

It's Just All A Coincidence

In 1859 the most powerful recorded solar storm shocked telegraph operators through their machines and set their papers on fire. Among the other occupational hazards associated with being a telegraph operator in the late nineteenth century was the possibility of contracting tuberculosis.

In 1918, only the vaccinated died of the Spanish Flu. The first cases of what was labeled the Spanish Flu broke out at Camp Funston, Fort Riley, KS. Soldiers there were being trained in the skill of radio telegraphy. Autopsies after the war proved that the 1918 flu was **NOT** a “FLU” at all. It was caused by random dosages of an experimental ‘*bacterial meningitis vaccine*’, which to this day, mimics flu-like symptoms. The massive, multiple assaults with additional vaccines on the unprepared immune systems of soldiers and civilians created a “killing field”. Those that were not vaccinated were not affected.

WW1 ended sooner than expected, leaving HUGE quantities of unused experimental vaccines. WW1 U.S. soldiers were given 14 – 25 untested, experimental vaccines within days of each other, which triggered intensified cases of ALL the diseases at once. The doctors called it a new disease and proceeded to suppress the symptoms with additional drugs or vaccines.

Fearing that soldiers coming home would spread diseases to their families, The U.S. government pushed the largest vaccine ‘fear’ campaign in history. They used the human population as a research and development lab to field test experimental vaccines.

Tens of millions of civilians died in the same manner as did the soldiers. Instead of stopping the vaccines, doctors intensified them, calling it the great “Spanish Flu of 1918”. As a result, **ONLY THE VACCINATED DIED**. “*Seven men dropped dead in a doctor's office after being vaccinated. Letters were sent to their families that they had been killed in action.*” Could it all have been JUST a COINCIDENCE?

Remember in 1919 after World War I, we had worldwide Radio Telephony and Telegraphy and we had Spanish Flu pandemic – JUST A COINCIDENCE! The so-called Spanish Flu came and mysteriously ended by 1920.

In 1999 the world had 3G cell phones and shortly after we had SARS-COV-1 - JUST A COINCIDENCE!

In 2009 the world had 4G cell phones and shortly after we had MERS and the SWINE FLU – JUST ANOTHER COINCIDENCE! A year later the World Health Organization declared the end of the SWINE FLU.

On June 10, 2010, I had Wi-Fi installed in my residence in Turtle Creek, PA. Five days later my legs below the knees began to blister and leak Lymph fluid. A week in the hospital and six physicians later could not identify the cause of the blister. During the period from September, 2012 through October, 2015, we moved twice, and each time my legs broke out blisters and leaking of Lymph fluid. Each physical move put us within a half-mile or less range of an AT&T cell tower.

In 2019 the world had 5G cell phones and 5-GHz Wi-Fi, then we had SARS-COV-2 – JUST ANOTHER COINCIDENCE!

The 5G technology was originally planned to be released at the opening ceremony of the Olympic Games in Tokyo in 2020. It was changed to the Closing Ceremony of the World Military Games to be held in Wuhan, China.

When the French Military contingent returned to France many were suffering a severe respiratory illness and many were in hospital with oxygen masks. The French Military Reserve Officers did a 2 month review of the episode and published their findings on 13 May 2020. It was translated into English and published on 27 August 2020.

They found that the infection was caused by a Prevotella Bacteria, more common in older adults. The bacteria was being poisoned by EMF pulsed microwave radiation which caused cytokine shock. 5G Cell Phones and 5GHz Wi-Fi is implicated in Covid-19, with electromagnetic radiation having possibly highly activated: $\hat{A} \hat{A} \hat{A} \hat{A}$. The pathogenic power of the virus bioweapon, or $\hat{A} \hat{A} \hat{A} \hat{A}$. The Prevotella bacterium which caused the cytokine shock. For example at 60-GHz, 5G activates and is absorbed by oxygen.

We should not forget the cruise ship that served to drive the fear that held the world glued to the television news in early 2020. The *'Diamond Princess'* is a British-registered luxury cruise ship that is operated by Princess Cruises, a holiday company based in the United States and Bermuda. In February 2020, during a cruise of the Western Pacific, cases of COVID-19 were detected on board. The vessel was quarantined off Japan for nearly a month, after which all remaining passengers and crew were evacuated. Of the 3,711 people on board, 712 became infected with the virus – 567 of the 2,666 passengers, and 145 of the 1,045 crew. Figures for total deaths vary from early to later assessments, and because of difficulties in establishing causation. As many as 14 are reported to have died from the virus, all of them older passengers - an overall mortality rate for those infected of 2%. At the initial outbreak the virus was called the Coronavirus. What was unique about the *'Diamond Princess'* was the fact that only

a few months before the cruise in the fall of 2019, it was outfitted with the latest 5G transceiver antenna for global coverage for Cell, Data, and Entertainment. Although the cruise industry does not tell the public these days, the CDC says that as of late June, outbreaks of Covid-19 are as common as they were during the past two years. 100 operating cruise ships were reporting outbreaks or re-infections of Covid-19. More coincidences than we can keep track of. The cruise industry maintains “super secrecy” when it comes to Covid-19 outbreaks. Again, so many COINCIDENCES!

‘Cruise Industry News’ failed to address the obvious fact that COVID-19 is currently surging and cruise guests and crew members are being affected by the continuing pandemic. New and more contagious variants, BA.4 and BA.5, are wreaking havoc on the ships. According to the CDC, 100% of the 94 cruise ships sailing from U.S. waters have COVID-19 cases. Zero ships are designated green. 91 are orange and have met the threshold for investigation by the CDC. Just two are yellow. What could possibly go wrong? Just COINCIDENCES!

Perhaps this is why Intensive Care Units have equipment using wireless connections operating at 60-GHz to avoid interference between devices? I was in an Intensive Care Unit of a local hospital with Congestive Heart Failure, Pneumonia, Hypoxia, and a few other issues. The attending cardiologist became very agitated and defensive when I suggested that I may have been a victim of 5G wireless energy! His demeanor was obviously disturbed by my questioning the point. Since I was in ICU I thought I better not press the issue further when I raised the issue. I did not want to end up on a Ventilator where 96% of vent patients die from Hypoxia.

(The similarity between the lung damage observed by all emergency doctors and damage caused by the use of an electromagnetic weapon (plus permanent headaches, fatigue, burning sensations in the lungs, thrombosis and loss of sensitivity to smell and taste, also cited as symptoms of COVID-19). Agenda 21 was falling behind schedule so a meeting was held in October 2019 to bring forward the Event and plan the control of the narrative. That was Event 201. The Wuhan World Military Games followed. It is remarkable that all of these COINCIDENCES actually can be linked to the effects of Wireless EMF. Pardon me for thinking these are too many coincidences!

Blessings,
