

# Genocide

## Through the Hegelian Dialectic!

### Part 2

The web site "*The Burning Platform*" replayed a video presentation by Dr. David Martin entitled "*Genocide for Profit*". It was a 21-minute clip that confirms the premise of my first part of this series. Dr. Martin was speaking at the EU Parliament concerning the weaponization of Coronavirus and SARS-CoV-1. The URL link to view the presentation is here: <https://youtu.be/bg2QGacVlnI>

Dr. Martin was early on the first to expose the Covid scamdemic was introduced as a pathogen to essentially murder old people because the government had broken its social contract with society, meaning that it was facing a problem of being unable to pay Pensions, Social Security, Medicare, and related obligations. By research of "Gain-of-Function", using taxpayer monies, Dr. Anthony Fauci and his cabal of virologists took the ordinary cold pathogen and weaponized it into what it became. The illustration below states the survival rate of Covid-19; this was the CDC's own data and I might add never was revised throughout the almost four year of the scamdemic.

If anyone wants to see or verify the data they can go to [www.pastorbobreid.com](http://www.pastorbobreid.com) and search for the series on Mass Murder. I posted every Friday the latest VAERS analysis data published by the Children's Defense Fund. I posted a total of 85 weekly

summaries of the preceding week's data the VAERS made public. Each weekly update reported the average age of death reported by the CDC. The average age of death was 74 years of age. When I ended the postings, the CDC stopped reporting the VAERS data, which only represented about 1% of reported cases according to statistical data reporting analysis. In 85 weeks of reporting the VAERS data, there might have been as few as five or six weeks where the average age of death was 72 or 73.

We know that those who died supposedly of Covid-19, closer examination showed almost all died of comorbidity issues, heart, lung, kidney, liver, or combination of more than one health issue. From the government agencies that report on death, disabilities, or employment data, excess death rates have been spiking two years out from the EUA administering so-called vaccines, which are really "gene" therapy. Edward Dowd's data from insurance payouts are still indicating spikes in all categories of death and disabilities. I estimated in Part 1 that 170-millions U.S. residents have received at least one booster shot. Recent numbers in the UK have shown 98% of deaths were in people who had received their third shot or booster.

No one knows precisely who received what and so as a worst case scenario suggests 170-million likely or potential deaths, if not damaged immune systems that will reduce a person's longevity. Subsequent analysis shows that only selective vials contain lethal doses while others were. From criminal minds it makes senses that to confuse investigators from getting to the bottom of their crimes they would do everything to hide any patterns that would expose their crimes. One recent study indicates 1 fatality for every 1,000 doses administered.

The agenda is to debilitate people if they can't kill them. The spike protein mRNA once injected into the body spreads throughout the DNA, and replicates itself and the natural immune system ultimately collapses from overworking itself to fight. The spike protein will concentrate in the reproductive organs of both men and women, which will then make them sterile. Many experts have stated that this is an "Extinction Level Event". Dr. Jane Ruby, Karen Kingston, Dr. David L. Martin, Dr. Paul Alexander, Dr. Michael Yeadon, Dr. Sucharit Bhakdi, Dr. Joseph Mercola, Dr. Sherri Tennpenny, and many honest professionals.

As of August 10<sup>th</sup> we have read Karen Kingston is on the run to avoid an assassination on her life by the CIA.

**Anthem Medical's Vaxx-Incentive Plan Exposes How Much Doctors Got Paid to Push the Death Jabs  
Follow the blood money.**

JD RUCKER  
AUG 10, 2023

Following the rollout of the Covid-19 "vaccines," there was a hardcore push by people in authority to get as many men, women, and children jabbed as many times as possible. Politicians and bureaucrats made threats and restricted those who refused. Journalists

gaslight us. Celebrities ridiculed us. It has only been in the last few months that the pressure campaign has let up a bit, but it's still there in the background.

While most Americans have a healthy distrust for politicians, corporate media, and Hollywood stars, a strong majority of people got jabbed anyway for one huge reason: Most doctors were on board with the mass-vaccination program. Many might laugh when Bill de Blasio or Sean Hannity advise us to get jabbed, but with so many doctors echoing the sentiment, millions if not tens of millions dismissed their better judgment based on recommendations from medical professionals.

Studies and strong data points demonstrating the jabs were neither safe nor effective started coming out mere weeks after the rollout, so why did it take most doctors so long to get clued in? A recently surfaced copy of Kentucky Anthem Medical's "Covid-19 Vaccine Provider Incentive Program" may offer the obvious answer:

Anthem Medical

They say money can't buy you love, but it can buy silence, compliance, and loyalty.

Look at those numbers.

We have seen that similar incentives and bonuses were offered to pediatricians by Blue Cross. Months ago this practice of incentivization was common practice, even though these vaxxes were experimental and given under EUA distribution. Given what we already know about huge financial rewards to physicians and hospitals the larger picture screams of corruption if not criminal in nature.

Drug vaccination program charts such as the one below have been posted on line offering huge bonuses to vaccinate all children in their practice. In fact, many pediatricians would refuse to see a child unless the family had them vaxxed. Emergency hospital rooms followed the same protocol in life threatening emergency surgery if a child were not vaxxed for Covid.

## COVID-19 Vaccine Provider Incentive program

Getting vaccinated against COVID-19 is one of the best and safest ways people can protect themselves and their families against the virus. As a participating practice in the COVID-19 Provider Vaccine Incentive program, we recognize your hard work by offering incentives for helping patients make the choice to become vaccinated.

### Eligibility

The COVID-19 Vaccine Provider Incentive program is open to you if you are a participating Kentucky primary care provider with an Anthem Blue Cross and Blue Shield Medicaid (Anthem) panel size of 25 or more members. All Anthem members identified as receiving COVID-19 vaccination services are included in the methodology. Vaccine results will be determined by a COVID-19 vaccine claim or by confirmation from the Kentucky Vaccine Registry.

The results will be calculated for two time periods:

- September 1, 2021 – Initial incentive payment
- December 31, 2021 – Final incentive payment

### How you can qualify for a bonus

If your practice meets the below thresholds for vaccination with at least one dose by September 1, 2021, you will receive the initial incentive payment based on the following rates:

- 30% Anthem members vaccinated – \$20 bonus per vaccinated member
- 40% Anthem members vaccinated – \$45 bonus per vaccinated member
- 50% Anthem members vaccinated – \$70 bonus per vaccinated member
- 60% Anthem members vaccinated – \$100 bonus per vaccinated member
- 75% Anthem members vaccinated – \$125 bonus per vaccinated member

The final incentive payment is calculated based on members who are newly vaccinated between September 1, 2021 and December 31, 2021 (see the *Appendix* for calculation examples). If your practice meets the below thresholds for vaccination with at least one dose by December 1, 2021, you will receive the final incentive payment based on the following rates:

- 30% Anthem members vaccinated – \$100 bonus per newly vaccinated member
- 40% Anthem members vaccinated – \$150 bonus per newly vaccinated member
- 50% Anthem members vaccinated – \$175 bonus per newly vaccinated member
- 60% Anthem members vaccinated – \$200 bonus per newly vaccinated member
- 75% Anthem members vaccinated – \$250 bonus per newly vaccinated member

<https://providers.anthem.com/ky>

Anthem Blue Cross and Blue Shield Medicaid is the trade name of Anthem Kentucky Managed Care Plan, Inc., independent licensee of the Blue Cross and Blue Shield Association. Anthem is a registered trademark of Anthem Insurance Companies, Inc.

