

# Depopulation

## #1 Global Issue Since 1968

### Part 14

The very idea that world leaders would deliberately or intentionally cull the population seems incongruent with our way of thinking about our fellow man, but I hasten to say that so often the case is that we can't see the forest for the trees. To say the idiom cannot see the forest for the trees means that a person or organization cannot see the big picture because the focus is too much on the details.

The following material comes from the history of an outline of a Government Project: The Wildlands Project. Under the Antichrist system, there will be no private property or what you can or cannot do with your property. What we are looking at is a picture of population control. Sustainable Development underlies the agenda 21 and agenda 2030. Those living in the coming in the World Economic Forum's "Reset" are in for a "new normal". How often have we heard this past year, there is no going back to normal!

"...Humanity must drastically scale down its industrial activities on Earth, change its consumption lifestyles, stabilize and then reduce the size of the human population by humane means, and protect and restore wild ecosystems and the remaining wildlife on the planet."

#### **The Wildlands Project**

The Tartars had the idea of infecting the enemy by catapulting bodies infected with bubonic plague over the walls of the city of Kaffa, what is the current state of Ethiopia. Some historians believe that this event was the cause of the epidemic of plague that swept across medieval Europe *killing 25 million*.

- **1763**

The British during the French-Indian War. The Native Americans greatly outnumbered the British and were suspected of being on the side of the French. As an "act of good will" the British give blankets to the Indians, but the blankets came from a hospital that was treating smallpox victims and consequently smallpox raged through the Native American community and devastated their numbers.

- **1814**

Andrew Jackson, whose portrait appears on the U.S. \$20 bill today, supervised the mutilation of 800 or more Creek Indian corpses, the bodies of men, women and children that his troops had massacred, cutting off their noses to count and preserve a record of the dead, slicing long strips of flesh from their bodies to tan and turn into bridle reins.

- **1911**

Turkey established gun control. From 1915-1917, 1.5 million Armenians, unable to defend themselves, were rounded up and exterminated.

- **1918**

The modern history of Biological Warfare (BW) starts in 1918 with the Japanese formation of a special section of the Army (Unit 731) dedicated to BW. The thought at the time was "Science and Technology are the Key's to Winning War and BW is the most cost effective."

- **1918-1919**

Flu pandemic that killed over 20 million worldwide and over 500,000 here in the U.S.

- **1920's**

Unlike the malignant twists of nature, ranging from bubonic plague through to potato blight, which have killed masses throughout the ages, both the *beef and pituitary hormone CJD crises* were manmade. Scrapie, the sheep equivalent of BSE and CJD, has been around for more than two centuries. Somewhat differently, human spongiform encephalopathy was unheard of before two German physicians, Creutzfeldt and Jakob, independently reported the initial cases in the 1920s. BSE, too, was unheard of until a decade after cattle (aka *Mad Cow*) began to be fed the protein-rich remains of scrapie-infected sheep to accelerate their growth.

- **1929**

The Soviet Union established gun control. From 1929 to 1953, approximately 20 million dissidents, unable to defend themselves, were rounded up and exterminated.

- **1930's**

Less known to the public is that fluoride also accumulates in bones. "The teeth are windows to what's happening in the bones," explained Paul Connett, Professor of Chemistry at St Lawrence University, New York, to these reporters. In recent years, pediatric bone specialists have expressed alarm about an increase in stress fractures among young people in the US. Connett and other scientists are concerned that fluoride-linked to bone damage in studies since the 1930s-may be a contributing factor.

- **1931**

Japan expanded its territory by taking over part of Manchuria and Unit 731 moved in to secure "an endless supply of human experiment materials." Essentially all prisoners of war were available for Biological Warfare (BW) experiments. Japanese WWII Veteran Admits Unit 731 Germ Tests

- **1931**

Dr. Cornelius Rhoads, under the auspices of the *Rockefeller Institute for Medical Investigations*, infects human subjects with cancer cells. He later goes on to establish the U.S. Army Biological Warfare facilities in Maryland, Utah, and Panama, and is named to the U.S. Atomic Energy Commission. While there, he begins a series of radiation exposure experiments on American soldiers and civilian hospital patients.

- **1932**

### **The Infamous Tuskegee Study**

In recent history, we have seen the influence of occult population control advocates here in America. Nowhere is that influence better demonstrated than in the Tuskegee Study, a scientific research program in which 400 syphilis-infected black men were recruited by the U.S. Public Health Service back in 1932. The participants were all told that they would be treated for their infections, but instead of treating their illness, all medicines were withheld. The black men were then actively prevented from obtaining treatment elsewhere as their bodies, and the bodies of their wives and children, were systematically ravaged by disease.

The evil men who conceived that Nazi-style study justified their atrocity by alleging that scientists needed to learn how untreated syphilis progressed in the human body. For a period of forty years, between 1932 and 1972, the *genocidal Tuskegee Study* continued. It was not until 1972, when one newspaper finally had the courage to break the story to the public, that the Tuskegee Study was finally terminated.

## **The Population Control Agenda**

- **1934**

The original lesson about the infectious nature of these brain diseases ("mad cow disease" or bovine spongiform encephalopathy (BSE) in cattle, and Creutzfeldt-Jakob disease (CJD) in humans) came from a 1934 vaccine catastrophe in the UK which brought scrapie, or "mad sheep disease", to almost 5,000 out of 18,000 lambs within two years of their immunization against louping-ill virus infection.

Tracing back, scientists discovered that the vaccine serum was prepared from a number of lambs whose dams had subsequently developed scrapie, but the significance of scrapie passing vertically from ewes to their lambs, and horizontally from lamb to lamb by virtue of the vaccine injections, was kept from international eyes by a series of egotistical carry-ons which prevented the data from reaching the pages of the scientific literature for a further 15 years.

- **1935**

The Pellagra Incident. After millions of individuals die from Pellagra over a span of two decades, the U.S. Public Health Service finally acts to stem the disease. The director of the agency admits it had known for at least 20 years that Pellagra is caused by a niacin deficiency but failed to act since most of the deaths occurred within poverty-stricken black populations.

- **1935**

China established gun control. From 1948 to 1952, 20 million political dissidents, unable to defend themselves, were rounded up and exterminated.

- **1938**

Germany established gun control in 1938 and from 1939 to 1945, 6 to 7 million Jews, gypsies, homosexuals, the mentally ill, and 12 million Christians who were unable to defend themselves, were rounded up and exterminated.

- **1939**

Margaret Sanger organized her "Negro project," a program designed to eliminate members of what she believed to be an "inferior race." Margaret Sanger justified her proposal because she believed that:

- "The masses of Negroes ...particularly in the South, still breed carelessly and disastrously, with the result that the increase among Negroes, even more than among whites, is from that portion of the population least intelligent and fit..."

- **1940**

Four hundred prisoners in Chicago are infected with Malaria in order to study the effects of new and experimental drugs to combat the disease. Nazi doctors later on trial at Nuremberg cite this American study to defend their own actions during the Holocaust.

- **1941**

Japanese planes sprayed bubonic plague over parts of China. At least 5 separate instances of this occurring have been documented. In 1942 "bacterial bombs" were deployed on mainland China but these attacks were determined to be ineffective.

- **1942**

The United States (US) becomes aware of the Japanese efforts in Biological Warfare (BW) and decided to start its own program. These acts were not the only atrocities committed, however. The Japanese released thousands of plague infested rats prior to their surrender, with unknown consequences. They also tested on American POW's during the war and the U.S. Government apparently knew about it, but did nothing (perhaps a worse atrocity). These people killed over 3000 POWs, including many Americans, in a variety of grisly experiments. What they did instead was to offer immunity to would-be war criminals in exchange for the information the Japanese learned from these experiments!

