

# The Human Target – Directed Energy Weapons and Electronic Warfare

A few weeks ago I had an experience that proved to be both a blessing and a curse. On March 2<sup>nd</sup>, 2023, we were hit with the effects of a category 1 tornado. I had been monitoring my weather radar on behalf of our daughter-in-law who was working on renovating a mobile home they had bought at a sheriff's sale. Since they were aware of a storm they did not want to get caught unaware of serious weather issues. I was relaying that morning radar sightings to my wife who then shared by cell phone any important news. The rain storms cleared the area by 2pm, but the weather radar showed winds of 70-mph pushing through behind it.

At 2:39pm we lost power on Friday, March 2<sup>nd</sup>, 2023. My computer logged the time when the article I was writing on was autosaved when the power went out. For the better part of five days we were without power. We lived by candle light and wore additional layers of clothing day and night. Electrical utilities came from as far away as Louisiana to handle 40,000 customers in the Nelson County, KY area. Reports showed that nearly 2-million customers in KY had been without power during the week. Family members brought in hot take-out food, and then brought in small portable generators to provide power to our refrigerator and basement freezer. While we had food in the refrigerator we could not risk losing what he had in the refrigerator. Our residence uses oil for heat but electricity controls the thermostat and we had a taste of what an EMP might bring us some day.

I read a lot during the day, I always have books still to read, and I managed to read two of my unread books during the power outage. We had to limit our cell-phone use without power to recharge the batteries. The huge poplar trees in our front yard and back were snapped off and some were ripped right out of the ground. The utility pole across the street from our driveway was snapped off at the transformer height, the transformer was hanging from the pole and all of its PCBs leaked out onto the road. The winds ripped shingles off our residence, took part of the roof of the church next door. My wife said the church and Sunday school section had a lot more damage than she first thought.

As I noted this experience had a hidden blessing as well as a curse throughout the experience. The blessing came for me within an hour of the event. I have Lymphedema in both legs below the knees. I live with excruciating pain day and night. We were so awed by the trees coming down or being ripped from the earth. These poplar trees surrounding our side of the road were sixty feet tall. It was a surreal moment watching this all occur, we did not have time to think about what to do next. We did not have time to react in fear; it was almost like a dream. About 4pm I noticed that the pain in my feet and legs was absent. I commented to my wife about it and by the next day, I was actually flexing my feet and legs while getting about with my walker. She was keeping our granddaughter entertained and focused on her homework

assignments. She was off school that day for a teacher's in-service day. Our road was closed off to traffic because of downed power lines up and down the street. People were beginning to clean up their yards from all the debris and trees. The hidden blessing was that I now had confirmation that the Lymphedema pain came from the Wi-Fi wireless EMF/EMR. For the entire period without electricity, I was totally pain-free.

Years ago we had Verizon Wi-Fi installed on June 10, 2010 back in Turtle Creek, PA and five days after it was installed, my legs broke out in blisters that began to leak Lymph fluids. When that happened, I went to the UPMC McKeesport, PA hospital ER where they admitted me. And for six days they ran every kind of test you can imagine and at the end of the hospital stay, the physicians had no answer to what caused the blisters and leaking. Six different doctors gave me their business cards and said to call and make a follow-up appointment. Sure I will, not!

My wife and other family members were shocked by my sudden unexplained recovery and I can say no one around us refutes the effects of Wi-Fi wireless EM/EMR. But that blessing was short-lived five days. Once power was restored and I began to resume my computer activities, it was but a few hours, five at most before the curse of Wi-Fi had returned. The pain was back, the loss of leg muscle, feeling had returned. I had my wife text our one grandson who is an IT worker for Humana in Louisville and asked him to at his first opportunity to come over and hard-wire my computer. Since he hard-wired my computer and our Wi-Fi router, my pain has been less or reduced but still an issue that I have to deal with. I have 2 cell towers within 2,000-ft of my residence. I still find weather fronts, and atmospheric pressure impacting my pain level. I remember when the utility crew was finishing their repairs and about to throw the bar that restores power, my thoughts were mixed. My wife said she was not prepared to live off the grid.

Last Friday, my VA home visiting nurse made her monthly visit and I shared my experience with her and told her to share that with her peers and team. My wife confirmed to her the experience of which I have shared and I have confirmed that Wi-Fi was and is the cause of my Lymphedema.

Although this is a personal account, it is part of a larger study that I became engaged in since the fall of 1996. I had read an interesting article in the McKeesport Daily News about Bee colony collapse. That newspaper article began an almost thirty year study of wireless energy and its impact on our world. In the past five years I believe I have written or shared more than 150 articles on **5G** and wireless energy concerns.