We have known for two years why the mega-hospitals and medical organizations got on board with massive payments from Big Pharma, but now it's easy to understand why doctors in smaller practices played ball as well. The threshold to qualify for incentives was one injection. That's it. These are awfully big payouts for doctors to do a 90-second procedure. And lest we forget, these are the incentives from the insurance company, not Big Pharma... unless you realize that the insurance companies and Big Pharma have been in bed with each other since Obamacare was launched.

#### Don't Forget Fauci

With all of these shenanigans happening between doctors, Big Pharma, and the insurance companies, surely the medical watchdogs and corruption bloodhounds in our government can see the conspiracies and shut them down, right? If you believe that, you probably still get your news from MSNBC or Fox News.

As most of our brilliant readers know, government officials are in on it as well. Sometimes, they're the orchestrators of the evil plans. Other times, they're just the lapdogs of Big Pharma and the Globalist Elite Cabal. With Covid-19, the rise of Pandemic Panic Theater can be traced back to two men: Anthony Fauci and Francis Collins.

Both of the longtime directors of the National Institutes of Health and its National Institute of Allergy and Infectious Diseases are now conveniently retired to live off the spoils of their taxpayer-funded reigns of terror, but even their inflated salaries were minuscule compared to how much they were paid by the companies they were supposed to be regulating. A watchdog group recently dropped a bombshell about the Fauci-Collins con job.

According to '*Just The News*':

Transparency watchdog OpenTheBooks.com on Wednesday published more than 1,500 pages of unredacted records identifying which companies paid which NIH scientists for which inventions and when, following a mostly successful Freedom of Information Act battle with NIH.

The 56,000 transactions add up to more than \$325 million, according to OpenTheBooks, though the individual amounts for each payment and corresponding license are not listed in the records. Who authorizes such massive payments?

Fauci received 37 payments from three companies between 2010-2021: 15 from Santa Cruz Biotechnology, which creates products for medical research including antibodies and made the fifth-most payments in the royalty database; 14 from Ancell Corp., which produces immunology tolls; and eight from Chiron Corp., acquired by Novartis in 2006.

Novartis has received \$17 million in NIH contract payments and \$15 million in NIH grants since the acquisition. Fauci's NIAID contracted with Chiron in 2004 to help

develop an avian influenza vaccine. He was the highest-paid federal employee when Fauci retired at year's end, with a \$480,000 salary in 2022. Dr. Fauci was rewarded with a retirement position at Georgetown University as a distinguished professor. Keep that in your memory as there is much to expose.

Collins, the NIH director who stepped down at the end of 2021 and then served as President Joe Biden's COVID-19 czar, received 21 payments from four companies between 2010-2018, led by 12 from genetic research firm GeneDx, which has received \$5 million in federal contract payments mostly from NIH since 2008.

Four payments to Collins came from Quest Diagnostics' Specialty Laboratories, which provides biological testing services; four from Ionis Pharmaceuticals, originally named ISIS, known for RNA-targeted therapeutics; and one from Progeria Research Foundation, a nonprofit specializing in research for the congenital disorder.

OpenTheBooks said obtaining the names and license numbers for each payment, which NIH redacted before a court ordered that information made public, were crucial for "scrutinizing these records for potential conflicts of interest or public health risks."

It will help determine whether Fauci was truthful when he told Sen. Rand Paul (R-Ky.) at a hearing last year that "I doubt" Fauci received any royalties from any entity that received NIAID money overseen by Fauci, OpenTheBooks said.

As much as I like Senator Paul, I do not have high hopes that he'll be able to hold anyone accountable. Fauci and Collins are Mafiosos in the globalist crime syndicate. They're made men, protected from scrutiny and immune to justice. Being high-ranking minions of Satan has advantages... at least in this life.

Keep all of this in mind and spread the word to friends and family. They need to know about the incentives, kickbacks, and corruption that drove Pandemic Panic Theater because another round is likely just around the corner.

That's not speculation, for several weeks we have reading WHO reports of another virus supposedly more lethal.

## **Eugenics Today: How Vaccines Are Used to Sterilize the Masses**

Eugenics Today: How Vaccines Are Used to Sterilize the Masses (Jan. 14, 2014)

<http://21stcenturywire.com/2014/01/14/eugenics-today-how-vaccines-are-used-to-sterilize-the-masses/>

Still, most people are in denial that these kind of elitist programs actually exist...

Rockefeller Foundation Vaccine Eugenics program Elites like the Rockefellers, and dynastic underlings like Bill Gates, seem obsessed with vaccines and the proliferation of dispensaries – particularly in the Third World. Such an elitist ‘health’ project is disguised behind deceptive labels:

*“Other lines of current immunological contraceptive research continue to seek what, during the 1930s, Max Mason of the Rockefeller Foundation called “anti-hormones”: vaccines to block hormones needed for very early pregnancy and a vaccine to block the hormone needed for the surface of the egg to function properly.”*

This 2-in-1 report by Aaron Dykes and Jurriaan Maessan provided the detail and the depth – please read and share this article.... It was done in 2014.

### **How the Rockefeller Foundation Quietly Funded the Anti-Fertility Vaccine**

Aaron Dykes  
Truthstream Media

The Rockefellers, one of the world’s wealthiest families, have been the largest financial backer of Eugenics and other population control measures.

#### **EUGENICS SPECIAL: Global Extermination Database Exposed**

Author Jurriaan Maessan stumbled upon some very compelling and important research back in 2010 while digging through annual reports for the Rockefeller Foundation that conclusively prove that it funded numerous research projects into the development “anti-fertility” vaccines, with its origins in scientific research dating back to at least 1968, and with successful research conducted by at least 1988. There now exists several methods to sterilize both men and women by injection, as well as to terminate pregnancies and/or induce spontaneous abortions.

This is highly significant research because the Rockefeller family, dating back to oil baron John D. Rockefeller, has been on the cutting edge of financing Eugenics policy and research. Rockefeller and other primarily Anglo elites based in the U.S. East Coast and England fostered /festered a whole paradigm of social policy centered around the quack science that asserted that the superiority of some gene stocks over others was provable, while seeking various ways to reduce the populations of the “lesser” genetic groups of the world.

This racist ideology manifest in Eugenics laws in 27 U.S. states, and later in Nazi Germany, also taking root in much of the Western world. The Rockefeller family, among others, financed Eugenics research at the Kaiser Wilhelm Institute in Nazi Germany, where some of the most horrifying “scientific” research was conducted – including the work of Josef Mengele.

Following World War II, Eugenics was re-branded to cast off its associations with the Nazis, and emerged, as it were, in the form of such social policy topics as “*population control*,” “*family planning*,” abortion/Planned Parenthood, health care, various types of genetics, even laced in between such screeds as global warming/climate change – which leads to arguments about reducing the burden of over-population upon the earth.

Today, figures like Bill Gates have been quite open about connecting the use of vaccines, GMOs, health care and reducing the population through a (mostly covert) Eugenics – even in the name of reducing the impact of climate change.

The powerful Bill & Melinda Gates Foundation formally tied its agenda to aims of the Rockefeller Foundation, including in its funding for vaccinations and population reduction.

Foundation, including in its funding for vaccinations and population reduction.

Bill Gates and David Rockefeller were the leading members of a billionaires’ club that met in secret to discuss how to strengthen measures for population control, particularly in the developing world, through the guise of “philanthropy.” Other notable members include Ted Turner, George Soros, Warren Buffett, Oprah Winfrey, and Michael Bloomberg.