- **1942**

Chemical Warfare Services begins mustard gas experiments on approximately 4,000 servicemen. The experiments continue until 1945 and made use of Seventh Day Adventists who chose to become human guinea pigs rather than serve on active duty.

- **1942**

Great Britain was also developing a program in Biological Warfare (BW). The program focused on anthrax spores and their viability and "range of spread" when delivered with

a conventional bomb. The fateful Gruinard Island off the coast of Scotland was chosen as the site for this testing. It was thought that it was far enough off the coast as too prevent any contamination of the mainland, which later turned out to be false. The data gathered from these experiments was used by both Great Britain and the U.S. to develop bombs that were better able to effectively disperse spores.

### **1943**

- After an outbreak of anthrax in sheep and cattle in 1943 on the coast of Scotland that directly faced Gruinard, the British decided to stop testing. A tragic consequence of this testing is that even today Gruinard Island is contaminated with *Bacillus anthracis* spores. The original idea for decontamination was to start a brushfire that burned off the top of the soil and killed all traces of the organisms. Unfortunately, the spores unexpectedly embedded themselves in the soil so total decontamination of the island was/is impossible. As long as no ground is disturbed, we are supposedly safe, but birds that travel back and forth from mainland to island probably don't know this!

### **• 1943**

Planning began in 1943 with the appointment of a special New York State Health Department committee to study the advisability of adding fluoride to Newburgh's drinking water. The chairman of the committee was, again, Dr. Harold C. Hodge, then chief of fluoride toxicity studies for the Manhattan Project. Subsequent members of the committee included Henry L. Barnett, a captain in the Project's Medical Section, and John W. Fertig, in 1944 with the Office of Scientific Research and Development-the super-secret Pentagon group which sired the Manhattan Project.

Their military affiliations were kept secret. Hodge was described as a pharmacologist, Barnett as a pediatrician. Placed in charge of the Newburgh project was David B. Ast, chief dental officer of the New York State Health Department. Ast had participated in a key secret wartime conference on fluoride, held by the Manhattan Project in January 1944, and later worked with Dr. Hodge on the Project's investigation of human injury in the New Jersey incident, according to once-secret memos.

### **• 1944**

A Manhattan Project memorandum of 29 April 1944 states:

- "Clinical evidence suggests that uranium hexafluoride may have a rather marked central nervous system effect... It seems most likely that the F [code for fluoride] component rather than the T [code for uranium] is the causative factor."

The memo, from a captain in the medical corps, is stamped SECRET and is addressed to Colonel Stafford Warren, head of the Manhattan Project's Medical Section. Colonel Warren is asked to approve a program of animal research on CNS effects.

- "Since work with these compounds is essential, it will be necessary to know in advance what mental effects may occur after exposure... This is important not only to protect a given individual, but also to prevent a

confused workman from injuring others by improperly performing his duties.

The author of the 1944 CNS research proposal attached to the 29 April memo was Dr. Harold C. Hodge - at the time, chief of fluoride toxicology studies for the University of Rochester division of the Manhattan Project.

- **1944**

When a severe pollution incident occurred downwind of the E.I. [DuPont](#) de Nemours Company chemical factory in Deepwater, New Jersey. The factory was then producing millions of pounds of fluoride for the Manhattan Project whose scientists were racing to produce the world's first atomic bomb. The farms downwind in Gloucester and Salem counties were famous for their high-quality produce.

Their peaches went directly to the Waldorf Astoria Hotel in New York City; their tomatoes were bought up by Campbell's Soup. But in the summer of 1944 the farmers began reporting that their crops were blighted: "Something is burning up the peach crops around here." They said that poultry died after an all-night thunder-storm and that farm workers who ate produce they'd picked would sometimes vomit all night and into the next day.

- "I remember our horses looked sick and were too stiff to work," Mildred Giordano, a teenager at the time, told these reporters.

Some cows were so crippled that they could not stand up; they could only graze by crawling on their bellies. The account was confirmed in taped interviews with Philip Sadtler (shortly before he died), of *Sadtler Laboratories of Philadelphia*, one of the nation's oldest chemical consulting firms. Sadtler had personally conducted the initial investigation of the damage.

The farmers were stonewalled in their search for information about fluoride's effects on their health, and their complaints have long since been forgotten. But they unknowingly left their imprint on history: their complaints of injury to their health reverberated through the corridors of power in Washington and triggered intensive, secret, bomb program research on the health effects of fluoride.

- **1944**

U.S. Navy uses human subjects to test gas masks and clothing. Individuals were locked in a gas chamber and exposed to mustard gas and lewisite.

- **1945 May**

Newburgh's water was fluoridated, and over the next 10 years its residents were studied by the New York State Health Department.

- **1945-1955**

Much of the original proof that fluoride is safe for humans in low doses was generated by A-bomb program scientists who had been secretly ordered to provide "evidence useful in litigation" against defense contractors for fluoride injury to citizens. The first lawsuits against the American A-bomb program were not over radiation, but over fluoride damage, the documents show. Human studies were required. Bomb program researchers played a leading role in the design and implementation of the most extensive US study of the health effects of fluoridating public drinking water, conducted in Newburgh, New York, from 1945 to 1955.

Then, in a classified operation code-named "Program F", they secretly gathered and analyzed blood and tissue samples from Newburgh citizens with the cooperation of New York State Health Department personnel. The original, secret version (obtained by these reporters) of a study published by Program F scientists in the *August 1948 Journal of the American Dental Association* shows that evidence of adverse health effects from fluoride was censored by the *US Atomic Energy Commission* (AEC)-considered the most powerful of Cold War agencies-for reasons of "national security".

The bomb program's fluoride safety studies were conducted at the University of Rochester-site of one of the most notorious human radiation experiments of the Cold War, in which unsuspecting hospital patients were injected with toxic doses of radioactive plutonium. The fluoride studies were conducted with the same ethical mindset, in which "national security" was paramount.

Hitler claimed to have gotten his inspiration for the "final solution" from the extermination of Native Americans in the U.S.

- **1947**

By then, as the 1950s dawned, mad sheep disease was shown in the United States to jump the species barrier when a scrapie-infected food supplement brought a similar brain illness to farm-raised mink in 1947. By this stage, the medico-scientific fraternity was intensely preoccupied with another incurable brain illness, kuru, which had reached epidemic proportions amongst the Fore people living in the highlands of New Guinea.

Anthropologists from the University of Adelaide unraveled a chain of events to trace the origin of *kuru* back to the reverent consumption of deceased tribal members' bodies. Kuru was essentially eradicated by New Guinean authorities acting in 1959 on the anthropological clue to outlaw the eating of human flesh.

- **1947**

The CIA begins its study of LSD as a potential weapon for use by American intelligence. Human subjects (both civilian and military) are used with and without their knowledge.

- **1949**

U.S. Army begins 20 years of simulated germ warfare attacks against American cities, conducting at least 239 open air tests.

**1950 Sept. 20-26**

One of the biggest experiments involved the use of *Serratia marcescens* and *bacillus globigi* being sprayed over 117 square miles of the San Francisco area, causing pneumonia-like infections in many of the residents. The family of one elderly man who died in the test sued the government, but lost. To this day, syraceus is a leading cause of death among the elderly in the San Francisco area.

- **1950**

Department of Defense begins plans to detonate nuclear weapons in desert areas and monitor downwind residents for medical problems and mortality rates

- **1953**

U.S. military releases clouds of zinc cadmium sulfide gas over Winnipeg, St. Louis, Minneapolis, Fort Wayne, the Monocacy River Valley in Maryland, and Leesburg, Virginia. Their intent is to determine how efficiently they could disperse chemical agents.

- **1953**

CIA initiates [Project MKULTRA](#). This is an eleven year research program designed to produce and test drugs and biological agents that would be used for mind control and behavior modification. Six of the subprojects involved testing the agents on unwitting human beings.

