

Mass Murder

Part 13

OSHA Pulls Guidance Stating Employers May Be Held Liable For 'Adverse Reactions' If They Mandate Vaxx

The Occupational Safety and Health Administration threw workers under the bus over the weekend by pulling their new guidance which stated that employers they may be held liable for “any adverse reactions” if they mandate employees take COVID-19 vaccines “as a condition of their employment.”

On April 20, OSHA released a new [FAQ](#) on their website stating that if employers require their employees to be Vaxxed “*then any adverse reaction to the COVID-19 vaccine is work-related*” (and therefore must be recorded for, at the very least, worker compensation claims).

Vaccine Related

Are adverse reactions to the COVID-19 vaccine recordable on the OSHA recordkeeping log?

If I require my employees to take the COVID-19 vaccine as a condition of their employment, are adverse reactions to the vaccine recordable?

If you *require* your employees to be vaccinated as a condition of employment (i.e., for work-related reasons), then any adverse reaction to the COVID-19 vaccine is work-related. The adverse reaction is recordable if it is a new case under 29 CFR 1904.6 and meets one or more of the general recording criteria in 29 CFR 1904.7.

I do not require my employees to get the COVID-19 vaccine. However, I do recommend that they receive the vaccine and may provide it to them or make arrangements for them to receive it offsite. If an employee has an adverse reaction to the vaccine, am I required to record it?

OSHA appears to have caved to political pressure and scrapped their own well-thought-out, pro-worker guidance after just one month so as not to “disincentivize employers’ vaccination efforts.”

Their [FAQ now states](#):

DOL and OSHA, as well as other federal agencies, are working diligently to encourage COVID-19 vaccinations. OSHA does not wish to have any appearance of discouraging workers from receiving COVID-19 vaccination, and also does not wish to disincentivize employers' vaccination efforts. As a result, OSHA will not enforce 29 CFR 1904's recording requirements to require any employers to record worker side effects from COVID-19 vaccination through May 2022. We will re-evaluate the agency's position at that time to determine the best course of action moving forward.

OSHA was created to protect workers' rights and instead it's trampling all over them on behalf of Big Pharma.

Vaccine Related

Are adverse reactions to the COVID-19 vaccine recordable on the OSHA recordkeeping log?

DOL and OSHA, as well as other federal agencies, are working diligently to encourage COVID-19 vaccinations. OSHA does not wish to have any appearance of discouraging workers from receiving COVID-19 vaccination, and also does not wish to disincentivize employers' vaccination efforts. As a result, OSHA will not enforce 29 CFR 1904's recording requirements to require any employers to record worker side effects from COVID-19 vaccination through May 2022. We will reevaluate the agency's position at that time to determine the best course of action moving forward.

"Encouraging COVID-19 vaccinations" comes before protecting workers' rights.

Despite OSHA's disgraceful actions, OSHA states on their own FAQ that their *"guidance is not a standard or regulation, and it creates no new legal obligations."*

Employees are not under any legal obligation to take experimental mRNA shots. Employers who attempt to force these shots on their workers are going to get sued and the case may go all the way to the Supreme Court.

Nobel Prize Winner says Covid Vaccination is an "Unacceptable Mistake" That's Spreading "Variants"

There is no legitimate excuse for the medical police state to have unleashed "vaccines" for the Wuhan coronavirus (Covid-19) when the jabs are known to create and spread "variants" of the disease, warns French virologist and Nobel Prize winner Dr. Luc Montagnier.

Calling the injections an “enormous” and “unacceptable mistake,” Montagnier is sounding the alarm about how the jabs are causing and spreading the Chinese Virus among both the vaccinated and the unvaccinated, which is going to lead to disaster.

“It’s an enormous mistake, isn’t it? A scientific error as well as a medical error. It is an unacceptable mistake,” he stated during a recent interview. *“The history books will show that because it is the vaccination that is creating the variants.”*

Many believe that Montagnier is being too kind by calling it a mistake when it seems obvious that this was all planned long in advance for this very purpose to create the problem rather than “cure” it. One need to remember, even his guarded words are being heavily censored in every area of media.

At least he is talking about it, though. Many other epidemiologists and virologists are choosing to remain “silent” about the “antibody-dependent enhancement” that occurs after people are injected with these chemical cocktails.

“It is the antibodies produced by the virus that enable an infection to become stronger,” he told Pierre Barnérias of Hold-Up Media in an interview earlier this month.

While it is certainly possible that some variants are occurring without the help of vaccines, the mass vaccination drive, he says, is clearly causing a bulk of the problem.

“What does the virus do? Does it die or find another solution?” he asked. *“It is clear that the new variants are created by antibody-mediated selection due to the vaccination.”*

Vaccinating during a pandemic is “unthinkable,” Montagnier says.

There should not even be vaccinations being administered during a pandemic, Montagnier added, calling the notion “unthinkable” – and yet here we are with medical “experts” everywhere telling us that this is a good thing.

Injecting people with chemicals directly associated with a circulating virus will only make the problem worse, he implied, noting that we are now seeing the same trends all over the world post-injection.

“The new variants are a production and result from the vaccination. You see it in each country, it’s the same: in every country, deaths follow vaccination.”

Montagnier spoke out last spring as well, warning that the Wuhan Flu was clearly lab-created and did not just come from some bats at a wet market.

He also warned the world that the genetically modified (GMO) virus had been spliced to contain 18 fragments of the DNA of HIV genome, which just so happens to be what Anthony Fauci was focused on during the early days of his decades-long federal

government career as an infectious disease “authority.” Dr. Montagnier’s remarks are being heavily censored in the media by those pushing the mandating of the Vaxx.

Ever since Chinese Virus injections were introduced, the disease and death rate has only continued to skyrocket. Especially among young people, the death count has “exploded” in every county where the jabs are now being widely administered.

In the shocking interview, the world’s TOP
V!ROLOG!ST stated blankly:

**“there is NO HOPE,
and NO POSSIBLE TREATMENT
for (them).**

**We must be prepared to
incinerate the bodies.”**

All (of them) will D!€ within 2 years.

**“They will ALL D!€ FROM
ANT!BODY DEPENDENT
ENHANCEMENT.
Nothing more can be said.”**

**Luc Montagnier
FRENCH V!ROLOG!ST & joint Nobel Prize recipient**

The fake news media is calling each of these cases “*breakthrough*,” the sentiment being that they are abnormal. The truth, however, is that vaccine-caused variants are the norm, and more people would realize that if only they would take the time to look at the science for themselves. “*The technology for the faux vaccines is the same as that used to produce GMO plants,*” one commenter at LifeSiteNews noted.