Worse, there is evidence that these anti-fertility vaccines – developed through Rockefeller-funded research – may have been used covertly in several developing nations (for instance, in the Philippines), where women experienced loss of pregnancy after receiving tetanus shots – one of the main carriers for the Rockefeller-funded HcG anti-fertility vaccine.

## **Elite ‘humanitarian’ David Rockefeller.**

Below is Jurriaan Maessan’s original and groundbreaking report...

Rockefeller Anti-Fertility Vaccines Exposed

<http://explosivereports.com/2012/06/09/rockefeller-anti-fertility-vaccines-exposed/>

Jurriaan Maessan  
ExplosiveReports.com

*“In the course of August and September 2010, I wrote several articles for Infowars on the Rockefeller Foundation’s admitted funding and developing of anti-fertility vaccines intended for mass-scale distribution.”* As the soft-kill depopulation agenda accelerates it seems all the more relevant to re-post these articles as one.

1- Rockefeller Foundation Developed Vaccines For “Mass-Scale” Fertility Reduction

In its 1968 yearly report, the Rockefeller Foundation acknowledged funding the development of so-called “*anti-fertility vaccines*” and their implementation on a mass-scale. From page 51 onward we read:

*“(...) several types of drugs are known to diminish male fertility, but those that have been tested have serious problems of toxicity. Very little work is in progress on immunological methods, such as vaccines, to reduce fertility, and much more research is required if a solution is to be found here.”*

The possibility of using vaccines to reduce male fertility was something that needed to be investigated further, according to the Rockefeller Foundation, because both the oral pill and the IUD were not suitable for mass-scale distribution:

*“We are faced with the danger that within a few years these two “modern” methods, for which such high hopes have been held will in fact turn out to be impracticable on a mass scale.”*

*“A semi-permanent or renewable subcutaneous implant of these hormones has been suggested, but whether or not the same difficulties would result has not been determined.”*

Saying that research thus-far had been too low-grade to produce any substantial results, the report was adamant:

“The Foundation will endeavour to assist in filling this important gap in several ways:

1- “Seeking out or encouraging the development of, and providing partial support to, a few centers of excellence in universities and research institutions in the United States and abroad in which the methods and points of view of molecular biology are teamed with the more traditional approaches of histology, embryology, and endocrinology in research pertinent to development of fertility control methods;”

2- “Supporting research of individual investigators, oriented toward development of contraceptive methods or of basic information on human reproduction relevant to such developments;”

3- “Encouraging, by making research funds available, as well as by other means, established and beginning investigators to turn their attention to aspects of research in reproductive biology that have implications for human fertility and its control;”

4- “Encouraging more biology and biochemistry students to elect careers in reproductive biology and human fertility control, through support of research and teaching programs in departments of zoology, biology, and biochemistry.”

The list goes on and on. Motivation for these activities, according to the RF?

*“There are an estimated five million women among America’s poverty and near-poverty groups who need birth control service (...). The unchecked fertility of the indigent does much to perpetuate poverty, under-education, and underemployment, not only in urban slums, but also in depressed rural areas.”*

It wasn’t long before all the Foundation’s efforts began to have effect. In its annual report of 1988, The RF was happy to report the progress made by the Foundation’s Population Division in the field of anti-fertility vaccines:

*“India’s National Institute of Immunology successfully completed in 1988 the first phase of trials with three versions of an anti-fertility vaccine for women. Sponsored by the government of India and supported by the Foundation, the trials established that with each of the tested vaccines, at least one year of protection against pregnancy could be expected, based on the levels of antibodies formed in response to the immunization schedule.”*

In its 1997 review of anti-fertility vaccines, Indian based International Centre for Genetic Engineering and Biotechnology didn’t forget to acknowledge its main benefactor:

*“The work on LHRH and HCG vaccines was supported by research grants of The Rockefeller Foundation, (...).”*

In the 1990s the work on anti-fertility vaccines went in overdrive, especially in third-world nations, as did the funding provided by the deep pockets of the Rockefeller Foundation. At the same time, the target-population of the globalists- women- began to stir uncomfortably with all this out-in-the-open talk of population reduction and vaccines as a means to achieve it.

Betsy Hartman, Director of the Population and Development Program at Hampshire College, Massachusetts and *“someone who believes strongly in women’s right to safe, voluntary birth control and abortion”*, is no supporter of the anti-fertility vaccine, as brought into being by the Rockefeller Foundation. She explains in her essay Population control in the new world order:

*“Although one vaccine has been tested on only 180 women in India, it is being billed there as ‘safe, devoid of any side effects and completely reversible’. The scientific community knows very well that such assertions are false – for instance, many questions still remain about the vaccine’s long-term impact on the immune system and menstrual cycle. There is also evidence on film of women being denied information about the vaccine in clinical trials. Nevertheless, the vaccine is being prepared for large-scale use.”*

The Women’s Global Network for Reproductive Rights based in Amsterdam, the Netherlands, quoted “a leading contraceptive researcher as saying:

*“Immunological birth control methods will be an ‘antigenic weapon’ against the reproductive process, which left unchecked, threatens to swamp the world.”*

Animal rights activist Ms. Sonya Ghosh also expressed concerns about the Rockefeller-funded anti-fertility vaccine and its implementation:

*“Instead of giving individual women more options to prevent pregnancy and protect against AIDs and sexually transmitted diseases, the anti fertility vaccine is designed to be easily administered to large numbers of women using the least resources. If administered to illiterate populations the issues of user control and informed consent are further cause for concern.”*

To avoid such debates, the Foundation has in the last couple of decades consorted to its long-practiced and highly successful methods of either outright lying through its teeth or using deceptive language to hide the fact that it continues to work tirelessly toward its long-stated mission.

## 2- Global Distribution of Rockefeller-Funded Anti-Fertility Vaccine Coordinated by WHO

In addition to the recent Prison Planet-exclusive Rockefeller Foundation Developed Vaccines For *“Mass-Scale”* Fertility Reduction- which outlines the Rockefeller Foundation’s efforts in the 1960s funding research into so-called *“anti-fertility vaccines”*- another series of documents has surfaced, proving beyond any doubt that the UN Population Fund, World Bank and World Health Organization picked up on it, further developing it under responsibility of a *“Task Force on Vaccines for Fertility Regulation”*.

Just four years after the Rockefeller Foundation launched massive funding-operations into anti-fertility vaccines, the Task Force was created under auspices of the World Health Organization, World Bank and UN Population Fund. Its mission, according to one of its members, to support:

*“basic and clinical research on the development of birth control vaccines directed against the gametes or the preimplantation embryo. These studies have involved the use of advanced procedures in peptide chemistry, hybridoma technology and molecular genetics as well as the evaluation of a number of novel approaches in general vaccinology. As a result of this international, collaborative effort, a prototype anti-HCG vaccine is now undergoing clinical testing, raising the prospect that a totally new family planning method may be available before the end of the current decade.”*

In regards to the scope of the Task Force’s jurisdiction, the Biotechnology and Development Monitor reported:

*“The Task Force acts as a global coordinating body for anti-fertility vaccine R&D in the various working groups and supports research on different approaches, such as anti-sperm and anti-ovum vaccines and vaccines designed to neutralize the biological*

*functions of hCG. The Task Force has succeeded in developing a prototype of an anti-hCG-vaccine.”*

One of the Task Force members, P.D. Griffin, outlined the purpose and trajectory of these Fertility Regulating Vaccines. Griffin:

*“The Task Force has continued to coordinate its research activities with other vaccine development programmes within WHO and with other international and national programmes engaged in the development of fertility regulating vaccines.”*