- **1955**

Another case was the joint Army-CIA BW test in 1955, still classified, in which an undisclosed bacteria was released in the Tampa Bay region of Florida, causing a dramatic increase in whooping cough infections, including twelve deaths.

- **1956**

The Soviet Union accused the U.S. of using biological weapons in Korea, which lead them to threaten future use of Chemical and Biological weapons. This changed the focus of the U.S. program to a more defensive one. Before this, the bulk of the research was based at Ft. Detrick and used "surrogate biological agents" to model more deadly organisms. Most of the offensive tests were based on "secret spraying" of organisms over populated areas. This program was (supposedly) shut down in 1969.

- **1956**

Cambodia established gun control. From 1975 to 1977, one million "educated" people, unable to defend themselves, were rounded up and exterminated.

- **1956**

U.S. military releases mosquitoes infected with Yellow Fever over Savannah, Ga and Avon Park, Fl. Following each test, Army agents posing as public health officials test victims for effects.

- **1958**

LSD is tested on 95 volunteers at the Army's Chemical Warfare Laboratories for its effect on intelligence.

- **1960**

The *Army Assistant Chief-of-Staff for Intelligence* (ACSI) authorizes field testing of LSD in Europe and the Far East. Testing of the European population is code named Project THIRD CHANCE; testing of the Asian population is code named Project DERBY HAT.

- **1963**

The mass vaccination campaigns of the 1950s and '60s may be causing hundreds of deaths a year because of a cancer-causing virus that contaminated the first polio vaccine, according to scientists. Known as SV40, the virus came from dead monkeys whose kidney cells were used to culture the first Salk vaccines. Doctors estimate that the virus was injected into tens of millions during the vaccination campaigns, including several million in Canada, before being detected and screened out in 1963. Those born between 1941 and 1961 are thought to be most at risk of having been infected.

- **1964**

Guatemala established gun control. From 1964 to 1981, 100,000 Mayan Indians, unable to defend themselves, were rounded up and exterminated.

- **1965**

Aspartame is the technical name for the brand names, NutraSweet, Equal, Spoonful, and Equal-Measure. Aspartame was discovered by accident in 1965, when James Schlatter, a chemist of G.D. Searle Company was testing an anti-ulcer drug. Aspartame was approved for dry goods in 1981 and for carbonated beverages in 1983.

- **1965**

CIA and Department of Defense begin Project MKSEARCH, a program to develop a capability to manipulate human behavior through the use of mind-altering drugs.

- **1965**

Prisoners at the Holmesburg State Prison in Philadelphia are subjected to dioxin, the highly toxic chemical component of Agent Orange used in Viet Nam. The men are later studied for development of cancer, which indicates that Agent Orange had been a suspected carcinogen all along.

- **1966**

CIA initiates Project MKOFTEN, a program to test the toxicological effects of certain drugs on humans and animals.

- **1966 July 7-10**

The virus *Bacillus subtilis* was released throughout the New York subway system, conducted by the U.S. Army's Special Operations Division. Due to the vast number of people exposed it would virtually impossible to identify, let alone prove, and specific health problems resulting directly from this test.

- **1967**

CIA and Department of Defense implement Project MKNAOMI, successor to MKULTRA and designed to maintain, stockpile and test biological and chemical weapons.

- **1968**

CIA experiments with the possibility of poisoning drinking water by injecting chemicals into the water supply of the FDA in Washington, D.C.

- **Often/ Chickwit -1967 or 1968**

Project OFTEN/CHICKWIT was initiated by the Army Chemical Corps and the CIA's Office of Research and Development to create new drug compounds "that could be used offensively."

Hallucinogens were tested on inmates in Pennsylvania, but very little is known about the experiments.

- "CIA documents mention 'several laboratory accidents' in which a drug designated as EA-3167 produced 'prolonged psychotic effects in laboratory personnel'"

U.S. Army dispenses *Bacillus subtilis* variant *niger* throughout the New York City subway system.

More than a million civilians are exposed when army scientists drop light bulbs filled with the bacteria onto ventilation grates. It would appear that the CIA's drug testing continued throughout the 1970s since, "A CIA memo dated March 8, 1971, indicates that a backlog of more than twenty-six thousand drugs had been acquired 'for future screening'"

- **1968 - 69**

The Hong Kong flu, which was influenza A type H3N2, killed over 30,000 people in the U.S. alone. That was a fortuitous learning event for some because it taught them that the flu could still conceivably be used to wipe out a population.

But at the same time, it pointed out the need to precondition the populace so that those who might normally be resistant could be rendered susceptible. Hence the development of the vaccine program and the aerial spraying procedures to condition the population. The purpose of the chemicals in the chemtrail's is to help the viral envelope fuse with lung cells, permitting easier penetration and infection.

- **1969**

At a House Appropriations hearing, the *Defense Department's Biological Warfare* (BW) division requested funds to develop through gene-splicing a new disease that would both resist and break down a victim's immune system.

- "Within the next 5 to 10 years it would probably be possible to make a new infective micro-organism which could differ in certain important respects from any known disease-causing organisms. Most important of these is that it might be refractory to the immunological and therapeutic processes

upon which we depend to maintain our relative freedom from infectious diseases."

The funds were approved. AIDS appeared within the requested time frame, and has the exact characteristics specified.

- **1970**

Uganda established gun control. From 1971 to 1979, 300,000 Christians, unable to defend themselves, were rounded up and exterminated.

- **1972**

The *World Health Organization* (WHO) published a similar proposal:

- "An attempt should be made to ascertain whether viruses can in fact exert selective effects on immune function, e.g., by ...affecting T cell function as opposed to B cell function. The possibility should also be looked into that the immune response to the virus itself may be impaired if the infecting virus damages more or less selectively the cells responding to the viral antigens."

(**Bulletin of the W.H.O., vol. 47, p 257- 274.**)

This is a clinical description of the function of the AIDS virus.

- **1972**

It was discovered that black children as young as age five were having psychosurgery performed on them at the University of Mississippi in Jackson in order to control "hyperactive" and "aggressive" behavior. Their brains were being implanted with electrodes that were heated up to melt areas of the brain that regulate emotion and intellect. When we first opposed these experiments, and eventually stopped them, we did so despite resistance from organized psychiatry and the research community.

- **Mid-1970's**

The incidence of AIDS infections in Africa coincides exactly with the locations of the W.H.O. smallpox vaccination program in the mid-1970's (London Times, May 11, 1987). Some 14,000 Haitians then on UN secondment to Central Africa were also vaccinated in this campaign. Personnel actually conducting the vaccinations may have been completely unaware that the vaccine was anything other than what they were told.

- **1975**

Two neuroscientists, Laura and (the late) Eli Manuelides, from Yale University in the US, went on to illustrate by 1975 that injections of human blood, like injections of brain taken from kuru and CJD victims, transmitted the disease across the species barrier to laboratory animals. Their prophetic, but unheeded, message implied that blood was the vehicle that carried the agent of CJD around the body until it chanced upon an hospitable residence like the brain. This meant that the blood route was the key to the transmission of CJD from a primary host to a secondary host.

- **1975**

The virus section of Fort Detrick's *Center for Biological Warfare Research* is renamed the Fredrick Cancer Research Facilities and placed under the supervision of the National Cancer Institute (NCI) .

It is here that a special virus cancer program is initiated by the U.S. Navy, purportedly to develop cancer-causing viruses. It is also here that retrovirologists isolate a virus to which no immunity exists. It is later named HTLV (Human T-cell Leukemia Virus).

- **On October 5, 1976**

- ...just as the so-called "SWINE FLU" inoculation program was getting under way, news reports suddenly told us that we were experiencing fallout from an alleged Chinese atmospheric nuclear blast on September 26. Oddly enough, the initial reports about this came from the East Coast, especially Pennsylvania, New Jersey, Delaware, and Connecticut; but certain areas of the Pacific Northwest were soon mentioned as being affected too.

