

Deadliest Batches of CV19 ‘Vaccines’ Being Sent to Kill White Americans in Red States

The Exposé has been publishing some great reports about the deadly “vaccine”. They recently ran a story about how 100% of Vaxx deaths can be traced to just 5% of the batches, which seems to indicate that the most dangerous batches are being sent out to deliberately kill certain populations. Now let me be clear, I do not think the “non-deadly” shots are safe in the slightest, just simply less dangerous than the ones that are causing people to keel over and die of heart attacks.

The Exposé has just come out with a report Deadliest batches of the Covid-19 Vaccines were disproportionately sent to red Republican states across the USA, which contains some incredible details. While the article shows how Republican-controlled “red states” are being targeted the most, what is left out is that these states have a large percentage of White people.

But look what happens when you take into account the number of people vaccinated in each state and calculate the vaccination / death rate –

State	Deaths reported for Pfizer + Moderna + Janssen (22/10/21)	Population Vaccinated (15/10/21)	Vaccination / Death Rate based on VAERS Data only
Kentucky	402	2,561,769	0.02%
Arkansas	82	1,707,765	0.01%
West Virginia	48	871,421	0.01%
Montana	48	595,997	0.01%
Alaska	33	426,234	0.01%
North Dakota	31	397,551	0.01%
Wyoming	19	287,627	0.01%
Tennessee	283	3,665,053	0.008%
Minnesota	284	3,626,325	0.008%
South Dakota	34	537,636	0.006%
New Hampshire	56	985,579	0.006%
Nebraska	55	1,163,586	0.005%
Georgia	296	5,939,989	0.005%
Missouri	148	3,428,445	0.0043%
Wisconsin	155	3,600,776	0.0043%
Indiana	143	3,567,895	0.004%
Iowa	70	1,855,890	0.004%
Kansas	64	1,779,514	0.004%
Michigan	254	5,744,548	0.004%
Florida	378	14,603,834	0.003%
Ohio	202	6,434,770	0.003%
Alabama	69	2,622,428	0.003%
Mississippi	44	1,521,329	0.003%
Illinois	265	8,278,500	0.003%
Washington	169	5,201,997	0.003%
Colorado	94	3,830,825	0.003%
New Mexico	42	1,502,526	0.003%
Hawaii	34	1,099,064	0.003%
Maine	31	1,010,858	0.003%
Delaware	19	659,706	0.003%
District of Columbia	14	511,153	0.0027%
Rhode Island	18	812,166	0.0022%
Vermont	11	490,951	0.0022%
Texas	383	17,540,166	0.002%
North Carolina	123	6,494,826	0.002%
Louisiana	57	2,447,856	0.002%
South Carolina	55	2,903,920	0.002%
Oklahoma	45	2,288,377	0.002%
Idaho	19	858,875	0.002%
New York	277	14,165,051	0.002%
Pennsylvania	216	9,600,067	0.002%
New Jersey	137	6,545,473	0.002%
Virginia	120	5,948,301	0.002%
Massachusetts	110	5,421,287	0.002%
Arizona	93	4,385,129	0.002%
Maryland	91	4,341,837	0.002%
Oregon	68	2,847,046	0.002%
Connecticut	48	2,765,794	0.002%
Nevada	34	1,908,579	0.002%
Utah	26	1,929,414	0.001%
California	402	28,853,313	0.001%

The top 8 States with the highest vaccination death rate are all Republican controlled red States, and 19 of the top 24 states with the highest vaccination death rate are again Republican controlled red States. Kentucky, Arkansas, West Virginia, Montana, Alaska, North Dakota, Wyoming, and Tennessee all top the list, with Florida placing 20th in the list of 51 states.