Griffin also admitted to the fact that one of the purposes of the vaccines is the implementation in developing countries. Griffin:

*“If vaccines could be developed which could safely and effectively inhibit fertility, without producing unacceptable side effects, they would be an attractive addition to the present armamentarium of fertility regulating methods and would be likely to have a significant impact on family planning programmes.”*

Also, one of the advantages of the FRVs over “currently available methods of fertility regulation” the Task Force states, is the following (179):

*“low manufacturing cost and ease of delivery within existing health services.”*

Already in 1978, the WHO’s Task Force (then called Task Force on Immunological Methods for Fertility Regulation) underlined the usefulness of these vaccines in regards to the possibility of “large scale synthesis and manufacture” of the vaccine:

*“The potential advantages of an immunological approach to fertility regulation can be summarized as follows: (a) the possibility of infrequent administration, possibly by paramedical personnel; (b) the use of antigens or antigen fragments, which are not pharmacologically active; and (c) in the case of antigens of known chemical structure, there is the possibility of large-scale synthesis and manufacture of vaccine at relatively low cost.”*

In 1976, the WHO Expanded Programme of Research, Development and Research Training in Human Reproduction published a report, stating:

*“In 1972 the Organization (...) expanded its programme of research in human reproduction to provide an international focus for an intensified effort to improve existing methods of fertility regulation, to develop new methods and to assist national authorities in devising the best ways of providing them on a continuing basis. The programme is closely integrated with other WHO research on the delivery of family planning care by health services, which in turn feeds into WHO’s technical assistance programme to governments at the service level.”*

Although the term “*Anti-Fertility Vaccine*”, coined by the Rockefeller Foundation, was replaced by the more bureaucratic sounding “*Fertility Regulating Vaccine (FRV)*”, the programme was obviously the same. Besides, the time-line shows conclusively that the WHO, UN Population Fund and World Bank continued on a path outlined by the Rockefellers in the late 1960s. By extension, it proves that all these organizations are perfectly interlocked best captured under the header “*Scientific Dictatorship*”. The relationship between the WHO and the Rockefeller Foundation is intense. In the 1986 bulletin of the World Health Organization, this relationship is being described in some detail. While researching the effectiveness of “*gossypol*” as an “*antifertility agent*”, the bulletin states:

*“The Rockefeller Foundation has supported limited clinical trials in China and small-scale clinical studies in Brazil and Austria. The dose administered in the current Chinese trial has been reduced from 20 mg to 10-15 mg/day during the loading phase in order to see if severe oligospermia rather than consistent azoospermia would be adequate for an acceptable, non-toxic and reversible effect. Meanwhile, both the WHO human reproduction programme and the Rockefeller Foundation are supporting animal studies to better define the mechanism of action of gossypol.”*

In August of 1992, a series of meetings was held in Geneva, Switzerland, regarding “*fertility regulating vaccines*”. According to the document *Fertility Regulating Vaccines* (classified by the WHO with a limited distribution) present at those meetings were scientists and clinicians from all over the globe, including then biomedical researcher of the American Agency for International development, and current research-chief of USAID, Mr. Jeff Spieler.

In 1986 Mr. Spieler declared:

*“A new approach to fertility regulation is the development of vaccines directed against human substances required for reproduction. Potential candidates for immunological interference include reproductive hormones, ovum and sperm antigens, and antigens derived from embryonic or fetal tissue(...). An antifertility vaccine must be capable of safely and effectively inhibiting a human substance, which would need somehow to be rendered antigenic. A fertility-regulating vaccine, moreover, would have to produce and sustain effective immunity in at least 95% of the vaccinated population, a level of protection rarely achieved even with the most successful viral and bacterial vaccines. But while these challenges looked insuperable just a few years ago, recent advances in biotechnology- particularly in the fields of molecular biology, genetic engineering and monoclonal antibody production- are bringing antifertility vaccines into the realm of the feasible.”*

*“Vaccines interfering with sperm function and fertilization could be available for human testing by the early 1990s”,* Spieler wrote.

In order for widespread use of these vaccines, Spieler writes, the vaccine must conquer “*variations in individual responses to immunization with fertility-regulating vaccines*”.

*“Research”, he goes on to say, “is also needed in the field of “basic vaccinology”, to find the best carrier proteins, adjuvants, vehicles and delivery systems.”*

In the 1992 document, the problem of “variations in individual responses” is also discussed:

*“Because of the genetic diversity of human populations”, states the document, “immune responses to vaccines often show marked differences from one individual to another in terms of magnitude and duration. These differences may be partly or even completely overcome with appropriately engineered FRVs (Fertility Regulating Vaccines) and by improvements in our understanding of what is required to develop and control the immune response elicited by different vaccines.”*

The picture emerging from these facts is clear. The WHO, as a global coordinating body, has since the early 1970s continued the development of the Rockefeller-funded “anti-fertility vaccine”. What also is becoming clear, is that extensive research has been done to the delivery systems in which these anti-fertility components can be buried, such as regular anti-viral vaccines. It’s a mass-scale anti-fertilization programme with the aim of reducing the world’s population: a dream long cherished by the global elite.

### 3- On Top of Vaccines, Rockefeller Foundation Presents Anti-Fertility Substance Gossypol for “Widespread Use”

It seems there is no limit to the Rockefeller Foundation’s ambitions to introduce anti-fertility compounds into either existing “*health-services*”, such as vaccines, or- as appears to be the case now- average consumer-products.

The 1985 Rockefeller Foundation’s annual report underlined its ongoing dedication towards finding good use for the anti-fertility substance “gossypol”, or C30H30O8 – as the description reads.

Indeed, gossypol, a toxic polyphenol derived from the cotton plant, was identified early on in the Foundation’s research as an effective sterilant. The question was, how to implement or integrate the toxic substance into crops.

*“Another long-term interest of the Foundation has been gossypol, a compound that has been shown to have an antifertility effect in men, By the end of 1985, the Foundation had made grants totaling approximately \$1.6 million in an effort to support and stimulate scientific investigations on the safety and efficacy of gossypol.”*

In the 1986 Rockefeller Foundation annual report, the organization admits funding research into the use of fertility-reducing compounds in relation to food for “*widespread use*”:

*“Male contraceptive studies are focused on gossypol, a natural substance extracted from the cotton plant, and identified by Chinese researchers as having an anti-fertility effect on men. Before widespread use can be recommended, further investigation is needed to see if lowering the dosage can eliminate undesirable side-effects without reducing its effectiveness as a contraceptive. The Foundation supported research on gossypol’s safety, reversibility and efficacy in seven different 1986 grants.”*

In the RF’s 1988 annual report, gossypol as a contraceptive was also elaborated upon (page 22):

*“Gossypol, a natural substance found in the cotton plant, continues to show promise as an oral contraceptive for men. Because it suppresses sperm production without affecting sex hormone levels, it is unique among the experimental approaches to fertility control in men. Foundation-funded scientists worldwide have assembled an array of information about how gossypol works, and studies continue on a wide variety of its clinical applications. Dose reduction is being investigated to reduce health risks associated with the use of gossypol.”*

The following year, according to the annual report, funds were allocated to several research institutions to see how this “dose reduction” could best be accomplished without interfering with the anti-fertility effects of gossypol.

(1988- \$400,000, in addition to remaining funds from prior year appropriations) To support research on gossypol, its safety, reversibility, and efficacy as a contraceptive for use by men (...).”

