

# **Covid shots are Here to Stay! FDA Set to Announce Indefinite Annual Rollout — Similar to Winter Flu Vaccine Schedule**

## *Yeah – When Pigs Fly!*

Covid shots are set to become an indefinite part of American life under plans drawn up by health officials. The Food and Drug Administration.

Covid shots are set to become an indefinite part of American life under plans drawn up by health officials.

The Food and Drug Administration (FDA) advisory panel will vote on Thursday on whether to switch the Covid vaccine rollout to a yearly schedule similar to the flu shot program.

Under the new plan, Americans would get a Covid shot every fall, which would be updated according to whichever variant is most dominant at the time.

It comes as U.S. government contracts with vaccine makers Moderna and Pfizer are due to end this year, leading the companies to quadruple the price of the shots. While Americans will not actually pay this hike out-of-pocket, premiums all round will still be pushed up.

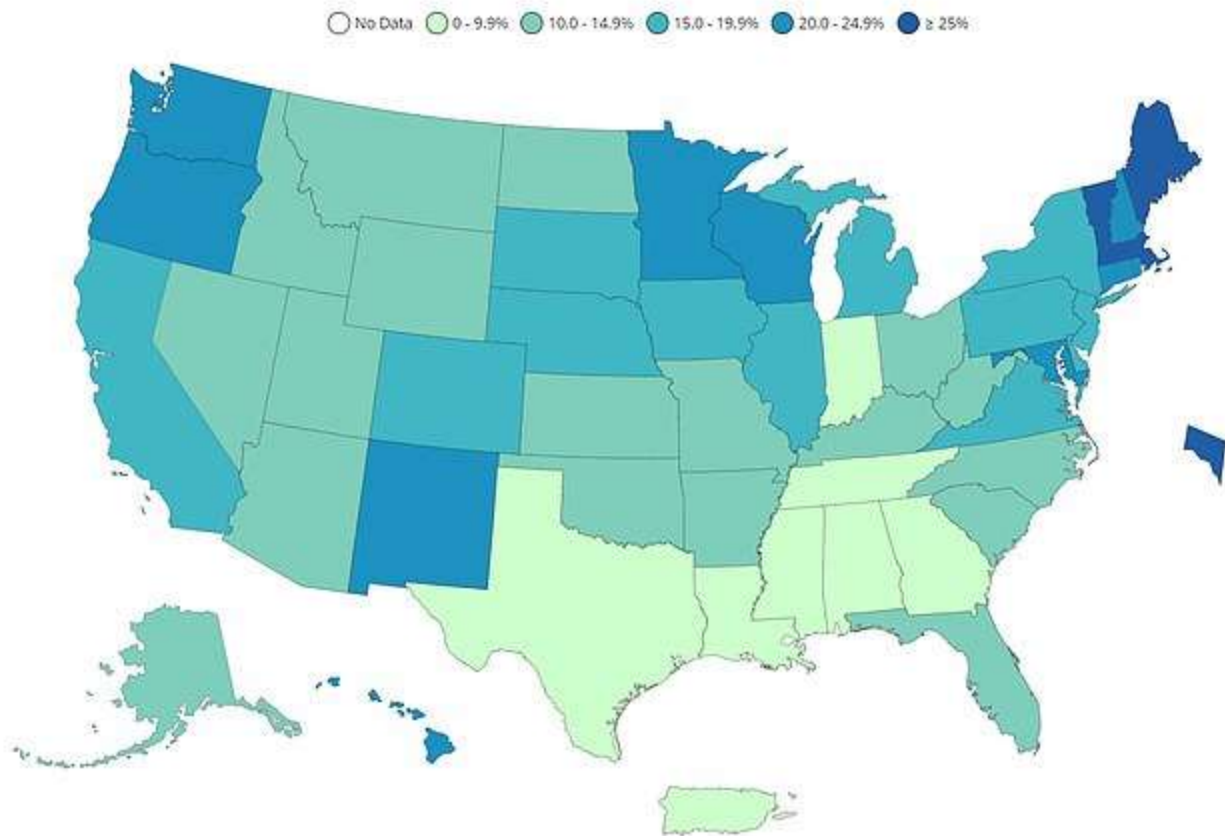

I doubt that once folks have seen the just released video: [PFIZER VACCINES CONTAIN SNAKE VENOM PEPTIDES](#) posted on 01/23/23 that anyone will be so inclined to take either the annual flu vaccine or their Covid-19 vaxxes. Not only the stunning evidence on how the CIA has been behind the use of Snake Venom Peptides for decades; there is other reports by Attorney Todd Callender has revealed that Cesium 137, a radioactive isotope are inside the vaxxes and once induced with **5G** wireless energy