

# **“Doomsday Seed Vault” in the Arctic. Bill Gates 2006 Initiative**

Bill Gates, Rockefeller and the GMO giants know something we don't!  
By F. William Engdahl  
Global Research 4 December 2007

Much of this article was first published in December 2007. We have new information as to why this report is of such huge significance. While the information is not new per se, rather it was kept from the public by the CIA and other government agencies. The solar activity in the current solar activity cycle indicates significant increased activity alluding to what is referred to as a Solar Nova or “Pole Shift” coming. I [Pastor Bob] have believed that the “Seed” Bank at the Arctic Circle was for such an event and we were not to know the reasons. The elite were looking to save themselves under the cover pretext of so-called Climate Change. The elite could institute scare tactics to mislead the public that the planet would die in 12 years unless the nations worked to decrease the CO<sup>2</sup> by 1.5-degrees Celsius.

The elite led by Prince Charles of Wales and his “Sustainable Development” agenda that came out of the UN Climate Change Conference of 1992 waged a propaganda campaign to convince humanity of the need to reduce the “human carbon footprint” in the environment by eliminating fossil fuel emissions. Everything about Covid-19 resonates a message of “Depopulation”! This was a sophisticated highly planned scheme tracked back to the Rockefeller Foundation “Operation Lockstep” in 2010, in which a global pandemic would be used to transition the world to global government. There is enough on the Internet about “Operation Lockstep” which was first exposed on Alex Jones Infowars.com.

The content of this article by F William Engdahl was included in one of his books, *‘Seeds of Destruction: The Hidden Agenda of Genetic Manipulation’*. The world was largely unaware of something even more of greater concern than most of humanity would face in 2046.

One thing Microsoft founder Bill Gates can’t be accused of is sloth. He was already programming at 14, founded Microsoft at age 20 while still a student at Harvard. By 1995 he had been listed by *‘Forbes’* as the world’s richest man from being the largest shareholder in his Microsoft, a company which his relentless drive built into a de facto monopoly in software systems for personal computers.

In 2006 when most people in such a situation might think of retiring to a quiet Pacific island, Bill Gates decided to devote his energies to his Bill and Melinda Gates Foundation, the world’s largest ‘transparent’ private foundation as it says, with a whopping \$34.6 billion endowment and a legal necessity to spend \$1.5 billion a year on charitable projects around the world to maintain its tax free charitable status. A gift from friend and business associate, mega-investor Warren Buffett in 2006, of some \$30 billion worth of shares in Buffet’s Berkshire Hathaway put the Gates’ foundation into the league where it spends almost the amount of the entire annual budget of the United Nations’ World Health Organization.

So when Bill Gates decides through the Gates Foundation to invest some \$30 million of their hard earned money in a project, it is worth looking at.

No project is more interesting at the moment than a curious project in one of the world's most remote spots, Svalbard. Bill Gates is investing millions in a seed bank on the Barents Sea near the Arctic Ocean, some 1,100 kilometers from the North Pole. Svalbard is a barren piece of rock claimed by Norway and ceded in 1925 by international treaty (see map below).

On this God-forsaken island Bill Gates began investing tens of his millions along with the Rockefeller Foundation, Monsanto Corporation, Syngenta Foundation and the Government of Norway, among others, in what is called the 'doomsday seed bank.' Officially the project is named the Svalbard Global Seed Vault on the Norwegian island of Spitsbergen, part of the Svalbard island group.

The seed bank is being built inside a mountain on Spitsbergen Island near the small village of Longyearbyen. It's almost ready for 'business' according to their releases. The bank will have dual blast-proof doors with motion sensors, two airlocks, and walls of steel-reinforced concrete one meter thick. It will contain up to three million different varieties of seeds from the entire world, 'so that crop diversity can be conserved for the future,' according to the Norwegian government. Seeds will be specially wrapped to exclude moisture. There will be no full-time staff, but the vault's relative inaccessibility will facilitate monitoring any possible human activity.

Did we miss something here? Their press release stated, 'so that crop diversity can be conserved for the future.' What future do the seed bank's sponsors foresee, that would threaten the global availability of current seeds, almost all of which are already well protected in designated seed banks around the world?

Anytime Bill Gates, the Rockefeller Foundation, Monsanto and Syngenta get together on a common project, it's worth digging a bit deeper behind the rocks on Spitsbergen. When we do we find some fascinating things.

The first notable point is who is sponsoring the doomsday seed vault. Here joining the Norwegians are, as noted, the Bill & Melinda Gates Foundation; the U.S. agribusiness giant DuPont/Pioneer Hi-Bred, one of the world's largest owners of patented genetically-modified (GMO) plant seeds and related agrichemicals; Syngenta, the Swiss-based major GMO seed and agrichemicals company through its Syngenta Foundation; the Rockefeller Foundation, the private group who created the "gene revolution" with over \$100 million of seed money since the 1970's; CGIAR, the global network created by the Rockefeller Foundation to promote its ideal of genetic purity through agriculture change.

### **CGIAR and 'The Project'**

As I detailed in the book, *'Seeds of Destruction'*<sup>1</sup>, in 1960 the Rockefeller Foundation, John D. Rockefeller III's Agriculture Development Council and the Ford Foundation joined forces to create the International Rice Research Institute (IRRI) in Los Baños, the Philippines. By 1971, the Rockefeller Foundation's IRRI, along with their Mexico-based International Maize and Wheat Improvement Center and two other Rockefeller and Ford Foundation-created international research centers, the IITA for tropical agriculture, Nigeria, and IRRI for rice, Philippines, combined to form a global Consultative Group on International Agriculture Research (CGIAR).

CGIAR was shaped at a series of private conferences held at the Rockefeller Foundation's conference center in Bellagio, Italy. Key participants at the Bellagio talks were the Rockefeller Foundation's George Harrar, Ford Foundation's Forrest Hill, Robert McNamara of the World Bank and Maurice Strong, the Rockefeller family's international environmental organizer, who, as a Rockefeller Foundation Trustee, organized the UN Earth Summit in Stockholm in 1972. It was part of the foundation's decades long focus to turn science to the service of eugenics, a hideous version of racial purity, what has been called 'The Project'.

To ensure maximum impact, CGIAR drew in the United Nations' Food and Agriculture Organization, the UN Development Program and the World Bank. Thus, through a carefully-planned leverage of its initial funds, the Rockefeller Foundation by the beginning of the 1970's was in a position to shape global agriculture policy. And shape it they did.