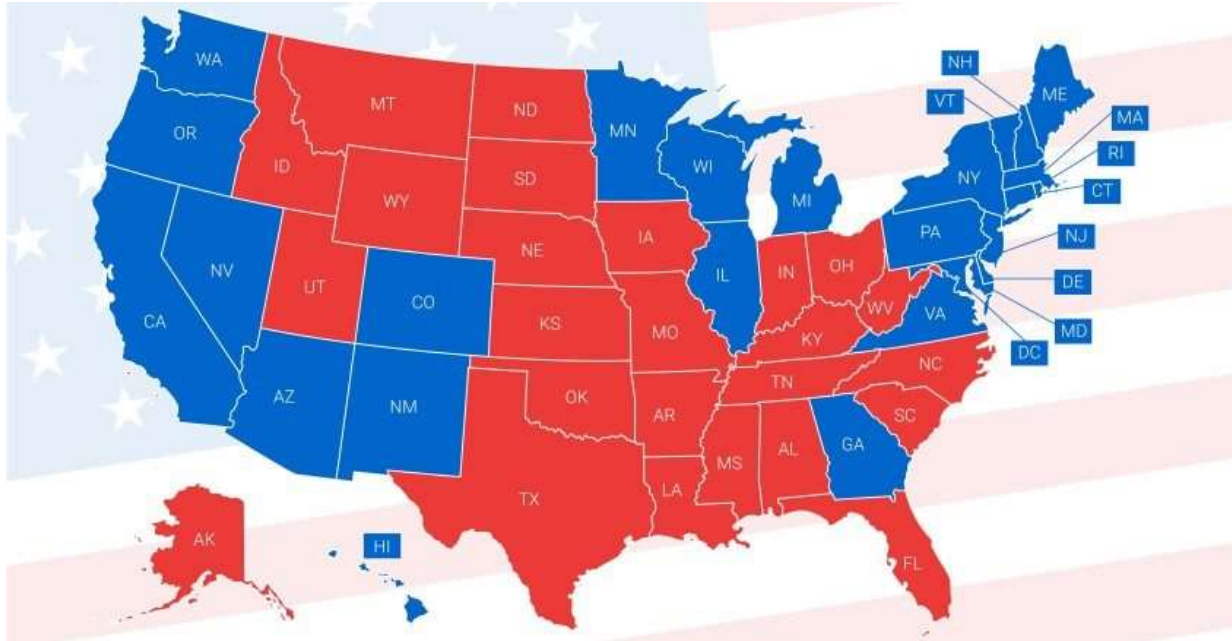

By calculating the vaccination / death rate, we're also able to see that California has actually been the state least affected by the deadly lots of Covid-19 vaccine, not the most affected as it appeared to be at first glance without putting the vaccine death numbers into context.

The numbers show that the Republican controlled state of Kentucky has a 1,900% worse vaccination / death rate than the Democrat controlled California, suggesting the Republican state received 20 times the amount of deadly batches of Covid-19 vaccine than the Democrat controlled state received.

