Official Government Data From Germany Suggests Covid Fully Vaccinated People Will Develop AIDS

Prepare For Change / Edward Morgan

By Ethan Huff,

By the end of the month, most people who are “fully vaccinated” will have developed full-blown Wuhan coronavirus (Covid-19) injection-induced acquired immunodeficiency syndrome (AIDS), [new government data suggests](#).

German government researchers found that the immune systems of the fully vaccinated have already degraded to an average of -87 percent, depending on when they got jabbed. That degradation will only continue until their immune systems are completely gone. (Related: Fauci Flu shots are also [spreading prion disease](#).)

The Robert Koch Institute (RKI) put out the data, which shows that the fully vaccinated now have, on average, an 87.7 percent lower immune response to the new Omicron (Moronic) variant than the unvaccinated.

“This means that the average German is down to the last 12.3 percent of his or her immune system for fighting certain classes of viruses and certain cancers,” reports the Daily Exposé.

Interestingly, RKI did not produce the normal vaccine effectiveness tables in its December 30 weekly report.

“This may have been due to the holidays (the British gave up completely on December 23) or may have been because the table would be disastrous for the vaccines,” the Exposé added.

“But we can help the Germans out here by doing the calculation for them using Pfizer’s vaccine effectiveness formula: Vaccine effectiveness = immune system effectiveness = $(1-8.12)/8.12 = -7.12/8.12 = -87.7\%$.”

Fully vaccinated immune systems are doing WORSE than the predictive models estimated.

Back in October, it was projected that this type of thing would occur. Scientists looked at data from the UKHSA Vaccine Surveillance Report, concluding that immune system degradation would become progressively worse in the fully vaccinated.

Those figures were mocked by some for being too “doomsday.” It turns out, however, that they were actually *underestimates*.

The fully vaccinated are doing worse in terms of immune strength than even the most “pessimistic” data modelers anticipated.

“So Germany, at 87.7% immune system degradation, has done 6.7% worse than our model which predicted, an 81.0% degradation this year (for over 18s based on 2 doses of the anti-vaccine rather than 3),” the *Exposé* reported.

“It is the 3rd dose that really kills the immune system as can be seen from the ONS data for Omicron ... These figures mean that if you have Covid and you have had 3 doses of the vaccine then you are 4.45x more likely to have Omicron than if you are an unvaxxed Covid case. But the above was merely an estimation.”

Based on the latest data out of Germany, we now know that the fully vaccinated are 812 percent more likely to develop a Moronic infection than the unvaccinated. The unvaccinated are basically eight times better protected from Moronic than people who took the jabs.

*“And the more jabs you take the faster the degradation of your immune system progresses,” the *Exposé* added. “It also looks like the unvaxxed are reaching sub herd immunity against Covid-19 whereas the fully vaxxed are being prevented from reaching it by the vaccines.”*

“The German figures have destroyed the case for vaccine passports and by themselves prove instead the case for an immediate gene therapy and spike protein vaccination ban.”

It turns out that we were right, too. So-called “vaccine immunity” is really just *fake* immunity. It is flawed, at best. At worst, it destroys the immune system, leaving it unable to naturally fend off infections of any kind.

*“By the end of January every fully vaccinated person in both countries over 30 years old will have full blown vaccine mediated AIDS,” the *Exposé* concluded. “However much of the immune system that is presently left with the ability to fight Omicron will have gone.”* The latest news about Chinese Virus injections can be found at [ChemicalViolence.com](https://www.chemicalviolence.com).

[Dr. McCullough Bombshell: Covid Outpatient Treatments Being Suppressed!](#)

Written by Daniel McAdams

In a recent interview with the *'Epoch Times'*, Dr. Peter McCullough claimed that the U.S. government is actively working to suppress any investigation of outpatient Covid treatments. As the Omicron variant appears to be infecting the vaccinated as well as the unvaccinated, the question increasingly being asked is why after two years are there no treatments? Also today, an insurance company CEO blows the whistle on a shocking increase in working-age deaths last year. Finally - a victory for Navy Seals suing for medical freedom. Dr. Peter McCullough has more peer-reviewed medical papers than most experts in medicine, 660+ and Internet censors are blocking his video interviews and suppressing the evidence that destroys the government narrative on Covid. The ongoing censorship merely confirms that this is not about public health; rather it is about a "Depopulation" Eugenics-driven issue.

"Over 1,000 Studies Published in Peer-Reviewed Medical Journals Say the Vaccines Are Dangerous" - Steve Kirsch

Posted on: Monday, January 10th 2022

Written By: Steve Kirsch

Originally published on www.stevекirsch.substack.com

But the CDC says the vaccines are safe and effective and there is nothing to worry about. Seriously?

Here's [a link to over 1,000 studies published in peer reviewed medical journals documenting the risks of the COVID vaccines.](#)

Hmmm... Shouldn't these be part of informed consent?

If you have any blue pillers who you are trying to persuade, ask them if they've read any of the studies and have them explain to you why you shouldn't be concerned.

I write about COVID vaccine safety and efficacy, corruption, censorship, mandates, masking, and early treatments. America is being misled by formerly trusted authorities.

HOW MANY TRANSISTORS WOULD BE POSSIBLE ON A MICROSCOPIC INJECTED CHIP???

Today you get the answer, calculated with precision, for a chip the size of a Coronavirus, an Ebola virus, and lastly, a red blood cell. This calculation will be spot on accurate. The relevance of this information is that it supports my contention that the Biblical "Mark" of the Beast, is part and parcel of the Covid technology known as the QuantumDot:Hydrogel Luciferase ID2020. The creation of Covid involved "synthetic biology" through what is known as CRISPR-CaS9. The human mind cannot relate to the larger issue of how things have been "miniaturized" to the point many ingredients in vaxxines are virtually invisible to the human eye! Covid is not a virus, it is a "bioweapon" that was released in Chemtrails from airplane spraying nozzles.

This calculation will not include a power supply or interfacing hardware to make it work. This will be only for the CPU core.

Ryzen CPU's now use a 6 nanometer process, so that's what this math will be based on.

Coronavirus - 250 nanometers. $250/6 = 41.6$ transistors per line, for a single layer processor that has 1,733 transistors. If 10 layers were stacked, the processor could easily have 17,000 transistors and still fit within the profile of a coronavirus.

Ebola virus: 1.3 microns. $1,300/6 = 216$ transistors per line, 47,799 transistors per layer, which in this case could easily be stacked 30 high for a total of 1,404,000 transistors.

If the chip was the size of a red blood cell, today's tech could:

10 microns - $10,000/6 = 1,666$ transistors per line, for a single layer that had 2,776,666 transistors, which would not be a challenge to get 50 layers of with the thickness a red blood cell would allow (for a price, of course) for a total of over 100 million transistors.

QUESTION: Are we there yet? Could THAT small of a chip be made with that many transistors and actually be separated from the rest on the die and then function? I doubt it, but 10/10th of that is probable, **And who needs the chip to be as small as a red blood cell when 1/10th the thickness of a human hair would not be noticed in a shot?** Clearly the tech is there now to chip a shot in a way no one would ever notice.

Aaah, but that would be found under a microscope, RIGHT? **Don't bet on it, because there is a problem with finding one** - Do you know how vast the viewing field would be under a microscope that had to inspect an entire milliliter of volume down to that level of detail? How about: One drop of blood, which is only a fraction of that, (a small fraction) can be spread across several slides that would take an hour to inspect each. Looking for a chip the size of a blood cell in that much volume would be a daunting task, and would require quite a bit of luck to find.

Covid cases in the US triple in two weeks and hospitalizations hit near-record high of 130,000 but deaths remain low after CDC director Rochelle Walensky said 75% of people who die of the virus have at least four comorbidities

[January 10, 2022](#) [Discernment recommended in this report, this is cold and flu season]

Omicron cases are continuing to rise in the U.S but deaths and hospitalizations caused by the virus are not following at the same rate, signaling the variant that has grinded much of America into a standstill is not making people as sick as the Delta variant.

Cases have more than tripled over the past two weeks alone, up from 198,326 per day to 709,850 per day. The number of Americans hospitalized with Covid is nearing record levels as well, reaching 130,000 this week.