I pulled from my files an article by Suzanne Maher written on October 25, 2017. I saved the information as a reference point to share with those I know about what we are up against.

*By Suzanne Maher*

**The Human Target – Directed Energy Weapons and Electronic Warfare**

A subject that is getting more and more attention from people all over the world is deliberate electromagnetic targeting of people. A neural rape or assault on people's bodies and brains developed from classified military technology. More often now, people are valiantly speaking out about being a "Targeted Individual".

This is a subject that has not surprisingly received little to no attention from the corporate owned media. It is disconcerting enough that the world is now saturated in dangerous elf/ulf/vlf/rf/ and so many other types of frequency waves which permeate our bodily tissues causing serious degradation of our health. There is also a Military Intelligence Program that is gaining worldwide recognition which uses these "smart grid" frequencies to target individuals.

### ***Electronic Warfare and the Targeted Individual***

Electronic warfare is defined as any military action involving the use of electromagnetic and directed energy to control the electromagnetic spectrum to attack the enemy. The Navy calls this "*electromagnetic battle management*". Who would that enemy combatant be; a person or persons that is seen as so seemingly dangerous or threatening to the power structure?

That enemy would be you and I...

For those unfamiliar with the term "*TI or Targeted Individuals*", it is important to note there are different methodologies that the functionaries or agents apply to targeted individuals carried out by various government programs or agency initiatives. This article discusses individuals targeted by; remote neural monitoring, mind control, brain mapping, gang stalking, implants, voice to skull technology (V2K) which beams frequencies into the head, and nervous system manipulation 24 hours a day. Targeting can be covert, or overt.

This classified technology has been created by governments and military and used on its own citizens. Helpless citizens which have been victimized by BILLION DOLLAR

government funded technology designed for quiet wars, to create harm. What the powers that be are looking for is RESPONSES, which they can track, measure and log. This in effect, is an omnipresent electromagnetic gulag in the privacy of your own home, workplace, or streets.

Funding for many experiments has been provided by the United States Government, particularly the United States Military, the Central Intelligence Agencies and private corporations involved with military activities. These human research programs have been highly secretive, and in many cases information about them was not released until many years after the studies had been performed. After the incidents are exposed, the standing President is trotted out to issue a counterfeit apology, as if apologies somehow make up for the destruction of lives.

Targeting can be done by radio-frequency weapons, high powered microwave technology and acoustic technology. These are deliberately orchestrated attacks and TI's will suffer from these assaults even when exposure to frequencies are reduced. Some TI's report that the constant barrage of electromagnetic radiation also brings with it multiple chemical sensitivity.

Unethical human experimentation has been conducted on citizen for decades, and we have seen large swaths of the population being subjected to cruel and inhumane treatment, often the sick and vulnerable and economically depressed.

One example of this unethical government research was the classified human radiation experiments conducted on over 4,000 innocent American citizens during the Cold War. These and a number of other clandestine human experiments are discussed in this article by Alan R. Cantwell Jr., M.D.

***THE HUMAN RADIATION EXPERIMENTS — How scientists secretly used U.S. citizens as guinea pigs during the Cold War***

<http://whale.to/a/cantwell9.html>

The elites have their warfare covered, microwave targeting is one more assault on our individual person hood. Mutagenics, transgenics, epigenetics, endocrine disrupters, free radical and radiation damage. When we now look at our world we see the multi-pronged attack of the chemical spraying of our skies, genetically modified food stuffs, vaccines, fluoride and "*microwave targeting of peoples*".

Our bodies and brains may be accessed to harass and torment us in the New World Order and Smart Grid Infrastructure. We the people are guinea pigs of technology and test subjects for many government experiments.

Project Pandora is an early example of a U.S. Government microwave experiment on animals from 1965 to 1970;

<http://www.topsecretwriters.com/2013/09/project-pandora-and-us-government-microwave-experiments-on-animals/>