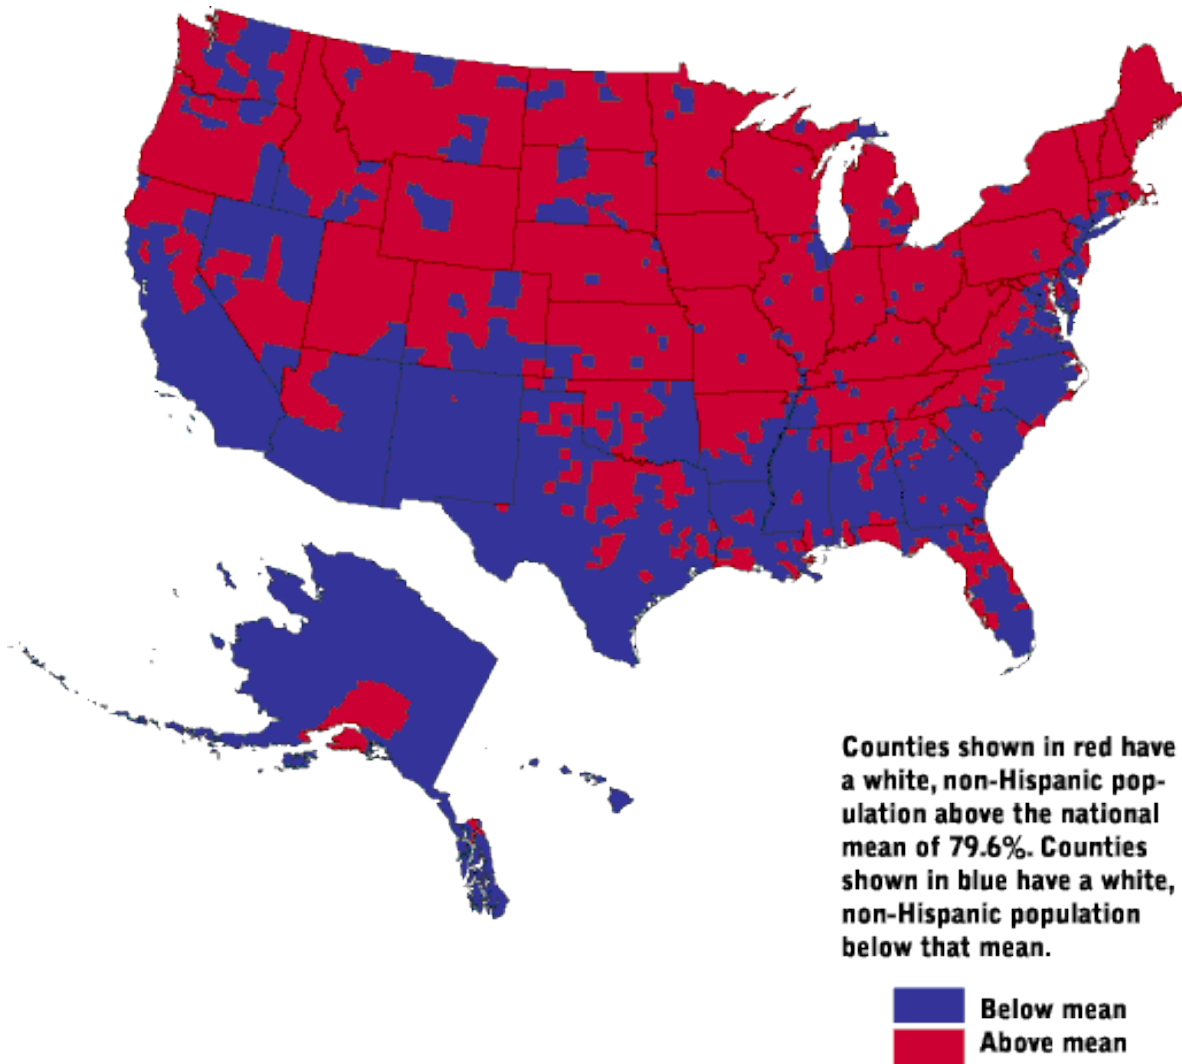

The numbers also suggest that the Republican controlled state of Florida received three times the amount of deadly batches of Covid-19 vaccine than the Democrat controlled state of California received, with its vaccination / death rate 200% higher than California's.

Sure, there could be a political agenda to target Republicans with the deadliest jobs, but it also seems likely that these states are being targeted because the Republicans there are White.

Here is a political map from 2020:

Now see how it lines up with a racial map:

Let's take a look at the demographics of some of the hardest hit red states. Kentucky is 87% White, West Virginia is 93% White, Montana is 88% White, North Dakota is 87% White, Wyoming is 91% White.

You will notice that some of the blue states that were targeted by deadly vaxx batches actually have a large percentage of White people. For example, New Hampshire is 95% White and Minnesota is 91% White.

Some of those numbers might be somewhat off, as we have so many illegals flooding into the country every day, but you get the point!

So who could possibly be behind murdering White people with deadly shots? Well, it's the usual culprits!

EXCLUSIVE – 100% of Covid-19 Vaccine Deaths were caused by just 5% of the batches produced according to official Government data

By [The Exposé](#) on [October 31, 2021](#)

An investigation of data found in the USA’s Vaccine Adverse Event Reporting System (VAERS) has revealed that extremely high numbers of adverse reactions and deaths have been reported against specific lot numbers of the Covid-19 vaccines several times, meaning deadly batches of the experimental injections have now been identified.

But what’s perhaps more concerning is that the “deadly” lots were distributed widely across the United States whilst other “benign” lots were sent to just a few locations.

The data used in the investigation was pulled from the publicly accessible VAERS database which can be viewed [here](#). The **Vaccine Adverse Event Reporting System (VAERS)** is a United States program for vaccine safety, co-managed by the U.S. Centers for Disease Control and Prevention (CDC) and the Food and Drug Administration (FDA).

The program collects information via reports made by doctors, nurses, and patients about adverse events (possible harmful side effects) that occur after administration of vaccines to ascertain whether the risk–benefit ratio is high enough to justify continued use of any particular vaccine.

The reports pulled from the database were ones that had been submitted up to October 15th 2021 and they included all adverse reactions reported against the Pfizer and Moderna mRNA Covid-19 injections, as well as all adverse reactions reported against the influenza vaccines; which were used to generate a control dataset.