We were told that radioactive iodine-131 was showing up in milk at various locations; but we were also assured, as we invariably are whenever any radioactive hazard appears, that there was really no danger. In the days that followed we continued to hear about the supposed Chinese fallout, but other things probably seemed even more worrisome. For example, elderly people began dying of heart attacks shortly after taking swine flu shots, causing widespread alarm at first. But the Government quickly assured us that their deaths didn't really matter at all, that they would have died anyway; and the swine flu inoculation program went right back into high gear.

**Dr. Peter Beter**

- **1976**

The joint KGB-CIA chemical warfare experimentation program began in Philadelphia at the American Legion Convention. A convenient test group was assembled, and it was exploited. Data was desired for the effects of a formulation of the new family of poisons on older men in particular, and the American Legion Convention was chosen as the perfect target.

Aerosol spray cans containing poisoned room freshener were used to selectively saturate the atmosphere of the Legionnaires. Afterwards the special spray cans were taken from the hotel, leaving the city by airplane from a small airport on the northwest side of Philadelphia. Two of the active ingredients in the poison that produced the Legionnaires Disease were plutonium and zirconium.

**Dr. Peter Beter**

- **August 1976**

About a month after the *Legionnaire episode*, and had quite a different purpose; and so a different poison formula was used. Plutonium was again an ingredient, as it is in the

entire line of chemical warfare agents now being tested; but this time the formula was designed for very rapid effect with the victims receiving a massive dose.

On a day late in August two Air Force C-141 Starlifter transport aircraft that were preparing to leave McGuire Air Force Base in New Jersey on flights over the Atlantic were sabotaged by the placement in their cockpits of concealed canisters of poison gas, rigged so that the gas would be released in flights without being detected.

The two planes left McGuire at nearly the same time, and crashed within hours of one another when approaching separate destinations in Greenland and England. The very next day, with the wreckage of the aircraft hardly cooled, a Pentagon spokesman said, quote:

- "Sabotage does not appear to be a factor. It's not even being considered as a factor."

Officials also said there was no apparent connection between the crashes. Apparently leaving the same Air Base at practically the same time and then crashing almost simultaneously without warning is not supposed to suggest the possibility of anything but coincidence. No doubt it is also coincidence that McGuire Air Force Base, the origin of these two strange fatal flights, is right next door to Fort Dix where the whole swine flu cover-up scare originated!

**Dr. Peter Beter**

• **1976**

Nobel Prize went to American scientist Carleton Gajdusek for his experiments demonstrating that injections of kuru brain (1967) and CJD brain (1969) reproduced similar illnesses in chimpanzees.

A striking feature of AIDS is that it's ethno-selective. The rate of infection is twice as high among Blacks, Latinos and Native Americans as among whites, with death coming two to three times as swiftly. And over 80% of the children with AIDS and 90% of infants born with it are among these minorities. "*Ethnic weapons*" that would strike certain racial groups more heavily than others have been a long-standing U.S. Army BW objective. (Harris and Paxman, p 265)

The "discovery" of the *AIDS virus* (HTLV3) was announced by Dr. Robert Gallo at the National Cancer Institute, which is on the grounds of Fort Detrick, Maryland, a primary U.S. Army biological warfare research facility.

• **1977**

Senate hearings on Health and Scientific Research confirm that 239 populated areas had been contaminated with biological agents between 1949 and 1969. Some of the areas included San Francisco, Washington, D.C., Key West, Panama City, Minneapolis, and St. Louis.

• **1978**

The Hepatitis B vaccine study appears to have been the initial means of planting the infection in New York City. The test protocol specified non-monogamous males only, and homosexuals received a different vaccine from heterosexuals. At least 25-50% of the first reported New York AIDS cases in 1981 had received the Hepatitis B test vaccine in 1978. By 1984, 64% of the vaccine recipients had AIDS, and the figures on the current infection rate for the participants of that study are held by the U.S. Department of Justice, and "unavailable."

- **1978-1987**

Even as the understanding of spongiform encephalopathy increased, various human pituitary hormone programs in countries such as Australia, France, New Zealand, the United Kingdom and United States were attracting hefty government sponsorships.

Few of the programs' stalwarts caught on to the implications of the Manuelides' experiments, and unsuccessful attempts between the years of 1978 and 1987 to filter the CJD agent out of the pituitary hormones being injected into unsuspecting short-statured children and infertile women were left to one of this era's rare visionaries, British scrapie expert Alan Dickinson.

At about the same time, a British Royal Commission on Environmental Pollution in 1979 raised the possibility that the unregulated cycling of protein-rich sheep remains back into animal feed might spread scrapie to cattle, as it had done to farm mink in the US three decades beforehand, via the oral route.

- **1979**

There was an explosion at a Soviet plant in Sverdlosk and an outbreak of anthrax followed. At the time, all accusations of BW research were vigorously denied by Soviet officials, with the explanation that anthrax outbreaks can occur naturally and that the explosion was merely a coincidence.

- **1979 June**

A well-dressed, articulate stranger visited the office of the *Elberton Granite Finishing Company* and announced that he wanted to build an edifice to transmit a message to mankind.

He identified himself as R. C. Christian, but it soon became apparent that was not his real name. He said that he represented a group of men who wanted to offer direction to humanity, but to date, almost two decades later, no one knows who R. C. Christian really was, or the names of those he represented. Several things are apparent.

The messages engraved on [the Georgia Guidestones](#) deal with four major fields:

- (1) Governance and the establishment of a world government,
- (2) Population and reproduction control,
- (3) The environment and man's relationship to nature, and
- (4) Spirituality.

In the public library in Elberton, I found a book written by the man who called himself R.C. Christian.

The monument he commissioned had been erected in recognition of Thomas Paine and the occult philosophy he espoused. Indeed, the Georgia Guidestones are used for occult ceremonies and mystic celebrations to this very day. Tragically, only one religious leader in the area had the courage to speak out against *the American Stonehenge*, and he has recently relocated his ministry.

Aspartame was invented by the G D Searle Co. acquired by Monsanto in 1985. For 16 years FDA refused to approve it until 1981 when Commissioner Arthur Hayes overruled the objections of a Public Board of Inquiry and the protests of the American Soft Drink Association and blessed it.

The tests submitted by Searle were so bad the Department of Justice, initiated prosecution of Searle for fraud. Then the defense lawyers hired the prosecutors, Sam Skinner and Wm. Conlon, and the case expired when the statute of limitations ran out. Aspartame/Nutrasweet, a toxin that blinds, drops intelligence, eradicates memory, grows brain tumors and other cancers, brings fatigue.

Depression, ADD, panic, rage, paranoia, diabetes, seizures, suicide and death. This toxin is supported by unlimited advertising and the manufacturers pay off the *American Diabetics Association*, the *American Diabetics Association*, the *AMA*, and whomever else, to convince us its safe as rain. These lies are backed by a Federal Bureaucracy knowing it may kill your child, but the bureaucrat who approved the poison got a fat job as have many of his successors. Suppose this government watchdog, ignoring thousands of consumer complaints, has become an Attack Dog protecting corporate corruption.

This is the bitter reality of [Aspartame/Nutrasweet](#), Monsanto, the FDA, Coca Cola, Pepsi, and the hundreds of food, drink and drug makers who add to their products a known poison Conceived in Fraud and Dedicated to the Proposition that Profit is all that Matters! (They're Poisoning Our Kids - Aspartame Warning The Facts From Betty Martin Mission-Possible-USA@altavista.net)

Dr. Miguel A. Baret of the Dominican Republic removed milk from 360 children's diets, because cow's milk has a specific protein that can cause diabetes, especially in children. They drank juice laced with aspartame instead and many developed

- "abnormal restlessness, lack of concentration, irritability and depression."

