## Part 12

### Connecticut Reports Deadly Poison in the Moderna Vaxx

[BREAKING NEWS -URGENT -Connecticut Publishes Moderna COVID Vax Ingredients: DEADLY POISON "SM-102 -Not for Human or Veterinary Use"](#)

If we have not heard of enough of the harm being caused by the Vaxxs, we learned on Monday, May 17<sup>th</sup>, 2021, that the Moderna Vaxx (Dr. Anthony Fauci's choice preference), contains a chemical poison SM-102. Its manufacturer Cayman Chemical states, it is not "**NOT FOR HUMAN OR VETERINARY USE**".

**In the OSHA filing, the manufacturer declares SM-102 "Causes damage to the central nervous system, the kidneys, the liver and the respiratory system through prolonged or repeated exposure."**

The complete report can be read at the linked page above. It is further evidence that a Genocidal plan to depopulate the world is in effect world-wide.

### Government Scrubs Stats on Vaccine-Related Deaths

Posted on [May 18, 2021](#) by [State of the Nation](#)

Analysis by Dr. Joseph Mercola

STORY AT-A-GLANCE

- According to Dr. Peter McCullough, early treatment could have prevented up to 85% of COVID-19 deaths. Early at-home treatment also minimizes the spread, as the amount of time you're infectious can be reduced from two weeks to about four days
- Despite being inexpensive and readily available, early treatments have all been censored and suppressed in order to secure a global mass vaccination campaign
- More than 80 colleges and any number of employers are now implementing mandatory COVID vaccination. The only way for them to understand what the implications of that decision might be is to review the VAERS data. They're not going to get any clues elsewhere, thanks to the universal suppression of information
- An estimated 124 million Americans are now fully vaccinated against COVID-19. As of April 30, 2021, 3,837 died shortly after their COVID shots. That's more than have died from all available vaccines combined from mid-1997 until the end of 2013 — a period of 15.5 years
- In 1976, the U.S. government vaccinated 45 million people against pandemic swine flu. The entire program was canceled after reports of just 53 deaths

According to Dr. Peter McCullough, vice chief of internal medicine at Baylor University Medical Center and known for being one of the top five most-published medical

researchers in the United States, COVID-19 vaccines are killing “huge numbers” of people and the government is simply ignoring it.

In a video interview with investigative journalist and founder of Liberty Sentinel, Alex Newman, McCullough says the U.S. government, the Bill & Melinda Gates Foundation and health agencies around the world have all committed to vaccinating the global population while sitting on data showing the COVID-19 “vaccines” are turning out to be the most lethal vaccines ever created.

### Safe Treatments Suppressed in Favor of Dangerous ‘Vaccines’

McCullough, who also has a master’s degree in public health, has provided testimony in three different Senate hearings, sharing the treatments he used to help patients recover from COVID-19 and avoid hospitalization. He summarizes his protocol in the interview. These strategies are also detailed in “Pathophysiological Basis and Rationale for Early Outpatient Treatment of SARS-CoV-2 Infection” published in the January 2021 issue of the American Journal of Medicine.<sup>1</sup> He was also a consulting editor of “A Guide to Home-Based COVID Treatment.”<sup>2</sup>

During a recent Texas state Senate Health and Human Services Committee hearing, McCullough noted that, according to available data, early treatment could have prevented up to 85% of COVID-19 deaths.<sup>3</sup> Early at-home treatment also minimizes the spread, as the amount of time you’re infectious can be reduced from two weeks to about four days.

Yet, despite being inexpensive and readily available, early treatments have all been censored and suppressed, apparently in order to secure this global mass vaccination campaign. In fact, as McCullough notes, there’s been no clarified guidance on COVID treatment at all, not even hospital protocols.

The entire focus of our health agencies has been on masking, [lockdowns](#) and waiting for a gene therapy “vaccine.” The results have been devastating. Five months into the [mass vaccination campaign](#), more than 10,000 in the U.S. and European Union have already died after getting the shots. Any other vaccine would have been pulled from the market by now.

### Shocking Stats Show Just How Dangerous COVID ‘Vaccines’ Are

For example, in 1976, the U.S. government vaccinated 45 million people against pandemic swine flu. The entire program was canceled after reports of just 53 deaths, according to Fox News.<sup>4</sup> Note: The number of deaths reported after the 1976 inoculation program varies from three to 53, depending on the source.<sup>5,6,7</sup>

Now, health authorities are shrugging off more than 3,800 deaths<sup>8</sup> after COVID-19 vaccination as either coincidental or inconsequential. Think about that. Five months into the COVID-19 vaccination campaign, we’re looking at a death toll that is 7,000% greater than during the [swine flu vaccination campaign](#), which was canceled after the vaccine was deemed too risky.

The COVID-19 “vaccine” is also on a level of magnitude more dangerous than the seasonal flu vaccine. As reported by McCullough, on average, there are 20 to 30 deaths reported following the seasonal flu vaccine, which is given to about 195 million Americans each year.<sup>9</sup>

Compare that to these novel COVID-19 gene therapies. So far, an estimated 124 million Americans are fully vaccinated against COVID-19 and the death count is already at 3,837, as of April 30, 2021.<sup>10</sup>

Worse, it appears the vaccine adverse event reporting system (VAERS) is backlogged by about three months,<sup>11</sup> so this is likely to be a serious undercount. Even if VAERS was fully caught up, it would be an undercount, as only 1%<sup>12,13</sup> to 10%<sup>14</sup> of adverse events after vaccination are ever reported. So, in reality, we might be looking at anywhere from 38,370 to 383,700 COVID vaccine-related deaths.

A third comparison can be made against vaccines as a whole. As reported by Tucker Carlson,<sup>15</sup> May 6, 2021, the COVID-19 shots have already resulted in more deaths than all available vaccines combined from mid-1997 until the end of 2013 — a period of 15.5 years.

#### No Other Vaccine Has Harmed This Many

In a recent report, the Israeli People Committee (IPC), a civilian body of health experts, similarly concluded that “there has never been a vaccine that has harmed as many people.” The Committee received 288 reports of death following COVID-19 vaccination, 90% of which occurred within 10 days. According to this report (translated from Hebrew):<sup>16</sup>

“According to Central Bureau of Statistics data during January-February 2021, at the peak of the Israeli mass vaccination campaign, there was a 22% increase in overall mortality in Israel compared with the previous year.

In fact, January-February 2021 have been the deadliest months in the last decade, with the highest overall mortality rates compared to corresponding months in the last 10 years.

Amongst the 20-29 age group the increase in overall mortality has been most dramatic. In this age group, we detect an increase of 32% in overall mortality in comparison with previous year.

Statistical analysis of information from the Central Bureau of Statistics, combined with information from the Ministry of Health, leads to the conclusion that the mortality rate amongst the vaccinated is estimated at about 1: 5000 (1: 13000 at ages 20-49, 1: 6000 at ages 50-69, 1: 1600 at ages 70+).

According to this estimate, it is possible to estimate the number of deaths in Israel in proximity of the vaccine, as of today, at about 1000-1100 people.”

## CDC Denies Lethal Risks

The contrast in the government's response to COVID-19 vaccine deaths compared to the 1976 swine flu pandemic vaccination campaign is "alarming," McCullough says.

February 19, 2021, the U.S. Centers for Disease Control and Prevention issued a statement saying there were "no safety problems" with Pfizer's and Moderna's mRNA injections.<sup>17</sup> Of the 113 deaths reported at that time, none was deemed to be related to the vaccines.

Then, in May 2021, after reviewing 1,600 deaths reported to VAERS with an unnamed group of U.S. Food and Drug Administration doctors, the CDC declared that none of the deaths was related to the vaccine — this despite 24% of deaths have occurred within 48 hours of injection, and 16% within 24 hours. The problem is that it would take several months to investigate that many deaths, so the likelihood that this was a thorough investigation is slim to none.

"It is impossible for unnamed regulatory doctors without any experience with COVID-19 to opine that none of the deaths were related to the vaccine," *McCullough tells Newman*.

"So, I think this was effectively a scrubbing, like we've seen elsewhere ... We're sitting on, right now, the biggest number of vaccine deaths [and] there's been tens of thousands of hospitalizations, all attributable to the vaccine, and [we're still] going strong."

The reason you're not hearing any negative news about these "vaccines" is because major media networks and stakeholders in COVID-19 vaccines have formed a "trusted news credibility coalition" that seeks to prevent any negative information about COVID vaccines to get into the popular media "because they're concerned about vaccine hesitancy," McCullough says.

## Suppression of Concerning VAERS Data Underway

As of April 30, 2021, 3,837 people have died, and 16,014 people have reported serious injuries and disabilities following COVID-19 injections.<sup>18</sup> Among these deaths were two 15-year-olds and one 16-year-old. There were also 235 reports of miscarriage or premature birth as of April 30, 2021.<sup>19</sup>

You can check the latest statistics yourself using [openvaers.com](https://openvaers.com).<sup>20</sup> So-called fact checkers are of course working overtime to quell rumors about the trends showing in the VAERS data.

A recent fact-check article<sup>21</sup> by The Post and Courier quotes unnamed, obscure experts stating that dying from the COVID-19 vaccine "isn't an outcome people should worry about," and that "despite misinformation shared on social media that sources a federal vaccines safety database" — meaning the VAERS database — "there is no proof of any patients having died as a result of taking a COVID-19 vaccine in the United States."

More than 80 colleges and any number of employers are now implementing mandatory COVID vaccination, and the only way for them to understand what the implications of that decision might be is to review the VAERS data. They're not going to get any clues elsewhere, thanks to the universal suppression of information.

PolitiFact also recently blew off VAERS as a “breeding ground for misinformation.”<sup>22</sup> It warned social media posts reporting VAERS data are not to be trusted, as VAERS “reports are not verified” and “are not enough to determine whether a vaccine causes a particular adverse event.”

While both of those statements are true, PolitiFact fails to address the glaring problem that both the CDC and the FDA, which run VAERS jointly, are ignoring clearly emerging trends of harm. The Defender contacted the CDC March 8, 2021, with a list of questions about the vaccine injury reports, and as of May 11 — 64 days later — had received no reply.<sup>23</sup>

“[VAERS] is the only place where America, policy makers and others, are going to get a fair shake in understanding safety,” McCullough says. He points out that more than 80 colleges and any number of employers are now implementing [mandatory COVID vaccination](#), and the only way for them to understand what the implications of that decision might be is to review the VAERS data. They're not going to get any clues elsewhere, thanks to the universal suppression of information.

Overall, it appears the entire mission of VAERS and other such databases is being tossed aside. The system's primary goal is to “detect new, unusual or rare vaccine adverse events” as a way to monitor the safety of vaccines.

As noted by McCullough, after five reported deaths where a medical product is suspected of being involved, the FDA will issue a black box warning — a notice to consumers warning them that the drug might cause death. At around 50 suspicious deaths, the product is pulled off the market.

The system is clearly failing if every single report of serious injury or death, including all the ones occurring within hours and in people with no underlying health problems, are simply written off as coincidence. It's simply not believable.