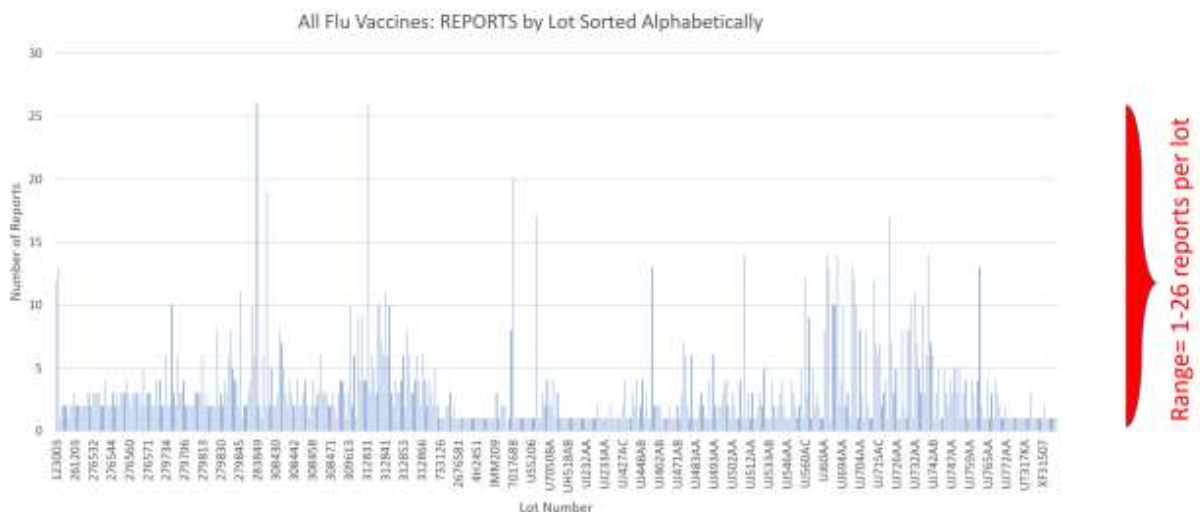

Control Dataset – Flu Vaccine Adverse Event Reports for All Manufacturers, summary statistics

	AE REPORTS	DEATHS	HOSPITAL
Total	1,608	15	73
Average/lot	3	0	0
st dev	3	0	0
Median/lot	2	-	-
min/lot	-	-	-
max/lot	26	2	3
Total Count of Lot Numbers		494	

The VAERS database showed a total of 1,608 adverse event reports against the flu vaccines alongside 15 deaths and 73 hospitalizations. The total count of lot numbers returned was 494.

The 'lot number' is a specific string of numbers and letters that tracks a specific batch of vaccine from production and into a person's arm and it is usually found on a vaccine label or accompanying packaging.

Control Dataset – Variation of Adverse Event Reports by lot for all flu vaccines

The above chart shows the number of adverse event report made to VAERS against the influenza vaccines sorted by the lot number of vaccine that was administered prior to the adverse event.

Except for a few spikes the number of adverse events per lot number was generally the same, with no more than 26 reports being made against a single lot number of influenza vaccine.

Control Dataset – Flu Vaccine Adverse Event Reports by Lot

The above charts show the count of lots by number of reports of adverse reactions per lot for the influenza vaccines. It shows that 33% of the lots (165 / 494) only had a single adverse reaction report made against them, whilst just 0.6% of the lots (3 / 494) had at least 20 adverse reaction reports made against them.

Control Dataset – Flu Vaccines: Number of Lots by Deaths/Lot

The above chart shows how many times a specific lot number was identified in an adverse reaction report of which the person had died following vaccination against the Flu. Ninety-seven-percent of the lots (480 / 494) were associated with zero deaths, whilst 13 lots were associated with a single death and 1 lot was associated with 2 deaths.

Control Dataset, Flu Vaccines – No lots sent to greater than 12 states

The above chart shows the number of states within the USA a specific log number of the influenza vaccine was distributed to.

The VAERS data shows that 44% of the lots (219 / 494) were sent to just a single state within the USA, whilst a further 17% (86 / 494) were sent to 2 states, 10% (50 / 494) were sent to 3 states, 5% (24 / 494) were sent to 4 states, 3% (17 / 494) were sent to 5 states, 2% (11 / 494) were sent to 6 states, and just 0.4 (2 / 494) were sent to 12 states within the USA.

All of the above data was then used as a control dataset to compare against VAERS data for the Pfizer and Moderna mRNA Covid-19 vaccines.

Covid Vaccines: Pfizer Dataset – Summary Statistics

	AE REPORTS	DEATHS	HOSPITALIZED
Total	171,463	2,828	14,262
Average/lot	38	1	3
st dev	257	6	24
median/lot	1	-	-
min/lot	1	-	-
max/lot	3,563	113	413
Total Count of Lots	4522		

The VAERS database showed a total of 171,463 adverse event reports against the Pfizer Covid-19 vaccine alongside 2,828 deaths and 14,262 hospitalizations. The total count of lot numbers returned was 4,522.

This data alone shows that there have been 106 times as many adverse reactions, 189 times as many deaths, and 195 times as many hospitalizations due to the Pfizer Covid-19 jab than there have been due to all other influenza vaccines combined.

Pfizer Dataset – Unusually High Variation of AE Reports by Lot Number

The above chart shows the number of adverse event reports made to VAERS against the Pfizer Covid-19 vaccine sorted by the lot number of vaccine that was administered prior to the adverse event. We do not have reliable information about standard lot size, but news articles indicate an average lot size of 1000 vials (approx. 6000 doses).

The highest number of adverse event reports made to VAERS against a single lot number of the influenza vaccine was 26. Which makes it all the more shocking to discover that the highest number of adverse event reports made to VAERS against a single lot number of the Pfizer Covid-19 vaccine up to October 15th 2021 was 3,563, and this isn't an anomaly.

Thousands of adverse event reports have been made against a single lot number of the Pfizer Covid-19 vaccine numerous times, and unfortunately the Moderna Covid-19 vaccine hasn't fared any better.

