health investigators ought to be aware of the FACT that the Covid bioweapon released in Wuhan is substantially different than the Milan and Tehran variations. Likewise, the New York City and Seattle coronavirus cluster explosions were triggered by an even different variation of the stealthily misbranded SARS-CoV-2. The same goes for the Mexico City and Guayaquil outbreaks; each was qualitatively different in terms of the types and severity of Covid symptoms.

KEY POINTS: Everything points to COVID-19 being a full-blown multi-infection syndrome caused by various pathogenic organisms depending on how the variant was bioengineered and weaponized. Similar to Lyme disease, Covid expresses differently in

everyone and is especially severe in those patients who are immune-compromised, afflicted with respiratory ailments and/or certain advanced disease processes. Most Covid bioweapons likely contain a pernicious parasite, a viral component and an opportunistic bacterium. There is also evidence of a fungal constituent in some Covid bioweapons.

To make matters even much more complicated, each Covid variant is quite painstakingly bioengineered to mutate at different rates and in different ways in different bloodlines. In this way, the fabricated Coronavirus Pandemic will continue in one form or another ad infinitum. Even though herd immunity has already been attained throughout the world, the never-ending Covid mutations allow the Coviteers to forever demand a global mandatory vaccine regime enforced via immunity certificates, immunity passports and injectable microchips.

Genocide

The massively growing body of evidence now proves that this highly coordinated international criminal conspiracy to commit genocide was conducted, first, to murder as many elderly worldwide as possible. Also known as geriatric genocide, this malevolent plot was carried out by Governor Andrew Cuomo with Nazi-like precision. Which is why he is being taken out via so many sexual misconduct allegations before his geriatric genocide crime wave is fully exposed and the many other Democrat governors are likewise accused and removed from office, as they should be. As follows:

[Cuomo's Crash and Burn Has Nothing To Do With His Serial Sexual Misconduct](#)

Secondly, there is the transparent intention to kill as many obese and infirm folks with comorbidities with the utmost speed and efficiency. In point of fact, the medical fascists who conducted the brutal human experiments in Nazi Germany would be envious to see the ruthless efficiency by which the Covid mass murder has been executed. See: [Big Pharma Conspires with the Medical Mafia to Conduct Deadly Covid 'Nazi Vaccine Experiments' on Infants in the USA in 2021](#)

When a medical doctor board-certified in infectious diseases — Dr. Anthony Fauci — is leading the national *Medical Mafia* to whack as many Americans with Covid as possible, who also has the protection of the illegitimate Biden administration as well as full support of the U.S. Federal Government, what is to stop this juggernaut from rolling across the land crushing everyone and everything in its path of devastation?!

Multiple Malicious Misdeeds

Which brings us back to the central question: ***“Are the various Covid vaccines a genocidal bioweapon, covert tool of transhumanism, debilitating gene-altering drug, or all 3?”***

What the world community of nations is now witnessing and/or experiencing is a veritable onslaught of similar bioweapons launched by way of both the weaponized COVID-19 and the deadly Covid vaccine. However, because this diabolical experiment

is being performed on populations around the globe without an iota of informed consent, the perpetrators are determined to take advantage of several other parallel experiments being run at the same time.

Of course, there is an odious agenda of transhumanism being advanced considerably via the mRNA and DNA injections manufactured by Pfizer and Moderna as well as the Johnson & Johnson, respectively. See: [“The mRNA VACCINE IS THE PERFECT BIOLOGICAL WEAPON”](#)

What follows is a detailed description of this reckless attempt to foist a transhumanistic agenda on populaces while debilitating and/or incapacitating many trusting souls.

[“COVID-19 jab is not a vaccine; it’s a cellular modification technology that causes a self-creating auto-immune disease similar to AIDS” \(Video\)](#)

Conclusion

The only reason why TPTB would boldly expose them as never before is because there is a very tight timeline that they must adhere to in order to establish their long-planned [One World Government](#). Only by rolling out [COVID-1984](#) in the wake of **OPERATION COVID-19** are the wealthy elite perps able to manufacture consent for their *Global Security Superstate* that will enforce the dictates of their emerging **One World Government**.

However, in light of the rapidly unfolding [GREAT RESET](#), it's evident that there is an all-out endeavor to lock down planet Earth in preparation for something very big, as in an unpredictable event sometimes known as a [Phoenix Moment](#). Exactly what that looks

like is anyone's guess. To wit, the power elite have been re-arranging the global geopolitical chessboard with a vengeance over the past few years, and this purposeful process of societal destruction has significantly intensified under the unbridled despotism of the profoundly corrupt Biden-Harris administration, which is why those two imposters were criminally installed. See: [The Barbarians Are Inside The Gate](#)

Because of the extreme and imminent danger that the power elite have put themselves into, they must have a very good reason for having done so. There is simply no other explanation for committing so many crime sprees against humanity, during prime time, unless there is something quite awesome lurking out there. To help you understand how the global elite will control humanity it becomes important that you understand how these alleged vaccines will change your body in the shots. This is transhumanism on steroids. It is known as CRISPR and it changes your DNA!

The mapping of the Human Genome was finished about the beginning of the new millennium. An initial rough draft of the human genome was available in June 2000 and by February 2001 a working draft had been completed and published followed by the final sequencing mapping of the human genome on April 14, 2003. You may have heard about CRISPR or CRISPR/Cas9, a powerful gene-editing tool that allows scientist to edit our DNA. CRISPR is used in GMO crops, animals, and humans!

But how did the CRISPR technology come about? CRISPR was discovered in the span of several years and mostly by accident. Following is a chronological order of CRISPR discovery. CRISPR is the result of discovery and invention. It was unveiled in January, 2013 — Feng Zhang, from Broad Institute of MIT and Harvard, McGovern Institute for Brain Research at MIT, Massachusetts. He showed that the CRISPR system can be programmed to be used as a gene-editing tool. Also, it can be used in higher organisms, as he used it in humans and mouse cell lines. This was preceded by ten years of experiments and discoveries in the field of genetics.

Experiments and work in the area of gene therapy has been ongoing in labs around the world for a decade. My interest in CRISPR technology began in March, 2020 following the outbreak or release of a virus in Wuhan, China. 2013 is sort of the launching of genetic engineering in the field of DNA. There is solid reason to believe that the ability to change your DNA and or re-write human DNA has advanced much further than what the general public seems to know at this point in time. The elite plan is to microchip the world! This comes in the second phase of the vaccination process of Bill Gates QuantumDot/Hydrogel ID2020. The Covid-19 vaccines insert a third strand of one's DNA through the mRNA package. **Yearly booster shots will be required to fake out the human immune system.**

God built into the human body a perfect immune system which attacks invasive sicknesses, viruses, and other unhealthy invaders. In order for the "Mark" of the Beast to be implanted into the body, God's immune system has to be tricked into believing that any injection is "natural". This is the primary reason for Covid-19. The 2-shot Covid-19 contains modified DNA to condition the human body immune system to "trick" your

immune system to believe the injection is “natural”, which it is not. None the less, the mRNA messenger DNA is for the purpose of “re-wiring or re-writing” your DNA, so to speak, into “tricking” your immune system so that the immune system will not attack the injection invader. This is the reason for the drug companies saying you will need a yearly booster shot every year. It is not a vaccine, it is “Gene Therapy”. This is the first phase of the larger plan to “microchip” people. Booster talk is plentiful these days by Pfizer, Moderna, and others.

Before CRISPR can be used to treat cancer in humans, we need to make sure it’s both safe and effective. This means some big things need to be figured out before any of these treatments are made available to humans. There is a concern that CRISPR could actually cause cancer through off-target knockouts or errors made by the cell’s repair system. Not surprisingly, both of these risks increase when multiple genes are edited at once. In addressing these issues, scientists are working on better ways to deliver the Cas9 complex to cells.

When I began researching on how 5G EM wireless energy could be beamed into the pores of a person’s skin, I was stunned to learn about the process known as Electroporation, and could see the connection that 5G technologies could be then used as a weapon to control and even eliminate humans. I began reading patents and research papers on Gene Editing. And so my learning curve began to expand my horizon. I can confirm everything that I have written over the past couple years about 5G and later the Corona virus was spot on! I do not need to retract a single paragraph, and if anything, I could tweak a few details but what I have posted on my web page is accurate, reliable and trustworthy.

Right now, the most common way for CRISPR/Cas9 to get into a cell is to hitch a ride with that ancient bacterial enemy – the virus. Viruses are good carriers because they make a living off of infecting cells and incorporating their own DNA into their hosts’ genomes. The viruses used in gene editing don’t cause disease in humans because the viral genes have been removed to create something called a vector. But viral vectors still have limitations: they can only carry a small amount of DNA, they stick around for a long time, and they can produce an immune response, and they sometimes start messing with the DNA in places they have no right to be.

For all of these reasons, scientists are working on alternative ways for Cas9 to catch a ride into target cells. Some alternative delivery mechanisms include:

- **Nanoparticle:** The idea behind this method is to wrap Cas9 into a super-tiny package that gets piggy-packed into the cell on the back of something that can easily travel through the channels in the cell membrane, like a fat molecule or gold particle.
- **Light:** This method also uses nanoparticles, but in this case, they’re light-activated. Once inside the nucleus, the nanoparticles hang on to Cas9 until light is shown on the cell. Only then is Cas9 set free to get to work editing genes.