will boil and ultimately ruptures at a 18 GHz frequency. When this occurs the spike protein breaks it will release its death pathogens., The diabolical people behind this Mass Murder of Global Genocide have employed a variety of ways to accomplish their goal of Depopulation. For example, the Apple iPhone 14 series as well as other **5G** cell phones are equipped with a Cesium 137 microdot/chip. This Cesium 137 chip has a half-life of 30.7 years. It was installed in the new **5G** cell phones for precise GPS location in 911 emergency calls. Cesium-137 is the power source for all atomic clocks. The down side of Cesium-137 is that it is a radioactive isotope that can and will cause cancer to its owner or user.

You can read more about the Cesium 137 in my article: [It All Began With GPS](#) and Why You Should Not Buy or Own A **5G** Cell Phone! I posted this article just before Thanksgiving, 2022.

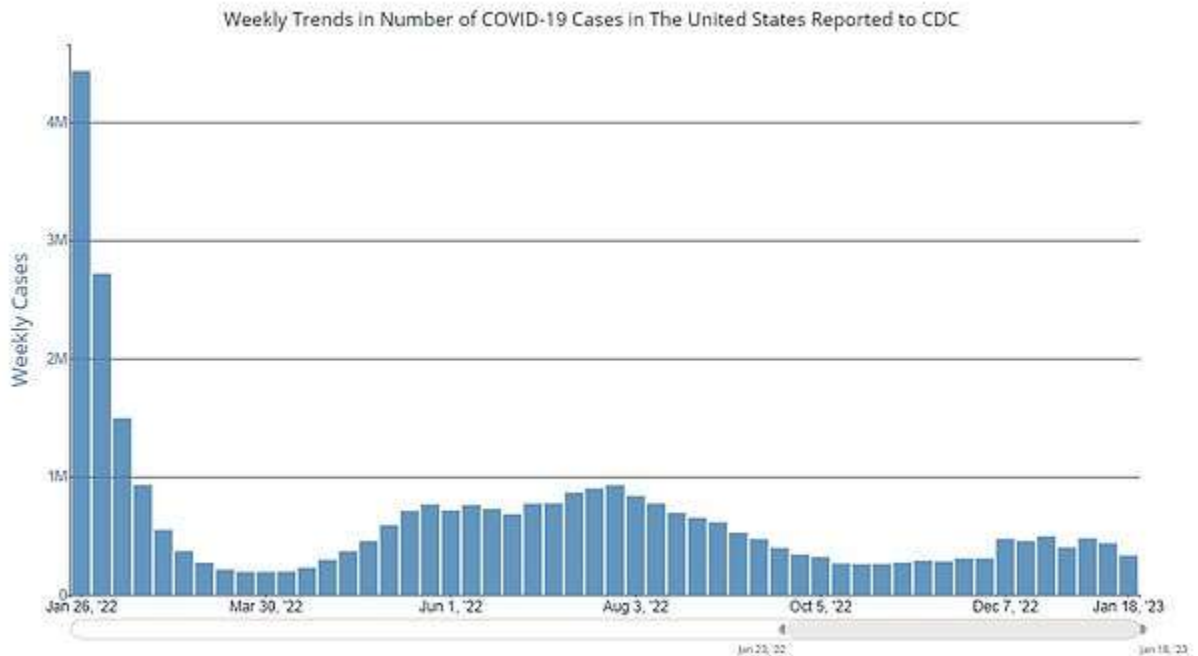

Currently, U.S. adults need to have had three Covid shots (two original and one booster) to be considered fully vaccinated against Covid.

Percent of the Total Population with an Updated (Bivalent) Booster Dose Reported to CDC by Jurisdictions and Select Federal Entities

More than 25 percent of the residents in Maine, Vermont, Massachusetts and D.C. received their updated bivalent booster dose.

Current weekly Covid cases have plateaued in America, leading the FDA to consider a simplified vaccine schedule. The XBB.1.5 sub-variant now makes up around 28 percent of U.S. Covid-19 cases.