Not all of these hospitalizations are directly caused by the virus, though. Many people who go to the hospital for reason outside of Covid, such as injury or other ailments, are being tested while there. Since Omicron variant is so prevalent at the moment, many of these people are testing positive and being added to the total despite not having severe symptoms.

Deaths are not growing at the same rate, though, with 1,648 Americans dying from the virus every day - an 11 percent increase from two weeks ago. This signals either the effectiveness of the vaccines, or the more mild nature of the new strain.

The U.S. also surpassed 60 million cases of the virus as of Monday morning according to Johns Hopkins University, another grim milestone for the country.

The record surge began in December, only weeks after the new variant was discovered by South African health officials. Omicron is the most infectious strain of the virus yet, and its ability to evade vaccine immunity has presented additional challenges.

Albert Bourla, CEO of Pfizer, says that the world should be able to control Covid and even return to normal in the future - but only if people receive an annual vaccine, but it could require a decade of annual vaccination.

Pfizer - which produces the most commonly used vaccine in America and in much of the world, has benefitted greatly from the sale of its joint vaccine project with the German company BioNTech.

Bourla appeared on CNBC's 'The Squawk Box' Monday morning to discuss the future of the Covid pandemic and the role his company can play in fighting it. His statements come as the virus tears through the U.S. for a second consecutive January, and national health leaders go all-in on vaccines as a strategy to fight Covid.

American health leaders, like Dr. Rochelle Walensky of the Centers for Disease Control and Prevention, and Dr. Anthony Fauci of the National Institute of Allergies and Infectious Disease, have centered vaccines in their fight against the virus - even in the wake of a vaccine resistant strain.

While the variant can evade the immunity provided by the initial vaccine regimens, experts have found that vaccine booster shots can re-establish some of those protections. Breakthrough infections are also more mild than those in unvaccinated people, and the Omicron variant is found to be a more mild strain, less likely to cause infection or death than other strains of the virus.

Because of the rise of Omicron, and the potential for future variants with similar vaccine resistant properties to arise as well, some fear Covid may never be fully ended. As long as the virus continues to mutate, it will always be able to find away around vaccines, and the protection people receive from the shots seems to wane in a matter of months anyways.

Bourla told CNBC that Covid will likely be around for the next ten years - if not longer - though it can be controlled with a robust booster campaign.

“We will have perfectly normal lives, with just injection maybe once a year,” he said. Does this guy look like someone you can trust?

Pfizer CEO Albert Bourla (right) said that Covid could be around for the next ten years, but could be controlled with yearly booster shots his company produces

Currently, around 130,000 people are hospitalized with Covid in the U.S., though many of those people went in for treatment for a different issue and tested positive while there.

Pfizer's vaccine has been deemed the gold standard worldwide, as the safest and most effective jab in the world. The shot has been administered over 300 million times in the U.S., almost 60 percent of total shots distributed, and is the only shot available to minors.

The success of the shot has led to a large windfall for the New York based firm, with an analysis by the People's Vaccine Alliance finding that Pfizer, its partner BioNTech and Moderna - producer of the second most popular vaccine - make a combined profit of over \$1,000 every second. Continued use of the vaccines for the next decade will likely keep that figure high.

Pfizer has also been accused of using its leverage and control over the jabs to take advantage of developing nations. Denying them their ability to receive donations of the shots, and even writing clauses into contracts that would allow the company to seize state assets. The company even worked to get around intellectual property rights for vaccine technology in other countries, as Bourla publicly called the idea of doing so in America 'dangerous', according to a report by Public Citizen last year.

On CNBC, the Pfizer CEO said that getting these low income countries to a point where they can administer more vaccines at a faster pace is a key to controlling the virus. *"Particularly in low income countries, they have more than they can absorb right now,"* he said.

"I think all the effort should be, right now... to build the infrastructure in low income countries so they can absorb more vaccines. Also, the campaigns that will convince the population [to get the shots]."

In England, which the U.S. often follows around two weeks behind of, cases are actually declining. The nation was struck hard and early by the Omicron variant, but the new strain seems to be burning out. Infections have dropped by six percent over the past week, and hospitalizations could be nearing a peak as well.

Getting a handle on America's Covid situation has become a challenge in recent weeks. Long lags in reporting combined with testing shortages have led to the current case count constantly fluctuating, and likely being lower than actual totals. Hospitalizations and deaths, on the other hand, could be over-counted, with many being hospitalized or dying from another cause extraneously being listed as a death from the virus.

On Sunday, Dr. Walensky appeared on Fox News, and failed to answer whether or not many deaths currently being attributed to the virus actually have other causes. She also told ABC's Good Morning America last week that 75 percent of people who have died from the Omicron variant in the U.S. have at least four comorbidities - in what she called "encouraging news".

According to data from Johns Hopkins, the U.S. is averaging 709,850 new cases every day, and 1,648 deaths per day. Since the pandemic began, America has suffered 60 million infections and over 837,000 deaths.

Things may soon change, though, if America follows the path of England. Across the pond, cases have dropped by six percent over the past week. While hospitalizations (up 27 percent) and deaths (up 12 percent) are still rising, the growth has slowed in recent

days - signaling the peak of the surge may have been reached. Both figures often lag behind cases as well.

London, once a global hotspot of the new variant, now finds not of its boroughs among the 25 in England with the largest Covid outbreaks - another positive sign that the new strain is burning out.

A [MailOnline.com](https://www.mailonline.com) analysis on English data finds the new strain could be very mild, even potentially more mild than the flu. Currently in the UK, around 0.15 percent of Covid cases are fatal, compared to 0.1 percent of flu cases. While one in every 1,000 people who catch the flu die, a Washington University analysis finds that one in every 1,400 people who catch Omicron will succumb to the virus.

Data from the CDC from the 2019 to 2020 flu season - before the pandemic - found that 30 million Americans suffered a symptomatic case of the virus that year. Around 20,000 died, or a death rate of 0.05 percent.

Some experts are hopeful that the high infectiousness of the variant, combined with the relatively mild symptoms of Omicron could mean that the pandemic is soon coming to a close. Dr. Jim Baker, an immunologist at the University of Michigan, wrote in blog that the virus is showing similar signs to the 2011 flu pandemic that it will burn out soon.

“We have been focused on number of infections with COVID-19 because of the very sensitive and accurate diagnostic tests (PCR) we have developed,” he said.

“In contrast, as we look at the end of the pandemic, we now need to focus less on infections and more on deaths. That is truly the important marker of a pandemic’s impact and the only comparable measure to the 1918 flu epidemic where there were no diagnostic tests.”

“In the 1917 flu pandemic, after the initial burst of infections and deaths, two waves of deaths followed, each one less impactful. This is how pandemics end; two “echo” waves each being less and less significant. It is because in each wave the most susceptible individuals have been killed off as the rest of the population develops immunity. A similar pattern was seen in the 2011 Influenza A pandemic and it has now emerged with COVID-19. This pattern shows the COVID-19 pandemic is burning out.”

Denmark emerged as an early Omicron hotspot. Cases in the Nordic nation reached a record of over 20,000 per day at the start of the year, but dipped back down to 19,000 this week - signaling the variant may have peaked in the country.

Other countries have not been as lucky as Denmark and England, though. In Germany, cases are on the rise to start the year after declining for much of January. The country is averaging 49,000 cases per day, approaching the record of around 57,000 per day set late last year.

France's rocketing rise in Covid cases continues as well, up to nearly 300,000 per day, up from around 70,000 cases per day only two weeks ago.

Covid cases in the U.S. triple in two weeks and hospitalizations hit near-record high of 130,000 but deaths remain low after CDC director Rochelle Walensky said 75% of people who die of the virus have at least four comorbidities.

[Most interesting is that CDC Director Walensky Won't Say How Many Americans Died "From" Covid vs. How Many Died "With" Covid!] It begs the question of accurate reporting and statistical studies as to their reliability or trustworthiness.] The world is finally waking up to what we reported a year and a half ago – there is a difference between someone dying from COVID and someone dying with COVID.

When the corrupt U.S. Government addressed COVID they put in place unique ways of reporting deaths. They began by claiming every death where someone was suspected of having COVID when they died was to be recorded as a COVID death.