When Dr. Baret removed it:

- "The results were astonishing. Their symptoms disappeared in 4-6 days in ALL of them!"

Thank you, Dr. Baret, for this study showing what aspartame does to the brains of our kids!

The first detailed charges regarding AIDS as a BW weapon were published in the Patriot newspaper in New Delhi, India. It is hard to say where the investigations of this story in the Indian press might have led, if they had not been sidetracked by two major domestic disasters shortly thereafter: the assassination of Indira Gandhi on Oct. 31 and the Bhopal Union Carbide plant "accident" that killed several thousand and injured over 200,000 on Dec. 3.

According to the *Proceedings of the National Academy of Sciences* (83:4007-4011), HIV and VISNA are highly similar and share all structural elements, except for a small segment which is nearly identical to HTLV. This leads to speculation that HTLV and VISNA may have been linked to produce a new retrovirus to which no natural immunity exists.

Dr. Louis Elsas, Professor of Pediatrics & Genetics at Emory University, testified before Congress;

- "Aspartame is in fact a well-known neurotoxin and teratogen [triggers birth defects] which in some undefined dose will irreversibly in the developing child or fetal brain, produce adverse effects I am particularly angry at this type of advertising that is promoting the sale of a neurotoxin in the childhood age group." [Nov 2, 1987]

Neurosurgeon Russell Blaylock, MD, declares Aspartame is a toxin like arsenic and cyanide that causes confusion, disorientation, seizures, cancer, pancreatic, uterine, ovarian and brain tumors and leads to Alzheimer's. Read Excitotoxins, the Taste That Kills [505-474-0303]. Hear Dr. Blaylock's radio interview on [www.dorway.com](http://www.dorway.com)'

Courageous whistleblowers like these have spoken in three congressional hearings, but industry's lobbying and political action keep the poison in the foods of the world. Our recourse as consumers is personal communication since the media is paid by advertising to push Nutrasweet/Equal/Diet Coke, etc..

During which time the number of French children at risk of growth-hormone-related CJD had practically doubled, the first French children fulfilled that tragic legacy. In 1993, those responsible for this travesty were threatened with manslaughter charges. By 1997, France had half of the world's 100-plus cases of pituitary hormone-related CJD

Although the *general elitism of human-pituitary programs* restricted this brand of medical madness to North America, Europe and Australasian, Third World children and women did not altogether escape the insanity of applying Frankenstein medicine to social conditions. A medical report in 1991 linked the CJD death of a young Brazilian man, like those of five youthful New Zealand men and women, with a childhood treatment involving pituitary growth hormone obtained from the US.

Unfortunately, the fate of women in Mexico City whose breasts were injected with US pituitary hormones in an appalling experiment to increase the volume of milk in lactating mothers (some already pregnant again) will probably never be known.

It was discovered the federal violence initiative - the federal government's agency - wide plan to go into America's inner cities to experiment on children in the hope of finding genetic and biological causes for violence. We opposed this program as racist and abusive of children. Our efforts led to the cancellation of this program. It also led the chief sponsor of the program, psychiatrist Frederick Goodwin, to resign from his post as director of NIMH and to leave a career in the government. The fenfluramine studies at Columbia and Queens College are part of the violence initiative. They were created under its umbrella before it was cancelled. They confirm our fears that while the public aspects of the violence initiative were withdrawn, the actual individual projects continue unabated.

One has only to learn what really happened to the Christians in Rwanda between April and July of 1994 to imagine what may lie in store for Christians here in America at some time in the not-too-distant future.

After the Christian Tutsis had been disarmed by governmental decree in the early 1990s, Hutu-led military forces began to systematically massacre the defenseless Christians. The massacre began in April 1994 and continued until July 1994. Using machetes rather than bullets, the Hutu forces were able to create a state of abject fear and terror within the helpless Christian population as they systematically butchered hundreds of thousands of them.

The United Nations immediately convened hearings on the genocide taking place in Rwanda, but Madeline Albright, the American Ambassador to the United Nations, argued strenuously that neighboring African nations should not be allowed to intervene until the "civil war had come to an end."

In reality, of course, there was no civil war since those being slaughtered had no weapons with which to defend themselves; it was simply a matter of mass murder. In addition to blocking intervention by neighboring nations, Madeline Albright also insisted that the word "genocide" must not be used, and that the United Nations forces stationed in Rwanda were not to be allowed to intervene. In the three months that followed, between one-half and three-quarters of a million Christians were systematically dismembered, hacked to death, and slaughtered in the bloody carnage that ensued.

Tens of thousands of Christians were murdered in their churches; tens of thousands more were murdered in their hospitals and in their schools. On several occasions, United Nations soldiers stationed in Rwanda actually handed over helpless Christians under their protection to members of the Hutu militia. They then stood by as their screaming charges were unceremoniously hacked to pieces. At the end of the carnage, in late July 1994, the American government rewarded the Hutu murderers with millions of dollars in foreign aid.

Strangely, the American press has remained silent [Subversion Of The Free Press By The CIA](#) about the fact that almost all of those who were slaughtered were Christians, and it was the policies of our government that were primarily responsible for blocking efforts by neighboring African countries to intervene.

Dr. Phyllis Mullenix, former head of toxicology at Forsyth Dental Center in Boston and now a critic of fluoridation. Animal studies which Mullenix and co-workers conducted at Forsyth in the early 1990s indicated that fluoride was a powerful central nervous system (CNS) toxin and might adversely affect human brain functioning even at low doses. (New epidemiological evidence from China adds support, showing a correlation between low-dose fluoride exposure and diminished IQ in children.) Mullenix's results were published in 1995 in a reputable peer-reviewed scientific journal.

The University of Rochester's classified fluoride studies, code-named "Program F", were started during the war and continued up until the early 1950s. They were conducted at its Atomic Energy Project (AEP), a top-secret facility funded by the AEC and housed at Strong Memorial Hospital.

It was there that one of the most notorious human radiation experiments of the Cold War took place, in which unsuspecting hospital patients were injected with toxic doses of radioactive plutonium. A new scientific paper dealing with a meta-analysis of 23 different scientific studies on the relationship between first-trimester abortions and breast cancer was published in a British medical journal.

That study clearly demonstrated a higher incidence of breast cancer in women who had had first-trimester abortions. In response to that publication, the *American Medical Association* (AMA), the *American Cancer Society* (ACS), and pro-abortion/population-control advocates joined together in an unholy alliance to attack the conclusions of the authors, and to block all efforts to disseminate that information to American physicians.

- **1997 October**

Speaking from Washington, DC, Nobel Prize winner for discovering the role of molecules known as "prions" in the invariably fatal brain illnesses such as "mad cow disease" or *bovine spongiform encephalopathy* (BSE) in cattle, and *Creutzfeldt-Jakob disease* (CJD) in humans, Dr. Stanley Prusiner from the University of California predicted that the first drug therapy, which would not necessarily be a cure for BSE or CJD, was at least five years away.

At the same time, on the opposite side of the Atlantic, the post-mortem of Chris Warne, a 36-year-old fitness fanatic from Derbyshire, England, revealed that he was the 21st victim of the new variant of CJD which had spread from BSE-infected cattle to humans via the food chain. Only 18 months earlier, a British House of Commons admission that BSE-infected meat had probably caused the CJD deaths of 10 youthful Britons left the British meat industry in tatters.

Since then, the history of BSE has gradually unfolded to reveal a brain-dead imperialism, one which, while blinded by its own arrogant greed to inflate market profits, has treated public and, indeed, world health with gay abandon.

Formerly a rare disease which affected less than one per million in most countries, one worst-case scenario predicts that BSE-infected meat will push the incidence of CJD in humans to claim 10,000 British lives by the year 2000, and a further 10 million by the year 2010.