#### EU Reports More Than 7,700 Deaths

Signs of lethal risks are also evident in data from the European Union, where the EudraVigilance system had received 7,766 reports of death after COVID vaccination as of April 17, 2021.<sup>24</sup>

Of these, Pfizer's mRNA injection accounted for the largest number of deaths at 4,293, followed by Moderna with 2,094 deaths, AstraZeneca with 1,360 deaths and Johnson & Johnson with 19 deaths. As noted by McCullough:

“In my professional opinion, the safest vaccine on the market was the J&J vaccine, and that was pulled for very rare blood-clotting events. We had 7 million people vaccinated but the estimates are for the other two vaccines available [Pfizer and Moderna], the blood-clotting rates are probably 30 times that of J&J, and these others are going strong.”

#### Active Vaccine Surveillance Is Months Away

The FDA has also admitted that its analysis of vaccine safety data will be delayed for weeks, if not months. Right as the pandemic hit, they were in the process of transitioning from its Post-Licensure Rapid Immunization Safety Monitoring (PRISM) network, which was used to track [side effects](#) from the pandemic H1N1 vaccine, into a new system called the Biologics Effectiveness and Safety System (BEST).

In the meantime, they’re relying on a patchwork of passive reporting systems, including VAERS, the Vaccine Safety Datalink and a phone-based self-reporting system called v-safe.

Since all of these are based on voluntary self-reporting, they can miss potentially lethal and unanticipated reactions. By the end of March 2021, only 6.4% of all vaccinated individuals had enrolled in v-safe, for example,<sup>25</sup> which mean a vast majority aren’t being surveilled for side effects.

While BEST will be an active surveillance system capable of examining data from 100 million people and actually compare rates of adverse events between vaccinated and unvaccinated individuals to detect trends, we are months away from this kind of analysis.

In the meantime, people continue to die, and for no good reason, considering the lethality of COVID-19 is on par with seasonal influenza for most age groups.<sup>26,27,28,29,30</sup>

#### Signs of Malfeasance Abound

At this point, the list of evidences of malfeasance is exceedingly long. For a rundown of several key issues, see the peer-reviewed paper “COVID-19: Restoring Public Trust During a Global Health Crisis — An Evidence-Based Position Paper to Ensure Ethical Conduct.”<sup>31</sup>

In it, the author substantiates McCullough’s allegations of rampant, wanton misconduct among public health officials, the active suppression of safe and effective treatments, and pandemic measures being implemented based on incorrect assumptions and outright lies.

As noted by McCullough in the featured interview, advertisements for COVID-19 vaccines were launched in violation of law before FDA licensing was complete. The initial studies had not even been completed. To this day, none of the COVID-19 “vaccines” has been licensed.

They only have emergency use authorization (EUA), and there's no possible way for anyone to assure their safety. All of these facts are why they're completely optional, and legally cannot yet be made mandatory, even though many schools and businesses are attempting to do that.

McCullough also stresses that in the COVID-19 vaccine trials, both the vaccinated groups and control groups had a less than 1% infection rate, which is about as low as it gets, in terms of risk. What this means is the overall public health impact of COVID-19 vaccination is also bound to be less than 1% — in other words, meaningless.

He also points out that around the world, we're now seeing about 60% of active COVID-19 cases being in fully vaccinated individuals. In McCullough's own practice, the COVID-19 patients he saw in the two weeks before this interview, about 60% were fully vaccinated, and there's no difference in disease presentation between vaccinated and unvaccinated individuals.

#### Death Tally May Spike During Fall and Winter

While the death toll from COVID-19 vaccines is already at a historical level, I fear it may shoot far higher as we move through fall and winter. The reason for this is because one of the greatest wild cards of these vaccines is antibody-dependent enhancement (ADE) or paradoxical immune enhancement (PIE).

I've detailed this issue in several articles, including "[How COVID-19 Vaccine Can Destroy Your Immune System](#)" and "[Will Vaccinated People Be More Vulnerable to Variants?](#)" In summary, ADE means that rather than enhance your immunity against the infection, the vaccine actually enhances the virus' ability to enter and infect your cells, resulting in more severe disease than had you not been vaccinated.<sup>32,33</sup>

Fall and winter are the seasons in which most coronavirus infections occur, be it SARS-CoV-2 or other coronaviruses responsible for the common cold. If ADE does turn out to be a common problem with these injections, then vaccinated individuals may in fact turn out to be at significantly higher risk of severe COVID-19 and a potentially lethal immune reaction due to pathogenic priming.

Another potential risk is that of Th2 immunopathology, a form of cell-based enhancement in which a faulty T cell response triggers allergic inflammation. This condition may in some cases overlap with ADE, and can, like ADE, be life-threatening.<sup>34</sup> In my view, there are still so many potential avenues of harm and so many uncertainties, I would encourage everyone to do your homework, keep reading and learning, weigh the potential pros and cons, ignore all pressure tactics and take your time when deciding whether to get any of these [COVID-19 gene therapies](#).

If you or someone you love has already received a COVID-19 vaccine and are experiencing side effects, be sure to report it, preferably to all three of these locations:<sup>35</sup>

1. If you live in the U.S., [file a report on VAERS](#)

2. Report the injury on [VaxxTracker.com](https://vaxstracker.com), which is a nongovernmental adverse event tracker (you can file anonymously if you like)
3. [Report the injury on the Children's Health Defense website](#)

## **The top 10 most QUESTIONABLE INGREDIENTS purposely put in today's already dirty vaccines**

Today's vaccines are "dirty" for more than a few reasons, and in many different ways. First off, FDA inspectors recently found horrific conditions at a plant that was manufacturing J&J vaccines, and more than 15 million doses of the batched, contaminated and [outright dirty concoctions](#) had to be trashed. We're talking about epic failure when it comes to quality control here.

The Baltimore factory that Johnson & Johnson had contracted to make their Covid-19 vaccines is obviously riddled with poorly trained staff and just a total boondoggle when it comes to following procedures. Besides all the insane ingredients vaccine manufacturers already use to juice up inoculations and cause horrific side effects for babies, children and adults alike, employees were caught dragging unsealed bags of medical waste around the lab, and then there was some suspicious 'brown residue' discovered on instruments.

This is documented by FDA inspectors, mind you, recently, in the Covid vaccine-making dungeons they call labs. This is like drug dealers making crack or meth in their basement. Our country's medical establishment has gone completely psychotic. Plant workers were outright IGNORING procedures, as noted by U.S. Food and Drug Administration inspectors. They even managed to [cross-contaminate](#) J&J's shot ingredients with those of AstraZeneca's toxic Covid jab.

In other words, these vaccines are already "dirty" in the sense that they cause the human body to create prions and proteins that can cause blood clots, cancer and dementia, but they're also "dirty" meaning contaminated with bacteria, viruses and other pathogens that aren't even part of the insane concoctions' formula. Get it? It's like the three stooges are running these vaccine labs all across America.

**That brings us to the top 10 insane ingredients that vaccine manufacturers purposely put in today's already dirty vaccines**

- #1. Infected African Green Monkey kidney cells
- #2. Peanut oil
- #3. Prion-creating mRNA
- #4. Mercury – a.k.a. thimerosal
- #5. Deadly wild pig disease “circovirus” Strains I & II
- #6. Formaldehyde
- #7. Monosodium glutamate
- #8. Animal blood and organ tissue
- #9. Aluminum
- #10. Human abortion cells

Oh yes they did. The insidious vaccine industrial complex uses dangerous and outright deadly ingredients to brew and concoct those dirty vaccines, especially the Smallpox vaccine. Live Smallpox viruses are literally grown in... wait for it... African Green Monkey kidney cells, as listed on the insert sheet for the ACAM2000 Smallpox vaccine, that’s approved by the FDA and highly recommended by the CDC, the American “Center for Disease Creation.”

Ready to solve the childhood peanut allergy phenomenon, that didn’t even exist before vaccines? Since vaccine manufacturers began using peanut oil, peanuts magically became the second most common food allergy in children. At least one in every fifty kids are so allergic to peanuts they can go into anaphylaxis shock and die, like when they get a new vaccine that contains traces of peanut oil (called antigens), not even listed on the ingredients insert. Oops. Blame it on genetics, like those quack MDs always do. “Sorry about your loss. Do peanut allergies run in the family, Mr. and Mrs. Johnson?”

### **Deadly mRNA “technology” and blood from other animals, including from humans, could drive 150 million Americans insane very soon**

Inflammation is the root of nearly all diseases and disorders, and that’s exactly what the mRNA prion-creating jabs cause. The China Virus inoculations are causing deadly blood clots and people are dying from them, but the mass media is funded by Big Pharma and the VIC (vaccine industrial complex), so it’s not covered in mainstream news anywhere. Johnson & Johnson’s jab and AstraZeneca’s Covid-19 vaccines have been recalled and put on hold for this same reason. Vaccine recipients, including test subjects in animal models tested in laboratories, are suffering from developed spongiform and neurological diseases commonly described as mad cow disease.

Animal organ tissue, animal cell lines, and animal blood are used to develop vaccines, and it contaminates them beyond “scientific” controls. Just as Covid-19 is currently morphing into different, more virulent strains, these viruses and pathogens, when combined, become exceptionally dangerous. The “proof is in the pudding,” as they say, and today’s vaccines contain impurities from animal cell lines that are included in the formulation that is injected. Let that sink in for a minute. We’re talking about animal tissues that are toxic to the human body except for when eaten normally and digested.

This is the [secret of the vaccine industry](#) they don't want you to understand: Vaccines bypass all body filters, including lungs, skin, and the digestive system, with these contaminants. These animal proteins include the following, and you can verify this on the [CDC vaccine ingredient website](#) yourself: monkey (kidney), cow (heart), calf (serum), chicken (embryo and egg), duck (egg), pig (blood), sheep (blood), dog (kidney), horse (blood), rabbit (brain), guinea pig, aborted baby fetus tissue, and of course, human albumin. All of this is mixed together in a filthy facility and inspected by the very people who run the only medical industry that can never be sued.

That's why there's a huge black market for human abortion organs and tissues. These biological warfare freaks are using human tissue to breed new diseases inside the vaccines (think chicken pox, Hepatitis-A, and Rubella jabs) from combinations of viruses, bacteria and deadly pathogens that now have gain of function capability, meaning diseases that once only spread from animal to animal now spread to humans and between humans. That, my friends, is what is meant by "dirty vaccines."

## **Almost half of all health care workers in U.S. haven't had COVID-19 vaccine, survey shows**

BY MEGAN CERULLO

CBS News

Every day, more Americans become eligible for the COVID-19 vaccine, yet nearly half of all frontline health care workers remain unvaccinated, even though they were given priority access to the first available doses.

Only 52% of all frontline health care workers say they have received even a first dose of a COVID-19 vaccine, according to a [new report](#) from the Kaiser Family Foundation and the Washington Post.

That leaves 48% of health care workers on the frontlines of the fight against COVID-19, including doctors, nurses, housekeepers and home health aides, entirely unprotected against and vulnerable to the virus.

Researchers surveyed more than 1,300 health care workers whose jobs expose them to patients or bodily fluids, putting them at higher risk than others of contracting COVID-19, which more than one year into the pandemic has infected nearly 30 million Americans and killed more than 500,000. This figure has been challenged so many times that the CDC even agrees they are incorrect.