This resulted in thousands of deaths being reported as COVID deaths that were not. We reported on this in August 2020. Ours and others' articles received a huge amount of attention as word got out that only 6% of all deaths reported as COVID deaths were actually due to COVID only. The remaining 94% of the deaths reported as COVID deaths were deaths with COVID where those who died had multiple other co-morbidities as well. On average, those who were labeled as dying from COVID had more than two other co-morbidities.

President Trump shared this story as well as his son Don Jr and many others on Twitter. "6%" was shared all over the Internet and into the mainstream. We at TGP were attacked and criticized for making the claim that only 6% of COVID deaths died from COVID only, even though the information came from the CDC's site.

By late 2020 the number of fatalities that were counted as COVID deaths that died from only COVID was down to 5% per the CDC.

Today the Head of the CDC was asked how many people died from COVID and how many with COVID of the reported 836,000 COVID deaths.

Pfizer CEO Albert Bourla admits Pfizer fake vaccine is useless. Pfizer CEO Albert Bourla admits the First 2 doses offer little if ANY protection..and the booster only minimally better...What happened to "95% Efficacy ? What happened to "Keeps you out of hospital " ..When are we going to wake up?

World renowned CV19 critical care and pulmonary expert Dr. Pierre Kory says the data is clear the CV19 injections are "not safe, not effective" and shows they are causing a huge number of deaths.

This report is a transcript from an interview with Greg Hunter [audio/video blocked by Internet censors] this past Friday, January 7, 2022.]

It's going to get much worse if we don't stop the shots. Dr. Kory warns, "They already broke death records with these vaccines almost a year ago. Now, you are starting to see it in actuarial data with life insurance companies. The life insurance companies have been paying out claims like they never have before, and they are noticing the deaths cannot be explained by Covid. **If you look at the actual morbidity and mortality from the CDC . . . 2019, 2020 and 2021 in the ages of 18 to 64 . . . you'll see in America, starting in quarter two of the year 2021 (when the vaccines started), the mortalities started to rise, and it rose from 120% above normal to 140% above normal, and it's far exceeded the death rates in 2020. The difference in 2020 and 2021, we had covid in both years. In 2021, we had the vaccines. They know the amount of deaths they are reporting cannot be explained by Covid. . . .** There is something else driving a huge and extremely terrifying mortality signal in the U.S. population. To think that it is anything but the vaccines, if we get this wrong and if you keep saying they are safe, that line which is already in a significant and steep incline will continue the more we boost and the more we vaccinate. . . . This has to stop. We have to stop, people are dying."

Meanwhile, the captured regulatory agencies like the CDC and FDA are trashing and cutting off proven scientific cures for Covid such as Ivermectin. Dr. Kory says Ivermectin has been proven effective in defeating Covid infections, and he says, "It is "one of the safest drugs ever brought to market." Dr. Kory also says the so-called experimental vaccines "are not safe and not effective." So, why do government agencies push them anyway? Dr. Kory says, "I have had a front row seat to see this."

. . . And he goes on to say government agencies are suffering from "regulatory capture" by big Pharma. Meaning, the FDA and CDC push ineffective and dangerous vaccines so Big Pharma can make money off them, while disregarding cheaper, safer and more effective drugs like Ivermectin. Dr. Kory gives a real-world example during the pandemic and explains, "Prescriptions in this country (for Ivermectin) in August were hitting 90,000 per week. So many doctors were using it for Covid that it spooked the pharmaceutical companies. . . . In response to the massive uptake in the use of Ivermectin by physicians with prescriptions and pharmacists filling them, the CDC went on the attack. They sent a bulletin to every state department of health which was full of propaganda and misinformation screaming the FDA has not approved Ivermectin (for treating Covid) and it's not a proven drug, and it's dangerous and there are overdoses and all of these things that were false. It went to all state departments of health. But guess what happened next? The medical boards and the pharmacy boards started sending that to every licensed physician and pharmacist in the land. The average physician and pharmacist, I am sorry to say this, is not well read. They are not keeping up with data. They are overwhelmed and they are easily influenced. That's why in this country you have a war between the physicians that know that Ivermectin is effective . . . and are at war with the pharmacies. A huge proportion of pharmacists will refuse to fill a decades-old safe drug for Covid because they have been threatened and manipulated by their boards. They are afraid to lose their licenses. It all smokes. It's all B.S.

because you cannot lose your license for use of a safe drug. . . . We need our doctors to do doctoring, and we need our pharmacists to do pharmacy and stop being influenced by propaganda by pharmaceutical companies who don't want you to use this drug. We have to stand up, and we have to resist on behalf of our patients. We are finding that with compounding pharmacies and small pharmacies we can still get access (to Ivermectin), but it is a battle and you do have to navigate.”

Former Pfizer VP Dr. Michael Yeadon said this week, “Max vaccination is leading to mass death.” Dr. Kory agrees and explains, “It’s not only data from a life insurance company that came out this week that is based on CDC data that can’t be explained by Covid alone, there are huge increases of dying in this country this year. . . . They have done huge analysis of the European mortality data as well as the U.S. mortality data and they controlled for vaccination status. They found that for every age range that they looked at, the all-cause mortality of the vaccinated were increased over the unvaccinated. All-cause mortality and that means that you are more likely to die of something if you are vaccinated. . . . All-cause mortality is coming out of actual databases by credible scientists. You have life insurance companies showing the data, and you have our own federal government showing unexplained large rises in dying. . . . Don’t you think a good scientific question and a good hypothesis to test would be ‘Could these be the vaccines?’ The answer is ‘the vaccines,’ and I cannot find a better fit to answering that hypothesis than that, it’s this mass explosion of this vaccination policy with single, double and booster shots. It’s going like wildfire through the population. If the mortality of the vaccinated is higher than the unvaccinated, you have the data that you can safely and confidently conclude the vaccines are associated with and causing death.”

In closing, Dr. Kory says, *“What has happened in the last month or so is the data for adverse reactions and effects are no longer hidden and suppressed. They are coming out on servers . . . and actuarial tables.”*

Dr. Kory tells people to go to the [Front Line Covid-19 Critical Care Alliance website](#) and get any and all information for treating Covid-19 for free.

2021: COVID Deaths Increase, Flu Deaths Disappear, 400,000+ More Total Deaths than 2020

2021: Year of the Experimental COVID Vaccine		
	<u>2020</u>	<u>2021</u>
Flu Deaths:	8,785	932
COVID Deaths:	385,443	444,951
Total Deaths:	2,902,664	3,338,750
Source: CDC		

by Brian Shilhavy, Editor, Health Impact News

At the end of 2020, we reported how the CDC was caught manipulating the death statistics to make "COVID deaths" appear to be much higher than they actually were.

CDC DATA

TOTAL U.S. DEATHS [ALL CAUSES]:

2017: 2,813,503 (234,000/MO.)

2018: 2,839,206 (237,000/MO.)

2019: 2,855,000 (238,000/MO.)

2020: 2,130,000 (JAN-SEPT)

$2,130,000 + (236,000 \times 3)$ [OCT-DEC]

$= 2,838,000$ (PROJECTED 2020)

In November of 2020, we published an article with the above chart showing that based on the CDC's own statistics from January through September of 2020, the total projected deaths for the year were on pace to be about the same as the previous three years, 2017 – 2019. See:

[Statistics Show that the Number of People who Died in the U.S. in 2020 will be the SAME as Previous Years, in Spite of COVID](#)

When word got out that the flu season seemed to vanish in 2020, the CDC proceeded to stop tracking influenza statistics.

Here is a screenshot from the CDC website of the page that announced this, but I do not believe this page is found on the CDC website anymore:

3. Summary of the Geographic Spread of Influenza

State and territorial health departments report the estimated level of geographic spread of influenza activity in their jurisdictions each week through the **State and Territorial Epidemiologists Report**. This level does not measure the severity of influenza activity; low levels of influenza activity occurring throughout a jurisdiction would result in a classification of “widespread”. Jurisdictions classify geographic spread as follows:

- **No Activity:** No laboratory-confirmed cases of influenza and no reported increase in the number of cases of ILI.
- **Sporadic:** Small numbers of laboratory-confirmed influenza cases or a single laboratory-confirmed influenza outbreak has been reported, but there is no increase in cases of ILI.
- **Local:** Outbreaks of influenza or increases in ILI cases and recent laboratory-confirmed influenza in a single region of the state.
- **Regional:** Outbreaks of influenza or increases in ILI and recent laboratory confirmed influenza in at least two but less than half the regions of the state with recent laboratory evidence of influenza in those regions.
- **Widespread:** Outbreaks of influenza or increases in ILI cases and recent laboratory-confirmed influenza in at least half the regions of the state with recent laboratory evidence of influenza in the state.