Financed by generous Rockefeller and Ford Foundation study grants, CGIAR saw to it that leading Third World agriculture scientists and agronomists were brought to the U.S. to 'master' the concepts of modern agribusiness production, in order to carry it back to their homeland. In the process they created an invaluable network of influence for U.S. agribusiness promotion in those countries, most especially promotion of the GMO 'Gene Revolution' in developing countries, all in the name of science and efficient, free market agriculture.

### **Genetically engineering a master race?**

Now the Svalbard Seed Bank begins to become interesting. But it gets better. 'The Project' I referred to is the project of the Rockefeller Foundation and powerful financial interests since the 1920's to use eugenics, later renamed genetics, to justify creation of a genetically-engineered Master Race. Hitler and the Nazis called it the Aryan Master Race.

The eugenics of Hitler were financed to a major extent by the same Rockefeller Foundation which today is building a doomsday seed vault to preserve samples of every seed on our planet. Now this is getting really intriguing. The same Rockefeller Foundation created the pseudo-science discipline of molecular biology in their relentless pursuit of reducing human life down to the 'defining gene sequence' which, they hoped, could then be modified in order to change human traits at will. Hitler's eugenics scientists, many of whom were quietly brought to the United States after the War to continue their biological eugenics research, laid much of the groundwork of genetic engineering of various life forms, much of it supported openly until well into the Third Reich by Rockefeller Foundation generous grants.<sup>2</sup>

The same Rockefeller Foundation created the so-called Green Revolution, out of a trip to Mexico in 1946 by Nelson Rockefeller and former New Deal Secretary of Agriculture and founder of the Pioneer Hi-Bred Seed Company, Henry Wallace.

The Green Revolution purported to solve the world hunger problem to a major degree in Mexico, India and other select countries where Rockefeller worked. Rockefeller Foundation agronomist, Norman Borlaug, won a Nobel Peace Prize for his work, hardly something to boast about with the likes of Henry Kissinger sharing the same.

In reality, as it years later emerged, the Green Revolution was a brilliant Rockefeller family scheme to develop a globalized agribusiness which they then could monopolize just as they had done in the world oil industry beginning a half century before. As Henry

Kissinger declared in the 1970's, *'If you control the oil you control the country; if you control food, you control the population.'*

Agribusiness and the Rockefeller Green Revolution went hand-in-hand. They were part of a grand strategy which included Rockefeller Foundation financing of research for the development of genetic engineering of plants and animals a few years later.

John H. Davis had been Assistant Agriculture Secretary under President Dwight Eisenhower in the early 1950's. He left Washington in 1955 and went to the Harvard Graduate School of Business, an unusual place for an agriculture expert in those days. He had a clear strategy. In 1956, Davis wrote an article in the Harvard Business Review in which he declared that *"the only way to solve the so-called farm problem once and for all, and avoid cumbersome government programs, is to progress from agriculture to agribusiness."* He knew precisely what he had in mind, though few others had a clue back then— a revolution in agriculture production that would concentrate control of the food chain in corporate multinational hands, away from the traditional family farmer.<sup>3</sup>

A crucial aspect driving the interest of the Rockefeller Foundation and U.S. agribusiness companies was the fact that the Green Revolution was based on proliferation of new hybrid seeds in developing markets. One vital aspect of hybrid seeds was their lack of reproductive capacity. Hybrids had a built in protection against multiplication. Unlike normal open pollinated species whose seed gave yields similar to its parents, the yield of the seed borne by hybrid plants was significantly lower than that of the first generation.

That declining yield characteristic of hybrids meant farmers must normally buy seed every year in order to obtain high yields. Moreover, the lower yield of the second generation eliminated the trade in seed that was often done by seed producers without the breeder's authorization. It prevented the redistribution of the commercial crop seed by middlemen. If the large multinational seed companies were able to control the parental seed lines in house, no competitor or farmer would be able to produce the hybrid. The global concentration of hybrid seed patents into a handful of giant seed companies, led by DuPont's Pioneer Hi-Bred and Monsanto's Dekalb laid the ground for the later GMO seed revolution.<sup>4</sup>

In effect, the introduction of modern American agricultural technology, chemical fertilizers and commercial hybrid seeds all made local farmers in developing countries, particularly the larger more established ones, dependent on foreign, mostly U.S. agribusiness and petro-chemical company inputs. It was a first step in what was to be a decades-long, carefully planned process.

Under the Green Revolution Agribusiness was making major inroads into markets which were previously of limited access to U.S. exporters. The trend was later dubbed "market-oriented agriculture." In reality it was agribusiness-controlled agriculture.

Through the Green Revolution, the Rockefeller Foundation and later Ford Foundation worked hand-in-hand shaping and supporting the foreign policy goals of the United States Agency for International Development (USAID) and of the CIA.

One major effect of the Green Revolution was to depopulate the countryside of peasants who were forced to flee into shantytown slums around the cities in desperate search for work. That was no accident; it was part of the plan to create cheap labor pools for forthcoming U.S. multinational manufactures, the 'globalization' of recent years.

When the self-promotion around the Green Revolution died down, the results were quite different from what had been promised. Problems had arisen from indiscriminate use of the new chemical pesticides, often with serious health consequences. The mono-culture cultivation of new hybrid seed varieties decreased soil fertility and yields over time. The first results were impressive: double or even triple yields for some crops such as wheat and later corn in Mexico. That soon faded.

The Green Revolution was typically accompanied by large irrigation projects which often included World Bank loans to construct huge new dams, and flood previously settled areas and fertile farmland in the process. Also, super-wheat produced greater yields by saturating the soil with huge amounts of fertilizer per acre, the fertilizer being the product of nitrates and petroleum, commodities controlled by the Rockefeller-dominated Seven Sisters major oil companies.

Huge quantities of herbicides and pesticides were also used, creating additional markets for the oil and chemical giants. As one analyst put it, in effect, the Green Revolution was merely a chemical revolution. At no point could developing nations pay for the huge amounts of chemical fertilizers and pesticides. They would get the credit courtesy of the World Bank and special loans by Chase Bank and other large New York banks, backed by U.S. Government guarantees.

Applied in a large number of developing countries, those loans went mostly to the large landowners. For the smaller peasants the situation worked differently. Small peasant farmers could not afford the chemical and other modern inputs and had to borrow money.

