

# CORONAVIRUS PANDEMIC:

## A Crisis That Compels Everyone To Think For Themselves

### **The Covid Crisis—Thinking for Yourself May Be the Only Regimen for a Full Recovery Part 3**

“Most tyrannies have been possible because men moved too late. It is often essential to resist a tyranny before it exists.” G.K. Chesterton, *Eugenics and Other Evils*:

#### *An Argument Against the Scientifically Organized State*

We have just compared the demands made by governments (to protect us from a vicious and omnipresent viral scourge) to the harmful results (economic, health, individual freedoms) brought about by acquiescing to those demands while no pandemic materialized. We examined the censorship of all information departing from the official narrative and the harmful nature of the enforced vaccinations that lack efficacy and consistently demonstrate harm. This week, we shine a spotlight on those individuals and organizations who have brought about this complete upending of life for the whole planet; we offer solutions to help put an end to the monkey business so we can regain the joys of living.

#### **Special Interest Groups with Undisclosed Agendas**

There is no doubt that there are as many agendas, both hidden and open, regarding this pandemic as there are companies, associations, and individuals who would benefit in some way—such as from a vaccine being enforced on the worldwide population; or governments of certain countries or even political parties, etc. positioning themselves in pursuit of their own interests (certain Democratic party leaders, for instance, are on record as saying they should take advantage of the pandemic to pass laws favorable to their political goals or to oust a **sitting president**. Even the WHO has an agenda, including trying to levy a **10% tax** on all countries to “fight the virus.”

Vaccines are the **cornerstone** upon which governments are relying for their Covid-19 strategy, yet as covered earlier in this series, vaccinations for viruses have **limited efficacy** and plenty of **downsides**.

One might be curious as to what is driving this fixation for mandatory vaccines as the solution, especially considering the normally lengthy time-to-market for such vaccines and the concomitant financial collapse being visited upon the entire planet.

Curiously enough, key players seem to be the richest individuals in the world and their foundations: Mr. Rockefeller and his foundations and the same Mr. Gates who brought us buggy software programs (disclaimer—the author is a decades-long Macophile).

The stage was set “in the early 1900s, [when] America’s first Billionaire, John D. Rockefeller bought a German pharmaceutical company that would later assist Hitler to implement his eugenics-based vision by manufacturing chemicals and poisons for war. Rockefeller wanted to eliminate the competitors of Western medicine, so he submitted a

report to Congress declaring that there were too many doctors and medical schools in America, and that all natural-healing modalities were unscientific quackery. Rockefeller called for the standardization of medical education, whereby only his organization be allowed to grant medical school licenses in the US. And so began the practice of immune suppressive, synthetic, and toxic drugs. Once people had become dependent on this new system and the addictive drugs it provided, the system switched to a paid program, creating lifelong customers for the Rockefellers. Currently, medical error is the third leading cause of death in the US. Rockefeller's weapon to success was the strategy known as, "problem-reaction-solution." Create a problem, escalate fear, then offer a pre-planned solution. Sound familiar?" *Plandemic movie literature*

"Those who are capable of tyranny are capable of perjury to sustain it." *Lysander Spooner*

Using this preferred medicine paradigm, the fledgling pharmaceutical industry, took advantage of the millions of American Army recruits called up for war in 1917 to test up to 25 vaccines designed to cause a mild case of the disease they were supposed to prevent—the problem being that it was impossible to predict whether the case would be mild, severe, or fatal—as some prove to be instantly. Many of the **vaccines** brought about unrelated diseases, such as the smallpox vaccine causing syphilis, paralysis, leprosy, and cancer. The yellow fever vaccine alone resulted in 63 deaths and 28,585 cases of hepatitis in half a year. The Rockefeller Institute for Medical Research in New York oversaw the **Bacterial Meningitis Vaccination Experiment** at Fort Riley Kansas in 1918, wherein thousands of US Army recruits were vaccinated with a horse-cultured vaccine. These soldiers exported the **Spanish Flu** as it came to be known to the world, killing up to 100 million people with bacterial pneumonia (not a flu or virus)—the largest death-event in recorded history.

Mr. John D. Rockefeller's debut in the field of medicine left something to be desired. Was he a doctor? No, a rapacious oil tycoon and a businessman interested in accumulating even more money and power. If Mr. Rockefeller really wanted to protect his fellow citizens, he would not have engaged in the strategy outlined above, focusing on the use of chemicals as outlets for his oil empire that are only capable of alleviating symptoms, rather than the preferred (for citizens) focus on preventing or curing diseases. To downplay this contrast, the medical community has lobbied for it to be illegal in the US, at least, to cure, or to state that one can cure anything and has conditioned patient expectations to managing symptoms, not enjoying a cure. Any doctors who cure patients find themselves on a fast track to **being shut down, often at gunpoint** or **simply murdered**.

Note: This is not an attack on western medicine, which definitely has its place, as do traditional, alternative, and integrative medicines. A true medical science focused on prevention, alleviating, and curing would be good for patients, but not the pocketbooks of pharmaceutical and other vested interests that profit from managing sickness rather than building health and curing ailments.

***Mr. Gates Switches from Software to Vaccines***

In March 2017, Mr. Gates told the US President, who was concerned about vaccine safety, not to establish a Vaccine Safety Commission headed by Robert Kennedy, Jr. so it was not set up. Just to be clear, Mr. Gates is not a public health expert, a doctor, an epidemiologist nor an infectious disease expert. He is simply one of the richest men in the world, which does not give him expertise in medical matters, but does in making money (and computer programs, specifically, although **stealing** software and control and “brain rape” of competitor breakthroughs may not reflect software genius so much as a deficient business ethics).