- **Electric shock:** A zap of electricity can relax cells enough to let Cas9 in without the need for any vehicle at all.
- **Microinjection:** Exactly as it sounds, this method involves giving the cell an injection with a microscopic needle. Microinjection is commonly used to create animal models, in plants, the CRISPR system is more likely to be blasted directly into the cell with a gene gun.

Electroporation describes the third above, electric shock. Choosing the best delivery vehicle depends on what cell type you are targeting and whether it's inside the body or outside the body. When using CRISPR to treat human disease, it is important to make sure the Cas9 package is delivered to the right place; miss, and the therapy could have unintended consequences. You do not want to knock out receptors in the wrong immune cells, for example. Ideally, doctors would also like to have a "kill switch" to control the Cas9 once it gets into the cell. That way, it could be shut down if anything goes wrong or when it's no longer needed. This is why the present vaccines being promoted for the Covid-19 are of great concern. As Dr. Judy Mikovitz, Dr. Sherri Tenpenny, Dr. Andy Wakefield, Dr. Andrew Kaufman, Dr. Stefan Lanka, and so many others around the world are worried. There is no "kill switch" in their vaccines!

It is this issue that these doctors believe millions will die. Once given the shots, 20% of the nation are now vaccinated with one of the so-called vaccines as of mid-March, 2021. Dr. Sherri Tenpenny says that deaths will skyrocket from the 3rd month out from the vaccination through the first year. Most people will die within five years, and some may survive up to twenty years. What determines how long one lives has to deal with a combination of things: a healthy immune system to begin with, and overall health. So if a person is young, healthy, and avoids health issues, they will live longer. However, if the person is exposed to a variety of factors, such as environment, pollutants, health conditions, and a weakened immune system, they are prone to overwork their immune system and develop autoimmunity issues, life will be diminished as the immune system tires and wears out from abuse.

This is further complicated by the fact that 18 fragments of the HIV1 were intentionally inserted in the virus that was released into the public in China. Those 18 fragments constituted 80% of the HIV1 payload. Although it does not mean a person will contract HIV1, they are at greater risk of getting sick over time and overworking their natural immune system, and early death. The implications of the huge question from the State of the Nation report are profound. In my 18-part series on "Depopulation" it becomes obvious that our own government is secretly aiding the agenda of killing off millions of the senior population of this country.

What agenda does the Covid vaccines serve:

- a genocidal bioweapon,
- covert tool of transhumanism,
- debilitating gene-altering drug,
- or perhaps all 3?

I have been asking this huge question since July, 2020; every day since July 1st, 2020, I was encountering evidence proof for all three of these possibilities. The Corona virus was engineered to be a bioweapon; and it was man-made.

Since the 1950s, vaccines for polio were contaminated with the cancer SV-40 gene; Nagalase has been found in the blood serum of small children with side effects of the required vaccination program. The third major contamination of vaccines was during the Gulf War era with Chronic Fatigue Syndrome, with Mycoplasma as the suspected cause. All U.S. military were vaccinated with the Anthrax vaccine before their deployment to the Middle East. Tens of thousands of veterans, spouses, and children born to them have died of the effects of Mycoplasma and Chronic Fatigue Syndrome.

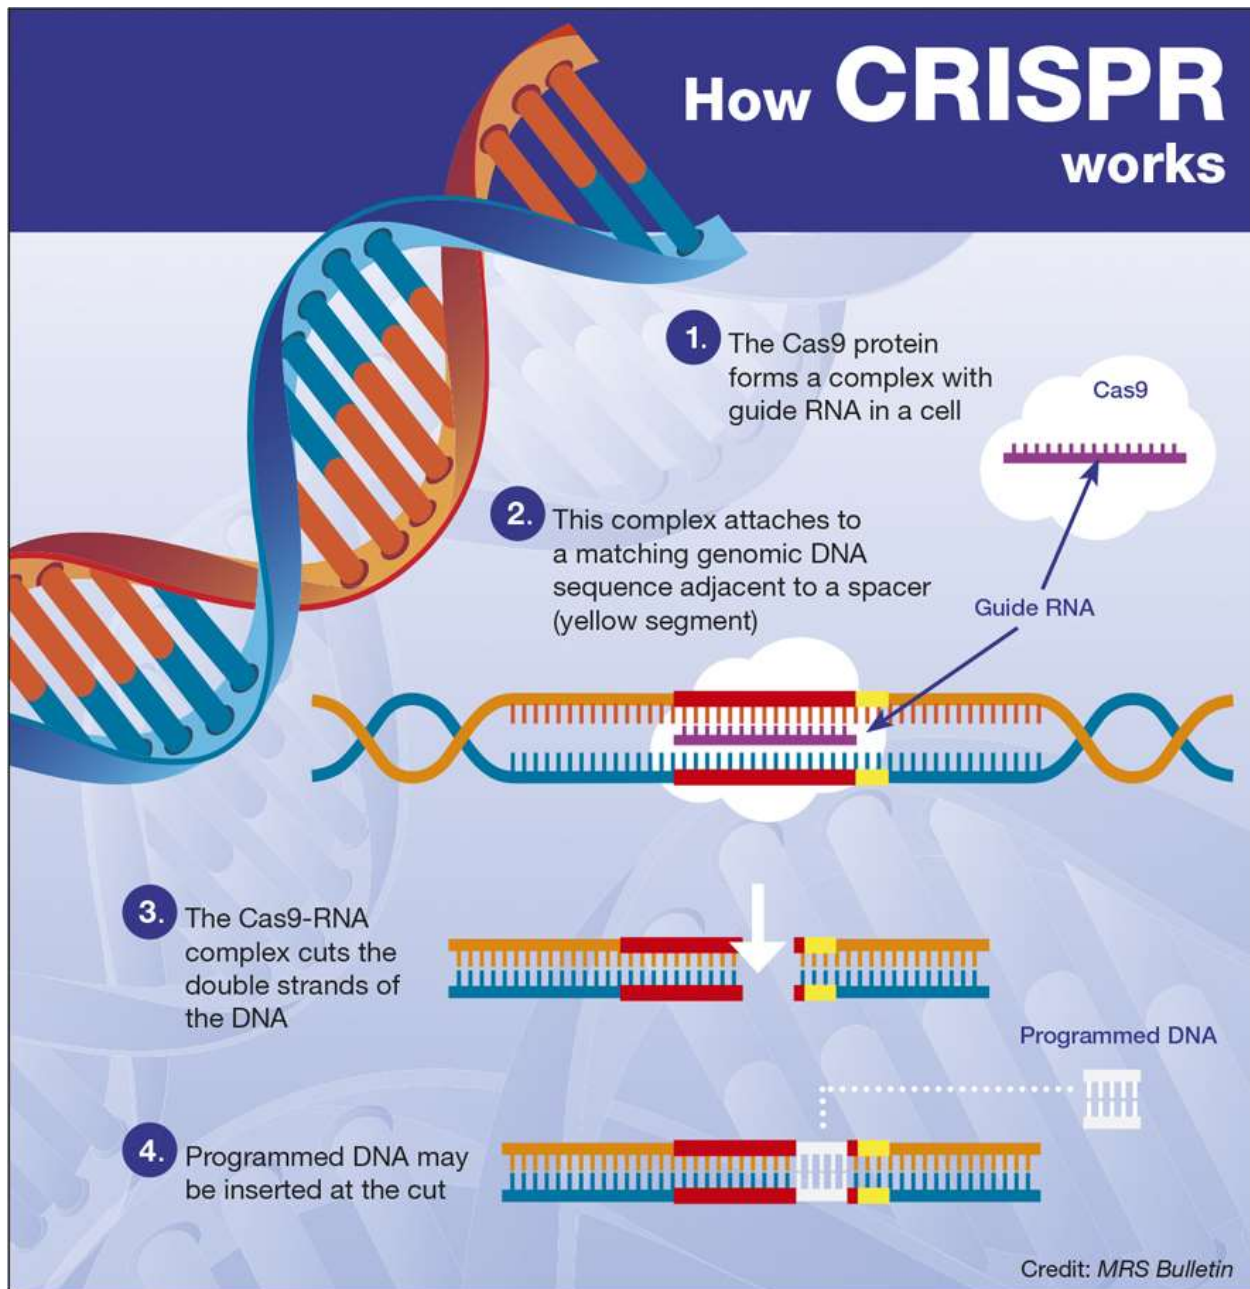

These are the three major contamination incidents that have killed millions that we know about. In the case of the SV-40 cancer gene in the polio vaccine, somewhere between 65 and 95 million contracted cancer and early death from the SV-40 gene. It is unlikely that many of you have knowledge of these so-called contaminated vaccines that are responsible for the death of millions of Americans. The government covered-up and the mainstream media gave them a free pass, and I believe their silence on the matter came at a hefty price!

CRISPR stands for **C**lustered **R**egularly **I**nterspaced **S**hort **P**alindromic **R**epeats. CRISPR is a set of DNA sequences found in the genomes of prokaryotes like Archaea and bacteria. CRISPR sequences are characterized by clusters of identical repeats interspaced with non-identical segments called spacers. These prokaryotic DNA elements are derived from viruses when they attack the prokaryote. Subsequently, these DNA sequences are involved in adaptive immunity against invasive genetic elements, including viruses and plasmids. The CRISPR segments, along with certain enzymes, constitute a basis of a powerful gene-editing system. Thus, in the modern biological fields, the term CRISPR denotes more of a genome-editing tool than just the gene sequences coding for immunity in bacteria.