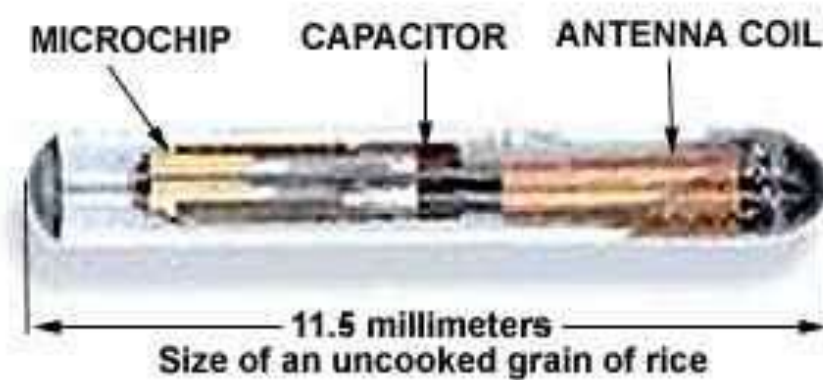

The use of hidden directives such as 'DOD Directive 5240.1-r – Procedure 13 Human Experimentation for Intelligence Purposes' allows for the testing and evaluation of any technology on any U.S. Person and those foreigners living on U.S. soil. This 'directive not law' has been unethically and inhumanly passed from agency to agency and contractor to contractor resulting in TORTURE TESTING ON HUMAN BEINGS (defined as U.S. Persons).

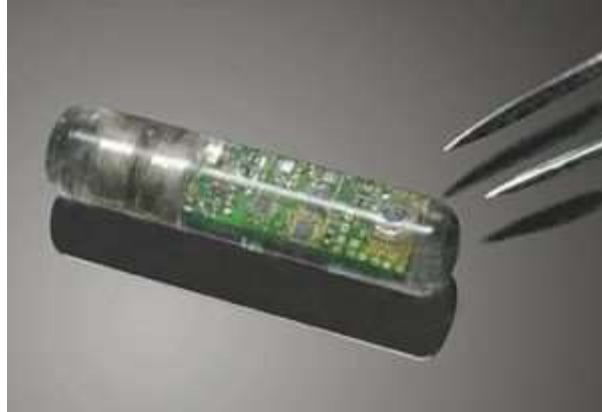

Anyone who is part of the new media, the truther movement, or a front line activist, will most likely have experienced some kind of targeting. The general population at large is also subjected to microwave targeting.

We all have been sprayed with micro processors, micro sensors, nano bots, smart dust, etc., from the chemical engineering of our skies and the manipulation of our weather. Nano is a Greek word which means "Dwarf". A nanometer is a billionth of a meter and this tech is so small it can fit inside a blood vessel, our bodies and brains have no firewall against this nano technology . It is simply a matter of "activating or turning on" the Program that has been implanted in our bodies with the use of frequencies or DEW's. We are all vulnerable to this type of attack and some TI's have had implants show up in various scans and x-rays. Implants are capable of transmitting voice signals, high voltage pulses, emitting a small tracking beacon signal, or other unspecified uses.