Initially various government programs tried to provide some loans to farmers so that they could purchase seeds and fertilizers. Farmers who could not participate in this kind of program had to borrow from the private sector. Because of the exorbitant interest rates for informal loans, many small farmers did not even get the benefits of the initial higher yields. After harvest, they had to sell most if not all of their produce to pay off loans and interest. They became dependent on money-lenders and traders and often lost their land. Even with soft loans from government agencies, growing subsistence crops gave way to the production of cash crops.<sup>5</sup>

Since decades the same interests including the Rockefeller Foundation which backed the initial Green Revolution, have worked to promote a second 'Gene Revolution' as Rockefeller Foundation President Gordon Conway termed it several years ago, the spread of industrial agriculture and commercial inputs including GMO patented seeds.

### **Gates, Rockefeller and a Green Revolution in Africa**

With the true background of the 1950's Rockefeller Foundation Green Revolution clear in mind, it becomes especially curious that the same Rockefeller Foundation along with the Gates Foundation which are now investing millions of dollars in preserving every seed against a possible "doomsday" scenario are also investing millions in a project called The Alliance for a Green Revolution in Africa.

AGRA, as it calls itself, is an alliance again with the same Rockefeller Foundation which created the "Gene Revolution." A look at the AGRA Board of Directors confirms this.

It includes none other than former UN Secretary General Kofi Annan as chairman. In his acceptance speech in a World Economic Forum event in Cape Town South Africa in June 2007, Kofi Annan stated, *"I accept this challenge with gratitude to the Rockefeller Foundation, the Bill & Melinda Gates Foundation, and all others who support our African campaign."*

In addition the AGRA board numbers a South African, Strive Masiyiwa who is a Trustee of the Rockefeller Foundation. It includes Sylvia M. Mathews of the Bill & Melinda Gates Foundation; Mamphela Ramphele, former Managing Director of the World Bank (2000 – 2006); Rajiv J. Shah of the Gates Foundation; Nadya K. Shmavonian of the Rockefeller Foundation; Roy Steiner of the Gates Foundation. In addition, an Alliance for AGRA includes Gary Toenniessen the Managing Director of the Rockefeller Foundation and Akinwumi Adesina, Associate Director, Rockefeller Foundation.

To fill out the lineup, the Programmes for AGRA includes Peter Matlon, Managing Director, Rockefeller Foundation; Joseph De Vries, Director of the Programme for Africa's Seed Systems and Associate Director, Rockefeller foundation; Akinwumi Adesina, Associate Director, Rockefeller Foundation. Like the old failed Green Revolution in India and Mexico, the new Africa Green Revolution is clearly a high priority of the Rockefeller Foundation.

While to date they are keeping a low profile, Monsanto and the major GMO agribusiness giants are believed at the heart of using Kofi Annan's AGRA to spread their patented GMO seeds across Africa under the deceptive label, 'bio-technology,' the new euphemism for genetically engineered patented seeds. To date South Africa is the only African country permitting legal planting of GMO crops. In 2003 Burkina Faso authorized GMO trials. In 2005 Kofi Annan's Ghana drafted bio-safety legislation and key officials expressed their intentions to pursue research into GMO crops.

Africa is the next target in the U.S.-government campaign to spread GMO worldwide. Its rich soils make it an ideal candidate. Not surprisingly many African governments suspect the worst from the GMO sponsors as a multitude of genetic engineering and biosafety projects have been initiated in Africa, with the aim of introducing GMOs into Africa's agricultural systems. These include sponsorships offered by the US government to train African scientists in genetic engineering in the U.S., biosafety projects funded by the United States Agency for International Development (USAID) and the World Bank; GMO research involving African indigenous food crops.

The Rockefeller Foundation has been working for years to promote, largely without success, projects to introduce GMOs into the fields of Africa. They have backed research that supports the applicability of GMO cotton in the Makhathini Flats in South Africa.

Monsanto, who has a strong foothold in South Africa's seed industry, both GMO and hybrid, has conceived of an ingenious smallholders' programme known as the 'Seeds of Hope' Campaign, which is introducing a green revolution package to small scale poor farmers, followed, of course, by Monsanto's patented GMO seeds.<sup>6</sup>

Syngenta AG of Switzerland, one of the 'Four Horsemen of the GMO Apocalypse' is pouring millions of dollars into a new greenhouse facility in Nairobi, to develop GMO insect resistant maize. Syngenta is a part of CGIAR as well.<sup>7</sup>

### **Move on to Svalbard**

Now is it simply philosophical sloppiness? What leads the Gates and Rockefeller foundations to at one and the same time to back proliferation of patented and soon-to-be Terminator patented seeds across Africa, a process which, as it has in every other place on earth, destroys the plant seed varieties as monoculture industrialized agribusiness is introduced? At the same time they invest tens of millions of dollars to preserve every seed variety known in a bomb-proof doomsday vault near the remote Arctic Circle 'so that crop diversity can be conserved for the future' to restate their official release?

It is no accident that the Rockefeller and Gates foundations are teaming up to push a GMO-style Green Revolution in Africa at the same time they are quietly financing the 'doomsday seed vault' on Svalbard. The GMO agribusiness giants are up to their ears in the Svalbard project.

Indeed, the entire Svalbard enterprise and the people involved call up the worst catastrophe images of the Michael Crichton bestseller, *Andromeda Strain*, a sci-fi thriller where a deadly disease of extraterrestrial origin causes rapid, fatal clotting of the blood threatening the entire human species. In Svalbard, the future world's most secure seed repository will be guarded by the policemen of the GMO Green Revolution—the Rockefeller and Gates Foundations, Syngenta, DuPont and CGIAR.

The Svalbard project will be run by an organization called the Global Crop Diversity Trust (GCDT). Who are they to hold such an awesome trust over the planet's entire seed varieties? The GCDT was founded by the United Nations Food and Agriculture Organization (FAO) and Bioversity International (formerly the International Plant Genetic Research Institute), an offshoot of the CGIAR.

The Global Crop Diversity Trust is based in Rome. Its Board is chaired by Margaret Catley-Carlson a Canadian also on the advisory board of Group Suez Lyonnaise des Eaux, one of the world's largest private water companies. Catley-Carlson was also president until 1998 of the New York-based Population Council, John D. Rockefeller's population reduction organization, set up in 1952 to advance the Rockefeller family's eugenics program under the cover of promoting "*family planning*," birth control devices, sterilization and "*population control*" in developing countries.

Other GCDT board members include former Bank of America executive presently head of the Hollywood DreamWorks Animation, Lewis Coleman. Coleman is also the lead Board Director of Northrup Grumman Corporation, one of America's largest military industry Pentagon contractors.