The CDC Misled the U.S. by Implying That There Is a 10% Risk of COVID Transmission Outdoors. Instead, It Is Close to Zero.

May 24, 2021 New York Times, NY Post and Gateway Pundit

The CDC claimed that the risk of transmitting Covid outdoors was *less* than 10% if wearing mask, but the ‘*New York Times*’ discovered that the agency’s number was grossly exaggerated, and is likely less than .01%. The CDC used data from a study from Singapore that combined indoor with outdoor construction sites. The CDC figure is important because it recommended that vaccinated people still wear masks outdoors in large venues, and that the unvaccinated mask up in almost all outdoor settings. The CDC’s false information was used to push for mail-in voting that encouraged fraud, in addition to other harmful policies.

When the Centers for Disease Control and Prevention released new guidelines last month for mask wearing, it announced that “less than 10 percent” of Covid-19 transmission was occurring outdoors. Media organizations repeated the statistic, and it quickly became a standard description of the frequency of outdoor transmission.

But the number is almost certainly misleading. It appears to be based partly on a misclassification of some Covid transmission that actually took place in enclosed spaces (as I explain below). An even bigger issue is the extreme caution of CDC officials, who picked a benchmark — 10 percent — so high that nobody could reasonably dispute it.

That benchmark “*seems to be a huge exaggeration,*” as Dr. Muge Cevik, a virologist at the University of St. Andrews, said. In truth, the share of transmission that has occurred outdoors seems to be below 1 percent and [may be below 0.1 percent](#), multiple epidemiologists told me. The rare outdoor transmission that has happened almost all seems to have involved crowded places or close conversation.

Saying that less than 10 percent of Covid transmission occurs outdoors is akin to saying that [sharks](#) attack fewer than 20,000 swimmers a year. (The actual worldwide number is around 150.) It’s both true and deceiving.

This isn't just a gotcha math issue. It is an example of how the CDC is struggling to communicate effectively, and leaving many people confused about what's truly risky. CDC officials have placed such a high priority on caution that many Americans are bewildered by the agency's long list of recommendations. Zeynep Tufekci of the University of North Carolina, writing in *'The Atlantic'*, called those recommendations "*simultaneously too timid and too complicated.*"

They continue to treat outdoor transmission as a major risk. The CDC says that unvaccinated people should wear masks in most outdoor settings and vaccinated people should wear them at "large public venues"; summer camps should require children to wear masks virtually "at all times."

These recommendations would be more grounded in science if anywhere close to 10 percent of Covid transmission were occurring outdoors. But it is not. There is not a single documented Covid infection anywhere in the world from casual outdoor interactions, such as walking past someone on a street or eating at a nearby table. It is further evidence of the corruption going on at the CDC.

A New Report Has Determined the Pfizer Vaccine May Cause Alzheimer's and Other Conditions

by NATHANIEL LINDERMAN, *'National File'*

In a shocking new report on the COVID-19 vaccines, it has been discovered that the Pfizer coronavirus vaccine may have long term health effects not previously disclosed, including "ALS, Alzheimer's, and other neurological degenerative diseases."

"The current RNA based SARSCoV-2 vaccines were approved in the US using an emergency order without extensive long term safety testing," the report declares. *"In this paper the Pfizer COVID-19 vaccine was evaluated for the potential to induce prion-based disease in vaccine recipients."* Prion-based diseases are, according to the CDC, a form of neurodegenerative diseases, meaning that the Pfizer vaccine is potentially likely to cause long term damage and negative health effects with regards to the brain.

This is especially concerning since the Pfizer vaccine is an mRNA vaccine, an untested type of vaccine which creates new proteins and can actually [integrate into the human genome](#), according to a report from the National Library of Medicine. In other words, degenerative brain conditions may appear at any time in your life after receiving the vaccine.

"The RNA sequence of the vaccine as well as the spike protein target interaction were analyzed for the potential to convert intracellular RNA binding proteins TAR DNA binding protein (TDP-43) and Fused in Sarcoma (FUS) into their pathologic prion conformations," explains the report. TDP-43 is a protein known to cause dementia, ALS and even Alzheimer's, according to [Alzpedia](#). Similarly, the FUS protein is known to

cause ALS and Hereditary Essential Tremors, according to the [Human Genome Database](#).

The experiment done for the report was to determine whether or not these two harmful proteins embed themselves into our DNA, as an mRNA vaccine is expected to do. The report determined that *“the vaccine RNA has specific sequences that may induce TDP-43 and FUS to fold into their pathologic prion conformations,”* meaning that both proteins have the potential to embed themselves into our DNA and cause harmful neurological diseases.

The report’s abstract summary concludes that *“The enclosed finding as well as additional potential risks leads the author to believe that regulatory approval of the RNA based vaccines for SARS-CoV-2 was premature and that the vaccine may cause much more harm than benefit.”* The report itself ends with this warning: *“The vaccine could be a bioweapon and even more dangerous than the original infection.”*

National File actually reached out to the CDC to inquire as to why the Pfizer vaccine is still being distributed despite these credible allegations. No response was received prior to publication.

New Pfizer Study: Four Fifths of All Vaccinated Children Aged 12 and Over Complain of Side Effects

Pfizer/BioNTech published a study on the safety and use of their vaccine last Wednesday. It refers to the current status of the vaccination studies in the context of emergency approval. Some 78,9 percent of the vaccinated children developed some form of side effect. Published: May 26, 2021,

The pharmaceutical giant released a 37-page “fact sheet” of its product on May 19, 2021 on security and application republished by [Report24](#). It refers to the current status of vaccination studies in the context of the emergency approval EUA (Emergency Use Authorization).

The U.S. health authority CDC has confirmed that children and adolescents develop Covid-19 in an extremely mild manner, if at all. Also, children and adolescents from the age of 12 cannot make the decision about an injection alone. Despite this, children are being targeted. The study showed that up to 80 percent of children develop side effects that can lead to severe trauma.

The new “factsheet” showed that the *BioNTech/Pfizer* vaccination was tested on 1097 children and adolescents from 12 to 15 years of age. At least 866 out of 1097 children developed some form of unpleasant side effect. In 466 the side effects were described as “mild”, in 393 they were “moderate” and in 7 they were described as “severe”.