Looking at how Mr. Gates (the Rockefeller Foundation and others) has been steering this whole pandemic response, let's examine a partial timeline of Covid-19 activities involving Mr. Gates or his Foundation over the last nine months:

1. October 18, 2019, the Bill and Melinda Gates Foundation co-hosted Event 201 in New York, a high-level simulation of a coronavirus pandemic that predicted **65 million deaths** within 18 months;
2. February 4, 2020 with eleven active cases in the USA, Dr. Fauci (Director of the US National Institute for Allergy and Infectious Diseases [NIAID] of the National Institute of Health [NIH] and also on the Board of Directors of the Gates Foundation) quietly pushed through regulations giving coronavirus vaccine makers full immunity from liability, in order to accommodate Mr. Gates, who had been funding multiple vaccine development efforts and owns major stakes in the leading vaccine makers; he had refused to distribute any vaccines until the government agreed to indemnify vaccine producers against lawsuits—he was worried about the dangers of adverse reactions to vaccines, a real concern as reported by Robert F. Kennedy, Jr.

“Scientists first attempted to develop a coronavirus vaccine after China’s 2002 SARS-CoV outbreak. Teams of US & foreign scientists vaccinated animals with the four most promising vaccines. At first, the experiment seemed successful as all the animals developed a robust antibody response to coronavirus. However, when the scientists exposed the vaccinated animals to the wild virus, the results were horrifying. Vaccinated animals suffered hyper-immune responses including inflammation throughout their bodies terminating with fatal lung infections. Researchers had seen this same ‘enhanced immune response’ during human testing of the failed RSV [a respiratory virus] vaccine tests in the 1960s.”

1. Mid-February, Microsoft software used by **Neil Ferguson**, the British epidemiologist at Gates-funded Imperial College in London, predicted the Wuhan virus, in the absence of an extended lockdown, would result in 2.2 million American and 500,000 British deaths. Thus were lockdowns initiated in both countries and elsewhere—whereas the evidence given earlier in this article shows that with or without lockdowns, mortality rates are low and occurring in the old and ill, not the entire population—which would really call for a quarantine of at-risk individuals, not all of society;

2. March 13, 2020, Mr. Gates resigned from Microsoft, saying he wanted to focus on his “philanthropy;”
3. March 18, 2020, Mr. Gates says “Eventually we will have some digital certificates to show who has recovered or been tested recently or when we have a vaccine who has received it.” Such a system is being introduced into Bangladesh as part of project **ID2020** to create a global digital ID, beginning with immunizations, and “**ultimately, supporting access to rights and services throughout one’s life-course.**”—all backed by the UN, the Rockefeller and Gates Foundations. Mr. Gates funded an **invisible Quantum Dot** to be tattooed onto the skin of children to identify those who have been vaccinated (December 2019, MIT).
4. March 27, 2020, Dr. Fauci, as head of the White House’s coronavirus task force, fast-tracked his own vaccine (partially funded by Mr. Gates) and seven of Mr. Gates’ vaccines, setting aside the vital animal trials normally conducted that would provide early warning of runaway and fatal immune responses (as happened with SARS vaccine trials in 2002). Full testing protocols are especially important for these Covid-19 vaccines as the new technology being introduced includes risky **genetically engineered** vaccines—**mRNA vaccines**, for instance, use nanotechnology to transport the RNA of the virus **inside liquid droplets** into every cell of the body and reprogram them to produce the virus’ spike protein and so confer immunity. April 4, 2020, Mr. Gates announced the investment of billions of dollars to build **seven factories** to start making various Covid-19 vaccines;
5. April 5, 2020, Mr. Gates announced on **Fox Business News** “It is fair to say things won’t go back to truly normal until we have a vaccine that we’ve gotten out to basically the entire world.” This position, and implementing a digital proof of vaccination, was echoed by Dr. Fauci;
6. Mr. Gates is the #1 funder of the **World Health Organization**, which withheld information given to them by Taiwan on December 31 about human-to-human transmission of the Wuhan virus, ignored statements from Wuhan doctors to the same effect, and stated on January 22 that the coronavirus did not pose a public health emergency of international concern, thereby justifying continued international travel from Wuhan and China. All the while, the WHO praised China’s response despite *their* continued obfuscation of the real situation. Then the WHO created an international panic and global depression by overstating the mortality rate of COVID-19. As a **side note**, the Director-General of the WHO, Tedros Adhanom Ghebreyesus, who mismanaged the Covid-19 crisis, is not a doctor but *is* a member of two Ethiopian communist parties linked to terrorism. He covered up three cholera outbreaks in the country while Minister of Health and he made it to Director-General of the WHO after a stint as Chair of the Gates-funded *Global Fund to Fight AIDS, Tuberculosis, and Malaria* and as a Board member of the Gates-funded *Global Alliance for Vaccines and Immunization* (GAVI);
7. May, 4, 2020, the Gates Foundation is exposed greasing the wheels with \$10 million in bribes to lawmakers for the smooth passage of a mandatory vaccine law in **Nigeria**, even though The Nigeria Centre for Disease Control had no input and opposed the bill;

8. May, 2020, Bill Gates suggests on **CNBC** that 700,000 could suffer side effects from any new vaccine (0.001%);
9. May, 23/24, two of the fast-tracked Gates vaccines prove to be a **failure**, when all the inoculated monkeys fell ill, yet they forged right ahead with the human trials; the **second** vaccine trial with Moderna was too brief and small to be significant, but resulted in 20% of the high-dose recipients becoming severely ill, which fact was withheld from the public. With such rushed and perfunctory trials, it is hard to see how only 0.001% recipients would suffer side effects, as claimed by Mr. Gates, whereas the trials showed 20%-100%. The media painted the trials as great successes, but when these facts were made known by Robert F. Kennedy Jr., they were removed immediately by **Facebook**.