Jorio Dauster (Brazil) is also Board Chairman of Brasil Ecodiesel. He is a former Ambassador of Brazil to the European Union, and Chief Negotiator of Brazil's foreign debt for the Ministry of Finance. Dauster has also served as President of the Brazilian Coffee Institute and as Coordinator of the Project for the Modernization of Brazil's Patent System, which involves legalizing patents on seeds which are genetically modified, something until recently forbidden by Brazil's laws.

Cary Fowler is the Trust's Executive Director. Fowler was Professor and Director of Research in the Department for International Environment & Development Studies at the Norwegian University of Life Sciences. He was also a Senior Advisor to the Director General of Bioversity International. There he represented the Future Harvest Centres of the Consultative Group on International Agricultural Research (CGIAR) in negotiations on the International Treaty on Plant Genetic Resources. In the 1990s, he headed the International Program on Plant Genetic Resources at the FAO. He drafted and supervised negotiations of FAO's Global Plan of Action for Plant Genetic Resources, adopted by 150 countries in 1996. He is a past-member of the National Plant Genetic Resources Board of the US and the Board of Trustees of the International Maize and Wheat Improvement Center in Mexico, another Rockefeller Foundation and CGIAR project.

GCDT board member Dr. Mangala Rai of India is the Secretary of India's Department of Agricultural Research and Education (DARE), and Director General of the Indian Council for Agricultural Research (ICAR). He is also a Board Member of the Rockefeller Foundation's International Rice Research Institute (IRRI), which promoted the world's first major GMO experiment, the much-hyped 'Golden Rice' which proved a failure. Rai has served as Board Member for CIMMYT (International Maize and Wheat Improvement Center), and a Member of the Executive Council of the CGIAR.

Global Crop Diversity Trust Donors or financial angels include as well, in the words of the Humphrey Bogart Casablanca classic, 'all the usual suspects.' As well as the Rockefeller and Gates Foundations, the Donors include GMO giants DuPont-Pioneer Hi-Bred, Syngenta of Basle Switzerland, CGIAR and the State Department's energetically pro-GMO agency for development aid, USAID. Indeed it seems we have the GMO and population reduction foxes guarding the hen-house of mankind, the global seed diversity store in Svalbard.<sup>8</sup>

### **Why now Svalbard?**

We can legitimately ask why Bill Gates and the Rockefeller Foundation along with the major genetic engineering agribusiness giants such as DuPont and Syngenta, along with CGIAR are building the Doomsday Seed Vault in the Arctic.

Who uses such a seed bank in the first place? Plant breeders and researchers are the major users of gene banks. Today's largest plant breeders are Monsanto, DuPont, Syngenta and Dow Chemical, the global plant-patenting GMO giants. Since early in 2007 Monsanto holds world patent rights together with the United States Government for plant so-called 'Terminator' or Genetic Use Restriction Technology (GURT). Terminator is an ominous technology by which a patented commercial seed commits 'suicide' after one harvest. **Control by private seed companies is total. Such control and power over the food chain has never before in the history of mankind existed.**

This clever genetically engineered terminator trait forces farmers to return every year to Monsanto or other GMO seed suppliers to get new seeds for rice, soybeans, corn, wheat whatever major crops they need to feed their population. If broadly introduced around the world, it could within perhaps a decade or so make the world's majority of food producers new feudal serfs in bondage to three or four giant seed companies such as Monsanto or DuPont or Dow Chemical.

That, of course, could also open the door to have those private companies, perhaps under orders from their host government, Washington, deny seeds to one or another developing country whose politics happened to go against Washington's. Those who say 'It can't happen here' should look more closely at current global events. The mere existence of that concentration of power in three or four private US-based agribusiness giants is grounds for legally banning all GMO crops even were their harvest gains real, which they manifestly are not.

These private companies, Monsanto, DuPont, Dow Chemical hardly have an unsullied record in terms of stewardship of human life. They developed and proliferated such innovations as dioxin, PCBs, Agent Orange. They covered up for decades clear evidence of carcinogenic and other severe human health consequences of use of the toxic chemicals. **They have buried serious scientific reports that the world's most widespread herbicide, glyphosate, the essential ingredient in Monsanto's Roundup herbicide that is tied to purchase of most Monsanto genetically engineered seeds, is**

toxic when it seeps into drinking water.<sup>9</sup> Denmark banned glyphosate in 2003 when it confirmed it has contaminated the country's groundwater.<sup>10</sup>

The diversity stored in seed gene banks is the raw material for plant breeding and for a great deal of basic biological research. Several hundred thousand samples are distributed annually for such purposes. The UN's FAO lists some 1400 seed banks around the world, the largest being held by the United States Government. Other large banks are held by China, Russia, Japan, India, South Korea, Germany and Canada in descending order of size. In addition, CGIAR operates a chain of seed banks in select centers around the world.

CGIAR, set up in 1972 by the Rockefeller Foundation and Ford Foundation to spread their Green Revolution agribusiness model, controls most of the private seed banks from the Philippines to Syria to Kenya. In all these present seed banks hold more than six and a half million seed varieties, almost two million of which are 'distinct.' Svalbard's Doomsday Vault will have a capacity to house four and a half million different seeds.

### **GMO as a weapon of biowarfare?**

Now we come to the heart of the danger and the potential for misuse inherent in the Svalbard project of Bill Gates and the Rockefeller foundation. Can the development of patented seeds for most of the world's major sustenance crops such as rice, corn, wheat, and feed grains such as soybeans ultimately be used in a horrible form of biological warfare?

The explicit aim of the eugenics lobby funded by wealthy elite families such as Rockefeller, Carnegie, Harriman and others since the 1920's, has embodied what they termed 'negative eugenics,' the systematic killing off of undesired bloodlines. Margaret Sanger, a rapid eugenicist, the founder of Planned Parenthood International and an intimate of the Rockefeller family, created something called The Negro Project in 1939, based in Harlem, which as she confided in a letter to a friend, was all about the fact that, as she put it, 'we want to exterminate the Negro population.'<sup>11</sup>

A small California biotech company, Epicyte, in 2001 announced the development of genetically engineered corn which contained a spermicide which made the semen of men who ate it sterile. At the time Epicyte had a joint venture agreement to spread its technology with DuPont and Syngenta, two of the sponsors of the Svalbard Doomsday Seed Vault. Epicyte was since acquired by a North Carolina biotech company. Astonishing to learn was that Epicyte had developed its spermicidal GMO corn with research funds from the U.S. Department of Agriculture, the same USDA which, despite worldwide opposition, continued to finance the development of Terminator technology, now held by Monsanto.