The study was set up as a double-blind study, one in which neither the participants nor the experimenters know who is receiving a particular treatment. In addition to the 1127 children and adolescents injected with the first dose and 1097 with the second dose,

1127 and 1078 were injected with a saline solution as a placebo. The differences were remarkable: of the children vaccinated with the real vaccine, over five times as many complained of side effects within the first seven days.

In detail these were:

First vaccination

Fever over 38 degrees C (114)

Fatigue (677)

Headache (623)

Shivering (311)

Vomiting (31)

Diarrhea (90)

Muscle pain (272)

Joint pain (109)

Second vaccination

Fever over 38 degrees C (215)

Fatigue (726)

Headache (708)

Shivering (455)

Vomiting (29)

Diarrhea (65)

Muscle pain (355)

Joint pain (173)

Potentially fatal appendicitis is one of the potentially serious side effects that were seen more frequently in those injected with the product than in the comparison group.

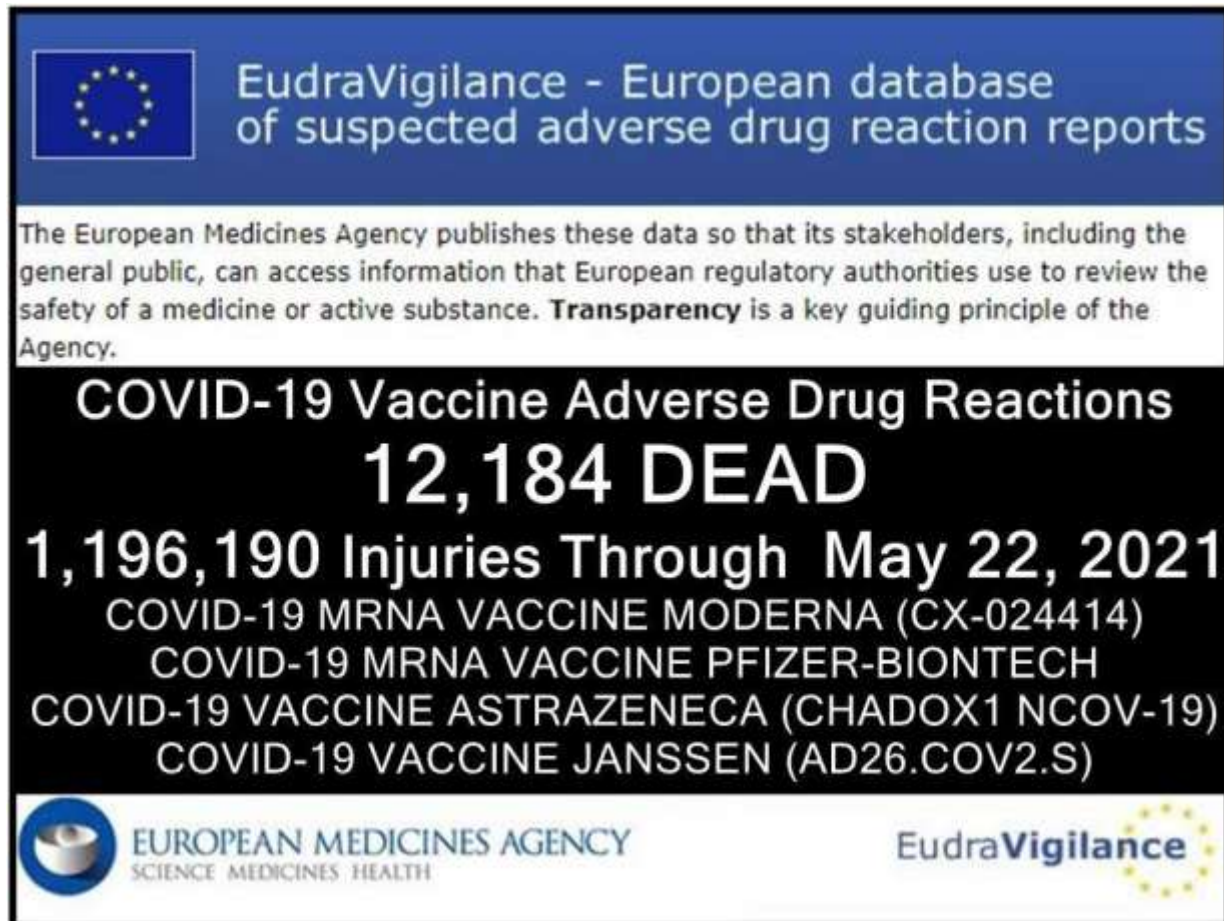

The number of short-term serious side effects is given by *Pfizer/BioNTech* as 0,4 to 0,8 percent of those injected. Over the long term, these may increase. There are currently around 82 million people between the ages of 0 and 19 in the US. If all of these children and adolescents were to be vaccinated, between 330 000 to 660 000 recipients could be expected to have [immediate severe side effects](#).

Nevertheless, the system media and health authorities are making children and their parents believe that they urgently need to be vaccinated with the experimental mRNA products.

Relative to those vaccinated so far, something that has not been mentioned is the question, of the Vaxxs offered, there is a potential issue that has not been discussed. I questioned such a possibility in January when the Vaxx campaign got underway the possibility that maybe their Vaxx plan might create a confusing situation for analysts by administering the saline placebo to some and not others. Such an attempt would make sense if you wanted to deceive and create a situation that might throw off any deliberate effort to mislead the many agencies tracking and studying the facts. In the past couple

weeks we are seeing others inferring or even presenting evidence to some are receiving placebos rather than the advertised Vaxxs;

12,184 DEAD 1,196,190 Injuries: European Database of Adverse Drug Reactions for COVID-19 “Vaccines”

EudraVigilance - European database of suspected adverse drug reaction reports

The European Medicines Agency publishes these data so that its stakeholders, including the general public, can access information that European regulatory authorities use to review the safety of a medicine or active substance. **Transparency** is a key guiding principle of the Agency.

COVID-19 Vaccine Adverse Drug Reactions
12,184 DEAD
1,196,190 Injuries Through May 22, 2021
COVID-19 MRNA VACCINE MODERNA (CX-024414)
COVID-19 MRNA VACCINE PFIZER-BIONTECH
COVID-19 VACCINE ASTRAZENECA (CHADOX1 NCOV-19)
COVID-19 VACCINE JANSSEN (AD26.COVS.2.S)

EUROPEAN MEDICINES AGENCY
SCIENCE MEDICINES HEALTH

EudraVigilance

by Brian Shilhavy
Editor, Health Impact News

The European database of suspected drug reaction reports is [EudraVigilance](#), which also tracks reports of injuries and deaths following the experimental COVID-19 “vaccines.”

