COVID VAX DEEP SECRETS FINALLY COMING OUT!

RE: Covid 'Vaccine' Contents & Technologies

- Graphene Oxide is a Covert and Stealthy Delivery System
- Graphene Hydroxide is a Razor Blade Slicing Through RBCs
- Synthetic Parasites Integrated with AI are Self-Replicating
- Spike Proteins May Actually Be Parasite Eggs
- RBC Rouleaux Formation Modulated by 5G and Wi-Fi
- Hydrogels Contain Quantum Dots and Nanites
- Chemtrail Aerosols Contain Graphene (and Parasites?)
- Theragripper Implanted via PCR Test Cotton Swab

SOTN Editor's Note: Every State of the Nation reader ought to be aware that this Alt Media platform was the first on the Internet to float the great likelihood that the meticulously bioengineered COVID-19 bioweapon was not wrapped around a coronavirus, and certainly not SARS-CoV-2 which has yet to be isolated; rather, that the primary pathogenic micro-organism is a parasite (which is why both Ivermectin and Hydroxychloroquine are so effective). SOTN has also frequently pointed out that, because the Covid disease process resembles various "Multi-infection Syndrome-causing Autoimmune Disorders" such as AIDS, there are also other disease agents and/or pernicious microbials which have been incorporated into the bioweapon. The most likely pathogen, in addition to a synthetic parasite proposed in the exposé that follows, is a highly pathogenic bacteria that specifically attacks the respiratory system. However, this emerging hypothesis does not exclude the distinct possibility of pathogenic fungal, viral and mycoplasmal components being integrated as well, depending on the targeted population. What follows is an examination of the "synthetic parasite" theory where graphene oxide is utilized as the delivery system.

About your article:

Pfizer 'Vaccine' Contains 99% Graphene Oxide After Electron Microscope Analysis

<https://stateofthenation.co/?p=71587>

Not only does graphene affect the blood (clotting & causing RBCs* to rouleaux formation), it is a delivery system; graphene oxide is a carrier... like an envelope carries a letter... when the envelope reaches its destination (meets the condition to be opened)

it gets opened. The reason the vaccines had to be stored at low temperatures is...when the graphene senses heat (like inside the body) it starts releasing what it carried.

*RBC = Red Blood Cells

Attached is a pdf file of the patent & some pictures from my microscope:

PDF: [US11107588](#)

From looking at things on my microscope (see photos below)... it appears as if what people think are “spike proteins” are really parasite eggs... graphene can release the eggs, but also grown parasites can release the eggs... attached are a couple of my pictures... I could be wrong, but I don't think so. I also think these are synthetic parasites (laboratory-made)... so it's not quite so easy to get rid of them. Ivermectin is an antiparasitic drug... this is why even in the beginning some people were saying that Ivermectin helped someone get over Covid-19.

Here are some photographs of graphene in the blood. It is the black goo on the edges.

Viruses don't transfer from person to person (CDC has documented studies where zero test subjects got sick when they tried in many different ways to expose them to a virus), but parasites do.

It appears as if they are injecting people with graphene oxide, parasites, nanotechnology (quantum dot/nanites), and hydrogel (crystalizes when drying).

2nd Email

"Parasites are integrated with artificial intelligence & self-assembling"

I think the parasites are integrated with artificial intelligence & self-assembling — they keep coming back. I believe I got the hydrogel & quantum dots via swab for the PCR test... I made some pine needle tea and found sediment in the bottom of the white cup (see photos that follow), so I put it on the microscope too, and it was filled with graphene particles and parasites (simmering tea = heat).

I think it's sprayed in the chemtrails and was on the pine needles (see the following video). I'm attaching pictures for that too.

Initially, I was only looking in my blood on my microscope to see if I could tell why I was so fatigued all the time. When I saw the rouleaux formation of the RBCs, I realized if the RBCs are stacking like that, rather than separated and flowing freely which they need to do in order to carry the oxygen ($O_2 = \text{energy}$) that could explain some of the fatigue. Trying to research reasons – I found something that talked about a positive charge causing it. I think 5G, Wi-Fi___33, cellphone EMFs could be part of the equation*, but just felt there was more... looking more, I found the parasites and what appears to be graphene. Then I thought... hey, maybe something is in my mucus to explain the constant Tinnitus.