Due to the ongoing COVID-19 pandemic, this system will suspend data collection for the 2020-21 influenza season. Data from previous seasons are available on FluView Interactive.

See:

[In Unprecedented Move CDC Stops Tracking Influenza for 2020-21 Flu Season](#)

On February 3, 2021, we [published an article](#) highlighting a study published in the journal [Science, Public Health Policy & the Law](#) that claimed the CDC violated federal law by inflating COVID-19 fatality statistics.

The study is titled “[COVID-19 Data Collection, Comorbidity & Federal Law: A Historical Retrospective](#).”

In that [same article](#) that we published, we published a screenshot of a page that existed on the CDC website on December 30, 2020 that showed the total deaths in the U.S., from all causes as of December 30, 2020, as being 2,902,664 deaths. See:

[Study: CDC Broke Federal Law by Manipulating COVID Death Statistics](#)

Just after the first of the year in 2021, however, this page disappeared from the CDC website, and an entirely new section was put up on the CDC’s website that tracked deaths, and the total deaths for 2020 were revised to be 3,389,094, a difference of 486,430 deaths.

Now, one year later, it appears that those additional deaths attributed to 2020 were basically being pre-added to cover up the deaths that were going to be caused by the experimental COVID-19 “vaccines” for 2021.

Here is what the CDC is currently reporting today, at the time of publication of this article:

Table 1. Deaths involving coronavirus disease 2019 (COVID-19), pneumonia, and influenza reported to NCHS by time-period and jurisdiction of occurrence.							Data as of:
State							1/11/2022
United States							Year
							All
Year in which death occurred	All Deaths involving COVID-19 [1]	Deaths from All Causes	Percent of Expected Deaths [2]	Deaths involving Pneumonia [3]	Deaths involving COVID-19 and Pneumonia [3]	All Deaths involving Influenza [4]	Deaths involving Pneumonia, Influenza, or COVID-19 [5]
2022	2,381	13,217	0	1,831	1,248	31	2,992
2021	444,951	3,338,750	117	396,221	251,330	932	590,525
2020	385,443	3,389,094	119	351,896	179,990	8,785	564,983
Total	832,775	6,741,061		749,948	432,568	9,748	1,158,500

[Source](#). (Click on “Yearly” at the bottom of the table.)

As you can see, according to the CDC, flu deaths have all but disappeared, as they dropped from their already record low number of 8,785 in 2020, to only 932 in 2021.

And in spite of the fact that hundreds of millions of the American population were injected with the experimental gene-therapy shots for COVID-19 in 2021, COVID deaths, according to the CDC, increased from 385,443 in 2020 to 444,951 in 2021.

And if we use the CDC’s number of total deaths for 2020 on December 30, 2020 before they revised their numbers, we have an increase in total deaths in the U.S. in 2021 that is an increase of over 400,000 deaths that occurred in 2020.

And we have to conclude that the majority of those were COVID-19 vaccine injury deaths.

According to the CDC’s *Vaccine Adverse Events Reporting System* (VAERS), if we exclude the foreign reports, VAERS shows 9,778 reported deaths following COVID-19 injections in 2021. ([Source](#).)

Dr. Jessica Rose, PhD. has determined that the VAERS under-reporting multiplier for COVID-19 vaccine reports is 41X. See:

[Determining the VAERS Under-Reporting Multiplier](#)

When we multiply the reported 9,778 deaths following COVID-19 injections for 2021 by 41, we get 400,898 deaths following COVID-19 shots.

Bingo!

This evidence is further corroborated by the recent admission that life insurance claims death rates skyrocketed an unprecedented 40% among those between the ages of 18 and 64 in 2021. See:

[Crisis in America: Deaths Up 40% Among Those Aged 18-64 Based on Life Insurance Claims for 2021 After COVID-19 Vaccine Roll Outs](#)

We are watching the world's population be reduced right in front of our eyes, while the masses continue to think it is all a "conspiracy theory."

Documents Stored in TOP SECRET Folder at Defense Advanced Research Project Agency (DARPA) Prove Ivermectin, Hydroxychloroquine and Interferon "Curative" of COVID-19
[Nation NewsDesk](#) 11 January 2022

TOP SECRET FILES REVEALED

Documents stored on a TOP SECRET folder on the computers of the Defense Advanced Research Project Agency (DARPA) prove that the medicines Ivermectin, Hydroxychloroquine and Interferon were PROVEN "Curative" of COVID-19 in April, 2020 - the cures were buried as "Top Secret."

The revelation of these documents, sneakily stored in a TOP SECRET folder on government computers prove that the federal government of the United States KNEW in April, 2020, the entire "COVID-19 Pandemic" was completely curable through the use of these common medications.

Here are excerpts. The top part shows where on the TOP SECRET computer drive, these documents were stored in the Defense Advanced Research Projects Agency (DARPA) Biological Technology Office. The second excerpt is the precise paragraph proving they KNEW which medicines CURED COVID:

This is another example of my case that the real agenda is "Depopulation" by stealth!
-Pastor Bob

The EcoHealth Alliance response to the PREEMPT BAA is placed along with other proposal documents in the PREEMPT folder on the DARPA Biological Technologies Office JWICS (top secret) share drive, address: Network/filer/BTO/CI Folder/PREEMPT

Ivermectin (identified as curative in April 2020) works throughout all phases of illness because it both inhibits viral replication and modulates the immune response. Of note, chloroquine phosphate (Hydroxychloroquine, identified April 2020 as curative) is identified in the proposal as a SARSr-CoV inhibitor, as is interferon (identified May 2020 as curative).

They also prove that despite having this knowledge, the government continued to fraudulently portray COVID-19 as a "Pandemic", continued to infringe on the most basic liberties of American citizens nationwide, continued to insist that citizens wear masks, engage in social distancing, and take a dangerous, not-properly-tested "vaccines," and interfere in businesses like cruise ship lines, trucking companies and almost every other industry, costing citizens and companies tens of billions in losses . . . for no reason at all.

The federal government of the United States, some of its employees and some of its Officers, have thus engaged in criminal fraud, to deprive Americans of their valuable (even priceless) liberty, over a so-called "pandemic" that got worse because of the government's own deliberate actions.

These crimes committed by government lead to the actual DEATH of tens-of-thousands of American citizens, who were intentionally kept ignorant of the actual curative medicines.

Further, this same government went so far as to prohibit the dispensing of these medicines to treat the disease COVID-19, thereby assuring the deaths of tens-of-thousands more citizens.

These deaths were a foreseeable consequence of the government's actions and constitute the federal crime of Manslaughter at the very least, and state crime of Depraved Indifference Murder at worst.

Even more revealing, the COVID vaccines . . . did not receive Emergency Use Authorization (EUA) until eight months later, in December 2020. The only way the federal Food and Drug Administration was permitted to issue Emergency Use Authorization, was if there was "no other treatment or cure" for whatever disease they were making the EUA for. Yet we now have proof that same federal government KNEW what the cures were!

Thus, the Emergency Use Authorizations were, themselves, ILLEGAL. The government knew this but did it anyway.

Adding insult to injury, the vaccines began killing people by the thousands, and the same government not only refused to stop the vaccine, it began MANDATING that people take them!

This government knew what the cures were for COVID-19 and deliberately concealed them, to the detriment of millions and causing the deaths of tens of thousands.

This government also broke the law when it issued an Emergency Use Authorization for mRNA "vaccines" when they knew there were already other treatments or cures for the disease.

This government continued to tell Americans to take those new, experimental vaccines despite adverse reactions that killed tens of thousands and injured hundreds of thousands more.