### ***Following the Money is Usually Good Therapy for Cases of Fraud***

Mr. Gates is not the only player working the vaccine angle behind the scenes—there is also Dr. Fauci.

1984 to present, Dr. Fauci has been serving as the director of the **National Institute of Allergy and Infectious Diseases** and as such, led the charge in dealing with viral diseases like HIV (**to disastrous results**), **SARS**, the 2009 swine flu, **MERS**, **Ebola** and **COVID-19**. He oversaw labs working on research that mutates and genetically modifies viruses that are already harmful in order to make them even more harmful (**gain of function**);

2012, Dr. Fauci is appointed to the **Leadership Council** of the Gates Foundation-created Global Vaccine Action Plan;

October 2014, the US government passed a **moratorium** on gain of function research; 2015, under Dr. Fauci's direction, the North Carolina University lab ignored this moratorium, taking the SHC014 strain of the coronavirus, adding the "backbone" of the SARS virus, and **inserting HIV and MERS orthologs** (genes shared by different species) to create **SARS-CoV-2**; another **scientific analysis** explains why the virus is genetically engineered and not natural;

2019, Dr. Fauci transferred \$7.4 million of taxpayer money to the **Wuhan Institute of Virology** via the National Institute of Health to **create** a more virulent virus;

November 17, the **first case** of Covid-19 is recorded in Wuhan;

19 January, The first Covid-19 **patient** to be treated in the US was administered Remdesivir—even though no trials had been conducted and were only started in the US at the end of February—it being curious why the doctors would have selected Remdesivir;

Remdesivir is made by just one company: Gilead Sciences at a reported **cost** of \$1-29 to manufacture while selling it for **\$3,120** for a 5 vial **treatment**. Their Covid-19 trial had **no control group** so no way of demonstrating that Remdesivir works better than other treatments. The government trial included a randomized control group, but mid-trial, the

doctors gave the control group **Remdesivir**, too, nullifying any possibility of knowing the effectiveness of the drug. The **results**? 8% of Remdesivir patients died vs. 11.6% in the control group, and recovery times were reportedly reduced from 15 days on the placebo to 11 days. In other words, miniscule gains, even assuming that the unprofessionally executed tests were valid. A smaller **Chinese trial** at the same time showed no benefit from Remdesivir.

Despite these lackluster results, and the fact that Remdesivir already failed to achieve results with another viral outbreak, **Ebola** (being too expensive and resulting in a 33% death rate compared with another drug with a 6% death rate) and with significant known side effects, Dr. Fauci asserted **Remdesivir** would “be the standard of care” for Covid-19 and **one million vials** of the drug were shipped to US hospitals at the beginning of May. By July, trials proved disastrous, with 80% adverse side effects, including **40% renal failure** requiring transplants. This did not prevent Gilead from proclaiming their tests to be very **encouraging**. Furthermore, 8 out of 53 experts on the NIH COVID-19 Treatment Guidelines Panel were receiving **funding from Gilead**.

**Dr. Fauci** has a long and fraudulent history of medical malpractice with Gilead Sciences, as well as other companies: He developed a false-positive-prone test for AIDS and gained FDA fast-track approval for Burroughs Wellcome’s chemotherapy drug, AZT as a “preventive drug” for HIV-diagnosed patients. According to Roberto A. Giraldo, MD and Etienne de Harven, MD, the scientist who produced the first electron micrograph of a retrovirus, “None of these tests detect the HIV virus itself, nor do they detect HIV particles...more than 70 different documented conditions [including influenza, the common cold, and pregnancy] can cause the antibody tests to react positive without an HIV infection.... The fact that after 25 years of intense research HIV has been neither isolated nor purified in terms of classical virology indicates to us that the infectious view of AIDS as a contagious viral disease is based on an apparently non-existent microbe!”

Dr. Fauci financed clinical trials of the AZT drugs for people who did not have HIV — using toxic HIV drugs on healthy people as a preventative measure to “reduce risk” so they did not get AIDs. Gilead supplied the chemotherapy drug, Truvada for Phase III of these human trials on four groups of 2,000-5,000 test subjects. The CDC then recommended this use of Truvada in 2014 despite two of the four trials being abandoned as unworkable.

Of note is that the same tests are used today to determine SARS-CoV-2-positive. Concurrently, Dr. Fauci contradicts the April 28 **endorsement** by the Association of American Physicians and Surgeons of hydroxychloroquine (with zinc) for the treatment of COVID-19 patients, which in several countries had demonstrated a 90%+ success rate and very low cost. He also invalidated any other potential cures; it is being made very hard and even illegal for doctors to source and use **hydroxychloroquine** with zinc for Covid-19 patients; **fake studies** were conducted without the use of zinc to prove that hydroxychloroquine is ineffective against Covid-19;

China holds the patent on Remdesivir through an agreement with Gilead's drug-patent-sharing subsidiary, UNITAID, which has an office near Wuhan;

The main financial investors in UNITAID are [George Soros](#), the Bill & Melinda Gates Foundation, and the WHO—the latter being funded by the Gates Foundation to the tune of \$2.4 billion over the last two decades.