*I think the RBCs stacking also has something to do with the charge of the graphene and/or 5G, Wi-Fi___33, smartphone EMFs, microwave radiation.

So kill all the parasites, but do you have any idea how to get rid of the hydrogel, quantum dot, and graphene in the blood? I've also been having pain around my heart and believe it's due to the graphene.

Graphene Hydroxide

Because graphene is so thin (one molecule layer & very hard) – not only does it act as a delivery mechanism, but as it flows through the blood, it also acts like a razor blade slicing up some RBCs – then the body recognizes bleeding & responds by clotting (I know this from being a nurse). The doctor who pointed this out (cutting of the RBCs) – they're saying he was murdered – from what his wife said it sounds like he was hit with a DEW. Have you heard of the athletes dropping while playing? They're playing hard, so their blood is pumping faster /flowing faster = more RBCs being cut = more clotting. Makes sense.

Do you want the picture of the parasite spewing the spike proteins/parasite eggs? I think it looks like the eggs are trailing alongside as it moved. I'm attaching it. As follows:

In the last picture attached here, it looks like the side that the spike/eggs are coming out of are destroying the RBCs.

If you saw all of the pictures I have taken from my microscope, you'd be amazed... and probably sickened.

I did not get the Covid-19 vaccine. I had one PCR test in April 2020 and left in tears it hurt so badly. Not long afterward I felt like hard energy hit me upside my head and had frequent headaches and constant ringing in my ears (Tinnitus) — now over 1 1/2 years later, the headaches aren't as frequent, but radiate from my left sinus... but the Tinnitus has never stopped. I was 57 at the time, and never had Tinnitus before that, and very seldom had headaches, with no history of any allergies. I feel like they may have implanted a "Theragripper" (created by John Hopkins University) <http://jhu.technologypublisher.com/technology/17242>

If the Theragripper wasn't implanted, then it could be on the swabs may also have hydrogel with the quantum dot/nanites in it. The hydrogel crystallization & dots (black circles) I found in my nasal mucus or mucus from the back of my throat. It seems the graphene and parasites and spike proteins/eggs are in my blood.

Graphene

The preceding two emails and photographs were submitted by a very smart RN in Michigan. Her COVID-19 super sleuthing has certainly broken new ground. Therefore, this vital Covid material and evidence should be disseminated far and wide so that other medical investigators and scientific researchers can further advance these lines of inquiry. The strong hypotheses presented above are simply too compelling to ignore or overlook. And, the consequences of not understanding the true perils associated with both the COVID-19 bioweapon and weaponized Covid 'vaccines' are simply too great not to respond to with all deliberate speed.

The State of the Nation has produced evidence that we are not looking at a novel rogue virus, but rather an orchestrated planned effort to experiment on people who would never take a vaxx containing elements that are not fully known as to their intent or reason to be used as a human guinea pig for some sic demented scientist. All of these examples, and there are likely others that have eluded the microscope lens, should demand an investigation and prosecution of the guilty parties, in the government health agencies and the pharmaceutical companies.

16,000 Physicians and Scientists Agree Kids Shouldn't Get COVID Vaccine

COVID vaccines are "irreversible and potentially permanently damaging," says Dr. Robert Malone, who explains why 16,000 physicians and medical scientists around the world signed a declaration publicly declaring healthy children should not be vaccinated for COVID-19.

By [Robert W. Malone, M.D.](#)

Before you vaccinate your child — which is irreversible and potentially permanently damaging — find out why 16,000 physicians and medical scientists around the world [signed a declaration](#) publicly declaring that healthy children should NOT be vaccinated for [COVID-19](#).

On behalf of these M.D.s and Ph.D.s, I have published a clear [statement](#) outlining the scientific facts behind this decision:

My name is Robert Malone, and I am speaking to you as a parent, grandparent, physician and scientist. I don't usually read from a prepared speech, but this is so important that I wanted to make sure that I get every single word and scientific fact correct.

I stand by this statement with a career dedicated to vaccine research and development. I'm vaccinated for COVID and I'm generally pro-vaccination.

I have devoted my entire career to developing safe and effective ways to prevent and treat infectious diseases.