Mention is made on money allocated to the University of Texas, *“for a study of gossypol’s effects on DNA replication (...).”*

The last mention of gossypol in the Foundation’s annals we find in the 1994 annual report, where funds were appropriated to the University of Innsbruck of Austria *“for a study at the Institute of Physiology on the molecular action of gossypol at the cellular level.”*

It seems that the funded scientists have indeed found a way of “lowering the dosage” of gossypol, circumventing the toxicity of the substance, so as to suppress or even eliminate these “undesirable side-effects”, which include: low blood potassium levels, fatigue, muscle weakness and even paralysis. If these effects could be eliminated without reducing the anti-fertility effects, the Foundation figured, it would be a highly effective and almost undetectable sterilant.

Although overtly, research into and development of gossypol as an anti-fertility compound was abandoned in the late 1990s, the cottonseed containing the substance was especially selected for mass distribution in the beginning of the current decade. Around 2006 a media-campaign was launched, saying the cottonseed could help defeat hunger and poverty.

In 2006, Nature News reported that RNA interference (or RNAi) was the way to go. On the one hand it would *“cut the gossypol content in cottonseeds by 98%, while leaving the chemical defenses of the rest of the plant intact.”* Furthermore, the article quoted Dr. Deborah P. Delmer, the Rockefeller Foundation’s associate director of food security, who was quick to bury any concern:

*“Deborah Delmer, associate director of the Rockefeller Foundation in New York City and an expert in agricultural food safety, points out that a benefit of using RNAi technology is that it turns off a gene process rather than switching on a novel function. “So instead of introducing a new foreign protein, you’re just shutting down one process,” Delmer says. “In that sense, I think that the safety concerns should be far less than other GM technologies.”*

A 2006, National Geographic article Toxin-Free Cottonseed Engineered; Could Feed Millions Study Says, quotes the director of the Laboratory for Crop Transformation (Texas A&M University), Keerti Singh Rathore as saying:

*“A gossypol-free cottonseed would significantly contribute to human nutrition and health, particularly in developing countries, and help meet the requirements of the predicted 50 percent increase in the world population in the next 50 years.”*

*“Rathore’s study”, states the article, “represents the first substantiated case where gossypol was reduced via genetic engineering that targets the genes that make the toxin.”*

I bring into recollection the statement made by the Rockefeller Foundation in its 1986 annual report, which reads:

*“Before widespread use can be recommended, further investigation is needed to see if lowering the dosage can eliminate undesirable side-effects without reducing its effectiveness as a contraceptive.”*

In the 1997 Foundational report, Rathore is mentioned (page 68). A postdoctoral fellowship-grant was given to a certain E. Chandrakanth *“for advanced study in plant molecular biology under the direction of Keerti S. Rathore, Laboratory for Crop Transformation, Texas A&M University, College Station, Texas.”*

Compromising connections, in other words, for someone who claimed academic objectivity in regards to gossypol and its sterilizing effects. Rathore explained the workings of RNAi in a 2006 issue of the Proceedings of the National Academy of Sciences.

*“Cottonseed toxicity due to gossypol is a long-standing problem”, Rathore said, “and people have tried to fix it but haven’t been able to through traditional plant breeding. My*

*area of research is plant transgenics, so I thought about using some molecular approaches to address this problem.”*

Rathore also mentioned the desired main funder of his work without actually saying the name:

*“we are trying to find some partners and will probably be looking at charitable foundations to help us out in terms of doing all kinds of testing that is required before a genetically engineered plant is approved for food or feed. We are in the very early stages and have a lot of ideas in mind, but we need to pursue those. Hopefully, we can find some sort of partnership that will allow us to do them.”*

He also expressed the final adaptation of the cottonseed for widespread use is something of the long term:

*“(...) right now there are many hurdles when you are dealing with a genetically modified plant. But I think in the next 15 or 20 years a lot of these regulations that we have to satisfy will be eliminated or reduced substantially.”*

The Foundation, as is evident from the statements of Rockefeller’s own Deborah Delmer, is more than interested. Even worse, through the process of readying gossypol for mass-distribution in food, the fulfillment of their longstanding goal of sterilizing the populous into oblivion comes into view.

#### 4- Rockefeller Foundation Conceptualized “Anti-Hormone” Vaccine in the 1920s and 30s, Reports Reveal

Rockefeller Foundation minion Max Mason, who acted as president in the mid-1930s, on multiple occasions expressed his master’s desire for an “anti-hormone” that would reduce fertility worldwide. Now keep in mind, this is more than 35 years before the Foundation actually mentioned funding “anti-fertility vaccines” in subsequent annual reports from 1969 onward.

Having traveled far beyond the realm of rumor and speculation, research into the admitted funding of anti-fertility vaccines has uncovered more and more sinister revelations along the way.

By the mid-1930s, Mason of the Rockefeller Foundation thought that *“the ultimate solution of the problem [of birth control] may well lie in the studies of endocrinology, particularly anti-hormones.”* The Foundation’s 1934 annual report states:

*“The Rockefeller Foundation has decided to concentrate its present effort in the natural sciences on the field of modern experimental biology, with special interest in such topics as endocrinology, nutrition, genetics, embryology, problems centering about the reproductive process, psychobiology, general and cellular physiology, biophysics, and biochemistry.”*

*“(...) research work is being conducted on the physiology of reproduction in the monkey. This work was begun at the Johns Hopkins University in 1921, and since 1923 has been continued at the University of Rochester. It involves observational and experimental studies of the reproductive cycle in certain species of the higher primates, in which this cycle closely resembles that of the human species. The effect of the various interrelated reproductive hormones is being studied.”*

In the annual report of the previous year (1933), the Foundation stresses the fact that work on the reproductive hormones of primates serves to experiment on man in the future:

*“(...) much work has been done in the formulation and solution of basic problems in the general biology and physiology of sex in organisms other than man. It was essential that this fundamental work on infra-man pave the way for that on man.”*

In the book *Disciplining Reproduction* by Adele E. Clarke, the roots of Rockefeller-funded “anti-hormones” is being described in some detail, pointing out that the family’s ambitions to control man’s fertility date back even further than the 1930s. Clarke writes:

*“On a cold morning in 1921, George Washington Corner, a physician and fledgling reproductive scientist, awoke in Baltimore to discover that it was snowing.”*

*“By 1929”, Clarke writes a bit further on, “Corner had mapped out the hormonal action of progesterone, an essential actor in the menstrual cycle and subsequently an actor in birth control pills.”*

The 1935 Rockefeller Foundation annual report acknowledges funding Dr. Corner’s research:

*“To the University of Rochester, for research on the physiology of reproduction under the direction of Dr. G. W. Corner during the threeyear period beginning July 1, 1935, and ending June 30, 1938, there has been appropriated the sum of \$9,900. Dr. Corner’s activities are concentrated on a study of the oestrus cycle, using monkeys as the experimental animals. A colony of about thirty monkeys has been maintained, and experiments have furnished information on the normal histology of the reproductive cycle, the time of ovulation, the relation of ovulation to menstruation and other anatomically detectable correlations of the oestrus cycle. Work is continuing on two main lines: normal sex reproduction in the monkey, including the histology of ovary and uterus, and, secondly, the effects of the ovarian hormone.”*

Again, never forget that the Foundation in 1933 stated outright that *“It was essential that this fundamental work on infra-man pave the way for that on man.”*

Another essential problem which arises, of course, is how exactly the funding-mechanism worked by which Corner’s research could be made ready for mass-

consumption. Clarke mentions that officially the National Research Council, an arm of the National Academy of Sciences (NAS), was the institute responsible for the task of doing so. More specific: the Committee for Research in Problems of Sex (CRPS):