### **Side effects concern some**

Three different vaccines that have proven effective against COVID-19 are currently on the market and being administered to large swaths of the U.S. population. Yet clearly, there have been gaps in distribution, as well as in the willingness of individuals to become inoculated against the virus.

Among those health care workers who remain unvaccinated, 12% said they have not yet decided if they will accept a shot in the arm. Another 18% said [they do not plan on](#)

[receiving a COVID-19 vaccine](#), citing concerns over side effects and the vaccines' newness, according to the survey results.

Employers also play a role in helping employees access doses. Workers who are self-employed report lower rates of vaccination.

More than 8 out of 10 vaccinated health care workers who are not self-employed say they received a COVID-19 vaccine through their employer. Meanwhile, only 1 out of 5 vaccinated health care workers who are based in patients' homes say they received a COVID-19 vaccine from their local health department.

### **Vaccine skepticism among Black Americans**

Racial disparities are evident in vaccination rates among health care workers, too. Black health care workers in particular have been reluctant to become vaccinated, with 53% of Black frontline health care workers saying they are not confident that the COVID-19 vaccine is safe. This holds steady across the general population — 47% of Black adults who are not necessarily health care workers feel similarly, according to the survey.

There has been a historic distrust of the medical community by many African Americans, stemming from past abuses that can resonate to this day. They include [experimental operations](#) on enslaved Black women in the 1840s as well as the infamous [Tuskegee Institute experiments](#) in the 1930s that examined the progression of syphilis in Black men who were misled to believe they were receiving treatment for the disease.

Employers across the U.S. [have the legal right to mandate the vaccine](#) as a condition of employment, however most are opting to offer bonuses and other incentives to employees who get jabbed, rather than enforce compliance.

Experts say the government, community leaders and even private companies must be a part of the effort to help individuals overcome vaccine hesitancy so the U.S. can achieve herd immunity.

The Biden administration's [American Rescue Plan](#), signed into law last week, will help fund states' rollout of the vaccine as well as other COVID-19 responses.

Specifically, the package provides \$7.5 billion to the U.S. Centers for Disease Control and Prevention (CDC) to spend on vaccination efforts. Some of the money will be spent on grants for states to improve COVID-19 vaccination distribution and administration.

**“Vaccine Checklist” Document secretly warns ‘healthcare professionals’ the covid ‘vaccine’ may KILL them, yet withholds this information from the public.** In this third shocking example of what’s coming out of the US State Government of Connecticut in terms of Covid-19 ‘vaccine’ propaganda,

the Government makes 'healthcare professionals' sign a detailed warning / disclaimer that admit the vaccine may kill them. See the full (victim's own responsibility) document: I believe the benefits outweigh the risks and I voluntarily assume full responsibility for any reactions that may result from either my receipt of the immunization(s)... Neither the provisioning mass vaccination center nor any of the Released Parties shall, at any time or to any extent whatsoever, be liable, responsible or any way accountable for any loss, injury, death or damage suffered or sustained by any person at any time in connection with or as a result of this 'vaccine' program or the administration of the 'vaccines' described above. This same document warns 'healthcare professionals' that the risk of anaphylactic reactions is so high, that "medical treatment for severe allergic reactions" must be made available in all mass '*vaccination*' centers.

In addition, this document reveals the known adverse reactions from Covid-19 'vaccines,' explaining they include: Feelings of impending doom ... Loss of consciousness ... Disorientation, confusion, weakness ... Diarrhea, nausea, vomiting ... Flickering lights, tunnel vision ... Changes in hearing / loss of hearing. The State of Connecticut 'recommends' continuing with a second dose of the 'vaccine,' even if the first dose caused these bizarre reactions. Today we bring you a true story about Covid-19 'vaccines' – the Government of Connecticut – and an open admission that 'vaccines' contain dangerous, even deadly substances (Spike Proteins) that are documented and known to cause **vascular damage** to humans. It's all admitted in these Connecticut Government documents shown (below), which admit these vaccines can be fatal. The original documents used in this research may be found at the following links: (all PDF docs)...

[Pre-vaccination screening form – V20 – Connecticut government website](#)  
[Covid-19 vaccine ingredients list and spike protein propaganda – Connecticut government website](#)

*Since Connecticut may remove documents we are mirroring them at NaturalNews.com servers:*

[Pre-vaccination screening form – V20 – Natural News mirror](#)  
[Covid-19 vaccine ingredients list and spike protein propaganda – Natural News mirror](#)

In these documents you will find admissions from the Connecticut Government. Review the graphic which shows the Connecticut Government falsely claiming the 'vaccine' Spike Protein is "a harmless protein," even while [the Salk Institute's own published research reveals, "the protein damages cells."](#) The Salk Institute research, published in the journal Circulation Research, concludes, "We show that Spike Protein alone can damage vascular endothelial cells by down-regulating ACE2 and consequently inhibiting Mitochondrial function." The Salk Institute further explains, "This is the first study to show that the damage occurs when cells are exposed to the Spike Protein on its own."

Moderna mRNA 'vaccine' contains an ingredient known as "SM-102," which is well documented to be toxic to Humans and Animals. See Link Below...

## Researchers find 1,000 different proteins in AstraZeneca's covid vaccine linked to deadly blood clots

Tuesday, May 18, 2021 by: [Ethan Huff](#)

**(Natural News)** A German scientist has discovered why the Wuhan coronavirus (Covid-19) “vaccines” made by AstraZeneca and Johnson & Johnson (J&J) are causing some recipients to develop deadly blood clots.

According to Prof. Andreas Greinacher, a blood expert from the [University of Greifswald](#), the two viral vector vaccines contain genetically modified (GMO) cold viruses that, upon injection, trigger an autoimmune response.

Stray proteins, Greinacher says, along with a preservative used specifically in the AstraZeneca jab known as ethylenediaminetetraacetic acid (EDTA), are directly responsible for causing the blood clots, he says.

Greinacher and his team identified more than 1,000 human-derived cell proteins in the injections that they believe are getting into people's bloodstreams and clamping onto a blood component known as platelet factor 4, or PF4, where they form complexes that activate the production of antibodies.

This then generates an inflammatory response throughout the body, as the immune system is tricked into believing that it has been infected with bacteria. The immune system then overreacts and goes nuts, essentially, causing deadly bleeding and clotting.

Greinacher compares the way the injections trigger this otherwise dormant immune response to “*awakening a sleeping dragon.*” And all for a virus with a 99.9-plus percent survival rate.

Covid vaccines kill, but the establishment still wants you injected

Prof. John Kelton from [McMaster University](#) in Canada says he and his team have replicated and confirmed Greinacher's findings, though they are unsure if his causal theory is accurate.

Greinacher, meanwhile, is hoping the two respective vaccine makers will cooperate in nailing down whether or not his causal theory is correct.

“We strongly support raising awareness of the signs and symptoms of this very rare event, and we are currently exploring a potential collaboration with Dr. Greinacher,” a J&J spokesperson is quoted as saying.

Numerous other peer-reviewed studies have likewise confirmed Greinacher's findings, reiterating that the type of blood clotting being observed from J&J and AstraZeneca injections is known as vaccine-induced immune thrombotic thrombocytopenia, or VITT.

Most of the science hubs investigating the clotting issue, which was first identified back in March, focus on a similar condition known as heparin-induced thrombocytopenia, or HIT, which has near-identical symptoms and outcomes to VITT.

“With HIT,” *The ‘Wall Street Journal’* reported, “the blood-thinning drug heparin causes clots paired with an abnormal decrease in the blood’s natural clotting agents.”

Other scientists have speculated that the vaccine adenoviruses themselves may be directly triggering the blood clotting, while still others are blaming the “genetic predispositions” of recipients so as to shift the blame away from Big Pharma.

Prof. Eric van Gorp from [Erasmus University](#) in the Netherlands also says that the flu-like symptoms many recipients of the vaccines experience post-injection could also be the result of autoimmune-provoking inflammation.

The reason why none of this has ever been reported in the past is because viral vector vaccine technology has never before been administered at scale. In other words, these shots, [just like their mRNA counterparts](#), are entirely experimental.

The only viral vector vaccine that even comes close is the Ebola injection developed by J&J, which was only given to about 60,000 people as of last July.

Meanwhile, the *Journal* and other mainstream media outlets are continuing to push the narrative that deadly blood clots are “rare,” and that people should still rush out and get injected as soon as possible to “save lives.”

“The symptoms are exactly the same as preclinical scurvy,” a commenter of ours wrote. “Vitamin C is essential to combat this.”

## **Severe Reactions in Healthy Teens From COVID-19 Shot Posted on May 20, 2021 by State of the Nation**

Analysis by Dr. Joseph Mercola  
STORY AT-A-GLANCE

- 17-year-old Everest Romney of Draper, Utah, developed blood clots in his brain within days of receiving a COVID-19 vaccine
- Emma Burkey, an 18-year-old from the Las Vegas area, received the Johnson & Johnson vaccine March 20, 2021, and was put into a medically induced coma within two weeks due to seizures and blood clots in her brain
- Another devastating report states that a 15-year-old boy from Colorado, with no preexisting conditions or allergies, died from cardiac failure two days after receiving Pfizer’s COVID-19 vaccine
- Victims’ families are hoping to receive help for medical bills, but they’re unlikely to get it; if you or a loved one dies or is permanently injured by an experimental COVID-19 vaccine, you cannot sue the drug company that made it

Healthy teenagers have been hospitalized,<sup>1</sup> and at least one death in a teen has been reported,<sup>2</sup> following experimental COVID-19 vaccinations being distributed under an Emergency Use Authorization (EUA) granted to vaccine manufacturers by the U.S. Food and Drug Administration. The adverse events are especially tragic since COVID-19 has a 99.997% survival rate among children and teens,<sup>3</sup> making the necessity of vaccination highly questionable.

One of the risks of receiving an experimental medical procedure like a COVID-19 vaccine is that each person who participates is part of the experiment. Unexpected adverse reactions can and do occur, even with vaccines that have been in use for decades.

Often, the reactions may be mild, including symptoms such as headaches, muscle pain, chills and fever, but in other cases, the reactions may be severe, debilitating and even deadly.

As of April 30, 2021, 3,837 reports of death were submitted to the U.S. Vaccine Adverse Event Reporting System (VAERS).<sup>4</sup> Past investigations have shown only between 1%<sup>5</sup> and 10%<sup>6</sup> of adverse reactions are ever reported to VAERS, which is a passive, voluntary reporting system, so the actual number could be much higher. One study funded by the U.S. government and published in 2011 found that less than 1% of vaccine adverse events are ever reported to VAERS.<sup>7</sup>

### **After Shot, Healthy Teen Develops Blood Clots in the Brain**

April 21, 2021, 17-year-old Everest Romney of Draper, Utah, received a COVID-19 vaccine. The next day, his neck became swollen and he developed severe headaches, which persisted for days. “He could not move his neck without the assistance of his hands,” his mother, Cherie Romney, told ABC 4 News.<sup>8</sup>

Everest’s pediatrician initially said the neck symptoms were due to a pulled muscle, but Everest also developed a fever, prompting his mother to push for answers.

