

Mass Murder

By Syringe Needle!
Part 38

4 KEY POINTS ABOUT COVID-19:

1-The PCR & antibody tests do not actually detect the presence of any particular "virus" in the body, but rather factors which are "assumed" to indicate the presence of a particular "virus".

2-The Covid-19 "virus" has never actually been harvested from anyone & then isolated, purified, & identified, & then proven to cause any illness.

3-The symptoms of "Covid-19" (or the flu) are actually the body trying to expel an excess build-up of toxins & debris.

4-No one has ever died from "Covid-19", but rather from the toxins & debris the body is trying to expel, &/or pre-existing illnesses, &/or inappropriate medical intervention with suppressive & toxic drugs, ventilators, etc.

Parents Sacrifice Hundreds of Thousands of Children Ages 5 to 11 to the COVID-19 Vaccine Gods This Weekend

by **Brian Shilhavy**
Editor, Health Impact News

Hundreds of thousands of children between the ages of 5 and 11 were sacrificed to the COVID-19 vaccine gods this weekend, getting their first injections as a Satanic ritual, with many of them having this done right in [Christian churches](#).

This has to be one of the darkest weekends in our nation's history.

Of all the products produced by the [Satanic medical system](#), vaccines have to be the most evil when it comes to children, because it takes a denial of faith in God to trust him to protect your child, and instead trust in a pharmaceutical company, Pfizer, that has a long history of criminal activities, and is probably the most evil company in the world.

And yet after paying \$BILLIONS in criminal fines over the years for bad drugs that harmed and killed people, not one executive has ever spent a day in jail.

If a child has a life-threatening disease or injury, and a parent believes that a certain drug or medication could save their child, there *might* be an excuse to use a pharmaceutical product from one of these evil drug companies.

But when it comes to vaccines, you are saying "*I do not trust God to protect my child from a potential future disease, so I am going to participate in a Satanic ritual by allowing a needle to bypass the entire immune system that God created, and inject a poisonous substance into my child infecting them, with the belief that the child's body will respond to the poison and not die, protecting them in the future.*"

Vaccines are probably the only drugs manufactured that do not require sick people to administer them. They are injected into healthy people because of the *fear* that they might one day catch the disease they are being injected for, as they are patterned after the very lucrative insurance industry which also profits on people's fear.

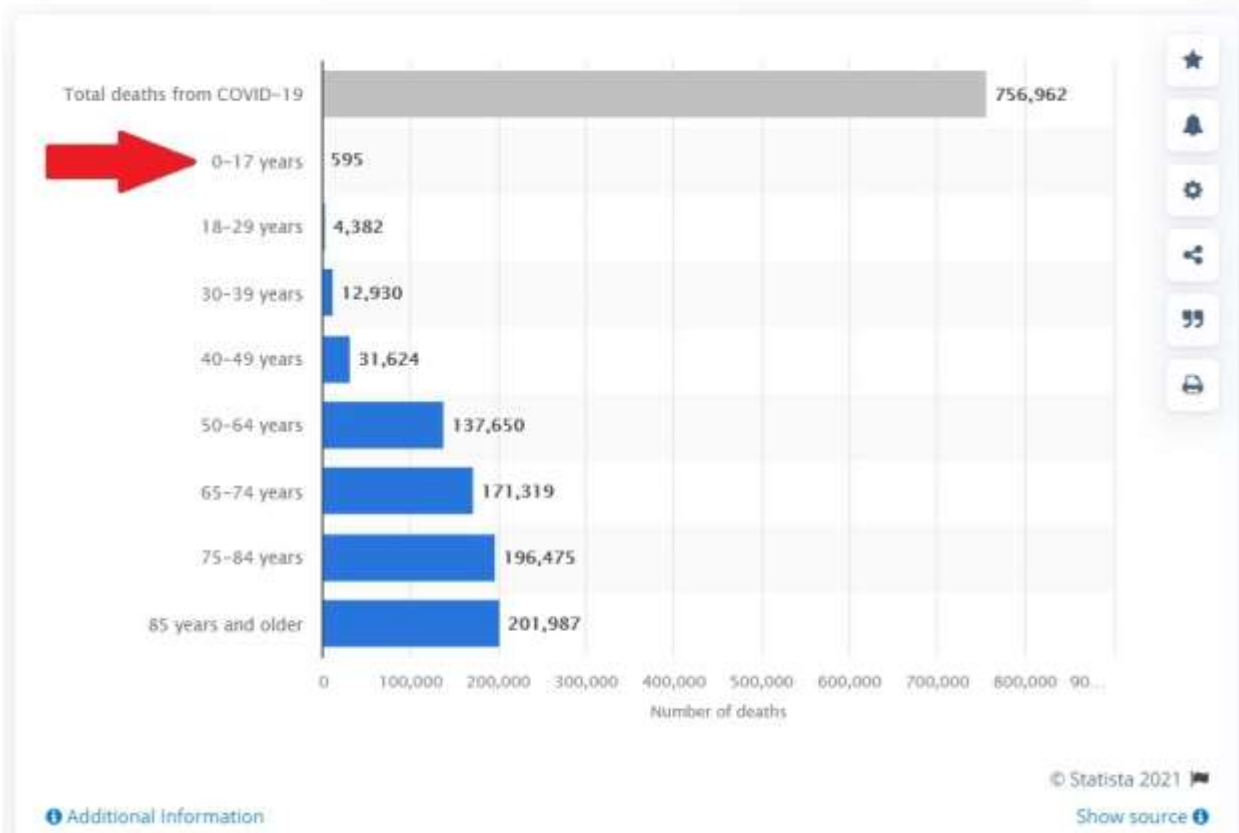

Allowing someone to inject your child with a needle is child abuse, and an act of belief on your part in the demonic world system the Bible teaches us to oppose.

And here are the current odds of your child dying in the future from something called a "COVID-19 virus" based on public statistics for the past two years.

That's a lot of faith to put in Pfizer to protect your child from something that has almost a ZERO percent chance of killing your child, and deny that God can protect your child from that almost ZERO percent chance of dying from COVID-19.

Many of these parents are so proud of their faith in the criminal Pfizer corporation, that they went public and allowed their children to be featured in the media for participating in this Satanic ritual. And this is a non-partisan issue when it comes to allowing parents to abuse their children with a Satanic ritual. It is happening in ALL states, whether Red or Blue.

Number of coronavirus disease 2019 (COVID-19) deaths in the U.S. as of November 10, 2021

Meanwhile, trials are currently going on throughout the U.S. testing these gene-altering shots by injecting babies aged 6 months to 4 years old, where 3000 babies are currently being experimented on so they too can be included in this Satanic ritual.

The trials last 18 months, but Moderna and Pfizer have their representatives at the FDA who can push through an emergency use authorization much sooner, probably just after the first of the year in 2022.

In case you missed it parents, heart disease and deaths have dramatically increased in children ages 12 to 18 after they were approved for the COVID-19 injections.

The 'Exposé' in the UK reported a few weeks ago that: [Deaths among male Children are 83% higher than the 5-year-average since they were given the Covid-19 Vaccine.](#)

This story was shared so much in social media that the pharma-owned corporate media had to get their [Fact Checkers to debunk it](#). Those numbers couldn't possibly be correct, could they??

WHAT WAS CLAIMED

More children have died since Covid-19 vaccines were given to 12 to 15-year-olds, compared with the five year average of mortality stats from 2015 to 2019.

OUR VERDICT

While statistics show the deaths of children, sadly, did increase compared to the five year average, there is no evidence that these deaths are linked to Covid-19 vaccines. ([Source.](#))

Oh wait, they actually confirmed that the death stats among children are correct and are 83% higher! But they couldn't possibly be linked to the vaccines.....

Fair warning to any of the parents of the children named in this article who may be tempted to email me and threaten me: **You made the choice** to go public and reveal the identity of your children, and I am using my First Amendment right to republish that information.

My views of vaccines are based on my understanding of the Bible, and my personal faith in God and His Son Jesus Christ, and I also have a First Amendment right to that view, the view that the whole cult of vaccines is demonic and idolatry, and part of the religion of antichrist.

Dear friends, do not believe every spirit, but test the spirits to see whether they are from God, because many false prophets have gone out into the world.

This is how you can recognize the Spirit of God: Every spirit that acknowledges that Jesus Christ has come in the flesh is from God, but every spirit that does not acknowledge Jesus is not from God.

"This is the spirit of the antichrist, which you have heard is coming and even now is already in the world. You, dear children, are from God and have overcome them, because the one who is in you is greater than the one who is in the world. They are from the world and therefore speak from the viewpoint of the world, and the world listens to them. We are from God, and whoever knows God listens to us; but whoever is not from God does not listen to us. This is how we recognize the Spirit of truth and the spirit of falsehood. (1 John 4:1-6)

Since mid-2021 there have been a strikingly high number of "sudden and unexpected" deaths in sport. In full activity, even 13-year-old children with heart problems are already falling.

There are already more than 75 athletes "suddenly" deceased in the last 5 months. Since mid-2021 there have been a strikingly high number of "sudden and unexpected" deaths in sport. In full activity, even 13-year-olds are falling. You can read the entire list by [clicking here](#). Let me ask you, can you ever recall a time when so many trained and in shape athletes on every level from amateur to professional started collapsing and dropping dead in the middle of the game?

"Behold ye among the heathen, and regard, and wonder marvelously: for I will work a work in your days, which ye will not believe, though it be told you." – (Habakkuk 1:5)

More Proof that Big Pharma is Evil and cannot be Trusted! Bayer executive: mRNA shots are 'gene therapy' marketed as 'vaccines' to gain public trust

"We probably would have had a 95% refusal rate' for these shots two years ago, but the pandemic and marketing of the injections as 'vaccines' has made them popular with the public," said Stefan Oelrich.

Stefan Oelrich, president of Bayer's Pharmaceuticals Division, speaks at the 2021 Global Health Summit YouTube / screenshot

BERLIN ([LifeSiteNews](#)) – The president of Bayer's Pharmaceuticals Division told international "experts" during a globalist health conference that the mRNA COVID-19 shots are indeed "cell and gene therapy" marketed as "vaccines" to be palatable to the public.

Stefan Oelrich, president of Bayer's Pharmaceuticals Division, made these comments at this year's World Health Summit, which took place in Berlin from October 24-26 and hosted 6,000 people from 120 countries. Oelrich told his fellow international "experts" from academia, politics, and the private sector that the novel mRNA COVID "vaccines" are actually "cell and gene therapy" that would have otherwise been rejected by the public if not for a "pandemic" and favorable marketing.

“We are really taking that leap [to drive innovation] – us as a company, Bayer – in cell and gene therapies ... ultimately the mRNA vaccines are an example for that cell and gene therapy. I always like to say: if we had surveyed two years ago in the public – ‘would you be willing to take a gene or cell therapy and inject it into your body?’ – we probably would have had a 95% refusal rate,” stated Oelrich.

“Our successes over these 18 months [the duration of the COVID ‘pandemic’] should embolden us to fully focus much more closely on access, innovation and collaboration to unleash health for all, especially as we enter, on top of everything else that is happening, a new era of science – a lot of people talk about the Bio Revolution in this context,” continued the businessman.

According to the [McKinsey Global Institute](#), the “Bio Revolution” is “a confluence of advances in biological science and accelerating development of computing, automation, and artificial intelligence [that] is fueling a new wave of innovation. This Bio Revolution could have significant impact on economies and our lives, from health and agriculture to consumer goods, and energy and materials.”

In addition to [gene therapy](#) and a biological “revolution,” Oelrich also mentioned the role his company has, along with other prominent institutions and figures, in pushing contraception on developing countries.

“We also need to focus on what is socially responsible outside of Europe and ensure sustainable action there. We pledged, this past year, to give an additional hundred million women access to contraception in the world. We’ve invested 400 million this year into new plants that are dedicated to produce long-acting contraceptives for women in low-and-middle income countries ... Together with Bill and Melinda Gates we’re working very closely on family planning initiatives,” said Oelrich, implying one of the methods of attaining a “sustainable” world is by reducing births, and subsequently reducing the planet’s population.

Oelrich’s words echo a similar agenda as the infamous “[Great Reset](#),” a radical [socialist plan](#) designed by globalist elites, gathering at the World Economic Forum (WEF) in Davos, Switzerland once a year, [which](#) “seeks to ‘push the reset button’ on the global economy.”

In the announcement of the Great Reset initiative, the WEF also credited the COVID-19 “pandemic” for putting them in an advantageous position to march towards their global revolutionary goals.

“COVID-19 lockdowns may be gradually easing, but anxiety about the world’s social and economic prospects is only intensifying. There is good reason to worry: a sharp economic downturn has already begun, and we could be facing the worst depression since the 1930s. But, while this outcome is likely, it is not unavoidable,” [wrote the WEF’s founder](#) Klaus Schwab in June 2020.

But, *“one silver lining of the pandemic is that it has shown how quickly we can make radical changes to our lifestyles. Almost instantly, the crisis forced businesses and individuals to abandon practices long claimed to be essential, from frequent air travel to working in an office,”* added the economist.

“To achieve a better outcome, the world must act jointly and swiftly to revamp all aspects of our societies and economies, from education to social contracts and working conditions. Every country, from the United States to China, must participate, and every industry, from oil and gas to tech, must be transformed. In short, we need a ‘Great Reset’ of capitalism,” stressed Schwab.

[READ: World Economic Forum head’s prediction of microchips ‘in our brains’ is coming true, thanks to Big Tech](#)

Both Oelrich and Schwab have been major advocates for the widespread use of the novel and experimental mRNA COVID vaccines. These same shots, which [do not complete clinical trials](#) until 2023, have been linked to [millions of injuries](#) and tens of thousands of deaths worldwide.

Seemingly in line with Bayer, WEF, and the Gates Foundation’s goal of reducing births, many of the notable COVID-19 vaccine adverse effects have also played a role in reducing births. World Health Organization (WHO) data [reports](#) many cases of stillbirths, vaginal hemorrhaging, menstrual cycle irregularities, and miscarriages linked to the injections.

[According to an ex-vice president at Pfizer](#), Dr. Michael Yeadon, the COVID jabs present “a severe risk to your ability to conceive and carry a baby to term,” and even worse, Yeadon says *“[the infertility risks] are deliberate acts which I believe whoever is doing it is lying about it to hide it and they’re smearing people who are trying to warn you.”*

Further pushing the birth control agenda, earlier this month the U.S. State Department [announced](#) a gift of \$5 million in taxpayer funds to the United Nations Population Fund (UNFPA) supplies program, another organization tied to Gates, which aids women abroad in accessing contraceptives, abortion-inducing drugs, and abortion-performing “manual vacuum aspirator” (MVA) devices. The U.N.’s “Sustainable Development Goals” seek to “Ensure universal access to sexual and reproductive health and reproductive rights,” which is phraseology commonly used to refer to abortion and contraception.

Concluding his statements, the “globally thinking” Oelrich told the summit that the global health system *“is not just about donating medicines, or giving medicines at a lower price. It is also being on-site to help put this into practice.”*

“I think this pandemic has also opened many people’s eyes to innovation in a way that was not possible before,” stated Oelrich. *“We need to make sure that the knowledge*

that is created in our universities, in our academia, is translated... before it goes into 'shiny' paper publications, it is translated into patents."