After this, I will be posting the [text of this statement](#) so you can share it with your friends and family.

Before you inject your child — a decision that is irreversible — I wanted to let you know the scientific facts about this genetic vaccine, which is based on the mRNA vaccine technology I created:

There are three issues parents need to understand:

The first is that a viral gene will be injected into your children's cells. This gene forces your child's body to make toxic [spike proteins](#). These proteins often cause permanent damage in children's critical organs, including:

- Their brain and nervous system.
- Their heart and blood vessels, including blood clots.
- Their reproductive system.
- This vaccine can trigger fundamental changes to their immune system.

The most alarming point about this is that once these damages have occurred, they are irreparable:

- You can't fix the lesions within their brain.
- You can't repair heart tissue scarring.
- You can't repair a genetically reset immune system.
- This vaccine can cause reproductive damage that could affect future generations of your family.

The second thing you need to know about is the fact that this novel technology has not been adequately tested.

- We need at least 5 years of testing/research before we can really understand the risks.
- Harms and risks from new medicines often become revealed many years later.

Ask yourself if you want your own child to be part of the most radical medical experiment in human history.

One final point: the reason they're giving you to vaccinate your child is a lie.

- Your children represent no danger to their parents or grandparents.
- It's actually the opposite. Their [immunity](#), after getting COVID, is critical to save your family if not the world from this disease.

In summary: There is no benefit for your children or your family to be vaccinating your children against the small risks of the virus, given the known health risks of the vaccine that as a parent, you and your children may have to live with for the rest of their lives. The risk/benefit analysis isn't even close.

As a parent and grandparent, my recommendation to you is to resist and fight to protect your children.

More on the twisted logic of vaccinating the children to protect the elderly

“Never in human history have old people required young people to take risks, make sacrifices and die to preserve older people. We have a fiduciary duty to our children. Old people sacrifice themselves for children in a moral society, in a robust society, in a society that we are proud of. We do not tell children to take risks to preserve old people. We need to stand up and take a moral choice and an ethical choice for our children.” — Robert F. Kennedy, Jr. [testimony](#) before Louisiana State Legislature

I first became conscious of the twisted logic of vaccinating the children to protect the elderly when I saw the [CNN “indirect marketing” campaign](#) to vaccinate children with an unlicensed experimental [Pfizer](#) product.

Big Bird's endorsement of the COVID vaccine for children isn't an isolated incident — it's just the latest example of Sesame Street endorsing federal health agencies' COVID messaging for young children, with the help of corporate media. <https://t.co/BGRNQagRAR>

— Robert F. Kennedy Jr (@RobertKennedyJr) [November 9, 2021](#)

After the shock of the realization that what was going on was that Pfizer used CNN as a surrogate to advertise directly to children, thereby driving consumer demand and causing the USG/CDC to purchase additional Pfizer unlicensed EUA SARS-CoV-2 vaccines, I took time to review the clip more carefully and think through what was storyboarded and scripted.

I am no longer confident that children were the target market — I think it was the [elderly who watch TV](#) and soak up the constant barrage of CNN fearporn regarding SARS-CoV-2.

The CNN/Sesame Street piece is actually promoting the logic that an elderly grandmother should schedule and transport her grandchild to receive an unlicensed experimental medical product, and that it is the grandmother who is advocating that the child should accept this procedure.

[BUY TODAY: Robert F. Kennedy, Jr.'s New Book — 'The Real Anthony Fauci'](#)

And this is being promoted by a licensed physician who [works for CNN](#), Dr. Sanjay Gupta.

Having [posted](#) this observation to Twitter, of course I was immediately ridiculed and defamed by various shadowy media outlets, who seem to think that [personal ad hominem attacks](#) are a reasonable substitute for examining the logic of my statements.

“The use of trusted and beloved figures in this propaganda assault to induce children into submitting as guinea pigs to injections with an experimental high-risk zero-liability medical product with no proven benefits for kids is unconscionable and revolting. Big Pharma has turned Big Bird into a child predator.” — [Robert F. Kennedy, Jr.](#)

Just stop for a moment. Think about what is happening here.

If you make a decision to administer this product to your child, or you allow the state to insert itself into the family and force you to vaccinate your child, there is a chance that your child will be seriously damaged by the vaccine.