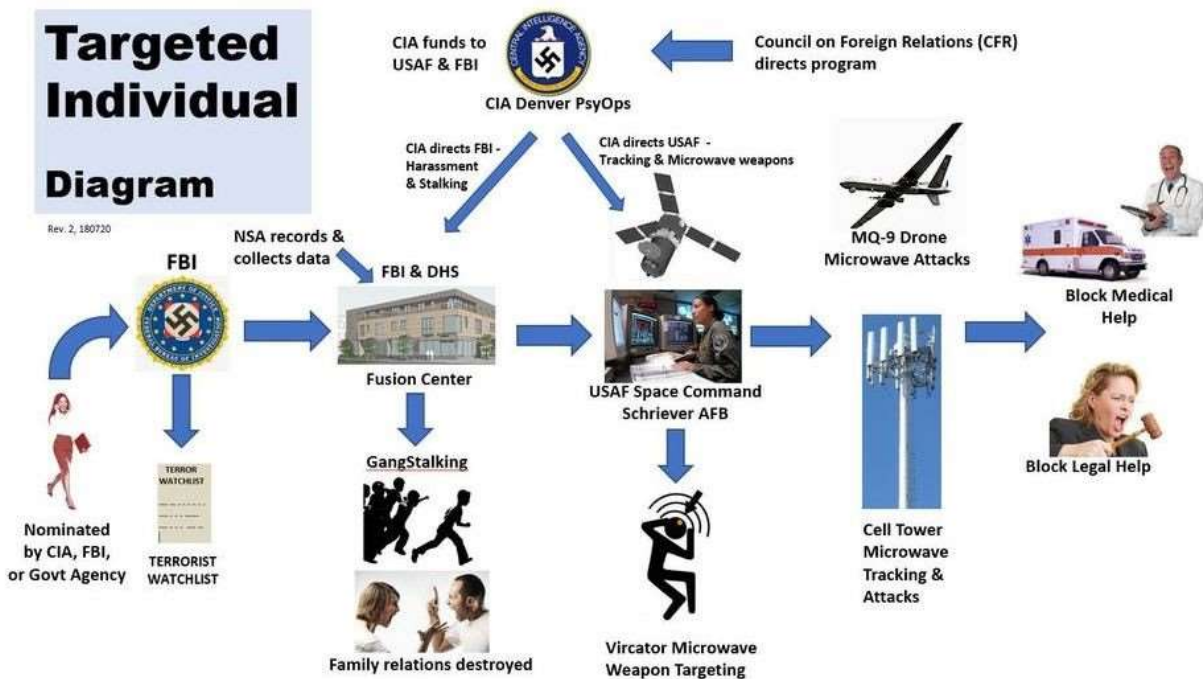

*Thank you to Advances Electronic Security Company for these photos*

## COMPONENTS OF THE BIOCHIP

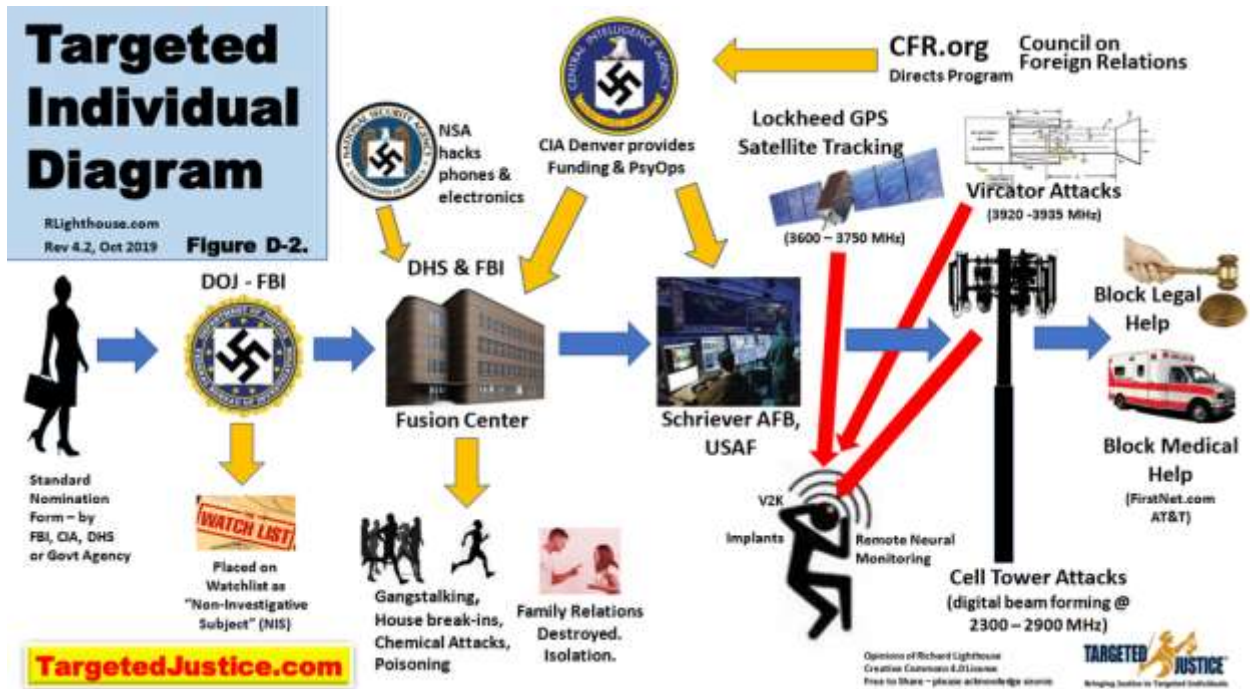

This technology which is networking inside us, is the Program which allows the powers that be to have full scale access to our brains and our bodies to manipulate as they wish. This is the New World Order System of Artificial Intelligence, Smart Grid Infrastructure and The Internet of Things. The engine the world is now running on is derived on the premise of “keeping the Program in tact”. Attempting to separate us from consciousness and severing our neural network.

With the advent of **5G** technology, microwave radiation will be increased exponentially using small millimeter waves small cell deployment. This could mean wireless antennas on every lamp post, utility pole, home and business throughout entire neighborhoods, towns and cities. It does this by using largely untapped bandwidth of the millimeter wave (MMW), which is between 30GHz and 300GHz, as well as some lower and mid-range frequencies. GHz is a unit of frequency equal to one billion hertz. Humans oscillate at approximately 7.83 hertz otherwise known as the Schumann

Resonance. Since our bodies resonate at a very low hertz, they simply cannot handle the inundation of this microwave technology. A bodily inferno created by an unregulated, unapproved, lay it down everywhere tech. Moreover, with this updated **5G** tech, it will allow the Program now being activated in our bodies to take on a much more aggressive role, because the AI feeds off these frequencies.