Mr. Gates' track record is not better than [Dr. Fauci's](#) when it comes to viruses and vaccines. [More](#) from Robert F. Kennedy:

“Promising to eradicate Polio with \$1.2 billion, Mr. Gates took control of India's National Advisory Board (NAB) and mandated 50 polio vaccines (up from 5) for every child before age 5. Indian doctors blame, and are suing, the Gates campaign for a devastating vaccine-strain polio epidemic that paralyzed 496,000 children between 2000 and 2017 [at which point] the Indian Government dialed back Gates' vaccine regimen and evicted Gates agents from the NAB, after which polio paralysis rates dropped precipitously. The World Health Organization reluctantly admitted that the global polio explosion is predominantly vaccine strain, meaning it is coming from Gates' Vaccine Program. The most frightening epidemics in Congo, the Philippines, and Afghanistan are all linked to Gates' vaccines. By 2018,  $\frac{3}{4}$  of global polio cases were from Gates' vaccines.”

“In 2010, the Gates Foundation funded a trial of a GSK's experimental malaria vaccine, killing 151 African infants and causing serious adverse effects including paralysis, seizure, and febrile [fever] convulsions for 1,048 of the 5,049 children.”

“In 2014, the Gates Foundation funded tests of experimental HPV vaccines, developed by GSK and Merck, on 23,000 young girls in remote Indian provinces. Approximately 1,200 suffered severe side effects, including autoimmune and fertility disorders. Seven died. Indian government investigations charged that Gates-funded researchers committed pervasive ethical violations: Pressuring vulnerable village girls into the trial, bullying parents, forging consent forms, and refusing medical care to the injured girls. The case is now in the country's Supreme Court.”

“In 2014, a new 5-shot anti-tetanus campaign was launched in [Kenya](#) but administered only to 2.3 million girls and women of childbearing age—laboratory analysis showed it had been laced with the pregnancy hormone, HCG, developed by the Rockefeller Foundation and the WHO in 1992, which causes miscarriages three years later. This fertility regulating vaccine requires 5 shots, not the usual 3 for tetanus. Similar programs were discovered in Mexico, the [Philippines](#), and Nicaragua at least, prior to 1995.”

Today, we have genetically engineered nanotech vaccines (that reprogram our cells) being fast-tracked through testing, adverse reactions swept under the table in the rush to claim the mandatory-vaccine bonanza for a virus that has already peaked and never amounted to more in severity than the seasonal flu. The labs, corporations, and their backers must believe they are better than nature at programming cells and improving

the human genome, and that this is all worth doing to protect us from viruses when we have a perfectly workable immune system that, unfortunately, does not offer substantial profits to boost compared with the profits proven possible over the last century from a health paradigm based on managing disease with chemicals rather than creating health. Need one go on, or does one see a pattern when “Dr. Gates” attends to the world’s health?

A core mission for the Gates Foundation when founded in 2000 was reducing population numbers, with the accurate premise that improved health would result in reduced population numbers when parents did not feel they needed lots of children in order to ensure at least one survived to look after them in their dotage. The fact that this correct assessment was followed up not with wholesome food (the UN estimates that a mere \$30 billion would **solve world hunger**), clean water, proper nutrition, hygiene, and sustainable farming initiatives to reduce the need for multiple children, but vaccinating every child on the planet with profitable toxins including, without consent of the patients or parents, covert birth-control elements, betrays some other purpose than honest and unselfish philanthropy.

In 2012, Mr. Gates granted **\$20 million** to MicroCHIPS Biotechnology to create an implantable birth-control device that could be turned on or off remotely, which was produced by 2014.

By 2017, the goal had morphed into providing every child with a digital biometric identity—indicating that population control no longer referred to controlling the numbers of people, but the people themselves. GAVI joined the ID2020 Alliance to spearhead a global digital-biometric-identity standard.

And so we come to 2020, when Mr. Gates answered the question: “What changes are we going to have to make to how businesses operate to maintain our economy while providing social distancing?” **with** “Eventually we will have some digital certificates to show who has recovered or been tested recently or when we have a vaccine who has received it.” He did not let on that he had been spearheading the whole idea and invested in it, including enrolling the entire Indian population in a biometric identification database.

The digital ID for health was paralleled by the *Better Than Cash Alliance* founded by the Gates Foundation in 2012 “to accelerate the transition from cash to digital payments globally” and sold as an opportunity for “financial inclusion” of the world’s poorest in the banking system—not that the **Indians** felt empowered when 87% of their cash was made illegal in 2016 and most of them operated only with cash. It is equally a system for exclusion of any person or transaction not approved by the authorities—much along the lines of the ongoing **ensorship** of all information by social media and tech giants that does not align with the official narrative for Covid-19 or vaccines.

Most of the **players** behind the vaccination drive are funded by the Gates Foundation: the *Coalition for Epidemic Preparedness Innovations*, to which the NIH/NIAID has outsourced oversight of the vaccination program, GAVI and the WHO.