In the 1990's the UN's World Health Organization launched a campaign to vaccinate millions of women in Nicaragua, Mexico and the Philippines between the ages of 15 and

45, allegedly against Tetanus, a sickness arising from such things as stepping on a rusty nail. The vaccine was not given to men or boys, despite the fact they are presumably equally liable to step on rusty nails as women.

Because of that curious anomaly, Comite Pro Vida de Mexico, a Roman Catholic lay organization became suspicious and had vaccine samples tested. The tests revealed that the Tetanus vaccine being spread by the WHO only to women of child-bearing age contained human Chorionic Gonadotrophin or hCG, a natural hormone which when combined with a tetanus toxoid carrier stimulated antibodies rendering a woman incapable of maintaining a pregnancy. None of the women vaccinated were told.

It later came out that the Rockefeller Foundation along with the Rockefeller's Population Council, the World Bank (home to CGIAR), and the United States' National Institutes of Health had been involved in a 20-year-long project begun in 1972 to develop the concealed abortion vaccine with a tetanus carrier for WHO. In addition, the Government of Norway, the host to the Svalbard Doomsday Seed Vault, donated \$41 million to develop the special abortive Tetanus vaccine.<sup>12</sup>

Is it a coincidence that these same organizations, from Norway to the Rockefeller Foundation to the World Bank are also involved in the Svalbard seed bank project? According to Prof. Francis Boyle who drafted the Biological Weapons Anti-Terrorism Act of 1989 enacted by the US Congress, the Pentagon is 'now gearing up to fight and win biological warfare' as part of two Bush national strategy directives adopted, he notes, 'without public knowledge and review' in 2002. Boyle adds that in 2001-2004 alone the U.S. Federal Government spent \$14.5 billion for civilian bio-warfare-related work, a staggering sum.

Rutgers University biologist Richard Ebright estimates that over 300 scientific institutions and some 12,000 individuals in the USA today have access to pathogens suitable for bio-warfare. Alone there are 497 U.S. Government NIH grants for research into infectious diseases with bio-warfare potential. Of course this is being justified under the rubric of defending against possible terror attack as so much is today.

Many of the U.S. Government dollars spent on bio-warfare research involve genetic engineering. MIT biology professor Jonathan King says that the 'growing bio-terror programs represent a significant emerging danger to our own population.' King adds, 'while such programs are always called defensive, with biological weapons, defensive and offensive programs overlap almost completely.'<sup>13</sup>

Time will tell whether, God Forbid, the Svalbard Doomsday Seed Bank of Bill Gates and the Rockefeller Foundation is part of another Final Solution, this involving the extinction of the Late, Great Planet Earth.

---

There is a growing body of evidence that had previously traced the origins of the CIA to the NAZI SS and OSS, and how the Intelligence Industrial Complex created the PSYOP-19 "*pandemic*" and associated DEATHVAX™.

The CIA's behavioral psychologists along with their partners-in-crime at the Pentagon, DoD, WHO, WEF, UN, CFR, Gates' "nonprofits", et al. manufactured consent through their mass induced fear program which cleverly leveraged "*Trust the Science*," more at junk science.

Once the globalists realized maximum DEATHVAX™ uptake, they had to pivot to the next phases of their Great Reset program. To that end they simply deployed a war in PSYOP-UKRAINE-INVASION which they had been seeding for decades; in fact, they were positioning NATO to continuously further betray longstanding agreements with Russia by expanding right up to her borders. Then in 2014 the CIA orchestrated their Ukraine coup, which guaranteed that all of their pieces were in place for yet another convenient war when the time was most expedient.

A recent poll perfectly exposes the above points by tracking how respondents in the Scientism cult have been brainwashed by the State to mindlessly support the

propaganda of the day versus those that have their critical thinking skills still intact; to wit:

We could easily infer that support for things like LGBTQIAP+, PSYOP-CLIMATE-CHANGE, etc. would also as per above correlate perfectly amongst the “*vaccinated*” versus the unvaccinated.

The very same way the CIA was created with top NAZIS also happened to be how NATO was formed, with the identical fascist culture that to this very day informs their respective *raison d’êtres*:

All of these NAZI/Techno-communist agencies and organizations which are nothing more than One World Government nodes deployed to slowly erode the last vestiges of privacy and freedom from humanity. Now that their operations are accelerating and the technology is mature enough, they are gearing up for their CBDC consolidation scam, which of course will port directly into their AI-driven X Everything App social credit score system.

There are no coincidences, with ESG functioning as the corporate compliance side of the forthcoming CBDC control grid power grab: Larry Fink is a criminal bankster that runs BlackRock. His corporation is partners-in-crime with the UN, WEF, CFR, WHO, CIA, DoD, Pentagon, Rockefeller and Gates “nonprofits”, et al. BlackRock is also “advising” the illicit private central Federal Reserve bank with the buying and selling of bonds and securities that it owns itself; in other words, the...

When Larry Fink invokes “forced behaviors” he is also referring to the CIA’s et al. behavioral psychology programs that nudge feeble and fearful minds into complying with whichever One World Government psyops are being deployed (e.g. the forthcoming PSYOP-CYBER-POLYGON, PSYOP-23, and PSYOP-MARKET-CRASH.)

The CBDC along with PSYOP-CLIMATE-CHANGE constitutes the final phases of their 4th Industrial Revolution, where you will own nothing, especially not your own life, and you will be behaviorally forced into being a “happy” genetically modified post-human slave:

They are no coincidences.  
They want you dead.

# the evolution of war

In 1966, the CIA banned a book called *'The Adam And Eve Story: The History of Cataclysms'*. What were they hiding? Well now you can help figure it out!

The book is about crustal displacement, but not the one you may be familiar with. It is also about compressed episodic magnetic pole flips, where the poles flip back and forth on very brief time-scales. The book is highly speculative and highly entertaining.

The CIA link:

<https://www.cia.gov/library/readingroom/document/cia-rdp79b00752a000300070001-8>

The CIA banned the book in 1996. Chan Thomas was the fake name of the writer. When the book was re-released in 2013, it was missing 57 pages. It says so right at the bottom of the CIA'S own webpage.

Bright Insight released an excellent introductory video on this very subject. It's 25 minutes long and very well presented.

<https://www.youtube.com/watch?v=tu-sLX0FbF0>

Suspicious Observers also released a more in-depth speculative video of this subject, well worth the watch. It's an excellent 25 minute video.

