

Evergreen is a CIA Owned Airline – Why Are They Spraying Us With Poison?

This has been going on since 1996

Evergreen Air is a CIA front company for chemtrail operations within the U.S., based out of Marana Air Park near Tucson Arizona and McMinnville Oregon, near Portland.

A major missing piece of a grand conspiracy has been targeted by a drunk pilot. In a small town 30 miles east of the Pacific Ocean in Oregon is the center of a major global operation.

At a bar in McMinnville, Oregon, an inebriated pilot attempted to impress one of the pretty ladies with tales of his secret mission.

The pilot's pathetic attempt to portray himself as a Sean Connery or Daniel Craig caused him to (ante up) his importance and spill the secrets of the CIA's asset Evergreen International Aviation.

The slurred revelations confirmed suspicions that Evergreen (International Aviation) is part of the major crap dump on the planet. Chemtrails made up aluminum, barium and other ingredients contribute to respiratory ills and change the acidity of the soil.

Related: [U.S. Air Force Pilot Exposes Top Secret Chemtrail Program — It's Called 'Operation Indigo Skyfold'](#)

Evergreen works from over a 100 bases and employees 4,500 people. Delford Smith privately owns the company. They admittedly “perform” work for the CIA.

Evergreen was given a no contest bid that gave them all the facilities in Marana, Arizona that previously belonged to CIA's Air America (Pinal Air Park, Arizona).

The security at the Pinal site is said to be as severe as that of Area 51. It is run as a military base where one lost pilot got an armed escort immediately off the operational base. The 10 year pilot said it was nothing like anything he has ever seen.

Evergreen International Aviation brags of their planes that have 7 times the capacity of other fire fighters. One can carry 20,000 gallons.

Firefighting ... Right ... and [next we will be told the chemtrails are to prevent global warming](#) as millions more are advancing to an early death.

Evergreen International Aviation has exemptions from the law that are advertised on their web site. They can fly anywhere and not stay on a designated route.

Italian industrialist Aurelio Peccei, who founded the Club of Rome in 1968:

“In searching for a new enemy to unite us, we came up with the idea that pollution, the threat of global warming, water shortages, famine and the like would fit the bill. All these dangers are caused by human intervention, and it is only through changed attitudes and behavior that they can be overcome. The real enemy then, is humanity itself.” ([Source](#))

**Genocide Upon
The American Public
We Are the Target of
Chemtrails Since 1996
Sprayed All Over the U.S.A.
Take a Look Up In The Sky**

**WHAT PARTLY CLOUDY
LOOKS LIKE NOW**

Has CFR members paved the way?

People like Philip Lader and John Wheeler III ... they were in a position to do just that.

Evergreen's public relations (propaganda) spokesman is handled by WPP run by Council on Foreign Relations member Philip Lader. He worked under the former head of the CIA ... Leon Panetta once was White House deputy of staff under Bill Clinton.

Philip Lader is an "inside" authority on international affairs and business. He is the non-executive Chairman of WPP Group, Senior Adviser to Morgan Stanley International, and a board member for think-tank RAND Corporation.

He is also a trustee of UC Rusal (largest aluminum company in the world) the British Museum and St. Paul's Cathedral Foundation.

Ambassador Lader has addressed trans-Atlantic audiences from the U.N.'s General Assembly Hall to state chambers of commerce and local world affairs councils, is a member of Rockefeller's Council on Foreign Relations.

Philip Lader (CFR) is a key player driving toward world government. In addition to running the Public Relations for Evergreen International Aviation ... Lader is a director of UC Rusal, the largest Aluminum producer in the world located in Moscow, Sweden, Italy, and Australia. Nathaniel Rothschild is a big investor.

Eugenic operation of Chemtrails has had the assistance of Mitre a non-profit Corporation that manages the Federal Aviation Administration, Homeland Security, and IRS. (1) The IRS is part of the Federal Reserve which is a major transmission belt driving the conspiracy.

Philip Lader's fellow Council on Foreign Relations member John P Wheeler III was recently [dumped into a land fill in Wilmington, Delaware](#). Wheeler III was a consultant to Mitre the non-profit corporation with jurisdictional advice over the Federal Aviation Administration's flight patterns.

Was John P. Wheeler III too sentimental for the killing underway? And got murdered by the Company?