One has to wonder how many billions the Rockefeller and Gates families and interests have made and will make with their philanthropy. Over the past two decades, the Gates Foundation has given \$250 million in charitable grants to companies in which the foundation holds corporate stocks and bonds, while receiving tax breaks for these charitable donations. Another example: Mr. Gates' GAVI hired a company to lobby the Canadian Prime Minister 19 times over the last two years for mass vaccination of Canadian citizens. Canada is now sending nearly \$800 million to GAVI to push vaccines globally, and the *Global Polio Eradication Initiative*, to advance sexual and reproductive health programs, and introduce new Covid-19 vaccines when available.

It is both illegal and disingenuous to take tax deductions for philanthropic efforts that then funnel far more funds into a corporate entity **benefitting the philanthropist's** pocket book as well as improving their image, thereby opening even more doors and further fattening their pocketbooks. After a decade of philanthropic efforts, **Mr. Gate's** fortune has doubled to \$100 billion and he **admitted** that vaccines have provided a 20:1 return, "better than anything else," which means he has made a nice package on the \$10 billion+ he has already invested in vaccines.

The **population** control grid/DigitalID that Mr. Gates is funding can be understood better knowing the eugenics background of Bill Gates and his father. The roll out of **contact tracing** with **endless** and enforced quarantines for a virus that has disappeared already and which never presented as a pandemic, is merely **one** more node being put into place in the population control grid—**immunity passports** being **another**. **1 2 3 4 5**  
We could go on and on with the things that do not add up about the virus and the various actions being taken with regard to it, and some of the movers and shakers behind it, but let's examine one last piece of the puzzle that is vital to implementing the programs.

### ***Continuous False Alarms from the Chicken-Little WHO***

And so we come to the repeating effort by the WHO to bring about worldwide vaccinations through the machinery set up in 2004 for pandemic declarations:

1. A precursor existed in the 1976 **Swine Flu**: Believing 60 million Americans out of 221 million would be infected and a million would die, (the U.S. Secretary of Health, Education and Welfare had announced "We will see a return of the 1918 flu virus that is the most virulent"), the CDC proclaimed 80% of the population would need to be vaccinated—money for which Congress provided immediately, anticipating good press for saving their constituents from a plague. 100-million flu vaccine shots were manufactured and administered to 49-million people, of whom **4,000 claimed damages for injury**, including 532 partially paralyzed with Guillain-Barre syndrome, a rare neurological condition, and 32 dying before the government shut down the program after 10 weeks. In the end, despite the panic,

only one person died of the Swine Flu while the drug companies made out nicely **financially**;

2. 2002-3, the **SARS** epidemic saw 8,098 sickened from what **may have been** SARS and potentially 774 dying (in the US, only 8 out of 29 possible cases were confirmed to have died of SARS). The WHO issued a global alert and worked to identify SARS and so find a vaccine. Since then, **nobody** has caught SARS. Of note is that the symptoms for SARS are similar to flu, which kills 290,000-650,000 each year and never has resulted in a WHO global alert;
3. 2004, WHO organized a board of experts to create **pandemic guidelines**; these obliged governments to purchase billions of dollars of hastily manufactured vaccines whenever the WHO declaring a pandemic. Some of these board members had received consulting fees from drug manufacturers Roche and GlaxoSmithKline (GSK);
4. 2005, the avian flu **H5N1** fails to materialize as a pandemic despite the flu czar asserting 150 million deaths would result worldwide and world governments dutifully forking over billions on vaccines that were not used;
5. 2009, **The H1N1 Swine Flu** was declared a global pandemic by the WHO: Two billion were expected to catch it and “several hundred thousand could die [in the US] if a vaccine campaign and other measures aren’t successful.” (*Official Statement of Obama Administration—guided by Dr. Fauci at the NIAID—API, 24 July 2009*). This WHO announcement triggered contracts with half-a-dozen major pharmaceutical companies to manufacture a vaccine for which they were paid about \$40 billion by the taxpayers.

Most of these vaccines were destroyed because the H1N1 pandemic also failed to materialize (144 deaths worldwide after 11 weeks, way less than the annual flu mortalities), although 60 million (mostly children) received GlaxoSmithKline’s Pandemrix and hundreds of them ended up brain damaged.

Wolfgang Wodarg, chairman of the health committee of the Parliamentary Assembly of the Council of Europe declared it a “**false pandemic**” and “one of the greatest medicine scandals of the century.” The British Medical Journal stated that “The WHO’s credibility has been badly damaged” in its handling of the swine flu pandemic, marred by secrecy and conflict of interest with drug companies—referring to the WHO’s 2004 guidelines and at least one expert on the secret “emergency committee” advising the WHO on declaring the 2009 pandemic having received payment from GSK that year.

After the pandemic failed to appear, the WHO redefined (and then denied having done so) a pandemic could be declared even if no deaths occurred;

1. 2020, Covid-19: More of the same, as covered earlier.

The 2012 **MERS** epidemic (2,494 people confirmed infected and 858 dead in 27 countries) and 2014-2016 **Ebola** epidemic (28,600 cases and 11,325 deaths in West Africa) did not follow the same pattern, as they did not spark a pandemic declaration.

In each pandemic, the Chicken-Little WHO spearheaded efforts to force vaccinations on fearful governments and populations and pharmaceutical companies repeatedly obliged while fattening their pocketbooks.

WHO pronounced those blowing the whistle on the dishonesties, conflicts of interest, and dangers of vaccines to be a **top global threat** in January 2019.