Here is what [EudraVigilance](#) states about their database:

This website was launched by the [European Medicines Agency](#) in 2012 to provide public access to reports of suspected side effects (also known as suspected adverse drug reactions). These reports are submitted electronically to EudraVigilance by national medicines regulatory authorities and by pharmaceutical companies that hold marketing authorizations (licenses) for the medicines.

EudraVigilance is a system designed for collecting reports of suspected side effects. These reports are used for evaluating the benefits and risks of medicines during their

development and monitoring their safety following their authorization in the European Economic Area (EEA). EudraVigilance has been in use since December 2001.

Over 10,000 Americans Got Covid-19 Despite Being Fully Vaccinated, CDC says... and the Actual Count Could be way HIGHER

25 May, 2021

Thousands of Americans have caught Covid-19 despite being fully vaccinated, the U.S. Centers for Disease Control and Prevention have said – but they insist the data suggests such “*breakthrough*” infections are relatively rare.

There were 10,262 cases of fully vaccinated people being infected with Covid-19 as of April 30, the CDC said on Tuesday, citing reports from 46 U.S. states and territories. Less than 7% of the patients were hospitalized with Covid-19 symptoms, and 1.6%, or 160, died. The median age for all cases was 58 and 63% of those infected were female. It begs the question, Why get the Vaxx if you can be re-infected?

[Also on rt.com ‘Completely inappropriate’: Top scientists denounce Big Pharma for implying annual Covid booster shots are crucial](#)

The number of breakthrough infections was equivalent to around 1 in every 10,000 fully vaccinated people, but the total was substantially undercounted. The CDC said reporting of such cases is voluntary and doesn't include vaccinated people who had no Covid-19 symptoms and weren't tested. But it also noted that 101 million Americans were fully vaccinated as of April 30, and the vast majority of those inoculated were protected from the virus.

“The number of Covid-19 cases, hospitalizations and deaths that will be prevented among vaccinated persons will far exceed the number of vaccine breakthrough cases,” the CDC said.

Sequencing data on breakthrough infections suggests that the Covid-19 vaccines being used in the US are about equally effective against various variants of the virus. Around 64% of the cases involved “*variants of concern*,” such as the UK Covid-19 variant, the CDC said. As of late March and early April, those same variants accounted for approximately 70% of the overall Covid-19 cases in the US, the agency said.

Remember when Bill and Melinda Gates laughed and sneered that the “next pandemic” will get people’s attention? Well, now the World Health Organization is saying the same thing. Kamala Harris is already gearing up for another one too.

[Bill Gates Warning: “We’ll Have a Deadlier Pandemic”](#)

[Kamala Harris To The United Nations: “We Must Prepare For” The Next Pandemic](#)

A virus even more transmissible and fatal than Covid-19 (which is pretty easy considering Covid’s death rate is about equal to that of the common cold) will lead the

world into the next pandemic, the director-general Tedros Adhanom Ghebreyesus of the World Health Organization (WHO) has said, noting the “evolutionary certainty” of such an occurrence.

Could that “evolutionary certainty” have anything to do with the mass “vaccination” programs being rolled out worldwide? Just a coincidence? You decide.

[More COVID-19 Vax Deaths: Think They'll Blame This On COVID-21?](#)

Just what do these rulers have planned for the rest of us? Do they have some sort of a “pandemic” designed to actually do damage this time? And still, it all comes back to the “vaccines.”

[But the WHO chief stressed](#) that the world remains “in a fragile situation” and **cautioned against any nation assuming it is “out of the woods, no matter its [Covid] vaccination rate.”** The efficacy of the world’s current crop of Covid-19 vaccines does not appear to be undermined by emerging variants of the virus, such as the strain first detected in India, Ghebreyesus said. But he did warn variants are “changing constantly” and that any future strains could “render our tools ineffective and drag us back to square one.”

Somehow, it looks like they are “readying” the population to begin to accept a surge of deaths. [Whether it's from black, white, or yellow fungus](#), the “vaccine” or anything else they have decided, matters little. They appear to be telling us that we will need to actually see the horrifying results of their tyrannical takeover to make sure we remain enslaved and obedient.

Too many of the slaves have figured out COVID was a scam. What’s next is anyone’s guess. Stay alert and prepared. Continue to use critical thinking and ask questions. Discernment and logic will be useful skills in the coming year.

It is Genocidal Depopulation

If You Still Believe In the Mainstream Narrative, I Have a Few Questions for You That I Genuinely Cannot Answer:

- Explain how the annual flu disappeared but has been replaced with something which has the EXACT same symptoms.
- Explain why they downgraded "Covid-19" from a high consequential infectious disease days before they declared a pandemic.
- Explain how they pulled the coronavirus Act 2020 legislation together in a matter of days, despite the act being several hundred pages long.
- Explain why they have completely changed normal practice and used criteria like "deaths for ANY reason within 28 days of a positive test" to classify a Covid-19 death
- Explain why they banned autopsies of anyone dying from/with Covid-19.
- Explain why they changed the law to allow any practitioner to diagnose Covid through observation alone, even if it is done through video consultation.
- Explain why undertakers have seen no difference in burials or cremations.
- Explain how all causes of mortality is at an all-time low.
- Explain how millions of protesters across the globe aren't getting sick with "Covid."
- Explain how this is the only crisis that needs an advertising campaign paired with a constant barrage of repetitive brainwashing propoganda on the TV and in the streets.
- Explain how hundreds of thousands of people marched through the streets of London for an afternoon last month but it wasn't once shown on ANY TV channel or reported in the mainstream press.
- Explain how thousands were yelling "shame on you" outside the BBC HQ in both London, Manchester and Cardiff last Saturday but it wasn't shown on the TV?
- Explain how the people who are wearing the masks and following the rules are the only ones who are catching "COVID".
- Explain how the creator of the PCR amplification tool is on record for stating that the PCR was not designed as a test for infectious diseases.
- Explain why they are using the PCR to diagnose an infectious disease.
- Explain why the concern has been changed from Covid deaths, to hospitalizations to Covid infections to Covid "cases".
- Explain how the "anti-vaxxers" are being blamed for the rise in "cases" when the only people who could possibly be contributing to the statistics are the people who are getting the "test" in the first place.
- Explain why the hospitals were emptier than normal during the height of the "pandemic."
- Explain why whistleblowers are reporting that the hospitals are now filling up with vaccine adverse reactions but the MSM aren't reporting it.
- Explain why kids need to be vaccinated when, by your own definitions, Covid isn't dangerous to children.