The CIA is the enforcement arm of the [Council on Foreign Relations](#).

Mitre is verily conveniently located in McLean, Virginia home of the CIA.

Thanks to the drunken pilot and his loose lips ... the Free People of the world can focus on the criminals who are poisoning our air and our water.

One of the mysterious ingredients from ChemTrail spraying, found by men such as Clifford Carnicom and others was Mycoplasma. Years ago when learning what was in the ChemTrail soup mix, I did not do any research on what Mycoplasma was or did.

Back in 2019 when I was researching the military bioweapons program, that word began to appear often in my research. And if any of you have read the five articles I have since written, my interest was in the role of 5G wireless energy plays in the activation of Mycoplasma.

Yesterday, April 30th, 2021, I watched an interview by Dr. Barry Trower of the UK and an interview team from Denmark. Dr. Barry Trower is retired and spent most of his working years with UK program of Radar and Microwave weaponry. He stated that microwave energy can activate such things as the Bubonic Plague, which went dormant centuries ago. The bubonic plague, caused by the bacterium *Yersinia pestis*, persisted for centuries in wild rodent colonies in Central Asia and, somewhere in the early 1300s, mutated into a form much more virulent to humans. Spread of the plague in western Eurasia, 1346-1353. At about the same time, it began to spread globally.

One of items that came up in my research last year regarding to Mycoplasma and Chemtrail spraying was what I have included directly below:

STOP SPRAYING CALIFORNIA!
California Chemtrail Information - Mycoplasma

Mycoplasma and Chemtrails

What is mycoplasma infection?

Mycoplasma infection is respiratory illness caused by *Mycoplasma pneumoniae*, a microscopic organism related to bacteria.

Who gets mycoplasma infection?

Anyone can get the disease, but it most often affects older children and young adults.

When do mycoplasma infections occur?

Mycoplasma infections occur sporadically throughout the year. Widespread community outbreaks may occur at intervals of four to eight years. Mycoplasma infection is most common in late summer and fall.

How is mycoplasma spread?

Mycoplasma is spread through contact with droplets from the nose and throat of infected people especially when they cough and sneeze. Transmission is thought to require prolonged close contact with an infected person. Spread in families, schools and institutions occurs slowly. The contagious period is probably fewer than 10 days and occasionally longer.

What are the symptoms of mycoplasma infection?

Typical symptoms include fever, cough, bronchitis, sore throat, headache and tiredness. A common result of mycoplasma infection is pneumonia (sometimes called "walking pneumonia" because it is usually mild and rarely requires hospitalization). Infections of

the middle ear (otitis media) also can result. Symptoms may persist for a few days to more than a month.

How soon after exposure do symptoms appear?

Symptoms generally begin 15 to 25 days after exposure. The symptoms generally develop slowly, over a period of two to four days.

How is mycoplasma infection diagnosed?

Mycoplasma infection is usually diagnosed on the basis of typical symptoms. A nonspecific blood test (cold agglutinins) is helpful in definitive diagnosis, but is not always positive. The use of more specific laboratory tests is often limited to special outbreak investigations.

Does past infection with mycoplasma make a person immune?

Immunity after mycoplasma infection does occur, but is not lifelong. Second infections are known to occur, although they may be milder. The duration of immunity is unknown.

What is the treatment for mycoplasma infection?

Antibiotics such as erythromycin, clarithromycin or azithromycin are effective treatment. However, because mycoplasma infection usually resolves on its own, antibiotic treatment of mild symptoms is not always necessary.

What can be done to prevent the spread of mycoplasma?

At this time, there are no vaccines for the prevention of mycoplasma infection and there are no reliably effective measures for control. As with any respiratory disease, all people should cover their face when coughing or sneezing.

http://www.health.state.ny.us/diseases/communicable/mycoplasma/fact_sheet.htm

Mycoplasma is a genus of bacteria that lack a cell wall. Without a cell wall, they are unaffected by many common antibiotics such as penicillin or other beta-lactam antibiotics that target cell wall synthesis. They can be parasitic or saprotrophic. Several species are pathogenic in humans, including *M. pneumoniae*, which is an important cause of atypical pneumonia and other respiratory disorders, and *M. genitalium*, which is believed to be involved in pelvic inflammatory diseases.