In September, the WHO held the Global Vaccination Summit that established a plan, **10 Actions towards Vaccination for All**, to manipulate citizens into vaccine compliance. In October, Event 201 was held and in November of 2019 their **call to action** was issued at the same time that first Covid-19 case appeared in Wuhan.

WHO has tried a PR and grassroots campaign to overcome the misgivings citizens now hold toward vaccines, which is replete with **false** information—which makes YouTube’s policy of removing any information that contradicts WHO particularly illogical and unjust, but certainly coordinated.

Qui bono (who benefits) from this drive to universal mandatory vaccinations? At the very least, pharmaceutical companies. But as the **#1 donor** to the WHO, Mr. Gates is not without influence over the organization and certainly benefits.

The pharmaceutical companies take us back to the Rockefeller dynasty, as mentioned above. This whole pandemic was predicted in the 2010 report by the Rockefeller Foundation, **Scenarios for the Future**, of a virulent pandemic closing down the world economies and citizens gladly agreeing to lockdowns, face masks, temperature checks, lauding the authoritarian Chinese approach, with loss of sovereignty, privacy, and rights in exchange for their own “safety.”

Except, of course, after the initial shock, the citizens were not quite as sheepish in 2020 as expected, especially as after a while, Covid-19 **failed** to materialize as a pandemic, with reports of it **mutating** within a month into something much less dangerous, and the number of **deaths tanking** (daily deaths on the 21st of: April, 2,214; May, 1,296; June, 627).

The amount of effort and finances being expended to bring about mandatory vaccinations shows it to be central to the greater agenda; the level of destruction considered acceptable to forward the agenda shows a deadly serious intent that can only be countered by individuals and organizations thinking for themselves, valuing their liberties and lifestyles, and being brave enough to fight back. If we are to preempt the next onslaught, we need to disempower these special-interest groups and individuals, as they represent only about 7% of the world—and that will take a large number of citizens becoming active.

If we do not take some action, however small, to improve the management of this civilization, we will return soon to a Dark Age simply because high-tech, materialistic, social-control societies cannot do otherwise than implode for lack of any humanity or

spiritual guiding force. The result of such a techno-society is unwilling participants in a slave culture and nobody left who cares. It is doomed to fail ultimately for one and all.

It is only another decade roughly before we will have human cyborgs (humans with some robotic elements) and artificial intelligence robots that do much of the work. Humans becoming increasingly redundant in such a world.

In actual fact, the goal of artificial general intelligence is not achievable, even though billions are being spent on it, because the software architecture that software companies are addicted to, is too complex to create really intelligent robots—only robotic robots. This is a story for another article, but this barrier to a true techno-society does not detract from the tsunami of robotism and the convergence of humans with **robots** that is coming, and the need for us in hospitality to reassert the humanities in this increasingly materialistic world.

Whatever the who and why behind all this may be, while we may appreciate the constant refrain that our safety is of great importance, socially inclined individuals do object to having the truth hidden in order to push an agenda which claims to, but does not on further research, actually include the short- and long-term health and well-being of the peoples of Earth.

“I predict future happiness for Americans if they can prevent the government from wasting the labors of the people under the pretense of taking care of them.” *Thomas Jefferson*

If one were to screw up one’s courage and go deeper down the rabbit hole, one would find that **Gates** and Rockefeller (Foundation) among quite a few others consider the world to be overpopulated and in need of drastic **reduction** in numbers. Their actions in the health sphere can be seen to contribute to achieving this goal, as well as their actions to “chemicalize” and alter **agriculture** through GMO crops and seeds that are having negative health and environmental effects the world over, and even the ongoing **aerial** spraying of **toxins** around the world for 3-4 decades.

You don’t need to go down this unpleasant rabbit hole in order to roll back this latest attack upon our rights and liberties and so regain the life we used to know. But it would certainly broaden your understanding of the game being played by these influential individuals and groups.

“No one is an unjust villain in his own mind. Even—perhaps even especially—those who are the worst of us. Some of the cruelest tyrants in history were motivated by noble ideals or made choices that they would call ‘hard but necessary steps’ for the good of their nation.”  
*Jim Butcher, Turn Coat*

We do not have to accept their solutions of greater control and harmful programs for the simple reason that they are not optimal solutions. If they were the first to say, “We are

overpopulated, and I offer myself up for voluntary death,” or if they said, “I am happy for my baby to have these 29 vaccinations with multiple toxins injected into their tiny bodies within 18 months, despite the lack of safety trials and known injuries,” then we might mistake their actions for altruism, at least, even if misguided, but this is not their view.

It is important to maintain our own sense of dignity, even for those who have fallen as far off the track as the Rockefellers and Gates of this world. There is room for them in the world, too, but not their badly-thought-through solutions.

Nobody likes to see family, friends, colleagues, students, clients, and neighbors being forced into situations that do not benefit them. And certainly not when the entire world population is suffering as a result. Just because it is that way right now does not mean that we have to sit back and allow it to continue so: *We can* do something about it, and just knowing there is a way out of the mess is half the battle won.

### ***What to Do***

For those who believe this virus to be a lethal calamity and the end of the world is at hand, remember President Roosevelt’s inaugural address in 1933: “The only thing we have to fear is fear itself.”

“Silent acquiescence in the face of tyranny is no better than outright agreement.” *C.J. Redwine, Defiance*

It is evil people who make life seem hostile. Left to their own devices, the vast majority of us get along just fine, seek the truth that will improve conditions, act with a good dose of common sense—all while enjoying life.