- Explain why the average age of death with "Covid" (82.4 years) is higher than the average age of death without (81.5 years).
- Explain how you can get banned from Facebook and Twitter for sharing official government links.
- Explain why there are several class actions in progress, taking governments across the globe to court for crimes against humanity, but there is zero MSM coverage.
- Explain why most government leaders are reading from the same script.
- Explain how all the things that you were laughing at us for talking about last year are now becoming a reality this year e.g. vaccine passports and mass surveillance (NHS app).
- Explain why we have all the answers but you have nothing.
- Explain, if all the vulnerable people have already been vaccinated, why do all the healthy people need to get vaccinated if you're already protected by your own vaccine and the recovery rate was already 99.96% without the vaccine.

COVID Vaccine Injury Reports Among 12- to 17-Year-Olds More Than Triple in 1 Week, VAERS Data Show

VAERS data released today showed 262,521 reports of adverse events following COVID vaccines, including **4,406 deaths** and **21,537 serious injuries** between Dec. 14, 2020 and May 21, 2021.

The Defender is experiencing censorship on many social channels. Be sure to stay in touch with the news that matters by [subscribing to our top news of the day](#). **It's free.**

The number of reported adverse events following COVID vaccines continues to climb, according to data released today by the Centers for Disease Control and Prevention (CDC). The data comes directly from reports submitted to the [Vaccine Adverse Event Reporting System](#) (VAERS).

[VAERS](#) is the primary government-funded system for reporting adverse vaccine reactions in the U.S. Reports submitted to VAERS require further investigation before a causal relationship can be confirmed.

Every Friday, VAERS makes public all vaccine injury reports received as of a specified date, usually about a week prior to the release date. Today's data show that between Dec. 14, 2020 and May 21, a total of [227,521 total adverse events](#) were reported to VAERS, including **4,406 deaths** — an increase of **205** over the previous week — and [21,537 serious injuries](#), up 3,009 since last week.

National Vaccine Information Center

Search Results

From the 5/21/2021 release of VAERS data:

Found 262,521 cases where Vaccine is COVID19

Table

Event Outcome	Count	Percent
Death	4,406	1.68%
Permanent Disability	3,289	1.25%
Office Visit	45,094	17.14%
Emergency Room	40	0.02%
Emergency Doctor/Pharm	34,439	13.11%
Hospitalized	14,549	5.54%
Hospitalized, Prolonged	31	0.01%
Recovered	120,446	45.88%
Birth Defect	140	0.05%
Life-Threatening	4,330	1.65%
Not Serious	133,630	50.91%
TOTAL	262,521	100.00%

* Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 262,521 (the number of cases found), and the Total Percentage is greater than 100.

This week's data showed [3,449](#) total adverse events, including [58](#) rated as serious, among 12- to -17-year-olds.

In the U.S [281.6 million](#) COVID vaccine doses had been administered as of May 21. This [includes](#) 120 million doses of [Moderna's](#) vaccine, 152 million doses of [Pfizer](#) and 10 million doses of the [Johnson & Johnson](#) (J&J) COVID vaccine.

Of the **4,406 deaths** reported as of May 21, 23% occurred within 48 hours of vaccination, 16% occurred within 24 hours and [38% occurred](#) in people who became ill [within 48 hours](#) of being vaccinated.

This week's VAERS data show:

- 20% of deaths were related to cardiac disorders.
- 54% of those who died were male, 44% were female and the remaining death reports did not include gender of the deceased.
- The [average age](#) of death was **74.4** and the [youngest deaths](#) reported include two 15-year-olds (VAERS I.D. [1187918](#) and [1242573](#)) and a 16-year-old (VAERS I.D. [1225942](#)). There were other reported deaths in children under 16 that could not be confirmed or contained obvious errors.
- As of May 21, [1,641 pregnant women](#) reported adverse events related to COVID vaccines, including 527 reports of [miscarriage or premature birth](#).
- Of the [2,577 cases of Bell's Palsy reported](#), 52% were reported after [Pfizer-BioNTech](#) vaccinations, 41% following vaccination with the Moderna vaccine and 192 cases, or 9%, of Bell's Palsy cases were reported in conjunction with J&J.
- There were [238 reports of Guillain-Barré Syndrome](#) with 43% of cases attributed to Pfizer, 38% to Moderna and 23% to J&J.
- There were [74,781 reports of anaphylaxis](#) with 39% of cases attributed to [Pfizer's vaccine](#), 50% to [Moderna](#) and 10% to [J&J](#).
- There were [4,433 reports](#) of blood clotting disorders. Of those, [1,842 reports](#) were attributed to Pfizer, [1,359 reports](#) to Moderna and [1,194 reports](#) to J&J.

CDC investigating heart problems in teens, adolescents after COVID vaccine

On May 24, [The Defender reported](#) the CDC is investigating reports of teens and young adults vaccinated against COVID who experienced heart problems. The CDC's Advisory Committee on Immunization Practices [released an advisory](#) May 17 alerting doctors to reports of myocarditis, which seemed to occur predominantly in adolescents and young adults, more often in males than females, more often following the second dose and typically within four days after vaccination with [Pfizer or Moderna vaccines](#). Most cases appeared to be "mild" and follow-up is ongoing.

The [CDC said](#) its monitoring systems had not found more cases of myocarditis than would be expected in the population, but members of the committee on vaccinations said healthcare providers should be made aware of the reports of the "potential adverse event."

[Myocarditis](#) is inflammation of the heart muscle that can lead to cardiac arrhythmia and death. According to the [National Organization for Rare Disorders](#), myocarditis can result from infections, but "more commonly the myocarditis is a result of the body's immune reaction to the initial heart damage." [Pericarditis](#) is inflammation of the tissue surrounding the heart that can cause sharp chest pain and other symptoms.

As [The Defender reported](#) May 26, one week after the CDC [announced](#) it was investigating heart inflammation in recently vaccinated young adults, Connecticut reported 18 new cases of heart problems among teens who had received a COVID vaccine. All 18 cases resulted in hospitalization — the vast majority for a couple of days, while one individual remained hospitalized as of May 26.

White House press secretary Jen Psaki said during a [press briefing](#) Monday the Biden administration will continue to advise young people to get vaccinated, despite reported cases of myocarditis.

A search in VAERS revealed [419 cases](#) of pericarditis and myocarditis, among all age groups reported in the U.S following COVID vaccination between Dec.14, 2020 and May 21. Of the 288 cases reported, [247 cases](#) were attributed to Pfizer, [151 cases](#) to Moderna and [20 cases](#) to J&J's COVID vaccine.