Molecular Terrorism By Mycoplasma - Genetically Engineered Stealth Microbes May Be The Source Of Your Health Problems

source: by Gary Tunsky / Crusador Newsletter / Portland IndyMedia
You wake up dead tired. You feel like you've been hit by a truck. Sleep becomes sporadic, if at all. When sound sleep occurs, the restoration of energy is minimal causing you to meticulously save your energy like a miser hoards gold. If you force yourself into activities beyond the scope of your normal daily chores, you pay a heavy price. A possible consequence is being bedridden for days. You have trouble concentrating. Short-term memory losses make you feel like you're trapped in a brain fog. You have unexplained muscle aches and joint pains like a never-ending flu. Your

spouse and family don't understand this new metamorphic change in you, going from active and bubbly to sick and decrepit in the prime of your life almost overnight. Your social life has disintegrated and once close friends are slowly drifting away because the monotonous explanation that you're too tired to see a movie or go out to dinner has waned thin. You're taking an abundance of sick time and your boss is starting to question your sanity. Nobody understands. Nobody believes. Nobody offers help. Well, almost...Read more

Mycoplasma Variants Linked To Numerous Diseases

The seven weaponized Mycoplasma variants that enter fluid and blood circulation that were created covertly by the U.S. government and are now wreaking havoc on the population are the following:

- 1.) M. Fermentans (incognitas strain). The term fermentans reveals fermentation process (i.e.: yeast, molds, fungus, spores, cancer).
- 2.) M. Penetrans penetrate the cell membrane and invade host cells.
- 3.) M. Pneumoniae attacks upper respiratory epithelial cells, inflaming them and causing upper respiratory infections and chronic pneumonia.
- 4.) M. Genitalium (Genitalia) invades urethral tissue and cells in the genital area causing pelvic inflammation and urethritis.
- 5.) M. Hominus is found in joint tissues in rheumatoid arthritis.
- 6.) M. Pirum is found in AIDS as a co-factor accelerating AIDS progression.
- 7.) M. Salivarium is found in salivary glands and joint tissues in rheumatoid arthritis.

High-level exposure of Mycoplasma to blood, semen, mother's milk or vaccines will lead to AIDS. Low-level exposure to bodily fluids where concentrations are less will contribute to chronic fatigue syndrome, fibromyalgia, multiple sclerosis and other autoimmune diseases. Specific diseases can be targeted by controlling the Mycoplasma concentrations to bodily fluids.

Mycoplasma Thrives On Cholesterol

What makes these designer diseases so elusive is that they're genetically engineered only for DNA replication, transcription and translation with no organelle or cell wall. They have lost their genes for amino acid and fatty acid synthesis, forcing them to invade and steal proteins, sugars and sterols (cholesterol) from healthy neighboring cells to survive.

These cholesterol dependent molecular terrorists immediately take up residency in the individual's genetically pre-disposed weaknesses, (the weak link in the chain of organs or systems), or the path of least resistance. Since Mycoplasma has absolute dependence upon the uptake of preformed sterols (cholesterol structures), they have an affinity toward cell membranes, nerve cells, sex hormone cell factories, glands and the gray matter in brain tissue, where cholesterol sterols are found. Since cholesterol is a co-factor in glandular hormone production, the endocrine balance is drastically altered with cholesterol being pulled out of the cell cycle. That is why pathogenic changes are

seen most often during pregnancy, hormone replacement therapy, steroid therapy, menstrual cycles and xenoestrogens from pesticides, herbicides, meat and dairy.

With the disruption of the hormones, comes an open invitation for the RNA directed HIV to replicate. The newly formed HIV RNA makes its way to the host cell surface where it connects and breaks away carrying with it a GP 120 protein envelope that was hijacked from the previous cell's surface. It repeats by countering another cell, adheres to the cell surface and accesses the interior genetic material of its new host where the cascade process is repeated.

Unless Mycoplasma penetrates into tissues and cells they cannot exert their terrorist effects. They will lay dormant, sometimes for a decade, until physical or emotional trauma, severe stress or vaccine contaminants wake up the sleeping giant to invade and feed on the cell's genetic material like an intracellular parasite, taking the cell hostage until it ruptures and dies.