"In my vision I see a joint effort of government, working hand-in-hand with science organizations and civil society."

Vaccine Researcher Admits 'Big Mistake,' Says Spike Protein Is Dangerous 'Toxin'

"The coronavirus spike protein from COVID-19 vaccination unexpectedly enters the bloodstream"

By Celeste McGovern, Global Research, November 13, 2021

First published in May 2021

'Terrifying' new research finds vaccine spike protein unexpectedly in bloodstream. The protein is linked to blood clots, heart and brain damage, and potential risks to nursing babies and fertility.

New research shows that the coronavirus spike protein from COVID-19 vaccination unexpectedly enters the bloodstream, which is a plausible explanation for thousands of reported side-effects from blood clots and heart disease to brain damage and reproductive issues, a Canadian cancer vaccine researcher said last week.

"We made a big mistake. We didn't realize it until now," said Byram Bridle, a viral immunologist and associate professor at University of Guelph, Ontario, in an interview with Alex Pierson last Thursday, in which he warned listeners that his message was "scary."

"We thought the spike protein was a great target antigen, we never knew the spike protein itself was a toxin and was a pathogenic protein. So by vaccinating people we are inadvertently inoculating them with a toxin," Bridle said on the show, which is not easily found in a Google search but went viral on the internet this weekend.

Bridle, a vaccine researcher who was awarded a \$230,000 government grant last year for research on COVID vaccine development, said that he and a group of international scientists filed a request for information from the Japanese regulatory agency to get access to what's called the "biodistribution study."

"It's the first time ever scientists have been privy to seeing where these messenger RNA [mRNA] vaccines go after vaccination," said Bridle. *"Is it a safe assumption that it stays in the shoulder muscle? The short answer is: absolutely not. It's very disconcerting."*

Vaccine researchers had assumed that novel mRNA COVID vaccines would behave like “traditional” vaccines and the vaccine spike protein — responsible for infection and its most severe symptoms — would remain mostly in the vaccination site at the shoulder muscle. Instead, the Japanese data showed that the infamous spike protein of the coronavirus gets into the blood where it circulates for several days post-vaccination and then accumulated in organs and tissues including the spleen, bone marrow, the liver, adrenal glands, and in “quite high concentrations” in the ovaries.

“We have known for a long time that the spike protein is a pathogenic protein. It is a toxin. It can cause damage in our body if it gets into circulation,” Bridle said.

The SARS-CoV-2 spike protein is what allows it to infect human cells. Vaccine manufacturers chose to target the unique protein, making cells in the vaccinated person manufacture the protein which would then, in theory, evoke an immune response to the protein, preventing it from infecting cells.

A large number of studies has shown that the most severe effects of SARS-CoV-2, the virus that causes COVID-19, such as blood clotting and bleeding, are due to the effects of the spike protein of the virus itself

“What has been discovered by the scientific community is the spike protein on its own is almost entirely responsible for the damage to the cardiovascular system, if it gets into circulation,” Bridle told listeners.

Lab animals injected with purified spike protein into their bloodstream developed cardiovascular problems, and the spike protein was also demonstrated to cross the blood brain barrier and cause damage to the brain.

A grave mistake, according to Bridle, was the belief that the spike protein would not escape into the blood circulation.

“Now, we have clear-cut evidence that the vaccines that make the cells in our deltoid muscles manufacture this protein — that the vaccine itself, plus the protein — gets into blood circulation,” he said.

Bridle cited the recent publication of a peer-reviewed study which detected spike protein in the blood plasma of three of 13 young healthcare workers that had received Moderna’s COVID-19 vaccine. In one of the workers, the spike protein circulated for 29 days.

Effects on heart and brain

Once in circulation, the spike protein can attach to specific ACE2 receptors that are on blood platelets and the cells that line blood vessels. *“When that happens it can do one of two things: it can either cause platelets to clump, and that can lead to clotting. That’s exactly why we’ve been seeing clotting disorders associated with these vaccines. It can*

also lead to bleeding.” Bridle also said the spike protein in circulation would explain recently reported heart problems in youths who had received the shots.

The results of this leaked Pfizer study tracing the biodistribution of the vaccine mRNA are not surprising, *“but the implications are terrifying,”* Stephanie Seneff, a senior research scientist at Massachusetts Institute of Technology, told LifeSiteNews. *“It is now clear”* that vaccine content is being delivered to the spleen and the glands, including the ovaries and the adrenal glands.

The Centers for Disease Control and Prevention (CDC) recently announced it was studying reports of “mild” heart conditions following COVID-19 vaccination, and last week 18 teenagers in the state of Connecticut alone were hospitalized for heart problems that developed shortly after they took COVID-19 vaccines.

AstraZeneca’s vaccine was halted in a number of countries and is no longer recommended for younger people because of its link to life-threatening and fatal blood clots, but mRNA COVID vaccines have been linked to hundreds of reports of blood clotting events as well.

FDA warned of spike protein danger

Pediatric rheumatologist J. Patrick Whelan had warned a vaccine advisory committee of the Food and Drug Administration of the potential for the spike protein in COVID vaccines to cause microvascular damage causing damage to the liver, heart, and brain in *“ways that were not assessed in the safety trials.”*

While Whelan did not dispute the value of a coronavirus vaccine that worked to stop transmission of the disease (which no COVID vaccine in circulation has been demonstrated to do), he said, *“it would be vastly worse if hundreds of millions of people were to suffer long-lasting or even permanent damage to their brain or heart microvasculature as a result of failing to appreciate in the short-term an unintended effect of full-length spike protein-based vaccines on other organs.”*

Vaccine-associated spike protein in blood circulation could explain myriad reported adverse events from COVID vaccines, including the 4,000 deaths to date, and nearly 15,000 hospitalizations, reported to the U.S. government’s Vaccine Adverse Event Reporting System (VAERS) as of May 21, 2021. Because it is a passive reporting system, these reports are likely only the tip of an iceberg of adverse events since a Harvard Pilgrim Healthcare study found that less than one percent of side-effects that physicians should report in patients following vaccination are in fact reported to VAERS.

Nursing babies, children and youths, frail, most at risk

Bridle said the discovery of vaccine-induced spike protein in blood circulation would have implications for blood donation programs. *“We don’t want transfer of these pathogenic spike proteins to fragile patients who are being transfused with that blood,”* he said.

The vaccine scientist also said the findings suggested that nursing babies whose mothers had been vaccinated were at risk of getting COVID spike proteins from her breast milk.

Bridle said that *“any proteins in the blood will get concentrated in breast milk,”* and *“we have found evidence of suckling infants experiencing bleeding disorders in the gastrointestinal tract”* in VAERS.

Although Bridle did not cite it, one VAERS report describes a five-month-old breastfed infant whose mother received a second dose of Pfizer’s vaccine in March. The following day, the baby developed a rash and became “inconsolable,” refused to nurse, and developed a fever. The report says the baby was hospitalized with a diagnosis of Thrombotic Thrombocytopenic Purpura, a rare blood disorder in which blood clots form in small blood vessels throughout the body. The baby died.

The new research also has *“serious implications for people for whom SARS Coronavirus 2 is not a high risk pathogen, and that includes all of our children.”*

Effect on fertility and pregnancy?

The high concentration of spike protein found in testes and ovaries in the secret Pfizer data released by the Japanese agency raises questions, too. *“Will we be rendering young people infertile?”* Bridle asked.

There have been thousands of reports of menstrual disorders by women who had taken a COVID-19 shot, and hundreds of reports of miscarriage in vaccinated pregnant women, as well as of disorders of reproductive organs in men.

Vicious smear campaign

In response to a request, Bridle emailed a statement to ‘LifeSiteNews’ on Monday morning, stating that since the radio interview he had received hundreds of positive emails. He added, too, that *“a vicious smear campaign has been initiated against me. This included the creation of a libelous website using my domain name.”*

“Such are the times that an academic public servant can no longer answer people’s legitimate questions with honesty and based on science without fear of being harassed and intimidated,” Brindle wrote. *“However, it is not in my nature to allow scientific facts to be hidden from the public.”*

He attached a brief report outlining the key scientific evidence supporting what he said in the interview. It was written with his colleagues in the Canadian COVID Care Alliance (CCCA) — a group of independent Canadian doctors, scientists, and professionals whose declared aim is *“to provide top quality, evidence-based information about COVID-19, intent on reducing hospitalizations and saving more lives.”*

A focus of the statement was the risk to children and teens that are the target of the latest vaccine marketing strategies, including in Canada.

As of May 28, 2021, there have been 259,308 confirmed cases of SARS-CoV-2 infections in Canadians 19 years and under. Of these, 0.048% were hospitalized, but only 0.004% died, according to the CCCA statement. “Seasonal influenza is associated with more severe illness than COVID-19.”

Given the small number of young research subjects in Pfizer’s vaccine trials and the limited duration of clinical trials, the CCCA said questions about the spike protein and another vaccine protein must be answered before children and teens are vaccinated, including whether the vaccine spike protein crosses the blood-brain barrier, whether the vaccine spike protein interferes with semen production or ovulation, and whether the vaccine spike protein crosses the placenta and impacts a developing baby or is in breast milk.

‘LifeSiteNews’ sent the Public Health Agency of Canada the statement of CCCA and asked for a response to Bridle’s concerns. The agency responded that it was working on the questions but did not send answers before publication time.

Pfizer, Moderna, and Johnson & Johnson did not respond to questions about Bridle’s concerns. Pfizer did not respond to questions about how long the company was aware of its research data that the Japanese agency had released, showing spike protein in organs and tissue of vaccinated individuals.

I recall well this report back in May, 2021. I was blocked from saving it and when that happens I know different ways to save it and share it later. In this case, I shared this report in three different articles and clearly the pharmaceuticals were well aware of what was going to happen since all the early lab experiments on animals resulted in the death of the various animal studies, which led to an immediate shutdown of lab tests to keep quiet the results. There is no question that they knew and are now looking for ways to escape the liability issue, which is now huge!

Pfizer’s Clinical Trial Data Strongly Indicates Their Covid-19 Jab Causes the Recipient to Develop AIDS (Just Like Brazilian President Warned)

I have discovered some extremely concerning findings in the Pfizer Phase I-II-III clinical trial data. The Sepsis death rate in the 21,926 double vaccinated group of the Pfizer Phase III Clinical trial was twenty-one times higher than normal, and the Cardiovascular death rate was two times higher than normal.

This strongly indicates that the [Pfizer Covid-19 injection](#) does in fact cause a new form of ‘acquired immunodeficiency syndrome’, as has been [suggested by a mountain of data available from the UK Health Security Agency](#), because sepsis is caused by failure of the immune system. It is the result of an immune system failure to defeat a microbial (viral yeast or bacterial) infection.

Acute Cholecystitis. The most frequent cause of acute cholecystitis is gallstones. Other causes include typhoid fever and a malignant tumor obstructing the biliary tract. The inflammation may be secondary to a systemic sepsis.

Medical-dictionary.thefreedictionary.com

Acute Cholecystitis is a biliary sepsis, a sepsis of the Gall Bladder and bile ducts:

Deaths from all causes	1,111	100%	1,111
Deaths from all causes during 6 months trial	111.2	100%	111.2
Deaths from all causes relevant causes	111.2	100%	111.2
Deaths from all causes (Heart Disease + Stroke)	25.8	23.2%	25.8
Deaths from all causes - I	53.2	47.9%	53.2

Here are the US deaths in 2020 by cause and the percentages for each cause:

US Deaths in 2020 per year	Number	US population 2020	%
Total	3,358,814	331,002,647	100.0%
Heart Disease	690,882	331,002,647	20.6%
Cancer	598,932	331,002,647	17.8%
Covid-19	345,323	331,002,647	10.3%
Accidents	192,176	331,002,647	5.7%
Stroke	159,050	331,002,647	4.7%
Respiratory Disease	151,637	331,002,647	4.5%
Alzheimers	133,382	331,002,647	4.0%
Diabetes	101,106	331,002,647	3.0%
Flu and Pneumonia	53,495	331,002,647	1.6%
Kidney Disease	52,260	331,002,647	1.6%
Suicide	44,834	331,002,647	1.3%
Septicemia (Sepsis) (2019)	38,354	331,002,647	1.1%
Other	797,383	331,002,647	23.7%

Jamanetwork.com; <https://wonder.cdc.gov>

The first thing that jumps out of these figures is that Pfizer trial participants had a death rate of 17/19 per 21,921/6 per 6 months. Whereas the general U.S. population has a death rate of 111.2 per 21,923 per 6 months. **So Pfizer trial participants were over 6x less likely to die than the general public.**

The age profile of the original selection of participants is advertised to be:

- 12-15 years old: 2260,
- 16-17 years old: 754,
- 18-55 years old: 25,427
- 56+ year old: 17,879

•Pfizer.com

So Pfizer must have done some extremely heavy exclusions of morbidities to get such an absurdly low mortality figure. Their study protocol reveals that they excluded – Clinicaltrials.gov.

The next thing is the incredible match between the unvaccinated Covid and cardiovascular death rates (10.5% and 26.3%) and those in the general population for 2020 (10.3% and 25.3%). So even though the numbers of deaths are small. They appear to be a very good representation of the reality in general public.

Now we turn to the double vaccinated cardiovascular and sepsis rates and we see (52.9% and 23.5% death rates) compared to the general population (and the unvaccinated) who suffer only (26.3% and 1.1% or 25.3% and 0%).

And there is the toxicity of the Pfizer vaccination laid bare. It weakens the immune system to the point where people succumb to microbial infections and die at 21 times the normal rate in the first 6 months after vaccination.

CENSORED: Brazilian President Bolsonaro Reads Report Connecting COVID Vaccines to AIDS.

One can argue that the numbers of deaths here are not large enough to draw any valid statistical conclusions. But against that the unvaccinated numbers are very clearly representative and the numbers of participants in both groups are large enough to draw valid statistical conclusions from.

When you combine these figures with the weekly 5% immune response degradation catalogued by the UKHSA from Weeks 35-41 – ‘TheExpose.uk’ , you start to see a picture that suggests the vaccinated are developing acquired immunodeficiency syndrome.

The vaccinated are developing acquired immunodeficiency syndrome. AIDS.

However you look at this, the numbers flag up two major concerns which these days have plenty of other statistical, mass media, clinical and anecdotal evidence to support.

These findings absolutely necessitate further investigation specific to immune system degradation and cardiovascular inflammation. But Pfizer un-blinded the placebo group and permitted them to get vaccinated at the end of the 6 month trial period. So it is difficult to see how we can get any more data from Pfizer.

To be frank we are lucky to have the death data they have so far provided. Let us face facts. There are no long term clinical trials ongoing into the safety of these vaccines. Quite the reverse in fact. For one can argue that the purpose of the Pfizer lobbied vaccine mandates is to eradicate any unvaccinated control group from existence in order to prevent a proper evaluation of vaccine side effects over the medium term.

To that end, here is an edited copy letter recently sent to the UK's Scientific Advisory Group for Emergencies (SAGE):

Dear Members of SAGE

I write to inform you of an oversight in your scientific advice on Covid-19.

1. As you will all be aware, the only acceptable scientific method for determining the safety or effectiveness of a medical intervention is to compare its effect upon a randomly chosen experimental group with a control group preferably of similar size for statistical reasons.