CRISPR denotes more of a genome-editing tool than just the gene sequences coding for immunity in bacteria. Major studies are being conducted in groups of people that have for example "Sickle Cell Anemia" common to those of African descent and a few other diseases.

CRISPR is, therefore, revolutionizing modern biotechnology and molecular biology. Studies have shown that the CRISPR system is present in nearly 40% of bacteria and 90% of archaea. But with the applications of biotechnology, this natural feature of prokaryotic organisms is becoming a much larger tool to disseminate its applications of genome editing to wide range of organisms including baker's yeast (*Saccharomyces cerevisiae*), *Candida albicans*, *Drosophila melanogaster*, ants, mosquitoes, nematodes, plants, mice, monkeys, etc. and even human embryos. The CRISPR/Cas9 has become as much consequential as the zinc finger nucleases and TALEN proteins. While many pre-existing genome editing companies have adopted CRISPR, a large number of

CRISPR startups have been established throughout the globe. Don't let the technical language scare you, it's not as complex as it sounds.

From agriculture and food technology to pharmaceuticals and therapeutics, CRISPR is truly transforming the realm of biotechnology. When Bill Gates revealed his plan last year for the QuantumDot/Hydrogel ID2020, it was through his grants and investments in biotech companies that has brought to market the “Mark” of the Beast. The Gates family have a history of involvement with Eugenics and Planned Parenthood, and so it came as no real surprise how he bragged on his new ID2020. Bill Gates has a reprobate mind. That was evident in testimony he gave in an Anti-Trust trial against

Microsoft years ago. His testimony was evasive and cunning at points where he was parsing his words much like former President Clinton did when he parsed the little word "is". Also, Bill Gates has deep ties and connections with the Defense Department and the CIA on projects designed and intended to harm people.

The phrase “reprobate mind” is found in Romans 1:28 in reference to those whom God has rejected as godless and wicked. They **“suppress the truth by their wickedness,”** and it is upon these people that the wrath of God rests -(Romans 1:18). The Greek word translated “reprobate” in the New Testament is **adokimos**, which means literally “unapproved, that is, rejected; by implication, worthless (literally or morally).”

Bill Gates portrays a façade of being a philanthropist to charity and needy causes, which serves as cover for an otherwise evil agenda, to reduce population growth through vaccines corrupted with contaminants designed to kill and maim. At the winter meeting of the world elite in Davos, Switzerland, a year ago, he made the statement that his investments in vaccines has been a 20 to 1 success story, in terms of profits.

The Moderna and Pfizer vaccines are not vaccines in the legal definition of what a vaccine is supposed to do. According to Dr. David Martin, these manufacturers had to disguise their treatments as vaccines in order to fit them under the 1905 Jacobson v. Massachusetts U.S. Supreme Court case, a ruling that has been interpreted [some say misinterpreted] as a license for states to mandate vaccines during health emergencies.

“Let’s make sure we’re clear on something. Let’s stipulate that this is not a vaccine. We need to be very clear that we’re using the term vaccine to sneak this thing in under public health exemptions. This is not a vaccine. This is an mRNA, packaged in a fat envelope, delivered to a cell. This is a medical device designed to stimulate the human cell into becoming a pathogen creator. It is not a vaccine. Vaccines are actually a legally defined term. And they’re a legally defined term under public health law. They’re a legally defined term under CDC and FDA standards, and a vaccine specifically has to stimulate, both an immunity within the person receiving it but it also has to disrupt transmission. And that’s not what this is. They have been abundantly clear in saying that the mRNA strand going into the cell is not to stop transmission. It is a treatment. But if, it was discussed as a treatment it would not get the sympathetic ear of the public health authorities because then people would say well what other treatments are there?”

“The use of the term vaccine is unconscionable for both the legal definition of it, but also because it actually is the sucker punch to open and free discourse, because by saying ‘vaccine’ you dump it into a thing where you could be anti or pro ‘the therapy,’ but if you actually talked about it as a therapy, and remember, and people forget this, Moderna was started as a chemotherapy company for cancer, not a vaccine manufacturer for SARS-COV2. If we said we’re going to give people prophylactic therapy for the cancer they don’t have, you’d be laughed out of a room, because that’s a stupid idea. That’s exactly what this is. This is a mechanical device in the form of a very small packet of technology that is being inserted into the human system to activate the cell to become a pathogen-manufacturing site.”

“And I refuse to stipulate in any conversations that this is in fact a vaccine issue. The only reason why the term is being used was to abuse the 1905 Jacobson case that has been misrepresented since it was written. And if we were honest with this we would

actually call it what it is. It is a chemical pathogen device that is actually meant to unleash a chemically pathogen production action within a cell. It is a medical device, not a drug, because it meets the CDRH [Center for Devices and Radiological Health] definition of a medical device. It is not a living system, it is not a biologic system [as it would be if it were a vaccine]. It is a physical technology. It happens to just come in the size of a molecular package.”

“So we need to be really clear on making sure we don’t fall for their game, because their game is if we talk about it as a vaccine then we’re going to get into a vaccine conversation. But this is not, by their own admission, a vaccine. As a result it must be clear to everyone listening that we will not fall for this failed definition, just like we won’t fall for their industrial-chemical definition of health, because both of them are functionally flawed and are an explicit violation of the legal construct that is being exploited.”

“I get frustrated when I hear activists and lawyers and everybody else say, ‘we’re going to fight the vaccine.’ If you stipulate that it’s a vaccine you’ve already lost the battle. It is not a vaccine.”

At the heart of the criticism of the Moderna and Pfizer so-called vaccines is the issue of absence of a “kill switch” to turn off the gene therapy process when it has done its job.

It was used for the first time in humans in 2016 and a trial is underway in the United States to use the experimental technology to treat a dozen patients with sickle cell disease, a group of inherited blood disorders.

Why has it been controversial?

While it has immense potential to transform our lives, the technology has raised many ethical questions. I will identify these issues later which raise concern about the use of CRISPR/Cas9.

Chinese scientist He Jiankui was jailed for three years in 2019 after announcing that twin girls had been born with modified DNA to make them resistant to HIV, which he had managed using the gene-editing tool CRISPR/Cas9 before birth.

An associate professor at the Southern University of Science and Technology in Shenzhen at the time, he said that he was "proud" of the achievement. But he was condemned by many of his peers, with the experiment labeled "monstrous," "unethical" and a "huge blow" to the reputation of Chinese biomedical research.

Claes Gustafsson, secretary of the Nobel committee in chemistry and a professor of biochemistry and biophysics at Stockholm University, said that with *"every really powerful technology, in life sciences or elsewhere, there's a possibility of misuse."*

"Clearly this Chinese researcher was way out of line in applying it in this particular way," he told CNN.

"Everyone has agreed that it cannot be used for germ line engineering. You can't make heritable changes to human DNA. That is far too uncertain at this point," added Gustafsson. *"There are specific genetic diseases you can think of curing for the individual but not in a heritable way."*

Scientists have called for a moratorium on human germ line editing, while efforts are being made to better regulate use of the technology. An international commission said in September it was too early for gene-edited human embryos to be used to create a pregnancy.

Doudna has expressed deep concern about He's work, telling CNN it was not medically necessary and there was no way to defend using an experimental technology when there were established ways of avoiding HIV transmission.

We've barely begun to understand how CRISPR works in the natural world. Microbes use it as a sophisticated immune system, allowing them to learn to recognize their enemies. Now scientists are discovering that microbes use CRISPR for other jobs as well. The natural history of CRISPR poses many questions to scientists, for which they don't have very good answers yet. But it also holds great promise. Doudna and her colleagues harnessed one type of CRISPR, but scientists are finding a vast menagerie of different types. Tapping that diversity could lead to more effective gene editing technology, or open the way to applications no one has thought of yet.

Biotech companies which use living organisms to produce drugs and other products are some of the biggest traded companies on the stock market today. In fact, some are so invested in CRISPR that they have worked the technology into their corporate names! And each of the three largest publicly traded companies has over a \$billion invested in them, even though they are all just in the research and development phase. In simple terms, none of them have anything to sell at this point.

The concept of CRISPR is essentially the old newspaper editing term "Cut and Paste".

As CRISPR started to give up its secrets, Doudna got curious. She had already made a name for herself as an expert on RNA, a single-stranded cousin to DNA. Originally, scientists had seen RNA's main job as a messenger. Cells would make a copy of a gene using RNA, and then use that messenger RNA as a template for building a protein. But Doudna and other scientists illuminated many other jobs that RNA can do, such as acting as sensors or controlling the activity of genes.

Before the discovery of CRISPR, all the defenses that microbes were known to use against viruses were simple, one-size-fits-all strategies. Restriction enzymes, for example, will destroy any piece of unprotected DNA. Scientists refer to this style of defense as innate immunity. We have innate immunity, too, but on top of that, we also

use an entirely different immune system to fight pathogens: one that learns about our enemies.

This so-called adaptive immune system is organized around a special set of immune cells that swallow up pathogens and then present fragments of them, called antigens, to other immune cells. If an immune cell binds tightly to an antigen, the cell multiplies. The process of division adds some random changes to the cell's antigen receptor genes. In a few cases, the changes alter the receptor in a way that lets it grab the antigen even more tightly. Immune cells with the improved receptor then multiply even more.