The pediatrician prescribed antibiotics and a neck brace, suggesting it may be due to an injury from the basketball Everest plays, but Cherie pushed for a CT scan after migraines continued for more than a week, which revealed two blood clots in his brain and a third on the outside of his brain.

After spending time in the intensive care unit, Everest was discharged but swelling persisted in his eyes and they’re not sure what the future will bring. “The hardest thing was I let him get that shot. And he was healthy and well before,” Cherie said. “But you question it, you can’t help but question it when it all goes wrong ... It was pretty awful.”<sup>9</sup>

### **18-Year-Old Hospitalized With Blood Clots After COVID Shot**

Emma Burkey, an 18-year-old from the Las Vegas area, also developed blood clots in her brain following a COVID-19 vaccine. She received the Johnson &

Johnson/Janssen vaccine March 20, 2021, and was put into a medically induced coma within two weeks due to seizures and blood clots in her brain.

She is making a recovery in a rehabilitation center, but Bret Johnson, Burkey's minister who was asked to act as spokesman, told Fortune, "We don't know what's going to happen with Emma, how long it will take for her to return to a normal life."<sup>10</sup>

April 13, 2021, the U.S. Food and Drug Administration (FDA) announced it would pause the use of the [Johnson & Johnson COVID-19 vaccine](#) in the U.S. following reports of six cases of rare and severe blood clots called cerebral venous sinus thrombosis (CVST) combined with low blood platelet levels (thrombocytopenia). One death was reported as a result.<sup>11</sup>

Together, the condition is known as thrombosis-thrombocytopenia syndrome (TTS). At least nine more cases were reported to VAERS between April 13 and April 23, 2021, all in women between the ages of 18 and 59.<sup>12</sup>

The experimental Johnson & Johnson COVID-19 vaccine uses a human adenovirus vector to deliver double-stranded DNA for the SARS-CoV-2 spike protein into cells, similar to the AstraZeneca/Oxford University [experimental COVID-19 vaccine](#), which uses a chimpanzee adenovirus vector.<sup>13</sup>

May 10, 2021, an expert panel in Norway recommended that both AstraZeneca's and Johnson & Johnson's COVID vaccines be dropped from the country's vaccination campaign due to the [risk of blood clots](#).<sup>14</sup>

Denmark has also rejected Johnson & Johnson's vaccine for the same reason,<sup>15</sup> while in the U.S. the FDA and the U.S. Centers for Disease Control and Prevention (CDC) lifted the pause on the shot and recommended use of the vaccine should resume, stating, "At this time, the available data suggest that the chance of TTS occurring is very low, but the FDA and CDC will remain vigilant in continuing to investigate this risk."<sup>16</sup>

However, they did add a warning of the risk in their "Fact Sheet for Recipients and Caregivers," which states:<sup>17</sup>

"Blood clots involving blood vessels in the brain, abdomen, and legs along with low levels of platelets (blood cells that help your body stop bleeding), have occurred in some people who have received the Janssen [Johnson & Johnson] COVID-19 Vaccine. In people who developed these blood clots and low levels of platelets, symptoms began approximately one to two-weeks following vaccination.

Most people who developed these blood clots and low levels of platelets were females ages 18 through 49 years. The chance of having this occur is remote. You should seek medical attention right away if you have any of the following symptoms after receiving Janssen COVID-19 Vaccine:

- *Shortness of breath*

- *Chest pain*
- *Leg swelling*
- *Persistent abdominal pain*
- *Severe or persistent headaches or blurred vision*
- *Easy bruising or tiny blood spots under the skin beyond the site of the injection*

These may not be all the possible side effects of the Janssen COVID-19 Vaccine. Serious and unexpected effects may occur.”

#### COVID Vaccine-Related Death of Teen Reported to VAERS

Another devastating report in VAERS states that a 15-year-old boy from Colorado, with no preexisting conditions or allergies, died from cardiac failure two days after receiving Pfizer’s experimental mRNA COVID-19 vaccine.<sup>18</sup>

In an interview with Yahoo News, Tom Shimabukuro, deputy director of the Immunization Safety Office at the CDC, was quick to brush off the report, stating:<sup>19</sup>

“Anyone can make a report, and the information is not verified. If classified as serious, the CDC follows up to get medical records. Some of these reports might be true adverse reactions that are caused by the vaccine, and some of these reports are coincidental health events and not related to the vaccine at all ... The benefits of vaccination far outweigh any risks from vaccination.”

At least five deaths have been reported to VAERS following COVID-19 vaccination in the 6- to 17-year-old category.<sup>20</sup> Thirteen additional reports of life-threatening injury or permanent disability have also been reported in this age group.<sup>21</sup> Despite the unknown and potentially deadly risks, COVID-19 vaccines are being tested on children as young as 6 months old.<sup>22</sup>

Researchers at Yale School of Medicine are leading Moderna’s clinical trial of a [COVID vaccine for children](#) 6 months to 12 years old, which is being conducted on 6,750 children at 90 sites in the U.S. and Canada. But as noted by Dr. Inci Yildirim, associate professor of pediatrics (infectious diseases) at Yale School of Medicine:<sup>23</sup>

“A clinical trial for a children’s COVID-19 vaccine requires the consideration of many additional factors. Children are not little adults. As children grow and develop, their immune system grows and develops. A 16-month-old is not the same as a 16-year-old. They are both children, but their capacity to respond to the vaccines is not the same.”

Victims Looking for Help With Medical Bills, Unlikely to Get It

Burkey, the teen who ended up in an induced coma after vaccination due to blood clots and seizures, has medical bills of \$513,000, and that’s just the first round.<sup>24</sup> In the U.S., COVID-19 vaccine makers already have something of a [“free pass”](#) when it comes to [vaccine injury liability and lawsuits](#) under the Public Readiness and Emergency Preparedness (PREP) Act, passed in 2005 and amended in 2020.<sup>25</sup>

In 1986, the U.S. Congress created a federal no-fault [vaccine injury compensation program](#) (VICP) as an administrative alternative to a lawsuit for injuries and deaths caused by vaccines recommended by the CDC for children in the 1986 National Childhood Vaccine Injury Act.<sup>26</sup>

Over a period of 30 years, that law was weakened with congressional amendments and federal agency rulemaking, as well as a U.S. Supreme Court ruling in 2011 that effectively removed all liability from vaccine manufacturers.

Contested vaccine injury claims filed under the 1986 Act are adjudicated by special masters in the U.S. Court of Federal Claims in Washington, D.C., and there is a trust fund out of which claims are paid, sparing insurance companies representing vaccine makers and vaccine providers from costly payouts for vaccine injuries and deaths.<sup>27</sup> Only injury claims for vaccines routinely recommended by the CDC may be heard in this “vaccine court” created in the 1986 Act.

However, the U.S. Court of Federal Claims will not be involved in ruling in contested COVID-19 vaccine injury claims. The previously mentioned PREP Act, which was passed by Congress in 2005 and amended in 2020 with plenty of pharmaceutical industry influence, will separately deal with COVID-19 vaccine injury claims routed through the [Countermeasures Injury Compensation Program](#). As noted by Fortune:<sup>28</sup>

“The Countermeasures Injury Compensation Program, run by an obscure office within the U.S. Health and Human Services Department, covers medical costs and lost wages not paid by insurance. Some 445 claims had been filed as of April 26 for adverse reactions to either vaccines or treatments, according to the Health Resources and Services Administration [HRSA], which runs the program.”

Of these 445 COVID-19 related claims, about one-quarter are linked to vaccines, and so far no payouts have been received. While HRSA stated that no claims have been compensated because they don't have all of the required information, the program has a notoriously low rate of compensation.

In the last decade, only 39 of nearly 500 claims filed under the PREP Act have received federal compensation, most often from reactions caused by the H1N1 vaccine.<sup>29</sup> The bottom line, sadly, is this, as noted by [Barbara Loe Fisher](#) of the National Vaccine Information Center:

“Already wealthy drug companies were given at least \$9 billion from the government to develop experimental COVID vaccines in record breaking time,<sup>30</sup> shaving five to 10 years off the normal vaccine development, testing and licensing process.<sup>31,32</sup>

But that wasn't enough. Congress also handed companies a liability shield from lawsuits whenever the product government paid them to produce fails to work as advertised or a person is hurt by using it.<sup>33</sup>

If you or a loved one dies or is permanently injured by an experimental or soon-to-be FDA licensed COVID vaccine, you cannot sue the drug company who made it, even if there is evidence the company could have made it less reactive or more effective.”

## **Pfizer's Covid Injection Linked to Alzheimer's, Neurodegenerative Disease**

The long-term effects of Wuhan coronavirus (Covid-19) vaccination remain mostly unknown, but what we do know is that Alzheimer's and other neurological degenerative diseases are already being identified as among the health consequences.

A new study reports that it has been suspected for a while now, based on preliminary evidence, that Chinese Virus jabs could cause dementia. The public, however, is not being told about this risk when lining up for injection.

The risk of developing prion-based disease, the paper suggests, is potentially higher than many people realize. It could take a while for such disease to manifest, but the injections are getting the ball rolling by priming the brain for a degenerative unraveling.

“The current RNA based SARS-CoV-2 vaccines were approved in the U.S. using an emergency order without extensive long term safety testing,” it explains. “In this paper the Pfizer COVID-19 vaccine was evaluated for the potential to induce prion-based disease in vaccine recipients.”

Messenger RNA (mRNA) injections are especially risky because of how they permanently merge into the human genome. What this means is that a degenerative brain condition could appear at any time down the road if the conditions are ripe for such.

*“The RNA sequence of the vaccine as well as the spike protein target interaction were analyzed for the potential to convert intracellular RNA binding proteins TAR DNA binding protein (TDP-43) and Fused in Sarcoma (FUS) into their pathologic prion conformations,”* the report further explains.

TDP-43 is a protein known to cause dementia, while the FUS protein is known to cause ALS (Lou Gehrig’s Disease) and Hereditary Essential Tremors, science has shown.

### **mRNA technology was created to embed dementia-causing proteins into recipients’ DNA**

Experiments conducted for the study found that these two harmful proteins do, in fact, embed themselves within a recipient’s DNA post-injection. This appears to be what mRNA “vaccines” were designed to do, as they contain special genetic sequences that induce TDP-43 and FUS to fold into their pathologic prion confirmations. Virtually every week we learn of some new aspect that has been loaded into the packages mRNA delivers to its victims.

Keep in mind that mad cow disease is another prion-based disease that studies show could result from getting injected with an mRNA Wuhan coronavirus (Covid-19) vaccine.

*“The enclosed finding as well as additional potential risks leads the author to believe that regulatory approval of the RNA based vaccines for SARS-CoV-2 was premature and that the vaccine may cause much more harm than benefit,”* the study concludes.

*“The vaccine could be a bioweapon and even more dangerous than the original infection.”*

This is a very generous assessment in that mRNA injections are now harming and killing more people than the Chinese Virus itself ever could have all on its own. These

injections are clearly a deep state bioweapon designed to depopulate the planet, and the evidence of this will manifest itself in time.

