

Depopulation

#1 Global Issue Since 1968

Part 16

In early December, 2020 the State of Australia scrapped its Billion-dollar Coronavirus vaccine after many participants tested HIV positive, and yet this story was hardly noticed on the Internet or media.

On December 11th, 2020 the [Australian Government has scrapped a billion dollar coronavirus vaccine agreement](#) with Australian biotech company CSL Limited to supply 51 million doses of a Covid-19 vaccine being developed by the University of Queensland after several trial participants returned false positive HIV test results.

The University of Queensland has abruptly ended its trials for coronavirus vaccine the Australian government had ordered in a \$1 billion deal for 51 million doses. The [deal was terminated](#) after participants returned false positive HIV test results over fears that vaccine mishap would damage the public's confidence in the COVID-19 vaccination program. The problem is a false positive was exposing a hidden truth.

Look Closer: Shouldn't Have Taken This...

On Friday the Australian Prime Minister, Scott Morrison, said: *“University of Queensland vaccine will not be able to proceed based on the scientific advice, and that will no longer feature as part of Australia’s vaccine plan.*

Australian vaccine scientist Nikolai Petrovsky had warned the government about the risk of including HIV in a vaccine months before the \$1billion deal was signed.

Australian vaccine scientist Nikolai Petrovsky had warned the government about the risk of including HIV in a vaccine months before the \$1billion deal was signed.

Mr. Petrovsky told [The Australian](#) the problem with the use of HIV was clear in the ‘hamster and mouse data’ but his advice was ignored. He said that the early data suggested the vaccine itself was quite unstable.

'Overall it just didn't look like it was going to be a successful vaccine, that's why we were surprised when the government committed millions of dollars to it, it just seemed disproportionate.'

The Covid-19 "spike protein" has been the focus of the University of Queensland vaccine, using molecular clamp technology to lock the protein into a shape which allows the immune system to be able to recognize and then neutralize the virus. Covid's spike proteins, like most surface viral proteins, are fairly unstable. To ensure that the vaccine induced the right immune response, the clamp chosen comprises two fragments of a protein found in HIV, as those fragments provided the greatest stability to the vaccine.

The vaccine, which used the COVID-19 spike protein and a 'molecular clamp', featured an HIV protein fragment. The fragment was producing a partial antibody response in some participants, resulting in false positive tests for the virus. CSL said the false positives were caused by so-called 'molecular clamp' antibodies.

After Australian health department secretary Brendan Murphy and acting Chief Medical Officer Paul Kelly reviewed the findings and understood the dangers posed by the vaccine, he recommended ending the deal.

As reported earlier, in February, 2020 a group of Indian scientists discovered that **Coronavirus was engineered with AIDS like insertions**. The study concluded that it was unlikely for a virus to have acquired such unique insertions naturally in a short duration of time. **18 cell fragments of AIDS is inserted into the vaccine, which amounts to 80% of what is known as the AIDS virus**. Also 4 cell fragments of SARS-2-covid was inserted. This "spiked" protein goes viral, since all viruses want to reproduce. You may not die when you get the injection, maybe not tomorrow, but Hank Aaron, died 18 days after he received the injection of the Covid-19 so-called vaccine. You might go a few days, six months, a year, but count on it, you will die! Dr. Lee Merrit from America's Frontline Doctors has been speaking on what I have been reporting since last March, 2020. The censors have yet to hear her reports on the Internet.

Dr. Judy Mikovits, a molecular-biologist and virologist has authored two books on the vaccine fraud, and last year said 55-million Americans will die from this vaccine. At the time when she said that, I did not grasp how this would actually occur. That answer is in the previous paragraph just above!

Although the study was retracted after it attracted heavy criticism from experts on social media, [Luc Montagnier, the Nobel Prize winning French virologist himself confirmed the conclusions of the study](#).

The study concluded that it is because of these new [AIDS like insertions in Coronavirus](#) that the virus jumped to humans originally known only to infect animals. Evidence has since concluded this Corona virus (Covid-19) was made in a BSL-4 military lab. It is a bioweapon!