In the phase III clinical trials for Pfizer there were 21,921 participants in the vaccinated group and 21,926 in the placebo group, the control group.

The control group, the placebo group is the yardstick with which we measure the effectiveness of the intervention. Only by comparison with a control group can a researcher determine whether an intervention has a statistically significant effect on an experimental group, and the possibility of drawing a false conclusion is mathematically and precisely defined. This A B comparison between intervention and control groups is called the Scientific Method.

So without a control group the Scientific method has been abandoned, we are no longer following any science at all, and no statistically valid conclusion can be drawn from the intervention. Instead science and its method have gone out of the window and we are back in the dark ages of Papal decrees.

2. The medium term (1-3 year) safety or efficacy of the Adenovirus-DNA vaccines and the lipid nanoparticle-mRNA vaccines is not yet known because they have not yet been examined in the general population for more than 10 months.

In this country the intervention group for these vaccines in the age demographic over 18 years old is now over 90% of the population

Why has the Scientific Advisory Group for Emergencies failed to advise the UK government to follow the scientific method and formulate a commensurate control group who do not take the vaccines?

How are we to assess the effectiveness of these vaccine interventions in the absence of such a group?

How can a group of scientists fail so spectacularly to follow not only 'the science' but actually any science at all in what is undoubtedly the most important medical intervention in the UK in the history of science and of medical practice?

May I therefore insist in the name of Science that you put your lab coats back on and advise the Government of this country without further delay to preserve all presently unvaccinated people as members of a vastly undersized, under represented depleted and sadly less than commensurate control group in order that this entire vaccination experiment can actually reach a statistically valid and meaningful conclusion and in order to demonstrate to the government and to the British public and to the world in general – what science actually is.

Furthermore if you are going to use children as lab rats for the benefit of adults and against the advice of the JCVI, then would you please ensure that only 50% of them are vaccinated and the remaining 50% are kept free of intervention as a properly sized control group in order that we can learn something from the government's hideous medical experimentation on them.

Yours Scientifically,

A concerned reader:

As a final proof that Covid vaccines destroy the immune system, we now have the admission by the CDC in response to a Freedom of Information Request, that they have no record of a person with natural immunity becoming re-infected and transmitting the virus to anybody.

the cdc:

Whereas the UKHSA has 450,992 records of people with double -vaccine immunity that became infected with Covid in the last 4 weeks.

Could there be a clearer demonstration that vaccines prevent people reaching full natural immunity by damaging and degrading their immune systems?

Here is the table of Pfizer trial deaths from Dose 1 (July 2020) to un-blinding after 6 months (January 2021):

Pfizer Phase I-II-III trial deaths from Dose1 to unblinding after 6 months		
Group >16 year old	21,926 double vaxxed	21,921 unvaxxed
Deaths	15 + (2)	14 + (5)
Acute respiratory failure	0	1
Aortic rupture	0	(1)
Arteriosclerosis - C	2	0
Biliary cancer metastatic	0	1
COVID-19	0	2
COVID-19 pneumonia	1	0
Cardiac arrest - C	4	1
Cardiac failure congestive - C	1	0
Cardiorespiratory arrest - C	1	1
Chronic obstructive pulmonary disease	(1)	0
Death	0	(1)
Dementia	0	(1)
Emphysematous cholecystitis - I	1	0
Hemorrhagic stroke - C	0	1
Hypertensive heart disease - C	1	0
Lung cancer metastatic	1	0
Metastases to liver	0	1
Went Missing	0	(1)
Multiple organ dysfunction syndrome	0	2
Myocardial infarction - C	0	2
Overdose	0	(1)
Pneumonia	0	2
Sepsis - I	1	0
Septic shock - I	1	0
Shigella sepsis - I	1	0
Unevaluable event	(1)	0
(n) discounted deaths from both groups which were not relevant to the intervention		

Sepsis/Septicemia results from an immune system failure to defeat a microbial (viral yeast or bacterial) infection.

Emphysematous cholecystitis is a relatively rare variant of acute cholecystitis with infection by gas-producing organisms. Diagnosis involves the demonstration of gas within the lumen or wall of the gallbladder by ultrasound or CT scan.

In contrast to acute cholecystitis, emphysematous cholecystitis occurs more commonly in elderly and diabetic patients, and is frequently associated with perforation and death.
– [Pubmed.ncbi.nlm.nih.gov](https://pubmed.ncbi.nlm.nih.gov)

Right after getting approval to inject everyone's children, Pfizer has secretly added the drug, Tromethamine to the already-dangerous gene-editing concoction.

So-called vaccines that appear to be causing heart attacks in otherwise young, health recipients, including pro athletes.

Tromethamine is used to stabilize the blood in heart attack victims. Pfizer claims that Tromethamine is being added as a 'buffer' to replace phosphate-buffered saline, which is a water-based salt solution.

But Tromethamine is not anything like a water-based salt solution. It is another dangerous petrochemical with a long list of side effects.

It has never been tested with the so-called vaccines. And it is only safe within the circulatory system.

A known side effect is tissue damage, if any Tromethamine leaks from the vein – and every single child they inject will be injected into their muscle, not the vein, which means every single child will be at risk for tissue damage, along with ADE, autoimmune disease and death.

We are at war and the attack is brought to you by Pfizer & Co.

From the very beginning of the manufactured COVID plandemic, it was never about the children. We were always told the children will be fine. It was about the elderly and the sick.

And then they realized we will submit to anything, so why not go for our children? If we allow it, they've already conquered us.

And many of our children can see exactly what's going on, even if their parents can't. They're all experiencing evil at the highest level, right now. Many will be deeply inspired to fight back.

So, why would these barbarians let them live, knowing that we will let them inject our children with an experimental drug that has demonstrably been shown to do great damage – all under the guise of protecting us from the Common Cold?

The hospitals were empty during COVID. And they are now overwhelmed by the vaccinated.

The same company profiting off this deadly scam openly has its hand in the FDA, is immune from liability, calls anyone who questions them 'criminals' and is secretly adding new drugs to an already-deadly cocktail, upon approval to inject our kids.

CDC Admits Crushing Rights of Naturally Immune Without Proof They Transmit the Virus

Source: Aaron Siri - Injecting Truth, November 15, 2021

After formal demand, the CDC concedes it does not have proof of a single instance of a naturally immune individual spreading the virus.

You would assume that if the CDC was going to crush the civil and individual rights of those with natural immunity by having them expelled from school, fired from their jobs, separated from the military, and worse, the CDC would have proof of at least one instance of an unvaccinated, naturally immune individual transmitting the COVID-19 virus to another individual. If you thought this, you would be wrong.

My firm, on behalf of ICAN, asked the CDC for precisely this proof (see below). ICAN wanted to see proof of any instance in which someone who previously had COVID-19 became re-infected with and transmitted the virus to someone else. The CDC's incredible response is that it does not have a single document reflecting that this has ever occurred. Not one.

In contrast, there are endless documents reflecting cases of vaccinated individuals becoming infected with and transmitting the virus to others.

But it gets worse. The CDC's excuse for not having a shred of evidence of the naturally immune transmitting the virus is that "this information is not collected." What?! No proof! But yet the CDC is actively crushing the rights of millions of naturally immune individuals in this country if they do not get the vaccine on the assumption they can transmit the virus. But despite clear proof the vaccinated spread the virus, the CDC lifts restrictions on the vaccinated?! That is dystopian.

The facts about natural immunity are simple. Every single peer reviewed study has found that the naturally immune have far greater than 99% protection from having COVID-19, and this immunity does not wane. In contrast, the COVID-19 vaccine provides, at best, 95% protection and this immunity wanes rapidly. I am no mathematician, but a constant 99% seems preferable to a 95% that quickly drops. And, while the vaccinated readily transmit the virus, not so for the naturally immune.

The lesson yet again is not that health authorities should never make mistakes. They will. It happens. The lesson is that civil and individual rights should never be contingent

upon a medical procedure. Everyone, the naturally immune or otherwise, who wants to get vaccinated and boosted should be free to do so. But nobody should be coerced by the government to partake in any medical procedure.

SPIRITUAL CHOICE: Any nation that fails to protect its CHILDREN from demonic vaccine sacrifice will suffer the wrath of God

Tuesday, November 16, 2021 by: [Mike Adams](#)

([Natural News](#)) In today's Situation Update podcast (below), I share passages from the Old Testament that are highly relevant today when it comes to protecting children against being sacrificed to Satan.

In *Leviticus*, God explains (through Moses) that not only is child sacrifice sinful and evil, but that **communities have an obligation to stop parents who are sacrificing their children to Moloch** ("Molek").

Societies that fail to stop the practice of child sacrifice face the wrath of God. Here's Leviticus 20:2-5 (emphasis added)

Say to the Israelites: "Any Israelite or any foreigner residing in Israel who sacrifices any of his children to Molek is to be put to death. The members of the community are to stone him. I myself will set my face against him and will cut him off from his people; for by sacrificing his children to Molek, he has defiled my sanctuary and profaned my holy name. If the members of the community close their eyes when that man sacrifices one of his children to Molek and if they fail to put him to death, I myself will set my face against him and his family and will cut them off from their people together with all who follow him in prostituting themselves to Molek."

As you can see, God calls for harsh punishment for parents who sacrifice their own children. In *Exodus*, God also shows that he is willing to unleash plagues upon entire nations that fail to follow his teachings. His plagues become increasingly severe as his warnings are ignored. In *Exodus*, God commanded the Pharaoh to set free the Israelites, and the Pharaoh refused until the tenth plague finally changed his mind.

Notably, at least two of these plagues are biological weapons attacks (livestock disease and the plague of the boils). Other plagues unleashed by God against Egypt include locusts, flies, gnats, frogs and finally, the mass death of all first-born sons.

Spike protein vaccines are biological weapons aimed at human children

Covid vaccines contain instructions for the body to manufacture [spike protein nanoparticles](#). Those toxic nanoparticles attack the body from the inside and even damage the DNA repair mechanism found in the nuclei of human cells. Accordingly, covid vaccines are a biological weapon being used to destroy human lives.

When they are injected into children with the permission of their parents, those parents are sacrificing their children and condemning them to death. God has already chimed in on his disdain for those parents who sacrifice their own children, and if the modern world does not stop this medical violence being committed against children, it's quite clear that God will unleash his wrath against the nations of our world.

What will that wrath look like? The Bible is filled with numerous examples: Plagues, earthquakes, pestilence, economic collapse, war and mass human suffering. Nations that turn away from God are heading directly down the path of total destruction, and the only solution that spares those nation is a return to God's teachings and for adults to start protecting children. (America is currently lead by a fake president who is a child-sniffing pervert. Ponder the spiritual implications of that...)

The mass vaccination of children with spike protein injections has **no scientific or medical justification whatsoever** and seems engineered to enrich Big Pharma while mass murdering young human beings. As the children of the world die from myocarditis, heart attacks, immunological disorders and even cancers over the next few years, it's going to become apparent that **humanity was engaged in a planetary scale mass child sacrifice ritual to Moloch**, spurred on by demon-infested anti-humanists like Fauci.

Any parent sacrificing their child to Moloch is rejecting God and securing their position in Hell for eternity. It's not going to be a pretty experience for them.

Those of us who understand the fundamentals of God's teachings must now **peacefully work to stop the mass sacrifice of our children** and prove to God that we are defending the innocent by halting child sacrifice via "vaccines."

If we fail to stop this spiritual atrocity, we will all be judged (harshly) by God himself.

Here come the tattoo marks – Scientists want to stamp children with invisible ink to prove they've been vaccinated

Monday, November 15, 2021 by: [Ethan Huff](#)

([Natural News](#)) Just a few months before the Wuhan coronavirus (COVID-19) was publicly announced, scientists from the [Massachusetts Institute of Technology](#) (MIT) announced the completion of a [Mark of the Beast "tattoo" technology for children](#) to keep track of their vaccination records.

The microchip, which can be implanted directly into the skin, was designed with special invisible dye that can be picked up with a special mobile phone filter. That dye is not visible to the naked eye.

Lasting up to five years, this dye is detected using near-infrared light, which is shined onto the skin in the area where it was injected. It has already been tested on pigs and rats, and the presumable next step is to start injecting actual children with it.

Billionaire eugenicist Bill Gates [called for this](#) back in the early days of the *plandemic*, suggesting that digital jab “passports” for the Chinese Virus include people’s injection records.

“The system – which has not yet been tested in children – would provide quick and easy access to vaccination history, avoid the risk of clerical errors, and add little to the cost or risk of the procedure,” reported *Scientific American*, citing a study about the project that was published in the journal *Science Translational Medicine*.

Quantum dot tattoos to complete the Mark of the Beast system

Once again using the poor as an excuse to create an abomination like this, the scientists involved with the project claim that it will help developing countries to achieve better health outcomes in children.

“Especially in developing countries where medical records may not be as complete or as accessible, there can be value in having medical information directly associated with a person,” commented Mark Prausnitz, a bioengineering professor at the [Georgia Institute of Technology](#) (Georgia Tech), who was not involved in the research.

“This, I think, is a pretty interesting way to accomplish those goals.”

It also accomplishes the prophetic goal of [merging people’s identifying information into a microchip injection](#) or tattoo that can be scanned for purposes of buying and selling, accessing restricted buildings, driving and engaging in social activities.

According to MIT bioengineers Robert Langer and Ana Jaklenec, small patches full of microneedles are first stamped on children's skin to inject them with vaccines. After that, their proof of injection is stored on the other injectable components.

With the simple scan of the wrist, forehead, or wherever else these components are injected, the government can quickly check whether or not a child is "up to date" on the vaccine schedule, which now includes Fauci Flu shots.

"The team ended up using a technology called quantum dots, tiny semiconducting crystals that reflect light and were originally developed to label cells during research," reported Scientific American. "The dye has been shown to be safe in humans."

Not everyone is on board with the plan, as you might expect. Privacy experts say that there are risks involved with having people walk around with microchips in their bodies that contain all of their personal information.

"Different people and different cultures will probably feel differently about having an invisible medical tattoo," added Prausnitz.

Not at all a surprise is the fact that the Bill & Melinda Gates Foundation funded this Mark of the Beast research. It was launched because of a "direct request" from Gates himself, who claims he wants these microchips inside people's bodies for the purpose of "eradicating disease."

"If we don't have good data, it's really difficult to eradicate disease," Jaklenec added in support of Gates' agenda.

The latest news about COVID-19 vaccines and the systematic implementation of the Mark of the Beast can be found at [Demonic.news](https://demonic.news).

BREAKING NEWS: Pfizer Hid from Public the Number of Deaths in COVID Clinical Trials — Actual Number Was 21 Which Was 6 More than was Reported and 4 More than Unvaccinated Group

By Jim Hoft, Published November 16, 2021 at 8:45pm

Pfizer lied about the number of individuals who died during third COVID vaccine trials. The actual number of deaths during the clinical trials was 21 not 16 as was originally reported. This was four more deaths than the clinical trials control group. So Pfizer lied about their deadly trials and just reported their greatest earnings ever. Pfizer Lied — People Died. When do the arrests start? So what else is new?

FBI & CDC investigate ‘smallpox’ vials at big pharma facility – media **17 Nov, 2021 03:43**

The FBI and CDC have launched a probe after several “questionable vials” labeled as “smallpox” were discovered in a freezer at a lab near Philadelphia, Pennsylvania, according to an alert obtained by Yahoo News.