When independent media outlets attempted to contact the *Centers for Disease Control and Prevention* (CDC) to find out why mRNA injections are still being administered, no response was given.

*“Why am I taking a vaccine for something that has a 99 percent survival rate?”* asked one commenter at *National File*. He has a point, based upon the CDC’s own reporting.

*“Why are you taking any vaccine?”* asked another. *“All diseases are survivable with enough vitamin C and D.”*

Others pointed out that zinc, magnesium, vitamin K2, and trace amounts of boron are also helpful in staving off illness by naturally boosting immunity. Nobody needs any vaccine if they follow these protocols.

*“I take Vitamins C, D (liquid), and E, and a multi-vitamin that contains zinc as well as probiotics daily,”* another wrote about her protocol. *“All of them are taken after a meal. I used to get pneumonia often before I started taking probiotics and Vitamin D.”*

[In the above report, the writer mentioned vitamin K2. Because of the growing issues of blood clotting as a result of the Vaxx, you might want to avoid K2 or consult your personal physician. I say that because K2 is a blood clotting agent, sometimes known as Prothrombin. Prothrombin is a protein present in blood plasma which is converted into active thrombin during coagulation. The prothrombin time, sometimes referred to as PT or pro time test, is a test to evaluate blood clotting. Prothrombin is a protein produced by your liver. It is one of many factors in your blood that help it to clot appropriately.

On the 8<sup>th</sup> day of birth, a male baby is bombarded with Prothrombin. In Biblical times the act of circumcision was performed on a male baby on the 8<sup>th</sup> day of birth, specifically for this reason. Four thousand years ago Abraham was instructed by God to circumcise males on the eight day for we read: ***“This is my covenant with you and your descendants after you, the covenant you are to keep: Every male among you shall be circumcised. You are to undergo circumcision, and it will be the sign of the covenant between me and you. For the generations to come every male among you who is eight days old must be circumcised, including those born in your household or bought with money from a foreigner—those who are not your offspring.”*** -(Genesis 17:10-12).

Approximately 3,500 years ago God instructed Moses to carry out the same command: ***“And on the eighth day the flesh of his foreskin shall be circumcised.”*** -(Leviticus 12:3). The human body has 2 blood clotting elements. One of them is called Vitamin K. Vitamin K2 is not formed in the body up until the 5th to the 7th day. The 2nd clotting factor which is essential is called Prothrombin. It surprisingly enough develops to 30% of normal by the 3rd day of life and after that...peaks at 110% on the 8th day, just before leveling off at 100% of normal.

If vitamin K2 is not present when a baby boy is circumcised, the baby will bleed to death. The reason why God established the Eight for circumcision is that vitamin K2 peaks in a newborn at 8 days of age. The 8th day is the optimum day for circumcision because of the highest presence of the clotting factor vitamin K2. Today when baby boys are circumcised within a couple of days of birth, they are administered vitamin K2 to help with blood clotting.

The main function of all types of vitamin K is to activate proteins that serve important roles in blood clotting, heart health and bone health. However, because of differences

in absorption and transport to tissues throughout the body, vitamin K1 and K2 could have profoundly different effects on your health.

There is also a spiritual aspect to the 8<sup>th</sup> day as well in terms of the Redemptive process of the Incarnation of Jesus Christ as the Messiah. It was not my intent to get off focus as we are learning just how dangerous the Vaxxs are and the mRNA plays a significant role in the Mass Murder of millions in the not too distant future!

**Only 5K out of 90MIL Africans have taken the vaccine. Africa knows!**

**Latest CDC Data Show Reports of Adverse Events After COVID Vaccines Surpass 200,000, Including 943 Among 12- to 17-Year-Olds**

VAERS data released today showed 227,805 reports of adverse events following COVID vaccines, including **4,201 deaths** and **18,528 serious injuries** between Dec. 14, 2020 and May 14, 2021.

The number of reported adverse events following COVID vaccines surpassed 200,000 according to data released today by the Centers for Disease Control and Prevention (CDC). The data comes directly from reports submitted to the [Vaccine Adverse Event Reporting System](#) (VAERS).

VAERS is the primary government-funded system for reporting adverse vaccine reactions in the U.S. Reports submitted to VAERS require further investigation before a causal relationship can be confirmed.

Every Friday, [VAERS](#) makes public all vaccine injury reports received as of a specified date, usually about a week prior to the release date. Today's data show that between Dec. 14, 2020 and May 14, a total of [227,805 total adverse events](#) were reported to VAERS, including [4,201 deaths](#) — an increase of 144 over the previous week — and [18,528 serious injuries](#), up 1,338 since last week.

## Search Results

From the 5/14/2021 release of VAERS data:

**Found 227,805 cases where Vaccine is COVID19**

Table

| Event Outcome           | Count          | Percent        |
|-------------------------|----------------|----------------|
| Death                   | 4,201          | 1.84%          |
| Permanent Disability    | 2,718          | 1.19%          |
| Office Visit            | 26,151         | 11.48%         |
| Emergency Room          | 59             | 0.03%          |
| Emergency Doctor/Room   | 29,808         | 13.08%         |
| Hospitalized            | 12,500         | 5.53%          |
| Hospitalized, Prolonged | 38             | 0.02%          |
| Recovered               | 98,703         | 43.33%         |
| Birth Defect            | 271            | 0.12%          |
| Life Threatening        | 3,898          | 1.71%          |
| Not Serious             | 95,123         | 41.79%         |
| <b>TOTAL</b>            | <b>227,805</b> | <b>100.00%</b> |

\* Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 227,805 (the number of cases found), and the Total Percentage is greater than 100.

This week's data showed [943](#) total adverse events, including [23](#) rated as serious, among 12- to -17-year-olds.

In the U.S., [268.4 million](#) COVID vaccine doses had been administered as of May 14. This [includes](#) 115 million doses of [Moderna's](#) vaccine, 144 million doses of [Pfizer](#) and 9 million doses of the [Johnson & Johnson](#) (J&J) COVID vaccine.

Of the **4,201** deaths reported as of May 14, 23% occurred within 48 hours of vaccination, 16% occurred within 24 hours and [38% occurred](#) in people who became ill [within 48 hours](#) of being vaccinated.

This week's VAERS data show:

- 20% of deaths were related to cardiac disorders.
- 54% of those who died were male, 44% were female and the remaining death reports did not include gender of the deceased.
- The [average age](#) of death was **74.7** and the [youngest deaths](#) reported include two 15-year-olds (VAERS I.D. [1187918](#) and [1242573](#) ) and a 16-year-old (VAERS I.D. [1225942](#)). There were other reported deaths in children under 16 that could not be confirmed or contained obvious errors.
- As of May 14, [1,140 pregnant women](#) reported adverse events related to COVID vaccines, including 351 reports of [miscarriage or premature birth](#).

- Of the [2,275 cases of Bell's Palsy reported](#), 51% were reported after [Pfizer-BioNTech](#) vaccinations, 42% following vaccination with the Moderna vaccine and 192 cases, or 10%, of Bell's Palsy cases were reported in conjunction with J&J.
- There were [195 reports of Guillain-Barré Syndrome](#) with 40% of cases attributed to Pfizer, 38% to Moderna and 26% to J&J.
- There were [65,854 reports of anaphylaxis](#) with 38% of cases attributed to [Pfizer's vaccine](#), 51% to [Moderna](#) and 11% to [J&J](#).
- There were [3,758 reports](#) of clotting disorders and other related conditions. Of those, [1,468 reports](#) were attributed to Pfizer, [1,093 reports](#) to Moderna and [1,093 reports](#) to J&J.

COVID vaccines may not work for millions with underlying conditions As The Defender reported May 19, some experts are questioning the CDC's recommendation that immunocompromised people get vaccinated after new research showed 15% to 80% of people with underlying health disorders and those on immunosuppressive medications mount few, if any, antibodies to COVID vaccines.

Yet, current CDC guidelines indicate those with compromised immune systems should be vaccinated for COVID even though "no data are available to establish COVID vaccine safety and efficacy in these groups" as people with compromised immune systems or those who take immunosuppressants for a medical condition were largely [excluded](#) from vaccine clinical trials.

[Dr. Meryl Nass](#), an internal medicine physician, said it's the responsibility of the CDC to determine the risks and benefits of every vaccine for different groups of people. For COVID vaccines, Nass said, the CDC has failed to publish that information, or tell the public which groups might be at a higher risk of suffering an adverse reaction that far outweighs any potential benefit.

### [CHD Calls on FDA to Take COVID Vaccines Off the Market - Submit a Comment](#)

#### **Ninth fully vaccinated Yankee player tests positive for COVID**

As The Defender [reported](#) May 19, a ninth, fully vaccinated member of the New York Yankees organization tested positive for COVID. Most of the reported cases were asymptomatic. [All nine were vaccinated](#) with the [J&J shot](#), making these cases what the CDC calls "[breakthrough](#)" infections.

Some in the medical community claim this is proof COVID vaccines work — because none of the nine became seriously ill or were hospitalized. A [CNN article](#) today quoted an infectious disease physician who said the mild cases were evidence the vaccines worked. But Dr. Meryl Nass, told The Defender that the data on COVID infections show young, healthy athletes wouldn't be expected to become seriously ill from COVID, regardless of vaccination status.

Nass said the breakthrough cases raise questions about [COVID test accuracy](#) and the vaccine's ability to prevent the virus and its transmission.

## **Employers may be held liable for “any adverse reaction” if they mandate COVID vaccines**

On May 20, The Defender [reported](#) that new guidance from the Occupational Safety and Health Administration ([OSHA](#)) will hold employers liable for adverse reactions if they require employees are vaccinated for COVID as a condition of employment, which could negatively impact the employer’s safety rating.

In the [Frequently Asked Questions](#) section of OSHA’s website having to do with COVID safety compliance, a question was asked whether an adverse reaction to a COVID vaccine had to be recorded if an [employer mandated vaccination](#) as a condition for employment.

OSHA [stated](#):

*“If you require your employees to be vaccinated as a condition of employment (i.e., for work-related reasons), then any adverse reaction to the COVID-19 vaccine is work-related. The adverse reaction is recordable if it is a new case under 29 CFR 1904.6 and meets one or more of the general recording criteria in 29 CFR 1904.7.”*

Conversely, [OSHA said](#) it will exercise enforcement discretion and will not require adverse reactions be recorded when an employer only “recommends” that employees receive the vaccine, while noting that for this discretion to apply, the vaccine must be truly voluntary.

In determining whether a vaccine is “voluntary,” the [website states](#), “an employee’s choice to accept or reject the vaccine cannot affect [his or her] performance rating or professional advancement,” and that an “employee who chooses not to receive the vaccine cannot suffer any repercussions from this choice.”

If employees are not free to choose whether or not to receive the vaccine without fearing negative recourse, then the vaccine is required and employers should refer to the section on COVID vaccines as a condition to employment.

## **J&J knew about issues at plant manufacturing its vaccine seven months before shut down**

On May 20, The Defender [reported](#) that the House Select Committee on Coronavirus launched a probe into Emergent BioSolutions — the plant manufacturing J&J’s vaccine — last month after the company acknowledged “serious deficiencies” in the company’s manufacturing that [caused a mix-up](#) of [AstraZeneca](#) and J&J doses.