*“The NRC itself was founded in 1916 as an agency to inventory research toward enhanced military preparedness.”*

*“The NRC”, states the author, “was a prestigious organization from its inception, thanks to its early association with the NAS, the Carnegie Corporation, and the Rockefeller Foundation. Kohler (1991:109) has argued that the NRC essentially served as an intermediary between the foundations and scientists in the interwar years(...). The NRC/CRPS itself was funded almost exclusively by Rockefeller monies, initially through the Bureau of Social Hygiene and, after 1931, through the Rockefeller Foundation.”*

On the subject of so-called “*current immunological contraceptive research*”, Clarke channels Rockefeller-president Max Mason:

*“Other lines of current immunological contraceptive research continue to seek what, during the 1930s, Max Mason of the Rockefeller Foundation called “anti-hormones”: vaccines to block hormones needed for very early pregnancy and a vaccine to block the hormone needed for the surface of the egg to function properly.”*

In a February 1934 “*progress report*” written by Warren Weaver (director of the Natural Sciences Division of the Rockefeller Foundation) once again underlined the endgame:

*“Can man gain an intelligent control of his own power? Can we develop so sound and extensive a genetics that we can hope to breed, in the future, superior men? Can we obtain enough knowledge of physiology and psychobiology of sex so that man can bring this pervasive, highly important, and dangerous aspect of life under rational control?”*

The same Warren Weaver wrote a “biographical Memoir” in honor of his friend Max Mason, revealing some more interesting facts. Weaver, who describes himself as a great personal friend of Mason, gives a general description of him as Rockefeller-minion:

*“He had by that time developed a consuming interest in behavioral research, and particularly in the possibility that the physical sciences, working with and through the biological sciences, could shed new and revealing light on the normal and abnormal behavior of individuals, and ultimately on the social behavior of groups of men.”*

Here we have it. The blueprint for sterilizing vaccines has been first conceptualized way back in the 1920s and 1930s by social scientists of the Rockefeller Foundation. Although later the eugenic language (“anti-fertility vaccine”) was polished up with the help of some linguistic plastic surgery producing the term “*immunological contraceptive*”, the ultimate goal remains the same.

Part 1 of this thread had only been posted four or five hours when Dr. Paul Craig Roberts piece below showed up in my email. I subscribe to Dr. Roberts daily posts. Dr. Roberts is an American economist and author. He formerly held a sub-cabinet office in the United States federal government as well as teaching positions at several U.S. universities. Dr. Roberts had a poignant article today that speaks to the tragic but criminal side of this Genocide issue which will be before the world public in its second round. Unless people wake up to the reality of what has happened they will be at greater risk of the next vaccine. Even Bill Gates said *“the next virus will get your attention”*.

*The Deafening Silence About the Vax*

[August 7, 2023](#)

The Deafening Silence About the Vax

Paul Craig Roberts

Here is a small collection of reports from the last day or two documenting the extreme danger of the Covid “vaccine.” Independent medical scientists, which means medical scientists not on Big Pharma’s payroll, grant list, or subject to control or influence by Big Pharma-associated colleagues, administrators, employers, have proven conclusively that the Covid “vaccine” is far more dangerous than the Covid virus engineered by Tony Fauci’s NIH grants to the University of North Carolina and the Wuhan Laboratory in China.

There are various explanations available about who released the Covid virus and where. As best as I can conclude, it was released everywhere at the same time, because it simultaneously appeared worldwide before it had time to make the rounds.

This indicates that the “pandemic” was intended and orchestrated. A large number of professional bodies and governments cooperated. What does this tell us about the veracity of the explanations that we are given?

It tells us that everything a Western government and associated organizations and the Western media say is a lie. What we are told are official narratives that serve the agendas of the ruling elite in the West.

The people no longer count. Accountable government no longer exists in the West.

Western governments censor and imprison truth tellers and require acceptance to their official false narratives unless you want to be fired and be canceled. The media, including social media, enforces censorship. If you think you are hearing anything correct from CNN, NPR, NYT or any of the rest of the whole media, you are out of your mind. The media serves to brainwash and indoctrinate and make you useless in the fight for freedom, which is exactly how the ruling elite want you.

What you need to know about the Vax:

Infant Vaccines Linked to Increase in All-Cause Mortality, New Research Shows

[https://childrenshealthdefense.org/defender/infant-vaccines-all-cause-mortality/?utm\\_source=luminate&utm\\_medium=email&utm\\_campaign=defender-wk&utm\\_id=20230806](https://childrenshealthdefense.org/defender/infant-vaccines-all-cause-mortality/?utm_source=luminate&utm_medium=email&utm_campaign=defender-wk&utm_id=20230806)

If you think I am jesting about getting ready for the next phase or the powers at be would not do it again, you are sadly mistaken. You are either unaware of what virology can do today or you are part of the “woke” generation. The head of the World Health Organization has been releasing statements to the effect that there are now a couple unknown viruses being reported in different parts of the world. They have already announced a decade of viruses is in the cards for the world. The link to that plan is in the next to the last link above by Dr. Paul Roberts.

The web site ‘All News Pipeline’ posted further evidence on its post for Monday, August 7<sup>th</sup>, 2023 that the Covid Operation is a Sovereign State Genocide End Game!

**August 7, 2023**

**Full Breakdown Of The Ongoing Covert Ops To 'Cull The Herd' - Alarming Proof The CIA, Rockefeller Foundation And DOD Are Directly Tied To Deagel's Apocalyptic 2025 Depopulation Forecast**

**- Official Excess Death Figures Prove They're Exterminating Humanity**  
[By Expose-News](#) and [All News Pipeline](#)

In a world where reality often seems stranger than fiction, the machinations behind global events can be an enigma wrapped in mystery.

One such intrigue revolves around Deagel.com, an obscure online entity known for its exhaustive data on military capabilities and eyebrow-raising depopulation forecasts for 2025.

**We can reveal that recent findings appear to link Deagel directly to significant players on the world stage: The Central Intelligence Agency (CIA), the U.S. Department of Defense (DoD), and The Rockefeller Foundation.**

And current real-world data on excess deaths in the West strongly suggest Deagel's depopulation forecast is not just an estimation but in fact, a target that is on track to be hit thanks to the deadly effects of Covid-19 vaccination.

[Source](#)

*Dr. Edwin A. Deagel Jr.*

**The Man Behind Deagel:**

We can confirm that Dr. Edwin A. Deagel Jr., who passed away on February 16th 2021, is the confirmed figurehead authorities would like you to believe is solely behind Deagel.com.

During his life, Dr. Edwin served as the Assistant to the Secretary of Defense and the Deputy Secretary of Defense. He was also the Director of International Relations for The Rockefeller Foundation, an influential global philanthropic organization.

[Extract from the book 'The Future of the International Oil Market' published by the 'Group of Thirty'](#)

While in 1993, Deagel [was nominated by President Bill Clinton](#) to be Under Secretary of the Air Force.

But the intrigue deepens.

[Declassified documents](#), released via Freedom of Information Act requests, reveal Deagel's communication with the then United States Director of Central Intelligence, Stansfield Turner, hinting at a relationship with the CIA.

One document, [dated 1977, intriguingly refers to an event](#) described as "*the most significant in the intelligence field since 1947.*"

The [full letter to then CIA Director Stansfield Turner](#) from Dr. Edwin A. Deagel Jr., the Deputy Director for International Relations for The Rockefeller Foundation

The [full letter to Dr Edwin A. Deagel Jr.](#), the Deputy Director for International Relations for The Rockefeller Foundation from then CIA Director Stansfield Turner.