[CHD Calls on FDA to Take COVID Vaccines Off the Market - Submit a Comment](#) **Moderna to seek FDA authorization for 12- to 17-year-olds in early June**

On May 25, Moderna [announced](#) its vaccine was found to be safe and [100% effective](#) at protecting against COVID in a phase 3 trial of more than 3,700 participants between the ages of 12 and 17, [Axios reported](#). No significant safety concerns were identified and side effects were generally consistent with those seen in an earlier trial of adults, [the company said](#).

Moderna plans to seek [expanded Emergency Use Authorization](#) of its COVID vaccine for teens from the U.S. Food and Drug Administration next month. If approved, it would be the second vaccine available to young teens.

Number of kids hospitalized for COVID inflated by at least 40%

On May 26, [The Defender reported](#) that two papers published in the journal of Hospital Pediatrics found pediatric hospitalizations for COVID were over counted by at least 40%, carrying potential implications for nationwide figures used to justify vaccinating children.

One [study](#) by researchers at the [Stanford University School of Medicine](#) found that counting [SARS-CoV-2](#) infections in hospitalized children [overestimated the impact](#) of COVID in pediatric populations because the numbers included many asymptomatic patients.

Out of 117 hospital admissions, the authors concluded 53 patients (45%) were admitted for reasons unrelated to the virus. The study also found 39.3% (or 46 patients) coded as SARS-CoV-2 were actually asymptomatic.

In the [second study](#), out of 146 records listing patients as positive for SARS-CoV-2 from May 1, 2020, to Sept. 30, 2020, the authors classified 58 patients (40%) as having “incidental” diagnosis — meaning there was no documentation of COVID symptoms prior to hospitalization.

The same study categorized 68 patients, or 47%, as “potentially symptomatic,” which was defined as when “COVID-19 was not the primary reason for admission for these

patients, and COVID-19 alone did not directly require hospitalization without the concomitant condition.”

“Our goal is to [make sure we have accurate data](#) on how sick children are getting,” said [Dr. Alan Schroeder](#), a clinical professor of pediatric critical care and of pediatric hospital medicine. “If we rely on hospitals’ positive SARS-CoV-2 test results, we are inflating by about twofold the actual risk of hospitalization from the disease in kids.”

OSHA abruptly reverses course, says employers will not be liable for COVID vaccine injuries

The federal Occupational Safety and Health Administration ([OSHA](#)) quickly reversed its position on requiring companies that mandate COVID vaccines to treat adverse reactions as “recordable injuries,” announcing that it will no longer [enforce its previous ruling](#).

OSHA said it made the change in order to avoid “the appearance of discouraging workers” from getting the [COVID](#) vaccine and also because it did not wish to “disincentivize employers’ vaccination efforts.”

[The Defender](#) reached out to OSHA and asked why the agency abruptly changed its policy, who pressured OSHA to change its position and why adverse reactions caused by COVID vaccines that an employee may be required to receive as a condition of employment and would fall under [29 CFR 1904.7](#) would not be recorded as a work-related injury.

OSHA responded by referring us to the Centers for Disease Control and Prevention to read more about coronavirus, local and regional OSHA facilities, and the U.S. Department of Labor’s website. An OSHA spokesperson declined to provide any additional information.

Belgium suspends J&J vaccine for people under age 41

On May 27, [The Defender reported](#) that Belgium announced it was suspending vaccinations with [J&J’s vaccine](#), for people under the age of 41, following the death of a woman from blood clots after she received the shot.

The EMA is [reviewing the woman’s death](#) along with other reports of blood clots, with the Belgian and Slovenian medicines agencies, and has asked J&J to carry out a series of additional studies to help assess a possible link between the shot and rare blood clots.

Researchers link AstraZeneca to strokes in young adults

On May 27, [The Defender reported](#) on the first cases of large-vessel arterial occlusion strokes in young adults linked to AstraZeneca’s vaccine, which were described in detail for the first time in a letter [published online](#) in the Journal of Neurology Neurosurgery & Psychiatry.

The [three cases](#), one of which was fatal, occurred in two women and one man in their 30s or 40s who developed characteristics of VITT, a reaction associated with the AstraZeneca vaccine.

“These are the first detailed reports of arterial stroke believed to be caused by VITT after the AstraZeneca COVID vaccine, although stroke has been mentioned previously in the VITT data,” senior author, Dr. David Werring, professor of clinical neurology at the Stroke Research Centre, University College London Queen Square Institute of Neurology, [told Medscape Medical News](#).

Deaths due to blood clots from AstraZeneca vaccine increase

On May 27, The Defender [reported](#) that an Ontario man in his 40s died after receiving his first dose of the AstraZeneca vaccine. Dr. Barbara Yaffe, Ontario’s associate chief medical officer of health, said his death is being investigated, but the man suffered from [vaccine-induced immune thrombotic thrombocytopenia](#). Chief Medical Officer Dr. David Williams restricted [AstraZeneca](#) vaccinations for people who have not yet received the first dose as of May 11, due to a higher-than-expected rate of blood clots.

In Greece, a [63-year-old woman](#) died of blood clots after vaccination with AstraZeneca. The case was one of four being investigated by the National Organization for Medicines for a potential correlation between AstraZeneca’s vaccine and rare blood clots.

On May 27, The Guardian [reported](#) that award-winning BBC radio presenter Lisa Shaw died after suffering blood clots following AstraZeneca vaccination, according to her family. The 44-year-old developed severe headaches a week after having the jab and fell seriously ill a few days later, relatives said in a statement. Shaw died at the Royal Victoria infirmary May 21 after being treated in intensive care for blood clots and bleeding.

The UK Medicines and Healthcare products Regulatory Agency said the benefits of the vaccine continue to outweigh the risks for most people. It has not proved the vaccine causes the clots, but has said the link is getting firmer.

As The Defender [reported](#) May 25, the European Medicines Agency is investigating the death of British fashion model Stephanie Dubois, who died from a blood clot days after receiving her first dose of AstraZeneca’s COVID vaccine. Dubois, 39, had no underlying health conditions according to health officials at the hospital in Nicosia, where she was hospitalized May 14, after experiencing breathing issues. The fashion model suffered a brain hemorrhage and was in a coma before she [passed away](#) May 21.

Two-time [Olympic archer Haziq Kamaruddin](#), died at the age of 27 on May 14, after collapsing at his home days after receiving Pfizer’s COVID vaccine. Kamaruddin died of a blocked coronary artery, the Health Ministry said Saturday, adding there was no evidence of a link to the vaccine.