During a congressional hearing Wednesday, it was revealed that J&J had documented serious contamination risks at the Emergent Baltimore plant in June 2020 — seven months before a [contamination incident](#) ruined 15 million doses of COVID vaccine and derailed the company’s vaccine production plans.

A [memorandum](#) released prior to the hearing raised questions about J&J's lack of oversight of the Baltimore facility, [large bonuses](#) paid to top executives despite failures, and described other evidence recently obtained by the House panel in their ongoing investigation into Emergent.

According to [Business Insider](#), CEO of Emergent, Robert Kramer, admitted to the House of Representatives during the hearing that more than 100 million doses of J&J's vaccine are on hold due to possible contamination.

It was the first time Kramer admitted the high figure of potentially spoiled vaccines after The New York Times [reported](#) in April the facility [may have jeopardized](#) 62 million vaccine doses in addition to ruining 15 million doses through cross-contamination with AstraZeneca vaccine ingredients.

*"No one is more disappointed than we are that we had to suspend our 24/7 manufacturing of new vaccine," Kramer said. "I apologize for the failure of our controls."*

### **Eric Clapton blames propaganda for severe adverse reaction to AstraZeneca**

On May 17, The Defender [reported](#) that 76-year-old Eric Clapton suffered a severe adverse reaction after getting the AstraZeneca COVID vaccine that left him fearing he would never play again.

*"Needless to say the reactions were disastrous, my hands and feet were either frozen, numb or burning, and pretty much useless for two weeks. I feared I would never play again," Clapton said. "But the propaganda said the vaccine was safe for everyone."*

Days after Clapton's criticism of vaccine "propaganda," the [Wall Street Journal](#) reported that U.S. vaccine makers are sponsoring ad campaigns targeting the roughly [one-third](#) of Americans who are reluctant to get a COVID vaccine.

Pfizer, Moderna, Regeneron and other pharmaceutical companies are sponsoring ads on TV, radio and social media praising COVID vaccines and medications in an effort to increase vaccinations. Unlike ads for drugs where brand names are featured, general "get the vaccine" ads don't have to follow legal guidelines, which include listing the drug's potential side effects.

### **74 days and counting, CDC ignores The Defender's inquiries**

According to the [CDC website](#), "the CDC follows up on any report of death to request additional information and learn more about what occurred and to determine whether the death was a result of the vaccine or unrelated."

On March 8, [The Defender](#) contacted the CDC with a [written list of questions](#) about reported deaths and injuries related to COVID vaccines. After repeated attempts, by phone and email, to obtain a response to our questions, a health communications specialist from the CDC's Vaccine Task Force contacted us on March 29 — three weeks after our initial inquiry.

The individual received our request for information from VAERS, but said she had never received our list of questions, even though employees we talked to several times said CDC press officers were working through the questions and confirmed the representative had received them. We provided the list of questions again along with a new deadline, but never received a response.

[The Defender](#) also followed up with the CDC's media department, which told us the COVID response unit would be informed that the health communications specialist never responded. No explanation was given as to why our inquiries were ignored. We were told to call back, which we did numerous times.

On May 19, a CDC employee said our questions had been reviewed and our inquiry was pending in their system, but would not provide us with a copy of the response. It has been 74 days since we sent our first email inquiring into VAERS data and reports.

[Children's Health Defense](#) asks anyone who has experienced an adverse reaction, to any vaccine, to file a report following [these three steps](#).

## **How the CDC is manipulating data to prop-up “vaccine effectiveness” New policies will artificially deflate “breakthrough infections” in the vaccinated, while the old rules continue to inflate case numbers in the unvaccinated.**

by Kit Knightly [Off-Guardian.org](#)

The US Center for Disease Control (CDC) is altering its practices of data logging and testing for “Covid19” in order to make it seem the experimental gene-therapy “vaccines” are effective at preventing the alleged disease.

They made no secret of this, announcing the policy changes on their website in late April/early May, (though naturally without admitting the fairly obvious motivation behind the change).

The trick is in their reporting of what they call “breakthrough infections” – that is people who are fully “vaccinated” against Sars-Cov-2 infection, but get infected anyway.

Essentially, Covid19 has long been shown – to those willing to pay attention – to be an entirely created pandemic narrative built on two key factors:

1. **False-positive tests.** The [unreliable PCR test](#) can be manipulated into reporting a [high number of false-positives](#) by altering the cycle threshold (CT value)
2. **Inflated Case-count.** The incredibly [broad definition](#) of “Covid case”, used all over the world, lists anyone who receives a positive test as a “Covid19 case”, even *if they never experienced any symptoms*.

Without these two policies, *there would never have been an appreciable pandemic at all*, and now the CDC has enacted two policy changes which mean they no longer apply to vaccinated people.

Firstly, they are **lowering their CT value when testing samples from suspected “breakthrough infections”**.

From the CDC’s instructions for state health authorities on handling “possible breakthrough infections” (uploaded to their website in late April):

For cases with a known RT-PCR cycle threshold (Ct) value, submit **only specimens with Ct value  $\leq 28$**  to CDC for sequencing. (Sequencing is not feasible with higher Ct values.)

Throughout the pandemic, CT values in excess of 35 have been the norm, with labs around the world going into the 40s.

Essentially labs were running as many cycles as necessary to achieve a positive result, despite experts warning that this was pointless (even [Faucet himself](#) said anything over 35 cycles is meaningless).

But NOW, and only for fully vaccinated people, the CDC will only accept samples achieved from 28 cycles or fewer. That can only be a deliberate decision in order to decrease the number of “breakthrough infections” being officially recorded.

Secondly, **asymptomatic or mild infections will no longer be recorded as “covid cases”**.

That’s right. Even if a sample collected at the low CT value of 28 can be sequenced into the virus alleged to cause Covid19, the CDC will no longer be keeping records of breakthrough infections *that don’t result in hospitalization or death*.

From their [website](#):

*As of May 1, 2021, CDC transitioned from monitoring all reported vaccine breakthrough cases to focus on identifying and investigating only hospitalized or fatal cases due to any cause. This shift will help maximize the quality of the data collected on cases of greatest clinical and public health importance. Previous case counts, which were last updated on April 26, 2021, are available for reference only and will not be updated moving forward.*

Just like that, being asymptomatic – or having only minor symptoms – will no longer count as a “Covid case” *but only if you’ve been vaccinated*.

The CDC has put new policies in place which effectively created a tiered system of diagnosis. Meaning, from now on, unvaccinated people will find it much easier to be diagnosed with Covid19 than vaccinated people.

Consider...

**Person A** has not been vaccinated. They test positive for Covid using a PCR test at 40 cycles and, despite having no symptoms, they are officially a “covid case”.

**Person B** has been vaccinated. They test positive at 28 cycles, and spend six weeks bedridden with a high fever. Because they never went into a hospital and didn't die they are NOT a Covid case.

**Person C**, who was also vaccinated, did die. After weeks in hospital with a high fever and respiratory problems. Only their positive PCR test was 29 cycles, so they're not officially a Covid case either.

The CDC is demonstrating the beauty of having a “disease” that can appear or disappear depending on how you measure it.

To be clear: If these new policies had been the *global approach* to “Covid” since December 2019, **there would never have been a pandemic at all.**

If you apply them only to the vaccinated, but keep the old rules for the unvaccinated, the only possible result can be that the official records show “Covid” is much more prevalent among the latter than the former.

This is a policy designed to continuously *inflate* one number, and systematically *minimize* the other.

What is that if not an obvious and deliberate act of deception?

Read the full article at [Off-Guardian.org](https://www.off-guardian.org).

## Senior Chinese Communist Party Loyalist Professor Declares Victory in “Biological Warfare”

As Americans deal with a tightening noose of restrictions on their freedoms and demands that they submit to injections of what are essentially experimental biological agents, which require personal "passports" for basic functions such as work, commerce, and entertainment, a senior Chinese academic and Chinese Communist Party loyalist has declared victory in "biological warfare" which has 'put the US back in its place' ("US was beaten back to its original shape.")

The statement by a senior CCP member recalls Soviet leader Nikita Khrushchev's menacing "[we will bury you](#)" remarks during the Cold War with Russia. In 1956, as the US, NATO, and the communist Soviet Union engaged in a race to dominate the planet, through nuclear and conventional weapons, Krushchev famously said at a meeting of Western ambassadors in Moscow:

***"Whether you like it or not, history is on our side. We will bury you!"***

The speech prompted the envoys from twelve NATO nations and Israel to leave the room.

According a translation by blogger Jennifer Zeng, senior Fudan University researcher Professor Ping Chen said in a video:

***"In 2020, China won the trade war, science & technology war, and especially the biological war. The achievement is unprecedented. This is an epoch-making historical record. So for the liberal, America-worshipping cult within China, their worship of the US is actually unfounded. After this trade war and biological warfare, the US was beaten back to its original shape."***

***" So I think Trump's attempt to restore the declining international status of the US during his 4 years has failed."***

***Below: Prof. Ping Chen ([view in Bitchute](#))***

**[Full transcript](#)**

Chen then goes on to describe the "failure" of "neoliberalism," and the western development model.

In latest Fauci Virus news, Santa Clara County, CA has issued an order for businesses to submit the [Covid-19 "vaccination" status](#) of all employees, presumably to be entered into a central database. The measure is a step toward requiring all Americans to submit to 24/7 "health surveillance" which would track and identify all persons and their personal records and information along the lines of a total surveillance and control platform [patented by Microsoft and Bill Gates](#).

This week a former [US Army research scientist](#) at the U.S. Army Medical Research Institute of Infectious Diseases at Fort Detrick, Maryland, and former AstraZeneca executive has alleged that the "creation" of the COVID-19 virus:

**“was entirely under the command and control of the People’s Liberation Army (PLA)**

In the first quarter of the year the Chinese economy increased by a record 18%. Last year the US economy [shrank 2.3%](#) due to the controlled collapse of small, independent businesses as a result of lockdowns, and recovered [only 10%](#) in the first quarter of 2021.

US billionaires, who almost always have a “China component” in their business strategies, increased their wealth [by \\$1 trillion](#) during last year’s pandemic.

With tightening social controls justified by the Fauci Virus, and the long-term effects of millions of mRNA injections uncertain, the future of the US is in doubt. Although China has its own vaccine, SinoVac, it is not based on novel mRNA technology, but is more traditional and only mildly effective.

The number of deaths possibly [related to the COVID injections](#) which have been reported to the CDC’s [Vaccine Adverse Events Reporting System](#) (VAERS) is now over **4,200** in the U.S., approximately one-third of them [within 48 hours](#) of receiving the shots. Although the pharma companies deny any causal relation, [requests for medical reports](#) and autopsies to confirm this have been ignored.