The CIA has released [23 FOIA articles relating to Dr Deagel](#), the Rockefeller Foundation, the U.S. DOD and the former director of the CIA.

This strongly suggests that **Deagel.com isn't just the work of one man, but is in fact the work of a U.S. Military Industrial Complex consisting of the CIA, the U.S. Department of Defense and the shady Rockefeller Foundation. Making its apocalyptic depopulation forecasts all the more concerning.**

**Deagel's Forecasts & Current Events:**

Deagel's apocalyptic depopulation forecasts for 2025 predict significant population declines in various countries, stirring unease given the current excess death data being recorded around the world. I saved this back2017

Home : Country Listing : United States of America Last Updated on 6 March 2020 08:23

**By 2025 Deagel predicts US population will be reduced from 327 to 100 million.**

Deagel.com's [infamous] 2025 forecast was removed from their website in 2020. However, thanks to the Wayback Machine / Internet Archive, we are able to view the original predictions before discovered by critical thinkers.

Deagel [predicted in 2020](#) that the United Kingdom would see its population decline by 77.1% by the year 2025.

[Deagel predicted in 2020](#) that the United States would see its population decline by 68.5% by the year 2025.

[Deagel predicted in 2020](#) that Germany would see its population decline by 65.1% by the year 2025.

[Deagel predicted in 2020](#) that Australia would see its population decline by 34.6% by the year 2025.

While [also predicting](#) a huge decline among many other Western countries.

A **[full list of Deagel's original apocalyptic depopulation predictions can be viewed here.](#)**

Regrettably, the unfolding events strongly suggest that ***Deagel's ominous depopulation estimates may not be merely speculative. Real-world data appear to align disconcertingly with these figures, primarily driven by the severe and deadly consequences of Covid-19 vaccination.***

But the widespread distribution of these experimental vaccines, allowed under emergency use authorization, would not have been possible without the backdrop of the Covid-19 pandemic.

***So the fact the U.S. Department of Defense (DoD) issued a 'COVID-19 Research' contract in Ukraine, three months prior to the official recognition of the Covid-19 virus, raises some seriously unsettling questions.***

***Epecially when we consider the U.S. Department of Defense is now known to be intricately connected to Deagel.com, along with the CIA and The Rockefeller Foundation.***

### ***The U.S. DoD Factor:***

The world first started to hear about a novel coronavirus in early January 2020, with reports of an alleged new pneumonia-like illness spreading across Wuhan, China.

However, the world did not actually know of Covid-19 until February 2020, because it was not until the 11th of that month that the World Health Organization officially named the novel coronavirus disease; Covid-19.

Country	2019 Pop	2025 Pop	Survivor Rate

When asked about a “COVID-free” future in a recent interview, NZ Director-General of Health Ashley Bloomfield responded that COVID is now part of our

future, we should see restrictions continue for “*Three to five years*”. So, 2025 or thereabouts? Bloomfield’s comment was, to me , just the latest in a long line of hints that something big, and rather sinister, is brewing over the next few years, and it will pave the way for the UN 2030 Agenda.”

by Martin Harris 12/9/21

So with this being the official truth, why does United States Government data show that the U.S. Department of Defense (DoD) awarded a contract on the 12th November 2019 to Labyrinth Global Health INC. for ‘COVID-19 Research’, at least one month before the alleged emergence of the novel coronavirus, and three months before it was officially dubbed Covid-19?

The Government of the United States has a website called [‘USA Spending’](#), an official open data source of federal spending information. According to the site as of 12th April 2021, the US Government has spent a mind-blowing \$3.63 trillion “in response to COVID-19”. But that’s not the only information on Covid that can be found on the site.

Hidden within the ‘Award Search’ are [details on a contract awarded by the Department of Defense to a company named ‘Black & Veatch Special Projects Corp’](#), which is allegedly “a global engineering, procurement, consulting and construction company specialising in infrastructure development”.

The contract was awarded on September 20th, 2012 and is described as “Professional, Scientific, and Technical Services”.

The ‘Award History’ for the contract contains a tab for ‘Sub-Awards’ detailing the recipients, action date, amount, and very brief description for 115 Sub-Award transactions. Most of the Sub-Awards are extremely mundane for things such as “laboratory equipment for Kyiv”, or “office furniture for Kyiv”.

But there is one Sub-Award that stands out among the rest, and it was [awarded to Labyrinth Global Health INC](#) for “SME Manuscript Documentation and COVID-19 Research”.

An award for Covid-19 research isn’t exactly shocking when the world is allegedly in the grip of a Covid-19 pandemic, but considering the fact **the sub-contract was awarded on 12th November 2019, at least one month before the alleged emergence of the novel coronavirus, and three months before it was officially dubbed Covid-19, the award for Covid-19 research should come as a shock to everyone.**

But the shock doesn’t end there, because **the place the contact for Covid-19 research was instructed to take place was Ukraine, the very country that the U.S. Military Industrial Complex is currently using to fight a proxy war against Russia. The Rockefeller Factor:**

While Dr. Deagel's links to the Rockefeller Foundation, CIA, and DoD provide a gripping backstory, the Rockefeller Foundation's role adds a layer of complexity.

A powerful entity since 1913, its alleged mission to “*promote the well-being of humanity throughout the world*” has shaped global health policies and led to a significant influence in the creation of the World Health Organization (WHO). But this influence hasn't been without controversy.

The **Rockefeller Foundation's historical entanglement with population control and eugenic programs remains a contentious chapter in its legacy.** Its support for these initiatives during the early 20th century presents a disconcerting portrait of the Foundation's role in manipulating human demographics.

**Eugenics, a field now widely discredited and dismissed as pseudoscience, aimed to improve the genetic composition of the human race through selective breeding.** The Rockefeller Foundation's monetary and ideological support for these programs indicates an ethically questionable engagement in directing human evolution and societal composition.

The population control initiatives, **framed as efforts to manage global population growth for sustainable development and resource conservation,** also bore the Foundation's signature. Critics argue that such activities echoed an overreach, hinting at an assumed authority to control the demographics of global populations.

Although the Foundation has since publicly disavowed such measures and appears to have redirected its focus towards universally accepted areas of public health, education, and the arts, the echo of its past actions remains.

**The Rockefeller Foundation's past involvements offer invaluable lessons about the potential consequences of unchecked influence** and a poignant insight into the organization's considerable sway over global human affairs. Despite the change in focus and approach in recent years, the effects of past endeavors underscore the caution we must exercise when philanthropic entities wield influence on a global scale.

#### **Deagel's Depopulation Forecasts are a Target**

The revelations linking Deagel to Dr. Edwin A. Deagel Jr., the CIA, DoD, and The Rockefeller Foundation, paint a compelling, if disconcerting, narrative.

These **high-profile connections suggest a level of influence that raises questions about the motivations behind Deagel's apocalyptic population forecasts.**

**Especially when we consider the fact real-world data currently aligns with Deagel's 2025 predictions.**

Official reports from multiple Governments across the globe have sounded the alarm bells by documenting an unprecedented number of excess deaths since the widespread

administration of Covid-19 injections. Official figures provided to EuroMOMO by the UK Government and 26 other Governments of countries across Europe reveal that most of the continent suffered 375,253 excess deaths in 2021 and 404,6000 excess deaths in 2022.

This equates to 779,853 excess deaths over the two years. The figures do not include Ukraine so cannot be blamed on the ongoing war.