<https://www.youtube.com/watch?v=wvjJqIXYT1w>

What I want is your opinion on what those missing pages may have contained. Are there any real conspiracy theorists here anymore? Or, is it all just politics now?

I remember the old days when journalists did news not politics.

Thank you for your consideration.

There are multiple ways for this world to end. One often ignored and downplayed is the fact that men are becoming infertile and becoming bio-feminized. We are also getting stupider and going crazy because of multiple simultaneous environmental threats.

You can watch a short video on the Adam and Eve Story at the link below:

[\*\*CIA's Top-Secret Adam & Eve Story: Pole Shift & Mass Extinctions ...\*\*](#)

<https://www.youtube.com/watch?v=rkKjLicYc2A>

Geologist Douglas Vogt, and founder of the Diehold Foundation, has authored a number of books that addresses the very subject discussed in the short 4-minute video linked above. Douglas Vogt has a series of videos on what he refers to as the Diehold. I recommend watching the video series and since each lesson is usually around 30 minutes in length, one will be able to view each lesson without too much trouble. If you are scientifically challenged you will undoubtedly find some segments that may be above your understanding. Let me warn you that not all of his videos can be understood. Not all of us have Douglas Vogt's knowledge. Learn what you can from each video in order to grasp the topic of Solar Nova and "Pole Shifts".

In college, I had to have two sciences to meet graduation requirements; and so I had 2-years of geology, and 2-years of physics. This background gave me an added assist in

understanding many of Douglas Vogt's lessons. That said, I can state there are some lessons that were beyond my education level. Every lesson in Douglas Vogt's Diehold Foundation did provide new information that I found to validate and confirm his scientific theories.

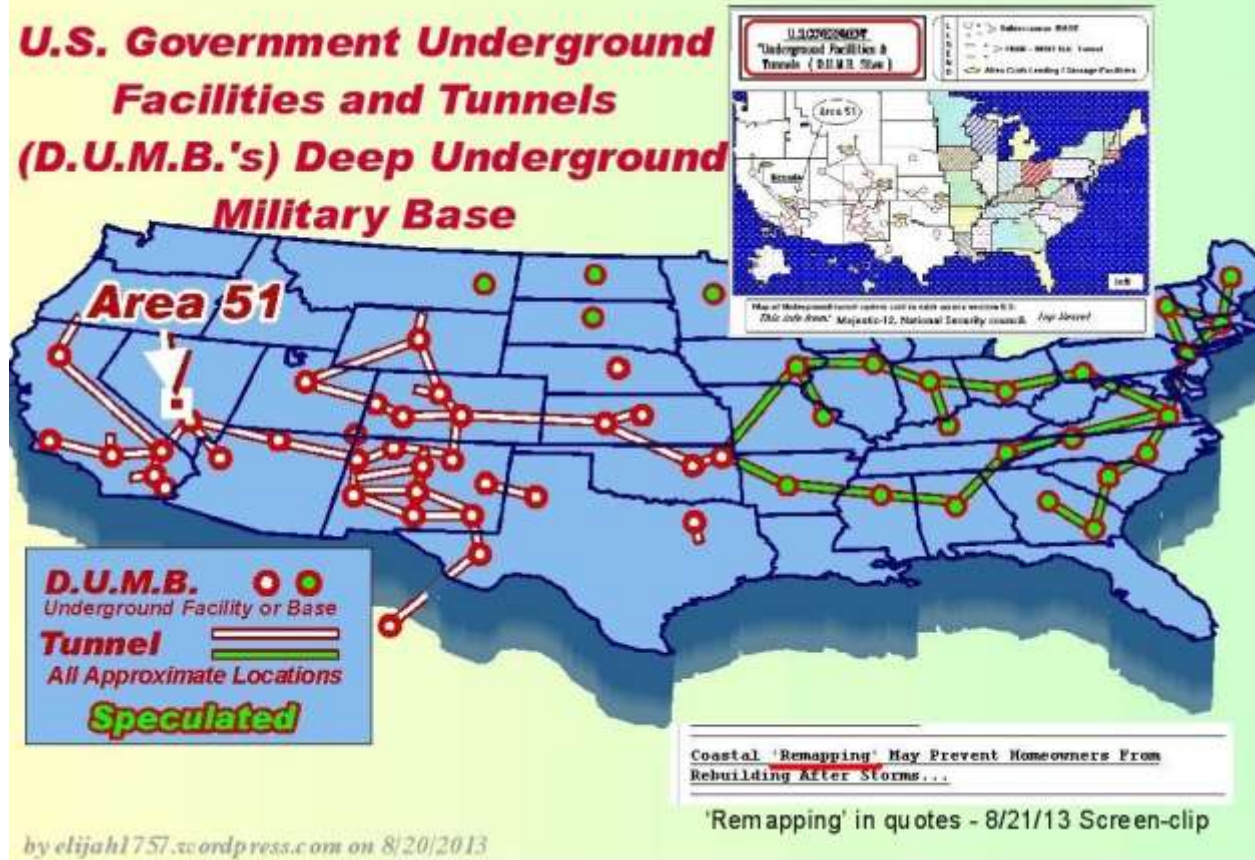

Some of the lessons are easy to grasp and others required some scientific training. It is important for everyone to get some understanding of what Douglas Vogt is saying since it will affect everyone alive at the time of the next Solar Nova event, which is predicted to occur between September and November of 2046. The premise is that the yearly solar Sunspot activity is part of a solar clock cycle tracking a history of Solar Nova's that occurring every 12,068 years. The Solar Nova's have been a factor in such things as Pole Shifts or Pole Reversals in which the Earth's magnetic fields are reversed.

People unfamiliar with Solar Nova's will refute the occurrences for various reasons. One of the ways in which we know they have occurred and caused crustal change in the surface of the earth can easily be explained by the age of trees. The oldest trees in the world are only 5,085 years old, and yet we have found petrified wood dating millions of years in age. The oldest trees in the U.S. are the California Sequoia Redwoods. Also, around the world biologists have been found anomalies that are difficult to explain. One of these is Mastodons, related to Elephant species found buried in the Tundra ice of northern Russia. Fully intact Elephant-like animals, including baby Mastodons with undigested grasses and plants in their mouths and stomach. This is evidence of animals that were "flash" frozen before decay could begin. They were "flash" frozen in minutes.