There are multiple reasons a coronary artery can become blocked, including by a blood clot, [according to Yale Medicine](#).

As The Defender [reported](#) last month, all three vaccines authorized in the U.S., including Pfizer, can potentially cause blood clots.

81 days and counting, CDC ignores The Defender's inquiries

According to the [CDC website](#), "the CDC follows up on any report of death to request additional information and learn more about what occurred and to determine whether the death was a result of the vaccine or unrelated."

On March 8, [The Defender](#) contacted the CDC with a written list of questions about reported deaths and injuries related to COVID vaccines. On May 19, a CDC employee said our questions had been reviewed and our inquiry was pending in their system, but would not provide us with a copy of the response.

It has been 81 days since we sent our first email inquiring into VAERS data and reports. [Children's Health Defense](#) asks anyone who has experienced an adverse reaction, to any vaccine, to file a report following [these three steps](#).

EXCLUSIVE: Deep State Planning False Flag Attack in Order to Blame "anti-vaxxers" and Gun Owners

Friday, May 28, 2021 by: Mike Adams, the Health Ranger

[\(Natural News\)](#) Yesterday was a bizarre day at Natural News, where after I published an article calling for Nuremberg-style prosecutions of vaccine researchers who use human children for medical experiments, I received several phone calls.

The most relevant call came from someone I did not know, and whose number did not appear on my phone. It was sheer chance that I even answered it. As I explain in my Situation Update podcast below, this person identified himself as a supporter of my site and said he works for the federal government. What gave his claim credibility was the fact that he knew my number and he was able to initiate the call from a source that did not reveal his phone number to me.

He said he became aware of my article calling for war crimes tribunals against vaccine researchers, and he warned me that this is exactly the kind of article the deep state is hoping to see published **because they are planning to carry out a false flag violent attack to blame "anti-vaxxers" and gun owners.**

He urged me to take down the article and podcast immediately, which I was actually already in the process of doing because of previous phone calls and previous conversations with other people that I won't get into. Importantly, he explained more...

Granted, I don't know this person, so I can't say for sure whether he was a white hat, or a black hat pretending to be a white hat. But I'll share with you what he said and you can make up your own mind.

First, he said that the false flag operation is perhaps just weeks away. He explained that the ATF, with Chipman to be in charge, will be ready to move against AR-15 rifles, and they need a big "event" to achieve that. At the same time, the vaccine industry is desperate to find a way to criminalize and shut down all anti-vaxxer content online, since banning it on Facebook, Twitter and YouTube still hasn't been as effective as they hoped. So they figure they can "kill two birds with one stone" and stage a violent false flag attack of some type that will depict anti-vaxxers as violent gun owners pursuing murder and mayhem. With the obedient media ready to push whatever narrative they're handed, this story can be told with tremendous effectiveness, resulting in a nationwide outcry to criminalize and shut down both "anti-vaxxer" speech and to confiscate all AR-15s nationwide.

If you don't think they'll try this, you have no clue how desperate they are to reach their milestone of 70% vaccine uptake by U.S. adults. That was explained to me as the other key point, that world leaders are being *ordered* to achieve vaccine milestones in their countries, and that these milestones must be achieved *by any means necessary*. Just today, rumor is that Italy is now pushing a covid vaccine mandate into law, forcing every citizen of Italy to take the shot. And California just rolled out a new statewide vaccine lottery to encourage low-IQ people to take the vaccine death shot there. These incentives are all part of the effort to reach their vaccine milestones as easily as possible.

Government waging all-out war to silence and disrupt anti-vaxxers.

To say that the Biden regime is declaring war on anti-vaxxers is an understatement. They are waging an all-out assault to threaten, destroy and disrupt all anti-vax publishers, content, individuals and organizations such as Children's Health Defense (CHD). There is a sense of urgency behind all this, too, since it's only a matter of time before the masses wake up and realize it's the vaccine that's killing so many people. Until that day comes, the vaccine deep state is going to push as aggressively as possible to get every last person injected with spike protein bioweapons called "vaccines." And to achieve this, they have to shut down all the voices promoting "vaccine hesitancy" (which explains the Facebook algorithm to shadow-ban all such comments).

In this call, I was told that if I continue to talk about war crimes tribunals, '*Natural News*' would be completely taken down and removed from the internet. My guess is that the people involved in gain-of-function research have come to realize they will really face war crimes prosecutions as more truth unfolds, and they are using every tactic possible to threaten those who might remind fellow human beings that running mass medical experiments on humanity is a *crime* against humanity.

Right on time, [the NY Times is pushing out tweets that state anyone talking about the covid lab leak theory is “racist.”](#)

The message is clear: Don't you dare look into the origins of Covid, because that would lead directly to incriminating evidence against Fauci and his cohorts. It will also expose the truth about the vaccines, since they are using the spike protein particles that serve as the payload for the SARS-CoV-2 coronavirus. If those spike proteins turn out to be enhanced or engineered in part through gain-of-function research — which they obviously were — then it means billions of human beings are being **injected with genetically engineered bioweapons**.

The “lab theory” very quickly morphs into a “bioweapons” explanation, which then exposes the vaccines as depopulation weapons.

Once the truth comes out, it seems there would be global efforts to hold war crimes tribunals to get to the truth about all this. That is, if there are even enough survivors to launch a war crimes tribunal effort.

They are trying to mass murder billions of human beings as quickly as possible before any serious backlash can form.

[AllNewsPipeline.com has published a fascinating article](#) on what the world will look like after globalists manage to exterminate billions of people. With the human population reduced to just 500 million people, almost everything that runs the present-day global economy will vanish. The world will collapse into tribal warfare, and even the guns and ammo will disappear, plunging the planet back into a swords-and-bows existence. As the story explains:

Initially, as the population dies off from the “soft kill”, people will desire to stay in their homes and current locations, victims of “normalcy syndrome”. But it will quickly become obvious that this is not survivable. Food, water, and essential goods will be hoarded, new replacements become unavailable. Law enforcement ends by the government, and is replaced by local warlords. Gangs will form for mutual protection. The weak and meek will become prey for the gangs as resources dwindle.

It will then become necessary for the population to move closer to food and water resources, and to abandon the cities. Those that were able to leave the cities without being enslaved or killed by the gangs, will congregate in the farm areas, near water sources, and form their own local leadership/government systems.

