The effect of an exploding sugar crystal is quite damaging to the mind and brain, it creates extreme confusion, dizziness, and also a state best described as lack of awareness, or apathy.

The Lilly Wave frequency is a secret military application, it is known as the "madness" frequency.

The Los Angeles Riots are said to have been the first open test of its capacity to mass control anger and violent response from the mob.

In short, the Lilly Wave is best described as a targeted resonance of the brains molecules.

Use of the Lilly Wave can pretty much install any brainwave pattern into the mind of any targeted human, such as the negative aspects already mentioned and also to create happiness, or the ability to control ones physical movements. An attack direct to the water molecules is by far the best method to achieve the desired aims.

It is possible to track the Lilly Wave through a spectrum analyzer that you link up to a signal source, and if you know what wave forms to look for, in a TV signal for example, you can see all kinds of interesting things—like the Lilly wave.

#### Lilly Wave

The Lilly Wave was found by John C Lilly and is, in most cases, completely misunderstood as to its usage to affect the thoughts and behavior of humans.[1]

It is described as a bi-phasic electric pulse which stimulates the neurons of the brain to resonate at a certain frequency, thus the Lilly wave has the ability to control the brainwave patterns of the brain.

There is however a far more advanced form and a largely unknown and suppressed purpose in the use of the Lilly Wave.

The water molecules within the brain can be made to resonate at a desired frequency; this causes the electrons that comprise the brains electrical voltages to also resonate at that same frequency.

It is not a requirement, as is understood by the majority of science, to implant electrodes to cause the brains water molecules to be entrained to a certain frequency, it can also be accomplished by any waveform that can penetrate the skull and then cause the entrainment of the brains water molecules.

**For example, radio waves emitted at a frequency of 40hz, targeted at a person's brain, will entrain the water molecules to a degree of 40hz and thus the rest of the brains electrons will also resonate at that frequency.**

**In this manner it is possible to stimulate and control the brains wave patterns remotely, with electromagnetism and also acoustic waves. However, it is imperative to understand that if the wave is not bi-phasic it will result in damage to the brains neurons and cause what is termed, brain damage.**

**It is not the case that only the brains water molecules can be entrained, it is also true of the blood sugar. Iron within the cellular structure composing the neurons of the brain and various other elements, can also be entrained to resonate at a desired frequency. (Possibly the reason for the attack on tobacco, nicotine is a super blood sugar regulator)**

**If a molecule is targeted by a wave that resonates at the same frequency as that molecule, that molecule will explode, sugar is a crystal and crystals when stressed, broken or deformed, release an electric and electromagnetic charge, this is known as triboluminescence.**

**The effect of an exploding sugar crystal is quite damaging to the mind and brain, it creates extreme confusion, dizziness, and also a state best described as lack of awareness, or apathy.**

**The Lilly Wave frequency is a secret military application, it is known as the "madness" frequency.**

**The Los Angeles Riots are said to have been the first open test of its capacity to mass control anger and violent response from the mob.**

**Furthermore, there are other profound effects of entraining the brain and bloods iron molecules, one of which is to cause the iron to condense together via resonant attraction, and clump within the brain. This has the effect of causing the iron to be magnetized and rush to the top of your head, resulting in a rush of blood to the head and extreme confusion and dizziness, it can also be reversed which causes a draining of blood from the head, leading to all out unconsciousness.**

**In short, the Lilly Wave is best described as a targeted resonance of the brains molecules.**

physical movements. An attack direct to the water molecules is by far the best method to achieve the desired aims.

It is possible to track the Lilly Wave through a spectrum analyzer that you link up to a signal source, and if you know what wave forms to look for, in a TV signal for example, you can see all kinds of interesting things—like the Lilly wave.

As already stated the Lilly Wave was found by Dr. John Lily when he was working for NIH, (the National Institutes for Health), in 1959 when they first started implanting dolphin brains and discovered that they needed to give the dolphin brain a chance to respond.

Then they discovered that they could use these same waves on human beings. He was doing work for the Navy at that time, and he got out of that research because he felt so conflicted about what they were doing.

The Lilly Wave frequency will mostly be in the extremely low and sometimes in the ultra-low frequency range, but they are complicated as they need to interact with certain brain molecules which have a resonant frequency of their own.