At the moment, people must have their two shots of the original Covid vaccine, plus a booster received at least two months later, to be considered fully vaccinated.

If the panel votes in favor, the majority of the population would be advised to have the latest iteration of the vaccine every fall, regardless of how many shots they have already had and when they received them.

Pfizer and Moderna's bivalent vaccines, which target both the Omicron and the original variants, would be used for all Covid vaccine doses, and not just as boosters.

Last month, the European Medicines Agency regulator said the bivalent shots can be used as primary vaccinations.

The FDA has also asked the vaccine advisory panel to look at giving two shots a year to some young children, the elderly and immunocompromised individuals.

Vaccine manufacturers would update the shot according to whichever variant was most dominant at the time, as is done with the flu jab.

Health officials believe the move would improve vaccine uptake.

[Documents](#) released ahead of Thursday's meeting said: *'FDA expects that simplification of Covid-19 vaccine composition and annual immunization schedules may contribute to more facile vaccine deployment, fewer vaccine administration errors, and less complex communication, all potentially leading to improved vaccine coverage rates and, ultimately, to enhanced public health.'*

Only 15 percent of the US population have received the updated Covid booster shot so far, [according to CDC data](#).

The Biden Administration has also been pushing for Covid boosters every fall season.

The bivalent jabs were touted as being able to boost protection against the Omicron strain, but several studies suggest they are no more effective than the original Covid shots.

In September, Dr. Ashish Jha, White House Covid-19 Response Coordinator, said: 'I really believe this is why God gave us two arms — one for the flu shot and the other one for the Covid shot.'

In the spring, as it became apparent that an annual jab would likely be the preferred policy, some experts questioned whether the data supported an annual jab.

'It's alarming that there hasn't been organization around these vital questions so that we can actually answer them in a very enlightened and data-driven and knowledgeable manner,' said Luciana Borio, a former acting chief scientist at the FDA who is now a senior fellow for global health at the Council on Foreign Relations.

She said in April: *"It's so reactive. And we know that this just snowballs. And we end up being stuck with decisions that don't really make sense."*

It comes as Moderna and Pfizer are planning to jack up the price of the Covid shot when it hits the open market after doses bought by the US government run out.

Americans can expect to pay around \$130 for Moderna's vaccine, which is estimated to cost just \$1.18 to make, representing a 10,000 percent markup. The vaccine is currently sold for around \$26 a dose. They expect the World Health Organization to implement its Global Pandemic policy in the coming months as part of the UN plan to supersede sovereign state legislation or constitutions. Under the UN/WHO plan people will be mandated to have whatever vaxxes deemed mandated and the public will have to pay for their own suicide executions in the process.

If you do not believe me, then read the article linked here: [WHO & WEF Vow To Strip Nations of Their Sovereignty, Create Globalist Totalitarian State](#)

Moderna - which turned an estimated \$39bn in profit last year - benefitted from a multi-billion-dollar taxpayer-funded support package for designing and testing its Covid shot as part of the Trump administration's Operation Warp Speed.

The subsidized shots have thus far been free for all Americans regardless of whether they have health insurance.

And while insured Americans likely won't see a difference when they go to get the shots, those without coverage will be saddled with a high price.

Insurance premiums will cover the price hike, meaning Americans will not actually pay out-of-pocket, but it will still push up premiums all around.

If you want to know the real reason why the country wants you dead, read the following report posted January 23, 2023. Dr. David E. Martin let the 'cat out of the bag' more than two years ago, by stating that the government had broken its "Social Contract" with the citizens of the U.S. in the mid-1990s and decided to let it go bust! The following link contains many reports from Dr. David E. Martin and the Plandemic set to depopulate the rolls of Social Security in the link below:

**Social Security under threat: Major trust funds could run out of money by 2033 as US population gets older and the 'baby boomer' generation retires**  
[January 23, 2023 News](#)

Updated predictions regarding three of the major Social Security funds cast a grim shadow on the future ahead for the U.S. population.

According to the latest projections from the [Congressional Budget Office](#), two of the funds will be drained by 2033 while another major fund will be gone by 2048.

The Old-Age and Survivors Insurance Trust Fund are the two funds most in danger of being depleted while the CBO says the Disability Insurance Trust Fund is also of grave concern.