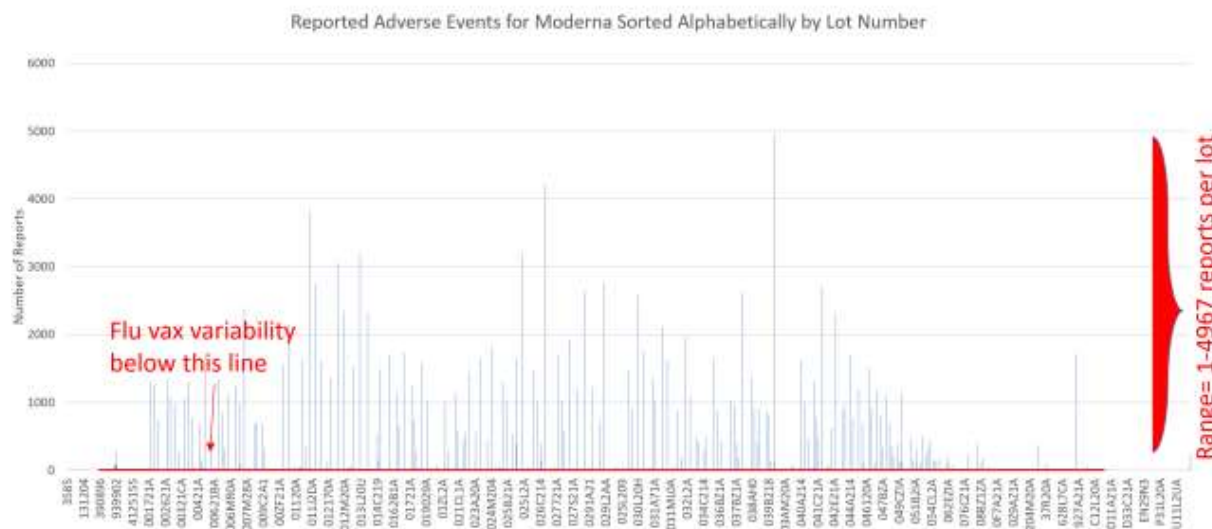

Covid Vaccines: Moderna Dataset Summary Statistics

	AE REPORTS	DEATHS	HOSPITALIZED
Total	188,998	2,603	10,225
Average	34	0	2
st dev	231	4	13
median	1	-	-
min/lot	1	-	-
max/lot	4,967	94	193
Total Count of Lots	5,510		

The VAERS database showed a total of 188,998 adverse event reports against the Moderna Covid-19 vaccine alongside 2,603 deaths and 10,225 hospitalizations. The total count of lot numbers returned was 5,510.

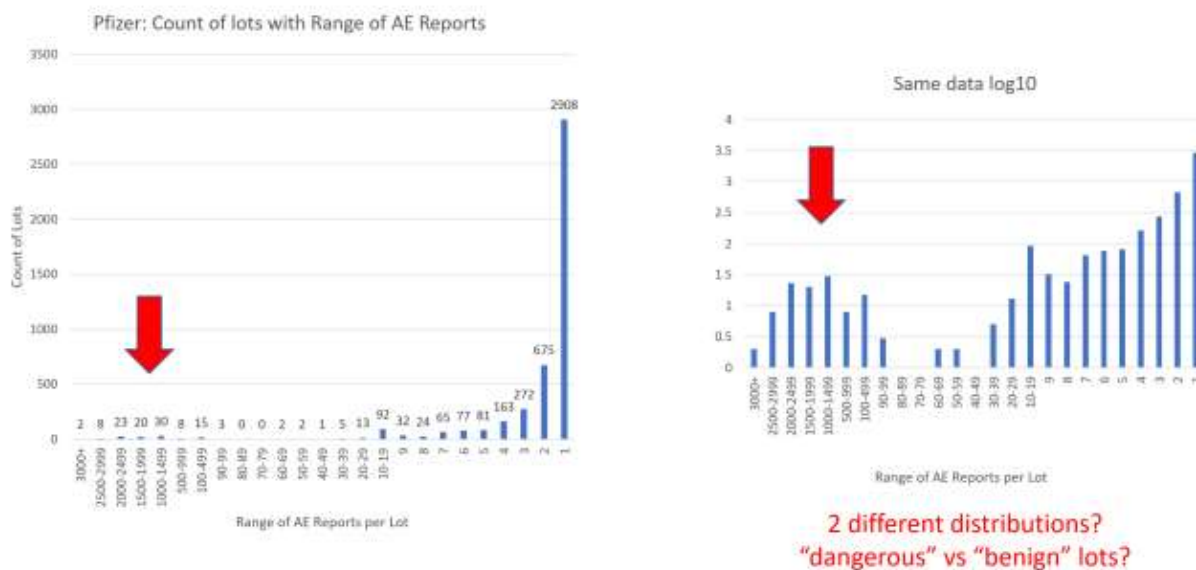

This data alone shows that there have been 118 times as many adverse reactions, 174 times as many deaths, and 140 times as many hospitalizations due to the Moderna Covid-19 jab than there have been due to all other influenza vaccines combined.