It is strange that the ELF and ULF ranges are classified or 10 MHz controlled frequencies.

#### **Artificial Thought and Communication**

This is the third step in the Blue Beam Project that goes along with the telepathic and electronically augmented two-way communication where ELF, VLF and LF waves will reach each person from within his or her own mind, from the Smart grid technology, convincing each of them that their own god is speaking to them from the very depths of their own soul. Such rays from satellites are fed from the memories of computers that have stored massive data about every human on earth, and their languages. ## Mass Mind Control

*The June-July, 1989 issue of the West German scientist publication, Raum & Zeit carried an article by Dr. W. Volkrodt, titled: "Can Human Beings Be Manipulated By ELF Waves." The article stated:*

The technical principal of receivers for electromagnetic waves is fully analogous with biological information and communications systems. If several thousand of the hundreds of billions of nerve cells in our brain resonate with man-made centimetre waves, the carrier frequency has to be suppressed when the signal is passed on to the synapses.

To overcome cell membranes, living organisms use electrochemical processes involving sodium and potassium ions. This suppresses the carrier frequency in the high-frequency range just as the demodulation circuit does in man-made receivers. What remains is the signal impressed on the carrier frequency, e.g. in the low frequency ELF range. This is also the frequency range at which our own nervous system normally works.

Using these frequencies, the nerve fibres convey pain sensations, the feeling of hungry, tiredness, nausea, and signals on the sense of balance to points in the brain which invoke these stages in a awake consciousness.

If interference signals are superimposed on the natural signals generated by the body, e.g. by using artificially created centimetre waves as a carrier, the brain could be presented with simulated states that we consciously perceive, but which do not appear as reality.

A state of disturbed sense of balance, which seems to us to be real, is enough to stop people from being able to run or make them feel dizzy even when they are lying down.

In a 'psychotronic war' using microwaves modulated using ELF waves, it would no longer be necessary to kill whole armies by inducing cardiac or respiratory irregular signals. The enemy can simply be incapacitated by disturbing their states of balance or confusing the ability to think logically. ...The manipulation of human beings, by means of ELF waves is relatively easy to perform.

Government authorities and the military would have to overcome no insurmountable difficulties to modulate carrier frequencies with ELF signals in existing centimetre radio-relay links. ...an army of occupation could then manipulate a nation's ability to make decisions in confusing political situations or disable undesirable activities. ELF-modulated microwave transmitters employed in this way could also serve to obviate the use of force (non-lethal weapons).

An entire nation can be gradually subjugated psychically by the means of long-term radiation using ELF-modulated centimetre waves. ...Once any kind of desire to defend or capacity to resist has been dispelled, political activities by negotiation are sufficient to incorporate into one's power a nation subjugated in this way.

Since 4G (microwave) was implemented in 2010 we have had a major decline in health. With the roll out of 5G...it will be much worse. Right now we are at 2.5Ghz where this 5G will be at 60Ghz. That is a huge jump in frequency radiation.

The deployment of the latest technology that is being inserted on top of the existing mobile phone tech but is not the same as at present is a subject that needs your attention. Because of the 5G platform, which is made up of small cell antennas everywhere, they will launch an unnatural and round the clock millimetre, milli-wave and microwave radiation transmission, that is far more potent than anything previously experienced from the electromagnetic spectrum. 5G will increase the current 700 to 5.8 billion microwaves per second for cell phone and Wi-Fi data to tablets and laptops to pulsed microwaves of 24 to 90 billion microwaves per second.

Qualcomm unveils first mmWave **5G** antennas for smartphones

The U.S. military uses the millimetre waves (**5G**) which travel only a short distance, as a non-lethal weapon for crowd control, because the waves affect the surface of the body and cause a burning of the skin at higher levels of power.

The Wi-Fi clouds formed in close communities are another aspect of this platform that affects the blood molecules directly, and will transform your emotional state by definition of what frequency they transmit through the Smart system.

\$17 trillion Dollars is the figure said to be available for the roll out of this technology.

President Donald Trump wants to build his own **5G** internet platform in the United States in response to China building the same across China.

Scientists do not fully understand the technology, specific to the mathematics relating to the waveforms created.