Social Security spending has been on the rise as more Americans hit retirement age and leave the workforce, solely relying on the fund's benefits. There have been rumors to the effect that the U.S. has been using Social Security funds to re-settle as many as 40-million illegals into the U.S. Mexico's President stated days ago that there are 40 million ex-Mexican citizens now living in the U.S.

On January 10<sup>th</sup>, Joe Biden's double signed a document "Declaration of North America" (DNA). In essence this document is nothing more than the repackaged plan to the

return of the “Amero” to replace the U.S. dollar, the Canadian dollar, and the Mexican peso. Read the document at the link below:

[Declaration of North America \(DNA\) | The White House](https://www.whitehouse.gov/briefingroom/statements...)  
<https://www.whitehouse.gov/briefingroom/statements...>

This plan was originally suggested as Region 1 of the 10 global economic regions of the “NWO” or New World Order. The book of Revelation in the Bible states the world will be divided into 10 regions or horns in Revelation 13:1. **“And I stood upon the sand of the sea, and saw a beast rise up out of the sea, having seven heads and ten horns, and upon his horns ten crowns, and upon his heads the name of blasphemy.”** The seven heads are the seven continents and the ten horns and ten crowns are symbolic of ten economic regions. Each region is an economic-political-religious entity unto itself.

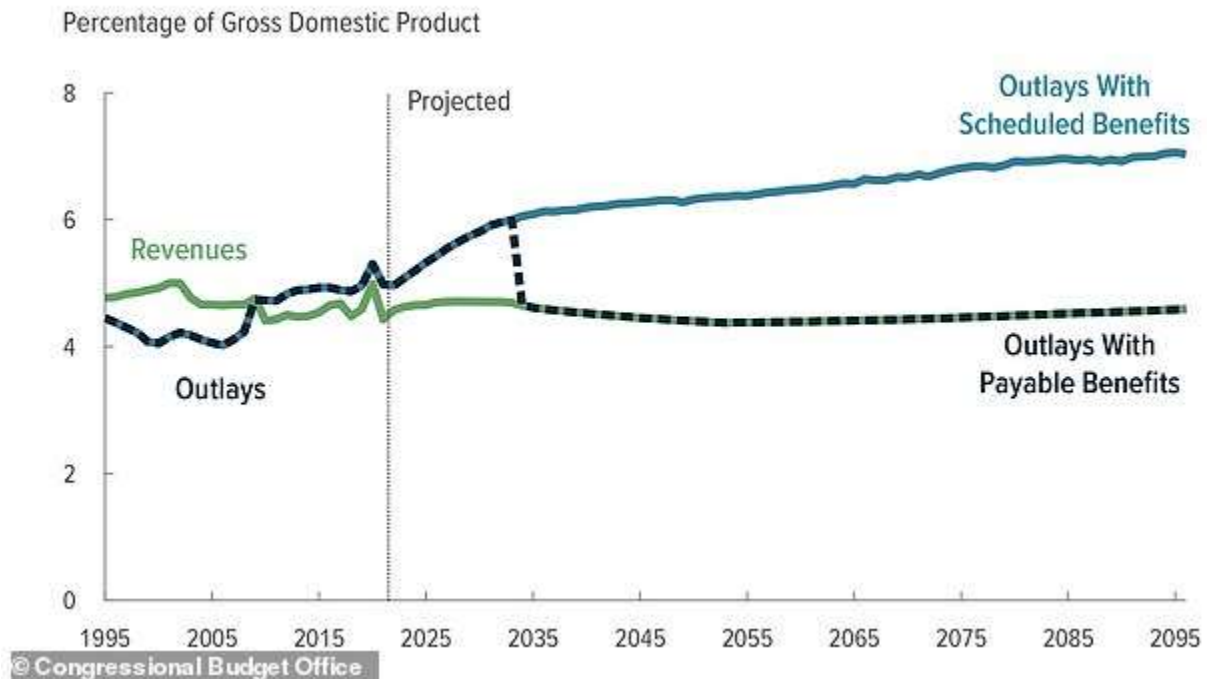

The designated 10 global regions is not new by any means. There exists maps of such a structure dating back to the year of 1940. However it has been long in coming to fruition. Davos 2023 is the latest phase of bringing the world under a New World Order; call it Klaus Schwab’s “Fourth Reich” or “Fourth Industrial Revolution” and his Nazi “Great Reset”.