It has been my contention that NASA discovered this evidence in the 1960s and came to face the fact that a Super Nova was expected sometime around the present range around 2030-2050. The information has been kept secret from the public so as not to cause alarm and provide the elite cover and time to build DUMB or Deep Underground Military Bases as locations to ride out the next Solar Nova. As Douglas Vogt has said, they have built these DUMB bases and tunnel system in the wrong place. When the next Ice Age occurs with a Pole Shift, the surface will be covered with thousands of feet of ice and snow pack. In his video series he addresses all the issues for which the government is faced with. Above all they do not want us to know about the secret Underground Space Program! Many individuals who worked on the construction of these bases and tunnels that became whistle-blowers ended up disappearing or being murdered for violating their "non-disclosure" agreements of employment.

## U.S. Government Underground Facilities and Tunnels (D.U.M.B.'s) Deep Underground Military Base

Douglas Vogt points out that when a Solar Nova occurs, we have no way of predicting which position of the Earth will be facing the Sun when impact occurs and the magnetic poles reverse. The effects of a Solar Nova will vary around the planet for most of the Earth's surface, but ALL of the Earth will be impacted to one degree or another. Douglas Vogt has a printed statement of descriptive of events and things that will occur during and following a Solar Nova. It can be found on the Diehold Foundation page, and if you do not watch any of Douglas Vogt's video lessons, everyone should read the page on what would be considered an "Extinction Level Event".

Many of us are unlikely to be around in 2046 and the issue becomes a non-starter; however, but this information comes as a warning to younger folks. The world elite is considered to be around 8,000 people spread out over 194 sovereign nations. Many of the elite have been promised a place on the Antichrist's Ark by simply pledging their allegiance, secrecy and loyalty to the Antichrist's plan of environmental salvation and his "Sustainable Development" plan known as Zero-Carbon CO<sub>2</sub>. The elite of the world have access to the best scientific technology available to mankind, the kind the everyday person rarely or never learns about. From the stand point of logic it makes simple sense for the elite to exploit and use this knowledge to secure their place on the Antichrist Ark to survive the next Solar Nova "Pole Shift". The problem is this group making up the elite of approximately 8,000 also recognize that they are out-numbered in the world by 8,000,000,000,000 who will be scrambling to find a way onto the

**Antichrist's Ark!** One of the biggest indicators of that fear has been in the government's purchases of weapons, ammunition, and related survival materials that has occurred over the past decade or two.

The Department of Veterans Affairs bought more than \$11 million worth of weapons, ammo and other security equipment between 2005 and 2014, according to a report release by a nonprofit organization that tracks spending across the federal government.

The report, called *The Militarization of America* and published by OpenTheBooks, said the VA acquired a variety of pistols — Berettas, Sig Sauers, Lugers — and ammunition, as well as body armor, police batons, ballistic shields, riot shields and helmets, night gun sights, tactical equipment for crowd control and more.

The \$11.6 million in weapons and gear includes \$200,000 for night vision equipment, \$2.3 million on body armor, more than \$2 million on pistols and about \$3.6 million on ammunition, the report said. A chart included with the report also shows a variety of training weapons and a night gun scope.

The department has 3,700 law enforcement officers guarding and securing VA medical centers.

The VA didn't respond to Military.com's request for comment, though in a Feb. 17 email to OpenTheBooks, the agency described its police officers as *"the front line response forces for our facilities"* and said its personnel "receive extensive training in active threat response.

*"While VA police work very closely with Federal, local and state law enforcement partners, VA police will be the first to have to deal with any active situation and are well trained accordingly,"* it stated.

The department is not the only federal agency that has been stockpiling weapons in recent years, presumably against mass shooters and other security threats. The report found that non-military federal agencies spent nearly \$1.5 billion on weapons and ammo from 2005 to 2014.

The report states that the IRS spent \$10.7 million on guns, ammo and gear over the same period. The Animal and Plant Health Inspection Service spent \$4.7 million, the Social Security Administration \$417,000, and the Department of Education \$412,000. The Smithsonian Institution's arms purchases totaled just over \$309,000.

The arming of VA security personnel began in 1996 with a pilot program intended to extend firearms and arrest authority to the department's 2,393 officers, the report said. Two years later, only 262 department police officers had the authority to carry a weapon and make arrests.

*“However, by 2008, the VA officer corps grew to 3,175 and all were authorized to make arrests and carry firearms,”* OpenTheBooks' report found. Currently, it said, the VA has more than 3,700 personnel who may carry firearms and make arrests.

In a swipe at VA over its widely publicized problems with getting veterans in for appointments, the organization said it was *“notable buildup occurred while the VA failed to provide critical care for thousands of veterans who would later on waiting lists.”*

In its email to the group, the department said the gun purchases relate to a decision in 2008 to have VA police switch to a different firearm. It did not say what VA officers used before then.

*“This change has taken place over time in a phased approach. VA facilities began replacing the older pistol as funds became available and pistol service life limits are reached,”* the VA said. *“Most of VA facilities have completed the transition to the new contracted firearm, with several still in that process.”*

Night vision and other countermeasure equipment were acquired by field facilities to meet their local security and law enforcement needs, according to the department. The VA statement did not detail which facilities required the special gear.

From 2010 through 2017, the IRS has spent an average of \$675,000 on ammunition a year, the report shows. During that time, the IRS spent the most in 2011, with \$1,100,000 in spending.

A new report by a government watchdog group has tracked the weaponry expenditures of the federal government and found \$1.48 billion in “military-style equipment” purchases for 67 of its non-military agencies.

That means the Food and Drug Administration, the Social Security Administration, the National Oceanic and Atmospheric Administration, the United States Mint, the Department of Education, the Small Business Administration, et al. are now fully stocked with guns, ammo, and other military equipment, according to the Open the Books report *“The Militarization of America.”*

The key findings were for fiscal years 2006-2014. During that time, as the report notes, “non-military federal spending on guns and ammunition jumped 104 percent from \$55 million (FY2006) to \$112 million (FY2011).”

The IRS alone purchased \$11 million worth of weapons and ammunition, which as Weasel Zippers notes, is an “awful lot of weapons for an agency that has limited need.”

Another agency with limited need is the Environmental Protection Agency, which spent over \$3 million on guns and ammo. Then there are the other federal agencies spending millions on paintball equipment, Tasers, projectiles, unmanned aircraft, and grenades and launchers. This doesn't sound at all like necessary equipment outside of war.

And isn't it interesting that the Obama administration felt the need to stock up on all of this military weaponry while telling the rest of us we have no business purchasing rifles like the AR-15?