This cycle results in an army of immune cells with receptors that can bind quickly and tightly to a particular type of pathogen, making them into precise assassins. Other immune cells produce antibodies that can also grab onto the antigens and help kill the pathogen. It takes a few days for the adaptive immune system to learn to recognize the measles virus, for instance, and wipe it out. But once the infection is over, we can hold onto these immunological memories. A few immune cells tailored to measles stay with us for our lifetime, ready to attack again.

CRISPR, microbiologists realized, is also an adaptive immune system. It lets microbes learn the signatures of new viruses and remember them. And while we need a complex network of different cell types and signals to learn to recognize pathogens, a single-celled microbe has all the equipment necessary to learn the same lesson on its own.

So when Tal Zaks, CEO of Moderna calls it ***“hacking the software of life”***. In the first minute of the video Zaks states, *“we’ve been living this phenomenal digital scientific revolution, and I’m here today to tell you, that we are actually hacking the software of life, and that it’s changing the way we think about prevention and treatment of disease.”*, he is saying that we are playing God!

And as scientists discover more tasks that CRISPR accomplishes in nature, they may be able to mimic those functions, too. Doudna is curious about using CRISPR as a diagnostic tool, searching cells for cancerous mutations, for example. *“It’s seek and detect, not seek and destroy,”* she said. But having been surprised by CRISPR before, Doudna expects the biggest benefits from these molecules to surprise us yet again. *“It makes you wonder what else is out there,”* she said.

Former world middleweight boxing champion and legend Marvin Hagler has reportedly died at the age of 66 yesterday. Earlier in the day Saturday, fellow boxing legend Thomas “Hitman” Hearns, who fought in the ring against Hagler in the 1980s, asked fans to pray for Hagler via his Instagram account, because he was in the ICU following an experimental COVID shot. Similar to other high profile people who have died just after receiving a COVID experimental injection, such as Hank Aaron and Larry King, there appears to be a major effort by the pharma-controlled corporate media to withhold this information from the public. How long can the corporate media continue hiding these deaths that happen after the experimental COVID injections? Or the bigger question is, how long will the public continue watching, reading, and listening to the

corporate media in the U.S., which is clearly funded and controlled by the CIA and the Wall Street Billionaires who are profiting so richly from the COVID vaccines?

I need to return back to the questions that I and the State of the Nation raised on Sunday. The veil is slowly being raised in order that we can get a clear perspective of what has been happening this past year. The big picture is becoming clearer now.

What agenda does the Covid vaccines serve:

- a genocidal bioweapon,
- covert tool of transhumanism,
- debilitating gene-altering drug,
- or perhaps all 3?

Washington Post journalist Josh Rogin published a new book titled: '*Chaos Under Heaven: Trump, Xi, and the Battle for the Twenty-First Century.*' The new book provides valuable intel on the origins of SARS CoV-2. China's Wuhan Institute of Virology (WIV) is home to the world's most unethical "gain-of-function" research on virus infectivity. Scientists at the WIV were modifying coronaviruses to understand how they can exploit human immune systems. The goal of the research was to come up with new vaccines in case an outbreak did occur, or so we are led to believe. That unethical research on bat coronaviruses was funded by top scientists from the U.S. government, Dr. Francis Collins and Dr. Anthony Fauci of the National Institutes of Health (NIH). The research was banned by the Obama Administration in October 2014, but was soon off-shored to China with grants coming from the NIH.

U.S. diplomats warned Washington about inadequate safety of Wuhan Institute of Virology in 2018

Rogin reveals that the U.S. Embassy in Beijing "*took the unusual step of repeatedly sending US science diplomats to the WIV*" in 2018 and sent two warnings back to Washington about the "*inadequate safety of the lab.*" The American diplomats were shocked that the lab "*didn't have enough properly trained technicians to safely operate their BSL-4 lab.*" It's no coincidence that a new coronavirus outbreak began in the exact same city that spent years studying coronavirus gain-of-function, with the largest collection of bat coronaviruses in the world, including the closest known relative of SARS-CoV-2!

In his brave pursuit for the truth, Rogin revealed in-depth insight from top U.S. government officials who have evidence of dangerous Chinese "gain-of-function" research on coronaviruses that went above and beyond the "gain-of-function" research that was openly discussed with U.S. universities and institutions. Rogin reveals that Chinese researchers were taking more risks in the lab, risks that governments did not understand at the time. The Chinese scientists ultimately found a way to engineer coronavirus spike proteins to exploit the ACE2 receptor in human lung cells. (Related: China rewrites COVID history, purges 300 studies linking virus to Wuhan lab.)

The Chinese military classified some of their most dangerous gain-of-function research

One of the more suspicious studies came from Beijing researchers affiliated with the Academy of Military Medical Science. In June 2020, the researchers published a new model for studying SARS-CoV-2, one that uses the CRISPR gene editing tool to alter mice lung cells. The scientists equipped the mice with the ACE2 receptor from human lung cells. This is the same receptor that they learned how to exploit with modified coronaviruses, using enhanced gain-of-function properties.

Upon further investigation, U.S. officials found evidence that this research was taking place in the lead-up to the original SARS-CoV-2 outbreak in China. The research was previously undisclosed, and Chinese researchers continued to deny it was taking place. Before the Trump Administration left office, the State Department wrote in a January 15th statement that the WIV had only disclosed some of its participation in “gain-of-function” research, but failed to disclose their work on RaTG13, which was classified laboratory animal experimentation, conducted on behalf of the Chinese military since 2017.

“This was just a peek under a curtain of an entire galaxy of activity, including labs and military labs in Beijing and Wuhan playing around with coronaviruses in ACE2 mice in unsafe labs,” a senior US official told Rogin. “It suggests we are getting a peek at a body of activity that isn’t understood in the West or even has precedent here.”

While Josh Rogin at the Washington Post provides us insights to the Wuhan laxity in security, it fails to answer some of the issues relative to the 5G “smart” city roll out, deaths of millions, many recorded on the cell phones of Chinese residents, the involvement of MI6 and the CIA, the ownership of a vaccine facility owned by George Soros, and the Johns Hopkins Event 201 among other important connections.

Robert F. Kennedy, Jr. offers important insights to this entire scan-demic. In October 2019, shortly before the COVID outbreak, Gates and other powerful individuals began planning how to censor vaccine safety advocates from social media during a table-top simulation of a worldwide pandemic, known as Event 201.

Before the COVID-19 outbreak in the U.S., Bill Gates organized four simulations of a worldwide coronavirus pandemic.

Over the last two weeks, Facebook and other social media sites have deplatformed me (RFK Jr.) and many other critics of regulatory corruption and authoritarian public health policies. So, here is some fodder for those of you who have the eerie sense that the government/industry pandemic response feels like it was planned — even before there was a pandemic.

The attached document shows that a cabal of powerful individuals did indeed begin planning the mass eviction of vaccine skeptics from social media in October 2019, a week or two before COVID began circulating. That month, Microsoft founder Bill Gates

organized an exercise of four “table-top” simulations of a worldwide coronavirus pandemic with other high-ranking “Deep State” panjandrums. The exercise was referred to as Event 201.

Gates’ co-conspirators included representatives from the World Bank, the World Economic Forum (Great Reset), Bloomberg/Johns Hopkins University Populations Center, the Centers for Disease Control and Prevention, various media powerhouses, the Chinese government, a former Central Intelligence Agency/National Security Agency director (there is no such thing as a former CIA officer), vaccine maker Johnson & Johnson, the finance and biosecurity industries and Edelman, the world’s leading corporate PR firm.

At Gates’ direction, these eminences role-played members of a Pandemic Control Council, war-gaming government strategies for controlling the pandemic, the narrative and the population. Needless to say, there was little talk of building immune systems, off-the-shelf remedies or off-patent therapeutic drugs and vitamins, but lots of chatter about promoting uptake of new patentable antiviral drugs and vaccines.

But the participants primarily focused on planning industry-centric, fear-mongering, police-state strategies for managing an imaginary global coronavirus contagion culminating in mass censorship of social media.

Oddly, Gates now claims that the simulation didn’t occur. On April 12, 2020, Gates told BBC, *“Now here we are. We didn’t simulate this, we didn’t practice, and so both the health policies and economic policies, we find ourselves in uncharted territory.”*

Unfortunately for that whopper, the videos of the event are still available across the internet. They show that Gates and team did indeed simulate health and economic policies. It’s hard to swallow that Gates has forgotten.

Gates’s Event 201 simulated COVID epidemic caused 65 million deaths at the 18-month endpoint and global economic collapse lasting up to a decade. Compared to the Gates simulation, therefore, the actual COVID-19 crisis is a bit of a dud, having imposed a mere 2.5 million deaths “attributed to COVID” over the past 13 months.

The deaths “attributed to COVID” in the real-life situation are highly questionable, and must be seen in the context of a global population of 7.8 billion, with about 59 million deaths expected annually. The predictions of decade-long economic collapse will probably prove more accurate — but only because of the draconian lockdown promoted by Gates.

Gates’ Event 201 script imagines vast anti-vaccine riots triggered by internet posts. The universal and single-minded presumption among its participants was that such a crisis would prove an opportunity of convenience to promote new vaccines, and tighten controls by a surveillance and censorship state.

