

The Extinction of Species, Bill Gates & the US Military [A Jon Rappoport Report]

There is a technology called gene drives.

It asks the question: what species should we make extinct today?

Why are Bill Gates and the U.S. military involved in forwarding that technology?

A gene-drive scientist might say, *"I have a plan. By manipulating genes, we can make invasive rodents extinct, on an island where humans are living."*

In the next fraction of a second, a flurry of questions pops up.

The overarching question is: Does this mean genetic manipulation can make ANY species extinct?

Here is a passage from [Gene Drive Files](#), a site with a referenced information on the subject:

"Gene drives are a gene-editing application that allows genetic engineers to drive a single artificial trait through an entire population by ensuring that all of an organism's offspring carry that trait. For example, recent experiments are fitting mice with

‘daughterless’ gene drives that will cascade through mouse populations so that only male pups are born, ensuring that the population becomes extinct after a few generations.”

“Proponents have framed gene drives as a breakthrough tool for eradicating pests or invasive species. However, the Gene Drive Files reveal that these ‘conservation’ efforts are primarily supported by military funds.”

Gene drive technology could be deployed to wipe out troublesome plant-parasites, weeds, crops, animal pests, animals, and...what about humans? Mull that over with your morning coffee.

Several years ago, UN member nations were considering a recommendation to call a moratorium on the use of gene drives. However, Bill Gates showed up to try to squash the moratorium.

The Gene Drive Files reports: *“Documents received under Freedom of Information requests reveal that the Bill and Melinda Gates Foundation paid a private agriculture and biotechnology PR firm \$1.6 million for activities on Gene Drives. This included running a covert ‘advocacy coalition’ which appears to have intended to skew the only UN expert process addressing gene drives...”*

“Following global calls in December 2016 from Southern countries and over 170 organizations for a UN moratorium on gene drives, emails to gene drive advocates received under a Freedom of Information request by Prickly Research reveal that a private public affairs firm ‘Emerging Ag’ received funds from the Bill and Melinda Gates Foundation to co-ordinate the ‘fight back against gene drive moratorium proponents’.”

There’s more from the Gene Drive Files. It involves the military:

“A trove of emails (The Gene Drive Files) from leading U.S. gene drive researchers reveals that the U.S. Military is taking the lead in driving forward gene drive development.”

“Emails obtained through a freedom of Information request by U.S.–based Prickly Research reveal that the U.S. Defense Advanced Research Projects Agency (DARPA) has given approximately \$100 million for gene drive research, \$35 million more than previously reported, making them likely the largest single funder of gene drive research on the planet. The emails also reveal that DARPA either funds or co-ordinates with almost all major players working on gene drive development as well as the key holders of patents on CRISPR gene editing technology.”

“These funds go beyond the U.S.; DARPA is now also directly funding gene drive researchers in Australia (including monies given to an Australian government agency, CSIRO) and researchers in the UK. The files also reveal an extremely high level of interest and activity by other sections of the U.S. military and Intelligence community.”

For the moment, put aside the notion of intentional extinction of species. Consider unintended consequences.

As I've shown in past articles, the latest and greatest gene-editing tools (e.g., CRISPR), which are used for gene drives, are far from slam-dunk precise, despite official assurances.

For example, this study: *Genome Biology*, July 14, 2017, titled, "*CRISPR/Cas9-mediated genome editing induces exon skipping by alternative splicing or exon deletion.*" An exon is "a segment of a DNA or RNA molecule containing information coding for a protein or peptide sequence." So you can see that exon skipping or deletion is a very bad outcome.

ANY gene editing done on ANY species opens the door wide to all sorts of errors and unforeseen consequences.

As for intentional destruction, we have this: *MIT Technology Review*, 2/8/16: "We have the technology to destroy all Zika mosquitoes."

"A controversial genetic technology able to wipe out the mosquito carrying the Zika virus will be available within months, scientists say."

"The technology, called a 'gene drive,' was demonstrated only last year in yeast cells, fruit flies, and a species of mosquito that transmits malaria. It uses the gene-snipping technology CRISPR to force a genetic change to spread through a population as it reproduces."