Dangers to the human brain and body from electromagnetic radiation are immeasurable, the scale is so large. Dr. Elizabeth Plourde of emffreedom.com says that; "We can liken this assault to being machine gunned. All of our cells are getting holes and leaking, our blood brain barrier is getting holes and leaking and our gut is leaking. "

***Electromagnetic and Radiofrequency Fields Effect on Human Health***

[https://www.aemonline.org/emf\\_rf\\_position.php](https://www.aemonline.org/emf_rf_position.php)

***Artificial Intelligence and Mind Control***

The Artificial Intelligence Program can and will induce anything it wishes. It can be a disease, emotional distress, brain targeting, and genital targeting. Our moods and emotions are being manipulated and controlled through Artificial Intelligence and work in concert with these frequencies.

Ask yourself when you feel lower vibratory emotions of; disgust, fear, anger, violence, sexual thoughts, jealousy, etc., are these my own emotions, or implanted emotions through these frequencies and the AI technology?

The frequency hit will induce a physiological, emotional, physical response, attacking

brain waves. Unless people know about Targeted Individuals and the Artificial Intelligence Program, they will not understand these invasions. The Artificial Intelligence is overriding us and our cellular matrix. The program can do virtually anything it wishes. Mind control is a frequent report from targeted individuals. Torture is also a frequent report from TI's. Many tactics and means are employed. There are a number of ways to target individuals; electronic telepathy, microwaves and electromagnetics, holography, lasers, radio frequency energy beams, satellites, and radar to name some. Targeting of people in this manner using directed energy weapons will prompt extreme distress and may lead to get them diagnosed as schizophrenics so they will be marginalized and maligned by friends, family and community.

*One well known individual targeted with directed energy weapons is Dr. Katherine Horton;*

<https://vid.me/TfySn>

This is silent, encroaching warfare, dripping like a slow running faucet, and many find it difficult to come to terms with the fact that it actually exists and our governments would be criminal enough to use it against populations. This experimental warfare is done under the cloak of National Security, which is always a cover for plausible deniability. **Elana Freeland**, author and researcher of the book *“Chemtrails, HAARP and the Full Spectrum Dominance of Planet Earth”* has in depth knowledge on the subject of targeted individuals. She personally knows a number of TI's and also ghost writes for some.

Freeland discusses in her very detailed essay Directed Energy Weapons For Political Control, in Nexus Magazine, “The Non-Lethal’s” You Don’t Hear About, and says this; “Then there are the EM weapons that are even less public because they are used covertly for political control in quiet war against populations, dissidents and individuals displeasing to various powers that be. Examples include laser systems (free electron, x-ray, neutral particle beam, chemical oxygen iodine, mid-infrared advanced chemical laser, etc.) delivering blurred vision and holograms, ion-beam plasma and augmented reality mind control delivered by satellites that first track targets via their bio-energetic signatures and then couples plasma with their EM fields; and of course non aural carriers that directly induce silent, subliminal messages into the brain, often known as voice to skull (V2K) or synthetic telepathy. In line with Cold War secrecy and deceit, thousands of non consensual human subjects have been used for target practice of weaponized electromagnetics.”

Freeland goes on to say; *“In homes and walls, offices across the nation millimeter wave scanners are penetrating walls, looking for target brains for microwave transmitters to beam specific mood inducing excitation potentials into. Other people in the room will be oblivious to the fact that an excitation potential for suicide or murder is resetting the brain of their friend or relative for depression or rage. (This technology may have been behind the “suicides” of political activist Abbie Hoffman, singer Kurt Cobain, journalist Gary Web, etc., etc.,)”*

U.S. Patents also attest that the capability is there to target individuals with frequencies;  
*Nervous system manipulation by electromagnetic fields from monitors*

US 6506148 B2

<https://www.google.com/patents/US6506148>

*"Voice to Skull" Microwave Device – U.S. Patent 4,877,027*

Thank you to Clyde Lewis of Ground Zero for this photo depicting how Voice to Skull Microwave is used