Segment four of the script — on manipulation and control of public opinion — is most revealing. It uncannily predicted democracy’s current crisis:

- The participants discussed mechanisms for controlling “disinformation” and “misinformation,” by “flooding” the media with propaganda (“good information”), imposing penalties for spreading falsehoods and discrediting the anti-vaccination movement.

- Jane Halton, of Australia’s ANZ Bank, one of the authors of Australia’s oppressive “no jab, no pay” policy, assured the participants that Gates Foundation is creating algorithms “to sift through information on these social media platforms” to protect the public from dangerous thoughts and information.

- George Gao, the prescient director of the Chinese Center for Disease Control, worries about how to suppress “rumors” that the virus is laboratory generated: “People believe, ‘This is a manmade’... [and that] some pharmaceutical company made the virus.”

- Chen Huang, an Apple research scientist, Google scholar and the world’s leading expert on tracking and tracing and facial recognition technology, role-plays the newscaster reporting on government countermeasures. He blames riots on anti-vaccine activists and predicts that Twitter and Facebook will cooperate in “identify[ing] and delete[ing] a disturbing number of accounts dedicated to spreading misinformation about the outbreak” and to implement “internet shutdowns ... to quell panic.”

- Dr. Tara Kirk Sell, a senior scholar at Bloomberg School of Health’s Johns Hopkins Center for Health Security, worries that pharmaceutical companies are being accused of introducing the virus so they can make money on drugs and vaccines: “[We] have seen public faith in their products plummet.” She notes with alarm that “Unrest, due to false rumors and divisive messaging, is rising and is exacerbating spread of the disease as levels of trust fall and people stop cooperating with response efforts. This is a massive problem, one that threatens governments and trusted institutions.”

Sell reminds her fellow collaborators that *“We know that social media is now the primary way that many people get their news, so interruptions to these platforms could curb the spread of misinformation.”* There are many ways, Sell advises, for government and industry allies to accomplish this objective: “Some governments have taken control of national access to the Internet. Others are censoring websites and social media content and a small number have shut down Internet access completely to prevent the spread of misinformation. Penalties have been put in place for spreading harmful falsehoods, including arrests.”

- Matthew Harrington, CEO of Edelman Public Relations agrees that social media must fall in line to promote government policy: “I also think we’re at a moment where the social media platforms have to step forward and recognize the moment to assert that they’re a technology platform and not a broadcaster is over. They in fact have to be a participant in broadcasting accurate information and partnering with the scientific and

health communities to counterweight, if not flood the zone, of accurate information. Because to try to put the genie back in the bottle of misinformation and disinformation is not possible.”

- Stephen Redd, the Admiral of the Public Health Service, has the sinister notion that government should mine social media data to identify people with negative beliefs: *“I think with the social media platforms, there’s an opportunity to understand who it is that’s susceptible ... to misinformation, so I think there’s an opportunity to collect data from that communication mechanism.”*

- Adrian Thomas of Johnson & Johnson announces “some important news to share from some of “our member companies [Pharma]”: We are doing clinical trials in new anti-retrovirals, and in fact, in vaccines!” He recommends a strategy to address the problems to these companies when “rumors were actually spreading” that their shoddily tested products “are causing deaths and so patients are not taking them anymore.” He suggests, *“Maybe we’re making the mistake of reporting and counting all the fatalities and infections.”*

- Former CIA deputy director, Avril Haines *unveiled a strategy to “flood the zone” with propaganda from “trusted sources,” including “influential community leaders, as well as health workers.”* He warns about *“false information that is starting to actually hamper our ability to address the pandemic, then we need to be able to respond quickly to it.”*

- Matthew Harrington (Edelman CEO) observes that the Internet — which once promised the decentralization and democratization of information — now needs to be centralized: *“I think just to build a little bit on what Avril said, I think as in previous conversations where we’ve talked about centralization around management of information or public health needs, there needs to be a centralized response around the communications approach that then is cascaded to informed advocates, represented in the NGO communities, the medical professionals, et cetera.”*

- Tom Inglesby (John Hopkins biosecurity expert advisor to the National Institutes of Health, the Pentagon and Homeland Security) agrees that centralized control is needed: *“You mean centralized international?”*

- Matthew Harrington (Edelman) replies that information access should be: *“Centralized on an international basis, because I think there needs to be a central repository of data facts and key messages.”*

- Hasti Taghi (Media Advisor) sums up: *“The anti-vaccine movement was very strong and this is something specifically through social media that has spread. So as we do the research to come up with the right vaccines to help prevent the continuation of this, how do we get the right information out there? How do we communicate the right information to ensure that the public has trust in these vaccines that we’re creating?”*

•Kevin McAleese, communications officer for Gates-funded agricultural projects, observes that: *“To me, it is clear countries need to make strong efforts to manage both mis- and disinformation. We know social media companies are working around the clock to combat these disinformation campaigns. The task of identifying every bad actor is immense. This is a huge problem that’s going to keep us from ending the pandemic and might even lead to the fall of governments, as we saw in the Arab Spring. If the solution means controlling and reducing access to information, I think it’s the right choice.”*

•Tom Inglesby, director of Bloomberg’s Johns Hopkins Center for Health Security concurs, asking if *“In this case, do you think governments are at the point where they need to require social media companies to operate in a certain way?”*

•Lavan Thiru, Singapore’s Finance Minister suggests that the government might make examples of dissidents *with “government or enforcement actions against fake news. Some of us, this new regulations are come in place about how we deal with fake news. Maybe this is a time for us to showcase some cases where we are able to bring forward some bad actors and leave it before the courts to decide whether they have actually spread some fake news.”*

Read the attached transcript to see how Gates and his government, pharma and intelligence apparatus telegraphed their plans to censor and control the media during the pandemic. In yet another uncanny coincidence, COVID-19 began circulating among global populations within days of Gates’ meeting.

Statements like those cited here by Robert F. Kennedy Jr. are indicting enough to show that Bill Gates and other key people in the upper levels of world and national bodies to suggest a conspiracy does exist to cull at least the older people around the world. Efforts to silence and even thwart social media are damnable evidence to suggest criminal fraud and deception. All of this warrants an investigation and amazingly there are eerie similarities of what occurred on 9/11. An example was FEMA’s presence in New York City the day before the actual attacks on the WTC.

John Kaminski wrote a stunning piece Sunday, March 14th, 2021: MASK DEPENDENT MORONS LEAD SOCIETY INTO SLAVERY

Those who watch television are more likely to get the fatal shot.

In his voice was a certainty that to think otherwise was preposterous. *“Of course we wear masks,”* he exclaimed. *“We don’t want to spread the disease, do we?”* he insisted. *“That would be irresponsible.”*

At that moment there was no chance to mention to him that the disease had not been proven to exist and even if it did, the masks would not prevent the spread of it. Or that any talk of the death rate had to be irrelevant because the alleged disease had never been isolated, therefore never identified, therefore making it impossible to tabulate any

death toll. More importantly, making it impossible to create an effective vaccine to prevent it!

Yet typical braindead Americans who listen only to mainstream media (newspapers and TV) generally believe the lies the government tells them and eagerly line up to receive this so-called vaccine. Despite all the cheating done in reporting the ever rising COVID death toll, an avalanche of fatalities from the untested, experimental mRNA injection immediately has begun killing people in the most macabre and tragic ways.

If you watch TV rather than surf the Internet, you're definitely more likely to die following government advice. And that's just the way the big boys want it.

Regular Internet readers mostly refuse to take the shot because they have learned from many principled doctors that the shot is not a vaccine but really a nanotech installation that will one day permanently and irrevocably link you via your Smart Phone to the Deep State, constantly checking not only your health but also your bank account.

Also never mentioned on TV is that kids are absolutely not in danger from this glorified flu, but are being severely damaged psychologically and socially by the unending isolation from their friends.

None of that mattered to the naive noodle heads who had made up their minds to take the shot; not the fact that it wasn't a vaccine, nor that Fauci said you'd still have to wear a mask and social distance even if you took the shot (and survived it!), and not even as they watched people dropping like flies after they received their untested, experimental poison penetration.

I fear to mention this in public lest I be deplatformed from the world for impugning the repugnant Dr. Fauci but I prefer honest doctors who don't own their own vaccine companies such as Andrew Kaufman, Tom Cowan, Simone Gold, Sherri Tenpenny, Carrie Medej, Stefan Lanka, Rashid Buttar, Joe Mercola, Shiva Ayyudurai, Kelly Brogan and hundreds of other medical professionals of integrity who all tell me not to take the shot.

Yet another reason not to believe anything you read in mainstream media — they have become the publicity arm of the Deep State as they conspire to completely control the minds of every single person on the planet. This is why all those honest people are being banned from Facebook, Twitter and the other Jewish owned social platforms that are strangling the life out of the American mind.

Leading the way, America has now gone full Soviet Union.

In our lifetimes the exclusion of responsible voices from public dialogue has never been as extreme as it is now. When the President of the United States can be banned from the public's airwaves, you realize two things: POTUS is in charge of exactly nothing; and the people who are really running the country from behind the scenes don't give a

damn about the U.S. Constitution or your individual rights as a sovereign human being. You are only a slave to them, a number on a computer screen to be blipped out at their convenience.

The darkness spreads

This next item certainly is a prime example of the level of absurdity authorities all over the world are inflicting on the beleaguered human beings they are supposed to be protecting.