There are no safety checks at all carried out on the **5G** platform.

Children absorb some 60% more microwave energy due to their moisture content and thus electromagnetic conductivity is greater than that of an adult. Suicidal tendencies are a sign of damage by these microwaves. Establishment scientist Professor Trevor Marshall, the director of the Auto Immunity Research Foundation in California said :

“The new **5G** technology Millimetre waves producing photons of much greater energy than 4g and Wi-Fi. Allowing this technology to be used without proving its safety is reckless in the extreme as the millimetre waves are known to have a profound affect on all parts of the human body.”

The waveforms used by **5G** are known to be at the same frequencies as those used in our bodies at the level at which cellular processes take place, that means it can directly interfere with those cellular processes. There are 4500 cellular structures in the human body each communicating with the entire body. 40 leading scientists groups have warned that the waveforms from **5G** can be harmful to all living species.

Active Denial technology frequencies are included in the **5G** platform. This tech can be beamed from planes and helicopters and stand-alone vehicles. With this technology they can create many different physiological and neurological effects to the body by shifting frequencies.

**Microwaves affect all living things on the planet except bacteria and virus.**

**5G** is being seen as a technology that can create extinctions over five generations; this does not include bacteria and viruses which appear to get a boost from this technology in the ability to reproduce at a faster rate.

**[1] HAARP, GWEN, WI-FI, Cell Phone towers all of them can carry the Lilly Wave.**

The Lilly Wave called a balanced bidirectional pulse pair found by John Cunningham Lilly is a carrier waveform that bypasses the mind's subconscious defense systems. It has been monitored via oscilloscopes connected to homes A/C ground and neutral of power lines. It can be used to transmit mind control via ultrasonic (1 10 MHz) and electromagnetic wavelengths (600m to 1e-15m).

Electromagnetic wavelengths transmit long/short/FM wavelength radio waves, and TV/telephone/wireless signals or energies. They are also responsible for transmitting energy in the form of microwaves, infrared radiation (IR), visible light (VIS), ultraviolet light (UV), X-rays, and gamma rays. (1996) The Lilly wave can be neutralized via pink or white noise generators connecting to the non-voltage A/C ground and neutral of the homes power grid.

The goal was to find an electric current waveform with which animals could be stimulated through implanted electrodes for several hours per day for several months without causing irreversible changes in threshold by the passage of current through the tissue.

Many waveforms, including 60-cps. sine-wave current could apparently be used safely for these limited schedules of stimulation. They could not be used for the intensive, long-term schedule of chronic stimulation. Electric current passed through the brain can cause at least two distinct types of injury: thermal and electrolytic.

The technical problem in chronic brain stimulation is to stay above the excitatory threshold and below the injury threshold in the neuronal system under consideration. This result can be achieved most easily by the proper choice of waveforms and their time courses; and less easily by the choice of the range of repetition frequencies and train durations.

The previous wave forms used in neurophysiology and in neurosurgery injured the neurons when unidirectional current passed through the brain. Dr. Lilly developed a new electrical wave form to balance the current, first in one direction and then, after a brief interval, in the other. Thus ions moving in the neurons would first be pushed one way and then quickly the other way, stimulating the neurons and leaving the ions in their former positions within the neurons. This new wave form was called a balanced bidirectional pulse pair, or the Lilly Wave. Microscopic studies of brains stimulated with this balanced pulse pair showed that there was no injury of the neuronal networks from this kind Waveform of stimulating current : pulse pairs of current resulting from quasi-differentiation, with passive electrical elements, of a rectangular pulse.

Measured at 2 percent of the peak, the duration of the positive pulse (upward) is 34 sec, and the duration of the negative pulse (downward) is 28 sec. stimulation.

This report from StopTheCrime.net is a challenge for most people who have lived in a different world of reality. To add to your information, I am including two videos by Dr. James Giordano, who is Chief of the Neuroethics Studies Program in the Pellegrino Center for Clinical Bioethics, and a professor in the Department of Neurology, and Graduate Liberal Studies Program at Georgetown University, in Washington, DC.

Dr. Giordano's presentation confirms what this post is about and his

presentations at West Point military academy is revolutionary; however it will open your eyes to what can be achieved using **5G** wireless energy.