Similarly to Open the Books, whose motivation is letting taxpayers know exactly how their money is being spent, Citizens for Self-Governance understands the concern for the future of the country, especially in light of an out-of-control government spending our money on the very things they say we can't have. The federal government is limiting us, when the Constitution says we are the ones that should be limiting them.

President Joseph Biden expressed his interest in gun control by directing the Department of Justice to take several steps to prevent more mass shootings, while his own federal agencies continue to stockpile guns and ammunition.

Critics contend he is far too interested in limiting gun access to regular Americans while federal administrative and regulatory agencies continued stockpiling hundreds of thousands of guns.

Our auditors at OpenTheBooks.com published details about non-military use of weapons in our report earlier this year "Militarization of the U.S. Executive Agencies," looking at the last two years of President Barack Obama's administration and the first three years of President Donald Trump's administration.

We showed that almost \$1 billion was spent on guns, ammunition, and military-style equipment in the 103 federal agencies outside of the Department of Defense between 2015 and 2019, the latest year available.

Of that spending, \$110.6 million was divvied up among 76 non-law enforcement, administrative agencies and spent on guns, ammunition and military-style equipment between fiscal years 2015 and 2019.

For example, the Internal Revenue Service, Environmental Protection Agency, Social Security Administration, and many others were found to have spent taxpayer money on weapons. This information is readily available and posted on government contract bid solicitation from manufactures and suppliers.

Furthermore, there are more than 200,000 non-DoD federal employees with firearms, greater than the 186,000 U.S. Marines, we found.

Biden opened the door to private-use gun control. It seems hypocritical when compared to the federal non-military, non-law enforcement agencies – that are amassing large quantities of weaponry and ammunition.

The *'Epoch Times'* reported that Insurance company Lloyd's of London has announced its exit from a net-zero alliance for insurers—the sixth such organization to have pulled out from the initiative within a week. This is a profound pushback!

The Net-Zero Insurance Alliance (NZIA), convened by the United Nations, seeks to commit group members, composed of the world's leading insurers and reinsurers, to fighting climate change. As part of this, members have to transition their insurance and reinsurance underwriting portfolios to net-zero greenhouse gas (GHG) emissions by 2050. On Friday, Lloyd's of London quit the NZIA. This took the total number of members who have quit NZIA this week alone to six, which represents a fifth of the organization's total of 30 members. Since March, a total of 10 members have quit NZIA.

The exodus of major insurance companies has raised questions about NZIA's viability. None of the six firms that quit this week have made it clear why they left the initiative.

The insurance firms are said to have decided to pull out due to concerns about getting embroiled in disputes about net-zero initiatives in the United States. On May 15, [attorneys generals from 23 American states](#) sent a letter to 28 insurance companies asking for information about potential violations of antitrust laws.

*None of the six firms that quit this week have made it clear why they left the initiative.*

This WEF "Great Reset" is largely the Nazi Fourth Reich and the global government of the Antichrist Beast System. The late Jim Marrs, journalist and author authored the book, *'The Rise of the Fourth Reich'*. Prince Charles' front man for the "Great Reset" is a Nazi from the Hitler era. Klaus Schwab is the son of a Nazi general and owner of a company located near the Swiss border at Ravensburg, Germany which produced large turbine equipment for the Nazi war efforts. Their point men in the U.S. are Blackrock's CEO Larry Fink and Bloomberg News CEO Michael Bloomberg.

We know that the Nazi Third Reich went underground and was brought to the U.S.A. under the cover of running the American space program that became NASA under the leadership of Verner Von Braun. These Nazis came to the U.S. in what was known as "Operation Paperclip" from 1945-1959.

The plan to ride out the next Solar Nova comes into sharper focus when you understand that the elite of the world intend to plan their survival around the advantage of knowledge, technology, science, masked in secrecy, that has enabled them to assure they have at their disposal, millions of seeds to replenish what will be destroyed by the crustal shift of plates and continental shift that will destroy life on Earth as we know it, through a Solar Nova, and a washtub effect from ocean waves that will set off tsunamis that will be miles high and hit each coast of the U.S. when the Earth stops rotation for a brief time before it begins to rotate in the opposition direction.

Officially the Svalbard Global Seed Vault on the Norwegian island of Spitsbergen, part of the Svalbard island group is considered an ideal location to begin life again following what is believed to result in the magnetic poles to flip and rotate to the equator of the planet. The Arctic and Antarctic regions are expected to have a climate that is tropical as is the Earth's equator region currently. I was once told by a geologist in college that

the next “Ice Age” is expected to turn the Earth’s spatial location by 90-degrees. The North Pole and South Pole will become the future Equator.

If Doug Vogt’s Diehold theory holds together, 2046 we will see the return where much of the Earth surface will be covered with hot water that will almost instantly form freezing rain and snow and ice will cover large portions of the Earth with thousands of feet of ice.

Prince Charles and world leaders were deceived into buying into the Climate Change scam, first through global cooling and when that was exposed, they changed it to global warming, which has largely worked because the Sun and the Earth are at their closest point in their spatial location. Climate change is due this cosmic phenomenon, and there is nothing Prince Charles or his minions can do about it other than to scare the world. The real issue is what is coming in 2046 and so they are seeking to hide that fact by blaming global warming on humans, industrial emissions, hence ordering countries like Ireland to destroy 200,000 head of cows; forcing people to abandon cars and trucks for electric vehicles (EV). Many have been deceived into thinking that the elimination of fossil fuels – natural gas, coal, oil, etc. will save the planet. This nonsense is a ruse perpetrated a cover story for depopulation. It’s a case of *“look here and not look there!”*

The advantage the elite have is they control the media, information, technology, politics, military, medical, religious, education and by so doing they can defeat 8-billion people with their Antichrist Beast System of some 8,000 who have pledged their allegiance to Prince Charles for a place in his Ark of Eco-salvation. Prince Charles “Zero-Carbon” is simply a scam to force global genocide by eliminating the elements needed to feed humanity, i.e., ban food stocks of livestock herds, fertilizers, and CO<sub>2</sub>. Humanity cannot survive when you try to eliminate CO<sub>2</sub>. Our atmosphere is 21% oxygen, 78% hydrogen, and .04% CO<sub>2</sub>. Prince Charles’ plan is suicide on steroids, plain and simple. Eliminate CO<sub>2</sub> and you die. It is the perfect “Extinction Level Event” LIE to achieve their goal in order to escape on the Antichrist Ark before 2046 arrives!

Blessings,

Pastor Bob, [EvanTeachr@aol.com](mailto:EvanTeachr@aol.com)