The probability of this happening is much greater than the probability that your child will be seriously damaged by SARS-CoV-2.

It is likely that this is particularly true in the case of the [Omicron](#) variant. Despite the fearporn that you may be subjected to by CNN and other legacy media. This is a [scientific fact](#).

“I think it’s time we stop. Children, what’s that sound? Everybody look — what’s going down.” — [Buffalo Springfield, “For What It’s Worth”](#)

Frankly, I am really tired of the [coordinated propaganda, censorship, and social engineering](#) being promoted by Pfizer, “public health officials,” legacy media and [governments from around the world](#).

Perhaps you are also? If so, you are in the 20-30% of the global population who are increasingly aware that they have been misled. Well, actually (calling it what it is), actively lied to and psychologically manipulated.

The prepared statement at the start of this post came about when I went down to Puerto Rico last weekend to meet with colleagues that are supporting the 16,000+ strong International Alliance of Physicians and Medical Scientists, where we prepared the blunt, concise statement of fact to alert parents of what they are signing up for if they agree to go along with the narrative that is being so actively sold to us, and have their children vaccinated.

This was then [video recorded](#) as a statement which is being distributed worldwide via many decentralized channels so that the censors cannot remove it.

And then we held a live-streamed question and answer event focused on vaccination of children with the Pfizer SARS-CoV-2 vaccine. The invitation-only event was attended by over 50 local physicians, medical providers, and parents.

The text of the statement at the start of this post is indeed blunt and may seem shocking to some. But I think that the time for carefully parsing the truth has long since passed. Children are being [harmed](#) in the mindless rush to achieve universal vaccination.

[Urgent: 3 Ways to Help Stop Biden's Vaccine Mandates](#)

Few if any have come out with such a brief, plain-speaking statement about the reality of what parents and their children are being asked or forced to do by government bureaucrats.

But so many have been subjected to so much propaganda — such intentional hypnotism — to accept the logic that it is a good idea to vaccinate our children with an experimental product that is associated with unacceptable and irreparable toxicities in order to protect the small fraction of the population at high risk of death and hospitalization.

According to the latest CDC data, more than 60% of the total U.S. population has been vaccinated, and about 45% of the entire population has already been infected by the virus, recovered and developed [natural immunity](#).

The elderly are heavily vaccinated.

The vaccines do not prevent you from becoming infected, replicating high levels of virus and spreading infection to others.

I will say it again — the elderly are highly vaccinated.

The problem is that the vaccines are not doing what they are supposed to do — prevent infection and spread of the virus. This is even more the case with the Omicron variant.

So what to do?

Start jabbing children who — unless they have other major problems — shrug off COVID-19 disease like they do most other RNA respiratory viruses?

Or start allowing physicians to treat COVID-19 patients in the outpatient setting to prevent them from ever getting to the hospital setting where (almost exclusively in the U.S. alone) they are immunosuppressed with high levels of dexamethasone, placed into a coma-like state and hooked up to a ventilator, and treated with Remdesivir (which is clearly toxic and mimics many of the toxicities of the virus)?

This is madness.

And it reflects a profound arrogance on the part of the Pharma-Govie-World Health elite. They assert that they understand immunology, virology and evolutionary biology so well that they can freely tinker with the lives of our children using an experimental technology and rushed vaccine product which is neither safe nor effective based on standards and bioethical consensus that have been developed and applied over decades.

They believe that they can inject novel unproven technology and improve the highly evolved human immune system that has developed over millennia to resist respiratory RNA virus pressure.

Arrogance is the kindest term I can think of.

"I know no one's going to show me everything. We all come and go unknown. Each so deep and superficial. Between the forceps and the stone. Well, I looked at the granite markers, those tributes to finality, to eternity. And then I looked at myself here. Chicken scratching for my immortality." — [Joni Mitchell "Hejira"](#)

None of us are immortal.

Despite the objectives of the [transhumanism agenda](#). Death cannot be avoided. We pass through this world, and hopefully, leave it a bit better when we are gone. Our children are the only true legacy, the only real form of immortality.

Please protect them, and do not ask them to make sacrifices with their health on your behalf. You know this is wrong. So do the right thing. And take this seriously.

Think long and hard before taking an action that can never be undone.