The 15 mysterious vials were found on Tuesday night at a Merck laboratory, according to an unclassified alert sent to the Department of Homeland Security and seen by the outlet. Five of the ampules carried labels reading “smallpox,” while another 10 were said to contain “vaccinia” virus, the source for the modern smallpox immunization.

The vials were reportedly “secured immediately” and the facility was briefly placed on lockdown. While that has since been lifted, federal law enforcement, as well the Centers for Disease Control and Prevention (CDC), have opened investigations, which are ongoing.

Bill Gates wants US & UK to spend billions on ‘germ games’ Bill Gates wants US & UK to spend billions on ‘germ games’.

The CDC is set to take possession of the vials sometime on Wednesday, according to the alert, which also noted that no Merck staff were exposed to the materials.

While it remains unclear exactly where the containers were found, Merck runs two major facilities in Pennsylvania – one in West Point, its largest pharmaceutical manufacturing site, and another in nearby Upper Gwynedd, a 90-acre campus housing a research lab.

Smallpox is a deadly infectious disease caused by the variola virus, which carries a mortality rate of around 30%, according to the FDA, though the agency said that some less common forms of the illness are “usually fatal.” While the last naturally-occurring case of smallpox was recorded in the 1970s, with the disease largely eradicated through global vaccination campaigns, two labs are still authorized to store samples of the pathogen for research purposes, including a site in Siberia, Russia and another at the CDC’s headquarters in Atlanta, Georgia.

Top 10 signs that Covid vaccines are BIOWEAPONS and much more lethal than Covid-19 itself

Wednesday, November 17, 2021 by: [S.D. Wells](#)

([Natural News](#)) Many Americans remember the “Cold War” with Russia, when they stacked a bunch of nuclear missiles in Cuba and mainstream media went wild with talk of the USA turning red from a communist invasion. Nobody can ever forget the fake “Russia Collusion” hoax perpetuated before, during and after Trump won the presidency. Yet, the news never uttered a word this time around, when the Biden Regime completely and utterly colluded with the Chinese Communist Party to overthrow

the presidential election with fake mail-in ballots and Dominion voting machines switching 7,000 votes at a time to Sleepy Joe. Oh, what to believe, and what not to believe, that is the question.

Truth media using SCIENCE to prove the Covid vaccines are deadly, so it sure doesn't seem like a conspiracy theory at all

Common side effects of nearly all vaccines are swelling at the point of injection, dizziness, becoming sick, headaches, lethargy and the list goes on. What most people don't know about the Covid vaccines is that the billions of spike "proteins" that mimic virus particles don't just stay around the injection site, but rather spread throughout the entire vascular system, traveling through the brain and every vital cleaning organ.

This is the most insidious way to deathly sicken millions of people without the culprit getting blamed. The "side effects" this time around are totally different than the mercury-laced flu shots or the pig-virus-laced rotavirus vaccines. This is something the body cannot just "fight off."

Cells are being instructed to create toxic prions all throughout the blood vessels, and we're seeing perfectly healthy athletes and military members drop dead just days after the Covid jabs. The boosters will prove to be the "nuclear warheads" and the "ballistic missiles" of this "cold war." The only "shots" being fired off are the billions of clot shots.

Bill Gates told the world a few years back at a TED conference that he planned to reduce the world's population by a few billion people by using vaccines. Remember? How is that a conspiracy theory if he said it, on video, and is the #1 multi-billionaire promoter of vaccines worldwide?

Top 10 signs that Covid vaccines are BIOWEAPONS being used for genocide and depopulation

#1. Autopsies of the Covid-vaccinated reveal billions of spike proteins throughout the vascular system, polluting vital cleansing organs and the brain.

#2. Nano-particle injections are causing myocarditis because the heart is straining to pump blood past all the microscopic "clots."

#3. Healthy people, including athletes and military members, are dropping dead from "unidentifiable causes" within hours or days after getting the China Flu jabs.

#4. Vaccinated people are slowly and methodically losing their immune system function and suffering from antibody-dependence enhancement syndrome (ADE) and AIDS-like debilitation of white blood cells.

#5. The virus was made in a laboratory in Communist China and the vaccines are being pushed on the populace Nazi-style.

#6. Deaths from Covid-19 are still prominent among “fully vaccinated” people.

#7. Rare blood clots and aggressive cancer tumors are popping up in strange places in the Covid-vaccinated.

#8. The globalists who outwardly speak of depopulation using vaccines are the ones promoting the Covid jabs the most right now.

#9. The unvaccinated are being treated like the Jews of Nazi Germany; ostracized, blamed for everything that’s wrong, and deprived of jobs and normal living.

#10. Even the FDA and CDC admit the Covid vaccines do not keep you from catching Covid or transmitting it to others, so what’s their REAL purpose?

Conflict of Interest? Bill Gates Gave \$319 Million to Major Media Outlets, Documents Reveal

According to MintPress News, the Bill & Melinda Gates Foundation donated at least \$319 million to fund media projects at hundreds of organizations including CNN, NBC, NPR, PBS and The Atlantic, raising questions about those news outlets’ ability to report objectively on Gates and his work.

Up until his recent messy divorce, [Bill Gates](#) enjoyed something of a free pass in corporate media. Generally presented as a kindly nerd who wants to save the world, the [Microsoft](#) co-founder was even un-ironically christened “[Saint Bill](#)” by ‘*The Guardian*’. While other [billionaires’ media empires](#) are relatively well known, the extent to which Gates’s cash underwrites the modern media landscape is not. After sorting through over

30,000 individual grants, MintPress can reveal that the [Bill & Melinda Gates Foundation](#) (BMGF) has made over \$300 million worth of donations to fund media projects.

Recipients of this cash include many of America's most important news outlets, including CNN, NBC, NPR, PBS and The Atlantic.

Gates also sponsors a myriad of influential foreign organizations, including the BBC, 'The Guardian', 'The Financial Times' and 'The Daily Telegraph' in the UK; prominent European newspapers such as 'Le Monde' (France), 'Der Spiegel' (Germany) and 'El País' (Spain); as well as big global broadcasters like 'Al-Jazeera'.

The Gates Foundation money going towards media programs has been split up into a number of sections, presented in descending numerical order, and includes a link to the relevant grant on the organization's website.

Awards Directly to Media Outlets:

- National Public Radio — [\\$24,663,066](#).
- The Guardian (including [TheGuardian.org](#)) — [\\$12,951,391](#).
- Cascade Public Media — [\\$10,895,016](#).
- Public Radio International (PRI.org/TheWorld.org) — [\\$7,719,113](#).
- The Conversation — [\\$6,664,271](#).
- Univision — [\\$5,924,043](#).
- Der Spiegel (Germany) — [\\$5,437,294](#).
- Project Syndicate — [\\$5,280,186](#).
- Education Week — [\\$4,898,240](#).
- WETA — [\\$4,529,400](#).
- NBC Universal Media — [\\$4,373,500](#).
- Nation Media Group (Kenya) — [\\$4,073,194](#).
- Le Monde (France) — [\\$4,014,512](#).
- Bhekisisa (South Africa) — [\\$3,990,182](#).
- El País — [\\$3,968,184](#).
- BBC — [\\$3,668,657](#).
- CNN — [\\$3,600,000](#).
- KCET — [\\$3,520,703](#).
- Population Communications International (population.org) — [\\$3,500,000](#).
- The Daily Telegraph — [\\$3,446,801](#).
- Chalkbeat — [\\$2,672,491](#).
- The Education Post — [\\$2,639,193](#).
- Rockhopper Productions (U.K.) — [\\$2,480,392](#).

- Punch (Nigeria) — [\\$2,175,675](#).
- News Deeply — [\\$1,612,122](#).

- The Atlantic- — [\\$1,403,453](#).
- Minnesota Public Radio — [\\$1,290,898](#).
- YR Media — [\\$1,125,000](#).
- The New Humanitarian — [\\$1,046,457](#).
- Sheger FM (Ethiopia)— [\\$1,004,600](#).
- Al-Jazeera — [\\$1,000,000](#).
- ProPublica — [\\$1,000,000](#).
- Crosscut Public Media — [\\$810,000](#).
- Grist Magazine— [\\$750,000](#).
- Kurzgesagt — [\\$570,000](#).
- Educational Broadcasting Corp — [\\$506,504](#).
- Classical 98.1 — [\\$500,000](#).
- PBS — [\\$499,997](#).
- Gannett — [\\$499,651](#).
- Mail and Guardian (South Africa) — [\\$492,974](#).
- Inside Higher Ed. — [\\$439,910](#).
- BusinessDay (Nigeria) — [\\$416,900](#).
- Medium.com — [\\$412,000](#).
- Nutopia — [\\$350,000](#).
- Independent Television Broadcasting Inc. — [\\$300,000](#).
- Independent Television Service, Inc. — [\\$300,000](#).
- Caixin Media (China) — [\\$250,000](#).
- Pacific News Service — [\\$225,000](#).
- National Journal — [\\$220,638](#).
- Chronicle of Higher Education — [\\$149,994](#).
- Belle and Wissell, Co. — [\\$100,000](#).
- Media Trust — [\\$100,000](#).
- New York Public Radio — [\\$77,290](#).
- KUOW – Puget Sound Public Radio — [\\$5,310](#).

Together, these donations total \$166,216,526. The money is generally directed towards issues close to the Gates’ hearts.

For example, the \$3.6 million CNN grant went towards “report[ing] on gender equality with a particular focus on least developed countries, producing journalism on the everyday inequalities endured by women and girls across the world,” while the ‘*Texas Tribune*’ received millions to “to increase public awareness and engagement of education reform issues in Texas.”

Given that Bill is one of the charter schools’ most [fervent supporters](#), a cynic might interpret this as planting pro-corporate charter school propaganda into the media, disguised as objective news reporting.

The Gates Foundation has also given nearly \$63 million to charities closely aligned with [big media](#) outlets, including nearly [\\$53 million](#) to BBC Media Action, over [\\$9 million](#) to

MTV's Staying Alive Foundation and [\\$1 million](#) to The New York Times Neediest Causes Fund.

While not specifically funding journalism, donations to the philanthropic arm of a media player should still be noted.

Gates continues to underwrite a wide network of investigative journalism centers as well, totaling just over \$38 million, more than half of which has gone to the D.C.-based International Center for Journalists to expand and develop African media.

These centers include:

- International Center for Journalists — [\\$20,436,938](#).
- Premium Times Centre for Investigative Journalism (Nigeria) — [\\$3,800,357](#).
- The Pulitzer Center for Crisis Reporting — [\\$2,432,552](#).
- Fondation EurActiv Politech — [\\$2,368,300](#).
- International Women's Media Foundation — [\\$1,500,000](#).
- Center for Investigative Reporting — [\\$1,446,639](#).
- InterMedia Survey institute — [\\$1,297,545](#).
- The Bureau of Investigative Journalism — [\\$1,068,169](#).
- Internews Network — [\\$985,126](#).
- Communications Consortium Media Center — [\\$858,000](#).
- Institute for Nonprofit News — [\\$650,021](#).
- The Poynter Institute for Media Studies — [\\$382,997](#).
- Wole Soyinka Centre for Investigative Journalism (Nigeria) — [\\$360,211](#).
- Institute for Advanced Journalism Studies — [\\$254,500](#).
- Global Forum for Media Development (Belgium) — [\\$124,823](#).
- Mississippi Center for Investigative Reporting — [\\$100,000](#).

In addition to this, the Gates Foundation also plies press and journalism associations with cash, to the tune of at least \$12 million. For example, the National Newspaper Publishers Association — a group representing more than 200 outlets — has received \$3.2 million.

The list of these organizations includes:

- Education Writers Association — [\\$5,938,475](#).
- National Newspaper Publishers Association — [\\$3,249,176](#).
- National Press Foundation — [\\$1,916,172](#).
- Washington News Council — [\\$698,200](#).
- American Society of News Editors Foundation — [\\$250,000](#).
- Reporters Committee for Freedom of the Press — [\\$25,000](#).

This brings our running total up to \$216.4 million.

The foundation also puts up the money to directly train journalists all over the world, in the form of scholarships, courses and workshops.

Today, it is possible for an individual to train as a reporter thanks to a Gates Foundation grant, find work at a Gates-funded outlet, and to belong to a press association funded by Gates.

This is especially true of journalists working in the fields of health, education and global development, the ones Gates himself is most active in and where scrutiny of the billionaire's actions and motives are most necessary.

Gates Foundation grants pertaining to the instruction of journalists include:

- Johns Hopkins University — [\\$1,866,408](#).
- Teachers College, Columbia University — [\\$1,462,500](#).
- University of California Berkeley — [\\$767,800](#).
- Tsinghua University (China) — [\\$450,000](#).
- Seattle University — [\\$414,524](#).
- Institute for Advanced Journalism Studies — [\\$254,500](#).
- Rhodes University (South Africa) — [\\$189,000](#).
- Montclair State University — [\\$160,538](#).
- Pan-Atlantic University Foundation — [\\$130,718](#).
- World Health Organization — [\\$38,403](#).
- The Aftermath Project — [\\$15,435](#).

The BMGF also pays for a wide range of specific media campaigns around the world. For example, since 2014 it has donated \$5.7 million to the Population Foundation of India in order to create dramas that promote sexual and reproductive health, with the intent to increase family planning methods in South Asia.

Meanwhile, it allotted over [\\$3.5 million](#) to a Senegalese organization to develop radio shows and online content that would feature health information.

Supporters consider this to be helping critically underfunded media, while opponents might consider it a case of a billionaire using his money to plant his ideas and opinions into the press.

Media projects supported by the Gates Foundation:

- European Journalism Centre — [\\$20,060,048](#).

Total: \$97,315,408

\$319.4 million and (a lot) more

Added together, these Gates-sponsored media projects come to a total of \$319.4 million.

However, there are clear shortcomings with this non-exhaustive list, meaning the true figure is undoubtedly far higher. First, it does not count sub-grants — money given by recipients to media around the world.

J. T. KOWALSKI

And while the Gates Foundation fosters an air of openness about itself, there is actually precious little public information about what happens to the money from each grant,

save for a short, one- or two-sentence description written by the foundation itself on its website.

Only donations to press organizations themselves or projects that could be identified from the information on the Gates Foundation's website as media campaigns were counted, meaning that thousands of grants having some media element do not appear in this list.

A case in point is the BMGF's partnership with ViacomCBS, the company that controls CBS News, MTV, VH1, Nickelodeon and BET. Media reports at the time [noted](#) that the Gates Foundation was paying the entertainment giant to insert information and PSAs into its programming and that Gates had intervened to change storylines in popular shows like ER and Law & Order: SVU.

However, when checking BMGF's grants database, "Viacom" and "CBS" are nowhere to be found, the likely [grant](#) in question (totaling over \$6 million) merely describing the project as a "public engagement campaign aimed at improving high school graduation rates and postsecondary completion rates specifically aimed at parents and students," meaning that it was not counted in the official total.

There are surely many more examples like this. *"For a tax-privileged charity that so very often trumpets the importance of transparency, it's remarkable how intensely secretive the Gates Foundation is about its financial flows,"* [Tim Schwab](#), one of the few investigative journalists who has scrutinized the tech billionaire, told MintPress.