Many doctors and scientists, whose [voices have been silenced](#), see no need for a vaccine at all for a [99.8% survival rate](#) virus, overall, and 96% for people over 70. Former Vice President and Chief Science Officer for Pfizer for 16 years, [Dr. Mike Yeadon](#), says:

***“There is absolutely no need for vaccines to extinguish the pandemic. I’ve never heard such nonsense talked about vaccines.”***

***“You do not vaccinate people who aren’t at risk from a disease. You also don’t set about planning to vaccinate millions of fit and healthy people with a vaccine that hasn’t been extensively tested on human subjects,”***

Although it is frequently [compared to the Spanish Flu of 1918](#), in global deaths per capita, COVID nowhere near, and more similar to the [1957](#) and [1968 flu](#) pandemics, which few in the general population even knew about, and never prompted talk of masks or lockdowns.

This week it was reported in these pages that a [Former US Army scientist and AstraZeneca executive said the “creation” of COVID was under People’s Liberation Army command](#).

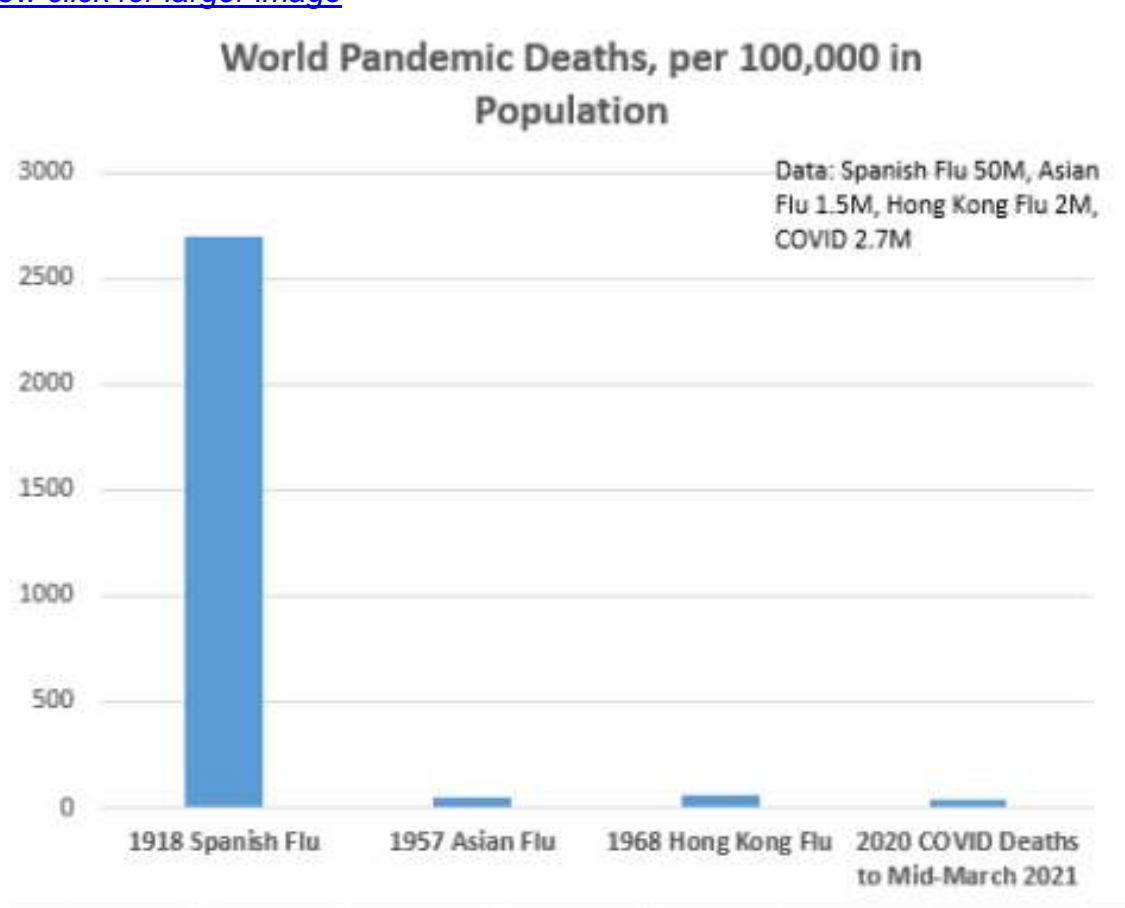

Bill Gates’s Microsoft has taken an early lead in patents and research which would actually be able to [“mine” bits of digital currency](#) from people linked to an artificial intelligence platform connected by 5G. But in order for the scheme to work, access to

bodies and bloodstreams must be mandated, hence the drive toward mandatory vaccination, forever.

[PC Magazine](#) writes: ***“the human user would need to have a sensor attached to, or installed in, their body. Microsoft envisages users being rewarded for allowing their bodies to be monitored in this way by paying them in cryptocurrency for performing specific tasks.”***

Below: **General Ningyi Jin, PhD, researcher on transgenic mouse model containing the human receptor for coronaviruses (Source: [Former US Army Scientist and AstraZeneca Exec Says “Creation” of COVID Was Under People’s Liberation Army Command](#))**

**Ningyi Jin**

A week ago Senator Rand Paul, in grilling Dr. Anthony Fauci, and his involvement with “Gain-of-Function” with the Coronavirus research, Dr. Fauci lied that he had done any work on the issue of “Gain-of-Function”, when in fact, Dr. Fauci had made two payments of \$3.7 million dollars each to the CCP for work he pursued long after former President

Obama had stopped it, and then later President Trump ordered Fauci's funding cut. 250 scientists had signed a letter to the fact Dr. Fauci was in violation of federal law in his "Gain-of-Function", a term to describe making a virus more lethal.

Because of this exposure, the CCP were reportedly shredding documents and emails which mention or had Dr. Fauci's name on them. It appears that Dr. Fauci and his financial benefactor Bill Gates have been thrown under the bus as they say when a favorite has become expendable baggage.

As former [CDC Director Robert Redfield](#) becomes the latest high-profile scientist to conclude that the COVID is man-made, a former advisor to British Prime Minister [David Cameron](#), Steve Hilton, has unearthed NIAID grant dates and project numbers for gain-of-function research funding that was funneled to the Wuhan lab. Hilton leaked certain key information facts to an Australian newspaper, from which was disseminated through the Internet.

Dr. Anthony Fauci has been director of the NIAID, a sub-unit of the NIH, since 1984. Fauci is [currently under fire](#) for approving the grants. The research concerned manipulation of the precise characteristics which give COVID-19 its unique pathology, especially transmissibility.

Former [Director of National Intelligence John Ratcliffe](#) said last month:

***“...the Chinese military ordered scientists at the Wuhan lab to experiment with coronaviruses as early as 2017...some of those viruses were 96.2% similar to the current coronavirus.”***

The Chinese Communist Party (CCP) is an authoritarian government which exercises complete control over all aspects of Chinese society, and, [according to NBC News](#), has been found guilty by an international tribunal of live organ harvesting from political prisoners.

Last December, an [unprecedented leak](#) was reported by an Australian newspaper, but ignored by the US media, that COVID injection-makers Pfizer and AstraZeneca were infiltrated by at [least 123 CCP loyalists](#). Australian Sky News host [Sharri Markson said](#): “if called on, are answerable directly to the Communist Party” and President Xi himself.

The plague released from the Wuhan lab in China, by the CCP was meant for a biological attack on America and the world. A communist Professor from China recently announced that America was defeated by the CCP from their biological attack and put back in our place. His very own words above is a victory statement. We have at least 3 Chinese scientists who have provided proof that it was a deliberate attack. Two of them are in hiding and one has died.

There is so much being kept from the public, but it is important that you do NOT take a Vaxx shot, or any so-called “booster” shots. I have been covering this for 17 months now, and I am convinced 100% this is all part of the global plan to “Depopulate” the world.

While I cannot share more on the larger background story of this “bioweapon”, there are many factors and external facts that track this back to the UK, home of the Pirbright Institute located in Surrey, UK, about 25 miles outside of London. I have written quite a few articles on this and the role of the UK MI6, the CIA, the CCP, the use of 5G to hijack the Wuhan 5G base station, etc. The Pirbright Institute is the real root of this story, a Rothschild-owned bio-animal lab. Bill Gates and Richard Rothschild both own patents on the alleged Covid-19 virus. Their patents go back almost ten years at this point, and so there is a much larger story.

I can tell you the total story could be a block-buster Tom Clancy novel. The important point is there is NO Covid-19 virus, but there is a Vaxx that will do a number of things:

1. Modify your DNA into being a Cyborg, part-human and part A.I.,
2. Make you ill, and/or die from the Vaxx,
3. Steal your DNA,
4. Do nothing if you got the shot with the saline solution placebo!
5. Some Vaxxed recipients have a magnetic chip in their arms.

Del Bigtree of the High Wire medical show sent a lady out to Laguna Beach, CA to do a survey of beach goers and six out of fifteen had magnets stick to the spot where they

received their Vaxx shot. Here is what happened: A youtuber set up a "magnet challenge" site on a public street, telling people to test to see if the magnet sticks to their arm after the shot. 15 people were tested and 6 had the magnet stick. Since they probably go by rounded numbers (that's the most logical way to do it) 4 out of 10 jabs is the actual shot. The rest likely received the saline solution placebo.

I watched the video of this last story until it was censored on the Internet site I saw it, but at the bare minimum should raise alarm as to what really is going on with these Vaxxs.

## **Slovakia Report: Covid "Tests" Contaminated With Nanotech Hydrogels & Lithium**

[May 22, 2021. This article was posted by TLB Staff](#)

### **Slovakia Report: Covid "Tests" Contaminated With Nanotech Hydrogels And Lithium**

By: Dr. Ariyana Love

A newly released Slovakian report reveals that "covid tests" are contaminated with *nanotech hydrogels* and *lithium*. Lithium is used in the lipid compound coating nanobots which are inserted into the hydrogels for ballistic delivery of biological agents.

The lipid coating is used to trick and bypass your God-given immune system with the nanobots that contain a deadly Gain-of-Function spike protein. This lab enhanced [spike protein is a weaponized pathogen](#) with a DNA payload that gets deposited directly into human cells.

Nanotech hydrogels were created for ballistic delivery of vaccines but [frontline medical experts](#) now agree these are self-replicating *Biological weapons*. The experts have also [called for the vaxxed](#) to be *quarantined*.

The so-called “covid tests” contain big pharma’s unapproved medical experiment. I wrote about this in detail here: [Masks And Covid Tests Contain Nanotech Vaccines Without Informed Consent](#). Each time you let them swab your nasopharyngeal cavity you are subjecting yourself to a dangerous biological experiment without your Informed Consent. This is an *act of terrorism*. These Bioweapons easily pass the blood/brain barrier and enter your brain. The swabs are *deliberately* being contaminated and we must get to the bottom of who’s manufacturing these weapons of war. The human species is under biological attack. The public has been lied to from the start and bar none, this is the greatest conspiracy of all time!

Mark Sexton is an ex-police official in the UK who [went public with the Slovakian report](#) knowing full-well that mainstream media won’t touch the story. Mr. Sexton is pleading with the worldwide public to take the PCR “test kits” to your local police station and remove the so-called “tests” from circulation at once.

Keep in mind there are *children* in the UK inserting these medical devices up their noses 3-4 times per week and many countries are mandating “testing” in schools.