Moderna Dataset – Unusually High Variation of Reports by Lot

The above chart shows the number of adverse event reports made to VAERS against the Moderna Covid-19 vaccine sorted by the lot number of vaccine that was administered prior to the adverse event, and it shows that the Moderna jab fared even worse than the Pfizer jab in this department with the highest number of adverse event reports against a single lot number of Moderna Covid-19 vaccine totaling a staggering 4,967.

Finding 1: Pfizer – Some lots associated with very high AE Reports per Lot

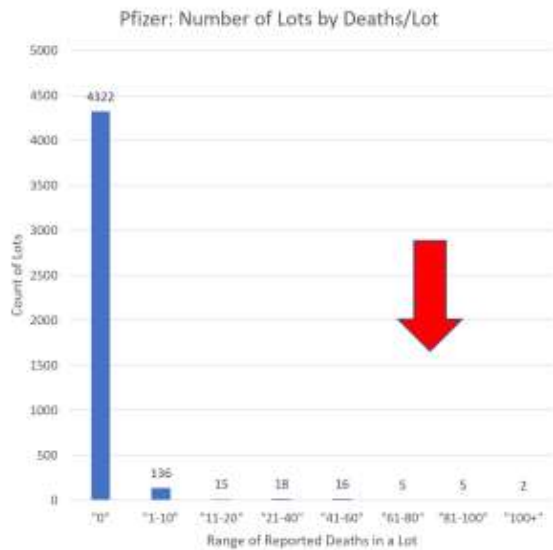

The above chart shows the count of lots against the range of adverse events reported per lot of Pfizer Covid-19 vaccine. The data reveals that 2,908 lots (64%) had just a single adverse event report made against them, whilst 2 specific lots had over 3000 adverse event reports made against them.

Shockingly we can also see from the data that 30 lots of Pfizer vaccine had between 1,000 and 1,499 adverse event reports per lot, another 20 lots had between 1,500 and 1,999 adverse event reports per lot, and another 23 lots had between 2,000 and 2,499 adverse event reports per lot.

This suggests that there were a small quantity of dangerous batches of the Pfizer Covid-19 vaccine and a large quantity of seemingly harmless (at least in the short term) batches of the Pfizer Covid-19 vaccine.

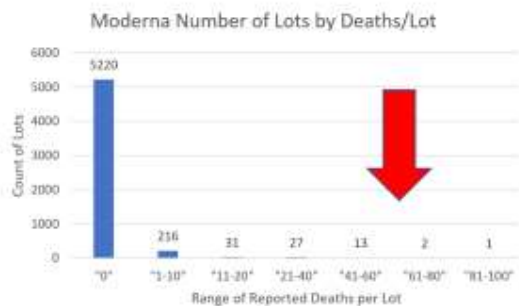

Finding 1: Pfizer – Some lots associated with very high Deaths per lot

But the investigation of VAERS data also revealed that reported deaths due to the Pfizer vaccine were again only associated with certain batches of the jab. The chart above shows that 96% of the lots of Pfizer vaccine had zero death reports made against them. Meaning the 2,828 reported deaths were associated with just 4% of the lots of Pfizer vaccine.

Five lot numbers were associated with 61-80 deaths each, a further 5 lot numbers were associated with 81-100 deaths each, and just 2 separate lot numbers were associated with over 100 deaths each.

Finding 1: Moderna – Some lots associated with very high Deaths per Lot

The same can be seen for the Moderna Covid-19 vaccine. Ninety-five-percent of the lots of Moderna vaccine had zero death reports made against them. Meaning the 2,603 deaths were associated with just 5% of the lots of Moderna vaccine.

Thirteen lot numbers were associated with 41-60 deaths each, 2 lot numbers were associated with 61-80 deaths each and 1 lot number was associated with 81-100 deaths.

The investigation of VAERS data also found that specific batches of the Pfizer and Moderna Covid-19 vaccines which were distributed to between 13 and 50 states across the USA had an unusually high number of adverse event reports and deaths compared to lots that were distributed to 12 states or less across the USA.