This government is actively and intentionally harming the American people; stealing our liberty, wrecking our finances with lockdowns and shelter in place orders that were all completely, totally unnecessary - and they did these things when they already KNEW what the cures were.

This government has become destructive of life, liberty and the pursuit of happiness.

The American people possess the original right of self-defence which is paramount to all positive forms of government.

It is time to alter or to abolish this government and lay in its place, a new government to better protect our liberty and better enhance our happiness.

Whatever method is required to alter or to abolish this government, they will have brought it all upon themselves. They have been liars, cheats, thieves, and are now murderers. There is no reason at all for any of us to tolerate their continued existence.

Fauci and CDC Director Rochelle Walensky Lie Under Oath

January 13, 2022

by Brian Shilhavy, Editor, Health Impact News

CDC Director Rochelle Walensky and Anthony Fauci appeared before a Senate Committee Hearing this week regarding the "Omicron Response," and both of them lied under oath.

They both claimed that they "didn't know" how many deaths were recorded in VAERS following COVID-19 vaccines, and Walensky stated the COVID-19 vaccines are "incredibly safe" and "protect us against Omicron, they protect us against Delta, they protect us against COVID."

Walensky and Fauci Lie Under Oath

She also stated that all reported COVID-19 vaccine deaths have been “adjudicated,” when in fact not a single COVID-19 vaccine injury, let alone a death, has been tried in the Government Counter Measures Injury Compensation Program, the only place where a vaccine death or injury following a COVID-19 shot can be “adjudicated.”

Alabama Senator Tommy Tuberville either displayed his complete ignorance regarding VAERS, or colluded with Walensky and Fauci to ask them a meaningless question which then gave them the opportunity to control the narrative.

Tommy asked:

“Dr. Walensky, it has been reported by some virologists and scientists that this year around 170 people have died from taking the regular flu vaccine.

The Vaccine Adverse Reporting System reported that the number of people dying after or following the COVID vaccine is actually in the thousands.

Now this is what I am hearing. I'll give you a chance to refute that or confirm it here. Is this true?

Are we having that many people die after taking one of these vaccines?”

This is a meaningless question because the answer is already public knowledge! The VAERS database is open to the public, and anybody can search it. You don't need a “virologist” or “scientist” to tell you how many deaths there are following COVID-19 shots. Anyone can make that search, and it takes less than 60 seconds to find the answer.

As of this recorded Senate Hearing, the total deaths following COVID-19 shots in VAERS was 21,382. ([Source.](#))

So what he should have asked was:

“Dr. Walensky, VAERS is reporting 21,382 deaths following the emergency use authorized COVID-19 vaccines for the first year, which is more deaths than following all FDA-approved vaccines for the past 31 years combined, since VAERS started recording deaths following vaccines in 1990.”

Why are we still injecting these experimental products into Americans?

But instead, he questioned whether or not VAERS was actually reporting this, which led to a canned response by both Walensky and Fauci that VAERS is not reliable, because someone can get the vaccine and then walk outside and get hit by a car, and that is recorded as a vaccine death.

Here is the clip from our [Bitchute channel](#) (also available on our [Telegram channel](#) for easy download):

So let's fact check this new narrative that people getting hit by a car after getting a COVID-19 shot are being entered into VAERS.

VAERS does have a “symptom” that is called “Road traffic accident.”

So if we search for “Road traffic accident” following COVID-19 vaccines that result in a death, we get 20 listed deaths out of the current 21,382 deaths recorded following COVID-19 shots that are associated with a “Road traffic accident.” ([Source.](#))

Of those 20 cases, two of them appear to have listed “Road traffic accident” by mistake because nothing in the description mentioned a traffic accident.

Of the remaining 18, it appears that most, if not all of them, happened with the person driving the car (or motorcycle), not being hit by a car.

Here is one example from [VAERS ID 1028476](#):

She started having breathing problems/heart attack appearance. on 1/22/21 and went to the ER. Upon admittance was told it was an anaphylactic shock from the Covid shot. They kept her in ICU and released her 1/23/21. At 12:45 am on 1/24/21 she passed out and we called the ambulance. Hospital admitted her and worked through multiple organ failure issues and thought her numbers were under control. She was released on 1/27/21 and was driving on 1/28/21 around 4:15 pm and appears to have had heart failure and had a wreck. She passed away that day.

Doesn't quite fit the new narrative that Walensky and Fauci are claiming regarding “getting hit by a car,” does it?

YOU WANT PROOF? Here's the hard scientific evidence proving Covid shots are weaponized to kill!

COVID-19 Vaccines: Scientific Proof of Lethality

Post published: 5 January 2022 at <https://www.saveusnow.org.uk/covid-vaccine-scientific-proof-lethal>

SUN [saveusnow.org.uk](https://www.saveusnow.org.uk)

Over One Thousand Scientific Studies Prove That the COVID-19 Vaccines Are Dangerous, and All Those Pushing This Agenda Are Committing the Indictable Crime of Gross Misconduct in Public Office

Just over 12 months from deployment of the COVID 19 emergency use experimental vaccines, scientific studies in the thousands, and reports of criminal complaints of assault and murder from the illegal, unlawful use of biochemical poisons made to police forces around the country, verify an assault on an unsuspecting UK population. Irrefutable science shows that the COVID 19 vaccine is not safe and not effective in limiting transmission or infection from the SARS-CoV-2, coronavirus pathogens.

The “safe and effective” false propaganda, put out by public officials who now are continuing to push this vaccine, is a clear breach of duty. A public office holder is subject to, and aware of, a duty to prevent death or serious injury that arises only by virtue of the functions of the public office.

Many have breached that duty and, in doing so, are recklessly causing a risk of death or serious injury, by carrying on regardless of the now-confirmed dangers associated with COVID 19 injections. Some of these risks are **blood clotting, myocarditis, pericarditis, thrombosis, thrombocytopenia, anaphylaxis, Bell's palsy, Guillain-Barre, cancer including deaths**, etc.

All of these are confirmed in the following science-and-government-gathered data from the UK Health and Security agency on COVID 19 regarding vaccine damage.

The term “vaccine” was changed recently to incorporate this illegal, unlawful medical experiment to facilitate usage of mRNA technology that is demonstrably not a vaccine, and which contains biologically toxic nano-metamaterials associated with 5G urban data gathering capability.

Metal nano-particulates are known in science to be genotoxic—a poison that can also cause sterilization. The dangers posed to the victims in the near term from this medical battery are now known. However, the long term lethality of this weapon is not as yet realized due to the debilitating effects it has on the immune system, causing Acquired Immunodeficiency Syndrome (AIDS).

We can now confirm the 2017 depopulation defense-intelligence documents, showing the planned murder of over 55 million across the United Kingdom by 2025 using this biochemical weapon.

The Medicines and Healthcare (products) Regulatory Agency (MHRA) had prior warning of the expected large numbers of adverse reactions before the deployment—confirming the premeditated nature of the crime and public conduct offences then and now.

LAWRENCE SELLIN: New Pentagon Papers Show COVID Is Bioweapon Made in China Paid for and Developed by US Scientists Who Then Covered It Up While Pushing Flawed Public Health Policies

By Joe Hoft Published January 12, 2022

New Pentagon Documents Point To COVID-19's Laboratory Origin as a Chinese Bioweapon and U.S. Government Complicity

As described in a Gateway Pundit article last year, for over 15 years China has conducted bio-warfare research on genetically-engineered viruses coupled to a vaccine-production program to protect its own military from those China-made bioweapons.

Hold on to that thought for a moment.

The just-released [memorandum](#) written on August 21, 2021, by U.S. Marine Major Joseph Murphy to the Inspector General of the U.S. Department of Defense (DoD) is highly revealing, both for what it says and for what it doesn't say.

Major Murphy's analysis is based on a \$14.2 million [research grant application](#) "Project DEFUSE: Defusing the Threat of Bat-borne Coronaviruses" by now-disgraced scientist Peter Daszak, head of the EcoHealth Alliance, and submitted to the DoD's Defense Advanced Research Projects Agency (DARPA), as well as other documents to which we do not yet have access.