Mycoplasma Triggering Mechanisms

Mycoplasma is activated and stimulated by initiators (ignition) and potentiators (promoters). The potentiators are the toxic substances in our food, beverages, environment, pharmaceuticals, heavy metals (Mycoplasma amalgams) and chemicals that we bath in, etc. that store in fat cells and weaken our cellular terrain and immune system to allow the initiators (i.e. stress, viruses, bacteria, fungus, parasites, emotional and physical trauma, fear, increased estrogen, anger, etc.) to ignite or light up the gasoline that's poured on the barn -Mycoplasma.

If the gray matter of the brain tissue is the target of Mycoplasma invasion, you'll portray symptoms of dementia, Alzheimer's, Parkinson's, Creutzfeldt-Jakob disease or memory and cognitive thinking disturbances depending on the area of the brain terrorized.

If the spinal cord is the victim, you will exhibit symptoms of neurodegenerative diseases like myasthenia gravis, Guillain-Barré and ALS (Lou Gehrig's disease). If your weakness happens to be the synovial fluid cells in your joints, rheumatoid arthritis with severe joint pain will be your disease. In fact, many of the 21st century diseases that were thought to be autoimmune turned out to be Mycoplasma invasions. I do not believe that God made our immune systems that stupid to attack our own tissues.

If Mycoplasma invades the beta cells in the pancreas that manufactures insulin, you can't regulate blood sugar and Diabetes Mellitus will be your demise. If your cardiac tissues are your weak link, cardiomyopathy will manifest. If *M. Pneumoniae* or *M. Fermentans* attacks the bronchial lining of the bronchial tubes, the inflammation will trigger asthma and upper respiratory infections. If the myelin sheaths of the nerves are targeted, you will exhibit neurological symptoms of multiple sclerosis. If the intestinal lining is penetrated, the damage to the mucosal lining will perpetrate Crohn's disease or leaky gut. In the case of Lou Gehrig's disease, 80% of the patients have detected at least two Mycoplasma strains -*M. Penetrans* and *M. Fermentans*.

In ALS, the oligodendritic nerve cells which require cholesterol to synthesize neurosteroids are eaten. If Mycoplasma population is large enough, they gobble up so much cholesterol they diminish neurosteroid synthesis which leads to severe central nervous system malfunctions. Even Lymes disease, which is the fastest growing infectious disease in the U.S. and possibly Europe, with the exception of AIDS, was found to be linked to both Borrellia and Mycoplasma infections as a co-infection. The Mycoplasma species of M. Pneumoniae and Chlamydia invading the pericardium lining of the heart, seem to be common dominators of myocarditis and pericarditis infections.

Mycoplasma steroid stealing properties also make the energy producing mitochondria leaky by robbing cholesterol lipids that are necessary in mitochondrial membrane integrity. When mitochondria bleed, they cannot generate ATP energy necessary for cell energy and function and nerve cells are the most sensitive to energy deprivation. This explains why chronic fatigue and neurological disorders are the main symptoms of the trinity diseases chronic fatigue syndrome (CFS), fibromyalgia (FMS) and Gulf War illness (GWI). In my opinion, they are the same disease ideology with all three characterizing common symptom traits of chronic fatigue, short term memory loss, low grade fevers, tissue and lymph swelling, joint and muscle pain, stomach and digestive disorders, immuno-suppression and severe systemic chronic infections that invade various organs, tissues and cells including the brain, nervous system and heart.

Mycoplasma Infection Leads To A Medical Merry-Go-Round

Since the disease pattern of CFS, FMS and GWI affect all major body systems (cardio vascular invasion involving the left ventricle, neurological damage ranging from mild cognitive problems to bi-polar depression or schizophrenia, genitourinary damage presenting incontinence or urethritis, pulmonary symptoms of asthma and the development of fibro masses or nodules in the lungs etc.), this multi-faceted symptomatology is causing a medical merry-go-round in the medical profession starting with a general practitioner who will usually prescribe an anti-inflammatory and a short-term antibiotic regimen for the chronic infection.

Since you also exhibit symptoms of neurological disorders and your general practitioner is not versed in neurology, you will be referred to a neurologist.

After the examination with a neurologist and a couple scripts later for your anxiety and insomnia, you will be pawned off on an endocrinologist for your hormonal imbalance because the neurologist has limited knowledge in endocrinology.

Due to the combined adverse side effects of the antibiotics, anti-inflammatories, analgesics and tranquilizers, you may exhibit signs of gastric disturbances and skin reactions where you will be further drugged by a dermatologist or a gastrologist.