Also not included are grants aimed at producing articles for academic journals. While these articles are not meant for mass consumption, they regularly form the basis for stories in the mainstream press and help shape narratives around key issues.

The Gates Foundation has given far and wide to academic sources, with at least [\\$13.6 million](#) going toward creating content for the prestigious medical journal 'The Lancet'.

And, of course, even money given to universities for purely research projects eventually ends up in academic journals, and ultimately, downstream into mass media. Academics are under heavy pressure to print their results in prestigious journals; "publish or perish" is the mantra in university departments.

Therefore, even these sorts of grants have an effect on our media. Neither these nor grants funding the printing of books or establishment of websites counted in the total, although they too are forms of media.

Low profile, long tentacles

In comparison to other tech billionaires, Gates has kept his profile as a media controller relatively low. [Amazon](#) founder [Jeff Bezos's](#) purchase of 'The Washington Post' for \$250 million in 2013 was a very clear and obvious form of media influence, as was eBay

founder Pierre Omidyar's creation of *'First Look Media'*, the company that owns *'The Intercept'*.

Despite flying more under the radar, Gates and his companies have amassed considerable influence in media.

We already rely on Microsoft-owned products for communication (e.g., Skype, Hotmail), social media (LinkedIn), and entertainment (Microsoft Xbox). Furthermore, the hardware and software we use to communicate often comes courtesy of the 66-year-old Seattleite.

How many people reading this are doing so on a Microsoft Surface or Windows phone and doing so via Windows OS? Not only that, Microsoft owns stakes in media giants such as [Comcast](#) and [AT&T](#). And the "MS" in MSNBC stands for Microsoft.

Media Gates keeps

That the Gates Foundation is underwriting a significant chunk of our media ecosystem leads to serious problems with objectivity. "The foundation's grants to media organizations ... raise obvious conflict-of-interest questions: How can reporting be unbiased when a major player holds the purse strings?" [wrote](#) Gates's local Seattle Times in 2011.

This was before the newspaper [accepted](#) BMGF money to fund its "education lab" section.

Schwab's [research](#) has found that this conflict of interests goes right to the very top: two *'New York Times'* columnists had been writing glowingly about the Gates Foundation for years without disclosing that they also work for a group — the Solutions Journalism Network — that, as shown above, has received over \$7 million from the tech billionaire's charity.

Earlier this year, Schwab also declined to co-report on a story about COVAX for The Bureau of Investigative Journalism, suspecting that the money Gates had been pumping into the outlet would make it impossible to accurately report on a subject so close to Gates's heart.

Sure enough, when the article was [published](#) last month, it repeated the assertion that Gates had little to do with COVAX's failure, mirroring the BMGF's stance and quoting them throughout. Only at the very end of the more than 5,000-word story did it reveal that the organization it was defending was paying the wages of its staff.

"I don't believe Gates told The Bureau of Investigative Journalism what to write. I think the bureau implicitly, if subconsciously, knew they had to find a way to tell this story that didn't target their funder.

The biasing effects of financial conflicts are complex but very real and reliable,” Schwab said, describing it as “a case study in the perils of Gates-funded journalism.”

MintPress also contacted the Bill & Melinda Gates Foundation for comment, but it did not respond.

1/ Months ago, I was asked to be a co-reporter on this story. I declined b/c the [#GatesFoundation](#) was a funder, which I knew would make it impossible to rigorously examine Gates’s role in Covax. This story is a case study in the perils of Gates-funded

journalism. Read on & RT: <https://t.co/hkFQOBEGff>
— Tim Schwab (@TimothyWSchwab) [October 13, 2021](#)

Gates, who amassed his fortune by building a monopoly and zealously guarding his intellectual property, bears significant blame for the failure of the coronavirus vaccine rollout across the world.

Quite aside from the COVAX fiasco, he [pressured](#) Oxford University not to make its publicly-funded vaccine open-source and available to all for free, but instead to partner with private corporation [AstraZeneca](#), a decision that meant that those who could not pay were blocked from using it.

That Gates has made over 100 [donations](#) to the university, totaling hundreds of millions of dollars, likely played some role in the decision. To this day, fewer than [5%](#) of people in low-income countries have received even one dose of COVID vaccine. The death toll from this is immense.

Unfortunately, many of these real criticisms of Gates and his network are obscured by wild and untrue conspiracy theories about such things as inserting microchips in vaccines to control the population.

This has meant that genuine critiques of the Microsoft co-founder are often demonetized and algorithmically suppressed, meaning that outlets are strongly dissuaded from covering the topic, knowing they will likely lose money if they do so. The paucity of scrutiny of the world’s second-richest individual, in turn, feeds into outlandish suspicions.

Gates certainly deserves it. Quite apart from his deep and potentially decades-long ties to the infamous Jeffrey Epstein, his [attempts](#) to [radically](#) change African society, and his [investment](#) in controversial chemical giant [Monsanto](#), he is perhaps the key driver behind the American charter school movement — an attempt to essentially privatize the U.S. education system.

Charter schools are deeply unpopular with teachers’ unions, which see the movement as an attempt to lessen their autonomy and reduce public oversight into how and what children are taught.

All the way to the bank

How “self made” billionaires got their start

In most coverage, Gates's donations are broadly presented as altruistic gestures. Yet many have pointed to the inherent flaws with this model, noting that allowing billionaires to decide what they do with their money allows them to set the public agenda, giving them enormous power over society.

“Philanthropy can and is being used deliberately to divert attention away from different forms of economic exploitation that underpin global inequality today,” said [Linsey McGoey](#), Professor of Sociology at the University of Essex, U.K., and [author](#) of “No Such Thing as a Free Gift: The Gates Foundation and the Price of Philanthropy.” She adds:

“The new ‘[philanthrocapitalism](#)’ threatens democracy by increasing the power of the corporate sector at the expense of the public sector organizations, which increasingly face budget squeezes, in part by excessively remunerating for-profit organizations to deliver public services that could be delivered more cheaply without private sector involvement.”

**Bill Gates is not an authority figure.
Bill Gates is not an elected official.
Bill Gates has ZERO medical training.
Bill Gates has financial interests
invested in the CDC, WHO and
vaccine manufacturers.**

**CDC is a FOR PROFIT organization
WHO is a FOR PROFIT organization**

**These organizations have ZERO
authority over you, your family
and the decisions you make
regarding your health.**

**This is nothing more than a
sophisticated MARKETING
campaign for PROFIT.**

Charity, as former British Prime Minister Clement Attlee noted, "is a cold grey loveless thing. If a rich man wants to help the poor, he should pay his taxes gladly, not dole out money at a whim."

None of this means that the organizations receiving Gates' money — media or otherwise — are irredeemably corrupt, nor that the Gates Foundation does not do any good in the world.

But it does introduce a glaring conflict of interest whereby the very institutions we rely on to hold accountable one of the richest and most powerful men in the planet's history are quietly being funded by him.

This conflict of interest is one that corporate media have largely tried to ignore, while the supposedly altruistic philanthropist Gates just keeps getting richer, laughing all the way to the bank.

Will The World Wake Up to This Mass Psychosis?

This is all about Mass Murder on a Global Scale!

So-called "viruses" are simply dead fragments of former cell components that can't do or cause anything.

If you can provide any legitimate proof to the contrary, please forward it to Dr. Andrew Kaufman, Dr. Thomas Cowan, Dr. Jordan Grant, Dr. Kelly Brogan, Dr. Barre Lando, Dr. Robert Young, Dr. Amanda Vollmer, Dr. Stefan Lanka, Dr. Claus Kohnlein, Dr. Wil Trebing, Dawn Lester, David Parker, & James McCumiskey, as they haven't found it yet.

Covid-19 Outbreak Kills 8 Fully Vaxxed Residents at Connecticut Nursing Home Women System November 17, 2021

A Covid outbreak at a Connecticut nursing home has killed 8 fully vaccinated residents and infected 89 others.

Among the 89 people infected at Geer Village Senior Community in Canaan, 87 were fully vaccinated.

“Despite the highly infectious nature of this disease, our employees were able to protect their residents, themselves, and their families through the initial peak of this pandemic. They did this during a time when we least understood Covid-19 and struggled to find the supplies and funding to persevere as the virus spread. We are tremendously proud of our employees for their dedication to the people we care for,” Geer Village Senior Community CEO Kevin O’Connell said in a statement.

NBC Connecticut reported:

Eight people are dead and just shy of 100 more have become infected with COVID-19 after an outbreak at a Connecticut nursing home.

The outbreak at the Geer Village Senior Community, a nursing home and rehabilitation center in Canaan, started around the beginning of October when the nursing home was reporting three positive COVID-19 cases.

Now, eight residents have died, and 67 residents and 22 staff members caught COVID-19 sometime in the past month and a half. Nursing home officials said 48 residents and 21 staff members have recovered from the virus.

The state Department of Public Health said they’re monitoring and providing on-site consultation at this facility.

“Family members of residents in long-term care facilities should also encourage their loved ones being cared for in these facilities to get a booster vaccine,” a spokesperson for the DPH said.

This is a typical report of deaths at nursing homes, and the impression is inferred that those unvaccinated are to blame. As the report noted, the deceased were fully vaxxed and protected, which has proven to be not the case. These kinds of reports are deceptive since we know nothing about the issues relative to comorbidity. Dr. Joe Mercola in his new book, states that 88% of deaths charged to Covid-19 died with Covid and not from Covid. They all had at least 2 additional health issues. All throughout this Covid virus one of the largest errors has been in the facts and extenuating. The main stream media and the health industry only use information that breeds fear among the public. The CDC’s own data has remained unchanged in the chart on page 40 above.

Everyone missed this one... vaccinated people are up to 9X more likely to be hospitalized than unvaccinated people

There was a hidden gem in a blog post by Aaron Siri that nobody picked up. It was evidence that vaccinated people are 9X more likely to be admitted to the hospital than unvaccinated.

Steve Kirsch said, *“It is hard to get good, honest data out of hospitals nowadays for some reason. I have no clue as to why that is. You’d think things would be more transparent.”*

But Aaron Siri discovered someone who convinced their hospital to do something really unusual: track the vaccination status of each admitted patient to the hospital. Tracking was based on whether you got the vaccine or not, not “two weeks after you got the vaccine” which is a major definition difference. In short, honest tracking.

You’ll never guess what happened so I’ll tell you.

Siri wrote on his substack:

“A concerned Physician Assistant, Deborah Conrad, convinced her hospital to carefully track the Covid-19 vaccination status of every patient admitted to her hospital. The result is shocking.

As Ms. Conrad has detailed, her hospital serves a community in which less than 50% of the individuals were vaccinated for Covid-19 but yet, during the same time period, approximately 90% of the individuals admitted to her hospital were documented to have received this vaccine.”

These patients were admitted for a variety of reasons, including but not limited to COVID-19 infections. Even more troubling is that there were many individuals who were young, many who presented with unusual or unexpected health events, and many who were admitted months after vaccination.

As you might expect, the hospital rewarded Deborah Conrad for her courage and leadership to expose the truth by firing her.

The message is clear: If you speak the truth, you will pay the price. It is imperative that information that doesn’t align with the “narrative” be suppressed. This is why doctors don’t speak out. And it’s why I had to quit my job in high tech to speak out as well.

But here’s the part Aaron didn’t point out that needs to be stated very clearly:

The only way you can get those numbers is if vaccinated people are 9 times more likely to be hospitalized than unvaccinated

It is mathematically impossible to get to those numbers any other way. Period. Full stop. This is known as an “inconvenient truth.”

However, it’s important we don’t leap to quick conclusions. A good part of this effect could be due to a greater portion of vaccinated people among the elderly.

I'm in the process of getting a stratification by age to see just how serious this is. They noted in the article, "*there were many individuals who were young.*" So we'll see what the data says.

It does seem odd that a retired high tech executive is the one doing this research. I'm just doing it because nobody else is.

You can't have it both ways.

What I find super-interesting is we are led to believe that the hospitals are filled with the unvaccinated. So according to the narrative, the age skew of the vaccinated doesn't make a difference; it pales in comparison to the risk caused by those who are unvaccinated.

But now, when the evidence goes against them, the narrative changes that the reason there are so many vaccinated is the age skew.

Isn't that amazing? According to the "experts," no matter which way the data goes, the unvaccinated are the problem!

This of course is why I don't trust the medical community or the three letter agencies. I'm more interested in what the data says.

German doctor warns Corona vaccines are toxic...each booster become increasingly dangerous...tantamount to self-destruction.

When you ask COVID vaccine proponents how these mRNA type vaccines work, most either don't know, or give you the wrong answer. Very few really understand how the spike protein interacts with the immune system and thus accept the vaccine based on faith.

German site "[Lawyers for Fundamental Rights](#)" has a post by [Dr. Christian Fiala](#), a general practitioner, specialist in gynecology and obstetrics, with training in tropical medicine presents very clearly how the mRNA type "vaccine" works and its very real risk.

[Corona 'Vaccines': A Programmed Self-Destruction Of The Body](#) - Dr. Christian Fiala

First our immune system is highly complex and it recognizes a pathogen or foreign cell on the basis of the cell surface and destroys the cell that carries these antigens. This principle is used in vaccinations. For this purpose, a pathogen is usually weakened or killed so that it can no longer cause an infection.

An essential feature of the immune system is the strict differentiation between one's

own cells and foreign cells. Only in this way is a healthy life possible at all. It is precisely this fundamental distinction and basis of life that is being challenged with what is currently known as the jab, and being propagated as a corona "vaccination". The much-cited spike proteins are a recognition feature of the Corona virus, an antigen.

Friendly fire

When the Corona virus enters the body, the immune system recognizes the invader on the basis of the spike protein antigen and destroys the virus or the cells that have already been infected by the virus.

With the mRNA corona "vaccination", **body cells are for the first time in history deliberately and genetically programmed by means of the mRNA to produce the spike protein as a (foreign) antigen on the cell surface, although they are completely healthy and not infected with the virus.**

The mechanism of action of the corona "vaccination" is to falsely mark healthy cells as foreign.

As a consequence, the immune system reacts immediately; it recognizes the antigen as foreign, forms antibodies against it and destroys the spike protein by destroying the cell that carries this spike protein. [1,2]

This means that the corona "vaccination" fools our immune system and tricks it into attacking and destroying our own healthy cells. In the military it is this is called 'friendly fire' when soldiers attack their own troops. This represents a fundamental danger not only for our health but also to our survival. We know this situation with the rarely occurring autoimmune diseases. These are usually severe and can even be fatal.

The dose makes the poison

To better assess the danger of the Corona "vaccination", it is important to know how much mRNA is administered with one dose of the vaccine, i.e. how many body cells are stimulated to produce the spike protein and thus released to be destroyed by the immune system. Unfortunately, this important information is also not mentioned in the approval studies. There is only a scientific estimate of the number of particles in which the mRNA is transported by the so-called lipid nanoparticles: about 2 trillion particles.

Not every particle reaches a healthy cell and some cells in the body are affected by more than one particle. Moreover, not all particles may be fully functional. Nevertheless, the number of particles is extremely relevant when one considers that the human body consists of approximately 37 trillion cells.

Which organs does the Corona "vaccination" damage?