These proteins are critical for the viruses to identify and latch on to their host cells and for viral assembly. Since surface proteins are responsible for host tropism, changes in these proteins imply a change in host specificity of the virus. According to reports from China, there has been a gain of host specificity in case 2019-nCoV as the virus was originally known to infect animals and not humans but after the mutations, it has gained tropism to humans as well.

The study gives credence to GreatGameIndia's earlier reports on how Coronavirus was engineered in a lab and weaponized. It has now been revealed through emails obtained via public records requests that the "natural origin of Coronavirus" was an orchestrated myth.

Emails obtained by U.S. Right to Know show that a statement in *The Lancet* authored by 27 prominent public health scientists condemning "conspiracy theories suggesting that COVID-19 does not have a natural origin" was organized by employees of EcoHealth Alliance, a non-profit group that has received millions of dollars of U.S. taxpayer funding to [genetically manipulate coronaviruses](#) with scientists at the [Wuhan Institute of Virology](#). Dr. Anthony Fauci illegally spent \$7.4-million dollars to have the CCP accentuate "Gain of Function" (increased lethality).

The emails show that EcoHealth Alliance President Peter Daszak drafted the Lancet statement, and that he intended it to "*not be identifiable as coming from any one organization or person*" but rather to be seen as "*simply a letter from leading scientists*". Daszak wrote that he wanted "*to avoid the appearance of a political statement*".

Meanwhile, China has started using AIDS drugs for Coronavirus treatment. China is using AbbVie Inc.'s HIV drugs as an ad-hoc treatment for pneumonia caused by the novel coronavirus while the global search for a cure continues.

The Australian vaccine termination announcement comes only days after it was revealed in a newly released U.S. Food and Drug Administration document that 6 participants died during Pfizer's COVID vaccine trials.

The coronavirus vaccine is a global depopulation bioweapon. People injected with Covid-19 vaccines are suddenly testing positive for HIV. What's interesting is that this story is claiming the HIV tests are "false positives." But if HIV is actually detected, then how is it false? Notice that when someone is found to be carrying the coronavirus, it's never called a false positive. It's simply called a "positive" result or a new "case" of infection. By that logic, these vaccine recipients should also be labeled "cases" of HIV. And it begs the question: What's being put into the vaccine that resembles HIV closely enough to trigger a positive test result?

HIV protein fragments intentionally added to coronavirus vaccines

From the story linked above: Mr. Petrovsky told The Australian the problem with the use of HIV was clear in the 'hamster and mouse data' but his advice was ignored. He said

the early data suggested the vaccine itself was quite unstable. Covid's spike proteins, like most surface viral proteins, are fairly unstable. To ensure that the vaccine induced the right immune response, the clamp chosen comprises two fragments of a protein found in HIV, as those fragments provided the greatest stability to the vaccine. So wait, they're using HIV components in the vaccine on purpose? Indeed, yes. And this is why it's triggering the HIV "positive" test results. In other words, they aren't false positives at all.

They're detecting the HIV components that are being deliberately put into the coronavirus vaccine. Technically, it would be accurate to state that the coronavirus vaccine is using "HIV protein fragments" as a deliberate component of the vaccine. So people who are lining up to be injected with the coronavirus vaccine may be volunteering to be injected with HIV protein fragments. But anyone who mentions this will of course be instantly deplatformed on all the social media platforms, even when it's 100% true. It should be readily apparent to any rational person that the coronavirus vaccine is a global depopulation bioweapon that's designed to injure, kill or make infertile billions of human beings. Anyone who takes the coronavirus vaccine is begging for vaccine-assisted suicide. Unless, of course, you are suicidal! An earlier version of this story reported that Robert F. Kennedy, Jr. had issued a warning that no one should take the covid-19 vaccine.

CNN revealed that vaccinating elderly for Covid-19 could kill them, but if you mention this anywhere, you will be BANNED. Is it safe for elderly people to get a Wuhan coronavirus (Covid-19) vaccine? Not according to Dr. Helen "Keipp" Talbot of Vanderbilt University, who was the lone "no" vote on a CDC advisory panel that ultimately decided to recommend the experimental jab for old folks. Believe it or not, CNN recently gave Dr. Talbot a platform to express her concerns about the risks involved with giving Covid-19 vaccines to people who are frail and vulnerable. Since such folks have the highest risk of injury or death, is it really safe to jab them with something that could kill them?