Next in line on the "gist" medical treadmill is the cardiologist who will push a beta-blocker or a diuretic on you for your cardiomyopathies. After seeing ten different disease

specialists and spending thousands of dollars on MRI's, CT Scans, X-Rays, surgery, pharmaceuticals, etc., without finding a solution to your dilemma, you will be labeled psychosomatic, hypochondriac or suffering from severe depression where you will end up with a psychologist. You're now a walking drug store with more complications than what you started with thanks to the combined adverse reactions of the drugs and the limitations of medical doctors who specialize in only 1/10th of the body. What a racket!!!

The government perpetrates non-detectable, virulent, stealth pathogens on the population by way of mosquito vectors (West Nile), primary aerosol, chemtrails, vaccines and possibly the food chain, and then you're put through a medical merry-go-round of disease specialists that know little or nothing about Mycoplasma ideology and do not have access to the necessary diagnostics for detection. The pharmaceutical companies and the warlocks in Washington and Wall Street are laughing all the way to the bank as they profit hundreds of billions of dollars on humanity's suffering while fulfilling their agenda of population control.

Protocols To Treat Mycoplasma

Since Mycoplasma cannot be successfully treated with the usual short course duration of antibiotics due to their intracellular location, slow proliferation rate and inherent resistance to most antibiotics, the few Mycoplasma experts that specialize in this field are recommending six-months to one year of non-stop treatments using strong antibiotics such as Cipro and Doxycycline. However, if a patient does not want to destroy their body and immune system with Cipro and Doxycycline, a total overhaul of every cell from head to toe using a multi-faceted, non-toxic, holistic treatment approach is absolutely necessary to overcome Mycoplasma infections naturally. This is why vitamins and nutritional supplementation are so important in the therapy. Chronic illness patients must also be weaned off antidepressants and other potential immune suppressing drugs before they can fully recover from their illnesses.

<http://www.satori-5.co.uk/>

<http://portland.indymedia.org/en/2005/01/309675.shtml>

Short Term Effects of Chemtrails:

- Allergies
- Anxiety
- Asthma
- Brain Fog
- Breathing difficulties (Unexplained)
- Chronic sore or raspy throat
- Dizziness
- Eye and skin irritations
- Flatulence (gas)
- Flu-like symptoms
- Headaches

- itching (Unexplained)
- Nausea and Vomiting
- Nose bleeds (Unexplained)
- Panic attacks
- Persistent coughing
- Respiratory problems
- Stomach aches
- Suicidal thoughts
- Tinnitus (distant ringing in ears or high pitched sound after spraying)
- And many other symptoms

Long Term Effect of Chemtrail Exposure

Long Term Effects of Chemtrails:

- Acid Reflux
- (ADHD) Attention Deficit Hyperactivity Disorder
- Allergies
- Alzheimer's Disease
- Aluminum build up in Pineal Gland
- Asthma
- Autism (evidence links autism to Mycoplasma)
- Autoimmune Diseases
- Blood in the Urine
- Borderline personality disorder
- Cancer (linked to many types of cancers)
- Chronic Fatigue
- Constipation
- Depression
- Easy Bruising
- Eye problems - * Nearsightedness & Farsightedness (by altering interocular fluid eye pressure)
- Fibromyalgia
- Floaters In the Eyes
- Gastritis
- Heart Arrhythmia (irregular heartbeat)
- Heart Disease
- High Cholesterol
- Hypoglycemia
- Hyperglycemia

- Irritable Bowel Syndrome (IBS)
 - Insomnia
 - Learning Disabilities
 - Lung diseases
 - Lupus Erythematosus
 - Multiple Sclerosis
 - Oily Skin (Elevated DHT)
 - Parkinson's Disease
 - Rheumatoid Arthritis
 - Schizophrenia
 - Short-Term Memory Loss
 - Sleep Disorders
 - Spider Veins
 - Tinnitus (ringing in the ears – 700 million cases of Tinnitus reported worldwide)
 - White Coating On the Tongue
 - And many other symptoms
-

Call for Immediate Investigation of Chemtrails on the City/County/State Levels

The people of California need to:

- Demand public investigation of chemtrails spraying in California
- Demand an immediate cease to all chemtrail spraying until we know the short and long term effects of chemtrails on the general population.
- Introduce legislation to create “No-Chemtrail Spraying Zones” in California.
- Give immunity and protection to anyone willing to blow the whistle on chemtrail operations.
- Boycott products made by any companies who make or produce chemtrail related products.
- Identify who is responsible for allowing us to be sprayed on the city/county/state/global level.
- Demand that each city/county/state be given a 72 hour warning before spraying

- so people can choose to protect themselves.
- Demand an explanation for chemtrail spraying on the city/county/state/congress/senate levels and do not accept the denial that spraying is going on.
 - Prosecute anyone who continues to aid these illegal chemtrail operations and hold those companies responsible that produce toxic chemicals, toxic metals, biological toxins, and any other submicron particles that cause chemtrail related diseases that affect the general population.

Investigations and inquiries on the state level and above are being ignored and chemtrail spraying is being denied at the highest levels of our government. The only way to halt chemtrail toxic spraying on us is for the general population to wake up and demand that it stop.

When a free people no longer have a say in the air that they breathe, they are no longer free. Think about it, someone or some group of persons, non-elected, now have the power over the air we that we breathe in on a daily basis. They are now deciding what to put in the air and therefore are affecting our overall health and wellness. This means that we are potentially “one spray” away from a potential disaster that could kill/contaminate everyone in the U. S. and all NATO countries. What will happen if an enemy country gains control over these toxic sprays? If you see a chemtrail above your head you are now at risk.

California Chemtrail Resistance

Every morning between eight and nine, my wife wraps my lower legs with Ace bandages to keep pressure on circulation and the excretion of Lymphorrhoea. My Lymphedema came as we had Verizon install Wi-Fi in June, 2010. A week after it was installed, blisters broke out on my legs, a week or so went by and my wife worked in the ER of UPMC at the McKeesport Hospital. None of the doctors examining me could find the cause of the problem. Six days later I was discharged from the hospital and still had no answers. Two years later in September of 2012, we relocated to central Kentucky to help parents raise five grandchildren. In the winter of 2013, shortly after snow had removed the leaves of the many nearby trees, I had a second outbreak of the blisters, only then to see a cell-tower on a hill overlooking the valley and U.S. 150, less than half mile by line of sight. In the fall of 2014, we relocated to Bardstown, KY. We rented the church parsonage where I had been the resident pastor for four years from 1992-1996. Within two weeks, my issue of Lymphorrhoea was back. This time it was worse. I did an Internet search of cell tower locations in my county, The closest cell-tower to me is 2,300 ft. to the north.

Where this all comes into focus is the issue of Chemtrails and wireless energy comes together is found in the fact they both began simultaneously in late summer of 1996. The introduction of cell phones in the retail market began with the Radio Shack chain selling cell-phones. and the spraying of ChemTrails. Scott, our son worked after school for the local Radio Shack in his senior year, bought himself a cell phone, and as part of his job at Radio Shack, he would also assist the installation of the large

satellite 8-ft dish antennas to local farmers and residents for television service.

We know that ChemTrail spraying at different altitudes, U.S. Air Force reserve C-130s spray at altitudes in the 10,000-15,000 ft. range. Larger jet military and commercial aircraft spray higher altitudes of 30,000-40,000 ft. range. On mornings when the sky is cloudless around 8-9 am, I can see the spraying through the bedroom window slats in the Venetian Blinds. Yesterday, while waiting for wife to wrap my legs I could see the chemtrail spraying. It goes on day and night, rain or shine.

And recently, Bill Gates has got into the act proposing to spray the atmosphere. Bill Gates wants to spray millions of tons of CHALK into the stratosphere to reflect sunlight and slow global warming - but critics fear it could be disastrous. The first test of a project backed to spray millions of tons of chalk into the stratosphere, in an attempt to 'dim the sun' and cool the Earth, could happen in June. That CHALK does not stay in the atmosphere. Nanoparticles will ultimately descend to the air we all breathe. It was just discovered that the light blue face masks made in China contain particles of fibers that cause lung problems and respiratory issues. So much the face diapers. Health Canada has issued a warning about blue and gray disposable face masks, which contain an asbestos-like substance associated with "*early pulmonary toxicity.*"

The SNN200642 masks, which are made in China and sold and distributed by a Quebec-based company called Métallifer, had been part of Canada's public school reopening plan. Students were told that they needed to wear them in the classroom to prevent the spread of the Wuhan coronavirus (Covid-19).