### **Slovakia Report: PCR “Tests” Used As Act Of BioTerrorism Nanotech Hydrogels**

Dr. Carrie Madej was the first expert to open up a public discussion on the nanotech hydrogels. In her most recent interview Dr. Madej takes us through a Power point presentation on mRNA pharmaceuticals, hydrogels for gene delivery, DNA mutation, immune health, synthetic coding and long-term potentials of genetically modifying the human species through the Covid-19 shots, swabs and masks.

In the Brighteon [interview with The New American](#), Dr. Madej explains in detail how nanobots are being tested on humans like lab rats, delivering drug and chemical payloads, explosives, toxins and gene editing technologies without Informed Consent. DARPA has a huge role in developing these Biotech weapons which are permanently altering the human genome and genetically modifying the human species into *hybrids*, part artificial and part human which allows for branding, ownership and external control over body, mind and emotions.

Moderna’s Operating System will allow for humans to be connected and controlled by a singular AI computer which the entire Internet is already on. Attached to the hydrogels is a DNA sequence to a drug/chemical payload. The synthetic hydrogels are *self-replicating* and that means the alien (unidentified) DNA and RNA are being fused with your own tissue and altering irreversibly what it means to be human. This artificial substance grows inside your body in a biosynthesis of inorganic nanomaterials using microbial cells or bacteriophages. Millions of *foreign proteins* are being *synthesized* into the bodies of the vaxxed as we speak. The nanobots can also disassemble from the nanotube, reassemble, build and reproduce on their own inside your body.

Nanobots also generate their own electricity. They're able to use your own energy like a battery, converting your heat (energy) into electricity. It even uses your brain data while you're sleeping, like a parasite to its host.

Nanobots and hydrogels are an "*on demand delivery system*" targeting your bodies' cells with the DNA payload. Hydrogels are biosensors which work tirelessly with external electronics, forwarding your biometric data to the AI. This new operating system is patented for cryptocurrency exchanges using the human body. This is the ultimate intrusion of your bodies' cells, personal thoughts and your bodily autonomy which is 100% breached with this biohacking technology that's making people part synthetic. The vaxxed are therefore already themselves *patented*.

Rejections and Allergic Reactions to the lipid-nanotech coating on hydrogels are causing anaphylactic shock, seizures and deaths. The spike protein being inserted and coded into human cells is also the chief cause of blood coagulation which leads to rapid blood clotting.

Dr. Madej has confirmed that these Biotech weapons are also being delivered through nasopharyngeal penetration via the PCR "testing kits". The drug and chemical payloads carried by the nanoparticles are delivered via carbon nanotube hydrogels, as I documented previously. Media reports have also revealed that *graphene fibers* have been found in most masks which are contaminating the respiratory pathways of wearers (including children) and delivering the payload into the body.

Ethylene oxide, an off-gassing poison not approved by the EU or US regulators is also being sprayed on covid masks and swabs. Again, we must get to the bottom of who's responsible for this.

[Scientific lab research](#) conducted by Mike Adams from Natural News, produced photographic evidence that the covid "test kits" and China-made masks are indeed INFESTING the lungs with tiny particles. Mr. Adams released 40+ lab photos of covid swabs and masks and proved they do indeed contain mysterious red and blue fibers. Some of these fibers have hooks or "grippers," and appear to be designed to latch onto soft tissue, something not found in natural fibers. The grippers are consistent with the nanotech hydrogels and carbon nanotubes (nanoworms) which are designed to attach them to tissue inside the body and wait for external command by classified EMF frequency.

Pic: Natural News carbon nanotube hydrogel with gripper

When exposed to UV light, strange sparkles come off the synthetic swab strands. This is consistent with carbon nanotube hydrogels which are *semi-conductors*. The swab fibers are bio-luminescent because they are producing their own light and electricity.

Mr. Adams explains in more detail about the inorganic fibers he found in his Brighteon podcast [here](#).

Are these the same fluorescent worm-like Micelles developed and patented for drug delivery, as [published in PubMed.Gov](#)?

A new [peer-reviewed study](#) in the scientific journal *Water Research* just called for a full investigation into face masks as it raises serious questions about their safety for daily use and their impact on the environment.

We are under a *biological attack*. The genetic hybridization of humans will ultimately lead to our rapid extinction according to [Biotech whistleblowers](#) such as Geert Vanden Bossche and Dr. Michael Yeadon and leading Immunologist Professor Dolores Cahill. If we do not stand united and resist we are facing not only worldwide depopulation but also the *total enslavement of the human species* through genetic engineering and transmutation.

## Conclusion

We need to stop using masks and take all covid “test kits” to our local police stations. The medical system has failed us. The central banks are enslaving us and driving us to a totalitarian worldwide take-over. We have to take our power back and withdraw from

their evil system, altogether. If everybody withdrew their money from the banks and stopped paying taxes to our treasonous governments it would be entirely lawful. This is how we *withdraw our consent*. We have no other choice. Either we become enslaved at the genetic level, transhumanized and depopulated or we say “fuck the system” and rely on ourselves. We must unite with our neighbors and set up a system for the barter and trade of goods and services just as we did for thousands of years in the past, quite successfully.

All governments who partook in this fraud are now being sued by World Freedom Alliance for Crimes Against Humanity. The [greatest Nuremberg of all time](#) is underway, *Nuremberg Two* and governments have been served with Notices of Liability. The eugenicist “elites” can’t stop what’s coming for them even though they’re trying like hell to reduce the population and reset history in order to hide their crimes.

## IBM has recently announced it can put 333-million Transistors onto a single Human Hair!

<https://www.youtube.com/watch?v=DZ0yfEnwipo>

Imagine 333 million transistors per square millimeter on something as small as a human hair. A Human Hair is about 76 to 127 microns, or 76,000 to 127,000 Nanometers. That is extremely small, and invisible to the human eye.

- IBM will announce a *new breakthrough* in semiconductor scaling, the world's first chip with 2nm technology.

- This new technology combines:
  - > An industry-first *Bottom Dielectric Isolation* to enable 12nm gate length
  - > A 2<sup>nd</sup> generation *Inner Spacer dry process* for precise gate control
  - > *EUV patterning* to produce variable Nanosheet widths from 15nm to 70nm
  - > A novel *Multi-Vt scheme* for both SoC and HPC applications
- Expected to offer 45% performance improvement or 75% power reduction compared to 7nm

If you are wondering what this has to do with Mass Murder, I will explain. In the time since Pfizer reported their Vaxx was not a vaccine, rather was a “Delivery System”, the obvious question was, and What is it delivering into those getting their Vaxx?

This recent product announcement by IBM is huge by anything one can imagine, but it should be a comparison with the miniaturization that already exists at twice its size, which is also invisible to the human eye. The QuantumDot/Hydrogel ID2020 with

Luciferace “Mark” of the Beast can hold a person’s entire history, medical records, financial records, education, qualifications, certifications, anything and everything on a person linked to his or her DNA ID. One can just as easily be erased from existence with the control of a switch to such a system. So IBM has created a 2 Nanometer CPU. Think VACCINE, think CHIP!

Let this information be a warning to you about the potential dangers of the Vaxx mania that exists.

**Nobel Prize winner French Virologist Prof. Luc Montagnier in an interview has made a startling claim that the COVID-19 vaccines itself are creating variants.**

**He said that epidemiologists know but are “silent” about the phenomenon, known as “Antibody-Dependent Enhancement” (ADE).**

**While it is understood that viruses mutate, causing variants, Luc Montagnier contends that “it is the vaccination that is creating the variants.”**

The 2008 Nobel Laureate made the explosive comments as part of a larger interview (watch below) with Pierre Barnérias of the French Hold-Up Media earlier this month.

The relevant part of the interview was translated by RAIR Foundation USA.

As reported by [GreatGameIndia](#) last year, [Luc Montagnier confirmed the study linking COVID-19 and HIV](#) conducted by Indian scientists.

A group of Indian scientists discovered that [coronavirus was engineered with AIDS like insertions](#). The study concluded that it was unlikely for a virus to have acquired such unique insertions naturally in a short duration of time.

Readers of reports that 18 fragments of the HIV genome and elements of SARS2 would remember how after we published the results of the study, it attracted heavy criticism from social media experts to an extent that even the authors were forced to retract their paper. The Nobel laureate's confirmation finally put all such amateur criticism to rest.

It was in this context that the Batwoman of China, Shi Zhengli said, *"I advise those who believe... academic analysis of Indian scholars, to shut their stinking mouths"*.

Last year, in a major study a group of researchers warned in the *The Lancet* medical journal that [COVID-19 vaccines currently in development could increase the risk of acquiring HIV](#), potentially leading to an increase in infections.

As [GreatGameIndia](#) reported, even [Australia scrapped a billion dollar coronavirus vaccine agreement](#) after several trial participants tested HIV positive.

What's Going On? [India Sees Surge Of Deaths And Injuries Following COVID-19 Vaccine Roll-Out](#).

### **How Vaccines Are Creating Variants**

Prof. Montagnier referred to the vaccine program for the coronavirus as an *"unacceptable mistake"*.

*"Mass vaccinations are a "scientific error as well as a medical error," he said.*

*"It is an unacceptable mistake. The history books will show that, because it is the vaccination that is creating the variants," Prof. Luc Montagnier continued.*

The prominent virologist explained that *"there are antibodies, created by the vaccine," forcing the virus to "find another solution" or die. This is where the variants are created. It is the variants that "are a production and result from the vaccination."*

### **Antibody-Dependent Enhancement (ADE)**

Prof. Montagnier said that epidemiologists know but are "silent" about the phenomenon, known as "Antibody-Dependent Enhancement" (ADE).

Prof. Montagnier explained that the trend is happening in "each country" where "the curve of vaccination is followed by the curve of deaths."

We observed the same in India as well. India saw nearly 750% increase in COVID-19 cases in less than a month. Was this spike logical? Did the [mass vaccination drive in](#)

[the metro cities cause the second COVID-19 wave in India?](#) Or is there something else? Results of a study published in the *'International Journal of Clinical Practice'* found that there is enough literature available to determine that [COVID-19 vaccines increases the risk of more severe diseases](#) and that recipients should be made aware of all the risks before being vaccinated.

The scientists concluded that vaccines may worsen COVID-19 disease via antibody-dependent enhancement (ADE) and that the risks are kept secret in clinical trial protocols and consent forms.

The Nobel Laureate's point is emphasized by information revealed in an [open letter](#) from a long list of medical doctors to the European Medicines Agency. **The letter stated in part that *"there have been numerous media reports from around the world of care homes being struck by COVID-19 within days of vaccination of residents."***

**Prof. Luc Montagnier continued to say that he is doing his own experiments with those who become infected with the coronavirus after getting the vaccine. *"I will show you that they are creating the variants that are resistant to the vaccine,"* he said.**

This report from Dr. Luc Montagnier will likely be a source of major evidence that will expose the entire Coronavirus scandal that began with the World Health Organization falsely claiming the world was in the throes of a pandemic.

***“For God hath not given us the spirit of fear; but of power, and of love, and of a sound mind”*** -(2<sup>nd</sup> Timothy 1:7)

Blessings, Jesus is at the door!