Dr. Talbot is not so sure, and thus does not recommend that patients living in long-term care facilities especially get vaccinated, at least not until more is known about vaccine adverse effects. *"Odd woman out, I guess,"* Dr. Talbot is quoted as saying to her colleagues. *"I still struggle with this. This was not an easy vote."* In the event that large numbers of long-term care residents suddenly start dying from the jab, public perception of its safety and effectiveness would be tarnished, she worries. So it is not that Dr. Talbot opposes the vaccine, per se, but rather that she does not want people to become scared of it if mass deaths occur. For this reason, some are calling on healthier people to receive the shot first. If it appears as though the vaccines are safe and effective in people who are young and vibrant, then those who are old and frail will be more likely to join them in rolling up their sleeves. For more related news about the Wuhan coronavirus (Covid-19), be sure to check out [Pandemic.news](https://pandemic.news).

Covid-19 vaccines have never been tested in the most at-risk old people. To be clear, neither CNN nor Dr. Talbot appear to be concerned about the actual safety of old people. What they care about is the optics of Covid-19 vaccination in terms of safety and effectiveness. If non-elderly people see elderly people dying in droves from the jab, the non-elderly will be much less likely to get vaccinated, in other words. *"Since they haven't been studied in people in those populations, we don't know how well the vaccine will work for them,"* says Dr. Kelly Moore, associate director of the Immunization Action Coalition, a group that supports frontline workers who will be tasked with administering Covid-19 vaccines. *"We know that most vaccines don't work nearly as well in a frail elderly person as they would in someone who is fit and vigorous, even if they happen to be the same age."*

Dr. Moore went on to admit that there is no way to truly know if Covid-19 vaccines will benefit the elderly in any way because those at the highest risk were not included in the test groups. *"There's a question about the direct benefit of the vaccine, if given to people who live in those facilities, because we haven't studied how well it works in that group yet."* So much for science. At the same time, anyone who dies following vaccination for Covid-19 probably died from something else, according to Dr. Moore, especially if they were already nearing the end of their lives. *"One of the things we want to make sure people understand is that they should not be unnecessarily alarmed if the elderly die in higher numbers."*

There are reports, once we start vaccinating, of someone or multiple people dying within a day or two of their vaccination who are residents of a long-term care facility," Dr. Moore contends. *"That would be something we would expect, as a normal occurrence, because people die frequently in nursing homes."*

There are so many suspicious unusual things about this past year with Covid-19, it is important that we do not discount such things as the Internet censorship of any site that so much as mentions negative aspects of the virus or the so-called vaccine, which according to Pfizer's own documents states that it is not a vaccine, but a "delivery system" delivering what?

The Netherlands Aerospace Center sent a Boeing 737-800 up in the air to conduct some kind of strange Wuhan coronavirus (Covid-19) "test flight" over England a month ago. And as far as we can tell, Brits down below were never notified about the biohazardous experiment. A German news page on Twitter revealed that Corendon Airlines partnered with the Dutch organization to supposedly "*learn more about aerosols on board aircraft.*" The experiment took about three hours, though nobody really knows what it involved because nothing has been publicly disclosed. Was Covid-19 deliberately sprayed inside the aircraft, some are asking? Was it also sprayed outside the aircraft? Again, nobody seems to know the answers to any of these questions, which is ominous in and of itself. Many have speculated on the true nature of the flight, asking many of the same questions as we are about what really went on up at 39,000 feet. "*The question is, was this substance being sprayed to kill the flu virus or was it used as a vaccine without getting the public's permission?*"

Back in August, 2020, Corendon publicly announced that travelers arriving in Nuremberg – a bit ironic in light of the Nuremberg Trials – would need to jump through a bunch of hoops in order to deplane there. In addition to having to get a Covid-19 test upon arrival, travelers were also ordered to:

- Have in hand an existing negative Covid-19 test printed in either English or German
- Not be coming from any "high-risk" Covid-19 area throughout Europe
- Only be passing through Germany rather than making it one's final destination

"If none of the above apply to you, you can register online in advance to shorten your waiting time when you return to Nuremberg," the company further announced.