Icelandic vaccine passports for the disease that can't be proven to exist

<https://www.travelandleisure.com/travel-news/iceland-issuing-covid-vaccine-passports>

As the shadows of our own insanity tighten the noose suffocating our minds, night falls on the human brain as cognitive dissonance paralyzes everyone.

World society being taken down by a fabricated panic for a disease that doesn't exist. Or, what manufactured pox that does exist.

Who is it exactly is telling Joe Biden to destroy America, now that the American people are simply too stupid to see what's happening to them?

Family problem

You must remember that every bit of information you have ingested throughout your life was provided to you by someone who did not and does not have your best interests at heart.

All the wars that have ravaged our families for many decades never needed to be fought.

Gutle Schnapper (Meyer Amschel Bauer Rothschild's mother): *"If my sons did not want wars there would be none."*

COVID-19 was actually a show designed for our benefit to distract us from the horrifying fact that our freedom is gone.

First and foremost it was the cover story for the excuse that allowed the big boys to install a total retard as president who would approve of anything the people paying him the big money told him to do.

Societal suicide by mask

It's getting easier to prove that humanity already has reached an induced state of semi-consciousness by the number of people who continue to wear masks even after they know they are incubating bacterial pneumonia in their lungs.

Suicides are way up with the lockdowns and the fabricated panic is wildly succeeding with the stunting of children's growth by their isolation from their peers in the real world.

It's an extermination program. The formula is familiar. Reduce us into a slave state just like Africa where ignorant clans are unable to form functioning governments but do specialize in killing white people, which is why the Jews have tried so hard (and succeeded) to destroy the white countries of the Northern Hemisphere by using noble-sounding phrases to foul white cultures with African immigration.

The African government model imposed on more civilized countries works more easily to calibrate the world into permanently disrupted groups of warring tribes who kill each other to keep the population down.

People who control the money supply are pathological criminals who inflict their perverted constraints on what people think through their control of media.

And what everyone doesn't realize most is who is running things as opposed to who they have convinced you is running things.

We have been lied to for so many years that when a truth finally does appear we fail to believe it and quickly consign it to whatever trash bins we happen to use. In our misinformed state the essence of it slips past our comprehension as we slip back into the familiar comfort all those fake facts we had previously ingested. Like the USA is the home of the free and the land of the brave.

You can't depend on what you hear on TV. If you do you'll take the shot. And if you do that, according to Dr. Tenpenny, you'll likely be dead in a year or two. The big boys call this population control.

And to all those people who say nothing can be done about any of this so why worry about it, I would say without hesitation that you should go and get the shot as soon as you can.

John Kaminski is a pretty good observer and a wise man at that.

Returning briefly to CRISPR, I want to address a number of issues that I have not dealt with that may enable us to answer those three questions I have noted. This is where we begin to see how this wonderful new technology becomes a threat to life.

If these companies are not successful in bringing their genetically edited products to market, might they begin exploring more profitable uses for their new discoveries. What is to prevent them from selling to the highest bidder, like a man with deep pockets, i.e., a Bill Gates, a George Soros or a Rothschild? This would obviously be regardless of the buyer's intent. Here is where we could fall off the slippery slope and get caught up in an avalanche instead. U.S. intelligence officials have referred to gene editing as a weapon of mass destruction. The main weapon is called a "bioweapon".

From genetically-engineered super-viruses to biological weapons that target people with specific DNA sequences, the threat is real. CRISPR, like many technologies, has the potential to be used for both good and evil. But the idea that their CRISPR is easy and cheap enough to be used by a common terrorist is an extreme exaggeration. If you have no scientific background, there are easier ways to cause a lot of damage. But for the researcher who has spent his entire and likely his fortune on genetic editing, it may be a different story. And with a different agenda as well!

Beyond this fear of how a mad scientist facing bankruptcy could start or end the next world war, there is the very real fact that CRISPR technology is progressing at a pace that has never been seen before in the biomedical field. It is hard for the regulators to keep up with the rapid pace of development. This is especially true since they are under a lot of pressure from shareholders that are banking on the success of a company's product. Switzerland has more billionaires per capita than any other country in the world. It is home to many biotech companies that you have never heard of.

How do we make sure that regulators do their jobs properly? And if a CRISPR treatment does get approved, how do we educate everyone on the potential harms and benefits?

All medicine has side effects. You have seen those commercials listing all of the things that might happen to you if you take a certain medication. But with that type of medication, the side effects usually disappear once you stop taking it. But with CRISPR-Cas9 errors are incorporated into the human genome. **This means that not only is the change permanent, but it also gets copied every time that cell divides.** This is the scary side of CRISPR-Cas9 and gene therapy. This cannot be undone, permanent means exactly what it says!

What agenda does the Covid vaccines serve:

- a genocidal bioweapon,
- covert tool of transhumanism,
- debilitating gene-altering drug,
- or perhaps all 3?

Now consider this before you make your decision. The White House will soon unveil a wide-reaching public relations campaign aimed at boosting vaccine confidence and uptake across the U.S. This is making its debut next week.

This television, radio, and digital advertising blitz, set to kick off within weeks, will focus on Americans outright skeptical of vaccines' safety or effectiveness as well as those who are potentially more willing to seek a Covid-19 immunization but don't yet know where, when, or how. Specifically, this campaign will target three groups in which access, apathy, or outright skepticism may pose a barrier to vaccinations: young people, people of color, and conservatives, according to a Biden aide. Congress and the administration have set aside over \$1.5 billion for the effort.

Using the CDC's own records, we should be asking the question, Why the urgency? The likes of Dr. Fauci and Dr. Birx and Dr. Redfield are like someone yelling fire in a movie theater. Their own data discredits their rhetoric. Clearly it suggests something far more sinister than a virus not much worse than a bad cold or flu.

The effort highlights a looming and under-appreciated public health challenge: Though millions of Americans are currently clamoring to receive a Covid-19 vaccine, in a few short months, or even weeks, the opposite may be true. Instead of scrambling to manufacture doses, the government may soon be scrambling to find arms willing to receive them.

While the administration Covid-19 response advisers organizing the effort are broadly optimistic, they and many public health experts fear that without winning buy-in from a critical, final slice of the population, the effort could fall short of its goal: effectively ending the country's coronavirus crisis. How can they call this a crisis, where is the evidence, not the B.S. coming from the media, and dishonest health officials.

"I'm worried about the 15% of Americans who say they will not take the vaccine," said Sten Vermund, the dean of the Yale School of Public Health. "And about 8% or 9% of Americans say, 'I will take it if they make me, if my job forces me to.' So that's about 23% or 24%, and that's flirting with the level we need to get to herd immunity."

The rollout fulfills one of Biden's first promises in office. He pledged on January 21 to kick off an "unprecedented vaccination public health campaign" aimed at convincing every American adult to seek a Covid-19 immunization.

As for the specific content, administration officials said they were mindful that appeals directly from President Biden or Dr. Anthony Fauci are not likely to sway vaccine-hesitant people. As a result, they are expected to recruit both celebrities and trusted local officials to advance the pro-vaccine message.

Dorit Reiss, a law professor at the University of California, Hastings, whose research focuses on vaccine policy and ethics, explained why Biden and his lieutenants may not always be the best suited to spread the word. This reveals the length they will go to coerce people into rolling up their sleeve.

“Messaging from the Biden administration might not be where conservative communities would look for guidance,” she said. “It’s community leaders that you want to get on board, and it might be better for the federal government to provide funding for a variety of willing community leaders to address those communities instead.” To that point, the plan includes a major emphasis on community-level messaging: Federal officials have already allocated more than \$500 million for local efforts to recruit local leaders and community organizations to encourage vaccine uptake and ensure racial equity in the vaccine distribution effort.

On a national level, White House officials declined to share details of what form many of the ads will take, or, in particular, whose voices they’ll highlight. But in a hint of the strategy, top administration officials have been already deployed to spread the word. Vice President Kamala Harris, the first so-called Black and South Asian woman elected to the White House, has spent much of the past three weeks conducting in-person outreach, TV appearances, and radio interviews, in many cases geared specifically toward boosting vaccine uptake in Black communities. This is a lie, Kamela Harris is no more black than Nancy Pelosi. But what it does prove is their choreographed efforts to exploit race and ethnicity to get them to take a shot for a non-confirmed virus. Maybe they are using “modern math” taught in schools to sell this scam!

Convincing Americans that the current vaccines are safe and effective, experts say, could make the difference between a country with widespread immunity and one in which the disease continues to spread, albeit more slowly.

It is already clear that the White House is not deploying a one-message-fits-all strategy. Marcella Nunez-Smith, the Yale physician-researcher advising Biden on health equity, appeared last month on “The Shade Room”, an online outlet geared toward Black viewers, and Anthony Fauci, the top government infectious diseases researcher, has conducted interviews with several Spanish-language news and entertainment outlets.