Another predicts that half the British people, some 30 million, will be left brain-dead by CJD. As Chris Warne's mother commented, her son was a health-conscious sportsman, but "after winning medals in March, by July he couldn't stand on his feet, and by October he was gone".

Researchers at the *US Army Medical Research Institute of Infectious Diseases* (or USAMRIID) at Fort Detrick in Frederick MD have reconstructed and modified the *H1N1 Spanish Flu virus*, making it far more deadly than it ever was back when it was responsible for the 1918-1919 flu pandemic that killed over 20 million worldwide and over 500,000 here in the US.

FRANCE is facing a new health scandal following allegations that the prestigious *Pasteur Institute* willfully ignored warnings that up to 600 children were being injected with cancerous hormones.

The disclosures that children may have been put at risk emerged during a new

investigation into the link between the growth hormones and Creutzfeldt-Jakob disease (CJD), which caused a major scandal when acknowledged in the Nineties . So far, 74 children have died of CJD after being treated with growth hormones extracted from the bodies of victims of neurological illnesses in the Eighties.

That scandal and the contaminated blood affair in which 4,000 people were infected with HIV through unscreened blood transfusions - despite the availability of an American test for the virus - have contributed to France's acute sensitivity on health issues. When the contaminated blood affair came to trial in 1998 , it was alleged that authorization for the American test was withheld to give the institute time to develop a rival French test.

The latest claims suggest that in 1985 the institute sold a batch of growth hormone to French hospitals without waiting for safety checks which showed the batch to have cancer marker cells at five times the permitted limit for use. The institute is further alleged to have made no efforts to withdraw the batch once it was aware of the risk.

Back in 2003 a meeting took place between an investigative researcher by the name of (name withheld) and a well-placed military source. The **identity** of both parties is to be protected. The source has intimate knowledge of at least one aspect of the aerosol operations (chemtrails), and asserts the following:

1. The operation is a joint project between **the Pentagon** and the pharmaceutical industry.
2. **The Pentagon** wishes to test biological diseases for war purposes on unsuspecting populations. It was stated that **SARS** is a failure as the expected rate of mortality was intended to be 80%.
3. The **pharmaceutical industry** is making trillions on medications designed to treat both fatal and non-fatal diseases given to populations.
4. The **bacteria** and **viruses** are freeze-dried and then placed on fine filaments for release.
5. The metals released along with the diseases heat up from the sun, creating a perfect environment for the bacteria and viruses to thrive in the air supply.
6. Most countries being sprayed are unaware of the activities and they have not consented to the activities. He states that commercial aircraft flying are one of the delivery systems.
7. Most of the "players" are old friends and business partners of the **senior Bush**.
8. The **ultimate goal** is the control of all populations through directed and accurate spraying of drugs, diseases, etc.

9. People who have tried to reveal the truth have been imprisoned and killed.
10. This is the most dangerous and dark time that I have experienced in all of my years of serving this country.  
This information is relayed without qualification, as I am knowledgeable in the level of integrity of the researcher that has made this information available to the public. There is both risk and restraint that has been exercised in the preparation of this statement.  
**Clifford E Carnicom** July 26 2003

**Additional Notes Aug 17 2003:**

The following personal and observations have been relayed to me by ***the investigative researcher referred to above:***

I am the researcher that relayed information to **Carnicom** and I can tell you that the meeting occurred as stated. I see that my meeting opened up some dialogue. I have to ask: why are so many intelligent people debating the "tail of the dog"? Does it have fleas, long or short hair, or no tail at all. Look at the DOG. See the big picture here. Do you question that people are dying in record numbers from the **aerosol operations?** It is a fact that an increase in particulate matter increases mortality.

A top respiratory doctor had written a book about the "**breathing crisis.**" On the *Today Show*, not in some secret meeting place, he tells us that respiratory disease has gone from eighth to fourth place as a leading cause of death, soon to be third, in only FIVE years. The doctor says the increase in respiratory death is because of smoking. Now that seems a little off, since many people have stopped smoking, and yet in FIVE years dying from breathing is the major cause of death behind heart failure and cancer. It is also a fact that when oxygen is reduced, cardiac arrest goes up. He also advises "not to exercise outdoors". What does exercising outdoors have to do with smoking? Any chance that breathing heavy metals could be the cause of not only increasing death from respiratory disease, but also contributes to cardiac arrest and cancer? Go back to the DOG. Look at the bigger picture of what's going on with our health; stop debating the biological contents of an already deadly, efficient operation. Incidentally, "culling" was never mentioned in my report.

Let me be clear about all this..... Elected officials are either afraid to discuss and deal with this issue or they are being bought off by the DoD. Over the years many congress representatives have gone so far to deny they know anything about chemtrail spraying.

1. If this is being done by our military, then its high treason not only for them, but also for the politicians and bureaucrats that ordered these WMD be created AND USED AGAINST AMERICANS, and it's a felony crime as well.... punishable by felony first degree murder and its associated punishment and I don't care if its military/politicians doing it. They should be arrested just like any small time criminal. We know that U.S. Air Force Reserve C-130 aircraft are used out of places like Pittsburgh, PA, Youngstown, OH, and Louisville, KY. There are dozens of such units flying out of

civilian airports where they are based. Air Force Reserve and Air National Guard in most cases are located adjacent to civilian airports so as to avoid duplication of air landing strip facilities.

2. If this is being done by our allies, Israel and Great Britain, then its war, undeclared and illegal war based on international law and steps would need to be taken to prepare to war against those doing this. Is that why 89 DNA sequencing microbiologists were murdered after 9-11? That specialty tells us in which BIOWEAPONS FACILITY THE BUG WAS CREATED IN.

3. A Nuremberg type commission needs to be set up to investigate this with all of the resources they need to do the job and those found to be responsible, should suffer the same penalty as those in WW II trials.

4. We, the people, now need to draw a serious line in the sand with respect to this below, especially if its proven to be accurate. I am not a scientist, but I do listen to those who are and this is very well done and clear. This has been ongoing for at least twenty-five years.

THERE IS NO DOUBT THAT AN ONGOING CRIME IS BEING COMMITTED HERE AND NEEDS TO BE PURSUED TO THE END. Press your senators and congressmen to get an investigation going independent of those in power and give the members doing this investigation protection against those in power, such as that given to whistle blowers and make sure it's clearly stated that any interference in the investigation will be treated as a major crime and pursued accordingly. If we fail to stop this now, humanity will be wiped out. It all comes from the chemtrails.

#### **MOLECULAR TERRORISM — MYCOPLASMA**

#### **Genetically Engineered Stealth Microbes May Be The Source Of Your Health Problems**

##### **Author: Gary Tunsky**

You wake up dead tired. You feel like you've been hit by a truck. Sleep becomes sporadic, if at all. When sound sleep occurs, the restoration of energy is minimal causing you to meticulously save your energy like a miser hoards gold. If you force yourself into activities beyond the scope of your normal daily chores, you pay a heavy price. A possible consequence is being bedridden for days.

You have trouble concentrating. Short-term memory spells make you feel like you're trapped in a brain fog. You have unexplained muscle aches and joint pains like a never-

ending flu. Your spouse and family don't understand this new metamorphic change in you, going from active and bubbly to sick and decrepit in the prime of your life almost overnight.

Your social life has disintegrated and once close friends are slowly drifting away because the monotonous explanation that you're too tired to see a movie or go out to dinner has waned thin. Your taking an abundance of sick time and your boss is starting to question your sanity. Nobody understands. Nobody believes. Nobody offers help. Well, almost nobody.

Thanks to the research of Professor Don Scott and Dr. Garth Nicholson, **there is a growing awareness of a mysterious and debilitating illness that is affecting over 800,000 Americans, and being carried dormant by everyone in North America just waiting to be triggered into molecular terrorism.** This man-made, hidden stealth pathogen is named Mycoplasma, and is the common culprit in almost every disease process today including AIDS and Lymes disease. AIDS was a creation of the CIA!