*"Three U.S. labs that handle mosquitoes, two in California and one in Virginia, say they are already working toward a gene drive for *Aedes aegypti*, the type of mosquito blamed for spreading Zika. If deployed, the technology could theoretically drive the species to extinction."*

"...a gene drive [gene editing] can...make mosquito populations disappear. The simplest way to do that is to spread a genetic payload that leads to only male offspring. As the 'male-only' instructions spread with each new generation, eventually there would be no females left, says Adelman. His lab discovered the *Aedes aegypti* gene that determines sex only last spring. The next step will be to link it to a gene drive."

Bill Gates favors this technology. So shouldn't we? After all, Bill is the number one humanitarian on the planet, right?

Right?

No?

Oops.

(TLB) published this [original article](#) from the blog of Jon Rappoport with our appreciation for his contribution to raise health and freedom awareness.

Jon Rappoport is the author of three explosive collections, [THE MATRIX REVEALED](#), [EXIT FROM THE MATRIX](#), and [POWER OUTSIDE THE MATRIX](#). Jon was a candidate for a U.S. Congressional seat in the 29th District of California. He maintains a consulting practice for private clients, the purpose of which is the expansion of personal creative power. Nominated for a Pulitzer Prize, he has worked as an investigative reporter for 30 years, writing articles on politics, medicine, and health for CBS Healthwatch, LA Weekly, Spin Magazine, Stern, and other newspapers and magazines in the U.S. and Europe. Jon has delivered lectures and seminars on global politics, health, logic, and creative power to audiences around the world. You can sign up for his **free** NoMoreFakeNews emails [here](#) or his **free** OutsideTheRealityMachine emails [here](#).

....

I read Jon Rappoport's posts every day and the above was posted on May 3, 2022. It resonated with me as something everyone should know about and read. I am glad that Jon wrote this as I have been wanting to do so relative to Covid-19. Covid-19 was not a rogue novel virus as Dr. Anthony Fauci stated two years ago. He and Bill Gates are partners-in-crime, one funds the other in their mutual effort to depopulate the world through "gain-of-function".

Knowing what I have learned about CRISPR from my research into the gene-editing process it seems to me CRISPR was the technology that was used to amp-up the SARS-CoV2 pathogen from 2000. For more than a cursory understanding of CRISPR, I recommend Dr. Kiran Musunuru, a physician and a researcher in the field of heart disease. His excellent book *'The CRISPR Generation: The Story of the World's First Gene-Edited Babies'*. Another book on CRISPR is by the bestselling genetics author Nessa Carey. Her book *'Hacking The Code of Life: How Gene Editing Will Rewrite Our Futures'* is less technical than Dr. Musunuru and is a good starting point for anyone wanting to grasp what this is all about.

The first book that I read on CRISPR was *'CRISPR: A Powerful Way to Change DNA'* by Yolanda Ridge. I should note that my interest in genetics goes back to the day when a physician told me that my wife had Huntingdon's Disease, back in 1967.

Our lives were turned upside down shortly after Thanksgiving dinner with family and a short break in my studies leading up to semester final exams. We were married five years and were unable to conceive, at least until a few days before this turned our lives upside down. In summary, I have had this avocation interest in Genetics and DNA, etc. In 1968, we were given some hope that science would discover the gene that causes Huntingdon's and that maybe someday, it could be edited out by technology. That hope came to some reality a few years ago, with what is called CRISPR-Cas9.

A few months ago, I was listening to an NPR radio interview on the Internet between the NPR reporter and Walter Isaacson, author of *'Code Breaker'*. Many of you may be familiar with Walter Isaacson. I am not a fan of Walter Isaacson, once the CEO of the Aspen Institute, a "globalist" think tank institution. He is author of a string of biography books on well-known celebrities. His newest book is about Jennifer Doudna, PhD, a biochemist and team discoverer of what we call CRISPR-Cas9 technology. She is pictured on page 14 of my article, [Covid Vaxxes Installed Marburg Payloads in Victims –Triggered by 5G](#). She is receiving an award from Jacob Rothschild representing the American Academy of Achievement. No doubt venture capital funding CRISPR was provided by the Rothschild's. They always seem to popup in fields of cutting-edge technology. It took over a million dollars to fund CRISPR-Cas9. The article link below has a surprising link to the vaxxes introduced in the treatment of Covid-19. This article is especially important in that attorney Todd Callender has discovered that within the vectors of those vaxxes is the pathogen known as Marburg, a cousin of Ebola!