Daszak's research team included the "Bat Woman" Zheng-Li Shi of the Wuhan Institute of Virology, Ralph Baric of the University of North Carolina, Linfa Wang of the Duke

University-National University of Singapore Medical School, Tonie Rocke of the United States Geological Survey National Wildlife Health Center in Wisconsin, and Jerome Unidat of the Palo Alto Research Center in California.

A summary of the memorandum:

1. "SARS-CoV-2 [COVID-19] is an American-created recombinant bat vaccine, or its precursor virus."

The intent of Daszak's DARPA proposal was to immunize bats in Chinese caves by spraying them with a vaccine based on coronaviruses that would likely "jump" from bats to humans, thereby, preventing a pandemic.

Sound far-fetched? Stand by, the details get worse.

The DEFUSE team would collect a large number of bat coronaviruses from Chinese caves, test them for their ability to infect humans, select those most likely to make the "jump" from bats to humans, analyze their structures and map evolutionary pathways.

Of course, the concept of a vaccine based on an evolutionary model, given the highly unpredictable nature of bat coronavirus mutations is, on its face, scientifically preposterous.

Yet, if they had stopped at that point and created a bat vaccine based on a natural bat coronavirus, the project would have been a failure, but at least there would not have been a COVID-19 pandemic.

They planned to isolate the spike protein, the component of coronaviruses that regulates infectivity, and genetically manipulate it to make it more infectious to humans and insert it back into a bat coronavirus backbone as a virus precursor for making a bat vaccine.

The DEFUSE team writes about introducing "human specific" structures, like furin polybasic cleavage sites, where they do not occur naturally, highly indicative of bioweapon development and consistent with the Chinese military's joint pathogen development/vaccine production program.

The DEFUSE proposal read like a recipe for COVID-19.

Ultimately, the Daszak DEFUSE proposal was rejected because it included such dangerous "gain of function" research, the product of which also having dual use capability as a bioweapon.

Nevertheless, the money kept flowing from Anthony Fauci's National Institute of Allergy and Infectious Diseases, through Peter Daszak, to China.

2. *Without providing the evidence upon which his conclusion is based, Major Murphy stated that an incomplete precursor virus was released, presumably through a*

laboratory accident, in August 2019 and thereafter, again presumably, circulating and mutating within the Chinese population until reaching an epidemic-producing state in November-December 2019.

3. Major **Murphy** also questioned the DoD's vaccine mandate, given the **potential toxicity of mRNA vaccines based on the COVID-19 spike protein**, as well as opposing the official **suppression by the U.S. government of early intervention therapeutics, like ivermectin and hydroxychloroquine**, which his analysis found efficacious for treating coronavirus infections.

Based on a preponderance of evidence, COVID-19 was made in a laboratory in China as part of a bio-warfare program, which was facilitated by U.S. government officials and U.S.-based scientists, who then tried to cover up their complicity and implemented flawed public health policies, all of which likely led to the unnecessary deaths of hundreds of thousands of Americans.

Lawrence Sellin, Ph.D. is retired U.S. Army Reserve colonel and a veteran of Afghanistan and Iraq. He had a civilian career in international business and medical research. His email address is lawrence.sellin@gmail.com.

Pfizer Quietly Orders Social Media Companies To DELETE Video Where Their CEO ADMITS Jabs Offer “Limited Protection”

Pfizer has begun quietly ordering social media companies to delete a video where its CEO admits that their jabs offer “limited protection” against the virus.

In a recent [interview](#) with Yahoo Finance's Anjalee Khemlani, Pfizer CEO Albert Bourla made the following bombshell admission:

“So — and we know that the two doses of the vaccine offer very limited protection, if any. The three doses, with the booster, they offer reasonable protection against hospitalization and deaths — and, again, that’s, I think, very good — and less protection against the infection.”

[Thelibrarydaily.com](https://thelibrarydaily.com) reports: This slip was intended to try to get more people to take the booster shots, but as it spread across social media it had the opposite effect. Those who have been following the regimen offered by Big Pharma and promoted by our government started asking questions about the actual efficacy of the drugs they’ve been injecting into their bodies. Meanwhile, those who are among the dreaded “anti-vaxxer” crowd were highlighting the idiocy of the admission.

Sports and political commentator Clay Travis was among many people to share the video clip. He claims he was hit with a copyright claim by Pfizer or someone associated with them to have the video taken down.

Pfizer made a copyright claim to remove their CEO’s video comments that two doses of their covid vaccine offers “limited protection, if any.” This is wild.

<https://t.co/jP25VShswZ>

— Clay Travis (@ClayTravis) [January 11, 2022](#)

When admitting the truth is so damaging that you need to stifle it before more people hear it, what does that say about your agenda? Those who are still defending Pfizer’s and Big Pharma’s profits by parroting their lies need to wake up immediately.

One of the weaknesses of Dr. Anthony (Teflon) Fauci is that he craves the camera and so the past 22 months, there are literally hundreds, if not thousands, of statements that contradict each other many times. Flip-flop Fauci can’t keep his story straight and that’s not because he is 81 years old. Rather it is a sign of deceit and winging it figuring people will not recall what he said day before yesterday. I have said several times in the past 22 months that his own press statements are enough to commit him of perjury many times over! The organized crime against humanity narrative is falling apart like a cheap Chinese suit and as this drags out the deft will gradually see they have been suckered into getting jobs that will kill them. The data is making our case, but the tragedy is in the lives lost due to ignorance [lack of knowledge].

Reiner Fuellmich Gives an Update on What’s Happening With the Nuremberg 2.0 Trial

January 13, 2022

The Parliamentary hearing in Poland is wrapping up and the criminal trial for Crimes Against Humanity is set to begin in just a couple of weeks.

Fuellmich outlines how the Covid-Crime Against Humanity is a deliberate and premeditated mass-murder of unprecedented proportions.

The Luciferian sociopathic globalists who Fuellmich refers to as the “Davos Crowd” have stolen the worldwide pension funds, and part of the reason why they rushed their plan forward is that they were terrified the public would find out what they did.

Nuremberg Trial 2.0 Is In Preparation: W.H.O and World Leaders Will Have to Answer for ‘Crimes Against Humanity’.

After hearing the witness statements to the German Corona Investigative Committee by former vice president of Pfizer Dr. Mike Yeadon who has been a scientist for 36 years, lawyers with Reiner Füellmich draw the same conclusion: The injections normally called Corona vaccines are designed to experiment on the human race and to find out what dosage of a yet unknown toxin is needed in order to kill people.

The mortality rate linked to the vaccines, according to Yeadon, is traceable in terms of lot numbers of the different batches, as some batches appear to be more lethal than others. When taking a look at the evidence available, the main goal with the injections all over the world is global depopulation, according to the lawyers involved. Dr. Füellmich told Perspektiv that the lawyers preparing an international law suit were no longer in doubt: Poisoning and mass murder through so called Corona vaccines is intentionally being perpetrated on the peoples of the world.

Citizen Journalist Ulf Bittner from EU/EES Healthcare blog and Sverige Granskas stated in the interview that the situation with traceable lot numbers and injuries and death related to lot numbers is similar in the different health care regions of Sweden. Bittner is in contact with a vaccine coordinator who has provided documents to keep track of how many people have been injured and lost their lives related to the different batches of the so-called vaccines. Transcript points a time in the interview:

01:00 Different numbers on the barcodes on the bottom of the vaccine doses are placebo which has been given to politicians according to a Slovenian chief nurse. Is it the same in other countries?

1:54 Mike Yeadon and the LOT numbers of some shots of the brands Moderna, Johnson& Johnson and Pfizer/Biontech are related to much higher mortality than for the other manufacturers.

3:52 The producers of the so-called vaccines are experimenting with the correct dosages to kill people according to Dr. Füellmich. This according to the Corona Investigative Committee, constitute compelling evidence for punitive damages and attempted mass murder. They are intentionally killing people.

08:30 Lawyers from India have filed complaints for premeditative murder.

09:55 Mike Yeadon as a witness for the coming legal action against the perpetrators.

10:44 Everyone who criticizes the wrongdoings of the governments of the world is being called a 'right wing extremist'. This has also happened to the internationally renowned scientist Mike Yeadon.

13:05 CDC withdrew the recommendation for the PCR-tests diagnosing SARS-CoV-2 from 31/12-2021. PCR- tests are the foundation of the pandemic. Why is Anthony Fauci now doing a 180-degree turn?