Chances are if you feel sick and tired and your doctor is unable to make a definite diagnosis because lab tests, blood chemistry profiles and tissue cultures fail to reveal any disease pathogen, you might very well be infected with Mycoplasma. According to Professor Don Scott, **this newly formed virulent pathogen is a weaponized crystalline form of the nonpathogenic Brucella bacterium which resides naturally in the oral cavity, gut flora and superficial body sites that has been genetically engineered with the retro virus visna from sheep (scrapies) by our own military.** (VN: treason sound familiar?)

This mutated sub-viral particle acts by **attaching to a gene in either the cell nuclei or mitochondria and given a suppressed immune system, acidic pH, low oxygen cell environment coupled with a triggered physical or emotional trauma,** the Mycoplasma/amyloid will initiate a replication process of useless protein fibrils called nucleation. This process triggers programmed cell death disabling the ATP producing factories (mitochondria). These sub-viral bacterium particles have been termed prions by Dr. Prusiner, stealth viruses by John Martin, amyloid by Dr. Gajdusek and Mycoplasma/Brucellosis by Don Scott and Garth Nicholson.

Despite government manipulated statistics, there has been an undeniable rapid increase of all neurodegenerative and autoimmune diseases coming out of nowhere since the mid 1990's with absolutely no origin to their genealogy. Chemtrails began in earnest in 1996, with little or no let up since then.

My question to medical science is why are there such an unprecedented number of Americans caught up in a medical merry-go-round of being bounced from one doctor to the next without ever receiving a proper diagnosis? The simple answer is mainstream medical doctors are not trained in detection of non-detectable pathogens.

Since Mycoplasma hides intracellularly and invades multiple organs and systems, it

manifests a vast array of symptoms throughout the whole body, making a correct diagnosis virtually impossible for a mainstream doctor's linear, magic bullet mentality.

Due to the misdirection of medical science compartmentalizing the human body into 10 separate specialty fields (dermatology, endocrinology, urology, neurology, psychology, oncology, gastric specialty, general practice etc.), like an auto mechanic would segregate engine parts, none of the mainstream physicians understand how all 10 body systems work synergistically as a whole like a flowing river. This has led medical science to perpetuate trash can labels to terms for symptoms of Mycoplasma to hide their ignorance.

Syndrome X, Graves disease, Systemic Lupus, Sjogren-Larsson syndrome, Huntington's chorea, Guillain-Barré syndrome, myasthenia gravis, Creutzfeldt-Jakob disease, Rift Valley fever, Hashimoto, Parkinson's disease, Alzheimer's disease, post traumatic stress syndrome, ADDH, even the recent West Nile virus, are all virulent Mycoplasma invasions in disguise.

The names of the mysterious diseases are simply the location of the Mycoplasma invasion/destruction, not a new disease. Almost every neurodegenerative and autoimmune disease has a pathogenic Mycoplasma species responsible for the initiation of the disease process.

## **7 Mycoplasma Variants Linked To Numerous Diseases**

The seven weaponized Mycoplasma variants that enter fluid and blood circulation that were created covertly by the U.S. government and are now wreaking havoc on the population are the following:

- 1.) M. Fermentans (incognitas strain). The term fermentans reveals fermentation process (i.e.: yeast, molds, fungus, spores, cancer).
- 2.) M. Penetrans penetrate the cell membrane and invade host cells.
- 3.) M. Pneumoniae attacks upper respiratory epithelial cells, inflaming them and causing upper respiratory infections and chronic pneumonia.
- 4.) M. Genitalium (Genitalia) invades urethral tissue and cells in the genital area causing pelvic inflammation and urethritis.
- 5.) M. Hominus is found in joint tissues in rheumatoid arthritis.
- 6.) M. Pirum is found in AIDS as a co-factor accelerating AIDS progression.
- 7.) M. Salivarium is found in salivary glands and joint tissues in rheumatoid arthritis.

High-level exposure of Mycoplasma to blood, semen, mother's milk or vaccines will lead to AIDS. AIDS was a CIA creation. Low-level exposure to bodily fluids where concentrations are less will contribute to chronic fatigue syndrome, fibromyalgia, multiple sclerosis and other autoimmune diseases. Specific diseases can be targeted by controlling the Mycoplasma concentrations to bodily fluids.

## **Mycoplasma Thrives On Cholesterol**

What makes these designer diseases so elusive is that they're genetically engineered only for DNA replication, transcription and translation with no organelle or cell wall. They have lost their genes for amino acid and fatty acid synthesis, forcing them to invade and steal proteins, sugars and sterols (cholesterol) from healthy neighboring cells to survive.

These cholesterol dependent molecular terrorists immediately take up residency in the individual's genetically pre-disposed weaknesses, (the weak link in the chain of organs or systems), or the path of least resistance. Since Mycoplasma has absolute dependence upon the uptake of preformed sterols (cholesterol structures), they have an affinity toward cell membranes, nerve cells, sex hormone cell factories, glands and the gray matter in brain tissue, where cholesterol sterols are found.

Since cholesterol is a co-factor in glandular hormone production, the endocrine balance is drastically altered with cholesterol being pulled out of the cell cycle. That is why pathogenic changes are seen most often during pregnancy, hormone replacement therapy, steroid therapy, menstrual cycles and xeno-estrogens from pesticides, herbicides, meat and dairy.

With the disruption of the hormones, comes an open invitation for the RNA directed HIV to replicate. The newly formed HIV RNA makes its way to the host cell surface where it connects and breaks away carrying with it a GP 120 protein envelope that was hijacked from the previous cell's surface. It repeats by countering another cell, adheres to the cell surface and accesses the interior genetic material of its new host where the cascade process is repeated.

Unless Mycoplasma penetrates into tissues and cells they cannot exert their terrorist effects. They will lay dormant, sometimes for a decade and longer, until physical or emotional trauma, severe stress or vaccine contaminants wake up the sleeping giant to invade and feed on the cell's genetic material like an intracellular parasite, taking the cell hostage until it ruptures and dies.

### **Mycoplasma Triggering Mechanisms**

Mycoplasma is activated and stimulated by initiators (ignition) and potentiators (promoters). The potentiators are the toxic substances in our food, beverages, environment, pharmaceuticals, heavy metals (mercury amalgams) and chemicals that we bathe in, etc. that store in fat cells and weaken our cellular terrain and immune system to allow the initiators (i.e. stress, viruses, bacteria, fungus, parasites, emotional and physical trauma, fear, increased estrogen, anger, etc.) to ignite or light up the gasoline that's poured on the barn -Mycoplasma.

If the gray matter of the brain tissue is the target of Mycoplasma invasion, you'll portray symptoms of dementia, Alzheimer's, Parkinson's, Creutzfeldt-Jakob disease or memory and cognitive thinking disturbances depending on the area of the brain terrorized.

If the spinal cord is the victim, you will exhibit symptoms of neurodegenerative diseases

like myasthenia gravis, Guillain-Barré and ALS (Lou Gehrig's disease). If your weakness happens to be the synovial fluid cells in your joints, rheumatoid arthritis with severe joint pain will be your disease. In fact, many of the 21st century diseases that were thought to be autoimmune turned out to be Mycoplasma invasions. I do not believe that God made our immune system that stupid to attack our own tissues.

If Mycoplasma invades the beta cells in the pancreas that manufactures insulin, you can't regulate blood sugar and Diabetes Mellitus will be your demise.

If your cardiac tissues are your weak link, cardiomyopathy will manifest. If *M. Pneumoniae* or *M. Fermentans* attacks the bronchial lining of the bronchial tubes, the inflammation will trigger asthma and upper respiratory infections.