The administration has even deployed Francis Collins, the longtime director of the National Institutes of Health, to address one of the demographics that early surveys show is most likely to decline a Covid-19 vaccination: white, conservative, evangelical Christians. (According to a recent Marist poll, **the three most vaccine-hesitant demographics are supporters of former President Donald Trump, Republicans, and white evangelical Christians, at 47%, 41%, and 38% likely to decline a vaccine, respectively.**)

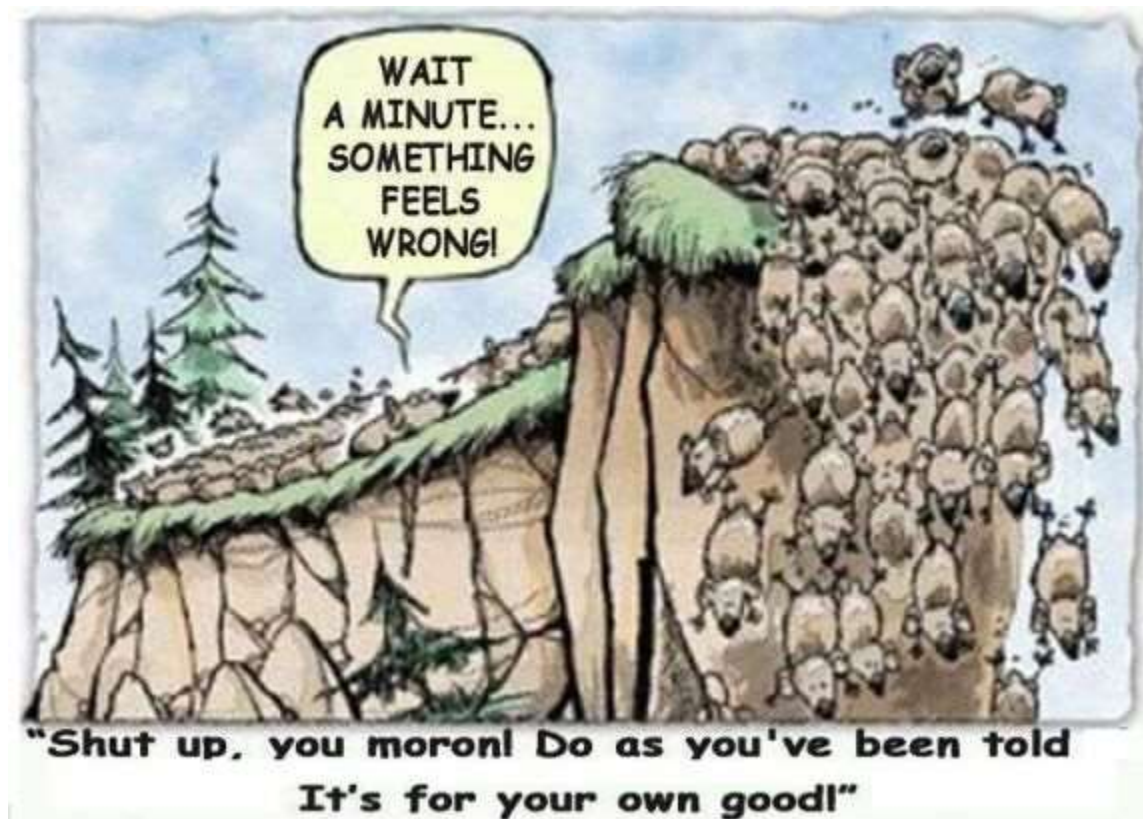

A supposedly Christian himself, Collins cast the vaccines as a “gift from God” in an interview with the Christian Broadcasting Network, and stressed that the Catholic Church has endorsed the use of Johnson & Johnson’s vaccine despite its use of a cell

line that originated from an abortion procedure decades ago. Let's be serious, this is a gift from the devil!

The White House's announcement of the PR blitz will come just days after it decreed that by May 1, all state and local governments would be required to make all American adults eligible to sign up for vaccine appointments. The U.S. is currently administering over 2 million doses daily. Just over 10% of the population is fully vaccinated, and roughly 20% has received at least one vaccine dose.

But even as the vaccine rollout continues, some experts have fretted that when it comes to the PR campaign, there's no time to waste. In recent weeks, White House aides including Nunez-Smith and Cameron Webb, another physician advising Biden's pandemic response on equity issues, have work-shopped the plan with the Department of Health and Human Services, the Centers for Disease Control and Prevention, and local community leaders.

"I've been hosting roundtables with key constituencies to make sure that we get that effort right," Nunez-Smith said during a press briefing last week. "We're building relationships with trusted messengers, all over the country, to make sure they have the best information possible to share with their communities."

Think about it closely. This virus had a recovery rate of 99.95% without a vaccine. Never has there been such a concerted effort in the history of medicine to devote this

degree of promotion, money, and people to get an “experimental” unproven therapy. The fact that Pfizer’s first experiments on animals was stopped because the test animals all died is proof-positive that humans will die as well. Pfizer, Moderna, J&J, and Astrazeneca have paid billions in fines for their past crimes. They are asking the public to play “Russian Roulette” with a bullet in every slot of the cylinder-chamber.

Much of the project’s funding comes from the sweeping \$1.9 trillion Covid-19 relief bill Biden signed last week.

The administration has also already pledged over \$500 million in additional funds to address vaccine uptake, health literacy, and equity in the vaccine distribution, including \$250 million to fund local health literacy projects and another \$255 million for the CDC to fund local government efforts to focus on equity and confidence in underserved communities.

Upon taking power in January, the administration also inherited a third funding stream meant for Covid-19 mitigation and prevention efforts: a \$250 million contract that the Trump administration inked with the Virginia-based PR firm Fors Marsh months ago. That campaign, which began under President Trump and has continued under the Biden administration, has helped to fund Spanish-language radio commercials, ads in newspapers serving the Black community, and other Covid-19 mitigation outreach work. Taken all together, federal efforts to promote vaccine uptake total nearly \$2 billion.

The Biden administration will also have backup from the nonprofit world. It’s working with the Ad Council, a nonprofit agency that has partnered with the government on PSAs meant to reduce drug and tobacco use, on a \$50 million campaign meant to sell Americans on vaccine safety and effectiveness. The Creative Coalition, another nonprofit, has also won buy-in from a collection of celebrities, corporate executives, and prominent public health figures for its own vaccine-focused campaign.

Those campaigns have largely relied on the same strategies foreshadowed by Biden aides. Much of the Ad Council’s early effort, which consists of TV commercials, radio and print ads, and digital messaging, has stayed away from celebrities but nonetheless focused on Black and Spanish-speaking communities.

At a virtual kickoff dinner for the Creative Coalition campaign, meanwhile, Rochelle Walensky, the CDC director, said it would seek to “harness the power of influencers in building vaccine confidence.” Dr. Fauci called celebrities’ ability to build vaccine trust “extraordinary.” Dr. Fauci is such a liar, and a Jesuit liar to boot!

In light of recent data, however, public health experts and Biden officials acknowledge that messaging to white conservatives — in other words, those least likely to view the new administration as credible — might pose the biggest hurdle to achieving true, population-wide immunity.

“When Magic Johnson said: ‘I have HIV, I got tested, and I am going to keep my family safe, I’m going to take antiretroviral drugs,’ we saw HIV testing rates go up the day after his announcement,” said Vermund, the Yale public health dean, who is advising the Creative Coalition effort. *“It may take Donald Trump as a celebrity, saying, ‘I got the vaccine, I feel great.’ It may take a different kind of celebrity to reach the conspiracists and the anti-vax folks who are militant in that space.”* (On Sunday, Dr. Fauci called for Trump to encourage his supporters to get vaccinated, calling such a message a potential “game-changer.”) Well, Donald Trump came out on Fox News, on March 16th and did exactly that. Trump’s integrity has taken a hit with that he has become a Judas goat!

Ask yourself, how much did they pay Trump to say that on Fox News? With \$2-billion to spend on advertising, I suspect that maybe the Rothschild’s will cancel some of his \$300-million in real estate loans he owes the Rothschild’s banks!

During an interview on Fox Primetime with host Maria Bartiromo, President Donald Trump made it absolutely clear that he recommends the Covid-19 vaccine shot to his supporters, even those who are reluctant or worried about potential side effects. Trump’s advice comes just days after Biden medical advisor Anthony Fauci begged him to tell his supporters to take the vaccine.

“I know that you received the vaccine, Mrs. Trump also got the vaccine, would you recommend to our audience that they get the vaccine then?” Bartiromo asked.

“I would. I would recommend it and I would recommend it to a lot of people that don’t want to get it and a lot of those people voted for me, frankly, but again, we have our freedoms and we have to live by that and I agree with that also,” President Trump said. *“But, it is a great vaccine. It is a safe vaccine and it is something that works.”*

The messaging and public health experts behind the federal campaign and both nonprofit efforts have recognized, however, that their initiatives carry an inherent obstacle: Regardless of which community they’re addressing, a brief word from a celebrity or politician is unlikely to be effective on its own.

Part of the Creative Coalition’s mission, said the group’s CEO, Robin Bronk, is to recognize the ineffectiveness of simply parachuting into communities for a one-off celebrity cameo — a message she said the nonprofit and federal efforts would do well to bear in mind.

“We call it ‘red carpet-bagging,’ meaning that if you blow in and blow out for something, it’s not authentic, and it’s going to do more damage to the issue,” Bronk said. *“Sometimes we don’t get involved in issues, particularly because getting the Hollywood community into it would do more harm than good. It’s not just throwing a celebrity up getting an arm jabbed — we have to be thoughtful.”*

So what agenda does the Covid vaccines serve:

- a genocidal bioweapon, ✓
- covert tool of transhumanism, ✓
- debilitating gene-altering drug, ✓
- or perhaps all 3? ✓✓✓

Everything that I have written about 5G wireless energy, Mycoplasma, Depopulation, Electroporation, Bioweapons, EMF, Pathogens, all of the censoring and blocking evidence and information relative to vaccines, the labeling of those opposed to this “injection” as being domestic terrorists, offer proof-positive this agenda serves all three of the globalist elite plan.