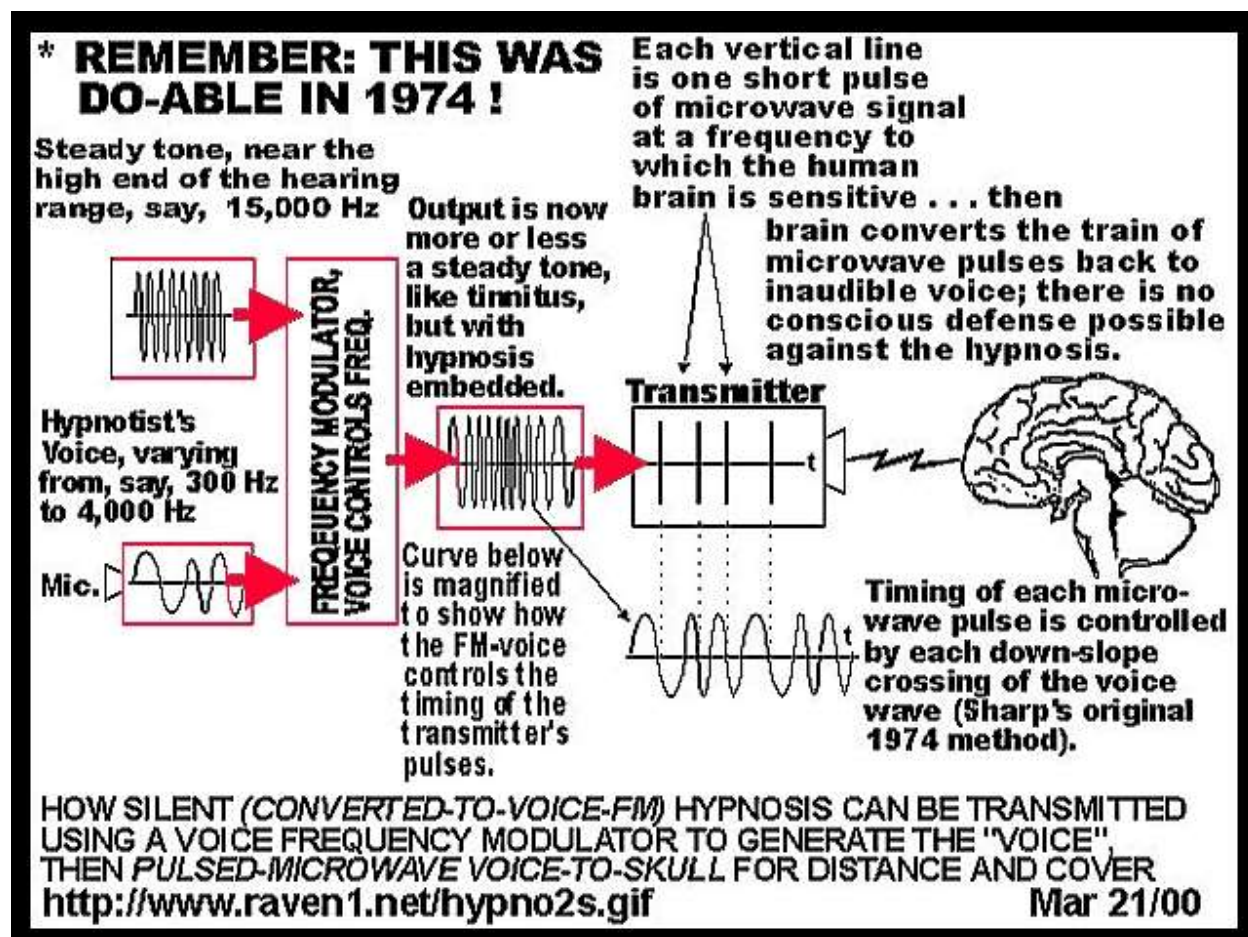

Extremely low frequencies and microwaves can cause agitation in humans and these frequencies have been known to cause serious illness and eventual death. Moreover, mind control through sound wave technology would be the ultimate non-lethal weapon; stealth warfare. Remember, this experimentation is to log, monitor, track and assess an individual's response to this electronic harassment. The Orwellian Nightmare come to fruition.

It's clear that we have a shadow government that is puppeteering this psychotronic fantasy. In a book written by Zbigniew Brzezinski (co-founder of the Trilateral Commission), entitled *Between Two Ages: America's Role in the Technotronic Era* published in 1970, he writes; *"Speaking of a future at most only decades away, an experimenter in intelligence control asserted, "I foresee a time when we shall have the means and therefore, inevitably, the temptation to manipulate the behavior and intellectual functioning of all the people through environmental and biochemical manipulation of the brain."*

The elites and their minions have been marching to the beat of their "Brave New World" for decades.