Australia suffered 11,068 excess deaths in 2021 and then a shocking 22,730 excess deaths by week 38 of 2022. This is in stark contrast to 2020, when only 1,306 excess deaths were recorded at the height of the Covid pandemic and prior to the rollout of the Covid injections.

This means **Australia suffered a shocking 1,640% increase in excess deaths in just 39 weeks** throughout 2022 compared to 53 weeks throughout 2020.

New Zealand suffered 2,169 excess deaths in 2021 and then a shocking 5,286 excess deaths by week 49 of 2022. These are shocking figures for the small island with an estimated population of 5 million people.

Especially when compared to 2020, when no excess deaths were suffered and 160 fewer deaths were actually recorded than expected at the height of the Covid pandemic and prior to the rollout of the Covid injections.

This means **New Zealand suffered a shocking 3,404% increase in excess deaths in 49 weeks** throughout 2022 compared to 53 weeks throughout 2020.

In Canada, the situation is similarly concerning.

The country suffered 35,318 excess deaths in 2021 and then 25,333 excess deaths by week 34 of 2022. This compares to 31,042 excess deaths in 2020 by week 53.

However, when looking at the figures up to week 34 in both 2020 and 2021, it becomes clear that 2022 has in fact been the worst year for excess deaths by far. By week 34 of 2020, Canada had recorded 17,888 excess deaths.

By week 34 of 2021, Canada had recorded 18,498 excess deaths. But by week 34 of 2022, Canada had recorded 25,333 excess deaths, **representing a 42% increase on the excess deaths recorded in 2020**, prior to the roll-out of the Covid-19 injections.

This dramatic increase in excess deaths raises serious questions about the safety of the Covid-19 vaccines and whether they may have been a contributing factor to the increase in excess deaths.

The USA suffered 674,954 excess deaths in 2021, and then 434,520 excess deaths by week 49 of 2022. This equates to over 1.1 million excess deaths in nearly two years.

The USA suffered a staggering 674,954 excess deaths in 2021, a year that saw the country coerced into coming forward to get injected multiple times throughout the mass roll-out of the Covid-19 vaccines. These numbers represent a significant increase in deaths compared to previous years and have raised alarm bells among the public and healthcare professionals alike.

The situation did not improve in 2022, with 434,520 excess deaths recorded by week 49, bringing the total number of excess deaths to over 1.1 million in nearly two years.

This is a staggering number and has led to questions about the effectiveness of the vaccine and the government's response to the alleged pandemic.

The official narrative put forth by governments and health organizations has been that deaths in 2020 increased due to the outbreak of the alleged Covid-19 pandemic, with the response to it adversely affecting millions of people worldwide.

However, as the pandemic progressed and a vaccine was developed and distributed, the narrative shifted to focus on the safety and effectiveness of the Covid-19 injection as a means to curb the spread of the virus and reduce the number of deaths.

This narrative was reinforced through various propaganda campaigns, public statements, and official statements, with the message that the vaccine was "*safe and effective*" and would be "the key to ending the pandemic".

However, the figures and official reports released by governments in the USA, Canada, Australia, New Zealand, the UK and most of Europe have shown that the opposite has happened, with **millions of excess deaths being recorded since the mass roll-out of the Covid-19 injections.**

This has led to many questions about the safety of the vaccine, the facts of the official narrative, and the integrity of Governments and Public Health bodies around the world.

The figures have been provided to both the [Organization for Economic Co-Operation and Development \(OECD\)](#) and [EuroMOMO](#) by each country's Government organizations. The U.S. data has been provided by the Centers for Disease Control. The UK data has been provided by the Office for National Statistics. And Australia's data has been provided by the Australian Bureau of Statistics.

So these aren't independent estimates. **They are official Government-authorized figures.**

And they show that the 'Five Eyes' countries and 26 other countries across Europe suffered 1.99 million excess deaths up to week 34/49 of 2022 following the Emergency Use Authorization of the Covid-19 injections. The WHO now admits to 20 million excess deaths as recently as early as the second quarter of 2023.

**These figures cast a haunting shadow over the narrative surrounding the pandemic and raise concerns about the true impact of vaccination efforts.** Especially when coupled with mortality rates per 100,000.

**Mortality Rates per 100k are Lowest among the Unvaccinated**

Official figures published by the UK Government suggest that **Covid-19 vaccines may have been the biggest contributing factor to the millions of excess deaths** seen across the 'Five Eyes' and most of Europe.

The figures can be found in a report titled '[Deaths by Vaccination Status, England, 1 January 2021 to 31 May 2022](#)', and it can be accessed on the ONS site [here](#), and downloaded [here](#).

Table 2 of the report contains the monthly age-standardized mortality rates by vaccination status by age group for deaths per 100,000 person-years in England up to May 2022.

We took the figures provided by the ONS for January to May 2022 and produced the following charts which reveal the horrific consequences of the mass Covid-19 vaccination campaign.

The following chart shows the monthly age-standardized mortality rates by vaccination status among 40 to 49-year-olds for Non-Covid-19 deaths in England between January and May 2022 –

In every single month since the beginning of 2022, partly vaccinated and double vaccinated 40 to 49-year-olds have been more likely to die than unvaccinated 40 to 49-year-olds.

The worst month for mortality rates among the partly and double vaccinated compared to the unvaccinated was February. This month saw partly vaccinated 40-49-year-olds 264% more likely to die than unvaccinated 40-49-year-olds.

Whilst double-vaccinated 40-49-year-olds were 61% more likely to die than unvaccinated 40-49-year-olds.

By May 2022, five months after the mass Booster campaign, triple vaccinated 40-49-year-olds were 40% more likely to die than unvaccinated 40-49-year-olds, with a mortality rate of 81.8 per 100k among the triple vaccinated and a mortality rate of 58.4 among the unvaccinated.

It's the same old story in every single age group as you can see from the following two charts –

A full breakdown of the figures by all age groups [can be viewed here](#).

### **Covert Operations?**

As we venture deeper into this unfolding enigma, we confront a trifecta of powerful entities – the CIA, DoD, and The Rockefeller Foundation – whose past actions and present influence cast a long shadow over our global narrative.

When these entities emerge from behind the veil of Deagel.com, what might initially have been dismissed as wild conjecture now calls for sober consideration.

The evidence that suggests the DoD, intimately tied to Deagel.com, may have had an anticipatory hand in COVID-19 research months before the virus's official recognition is, at the very least, curious.

This odd timing coupled with the DoD's expansive reach on matters of global security prompts us to question the broader implications and the role they may have played in the unfolding pandemic.

The Rockefeller Foundation, another significant force behind Deagel.com, has a historical track record of involvement in population control programs. While these endeavors are allegedly relegated to the past, their implications continue to resonate, particularly when paired with Deagel's disturbing population forecasts for 2025.

Similarly, the CIA, notorious for its covert operations and functioning often as a law unto itself, stands as a powerful and enigmatic piece of this intricate puzzle. Its involvement with Deagel and its shared links with Dr Edwin A. Deagel Jr., and by extension, the DoD and The Rockefeller Foundation, adds another layer of intrigue to this narrative.

These pieces of evidence and connections warrant vigilant scrutiny of the actors operating behind the curtain of global affairs. As we dissect the intricate web of relations between these entities and their associations with Deagel's dire depopulation forecasts, we're reminded of the potential influence they wield over our shared future.

In our quest to understand the truth, the lines between factual happenings, covert operations, and speculation become increasingly critical, yet convoluted. But it's in this very complexity that the urgency of our vigilance and understanding is underscored. For in the balance hangs our ability to navigate the future, informed, aware, and with eyes wide open.

Blessings,