Finding 2: Pfizer Lots sent to 13-50 states Have Unusually High AE Reports and Deaths

Lots Sent to 13-50 states*

	AE REPORTS	DEATHS	HOSPITAL	STATES
Total	166,170	2,799	14,155	
Average/lot	1,278	22	109	42
st dev	893	26	101	12
median	1,331	9	90	47
Min/lot	18	-	-	13
Max/lot	3,598	114	420	57
Total Count of Lots		130		

Lots Sent to <12 states**

	AE REPORTS	DEATHS	HOSPITAL	STATES
Total	9,141	99	657	
Average/lot	2	0	0	2
st dev	3	0	1	2
median	1	-	-	1
min/lot	1	-	-	1
max/lot	118	2	20	12
Total Count of Lots		4,289		

*Note max number of states =57 due to mistyped state names in VAERS

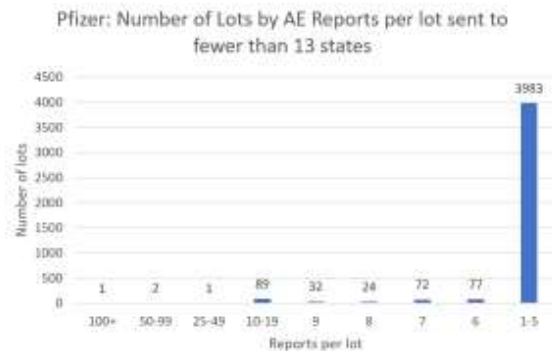

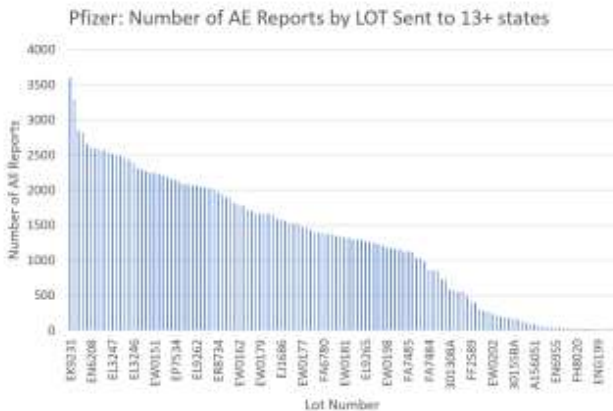

**12 state cut off was chosen based on the highest #states/lot from flu vaccine dataset

As you can see from the above table 4,289 different lots of Pfizer vaccine were distributed to 12 states or less across the USA, recording 9,141 adverse event reports against them alongside 99 deaths and 657 hospitalizations. This equates to an average of 2 adverse event reports per lot and 0 deaths and hospitalizations.

However, a further 130 different lots of Pfizer vaccine were distributed to between 13-50 states across the USA, recording 166,170 adverse event reports, 2,799 deaths, and 14,155 hospitalizations. This equates to an average of 1,278 adverse event reports per lot number, alongside 22 deaths and 109 hospitalizations.

This data therefore shows that each lot from the 130 different lot numbers of Pfizer Covid-19 vaccine distributed to more than 13 states, harmed on average 639 times more people, hospitalized on average 109 times more people, and killed on average 22 times more people.

Finding 2: Pfizer – Unusually High AE Reports from Lots that went to 13-50 states

The above chart on the left shows the number of adverse event reports by lot number sent to 13 or more states across the USA. This chart has identified the actual lot numbers of Pfizer vaccine that have caused the most harm in the USA. The most harmful of which is lot number 'EK9231'; causing over 3,500 adverse event reports.

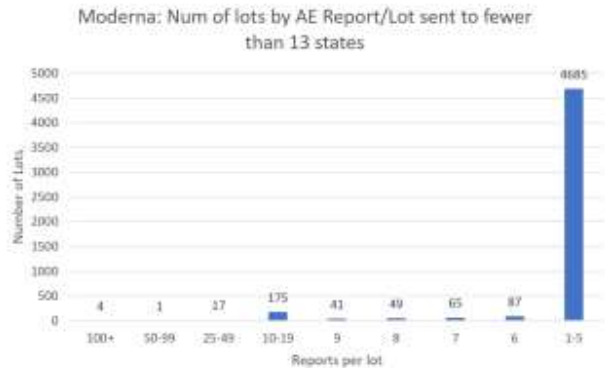

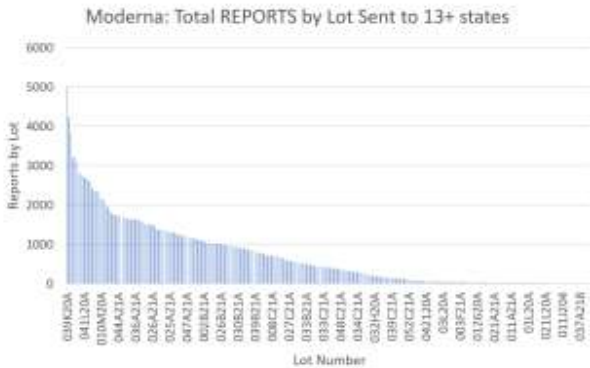

Finding 2: Pfizer – Unusually High Deaths from Lots sent to 13-50 States

The above chart on the left shows the number of deaths reported as adverse reactions to the Pfizer vaccine by lot number sent to 13+ states across the USA. This chart has

identified the actual lot numbers of Pfizer vaccine that have caused the most deaths in the USA. The deadliest of which is lot number 'EN6201' causing almost 120 deaths.