READ THE REST:

<https://byebyebluesky.com/the-human-target-directed-energy-weapons-and-electronic-warfare/>

The latest figures by the telecom industry show that there are now in operation around the world just over 132,000 **5G** cell towers, and continuing to grow by the week. The web site Targeted Justice.com long ago confirmed the existence and weaponized use of targeted warfare. Another bizarre shooting story here exhibits all the hallmarks of a psychotic deranged assassin. Laying aside all the evidence, what motivates a female to randomly kill small school children? It was the 129 shooting event this year and we are only into the first three months. It begs the question could this be another "false flag" event to coerce more gun control legislation? It certainly appears that way and it would be helpful to know what psychotropic medicines the young lady may have been taking. The FBI has long been known to set-up vulnerable people to commit acts of violence. It has been strongly suspected there has been a relationship between mass shootings and SSRI Meds. Natural News reposted a lengthy report a few years ago how common it was for mass shooters to be taking Prozac, Paxil, Ritalin, Zoloft, and other

antidepressants. One need only Google relevant key words or phrases to see for themselves. [www.ssristories.com](http://www.ssristories.com) is one popular site that has documented over 4500 " Mainstream Media " reported cases from around the World of aberrant or violent behavior by those taking these powerful drugs.

On Monday March 27<sup>th</sup> a shooting at a church in Nashville by a 28-year old female resulted in the death of three students and three staff at a Presbyterian Church school in Nashville, TN. This is atypical of a hypnotized "Manchurian" candidate assassin. In this case it is a female, transgender person.

A transgender person, Audrey Hale, has been identified as the shooter. We may find that the story disappears quickly because of that. The police are working on theories for the shooting. As we noted there was a manifesto. The police are now giving some information about that. They're saying that it was a detailed manifesto to attack the academy, that there were maps, and that Hale was planning more than what happened.

*"We have a manifesto, we have some writings that we're going over that pertain to this day,"* Nashville police chief John Drake said about the discovery. He added that Hale was *"prepared to do more harm than was actually done."*

Drake said police are looking into whether Hale's identity as a trans person played a role in the deadly shooting, with investigators coming up with theories based on their findings. So it sure sounds like Hale was targeting the Christian school.

But the media is already working the spin even before all the facts are known. Even if the attacker might be transgender, it is somehow and always the fault of people on the right.

This is how crazy the left is getting now. If a shooting involves someone on the right, it is of course the right's fault. If it involves someone on the left, it's also the right's fault because somehow their evil ways must have provoked it. It's always the right's fault in the mind of the liberal media whatever the facts are. But the truth is it's always the shooter's fault. It's not the evil gun's fault.

Nashville police have released footage showing the moment a [transgender](#) 28-year-old shot down the door of a Christian school she attended as a child and began stalking the corridors, assault rifle in hand. Audrey Hale [arrived at the Covenant School in her Honda Fit just before 10am](#) and killed six people before she was shot dead.

Hale opened fire on arriving police from the second floor of the school before she was confronted by Officer Rex Englebert, a four-year MNPD veteran, and Officer Michael Collazo, a nine-year MNPD veteran. The pair returned fire and shot her dead.

Nashville police on Monday released photos of the two semi-automatic rifles and handgun she had on her. A shotgun and a sawn-off shotgun were also found at her home, they confirmed. Hale can be seen [arriving at the school and then shooting through the locked glass door](#), which shatters.

Wearing a red baseball cap worn backwards, a white t-shirt covered in a tactical vest, and combat trousers, Hale is caught on camera stalking the corridors. Her victims were killed at random, police said.

Police said Hale was transgender, although they haven't specified further details. She was born female, but a LinkedIn profile believed to be hers uses he/him pronouns, suggesting Hale was living as a man.

On Monday night they continued to refer to Hale as 'she'.

John Drake, the chief of Nashville police, said Hale left a manifesto which [suggested simmering anger at being sent to a Christian school](#).

Hale's mother, Norma Hale, worked as a coordinator at a local church and posted about religion frequently on Facebook.

*"The person we know as Audrey Hale, she's a 28-year-old Nashvillian. We have belief that she went to school in the area - at that actual school."*

*“There's some belief that there was some resentment for having to go to that school,”* said Drake, speaking to NBC News. *“Don't have all the details to that just yet and that's why this incident occurred.”*

© Metropolitan Nashville Police Department

**Police released this image of Hale on Monday**

**Audrey Hale is seen arriving at the school in her gray Honda Fit at 9:53am on Monday, driving calmly without giving any indication of what was to come**

**Hale goes from room to room inside the church, adjacent to the school, searching for victims**

Drake told NBC Nightly News with Lester Holt that the victims were random. *“She targeted random students and persons in the school - whoever she came into contact with,”* he said.