[Covid Vaxxes Installed Marburg Payloads in Victims –Triggered by 5G](#)

In the past few weeks, Bill Gates has come up with some more of his draconian measures intended on advancing his real motives, eugenics and depopulation. So, this morning when I finished reading Jon Rappoport's article and a few other sites sharing it, I recognized it as my lead in to the controversial subject of gene-editing. Experimental gene editing began in 2014 and to read many articles one gets the impression that CRISPR is the savior of life. What those thrilled with CRISPR and its promises, like Walter Isaacson, they see big things in the future despite the fact it may be decades before its benefits are realized. It is in this early stage that has a dark cloud overshadowing its use. The hope is that CRISPR will contribute new promise for those suffering with Lupus, Sickle Cell Anemia, Huntingdon's, Alzheimer's, etc.

One of the recent shocking discoveries has shown that the gene code that causes Sickle Cell actually helps fight Malaria. This raises the question could it be that eliminating something terrible would lead to even bigger problems? Experimental studies are being conducted in mice, monkey, but not human genomes. We are led to believe no one is experimenting with "enhancement" genes.

That said, there is an even more troubling aspect to what can or cannot be done using CRISPR. Other nations are aware of the U.S. bioweapons labs scattered around the world, including 15-30 in the Ukraine. Hal Turner posted this post minutes ago on his site. Russian Member of Parliament (Duma) Mikhail Sheremet said publicly today that the U.S. developed coronavirus as a biological weapon!

Chinese media has also begun amplifying Russia's claims about U.S. biolabs in Ukraine and some Russian media outlets are broadcasting the allegations to the Russian citizenry.

In a shocking public statement, Member of Parliament Sheremet now says:

"The United States is developing weapons of mass destruction in its biolaboratories, without bearing any responsibility for its illegal actions. I admit that the coronavirus could be one of the developments of the United States as a type of biological weapon directed against humanity," Sheremet told RIA Novosti.

In his opinion, today the US authorities are a threat to the entire world community.

Hal Turner Editorial Opinion:

Clearly they are now beginning to build a public case to justify destroying us. Nuclear first-strike?

I posted an article, **'The Father of the Coronavirus Virus is the CDC', Planted in China by the C.I.A.** ['The Father of the Coronavirus Virus is the CDC', Planted in China by the C.I.A.](#) **By admin on Wed, 05/04/2022- Link: [The Father of the Coronavirus Virus is the CDC', Planted in China by the C.I.A.](#)**

This article proves that the Coronavirus was created by the CDC, and contains the patent to prove it to be true. We know that since the late 1990s, the U.S. government decided to let the system go bankrupt since it could no longer guarantee its social contract with the public. As the National Debt has continued to grow since George W. Bush up through the Biden administration, there has been a hell-bent effort to collapse the entire nation. There are ties linking people such as Bill Gates and DARPA, the CIA, with the various public health services. The CDC, WHO, NIH, NIAID, and the FDA are in bed with those set on depopulation of the U.S. The very fact that now over 27,000 Americans have died from the "Gene" therapy being passed off as experiment use authorization is proof positive of the incestual relationship between big government and big pharma.

Bill Gates has announced the creation of a pandemic "GERM" team that will monitor sovereign nations and decide when they need to suspend people's civil liberties, force them to wear masks, and close borders.

*"We need a permanent organization of experts who are fully paid and prepared to mount a coordinated response to a dangerous outbreak at any time. In [my book](#), I propose that we call this group **the GERM—Global Epidemic Response and Mobilization—team**," writes Gates on his [website](#).*

“The team’s disease monitoring experts would look for potential outbreaks. Once it spots one, GERM should have the ability to declare an outbreak and work with national governments and the World Bank to raise money for the response very quickly. Product-development experts would advise governments and companies on the highest-priority drugs and vaccines.”