17:25 At least a million dollars per person will be claimed in punitive damages if the lawsuit is successful.

18:33 Previously only ten percent of all adverse effects were reported. In the situation the world is right now, the team estimated that in fact only one percent of all adverse effects were being reported.

19:25 CEO of Life insurance company from Indiana USA with 100 billions of dollars in assets said: "Over the span of this past year there has been an excess mortality of 40 percent". This is believed to be due to the injections.

21:05 What substance in the vials makes them so lethal? Is it Graphene Oxide/graphene hydroxide?

22:37 Any vaccine is a poison, it is the dosage which makes the difference. This is not a vaccine, as a vaccine provides immunity, while these products demand incessant injections. Either a vaccine works or it does not.

24:40 This is not gene therapy either, since a gene therapy means exchanging a broken gene with a fixed one. This is more like experimenting on people, and trying to kill us.

25:15 The doses are not tested by governments, while governments will be keeping the contracts hidden from the public for at least 55 years. How is this affecting the possibility of getting people punished? Dr. Füellmich goes through all the lies paving the way for the tyrannical situation the world is now in.

28:25 The vaccines are neither safe nor effective. The producers are experimenting on lethal doses of poison. Everyone now taking part in intentional malicious infliction of harm will be punished.

30:05 How sure are legal experts about the conclusion that Mike Yeadon has drawn from this that it is all about depopulation and intentionally killing people through injections? If close to 50 lawyers are of the same opinion, it is regarded as "irrefutable proof".

32:08 Batches of injections in Sweden can be traced by an application.

32:45 Füellmich is in cooperation with people working within the secret service of Germany who do not wish to take the injections.

34:15 Dr. Lee Merritt on combat pilots in the USA refusing to get the shots. According to Dr. Füellmich, Dr. Merrit explained: "They understood that if they were forced to [get vaccinated] they were going to get killed."

35:15 Information is being collected on batches in Sweden from every region, the Swedish health authorities (Folkhälsomyndigheten) and medical board (Läkemedelsverket). Every batch is traceable through an application. There is economic reward for the Swedish regions which manage to get more people injected. One of the expert lawyers involved in the upcoming court hearings is a specialist on Nuremberg Trials.

38:45 How will the trials be performed, and through what legal structure? A common design, the same structure as for the Nuremberg trials.

39:40 Free choice should reign for members of the European Union. Consumers of health care have consumer rights. Fraud means misleading the people and consumers of health care.

42:00 The so called vaccines are an adulterated product put on to the market. According to Mike Yeadon there is a law in the US that will make everyone liable for the harms created by the adulterated product. Toxins are being put into the vials other than the known lipids etc., which the people who took the vaccines never consented to.

43:40 The importance of decentralization of power and national independence rather than global organizations such as the European Union telling the people what to do. Disconnecting from the banking system, NGO:s and creating independent and strong agricultural supply chains, energy supply chains etc.

46:15 When are the trials going to take place? How will the indictments happen and how will the trials be held? One of the goals is to inform people and expose the wrongdoings by involving the alternative media so that the mainstream media won't be able to ignore the trials. The crew is working on a new system of law in the USA, Africa and Germany.

50:48 Dr. Füellmich believes the world is close to a tipping point and the whole narrative will fall apart very very soon, maybe in a couple of weeks or months.

54:13 Robert Malone, Robert F Kennedy and Mike Yeadon and others involved in exposing the agenda are in contact with each other, and a tour is planned with these whistleblowers in the USA in March

Pastor Bob only has one question, where shall the gallows be erected for execution of the criminals responsible for the death of some 5-million worldwide?

U.S. CDC's Conditional Sailing Order for Cruise Ships Set to Become Voluntary

Mike Schuler

January 13, 2022

The U.S. Center for Disease Control and Prevention's conditional sailing order for cruise ships is set to switch to a voluntary program later this month, even as cases of the omicron variant of COVID-19 are on the rise, according to multiple media reports.

Cruise ships sailing from the United States have been under a conditional sailing order since the lifting of the CDC's original "No Sail Order," first implemented in March 2020 at the beginning of the COVID-19 pandemic. The "No Sail Order" was later extended four times prior to the CDC issuing a Framework for Conditional Sailing Order, issued on October 30, 2020, paved the way for cruise ships to return to passenger operations in Spring 2020 with strict health and safety protocols in place to prevent the spread of the virus.

The [current conditional order](#) is set to expire January 15, 2022, at which point it is set to transition to a voluntary program. A spokesperson for the CDC now tells the cruise industry website Cruise Critic that there will be no extension to the conditional sailing order upon its pending expiration.

"After the expiration of the Temporary Extension & Modification of the CSO on January 15, 2022, CDC intends to transition to a voluntary program, in coordination with cruise ship operators and other stakeholders, to assist the cruise ship industry to detect, mitigate, and control the spread of COVID-19 onboard cruise ships," a CDC spokesperson told Cruise Critic.

The transition of the program, from mandatory to voluntary, comes as the omicron variant spreads rapidly in the United States. Just last month, the CDC raised its COVID-19 travel health notice level for cruise ships to its highest warning level, citing reports of COVID-19 outbreaks on cruises, and said [all people should avoid traveling on cruise ships](#) regardless of their vaccination status.

The CDC's [cruise ship tracker](#) shows that all cruise ships operating approved for passenger operations in the United States have had reported.

The implications of the CDC backtracking is that cruise ship outbreaks are either out of control and the CDC does not want to face the reality of the virus fraud is really 5G EMF toxic Wi-Fi as the true cause of so-called Covid-19 on the cruise ship. The CDC stopped all shipping for over a year and brought to a standstill the cruise ship industry.

Myocarditis Tops List of COVID Vaccine Injuries Among 12- to 17-Year-Olds, VAERS Data Show

VAERS data released Friday by the Centers for Disease Control and Prevention included a total of **1,033,994 reports of adverse events** from all age groups

following COVID vaccines, including **21,745 deaths** and **170,446 serious injuries** between Dec. 14, 2020, and Jan. 7, 2022.
 By Megan Redshaw

The Centers for Disease Control and Prevention (CDC) today released new data showing a total of [1,033,994 reports of adverse events](#) following COVID vaccines were submitted between Dec. 14, 2020, and Jan. 1, 2022, to the Vaccine Adverse Event Reporting System (VAERS). VAERS is the primary government-funded system for reporting adverse vaccine reactions in the U.S.

The data included a total of [21,745 reports of deaths](#) — an increase of 363 over the previous week — and [170,446 reports of serious injuries](#), including deaths, during the same time period — up 3,840 compared with the previous week.

Every Friday, [VAERS](#) publishes vaccine injury reports received as of a specified date. Reports submitted to VAERS require further investigation before a causal relationship can be confirmed. Historically, VAERS has been shown to report only [1% of actual vaccine adverse events](#)

From the 1/7/2022 release of VAERS data:

Found 1,033,994 cases where Vaccine is COVID19

Government Disclaimer on use of this data

Table

Event Outcome	Count	Percent
Death	21,745	2.1%
Permanent Disability	27,327	3.67%
Office Visit	161,438	15.61%
Emergency Room	90	0.01%
Emergency Doctor/Phone	112,148	10.84%
Hospitalized	119,446	11.71%
Hospitalized, Prolonged	800	0.08%
Recovered	308,660	29.86%
Birth Defect	800	0.08%
Life Threatening	24,790	2.4%
Not Serious	452,559	43.77%
TOTAL	↑ 1,227,936	↑ 118.78%

* Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 1,033,994 (the number of cases found), and the Total Percentage is greater than 100.

Excluding “[foreign reports](#)” to VAERS, [723,042 adverse events](#), including [9,936 deaths](#) and [64,406 serious injuries](#), were reported in the U.S. between Dec. 14, 2020, and Jan. 7, 2021.

[Foreign reports](#) are reports foreign subsidiaries send to U.S. vaccine manufacturers. Under U.S. Food and Drug Administration (FDA) regulations, if a manufacturer is notified of a foreign case report that describes an event that is both serious and does not appear on the product’s labeling, the manufacturer is required to submit the report to VAERS.