*“We feel that she identifies as trans but we are still in an initial investigation into that, and if it actually played a role in this incident. Right now we are unsure if that played a role.”* He said her manifesto has been turned over to the FBI.

*“There was a map of the school with entry points and surveillance that was going to be on that day,”* he said.

She drove to school in a car, which Nashville police said helped identify her. *“Active shooter Audrey Elizabeth Hale, 28, drove this Honda Fit to the Covenant Church/school campus this morning and parked,”* the police tweeted.

MNPD detectives searched it and found additional material written by Hale. At around 10.13am, she opened fire at The Covenant School, shooting and killing nine-year-old Evelyn Dieckhaus, William Kinney and Hallie Scruggs.

Hallie Scruggs was the daughter of Chad Scruggs, who since 2018 had served as the pastor at the affiliated Presbyterian Church.

Substitute teacher Cynthia Peak, 61, head of school Katherine Koonce, 60, and custodian Mike Hill, 61, were also killed.

She had detailed, drawn maps of the school and had been surveilling it, according to police. *“We have a manifesto, we have some writings. We have a map drawn out of how this was all going to take place,”* said Drake.

Drake said that Hale mentioned another location in her manifesto, but decided that there was too much security to launch an attack.

The small school is run by a church and does not employ a school resource officer. *“Our community is heartbroken,”* the school said in a statement issued on Monday night.

*“We are grieving tremendous loss and are in shock coming out of the terror that shattered our school and church. We are focused on loving our students, our families, our faculty and staff and beginning the process of healing.”*

President Joe Biden on Monday ordered flags to be flown at half-staff until Friday at sunset. He also reiterated his call for an assault weapons ban.

The community where Covenant School is located is one of the most affluent in Tennessee, [The Tennessean](#) reported.

The private Christian school's zip code of 37215 has one of the state's highest average household incomes, and enjoys bustling retail districts.

In 2020, the 37215 zip code ranked the area as the most expensive place to buy a home, with a median home sale price of \$719,000.

There are around 33 staff members in the school and some 210 students.

At a press briefing, White House Press Secretary Karine Jean-Pierre said the shooting was proof the ongoing need for stricter gun reform.

Monday's shooting is the 129th shooting this year.

Before the media “memory holes” the latest tragic mass shooting at a Christian school in Nashville, TN, maybe we should pause for a second and ask why so many transgenders are committing mass shootings these days.

Senators Mitch McConnell and John Cornyn are probably already working with the Democrats on a new gun control bill with the Democrats. But before Congress moves to take more of our rights away, isn't it worth thinking about why this is happening? A 28-year-old woman who thought she was a dude just walked into a school and murdered 3 children and 3 teachers, before the cops shot and killed her. Some are already trying to

make this crazy broad a martyr. After all, she was a holy trans person and she only murdered a bunch of Christians. Didn't they sort of have it coming for oppressing the shooter or something?

It's not as if the shooter was breaking any glass ceilings here by committing mass murder. The Colorado Springs mass shooter who killed 5 at a gay nightclub in 2022 said he was "non-binary" – which is apparently a mental illness that's so bad that a person doesn't think they even have a gender. The killer who shot two administrators at a Denver high school last week was a transgender dude. The 2018 shooter who killed four people outside of a Rite Aid in Aberdeen, MD was a transgender. And now this mass murder in Nashville.

When you dig into the numbers, you can't help but run into the disturbing fact that the vast majority of mass shooters in the U.S. have been second-generation immigrants since the 1990s. Most have been on various psychotropic drugs for depression and other mental health problems. The latest trend the past few years does seem to involve more gender-confused individuals shooting the place up.

Why? Perhaps the government will provide the answers in the CIA Project MKULTRA, and that of Targeted Individuals. The web site Targeted Justice had this to say about Dr. Joseph Giordano **basically is saying that torture of civilians is permissible and that neurotech may "uphold a higher moral standard" than other forms of torture. In my opinion, Giordano is a true psychopath. He cares nothing about the Constitution or your rights. He apparently does not know what Treason is, or that it can carry the death penalty.**

The reader can view a presentation that Dr. Joseph Giordano gave a few years ago by going to this web page:

[Dr James Giordano - TARGETED JUSTICE](https://www.targetedjustice.com/dr-james-giordano.html)  
<https://www.targetedjustice.com/dr-james-giordano.html>

Blessings,