Since this is a developing story, there is not much else to say at this point other than something fishy definitely took place in the skies over the U.K. that warrants further investigation. Was something done up there to spread more disease in the name of trying to fight it? Will we ever truly know what the plandemic purveyors are doing behind our backs with incidents like this as they continue to fear monger about the virus? One thing we do know for sure is that the newly released Covid-19 vaccines are mostly untested, and could potentially shed the virus or some other infectious agent onto others. Perhaps this is what was being tested inside that Boeing airplane as it flew high over the skies of Great Britain.

The timing is certainly suspect, seeing as how the first batch of Covid-19 vaccines was released in the U.K. at precisely the same time that this test launch occurred. Speaking of vaccine risks, it is also entirely unknown how the average Joe will fare after receiving the jab. Will people who get vaccinated for Covid-19 end up becoming seriously ill or dying? Will "health authorities" then blame people who did not get vaccinated when the true culprits were those who received the vaccine? Robert F. Kennedy Jr. is advising everyone to avoid taking the shot for these reasons and more. It is simply not a risk worth taking, especially for something that has a 99-plus percent survival rate. One Twitter user, commenting on the airplane anomaly, wrote that there are probably going to be "spikes" in Covid-19 cases over the areas where it flew in the coming days. We certainly would not be surprised. For more related news about Covid-19, be sure to check out Pandemic.news.

Pfizer and Moderna are expected to earn \$32 billion from 2021 sales of their coronavirus vaccines. That is quite a bundle of bucks which begs my question about transparency. We are censored on anything that borders on the level of criticism, or reported negative side effects. California is hiding the statistics on this as of a few days ago in mid-January, 2021. The agencies responsible for the public health have not been straight-forward about the virus origin, how it spread so fast, and why there are different strains right from its original first reporting. They can plead ignorance all they want, but their lack of upfront honesty speaks to their being less than honest why anyone with a bit of intelligence should risk their life as a test mammal for their untested, unproven, pig-in-a-poke gamble. This is not my idea of honesty. It reminds me of Nancy Pelosi saying, *"the House needs to sign the bill before getting to read it."* Come on folks, wake up to the fact our government is a partner to the Agenda 21, Agenda 2030 of the 1992 Rio Treaty in which each signatory country had to reduce their population.

The fact that the American public has been dumbed down for half a century suggests the powers at be take us all to be morons. Wall Street analysts have surmised that drug makers Pfizer and Moderna will earn combined profits of about \$32 billion in 2021. Investment bank Morgan Stanley projected that Pfizer's COVID-19 jab is expected to bring in \$19 billion next year. Meanwhile, Goldman Sachs remarked that Moderna will rake in \$13.2 billion in earnings that come from its Wuhan coronavirus vaccine. This comes in stark contrast to pharmaceutical firms Johnson & Johnson and AstraZeneca, who have vowed to offer their Wuhan coronavirus vaccines at no profit once they are approved for emergency use.

The vaccine candidates from AstraZeneca and J&J are currently undergoing trials as of writing. The messenger RNA (mRNA) vaccines from Pfizer and its German partner BioNTech and Moderna both reported more than 90 percent efficacy rates in clinical trials. However, the U.S. Food and Drug Administration (FDA) authorized the Pfizer/BioNTech jab for emergency use December 11, 2020. A panel consisting of 23 independent scientists voted in favor of the BNT162b2 jab and recommended it to the FDA the day before, following long and drawn-out talks over its safety. FDA Commissioner Stephen Hahn said regarding the Pfizer/BioNTech jab's approval: *"The FDA's authorization ... of the first COVID-19 vaccine is a significant milestone in battling this devastating pandemic. The tireless work to develop a new vaccine to prevent this ... disease in an expedited timeframe after its emergence is a true testament to scientific innovation and public-private collaboration worldwide."* Prior to the FDA, the United Kingdom's Medicine and Healthcare products Regulatory Agency (MHRA) gave its authorization for the BNT162b2 jab December 2, 2020 – which was subsequently rolled out to the population on December 8. Pfizer stocks were barely affected despite its Wuhan coronavirus vaccine candidate gaining approval due to its size: BNT162b2 sales represent a small slice of its overall revenue. It also promised to share half of its profits to BioNTech, which Pfizer collaborated with to develop the vaccine. Meanwhile, the German firm's shares listed in the U.S. spiked 300 percent this year following the

announcement of its vaccine showing promise. Moderna stocks likewise benefited from its promising vaccine, shooting up 700 percent from the start of the year.