This short [video](#) makes a very good point: With all the talk of minorities being unfairly treated, we forget to look at the majority, and most importantly, to *define* what the majority is. Saying that a minority is based on color, religion, gender, country, sexual orientation or whatever is simply to agree to false divisions created to divide the majority. What is the real majority? People who care about others and want them to do as well as we would like to do ourselves. They respect others and their views; they do not try to tear them down in one way or another or label them as bad or worthless. The majority are the 93% who are straight with you, do not say one thing and mean or act otherwise; they try to be constructive, not destructive or particularly, pretend to help while actually harming.

So how do we end the prospect of continued lockdowns, loss of livelihood, and forced vaccines, as the media and some government bodies keep **threatening**? As a majority, by launching a tsunami of public indignation and demanding sensible and effective management from our elected officials regarding this pandemic that seems primarily to have been designed to bring about forced vaccinations worldwide and to build on the 9/11 security measures to gain greater control over citizenry.

“No one rules if no one obeys.” *David Icke*

Which is to say, the only real resource any manager has is the willingness of the employees. As soon as they become unwilling because the manager mistreats them, takes them for fools, the manager has nobody to manage.

**Four basic steps:**

**1. Boost your immune system** with such as Vitamin D3, etc. as covered earlier, while taking simple hygiene actions like rinsing with **mouthwash** to neutralize coronaviruses in the mouth and throat.

**2. Neutralize the next wave of fear mongering**

Tick the boxes below that apply any time the media blasts fear over the airwaves about Covid-19:

The current message is and will continue to be that the number of “cases” is going through the roof requiring another lockdown — while neglecting to mention:

- a) More testing is being done, so of course more people test positive;
- b) The PCR test is being used even though it is completely unreliable for testing viruses, giving many false positives because it cannot differentiate between Covid-19 or other viruses and germs;
- c) Sometimes the positive diagnosis is based only on observation of symptoms (flu-like symptoms, shortness of breath); that could be the result of multiple causes;
- d) The vast majority of those “cases” have no symptoms;
- e) The vast majority of those “cases” are not contagious.

The media is simply trying to alarm everyone by 1) calling those who test positive, even when based on an incorrect diagnosis, as “infected,” even if they have no symptoms and are not infectious, and 2) calling them “cases,” a word that means a person becomes ill with what is confirmed to be Covid-19. Thus they make it seem a second wave is coming when it is not and so panic State authorities, desperate to open their economies, into another deleterious shutdown.

For instance, the CDC saying antibody information collected shows the number of “confirmed cases” (meaning testing positive) is probably **10x** earlier published figures, demonstrates that the media and related government agencies are twisting good news into bad news. Why? Because the more people who test positive, the lower the ultimate death rate and danger presented by Covid-19. In fact, the death rate never went exponential, indicating, as one study shows, that people have a resistance to Covid-19; another study showed that the **T-cells** of 40-60% of people who had not been exposed to Covid-19 are able to deal with it based on their ability to deal with the common cold.

The **Wall Street Journal** reported that the number of Covid-19 deaths was 75% lower in states that did *not* lock down, but the media ignores deaths and focuses on the only number that can be made to appear bad: The number of positive tests that they pretend are accurate and are increasing as more people are tested, which they then escalate into “infections” and “cases.”

The WSJ article began with a statement that betrays the true nature of the media: “GOP governors have faced enormous media pressure to lock down their states in solidarity with Democrats...” The media are meant to report news, so what is this “pressure” other than propaganda—applying relentless pressure to make people think a certain way for political or other ends? A good reason to disconnect from them and seek responsible reporting that unearths facts because it respects the right and ability of individuals to think for themselves.

More examples of the early-to-open States being targeted by the media for panic generation: 71% of South Carolina hospital beds were reported to be in use already as COVID cases keep increasing, yet normal occupancy is 69%-70%.

Comparing Covid cases/deaths in the Bronx (3,346/234) with Houston (567/7) makes it obvious that Houston’s population of 7.1 million is doing a lot better than the Bronx’s 1.5 million, yet the media is baying for a return to a lockdown in Texas.

The new definition of **cases** includes anyone who has had some contact with anyone who later tests positive. No tests on them even, just quarantine and counted as a case. On May 11, a new definition for “cases” was released that required no testing, just having two or more **symptoms** that could be caused by any number of conditions. All of which explains the surge in cases at the end of June that is being used to push for a shutdown until a vaccine can be brought to market.

And just in case anyone is in doubt about the virulence of Covid-19’s second wave, the Florida Department of Health decided to create a tsunami of new cases by reporting **100%** of those tested by dozens of labs as cases that were positive for Covid-19, when the labs were actually reporting 6-9% as positive to the FDH.

Likewise, don’t close your eyes to the illogical **contact tracing** and enforcement of self-quarantining for 14 days just because a person has been exposed to someone who has tested positive for Covid-19. Apart from the personal injustice and unnecessary imprisonment—as a positive test means little-to-nothing—it will make it impossible for businesses to stay open if every time one person tests positive (usually without symptoms), the entire business has to quarantine for two weeks. Two weeks later, another round of testing shows one person testing positive and the business closes again.