*‘The New World Order’* is a non-fiction book written by H.G. Wells and was published by Secker & Warburg in January 1940 in England. In *The New World Order*, Wells proposed a framework of international functionalism that could guide the world towards achieving world peace. To achieve these ends, Wells asserted that a socialist and scientifically planned world government would need to be formed to defend human rights.

The 1935 Social Security Act was in fact a “Ponzi” Scheme, doomed to fail when at a future time, (that time is now) there would not be enough new participants to pay off its obligations to those retiring in the next decade or two.

Updated predictions regarding three of the major Social Security funds cast a grim shadow on the future ahead for the U.S. population

**According to the latest projections from the Congressional Budget Office, two of the funds will be drained by 2033 while another major fund will be gone by 2048**

The news of the projections comes as Social Security recipients saw a major boost in their payments beginning in 2023.

Social Security hiked the benefits by 8.7 percent beginning in January to combat record inflation. The increase marks the highest cost of living surge since 1981. The COLA or cost of living adjustment fell short of true inflation by upwards of 40%.

The latest projections from the CBO found that the current gap between the outlays from the funds and the revenue received - if continued over the next ten years- will cause the fund to officially hit zero.

Should that happen, the Social Security Administration would be unable to pay out full retirement benefits to retirees as they become eligible.

Even if the Disability Insurance Trust Fund and the Old-Age and Survivors Insurance Trust Fund were to be combined, the fund would still run out by 2033.

The funds have additionally been stressed as they have been used to pay out payroll tax revenue to retirees.

**The Old-Age and Survivors Insurance Trust Fund are the two funds most in danger of being depleted while the CBO says the Disability Insurance Trust Fund is also of grave concern.**

**The news of the projections comes as Social Security recipients saw a major boost in their payments beginning in the new year of 2023.**

**When President Franklin D. Roosevelt signed into law the Social Security Act of 1935, retirement eligibility was set at 65 years of age, and the life expectancy in 1935 for white males was 59.5 years, and 47.3 years for black males. In 1935, the average age of life expectancy was 61.7 years. However, eligibility to collect was set at 65 years of age. You can easily see that President Roosevelt was ‘gaming’ the system to make it sound better than it actually was.**

**The CDC reported that Life expectancy in 2023 is 79.11 but actuarial tables suggest life expectancy has decreased by 2 years since the Covid plandemic. Life expectancy at birth in the United States declined nearly a year from 2020 to 2021, according to new provisional data from the CDC’s National Center for Health Statistics (NCHS). That decline – 77.0 to 76.1 years – took U.S. life expectancy at birth to its lowest level since 1996. The 0.9 year drop in life expectancy in 2021, along with a 1.8 year drop in 2020, was the biggest two-year decline in life expectancy since 1921-1923.**

**The elderly were the first to die when the Covid plandemic was executed, and the biggest benefactor of elderly mortality is none other than the Social Security Administration.**

**Average Initial Annual Benefits for Retired Workers, by Birth Cohort**

2022 Dollars

In CBO's projections, average initial scheduled benefits for retired workers increase over time, even after adjusting for inflation. For example, initial benefits are larger, on average, for people born in the 1990s (who turn 65 beginning in 2055) than for older beneficiaries.

**Average Initial Annual Benefits for Retired Workers, by Birth Cohort and Earnings Quintile**

2022 Dollars

Within a given cohort, retired workers with higher lifetime household earnings generally receive larger initial benefits. Across cohorts, average initial benefits are projected to increase for all earnings quintiles (or fifths of the distribution), three of which are shown here.

© Congressional Budget Office

**Social Security spending has been on the rise as more Americans hit retirement age and leave the workforce, solely relying on the fund's benefits.**

The CBO also predicts the fund will continue to spend five percent of the United States' GDP. The fund will eventually rise to seven percent by 2096.

The actuarial deficit is predicted to amount to 1.7 percent of GDP or 4.9 percent of taxable payroll over the next 75 years.

The forecast means the balance in the funds could be maintained if there was an immediate increase of nearly 5 percent increase on payroll taxes.