The mRNA vaccines by Pfizer/BioNTech and Moderna appear to bypass safety in the name of profit. I find that totally unacceptable and you should as well.

However, regulators have overlooked the safety risks that come with rushing the development of vaccines – as in the case of the Pfizer/BioNTech and Moderna vaccine candidates. MailOnline reported December 8, 2020 that four volunteers in Pfizer's U.S. trials developed Bell's palsy, a kind of facial paralysis, after receiving the BNT162b2 jab. The volunteers eventually recovered from the condition in a span of three to 21 days. Less than 0.5 percent of trial participants experienced serious side effects – including the four cases of Bell's palsy, according to the FDA. The U.S. regulator denied that the vaccine directly caused the paralysis, but promised to observe other cases closely and warned doctors to watch out for the side effect in vaccinated individuals. The U.K. also saw adverse reactions to the BNT162b2 vaccine during the country's actual immunization program.

Two workers under the National Health Service (NHS) experienced "anaphylactoid reactions" after receiving the Covid-19 jab, incidentally on the first day of the vaccine's rollout. The reported adverse reactions prompted the MHRA to warn those with a "*history of a significant reaction*" to medicines, foods or vaccines against taking the coronavirus shot.

(Related: UK begins mass vaccination program with Pfizer, starting with the elderly and healthcare workers.) The NHS previously warned against giving the Pfizer/BioNTech jab to pregnant and lactating women, as its effects on fertility are still "unknown." While Moderna's coronavirus vaccine candidate has not yet obtained emergency use approval, there are still concerns over its potential risks. The Massachusetts-based drug maker admitted that its mRNA-1273 vaccine caused "grade 3 systemic symptoms" that require medical intervention in some volunteers. A report by Children's Health Defense elaborated that three volunteers who joined Moderna's trials developed "serious adverse events" within 43 days after being vaccinated.

(Related: Moderna admits that some components of mRNA tech used in vaccines can cause "significant adverse events".) Vaccines.news gives you the latest on Wuhan coronavirus jabs being developed to fight the pandemic.

Baseball legend Hank Aaron dies two weeks, on January 21st, after receiving coronavirus vaccine during publicity stunt.

On January 5, 2021, Major League Baseball legend and Hall of Famer Henry Louis "Hank" Aaron publicly took a Wuhan coronavirus (Covid-19) vaccine during a stunt aimed at persuading more African-Americans to get injected. A little more than two weeks later, Aaron died right on cue. The reason this writer says "on cue" is because there is now a clear and undeniable pattern of elderly people – Aaron was 86 years old

when he died – passing away roughly two weeks after getting injected with Chinese poison. Aaron was among the first major figures to be injected as part of the Donald Trump-launched "Operation Warp Speed" program for fast-tracked mass vaccination against the WuFlu.

Aaron had previously told the media that he was excited about getting jabbed. *"It makes me feel wonderful,"* Aaron told the Associated Press (AP) right before getting poisoned with a Chinese needle. *"I don't have any qualms about it at all ... I feel quite proud of myself for doing something like this ... It's just a small thing that can help zillions of people in this country."* The Atlanta Braves legend and one-time home run king's official cause of death has not yet been reported by the mainstream media, which is presumably working overtime to scrub from existence all evidence that the guy was recently injected with gene-editing messenger RNA (mRNA) chemicals at warp speed.