Gates continues, saying that the team would coordinate with various countries to determine *“how and when to implement border closures and recommend mask use.”*

“... Militaries regularly run war games to evaluate their readiness—we should do the same with disease threats. In most countries, these exercises can be run by local public health and military leaders, with GERM acting as an advisor and reviewer. For some low-income countries, the world should invest in building this capacity and lend resources as needed.”

According to Gates, the global team will be made up of 3,000 disease experts under World Health Organization (WHO) purview and will receive around [\\$1 billion per year in funding](#).

And who better to assemble such a team than Bill Gates? After all, Gates appears to have a crystal ball into pandemics.

On October 18, 2019, just weeks before China told the world about COVID-19, the John Hopkins Center for Health Security held [Event 201](#) in partnership with the World Economic Forum and the Bill and Melinda Gates Foundation.

With unparalleled foresight, participants of Event 201 modelled a [“fictional coronavirus pandemic”](#) — almost identical to COVID-19 — that would demand a top-down global response and the collusion of various national governments and international organizations.

Gates’ announcement of the GERM team coincides with the World Health Organization’s drafting of a [global pandemic treaty](#).

As previously reported by The Counter Signal, the pandemic treaty was introduced during a WHO [Special Session](#) entitled “The World Together” in December 2021.

Declare Your Independence!

As per the WHO, the treaty is to be upheld by the WHO’s constitution, which under Article 19 “[provides] the World Health Assembly **with the authority to adopt conventions or agreements on any matter** within WHO’s competence.” *[Emphasis added]*

This authority was initially designed to pertain only to the WHO Framework Convention on Tobacco Control but is being expanded to include dictating Member States' future pandemic responses.

In the future, the pandemic treaty will not only ensure that member states abide by [International Health Regulations](#) but will also put the WHO in the driver's seat, so to speak. Member states, including the US and Canada, will take their orders directly from the organization.

As Conservative MP [Leslyn Lewis](#) explains, *"The treaty includes 190 countries and would be legally binding. The treaty defines and classifies what is considered a pandemic, and this could consist of broad classifications, including an increase in cancers, heart conditions, strokes, etc. **If a pandemic is declared, the WHO takes over the global health management of the pandemic.**"*

*"... **Of even more concern, if this treaty is enshrined, the WHO would be in full control over what gets called a pandemic.** They could dictate how our doctors can respond, which drugs can and can't be used, or which vaccines are approved. We would end up with a one-size-fits-all approach for the entire world... A one-size-fits-all response to a health crisis doesn't even work across Canada, let alone the entire globe."*

The WHO has further stated that countries disobeying regulations dictated by the WHO through their pandemic treaty [may need to be sanctioned](#).

It isn't unreasonable to assume that the GERM team, as a new branch of the WHO, would oversee making sure member states comply with the pandemic treaty after the draft is finalized and member states sign-on.

The next question, then, is how the WHO and Bill Gates would be able to monitor every individual in every country to determine whether enough people are sick to justify locking a region down.

To this end, the WHO has contracted German-based Deutsche Telekom subsidiary T-Systems to [develop a global vaccine passport system](#), with plans to [link every person on the planet to a QR code digital ID](#).

"COVID-19 affects everyone. Countries will therefore only emerge from the pandemic together. Vaccination certificates that are tamper-proof and digitally verifiable build trust. WHO is therefore supporting member states in building national and regional trust networks and verification technology," says unit head of the WHO's Department of Digital Health and Innovation Garrett Mehl.

"The WHO's gateway service also serves as a bridge between regional systems. It can also be used as part of future vaccination campaigns and home-based records."

Thus, there will be one pandemic treaty, one GERM team, one global vaccine passport, and one World Health Organization to monitor every person on the planet.

In a couple weeks humanity faces a life and death UN/WEF coalition to consolidate power that will ensure the Global New World Order authority. My latest segment of Mass Murder [Mass Murder, Part 63](#) posted on Sat, 05/07/2022. Click on the link below: [Mass Murder, Part 63](#) All civil rights will be removed with the WHO's plan to establish a policy that the WHO can control all 194 nations once the WHO implements the blanket virus pandemic.

Blessings,

Pastor Bob, EvanTeachr@aol.com