With the available worker population at such a low level, most workers are needed for production of food and firewood. Without the benefit of electricity, there will not be modern farm machinery, fertilizers, weed killers, harvesters, trucks or automatic irrigation. A farm worker will only be able to produce enough food for himself and a few others. During harvest time, all able bodied persons will be needed to gather, clean, can and preserve the crops for the winter.

But the world isn't ready for the truth yet, because the vaccine deaths haven't yet exploded.

Sadly, the world isn't yet ready for the truth about vaccines, bioweapons, depopulation collapse and crimes against humanity. And to discuss these topics right now only invites extreme threats from the vaccine deep state and its compliant media propaganda outlets.

Thus, **I am reluctantly going to have to hold off on the war crimes topic** until the public is ready to hear the truth as the post-vaccine death count explodes due to Antibody Dependent Enhancement (ADE) or other similar effects. Once vaccinated people start dying en masse, it will become obvious that the one thing they all have in common is the covid vaccine.

But by then, of course, the depopulation agenda will have largely succeeded. Once the masses are killed off by the vaccine, they can't really rise up and demand an investigation, can they? It seems **the depopulation pushers have already won.**

And that's the essence of the global vaccine depopulation plan: Inject billions now, before the truth comes out, knowing that by the time people realize what has happened, they're already in the process of dying from the vaccine effects. Since you can't undo a spike protein injection, most of those who took the vaccine will be beyond recovery.

The global depopulation goal is somewhere around six billion people, and [according to a recent Gallup poll](#), there are at least a billion people worldwide who refuse to take the vaccine. That same poll found that a little over two-thirds of people around the world are currently willing to get the vaccine. This means **the vaccine is going to have to be forced onto many people in order to reach the 70% global goal.** And that's the *low end* of their global goal. They really want a global population reduction of 90%.

Thus, the vaccine push is going through five phases:

Phase 1: Vaccinate the easy people who can't wait to get the shot.

Phase 2: Offer incentives and rewards to convince those on the fence. (Free donuts, free beer, lottery tickets, etc.)

Phase 3: Punish those who refuse to get vaccinated by taking away their rights (no entry, no travel, etc.).

Phase 4: Criminalize vaccine resisters by passing mandatory vaccine laws.

Phase 5: Gunpoint medicine: Launch door-to-door vaccine squads to forcibly vaccinate people at gunpoint, against their will.

We are right now in phase 3, moving toward phase 4.

There's not much more we can do for those who are willfully going along with their own extermination.

The upshot here is that those of us who have been desperately trying to warn humanity have already done all we can do. Those people who are willing — and even happy — to have themselves injected with a deadly spike protein bioweapon can't be stopped from doing so, as it's their own (brainwashed) choice.

And parents who allow their children to be used as human guinea pigs in covid vaccine medical experiments can't be stopped either, as they're clearly insane and beyond reach.

Society has lost the will to survive, and the vast majority of the world's population is happily hurling itself into self-destruction. If these people take no action to save themselves, there's not much that you or I can do to intervene on their behalf. They've made their choice, and they're going to have to live (or die) with it.

We are living in End Times. This is the end of humanity as we know it. The human species is now fully invested in its own destruction, and the vast majority of individuals are quite thrilled to go along with it.

It seems that the rest of us need to now focus on prepping for the global collapse that's sure to follow. We are wasting time trying to save those who have committed to their own destruction. Instead, we should be sharing information about survival, food self-reliance, community strengthening, local communications and the like.

So that's what I'm going to do as well. I've probably fettered away too much time already on people who prefer to commit vaccine suicide. If they no longer have the willingness to investigate the truth before they inject themselves with unproven, risky medical experiments, then what business do we have trying to save them from themselves?

I don't think we can stop the global vaccine extermination agenda. The depopulation machine is too powerful, extremely well-funded, and has the backing of government, media, law enforcement and the corrupt "science" journals. Anyone who wants to survive the vaccine culling is going to have to figure it out for themselves.

All we can do is work to be among the survivors. As mass death subsumes the globe, there will be survivors who rejected the vaccine death shot, but even those survivors will then have to contend with the far more difficult survival scenario of economic collapse and civilization collapse. Globalists are gunning for mass global depopulation, but they seem to be oblivious to the fact that once they kill off 90% (or more) of the current population, nobody will be alive to run the nuclear power plants.

Eventually, they will fail and go into meltdowns, spreading radioactive clouds into the atmosphere to be distributed by winds and weather.

Surviving the vaccine is the least of the challenges yet to come, it turns out. As the global depopulation death wave kicks in, we will also have to survive the economic collapse, food collapse, tribal warfare, nuclear accidents and whatever else is unleashed by the global depopulation agenda.

Or perhaps you think this is all science fiction and there's nothing to be worried about. It's *exciting* to get your vaccine shot, isn't it? Tell all your friends and celebrate your newfound freedom! Mock the "anti-vaxxers" while pretending that life will get back to normal if only everybody is forced to take the same covid vaccine.

Have fun while your life lasts, because it won't last much longer if the globalists get their way. You've just been depopulated in the name of "saving the planet" for the powerful, wealthy families that wish to claim dominion over Earth.

"For God hath not given us the spirit of fear; but of power, and of love, and of a sound mind" -(2nd Timothy 1:7)

I trust Mike Adams post, which came in my Friday email. I have been a subscriber to the Health Ranger web page since 1999! The only area where I would differ with Mike Adams, the Health Ranger is the outcome described. I am very confident that the Lord Jesus Christ will honor his promises in the Bible, and the last prophecy in the Bible being Revelation 3:10. ***"Because thou hast kept the word of my patience, I also will keep thee from the hour of temptation, which shall come upon all the world, to try***

them that dwell upon the earth.” There is very little that I could add to my last few **“Blessed Hope”** series. Global events are inching towards the final moments of the Isaiah 17:1-2 destruction of Damascus and the Ezekiel 38/39 prophecy. This week Russia deployed three of its nuclear bombers to a base in Syria, meant to be a warning to Israel’s Prime Minister Benjamin Netanyahu. Russian Prime Minister Putin threatened Israel two weeks ago if it did not end its slaughter of Gaza’s civilians. Israeli aircraft has destroyed much of the fresh water supply of the Gaza territory in its bombing of Hamas terrorist elements.

Keep looking up and pray for the peace of Jerusalem. It is not the end of the world, there are at least 1007 years left! Remember, Jesus told us all what was coming in advance so that we should know what to watch for as a sign of His soon calling us home. The Rapture of the church could happen at any moment, all the remaining signs are for His prophetic return!

Blessings, Jesus is at the door!