If you choose to get vaccinated for coronavirus, you're asking to die. Are you suicidal? While wearing his face mask incorrectly on camera, Aaron wanted his injection broadcasted to the world in order to encourage more folks, especially black folks, to get vaccinated. Aaron appeared at the Morehouse School of Medicine in Atlanta along with his wife Billye, where he received the first of what would have been two doses of Moderna's DNA-corrupting Wuhan coronavirus (Covid-19) vaccine. Interestingly, California halted its statewide Moderna vaccine injection program after a "disturbing number" of serious adverse reactions were observed. Just days later, the Moderna vaccination drive was quickly resumed. Civil rights leader Andrew Young and former U.S. Health and Human Services (HHS) secretary Louis Sullivan were both vaccinated with the Moderna jab alongside Aaron at the Morehouse facility. Many black people across the nation are choosing to forego Wuhan coronavirus (Covid-19) vaccination because they keenly recall the Tuskegee experiment of the 1930s and other eugenics programs that have been utilized throughout history to try to exterminate *"people of color."*

"The federal government essentially lied to Black people for decades – telling them they were getting free health care, when in fact they received horrifically improper care so the U.S. Public Health Service could secretly study the effects of syphilis when untreated," revealed TMZ about the Tuskegee experiment. Nothing has changed, of course, except for the fact that today's eugenics programs are aimed at pretty much everyone, light-skinned people included. The AP conducted a survey back in December showing that upwards of 40 percent of black people will not be getting a China virus vaccine. Hopefully after seeing Aaron die and connecting the dots, many more will say no to the poison needles and embrace natural remedies as a safe and effective alternative. *"Everybody line up like good little sheep and get your NOW (new world order) Wuhan virus vaccine!"* wrote one NoQreport commenter pointing out the absurdity of it all. *"Everybody step right up and get an untested vaccine to combat a virus that kills .01% of people under 60!!! Don't be shy, step right up!"* Another pointed out that Aaron's death serves as more ammunition for Americans to reject any attempt at making Wuhan vaccines mandatory in order to buy, sell and travel. To learn more

about how Chinese virus jabs are injuring and killing people in droves, check out Pandemic.news.

My friends, there has never been a time in history where a specific Bible passage that has been so pointed and appropriate for this time than Hosea 4:6. ***“My people are destroyed for lack of knowledge: because thou hast rejected knowledge, I will also reject thee, that thou shalt be no priest to me: seeing thou hast forgotten the law of thy God, I will also forget thy children.”***

This passage applies to anyone that identifies with God the Father, Jesus Christ the Word, and the Holy Spirit. It is amazing the number of people that ask my wife “are you taking the vaccine?” Instead of asking someone else, perhaps they should investigate the evidence that viruses and vaccines have never been verified once to be what they were called, labeled, or identified as. In my library, I now have more than a dozen books on the subject of viruses, genetics, DNA, immune system, and all have been written within the last few years. These are written by academically credentialed experts in their specific field of medicine or research. There are dozens of reports on the harm of the face mask yet senile Joe Biden is forcing the issue by his 100 day mandate. I hope the American people will tell him where to go with his diaper mask.

181 Dead in the U.S. During 2 Week Period From Experimental COVID Injections – How Long Will We Continue to Allow Mass Murder by Lethal Injection?

Although 25% of ambulatory patients experience an adverse drug event, less than 0.3% of all adverse drug events and 1-13% of serious events are reported to the Food and Drug Administration (FDA).

Jesuit Dr. Anthony Fauci, NIAID

Likewise, less than 1% of vaccine adverse events are reported. Low reporting rates preclude or slow the identification of “problem” drugs and vaccines that endanger public health.

Currently, data from the two experimental mRNA Covid injections that have been voluntarily reported is available for a two week period from the end of December through January 13, 2021.

The data covers 7,844 cases, including 181 deaths (2%). The largest amount of deaths occurred in people over the age of 75.

181 Dead in the U.S. during 2 week period from experimental Covid Injections – How long will we continue to allow mass murder by lethal injection? This article began with the question of whether to give a vaccine to an older person, 70+. How much evidence do we need to show this is the worst thing that you could do to an older person, probably with existing health issues that diminish their chances of fighting off adverse reactions.

The Jesuit Dr. Anthony Fauci should be arrested and prosecuted for genocidal mass murder and his many illegal actions conducted during his tenure at the NIAID. First and foremost is his illegal spending \$7.4 million taxpayer dollars with the Chinese Communist Party for “gain of function”, the term used to describe making a virus more lethal, more efficient in killing people. Dr. Fauci is a murderer and unlikely to be prosecuted for his work to kill more elderly.