The corona "vaccination" is programmed in such a way that the immune system

destroys the body's own cells that have produced the spike protein on its surface. Could this happen on vital organs?

The answer to this question can be found, among others, in animal experiments by the vaccine manufacturer BionTech/Pfizer. The spike protein blueprint is found in a gene segment, the so-called mRNA, and is embedded in very small spheres of fat, the so-called lipid nanoparticles. After 1 hour, half of them were already distributed throughout the body. The lipid nano-particles were detected in all organs in the above-mentioned animal experiment, especially in the liver.

They were also detected in the brain, which proves they were able to cross the blood-brain barrier. They were also detected in the ovaries and testes. This means the body's cells form the spike protein in the respective organs, which probably explains why the very numerous side effects and vaccine damage are also found randomly distributed in many organs. [6,7,8]

Since the lipid nanoparticles are distributed in the blood, especially the so-called endothelial cells get affected.[9] This explains the numerous blood clots (thromboses or embolisms) observed as a result of the Corona "vaccination". These also occur in the brain, among other places, and lead to partially irreversible damage. This is particularly worrying because it shows that even those organs that are separated from the immune system by a special barrier are now vulnerable.

Booster "vaccination" - enough is not enough

The Corona "vaccination" is designed to be given at short intervals. **Thus the vaccination expires after 6 or 9 months and the vaccinated persons will then be considered unvaccinated.**[10] Many governments have already ordered tens of millions of doses to be given in the coming years. In Israel, a large part of the population has already been vaccinated for the 3rd time.[13]

The key question becomes: what effect does a repeated injection have on the body?

Our immune system is capable of learning. When a pathogen enters the body for the first time, it is recognized as foreign, but it takes a few days for the immune system to kick in. During this time, the pathogen has the upper hand for a short time. Only after a few days is the immune system strong enough to destroy the pathogen and we become healthy.

Fortunately, the second time, the immune system remembers the "appearance" of the pathogen and it is activated much faster and much more powerfully. This strong defense protects us and we do not fall ill again; we are immune.

This vital mechanism also takes place with every further corona "vaccination", but the massive reaction of the immune system with each further injection is not directed against a pathogen but **against our own healthy body cells that have once again**

been marked with the spike protein. Viewed as a pathogen, this otherwise healthy cell is targeted to be destroyed. The effectiveness and ferocity of this destruction of healthy cells is increased with each injection. This means that the healthy "spiked cells" in the body are destroyed even more efficiently than in the first injection.

Thus, this memory capacity of the immune system becomes a dangerous weapon against ourselves.

Instead of making foreign pathogens harmless, the immune system now destroys the body's own cells which were instructed to produce the spike protein. Every further injection of a Corona "vaccine" consequently poses a great risk. This corresponds to the observation that more and stronger vaccination complications occur with the second vaccination.

The same applies to people who have had a Corona infection in the past, have recovered and still get a Corona "vaccination". [14,15,16,17]

Fortunately people who have already been vaccinated can opt out of the vaccination cycle at any time, and are thus very likely to avoid further risks to their health.

Conclusion

With the mRNA Corona "vaccination", an unimaginably large number of healthy endogenous cells are marked as foreign with the spike protein and thus given the green light for destruction by the body's immune system. The immune system has been tricked into destroying billions of healthy cells.

Epilogue

The processes described are basic medical knowledge and are well known. It is therefore all the more worrying that these important aspects are practically absent from the scientific and public discourse. Further information on Corona "vaccination" is summarized in the following article: 10 reasons against vaccination: www.initiative-corona.info/fileadmin/dokumente/10_Gruende_gegen_Impfung.pdf

As Reports of Injuries After COVID Vaccines Near 1 Million Mark, CDC, FDA Clear Pfizer, Moderna Boosters for All Adults

VAERS data released today by the CDC included a total of **894,145 reports of adverse events** from all age groups following COVID vaccines, including **18,853 deaths** and **139,126 serious injuries** between Dec. 14, 2020, and Nov. 12, 2021.

The Centers for Disease Control and Prevention (CDC) released new data today showing a total of [894,145 adverse events](#) following COVID vaccines were reported between Dec. 14, 2020, and Nov. 12, 2021, to the Vaccine Adverse Event Reporting System (VAERS). VAERS is the primary government-funded system for reporting adverse vaccine reactions in the U.S.

The data included a total of [18,853 reports of deaths](#) — an increase of 392 over the previous week — and [139,126 reports of serious injuries](#), including deaths, during the same time period — up 3,726 compared with the previous week.

Excluding “[foreign reports](#)” to VAERS, [654,413 adverse events](#), including [8,664 deaths](#) and [54,962 serious injuries](#), were reported in the U.S. between Dec. 14, 2020, and Nov. 12, 2021.

[Foreign reports](#) are reports received by U.S. manufacturers from their foreign subsidiaries. Under U.S. Food and Drug Administration (FDA) regulations, if a manufacturer is notified of a foreign case report that describes an event that is both serious and does not appear on the product’s labeling, the manufacturer is required to submit the report to VAERS.

Of the 8,664 U.S. deaths reported as of Nov. 12, [10% occurred](#) within 24 hours of vaccination, [15% occurred](#) within 48 hours of vaccination and [26% occurred](#) in people who experienced an onset of symptoms within 48 hours of being vaccinated.

In the U.S., 436.9 million COVID vaccine doses had been administered as of Nov. 12. This [includes](#): 254.5 million doses of Pfizer, 166.3 million doses of Moderna and 16.1 million doses of Johnson & Johnson (J&J).

Every Friday, VAERS publishes vaccine injury reports received as of a specified date. Reports submitted to VAERS require further investigation before a causal relationship can be confirmed. Historically, VAERS has been shown to report only 1% of actual vaccine adverse events.

This week’s U.S. data for 5- to 11-year-olds show:

- 1,426 [total adverse events](#), including 9 [rated as serious](#) and 1 [reported death](#) that occurred in an 11-year-old girl from Georgia vaccinated Sept. 14, prior to the authorization of Pfizer’s COVID vaccine in the 5 to 11 age group.
- 444 [adverse events](#) have been reported in the 5 to 11 age group since Nov. 1.
- The rest of the reports [in VAERS](#) for children in the 5 to 11 age group occurred prior to the authorization of Pfizer’s COVID vaccine, and are due to “product administered to patient of inappropriate age.”

This week’s U.S. data for 12- to 17-year-olds show:

- 23,105 [total adverse events](#), including [1,429 rated as serious](#) and [30 reported deaths](#).

Search Results

From the 11/12/2021 release of VAERS data:

Found 894,145 cases where Vaccine is COVID19

Government Disclaimer on use of this data

Table

Event Outcome	Count	Percent
Death	16,853	2.11%
Permanent Disability	30,010	3.36%
Office Visit	180,881	19.88%
Emergency Room	31	0.01%
Emergency Department	89,474	10.12%
Hospitalized	84,274	9.42%
Hospitalized, Prolonged	263	0.03%
Recovered	389,629	43.58%
Birth Defect	688	0.08%
Life Threatening	21,080	2.36%
Not Serious	247,226	27.65%
TOTAL	1,081,490	1,218.71%

* Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 894,145 (the number of cases listed), and the Total Percentage is greater than 100.

The most recent death includes a 16-year-old girl from Missouri (VAERS I.D. [1823671](#)) who died after receiving her second dose of Pfizer.

Other reported deaths include a 17-year-old female from Washington (VAERS I.D. [1828901](#)) who died Oct. 29 reportedly from a heart condition after receiving her second dose of Pfizer; a 12-year-old girl from South Carolina (VAERS I.D. [1784945](#)) who hemorrhaged 22 days after receiving Pfizer's COVID vaccine; and a 13-year-old girl from Maryland (VAERS I.D. [1815096](#)) who died from a heart condition 15 days after receiving her first dose of Pfizer's vaccine.

- [59 reports](#) of anaphylaxis among 12- to 17-year-olds where the reaction was life-threatening, required treatment or resulted in death — with 96% of cases attributed to [Pfizer's vaccine](#).
- [559 reports](#) of myocarditis and pericarditis (heart inflammation) with [549 cases](#) attributed to Pfizer's vaccine.
- [134 reports](#) of blood clotting disorders, with all cases attributed to Pfizer.

This week's U.S. VAERS data, from Dec. 14, 2020, to Nov. 12, 2021, for all age groups combined, show:

- 19% of deaths were related to cardiac disorders.

- 54% of those who died were male, 42% were female and the remaining death reports did not include gender of the deceased.
- The [average age](#) of death was **72.7**.
- As of Nov. 12, [4,362 pregnant women](#) reported adverse events related to COVID vaccines, including 1,376 reports of [miscarriage or premature birth](#).
- Of the [3,158 cases of Bell's Palsy](#) reported, 51% were attributed to [Pfizer](#) vaccinations, 41% to [Moderna](#) and 8% to [J&J](#).
- 743 reports of [Guillain-Barré syndrome](#) (GBS), with 42% of cases [attributed to Pfizer](#), 31% to [Moderna](#) and 27% to [J&J](#).
- [2,125 reports](#) of anaphylaxis where the reaction was life-threatening, required treatment or resulted in death.
- [11,058 reports](#) of blood clotting disorders. Of those, [4,888 reports](#) were attributed to Pfizer, [3,937 reports](#) to Moderna and [2,179 reports](#) to J&J.
- [3,145 cases](#) of myocarditis and pericarditis with [1,963 cases](#) attributed to Pfizer, [1,041 cases](#) to Moderna and [130 cases](#) to J&J's COVID vaccine.

FDA, CDC sign off on Pfizer, Moderna COVID boosters for all adults

The U.S. Food and Drug Administration (FDA) today authorized Moderna and Pfizer COVID boosters for all adults. The agency made its decision [without input](#) from its advisory committee, whose members, on Sept. 17, voted 16 to 2 [against recommending boosters](#), citing a lack of long-term data and stating the risks did not outweigh the benefits.

Hours after the FDA announced its decision, the CDC's Advisory Committee on Immunization Practices (ACIP) signed off with an [unanimous endorsement](#).

The ACIP said 18- to 49-year-olds "[may](#)" [get a booster](#), but people 50 and older should get one. CDC Director Dr. Rochelle Walensky is expected to clear the doses, which will allow boosters to be administered broadly to the general public.

Speaking for the FDA, Dr. Peter Marks, head of the agency's Center for Biologics Evaluation and Research, [said in a statement](#):

"The FDA has determined that the currently available data support expanding the eligibility of a single booster dose of the Moderna and Pfizer-BioNTech COVID-19 vaccines to individuals 18 years of age and older."

Dr. Paul Offit, director of the Vaccine Education Center at Children's Hospital of Philadelphia, and an FDA advisory panel member took issue with how the FDA arrived at its decision.

In an email to [The Epoch Times](#), Offit said, *"I think it would have been of value for the public to hear an open discussion about the need for boosters. I wish we had had the chance to discuss this."*

The FDA said it did not hold a meeting because *“the agency previously convened the committee for extensive discussions regarding the use of booster doses of COVID-19 vaccines and, after review of both Pfizer’s and Moderna’s [Emergency Use Authorization] requests, the FDA concluded that the requests do not raise questions that would benefit from additional discussion by committee members.”*

Pfizer and BioNTech [requested authorization](#) last week after submitting the results of a phase 3 trial involving more than 10,000 participants.

Moderna [resubmitted its application](#) for its 50-microgram booster dose for all adults just two days ago. The company said the FDA based its decision on the “totality of scientific evidence [shared by the company](#),” including data that showed neutralizing antibodies had waned at about six months.

[BUY TODAY: Robert F. Kennedy, Jr.'s New Book — 'The Real Anthony Fauci'](#)

14-year-old Kentucky girl mistakenly given J&J vaccine

A 14-year-old Kentucky girl was mistakenly given J&J’s COVID vaccine, which is not authorized for anyone under the age of 18, [International Business Times reported](#). The girl was given the jab Oct. 16 at a vaccine drive-in at a high school in Covington.

The girl’s mother, Rolina Mason, said her daughter was reluctant to get vaccinated and wanted the J&J vaccine because it was only one dose. Mason agreed that the nurse could administer J&J, but didn’t realize it wasn’t authorized for use in children.

Mason said she trusted the nurse who told them that it was okay for her daughter to get it.

The health department contacted Mason a week later and informed her that her daughter should have received Pfizer’s COVID vaccine instead. Mason’s daughter reportedly experienced skin rashes after receiving the shot.

States bypass CDC, gave out COVID boosters to all adults before authorization

State officials from California to Maine encouraged and allowed adult residents to get COVID vaccine boosters despite recommendations by the FDA and CDC to reserve the shots for elderly and high-risk groups, [CNBC reported](#).

California also told medical providers not to turn away any adults who requested a booster.

Arkansas, Colorado, Louisiana, Kansas, Kentucky, Maine, New Mexico, Vermont and West Virginia are also promoting widespread rollout of boosters for any fully vaccinated adult, with governors in Colorado and New Mexico signing executive orders a week before the FDA authorized the shots for the general population.

Gov. Jim Justice of West Virginia called for all adults in-state to get their boosters, adding that fully vaccinated residents would be “very foolish” not to register for the third dose.

Arkansas Gov. Asa Hutchinson said during a briefing Monday he wanted to make sure everybody 18 and over was eligible and encouraged to get a booster. Danyelle McNeill, a spokesperson for the Arkansas Department of Health, told CNBC in an email “the great majority of adults in Arkansas” were already considered high risk by the CDC before Hutchinson issued his recommendation.

Kentucky approved boosters for fully vaccinated adults on Wednesday, while Connecticut, Kansas, Louisiana, Maine, Massachusetts and Vermont expanded their booster programs this week before the FDA and CDC signed off, today.

[Double your impact! When you make a donation to Children's Health Defense, your donation will be matched — up to \\$2 million! Donate Now!](#)

Several children in California sick after receiving wrong COVID vaccine doses

At least two children in California are sick after a clinic [administered the wrong doses](#) of a COVID vaccine to 14 kids.

Denise Iserloth said she took her two children, ages 8 and 11, to a clinic where they received 20 micrograms of dosage instead of the recommended 10 micrograms.

Sutter Health said in a statement it warned parents of the mistake as soon as they learned of it, and contacted parents to advise them of CDC guidance. But Iserloth said she wasn't made aware of the error until 10 hours after her children were vaccinated.

Both of her children stayed home from school on Monday with bad stomach aches, and her oldest child fell down twice in the hours following the shot, Iserloth said.

“I understand the mandate, I tried to comply with it, and my children now have been given a double dose and I don't know the long-term side effects,” Iserloth said. “[...] It is unacceptable and negligent, completely negligent on their part.”

COVID hospitalizations on the rise among fully vaccinated

COVID hospitalizations and emergency room visits are on the rise among people who are [fully vaccinated](#), according to [Dr. Anthony Fauci](#), director of the National Institute for Allergy and Infectious Diseases.

“What we're starting to see now is an uptick in hospitalizations among people who've been vaccinated but not boosted,” Fauci said Tuesday. “It's a significant proportion, but not the majority by any means.”

In a White House COVID-19 Response Team [briefing](#) Wednesday, Fauci stressed the importance of vaccines and highlighted how well they work. At the same panel, CDC

Director Walensky reported a decline in vaccine effectiveness among the elderly and residents of long-term care facilities, many of whom were the first to be eligible to be vaccinated last winter.