Do not be fooled, either, by the notion of **voluntary vaccinations**, as life will be made impossible without the freedom to travel even for shopping because one has refused a vaccine. Before this irrational program is implemented is the time to be alert to the irrationalities and to point them out to those who can reverse them and adopt a sensible strategy: Taking precautions for those individuals at risk; and at work, if someone is *actually* ill, they simply call in sick and stay home until they are better while everyone else is free to continue working. Managing this normal-level outbreak, as with the annual flu, does not require governmental intervention nor enforced medical lockdowns and treatments.

The infection fatality rate has **dropped for ten weeks** in a row (mid-July, with those below 45 almost 0% and those 45-70, between 0.05 and 0.3%) and is almost at the point where it does not qualify as an epidemic per CDC definition. This could explain the fear-driven full-court press “skyrocketing cases resulting in a second wave and large volumes of deaths” narrative we are witnessing, because once the virus disappears, it will be much harder to force vaccinations on all of Earth’s inhabitants.

No doubt the threat of wars, riots, destruction, political shouting matches, and Covid-19 alarm will jockey for the lead position on the airwaves until a vaccine finally appears; if and when it does, and it is still being forced on everyone, don’t be so knocked about that you forget to dig through independent voices reporting on the vaccine trials to see what they really proved, because the media will only publish the glowing PR and gloss over the inevitable adverse reactions.

### **3. Become further educated if you feel the need**

Knowledge is power, so educate yourself more if you feel you need more understanding than these three articles (and their over-300 links) provide in order to act.

Use the search engine Duckduckgo.com, as unlike Google, it does not censor search results nor does it covertly track your searches. I wish I could refer you to mainstream media sources that might engender confidence in their information, but they have almost all long since been bought out by advertizers and **intelligence agencies** and now present propaganda and corporate lines as opposed to honest journalism. Obviously, try to separate opinions and agendas from the facts as you surf traditional and non-traditional sources, as they are not all accurate, by any means.

“A single person who stops lying can bring down a tyranny” *Alexandr Solzhenitsyn, Soviet dissident and writer*

### **4. Communicate and organize to nudge governments into acting sensibly**

Strength comes in numbers, so communicate and organize to build a huge volume of insistent demand for a) solutions based on common sense and b) science based on reality, not some hidden agenda that requires facts be twisted and hidden.

- Relay this paper or any specific links to people you know and discuss the issues with them;

- Ask them to communicate to their friends, family, government employees, owners and managers of your hotel property, other businesses, anyone with influence over the situation, the media, and organize them to do the following:
- End the lockdown in your area if it still exists and do whatever you can to give your local council and State officials the certainty and courage to put aside the media propaganda barrage and restart your area. Bear in mind that the WHO **stated** those without symptoms rarely transmit the virus, so it makes no sense to close businesses when one person tests positive but has no symptoms or for anyone other than a person with symptoms to wear a mask, stand six-feet apart, and not congregate in larger numbers or risk being fined or even arrested;
- In the US, use the protection afforded by the Constitution and related legal judgements to protect yourself by printing and signing the various documents listed on this **page**, and present to anyone trying to force you illegally in some way;
- Research and join grass roots efforts to derail the planned mandatory vaccinations and any further lockdowns. This is a good **example** of how one lady addressed the issue of the lockdown and masks in particular.
- Engage in non-confrontational civil disobedience following these **guidelines**;
- Join such as the Robert F. Kennedy Jr.'s **Children's Health Defense**, a leading voice exposing the dangers of vaccinations;
- Support **StopMandatoryVaccination.com**;
- In the USA, this **organization** stays on top of vaccination legislation so you can reach out to express your views and help influence the outcome;
- Join the US **movement** to decline mandatory vaccines without informed consent;
- Join the **Health Freedom Advocacy Center**
- This **document** parallels much of this paper, with some additional data as well as a good action suggestions offered at the end;
- In the UK, support such as this group of lawyers who have determined the UK's Coronavirus Act 2020 to be **null** and void;
- For Mr. Gates, the Italian member of parliament's **call** during a session recently for Mr. Gates be referred to the International Criminal Court for Crimes against Humanity would be a good first step. Write to your politician and build the groundswell for more countries to bring his suspect philanthropic actions to an end and put an end to the rule of earth by billionaires with a dim view of mankind and ideas that everyone (except them) should die for the greater good;
- The WHO seems to be too corrupt to continue in its current form: Steps to dismantle it are given at the end of this **article**;
- By refusing to be railroaded into a non-optimal solution, you can succeed in making governments serve the people, rather than vested interests—as the Serbians did—the first people who **forced their government** to end mandated lockdowns.

In the final analysis, hundreds of irrationalities have been detailed in this report by many brave souls who stated the truth in the face of a whirlwind of attacks on them professionally and personally from many corners orchestrated by those in authority and power whose hidden economic, social, and political agendas are put at risk by citizens

finding out the truth. In the US alone, this has led to the completely insane response of locking down 340 million people and shutting down our \$21 trillion economy because.... Why? Because 1 in every 1,000 mostly old and already sick people who actually catch Covid-19 will die of it rather than of something else. The special-interest groups engineering this catastrophe are counting on the citizenry to continue for just a little bit longer, past the point of no return, where they will be cornered in terms of available freedoms and freedom to choose their own destiny.

If we think for ourselves, help spread the word, educate politicians who will listen and are not too corrupted, and insist that we move away from this abyss of a police-state mentality protecting us from a supposedly hostile world, we can look forward to a relatively rapid return to the lives we have all worked for years to build, founded upon the earnest efforts and values of our ancestors.