The every two-year earlier viruses like Avian Flu, Swine Flu, Zika, and Ebola never even came close to their “red carpet-bagging” propaganda campaign for the Corona viruses. Then there is the matter of the CDC decided not to count deaths due to the Annual Flu during the typical winter season and included them with so-called Covid-19 deaths.

The first 73 days of this year using the official U.S. government data, shows that **46 days had less than 1 death per county due to Covid-19. Only 27 days had more than 1 death per county in the U.S.** There are **3,142 counties** in the USA counting Washington, D.C.

The monthly deaths so far for 2021 charged to Covid-19 is as follow:

	Days with less than 1 death per day/per county	Days with more than 1 death per day/per county
January	11	18
February	19	9
March (through the 16 th)	<u>16</u>	<u>0</u>
	46 days	27 days

As an example of this lunacy, the CDC figures for deaths to Covid on March 15th for the entire country was just 564, and yesterday, March 16th it was 751. Does those kind of numbers justify the insane hell-bent agenda of spending \$2-billion dollars to get you vaccinated? I did a detail analysis for deaths to Covid for the month of December, 2020. It was entitled “**Media Exaggerations, Part 2**” and I posted it on my web page January 1st, 2021. It can be located on page 5 right now of my web page: www.pastorbobreid.com. I can prove by their own statistics they are lying and if you believe the government cares about your or your family, then you are badly mistaken!

This was never a pandemic, not even an epidemic, it was a scamdemic for enslaving humanity to the World Economic Forum’s 4th Industrial Revolution, being run from the highest office of the Octagon elite in Switzerland! It was even planned as far back as 2010, in a Rockefeller Institute project called “LockStep”. For those of you who know your Bible, the world is about to enter the period known as Daniel’s 70th Week. This

starts the Seven Year Great Tribulation period before the Second Coming of Jesus Christ. This suggests that the Rapture is imminent on God's Time Chart!

Here again is the CDC's own data on survivability for Covid-19:

There is now a serious report that those vaccinated are now being considered “spreaders” of the mutated virus, and they can infect those who are not vaccinated. That came as no surprise to me because of what I have read regarding their plans in 2009. The elite planners of this anticipated there would be people such as myself that will never submit to this madness. Those already vaccinated can get re-infected; and we have read the reports having taken place in the past two months. Three weeks ago there was a report of a Catholic convent here in Kentucky where nuns who had been vaccinated and still became re-infected, and two died shortly thereafter. However, those who get re-infected will not do as well as those not-vaccinated. Wearing face masks has proven to reduce one's immunity and made people more vulnerable to a number of respiratory issues.

I may have even had a dose of this back in February. I sensed a cold coming on a Friday afternoon, and by Saturday morning my head and throat confirmed it. I am in the high-risk category being in my 80s and never wore a mask. I immediately began taking 10,000 IU of Vitamin D³ every 8 hours until Monday morning when I got up. I had beat it in two days with Vitamin D³. I continued the increased D3 until Monday evening to make sure I felt my former self. I do take Vitamin C, Zinc, and Elderberry along with Vitamin D³ on a daily basis. The only difference is that I take 4,000 IU of D³ once a day. There is no harm in taking what I did. I know doctors that have taken as much as 50,000 IU a day. We hit 70-degrees today in central Kentucky on March 16th so I will drop back to my regular schedule as long as it stays warm. Let this be a “heads-up” warning to anyone, whether you had a vaccination or do not plan to submit to this biological weapon hoax. My research on this goes back several months before the World Health Organization declared it (falsely) a pandemic.

I have believed it was a “Depopulation” genocidal act three months before it was declared to have been a pandemic on March 10th, 2020. I have loads of evidence to confirm it is a “bioweapon”. Virologists and scientists from four countries: Australia, China, France, and India discovered in April, 2020, that this virus had 18 fragments of HIV1, inserted into the genome of what is being called the Corona virus, or Covid-19. Australia went so far as to cancel its \$1-billion program to vaccinate its citizens once learning of the contaminated pathogen. CRISPR/Cas9 and 5G is how it is engineered!

The world elite are about to bring the U.S. dollar crashing down, and crash the stock market which by the way hit a new high yesterday. This crisis will set off a chain reaction that no one will be able to comprehend and know how to deal with.

There is a belief forming and currently being pushed by the mainstream media and the U.S. Centers for Disease Control that Americans can have their freedom back if they just roll up their sleeves and take the vaccine. This push is being backed by multiple experts who are literally comparing it to the “carrot on a string” in order to get more people to be vaccinated. As I have shared above, their grand plan of coercing ALL to take the vaccine is Luciferian deception from the Pindar himself, Jacob Rothschild. I’m here to tell you that with all his wealth, he will never permit humanity to have freedom. Your freedom will come only through the Lord Jesus Christ. It is all a grand “rat trap” to ensnare humanity into becoming a cyborg in the world of Lucifer’s New World Order!

It has been a few months short of 54 years since I began my study of Bible prophecy. One of the ways that I am convinced we are there – the end point - now has been in studying their use of psychology, their tactics of employing “fear” and “greed” – the two

greatest motivating forces available to the evil depraved minds. The House of Rothschild and their soldiers are experts in the art of employing the tools to motivate, manipulate, and mold the thinking of humanity. In an interview between the Dark Journalist and Catherine Austin Fitts, Lucifer's team are all in now in their game of high-stakes poker. It was decided as to 'what and how' they were going to do back on August 22-24, 2019 at the Federal Reserve annual meeting of the global central bankers in Jackson Hole, Wyoming, and what they set into motion.

The idea that people have refused to hug their children and grandchildren over the fear of contracting the COVID-19 virus is heartbreaking. But even more worrisome is the fact that the CDC thinks it can grant or revoke that "freedom" to folks based on whether or not they take the shot.

"We know that people want to get vaccinated so they can get back to doing the things they enjoy with the people they love," said CDC Director Rochelle P. Walensky, in a statement last week. *"There are some activities that fully vaccinated people can begin to resume now in the privacy of their own homes."*

Our individual freedoms are not granted to us by government or vaccine manufacturers. They are inalienable. This is the very foundation of the Constitution and Bill of Rights which states, *"We hold these truths to be self-evident, that all men are created equal, endowed by their creator with certain inalienable rights, and that among these are life, liberty, and the pursuit of happiness."*

If you go to the southwest desert and catch 100 red fire ants as well as 100 large black ants and put them in a jar, at first, nothing will happen.

However, if you violently shake the jar and dump them back on the ground the ants will fight until they eventually kill each other.

The thing is, the red ants think the black ants are the enemy and vice versa, when in reality, the real enemy is the person who shook the jar.

**This is exactly what's happening in society today:
Liberal vs Conservative
Black vs White
Pro Mask vs Anti Mask**

The real question we need to be asking ourselves is who's shaking the jar and why?

—Alex Morton

JOIN US ON FACEBOOK AT HUMAN REFORM POLITICS

Leana Wen, an emergency physician and visiting professor at George Washington University Milken Institute School of Public Health, and the previous health commissioner for Baltimore is leading that charge. In an interview with Chris Cuomo on CNN, Wen expressed her discontent with states going back to normal without touting the vaccine as the reason for doing so.

“We need to make it clear to them (Americans) that the vaccine is the ticket back to pre-pandemic life,” Wen said, adding that states opening back up is not allowing for government to tout the vaccine as that ticket back to normal. She then went on to insinuate that government needs to make sure that vaccination is required in order for states to reopen. The nerve of this bx&@#, if you know what I am saying!

“We have a very a very narrow window to tie reopening policy to vaccination status,” she said. Wen then went on to say that freedoms must be limited or otherwise people won't line up to get the shot. She literally compared the population to a donkey following a carrot on the stick that is dangling their freedoms in front of them.

“Otherwise, if everything is reopened, what's the carrot going to be? How are we going to incentivize people to get the vaccine?” she asked.

She then called on the CDC and Biden to *“come out a lot bolder”* and tell people that *“if you're vaccinated, you can do all these things.... Otherwise, people are going to go out and enjoy these freedoms anyway.”*

When tens of thousands of adverse events, along with nearly 2,000 deaths are reported after receiving the vaccine, this is significantly statistical data to at least raise a red flag and to proceed with caution. By the way, *'Newsweek'* fact-checked that number and confirmed it is true. However, the mainstream media, Big Tech, and the government alike, have chosen to double down on pushing the notion that the vaccine is 100% safe and we need it for freedom. Dangerous times, indeed!

For those of you standing your ground, do not quit now. There is a huge reward for those who place their trust in the Lord Jesus Christ. It will be better than any carrot on a stick Lucifer is offering! Taking the “gene” therapy shot will re-write your DNA as I have explained it by the use of CRISPR/Cas9. Your eternal destiny is likely linked to this “winner take all” high-stakes poker game being waged in the heavens as well as on earth. YOU ARE BOTH THE PRIZE AND THE VICTIM – and it's your choice to make!

Blessings, keep looking up, Jesus is at the door!