Finding 2: Moderna – Unusually High AE Reports from Lots sent to 13-50 States

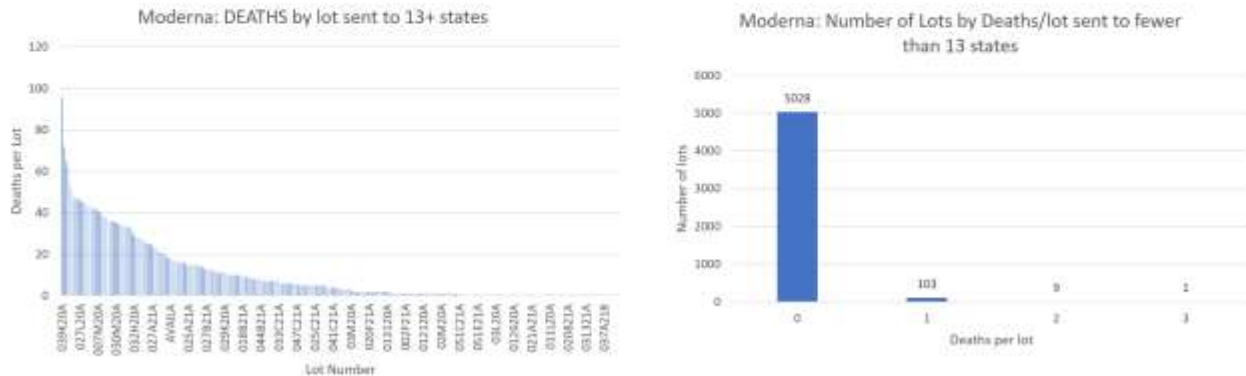

The above chart on the left shows the number of adverse event reports against the Moderna vaccine by lot number sent to 13 or more states across the USA. This chart has identified the actual lot numbers of Moderna vaccine that have caused the most harm in the USA. The most harmful of which is lot number '039K20A'; causing over 4,000 adverse event reports.

The second most harmful batch of Moderna vaccine was assigned lot number '041L20A', and [media reports](#) show that it was actually recalled by the Orange County Healthcare Agency in January 2021 following reports of allergic reactions.

The Orange County Health Care Agency has recalled the use of a Moderna COVID-19 vaccine lot following reports of allergic reactions.

The Moderna vaccine lot 041L20A is currently under investigation by the Centers for Disease Control and Prevention, U.S Food and Drug Administration and the manufacturer.

Finding 2: Moderna – Unusually High Deaths from Lots sent to 13-50 States

The above chart on the left shows the number of deaths reported as adverse reactions to the Moderna vaccine by lot number sent to 13+ states across the USA. This chart has identified the actual lot numbers of Moderna vaccine that have caused the most deaths in the USA. The deadliest of which is lot number '039K20A' causing almost 100 deaths.

Conclusion

This investigation of VAERS data reveals several concerning findings which warrant further investigation, but it also leads to questions of why authorities within the USA which are supposed to monitor the safety of the Covid-19 vaccines have not discovered this themselves.

The data clearly shows that the Covid-19 vaccination campaign has been significantly more harmful and deadly than the influenza vaccination campaign. This fact alone begs the question as to how the FDA advisory committee could possibly vote Seventeen to Zero in favour of approving the Pfizer vaccine for use in children aged 5 to 11.

One voting member of the Food and Drug Administration (FDA) advisory committee admitted that it will not be fully known whether Pfizer's vaccine is safe for 5 to 11-year-old children, until it begins being administered.

Dr. Eric Rubin of Harvard University said – "We're never going to learn how safe the vaccine is unless we start giving it, and that's just the way it goes".

But the investigation of VAERS has also identified the specific batches of Pfizer and Moderna vaccine that have caused the most harm across the USA, which leads to other extremely serious questions requiring urgent answers.

Why is it that certain batches of the vaccine have proven to be more harmful than others?

Why is it that certain batches of Covid-19 vaccine have proven to be deadlier than others?

Why is it that the most harmful and deadly Covid-19 vaccines were distributed across the entire USA, whilst the least harmful and deadly were only ever distributed to a few states? Was this done on purpose?

Could this just be a quality control issue?

A [Pfizer whistleblower from a Kansas manufacturing facility did after all reveal](#) that *“People are being made to sign off on things that normally they wouldn’t, and then they wonder why their own employees won’t take it”*.

Blessings,

Pastor Bob, EvanTeachr@aol.com