Our comfort will be found by knowing that God’s Cosmic Justice will be swift and eternal!

While almost ALL deaths in 2020 were recorded as Covid Deaths, here’s why NO deaths in 2021 will be recorded as Vaccine Deaths.

It is well known now that due to federal funding for Covid in 2020 that nearly all deaths were recorded as “Covid” deaths, even in cases where the death occurred by traffic accident, shooting, heart attack, hunting accident, etc.

Now we are seeing the exact opposite happen with the roll-out of the Covid experimental injections. NONE of them are being recorded as vaccine deaths. Why?

It is simply because the CDC does not provide a category for “vaccine deaths” to be used on death certificates. To learn more about this, see an article we published in 2018 from a Death Certificate Clerk whistleblower who revealed the politics behind listing “cause of death” on death certificates.

Of all of what I have said here we cannot ignore that this alleged virus known as the Coronavirus, **Covid-19, it is from day one, A BIOWEAPON**. It was created to reduce the world’s population as being something from nature, when we know from its Genetic markers and inserts of HIV and SARS-2-covid, The public is at a vast disadvantage from those who dream up these pathogens from which they profit at the expense of vulnerable and innocent people. I knew it was a bioweapon as early as January, 2020.

A bioweapon has but one purpose, to debilitate or to kill. In the 16 segments of this series, I have produced the evidence and proof that the global elite of the world want to get rid of seven billion of us.

Most people still believe your DNA does not change, but that changed a few short years ago when they completed the mapping of the human Genome project . An entire new

field of gene therapy now exists in which enables the modifying, gene therapy, gene replacement, has come into existence with what is known as CRISPR.

CRISPR, also called CRISPR/Cas9. The scientific world is captivated by this revolutionary technology, since it is easier, cheaper and more efficient than previous strategies for modifying DNA.

The term CRISPR/Cas9 stands for Clustered Regularly Interspaced Short Palindromic Repeats/CRISPR associated protein 9. The names reflect important features identified during its discovery, but they don't tell us much about how it works, as they were coined before anyone understood what it was.

It is very much like the editorial process: Find, cut and then paste

In order to target the Cas9 scissors, a technician links them to an artificial guide that directs them to the matching segment of DNA.

The technician gives the scissors a copy of the DNA we're after so they know where to cut. Remember, DNA comes in two strands, with one strand fitting alongside the other. They make a guide with a code that will line up with only one part of our 3 billion base pair long genome – it's like a "Google" search. It's truly possible for the guide to comb through vast amounts of genetic material to find the one section it matches exactly. Then the technician "scissors" can make the cut in exactly the right place. Unfortunately, this new process of gene editing can also be used by the minds of

depraved and degenerated purposes. In the past, vaccines were given to create antibodies that gave people immunity to pathogens such as tetanus, typhoid, measles, chicken pox, etc. With this gene therapy of CRISPR, demonic people can create customized viruses at their will. The Corona virus called Covid-19 before it was weaponized in a military BSL-4 lab, was nothing more than the common cold.

Bill Gates and Richard Rothschild both hold patents (2017, 2018) on Covid-19, That all changed in 1968 when *'The Population Bomb'* by Paul Ehrlich was published, From that point forward, their agenda has been to create "Silent Weapons for Quiet Wars!"

See illustration at the bottom of this page. This is the first of a series of "injections" that lead to Microsoft founder Bill Gates' QuantumDot/Hydrogel ID2020. The Covid-19 vaccine through fear-mongering is a mind "conditioning process." It is an experimental gene "delivery system" by Pfizer's own documents. What does it deliver? We know with certainty it delivers 18 (6-6-6) fragments of HIV (80% of the HIV pathogen); and since all viruses want to go viral, it will quickly reproduce, leading to debilitation and ultimate death!

Blessings,

Pastor Bob, EvanTeachr@aol.com
www.pastorbobreid.com
<http://jesusisthewaythetruththelife.com/node/22>

The new vaccine for Covid-19 will be the first of its kind EVER. It will be an mRNA vaccine which will literally alter your DNA. It will wrap itself into your system. You will essentially become a genetically modified human being.