The current seven-day rate of COVID [hospital admissions](#) is about 5,300 per day, according to the CDC.

It's not clear how many hospitalizations are [breakthrough cases](#) as the agency stopped reporting hospitalizations among fully vaccinated people and its [website shows data](#) only through Aug. 28.

CDC admits to not tracking data on natural immunity

In response to a Freedom of Information Act (FOIA) request, the [CDC said](#) it has no record of an individual previously infected with COVID becoming re-infected or transmitting the virus to others — because the agency doesn't collect that data.

The [FOIA request](#), submitted Sept. 2 by attorney Aaron Siri of the Siri & Glimstad law firm on behalf of the Informed Consent Action Network, sought documents reflecting any documented case of an individual who: (1) never received a COVID vaccine; (2) was infected with COVID once, recovered, and then later became infected again; and (3) transmitted SARS-CoV-2 to another person when re-infected.

The CDC responded Nov. 5, [stating](#):

“A search of our records failed to reveal any documents pertaining to your request. The CDC Emergency Operations Center (EOC) conveyed that this information is not collected.”

According to Siri, the revelation that the CDC [does not collect data](#) on people who have acquired natural immunity to the virus raises questions about vaccine mandates, specifically how the government or employers can mandate vaccines for people who may not need them and who could be at a greater-than-average risk of experiencing an adverse reaction to the shots.

[Children's Health Defense](#) asks anyone who has experienced an adverse reaction, to any vaccine, to file a report following [these three steps](#).

SCIENCE HORROR: Vaccine Spike Protein Enters Cell Nuclei, Suppresses DNA Repair Engine – Will Unleash Explosion of Cancer, Immunodeficiency, Autoimmune Disorders and Accelerated Aging
[by Mike Adams | NaturalNews.com](#)

November 2nd 2021, 5:05 pm

The horrifying upshot of this finding is that people who have taken mRNA vaccines will experience suppressed DNA repair, escalating exposures that were once thought to be minor issues to significant threats to their health.

This finding can only be described as a true “horror” in its implications. [Stunning new research published in *Viruses*](#), part of the SARS-CoV-2 Host Cell Interactions edition of MDPI (Open Access Journals) reveals that vaccine spike proteins enter cell nuclei and wreak havoc on cells’ DNA repair mechanism, suppressing DNA repair by as much as 90%.

The research paper is entitled, “SARS–CoV–2 Spike Impairs DNA Damage Repair and Inhibits V(D)J Recombination In Vitro” and is authored by Hui Jiang and Ya-Fang Mei, at the Department of Molecular Biosciences, The Wenner–Gren Institute, Stockholm University, SE-10691 Stockholm, Sweden, and the Department of Clinical Microbiology, Virology, Umeå University, SE-90185 Umeå, Sweden, respectively.

We have saved a copy of the research paper in a PDF document on NN servers at this URL:

<https://www.naturalnews.com/files/viruses-13-02056-v2.pdf>

In the conclusion of the paper, authors write, “We found that the spike protein markedly inhibited both BRCA1 and 53BP1 foci formation (Figure 3D–G). Together, these data show that the SARS–CoV–2 full-length spike protein inhibits DNA damage repair by hindering DNA repair protein recruitment.”

The DNA repair mechanism, known as NHEJ (Non-Homologous End Joining) is a kind of intracellular “emergency response” system that repairs double-stranded DNA breaks. Without the NHEJ mechanism, all advanced multi-cellular life would cease to exist. No human being, animal or plant can survive with the integrity of its genetic code being protected and constantly repaired through multiple mechanisms.

DNA damage can be caused by exposure to radiation, chemicals found in foods and personal care products, or even exposure to mammography equipment. Excessive sunlight exposure can also cause DNA breaks, and minor DNA mutations occur spontaneously in all living organisms. Airline pilots, for example, are routinely exposed to ionizing 5G radiation due to flying at altitude.

In a normal, healthy person, the NHEJ mechanism repairs the DNA and prevents a pathogenic mutation from occurring. But in the presence of the vaccine spike protein, NHEJ effectiveness is suppressed by as much as 90%, meaning it is unable to do its job due to the suppressed ability to recruit proteins for repair.

As a result, the following “errors” are introduced into chromosomes inside the nuclei of human cells, all due to the presence of the spike protein from mRNA vaccines:

- Mutations or “errors” in the genetic sequence.
- DELETIONS of entire segments of genetic code.
- INSERTIONS of incorrect segments.
- Mixing and matching / permutations of genetic code.

These errors, when expressed through cell division and replication, result in:

- An explosion of cancer and cancer tumors throughout the body
- Loss of production of immune system B and T cells (i.e. induced immunodeficiency)
- Autoimmune disorders
- Accelerated aging and reduced telomere length
- Loss of functioning of complex organ systems such as circulatory, neurological, endocrine, musculoskeletal, etc.
- Cellular damage resembling **radiation poisoning** as cells destroy themselves from within

Many of these effects are, of course, fatal. Others will burden vaccine victims with horrendous debilitating injuries and organ malfunctions that will require a lifetime of medical intervention.

Spike protein goes into the nucleus of the cell

From the paper linked above:

Mechanistically, we found that the spike protein localizes in the nucleus and inhibits DNA damage repair by impeding key DNA repair protein BRCA1 and 53BP1 recruitment to the damage site.

This means that the spike protein, which is generated in cell ribosomes after the cells have been hijacked by mRNA vaccines, doesn't always leave the cell and enter the bloodstream as we are told by mRNA vaccine proponents. In some cases, **the spike protein enters the cell nucleus**. There, it interferes with the DNA repair mechanism as described throughout this article.

“Surprisingly, we found the abundance of the spike protein in the nucleus (Figure 1A),” concluded study authors.

This means, without question, **mRNA vaccines result in chromosomal alterations in the body's cells**. It is confirmation that such vaccines are, indeed, wreaking havoc with genetic integrity and are exhibiting side effects that have not been anticipated or described by mRNA vaccine proponents.

Dr. Thomas Levy writes about the toxicity of the spike protein on [Orthomolecular.org](https://www.orthomolecular.org): *Concern has been raised regarding the dissemination of the spike protein throughout the body after vaccination. Rather than staying localized at the injection site in order to provoke the immune response and nothing more, spike protein presence has been detected throughout the body of some vaccinated individuals. Furthermore, it appears that some of the circulating spike proteins simply bind the ACE2 receptors without entering the cell, inducing an autoimmune response to the entire cell-spike protein entity. Depending on the cell type that binds the spike protein, any of a number of autoimmune medical conditions can result.*

More alarmingly, Dr. Levy explains that **current evidence shows the spike protein continues to produce in the body, following the initial mRNA injection.** He explains:

While the underlying pathology remains to be completely defined, one explanation for the problems with thrombotic tendencies and other symptomatology seen with chronic COVID and post-vaccination patients relates directly to the persistent presence of the spike protein part of the coronavirus. Some reports assert that the spike protein can continue to be produced after the initial binding to the ACE2 receptors and entry into some of the cells that it initially targets. The clinical pictures of chronic COVID and post-vaccine toxicity appear very similar, and both are likely due to this continued presence, and body-wide dissemination, of the spike protein (Mendelson et al., 2020; Aucott and Rebman, 2021; Levy, 2021; Raveendran, 2021).

Full-length spike protein resulted in the greatest suppression of NHEJ DNA repair mechanism

See the figures below. SARS-CoV-2 viral fragments are named “Nsp1, Nsp5” and so on. The full-length spike is called “Spike” and the nucleocapsid — another structural part of the whole spike protein pathogen — is identified separately.

What these data show is that the greatest suppression of NHEJ activity is measured when the full spike protein is present. From the study:

Together, these data show that the SARS–CoV–2 full–length spike protein inhibits DNA damage repair by hindering DNA repair protein recruitment.

This is the spike protein that’s generated by the body’s own cells after being injected with an mRNA vaccine: Full data charts were in this report posted last week if anyone wants to view the data.

5G exposure, chemtrail exposure, food chemical exposure, mammography and even sunlight exposure will wreak havoc in those who have taken mRNA vaccines.

The horrifying upshot of this finding is that people who have taken mRNA vaccines will experience **suppressed DNA repair**, escalating exposures that were once thought to be minor issues to significant threats to their health.

In other words, people exposed to **5G** radiation, mammography exams, plasticizer chemicals in food products, and carcinogens in personal care products (laundry detergents, perfumes, shampoos, skin lotions, etc.) will be unable to repair the DNA damage caused by those exposures. Following relatively small exposures, they will begin to mutate and develop cancers throughout their bodies.

Don't forget that **5G exposure results in peroxynitrite production in the blood**, an extremely dangerous free radical that causes DNA damage in brain cells and tissue cells across the body.

This could even be described as a kind of **binary weapon system** where mRNA vaccines weaken DNA repair, and **5G** exposure (or chemical exposure in the food supply) provides the weapon that breaks DNA strands and leads to the body being unable to maintain genetic integrity during cell replication. This doesn't take long to be expressed in horrible physical ways, such as the attempted growing of internal organ tissues on the surface of the skin or face, which is why I have titled today's Situation Update podcast, "Monsters, Zombies and Mutants."

The presence of the spike protein interferes with normal immune function and leads to immunodeficiency (an AIDS-like condition)

This research also finds that spike proteins from mRNA vaccines can lead to immunodeficiency conditions, similar to AIDS. This is consistent with what we have previously reported about immune function dropping roughly 5% per week in those who have taken covid vaccines. From the study:

...[L]oss of function of key DNA repair proteins such as ATM, DNA-PKcs, 53BP1, et al., leads to defects in the NHEJ repair which inhibit the production of functional B and T cells, leading to immunodeficiency.

Immune function is also critically affected by the presence of the spike protein, potentially leading to cancerous mutations throughout the body's cells. As the study explains:

DNA damage repair, especially NHEJ repair, is essential for V(D)J recombination, which lies at the core of B and T cell immunity.

As Science Direct also explains:

Maintaining genomic integrity is imperative for the survival of an organism. Among different DNA damages, double-strand breaks (DSBs) are considered as most deleterious since they can lead to cell death if left unrepaired or chromosomal rearrangements when mis-repaired, leading to cancer.

*Further, mutations in NHEJ genes including Ku70 and Ku80 have been associated with **shortened life spans in mice** [54]. In addition, defects in DNA-PKcs (DNA-dependent protein kinase) resulted in **impaired telomere maintenance** and shortened life span in mice [55]. Taken together, these lines of evidence suggest that NHEJ plays an important role in preventing age-related increase in genomic instability and functional decline.*

In effect, this means the spike protein's suppression of the NHEJ DNA repair mechanism also leads to reduced lifespan and accelerated aging.

By some estimates, 50% of the people injected with mRNA vaccines will be dead within five years. Now we have a deeper understanding of the mechanisms by which those vaccine-induced fatalities may occur.

COVID injection DANGER: Pfizer jab causes blood clots under microscope

by: [Sara Middleton, staff writer](#) | November 4, 2021

([NaturalHealth365](#)) While the mainstream media initially attempted to suppress the stories of people experiencing blood clots, heart inflammation, strokes, and other frightening diagnoses following a COVID shot, the scientific evidence finally can no longer be ignored. Now, Big Pharma companies Moderna and Pfizer have had to admit that their profitable mRNA jab can cause blood clots in some people.

Yet, despite the known and unknown risks of these drugs, we continue to see local and national governments push vax mandates on their citizens. Many medical experts are concerned, especially given the growing [evidence of harm](#) these new drugs can cause.

Microscopic evidence shows Pfizer COVID shot causing blood clots in REAL-TIME

In just a short two-minute clip, clinician Dr. Richard Fleming shows how the COVID shot can lead to abnormal clotting in red blood cells.

Dr. Fleming has a bit of a controversial professional history and was temporarily barred by the U.S. Food and Drug Administration (FDA) from participating in any drug studies due to two fraud convictions stemming from 2009. Controversies notwithstanding, however, the evidence Dr. Fleming presents is alarming!

Adding the Pfizer vaccine to blood samples under a microscope, he explains, causes “red blood cells [to] lose their oxygen-carrying capacity and the red blood cells start to clot ... This is exactly what we are seeing with neurologic harm, with cardiac harm, with blood clots occurring in the body. This is proof positive that these vaccines cause this type of damage under the microscope, just by simply being added to the blood of a human being.”

You can watch the video below:

[Dr. Richard Fleming: Pfizer Vaccine Causes Blood Clots Under Microscope](#)

Aside from jabs, these are other possible causes of blood clots (and blood clot symptoms to look out for)

Follow the science: COVID-19 shots can cause blood clots. COVID-19 infections can cause blood clots, too, but as we now know, getting a COVID shot doesn't mean you won't get COVID-19.

Of course, people have been getting and suffering from blood clots for a long time. What else can cause these potentially dangerous clots, which can travel to

organs like the lung, brain, and heart and cause problems such as pulmonary embolisms, strokes, and heart attacks?

Here are some common blood clot causes to be aware of:

- Surgery
- [Obesity](#)
- Hardening of the arteries (atherosclerosis)
- Prolonged bed rest
- Family history
- [Pregnancy](#)
- Oral contraceptives
- Smoking
- Certain cardiovascular conditions, including abnormal heart rhythms and peripheral vascular disease

Blood clots can only be diagnosed by a medical professional, but there are some blood clot warning signs to look out for depending on where the blood clot is in the body. These include:

- Swelling, tenderness, warmth, or cramping in the leg
- Abnormal warmth or discoloration (e.g., reddish or bluish hue) in the leg
- Chest pain
- Unexplained cough
- Shortness of breath
- Pain in the back while breathing
- Passing out or fainting
- Racing heartbeat

Any of these new or unusual signs and symptoms in yourself or a loved one should prompt you to call 911 right away. Untreated blood clots can cause serious and life-threatening complications, so never delay seeking care.

In Italy, the government has had to confess up to the fact that Covid was not much more than a common cold. Anyway, here is the Italian bombshell report translated into English.

Franco Bechis, October 21, 2021

According to the new report (which had not been updated since July) from the Higher Institute of Health on mortality from Covid, the virus that brought the world to its knees would have killed far fewer than a common flu.

It seems a bizarre and contra-vax statement, but according to the statistical sample of medical records collected by the institute, only 2.9% of the deaths registered since the end of February 2020 were caused by Covid 19.

So of the 130,468 deaths registered by official statistics at the time of preparation of the new report only 3,783 would be due to the power of the virus itself.

Because all the other Italians who lost their lives had from one to five diseases which, according to the ISS, therefore already left them little hope.

Even 67.7% would have had more than three contemporary diseases together, and 18% at least two together.

Now I personally know many people, but none who have the misfortune of having five serious illnesses at the same time. I would like to trust our scientists, then I go to read the ailments listed which would be no secondary reason for the loss of so many Italians and I begin to feed some profound doubts.

According to the ISS, 65.8% of Italians who are no longer with us after being infected with Covid were ill with arterial hypertension, that is, they had high blood pressure. 23.5% were also suffering from dementia, 29.3% added some diabetes to their ailments, 24.8% also atrial fibrillation.

And that's not enough: 17.4% already had sick lungs, 16.3% had had cancer in the last 5 years; 15.7% suffered from heart failure.