If the myelin sheaths of the nerves are targeted, you will exhibit neurological symptoms of multiple sclerosis. If the intestinal lining is penetrated, the damage to the mucosal lining will perpetrate Crohn's disease or leaky gut.

In the case of Lou Gehrig's disease, 80% of the patients have detected at least two Mycoplasma strains -*M. Penetrans* and *M. Fermentans*.

In ALS, the oligodendritic nerve cells which require cholesterol to synthesize neurosteroids are eaten.

If Mycoplasma population is large enough, they gobble up so much cholesterol they diminish neuro-steroid synthesis which leads to severe central nervous system malfunctions. Even Lymes disease, which is the fastest growing infectious disease in the U.S. and possibly Europe, with the exception of AIDS, was found to be linked to both *Borrelia* and Mycoplasma infections as a co-infection. The Mycoplasma species of *M. Pneumoniae* and *Chlamydia* invading the pericardium lining of the heart, seem to be common dominators of myocarditis and pericarditis infections.

Mycoplasma steroid stealing properties also make the energy producing mitochondria leaky by robbing cholesterol lipids that are necessary in mitochondrial membrane integrity. When mitochondria bleed, they cannot generate ATP energy necessary for cell energy and function and nerve cells are the most sensitive to energy deprivation.

This explains why chronic fatigue and neurological disorders are the main symptoms of the trinity diseases chronic fatigue syndrome (CFS), fibromyalgia (FMS) and Gulf War illness (GWI). In my opinion, they are the same disease ideology with all three characterizing common symptom traits of chronic fatigue, short term memory loss, low grade fevers, tissue and lymph swelling, joint and muscle pain, stomach and digestive disorders, immuno-suppression and severe systemic chronic infections that invade various organs, tissues and cells including the brain, nervous system and heart.

### **Mycoplasma Infection Leads To A Medical Merry-Go-Round**

Since the disease pattern of CFS, FMS and GWI affect all major body systems (cardio vascular invasion involving the left ventricle, neurological damage ranging from mild cognitive problems to bi-polar depression or schizophrenia, genitourinary damage presenting incontinence or urethritis, pulmonary symptoms of asthma and the development of fibro masses or nodules in the lungs etc.).

This multi-faceted symptomatology is causing a medical merry-go-round in the medical profession starting with a general practitioner who will usually prescribe an anti-inflammatory and a short-term antibiotic regimen for the chronic infection.

Since you also exhibit symptoms of neurological disorders and your general practitioner is not versed in neurology, you will be referred to a neurologist. After the examination with a neurologist and a couple scripts later for your anxiety and insomnia, you will be pawned off on an endocrinologist for your hormonal imbalance because the neurologist has limited knowledge in endocrinology.

Due to the combined adverse side effects of the antibiotics, anti-inflammatories, analgesics and tranquilizers, you may exhibit signs of gastric disturbances and skin reactions where you will be further drugged by a dermatologist or a gastrologist. Next in line on the "gist" medical treadmill is the cardiologist who will push a beta-blocker or a diuretic on you for your cardiomyopathies.

After seeing ten different disease specialists and spending thousands of dollars on MRI's, CT Scans, X-Rays, surgery, pharmaceuticals, etc., without finding a solution to your dilemma, you will be labeled psychosomatic, hypochondriac or suffering from severe depression where you will end up with a psychologist.

You're now a walking drug store with more complications than what you started with thanks to the combined adverse reactions of the drugs and the limitations of medical doctors who specialize in only 1/10<sup>th</sup> of the body. What a racket!!!

The government perpetrates non-detectable, virulent, stealth pathogens on the population by way of mosquito vectors (West Nile), primary aerosol, **chemtrails**, vaccines and possibly the food chain, and then you're put through a medical merry-go-round of disease specialists that know little or nothing about Mycoplasma ideology and do not have access to the necessary diagnostics for detection.

The pharmaceutical companies and the warlocks in Washington and Wall Street are laughing all the way to the bank as they profit hundreds of billions of dollars on humanity's suffering while fulfilling their agenda of population control.

### **Protocols To Treat Mycoplasma**

Since Mycoplasma cannot be successfully treated with the usual short course duration of antibiotics due to their intracellular location, slow proliferation rate and inherent resistance to most antibiotics, the few Mycoplasma experts that specialize in this field

are recommending six-months to one year of non-stop treatments using strong antibiotics such as Cipro and Doxycycline.

However, if a patient does not want to destroy their body and immune system with Cipro and Doxycycline, a total overhaul of every cell from head to toe using a multi-faceted, non-toxic, holistic treatment approach is absolutely necessary to overcome Mycoplasma infections naturally.

This is why vitamins and nutritional supplementation are so important in the therapy. Chronic illness patients must also be weaned off antidepressants and other potential immune suppressing drugs before they can fully recover from their illnesses.

This information compliments my own information that I have shared in the articles entitled "**Mycoplasma: The Pathogen That Will Kill You without Your Knowledge!**,"

### CHEMTRAILS DESTROY YOUR IMMUNE FUNCTION

Here's online patent information for a pathogenic mycoplasma isolated from AIDS patients.

Another of the chemtrail ingredients, barium, can produce adverse symptoms affecting the nervous system and flu-like symptoms. When barium accumulates in the body, it usually affects the functions of the nervous system. Barium poisoning displays symptoms that are similar to flu, which is why it's not strange to find the condition misdiagnosed as flu.

Common symptoms of barium poisoning include:

1. Muscle weakness and tremors
2. Difficulty in breathing
3. Stomach irritations accompanied by diarrhea
4. Anxiety
5. Cardiac irregularities such as abnormally high blood pressure and rapid heartbeat
6. Paralysis

What chemicals are in chemtrails? According to Russ Tanner, there are several types of "tastes and smells" that indicate chemtrails:

Salty Metallic, Iron/Aluminum, Drywall Dust, Acetone, Swamp Water, Pharmaceutical, Sulfur, Blunt Metallic, Metallic Chemical, Pesticide, Freshly-Cut Grass, Dryer Sheets/Fabric Softener, Model-Cement/Burnt Plastic, which he describes on his [webpage](#).

## CHEMTRAIL TOXICITY HEALTH ISSUES?

Russ's chemtrail types are a great identification process, which may explain much about the abnormalities we experience in outdoor ambient air quality.

Here are some little-known 'facts' about chemtrails:

In a bill [H.R. 2977] introduced into the 107th U.S. Congress in 2001, chemtrails were referred to as an "exotic weapons system."

Supposedly, chemtrail spraying over humans in the USA gained its legality from U.S. Code Title 50, Section 1520 which gives the Secretary of Defense authority to order testing "involving the use of a chemical agent or biological agent on civilian population" for research purposes. We're being used as lab rats! This is nothing more than elitists and globalists who value only their lives and not ours! In the short of this, it is a crime against humanity!

That should be brought to the attention of every member of the U.S. Congress and changed immediately!

Mike Blair, a Washington reporter, wrote that "chemtrails" actually are "*anti-bacteriological warfare chemicals being tested by the federal government*."

The issue of Mycoplasma took on new dimensions when Wireless communications were introduced into the environment. 1996 became a benchmark date when the marketing of the popular cell phone. With each advancement made in the technology saw an increase in human health issues. With the advent of the airport body scanners,

“smart” utility meters, and now the 5G millimeter-band wave are bringing to light health issues that present a major issue for the telecommunications industry. Particularly so is the case with 5G millimeter-band energy which can be electroporated into the body’s sweat glands of a human. 5G energy levels activates cellular damage in the DNA, and will activate the dormant Mycoplasma in the body that can activate the many variants of Mycoplasma, like those noted on page 25.

The wireless energy of all cellular communications has been an accumulation issue; however, when 5G entered the picture, the higher energy level needed to maintain a point-to-point signal, we now are confronted with even greater harm potential in much shorter periods of time to do it.