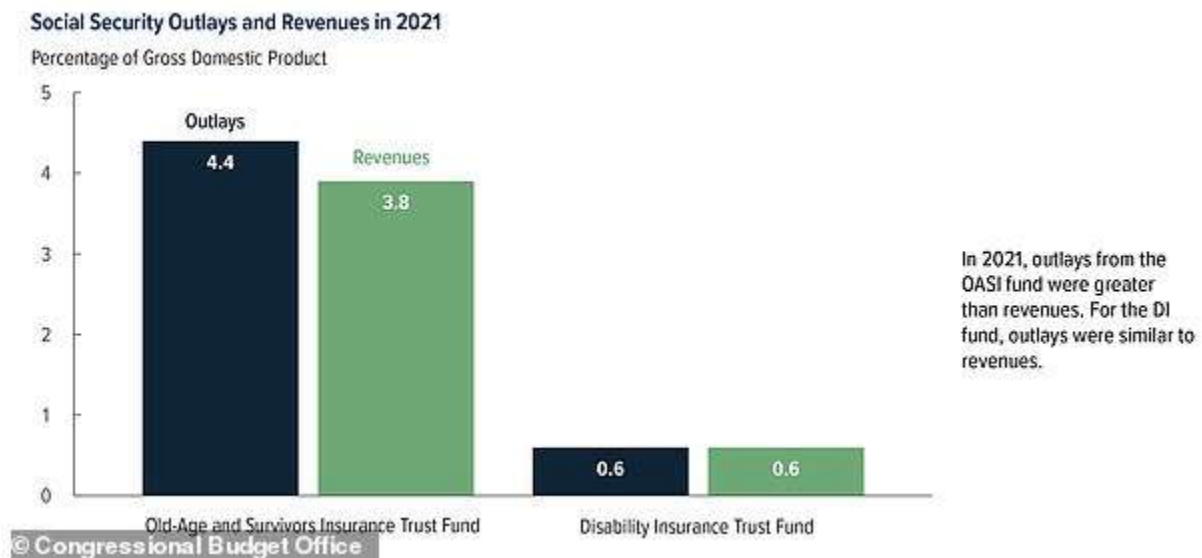

Social Security funds could also be maintained if there was a reduction in overall benefits for retirees. If only examining what is available from tax revenues, the payments would be roughly 23 percent smaller than scheduled by 2024.

U.S. law could step in the way of reducing Social Security benefits, however, if that were to be proposed as an official solution.

As of now, there is no law on the books for reducing benefits to what is available based on payroll taxes.

The CBO also predicts the fund will continue spend five percent of the United States' GDP. The fund will eventually rise to seven percent by 2096.

The latest projections from the CBO found that the current gap between the outlays from the funds and the revenue received- if continued over the next ten years- will cause the fund to officially hit zero.

The actuarial deficit is predicted to amount to 1.7 percent of GDP or 4.9 percent of taxable payroll over the next 75 years.

This comes as lawmakers are currently sparring over how to address the debt ceiling, with some calling for cuts to Medicare and Social Security.

The U.S. officially hit the debt limit on Thursday, and the GOP is working on solutions on how to raise it before a potential default as soon as June.

Last week, former President Donald Trump made headlines for warning his fellow Republicans to not 'destroy' retirement benefits.

*“Under no circumstances should Republicans vote to cut a single penny from Medicare or Social Security to help pay for Joe Biden’s reckless spending spree, which is more reckless than anybody’s ever done or had in the history of our country,”* Trump said in a video message posted on social media.

*“Do not cut the benefits our seniors worked for and paid for their entire lives. Save Social Security. Don't destroy it!”* Trump continued.

According to the CBO, Social Security accounted for 17 percent of federal spending in 2021.

**Donald Trump issued a warning to House Republicans, led by Kevin McCarthy (right), not to go after social entitlement programs as they look to force savings in the debt ceiling fight.**

Trump called out Biden's agenda, calling the president's spending *“out of control.”*

*“While we absolutely need to stop Biden’s out of control spending, the pain should be borne by Washington bureaucrats, not by hard-working American families and American seniors,”* Trump said.

The former president says cuts should be made against *“corrupt foreign countries”* and *“climate extremism,”* as well as *“left-wing gender programs from our military.”*

*“The seniors are being absolutely destroyed in the last two years,”* Trump said.

A 2020 AARP poll of nearly 1,500 adults found that 96 percent said Social Security was either the most important government program or an important one compared to other government programs.

Blessings,