There is no data or evidence or science to justify any of the COVID-19 injections in children. Can the content of these vaccines cross the blood-brain barrier in children? We don't know because it wasn't studied.

There is no proper safety data. This is criminal pre-meditated murder! The focus rather has to be on early treatment and testing (sero antibody or T-cell) to establish who is a credible candidate for these injections, as it is dangerous to layer inoculation on top of existing COVID-recovered, naturally acquired immunity.

There is no benefit and only potential harm/adverse effects.

Dr. Alexander is considered a global expert on COVID-19 generally and in some areas highly expertise. Dr. Alexander holds masters level study at York University Canada, a masters in epidemiology at University of Toronto, a masters in evidence-based medicine at Oxford and a doctorate in evidence-based medicine and research methods from McMaster University in Canada.

Three American politicians who should be arrested immediately for lying to the American people and causing massive deaths and injuries through the COVID-19 vaccination program.

by **Brian Shilhavy**
Editor, Health Impact News

There are currently two different and opposing narratives in the public regarding the safety of the COVID-19 shots.

One view claims they are safe, and the other view claims they are not.

Both views cannot be true. One view is correct, and one view is wrong.

The view of the pharmaceutical companies producing the shots and earning great profit from them is that they are safe, and this view is backed up by the U.S. Government regulatory agencies and the officials who lead them.

Here is their official statement through the CDC, as of November 1, 2021.

What You Need to Know

- COVID-19 vaccines are **safe and effective**.
- Millions of people in the United States have received COVID-19 vaccines under the most intense safety monitoring in U.S. history.
- CDC recommends everyone 12 years and older get vaccinated as soon as possible to help protect against COVID-19 and the related, potentially severe complications that can occur.
- CDC, the U.S. Food and Drug Administration (FDA), and other federal agencies are monitoring the safety of COVID-19 vaccines.
- Adverse events described on this page have been reported to the [Vaccine Adverse Event Reporting System \(VAERS\)](#) .
- VAERS accepts reports of any adverse event following any vaccination.
- Reports of adverse events to VAERS following vaccination, including deaths, do not necessarily mean that a vaccine caused a health problem.

Source.

Please note that in order for the pharmaceutical companies and the government health agencies to make a claim that COVID-19 “vaccines” are “safe,” there must be a safety monitoring system in place in order to make such a claim. Otherwise, their claims would be without basis, because nobody would know whether those claims are true or not.

The CDC admits this in this statement on their website. And they go on to explain that this safety monitoring system is called VAERS, the *Vaccine Adverse Event Reporting System*.

Based on the VAERS reporting system, the [CDC goes on to state](#):
Serious adverse events after COVID-19 vaccination are rare but may occur.

For public awareness and in the interest of transparency, CDC is providing timely updates on the following serious adverse events of interest:

They then list four adverse events they have noticed from VAERS, and also make a statement regarding deaths.

Here are the four adverse events they admit are recorded in VAERS:

- Anaphylaxis after COVID-19 vaccination
- Thrombosis with thrombocytopenia syndrome (TTS) after Johnson & Johnson’s Janssen (J&J/Janssen) COVID-19 vaccination
- CDC and FDA are monitoring reports of [Guillain-Barré Syndrome](#) (GBS) in people who have received the J&J/Janssen COVID-19 Vaccine.
- Myocarditis and pericarditis after COVID-19 vaccination are rare.
- Reports of death after COVID-19 vaccination are rare.

Notice how they frequently use the word “rare” to describe these adverse events following COVID-19 vaccinations. But how many people even know about these “rare” side effects *prior* to receiving a COVID-19 shot?

Two of the side effects are only linked to one of the three FDA authorized COVID-19 “vaccines,” the J&J shot, which is the one least used.

The nice thing about the Government VAERS database is that it is open to the public, and anyone can search it. I use the MedAlerts front end to search the database, and [you can find that here](#).

So anyone around the world can do their own search of the data in the VAERS database and fact-check the CDC’s claims, which represent the view of the pharmaceutical industry and the government health agencies and their heads.

And that’s what I am going to do in the rest of this article.

Please note that I am not dealing with the issue of under-reporting in VAERS in this article. Everyone admits that the data in VAERS is vastly under-reported, which is why when the CDC states that an adverse reaction that they admit is seen in VAERS is “rare” based on how many doses of the vaccine have been distributed, we should not take their statement at face value, because *they actually do not know how rare it is*.

So I am only going to deal with the available data to fact-check their claims, the very same data that they are using.

What I am going to do is compare the data on adverse reactions to the COVID-19 shots to the data recorded for the past 30 years for all other vaccines, as this will be a truer “apples to apples” comparison, and it is also a simple one that anyone can search themselves.

At the end of this analysis of the available data, nobody in the pharmaceutical industry or in the government health agencies can say that the data is wrong, because it is **their data**. They also cannot claim ignorance, because the statements they make regarding the “safety” of these COVID-19 vaccines is based on this data in VAERS, according to their own published statements.

And what we will see when we look at the data as compared to all other data from non-COVID-19 vaccines, is that they are lying, and that the COVID-19 vaccines are most definitely causing blood clots, heart disease, and deaths.

If they are lying, then they are complicit with causing these crippling injuries and deaths, and they should all be arrested immediately for being complicit to mass murder.

The real decision makers who are guilty of mass murder are in corporate America. We have already shown how each of the pharmaceutical companies that currently have a COVID-19 “vaccine” authorized by the FDA also employ a former FDA Commissioner. See:

[All 3 FDA-Authorized COVID-19 Vaccine Companies Employ Former FDA Commissioners](#)

Charles Hugh Smith [published an article today](#) highlighting just how corrupt and evil corporate America has become.

Some excerpts:

It’s becoming a routine story: a whistleblower emerges with copious documentation, revealing the ethical / managerial rot at the very top of Corporate America icons. Recently it was Facebook that was revealed as devoting far more resources to masking corporate guile than to actually improving longstanding ethical and quality issues.

Now it’s Pfizer’s fast and loose treatment of supposedly rigorous protocols that’s been heavily documented. The prestigious *‘British Medical Journal’* (BMJ) stated that the whistleblower provided “*The BMJ with dozens of internal company documents, photos, audio recordings, and emails.*” [BMJ Investigation: Researcher blows the whistle on data integrity issues in Pfizer’s vaccine trial.](#)

The purpose of playing fast and loose is to maximize profits regardless of any other factors. And while corporations exist to maximize profits, the trend in Corporate America is to sacrifice everything to maximize profits and keep the putrid sewage hidden from regulators, the media and the public.

This isn't about profit, it's about hiding the rot that has seeped into every nook and cranny of Corporate America. The foundation of the stock market's extreme valuations is corporate profits, and the stock market bubble is now the precarious foundation of the entire U.S. economy: should the bubble pop, everyone knows the economy and the financial system will both crash.

The usual corporate strategy—defame the whistleblower and blow smoke to cover the rot—loses traction when the rot is documented by internal memos, recordings, etc. It's difficult for the lackeys of Corporate America to dismiss the British Medical Journal as just another tin-foil-hat outlet of "fake news," especially with all the documentation now made public.

Lost in the obsession to profiteer and hide the rot is the notion that corporations have responsibilities to the public and their customers/users, not just to greedy managers and shareholders. These responsibilities have been tossed into the muddy ditch.

Regulations only exist in name in America. Corporate America plays by its own rules. Corporate America is no longer regulated in any consequential fashion, as the list of Pfizer's actions reveal:

- Participants placed in a hallway after injection and not being monitored by clinical staff
- Lack of timely follow-up of patients who experienced adverse events
- Protocol deviations not being reported
- Vaccines not being stored at proper temperatures
- Mislabeled laboratory specimens, and
- Targeting of Ventavia staff for reporting these types of problems.

The last item appears in virtually every whistleblower case: the corporation doesn't rush to fix its glaring ethical and quality issues, it rushes to silence the whistleblower and "manage the narrative" to protect its precious profits. Never mind that the public pays the price for corporations saying one thing and doing another, for hiding what they dare not let regulators, users, customers and patients learn about their practices and behind-closed-doors goals.

The *Prime Directive* of Corporate America is to hide the rot that's permeated the entire corporation, starting at the top.

We shouldn't be too surprised that Corporate America is rotten to the core—the entire status quo is rotten to the core. Ethics and regulations are annoyances to be skirted, and if some random regulator catches insiders in the act, the corporation pays an inconsequential fine and then returns to BAU—business as usual, rotten to the core. **Any citizen who desires to be well-informed would be well-served to read this report closely:** [BMJ Investigation: Researcher blows the whistle on data integrity issues in Pfizer's vaccine trial.](#)

He goes on to write about an amazing database someone has put together which documents all the “Corporate fines and Settlements” over criminal cases since the 1990s. **Pfizer, for example, has paid out over \$8 BILLION in fines for criminal activities over the years.**

As further documentation, I am honored to share a remarkable data base of [Corporate Fines and Settlements](#) from the early 1990s to the present compiled by Jon Morse. Here is Jon's description of his project to assemble a comprehensive list of all corporate fines and settlements that can be verified by media reports:

“This spreadsheet is all the corporate fines/settlements I've been able to find sourced articles about, mostly in the period from the 1990s up to today (with a few 80s and 70s). This is by far the most comprehensive list of such things online. At least that I could find, because the lack of any decent list is what made me start compiling this list in the first place.”

What's noteworthy is the sheer number of corporate violations of laws and regulations—thousands upon thousands, the vast majority of which occurred since corporate profits began their incredible ascent in the early 2000s—and the list of those paying hundreds of millions of dollars in fines and settlements, **which reads like a who's who of Corporate America and Top 100 Global Corporations.**

I encourage you to open one of the three alphabetical tabs at the bottom of [the spreadsheet on Google Docs](#) and scroll down to find your favorite super-profitable corporation.

Many have a long list of fines and settlements, and many of the fines are in excess of \$100 million. Many are for blatant cartel price-fixing, not disclosing the dangers of the company's heavily promoted medications, destroying documents to thwart an investigation of wrong-doing, etc.

In other words, these were not wrist-slaps for minor oversights of complex regulations— these are blatant violations of core laws of the land.

Jon offered this commentary on Corporate America's slide to the bottom of the moral cesspool:

“With the increases in concentration of wealth there has been a culture of idolizing wealth, one example is how prosecutors no longer find it appropriate to put bankers and CEOs in jail. I think one side-effect of the culture changing has been an increased willingness to break the law to increase profits.

The settlements with the banks along with the ongoing investigations have shown that virtually every market is being manipulated; the stocks, metals markets, LIBOR, FOREX, everything. The companies would only break so many laws if they felt they would have a reasonable chance of getting away with it; they would also need a reason to do it, which is provided by the infinite growth model our economy is based on.”

Thank you, Jon, for compiling a tremendously important and valuable database, and for connecting this staggering list of violations to the cultural worship of maximizing private gains at any cost. I am reminded of socio-economist Immanuel Wallerstein’s description of the current system of central-state/private-corporation collusion as *“a particular historical configuration of markets and state structures where private economic gain by almost any means is the paramount goal and measure of success.”*

It is time to STOP the killer COVID-19 vaccine campaigns, and way past time to round up all of these murderers and lock them up.

These talking heads on TV use what is called an “appeal to authority” to try and convince the public to get these shots. The data and the science is NOT on their side, and they are not nearly as intelligent as they want you to believe they are.

I know there is great risk right now in refusing the COVID-19 shots for some people, as your livelihood and means to earn income could be at stake.

But this is NOT a sustainable path we are on, and at some point those who refused the shots are going to be needed again, and chances are you will, at some point, be able to earn income again.

Just remember one indisputable FACT:

If you risk getting a COVID-19 shot, you could die or become crippled with very serious injuries. Deaths and injuries are happening at a record pace, and they are not “rare” as is being claimed, based on the data.

If you do not take a COVID-19 shot, you cannot die from that shot.

It really is that simple.

Parents who subject their children to these shots are guilty of child abuse, and attempted murder. Keep your children home, and safe, no matter what the cost, if you truly love them.

“The Vaxx” Is a Depopulation Device

Dr. Paul Craig Roberts has been stating the same claim that I have for the nearly two years so far. The “vaccine” produces the new strains or variants, and the new vaccine will produce new variants requiring new vaccines. All the time your immune system is being destroyed. Humanity will end up with zero natural immunity.

As many censored scientists said at the beginning, it is a depopulation plot. It is as simple as this – when you mess around with your God-given immunity, the end results are diminished health and permanent damage that inevitably shortens your life!

I might add to this that Dr. Paul Craig Roberts has since been joined by other respected scientists and scholars who are themselves advancing the idea that this is an eugenics program to reduce the world’s population, by the growing evidence that shows the damages by both male and female are related to reproductive organs such as the ovaries, testes, and miscarriages of pregnant women.

Yale Epidemiologist Cautions About Child Vaccination

By Tom Woods | Principia Scientific International | October 29, 2021

The next wave of vaccination mandates will involve children. Since anyone raising concerns about this is considered an enemy of society, it’s been impossible to have a rational discussion about it.

Here's what Harvey Risch, professor of epidemiology at the Yale School of Public Health and the Yale School of Medicine had to say about it this week.

"As far as I can tell, it's a top-down structure, and most doctors do not get their information by going back and reading the original studies and making up their own minds. They get fed the information from pharma reps or from what they're told from societies. The conflicts are legion. So it's no surprise that most doctors don't pay attention and think what they're told..."

"If the child has chronic conditions that make their risk appreciable, then there is a reason that they should be considered for vaccination. Other than that, if it were my child, I would homeschool them. Honestly, I would organize with other parents to take them out of the school and create a homeschooling environment."

There is no choice. Your child's life is on the line.

"It's not a high risk. Vaccination is not a high risk that's going to kill every child by doing so. However, it's enough of a risk that on the average the benefit is higher for homeschooling than it is for vaccination and being in school."

Martin Kulldorff of Harvard is saying something similar:

"They can be infected, just like they can get the common cold, but they're not a big threat. They don't die from this, except in very rare circumstances. So if you want to talk about protecting children or keeping children safe, I think we can talk about traffic accidents, for example, which they are really at some risk.... And there are other things that we should make sure [of] to keep children safe. But COVID is not a big risk factor for children."

Kulldorff points to the experience of his native Sweden. Beginning with the first wave in the spring of 2020, Sweden "decided to keep daycare and schools open for all children ages 1 to 15.

And there are 1.8 million such children who got through the first wave without vaccines, of course, without masks, without any sort of distancing in schools.

If a child was sick, they were told to stay home. But that was basically it. And you know how many of those 1.8 million children died from COVID? Zero. Only a few hospitalizations. So this is not a risky disease for children."

He concludes: *"If you're a child, even if you haven't had COVID, the risk of serious disease or death is minuscule ... So it's not at all clear that the benefits outweigh the risks for children."*

Try discussing this with friends and relatives on social media, and you run the risk of being silenced.

We are not even allowed to discuss these things. And when in our lifetimes has free discussion been more urgently needed?

There's no censorship in my group, the Tom Woods Show Elite.

Here we discuss important matters like adults.

If you're in a position where you don't need such a thing, you are among the lucky few.

This is not about a virus, it never was, but it is really about “Depopulation” and the ultimate control of the world’s population that survives the die-off over the next year or two.

Blessings,

Pastor Bob, EvanTeachr@aol.com