Health Canada, however, discovered during a preliminary risk assessment that the masks contain microscopic graphene particles that, when inhaled, could cause severe lung damage.

"Graphene is a strong, very thin material that is used in fabrication, but it can be harmful to lungs when inhaled and can cause long-term health problems," reported CBC News.

For a while now, some daycare educators had expressed suspicion about the masks, which were causing children to feel as though they were swallowing cat hair while wearing them. We now know that instead of cat hair, children were inhaling the equivalent of asbestos all day long.

"If you have this type of mask in stock, we ask that you stop distributing them and keep them in a safe place now," the provincial government wrote in a directive, which was sent to the education, families, and higher education ministries of Canada.

Face masks are neither safe nor effective. As it turns out, the SNN200642 masks that were being used all across Canada in school classrooms had never been tested for safety or effectiveness. Patrick Baillargeon, who heads up purchasing for Quebec's laboratory supplies, says that because of this, the masks never should have been

used.

The risks associated with inhaling graphene particles is unacceptable, he added, and Canadians – and everyone else, for that matter – should immediately stop using the masks.

“We therefore ask all our customers to check if they have any in their possession,” Baillargeon wrote in a notice, further revealing that at the time of their acquisition and distribution, the blue and gray disposable face masks were not in compliance with government regulations.

Schools and other facilities adopted them due to fears surrounding the Chinese virus, but this rushed, reactionary response is now causing other problems in the form of lung damage.

“We are now verifying whether any of these particular masks remain in our schools and centres,” reads a letter sent by the Lester B. Pearson school board to the parents of all exposed children.

“Any unused masks will be returned to our storage depot while we await further directives from the government.”

Back in December, 2020, the Quebec government had distributed these toxic masks to more than 15,000 daycare centers throughout the province. None of the masks met safety standards and were later ordered to no longer be used.

Another similar style of disposable mask, known as MC9501, was likewise pulled from distribution throughout Canada after it was determined to be unsafe. As many as 31.1 million toxic masks from this line were distributed before the government realized that they are unfit for use.

“Shouldn’t all this stuff be tested BEFORE it even leaves the factory?” asked one CBC News commenter, expressing outrage over the government’s act now, think later approach to Wuhan flu mitigation.

Others called for heads to roll over the fiasco, as well as an immediate end to all face mask use as the coverings are both useless and harmful no matter what materials were used in their production.

“To force a child to wear a toxic face mask is child abuse,” one wrote. “I hope lawsuits will follow.”

In 26 years as a researcher, one of the things identified with the dark elements of these people is that they always broadcast their plans in advance. It is done through “Predictive Programming”. A great example of this strategy was the events of 9/11 at the World Trade Center in New York City. They embedded the 9/11 theme in

cartoons like the “Simpsons”, the “X-Files”, and many others TV programs. You can do your own search, but key in on the term “9/11 predictive programming”. You can branch out in your search for Predictive Programming in other issues of the day. The “Illuminati” is a code word for Jesuit/Freemasonry. Search “Predictive Programming on the Corona virus”. Many of these like the attacks on 9/11 were predicted 20 years in advance of the actual attack. The Illuminati have a code of ethics, weird as it might seem, but they are obligated to tell you in advance what they plan to do to humanity! They plant their symbols in plain sight such as clocks, images, license plates, neon signs, etc., where its appearance is so subtle to even be overlooked.

What I do want you to learn and recognize as a serious threat to life, is that Mycoplasma can be activated through wireless energy. As 5G technologies are found to be as common as the telephone utility pole in front of your home, one day there will be a space net that will be beaming microwaves down upon the Earth. The planet will be bathed in an invisible radiation from an estimated 100,000 satellites. If you sign up for the Super-Fast Internet being offered by AT&T, Verizon, T-Mobile, Dish-Network, you will be inviting the 5G radiation into your home. The same will occur when one commits to the “Smart” devices such as the newer cell phones, utility meters, which will be able to reach out and touch you like the nearest cell tower beams its damage to my legs in the form of Lymphedema and Lymphorrhoea.

I describe it this way: “Technology has surpassed humanity’s ability to adapt!”

Blessings,

Pastor Bob, EvanTeachr@aol.com
www.pastorbobreid.com