Of the 9,936 U.S. [deaths reported](#) as of Jan. 7, 19% occurred within 24 hours of vaccination, 24% occurred within 48 hours of vaccination and 61% occurred in people who experienced an [onset of symptoms](#) within 48 hours of being vaccinated.

In the U.S., 516 million COVID vaccine doses had been administered as of Jan. 7, [including](#) 303 million doses of Pfizer, 197 million doses of Moderna and 18 million doses of Johnson & Johnson (J&J).

U.S. VAERS data from Dec. 14, 2020, to Jan. 7, 2021, for 5- to 11-year-olds show:

- 6,399 [adverse events](#), including [142 rated as serious](#) and [3 reported deaths](#).

The most recent death involves a 7-year-old girl (VAERS I.D. [1975356](#)) from Minnesota who died 11 days after receiving her first dose of Pfizer’s COVID vaccine when she was found unresponsive by her mother. An autopsy is pending.

- [14 reports](#) of myocarditis and pericarditis (heart inflammation).
- [22 reports](#) of blood clotting disorders.

U.S. VAERS data from Dec. 14, 2020, to Jan. 7, 2021, for 12- to 17-year-olds show:

- 26,631 [adverse events](#), including [1,530 rated as serious](#) and [35 reported deaths](#).

The most recent death involves a 15-year-old girl from Minnesota (VAERS I.D. [1974744](#)), who died 177 days after receiving her second dose of Pfizer from a pulmonary embolus. An autopsy is pending.

- [62 reports](#) of anaphylaxis among 12- to 17-year-olds where the reaction was life-threatening, required treatment or resulted in death — with 96% of cases attributed to [Pfizer’s vaccine](#).
- [589 reports](#) of myocarditis and pericarditis with [578 cases](#) attributed to Pfizer’s vaccine.
- [149 reports](#) of blood clotting disorders, with all cases attributed to Pfizer.

U.S. VAERS data from Dec. 14, 2020, to Jan. 7, 2021, for all age groups combined, show:

- 19% of deaths were related to cardiac disorders.
- 55% of those who died were male, 42% were female and the remaining death reports did not include the gender of the deceased.
- The [average age](#) of death was **72.6**.

- As of Jan. 7, [4,806 pregnant women](#) reported adverse events related to COVID vaccines, including 1,533 reports of [miscarriage or premature birth](#).
- Of the [3,419 cases of Bell's Palsy](#) reported, 51% were attributed to [Pfizer](#) vaccinations, 41% to [Moderna](#) and 8% to [J&J](#).
- 836 reports of [Guillain-Barré syndrome](#) (GBS), with 41% of cases [attributed to Pfizer](#), 30% to [Moderna](#) and 28% to [J&J](#).
- [2,256 reports](#) of anaphylaxis where the reaction was life-threatening, required treatment or resulted in death.
- [12,331 reports](#) of blood clotting disorders in the U.S. Of those, [5,457 reports](#) were attributed to Pfizer, [4,398 reports](#) to Moderna and [2,428 reports](#) to J&J.
- [3,688 cases](#) of myocarditis and pericarditis with [2,269 cases](#) attributed to Pfizer, [1,249 cases](#) to Moderna and [158 cases](#) to J&J's COVID vaccine.

26-year-old man dies from myocarditis caused by Pfizer COVID vaccine

A 26-year-old South Dakota man died Nov. 12, 2021, of myocarditis, just four days after receiving a booster dose of Pfizer's COVID vaccine. Joseph Keating had no idea he was experiencing a rare and supposedly "[mild](#)" [heart problem](#) after the shot.

His only warning signs were fatigue, muscle soreness and an increased heart rate, family members said.

In an exclusive interview Jan. 11 with [The Defender](#), Joseph's father, mother and sister said the CDC had not investigated Joseph's death, nor did the agency contact the pathologist who performed the autopsy or request the documents which confirmed Joseph's death was caused by the Pfizer vaccine.

According to the [autopsy report](#) and [certificate of death](#), Joseph died from severe heart damage from "myocarditis in the left ventricle due to the recent Pfizer COVID-19 booster vaccine."

In an exclusive interview with The Defender, Joseph Keating's mother said her son's only warning signs were fatigue, muscle soreness and an increased heart rate, yet an autopsy confirmed he died of myocarditis directly caused by Pfizer's COVID vaccine. <https://t.co/Htk7GHXz6o>

Supreme Court strikes down OSHA mandate, allows healthcare mandate to proceed

The U.S. Supreme Court on Thursday issued two opinions on the Biden administration's [COVID vaccine mandates](#) on whether to stay or to grant temporary injunctions requested by plaintiffs in a [number of lawsuits](#) challenging the emergency mandates for millions of Americans.

First, the justices rejected the Biden administration's mandate requiring employees of large businesses to be vaccinated against [COVID](#) or undergo weekly testing and wear a mask indoors while working.

The court's conservative majority said the administration overstepped its authority by imposing the Occupational Safety and Health Administration's (OSHA) vaccine-or-test rule on U.S. businesses with at least 100 employees.

In a second ruling, the justices said the mandates for workers in healthcare facilities that receive Medicare or Medicaid funding could stay in place while the lawsuits work their way through the lower courts.

The mandate is estimated to affect 10.3 million healthcare workers in the U.S., but allows for religious and medical exemptions.

Pfizer CEO says 2 shots offer 'very limited protection, if any' against COVID

During an [interview](#) on CNBC's "Squawk Box" on Monday, Pfizer CEO Albert Bourla said two doses of Pfizer's COVID vaccine — initially referred to as a full regimen — “offers very limited protection, if any” against the [Omicron](#) variant.

When a third, or booster dose, is administered the vaccine offers only “reasonable protection” against hospitalization and death from Omicron and “less protection against infection,” Bourla said.

Bourla previously claimed a two-dose regimen was “[100% effective](#).”

[BUY TODAY: Robert F. Kennedy, Jr.'s New Book — 'The Real Anthony Fauci'](#)

EU regulators, WHO call for end of boosters

European Union drug regulators on Tuesday warned [frequent COVID boosters](#) could risk overloading the immune system and said there are currently no data to support repeated doses.

This comes a month after the regulators [said](#) it made sense to “administer COVID-19 vaccine boosters as early as three months after the initial two-shot regimen,” amid concerns over the Omicron variant.

The World Health Organization's Technical Advisory Group on COVID-19 Vaccine Composition on Jan. 11 also [warned](#), “a vaccination strategy based on repeated booster doses of the original vaccine composition is unlikely to be appropriate or sustainable.”

The group said giving additional doses of already existing vaccines as new strains of the virus emerge is not the best way to fight a pandemic, as currently available COVID vaccines do not prevent infection or transmission and the current composition of COVID vaccines need to be updated.

Djokovic's visa canceled second time over unvaccinated status

Australian authorities today revoked Novak Djokovic's visa due to his unvaccinated status, in the latest twist in the [ongoing battle](#) over whether the nine-time Australian Open champion will be allowed to defend his title.

As [The Defender reported](#), Australian Minister Alex Hawke used his ministerial discretion to cancel the No. 1 ranked Tennis player's visa citing "health or good order grounds," just three days before the Australian Open begins and four days after a federal judge ordered Djokovic be released from hotel detention when his visa was revoked the first time.

Djokovic's lawyers are contesting the visa cancellation in court, in an attempt to allow him to play in the prestigious tennis tournament. If unsuccessful, Djokovic will face deportation.

[Children's Health Defense](#) asks anyone who has experienced an adverse reaction, to any vaccine, to file a report following [these three steps](#).

GLOBAL ALERT: An estimated 10 million people PER DAY are set on irreversible countdown to vaccine death that could exterminate BILLIONS if not stopped in the next year

Tuesday, January 04, 2022 by: [Mike Adams](#)

([Natural News](#)) This is a **red alert for humanity**. We have less time remaining than you might think.

I've done some rough math, and it's beyond alarming. It spells the end of human civilization if we don't stop the vaccine holocaust in the next 365 days.

As estimates and projections show below, as long as "clot shot" covid vaccines are being administered around the world, about **ten million people each day** are being put on an irreversible countdown to vaccine death. For each day that these vaccine shots continue, in other words, roughly ten million people will likely die over the next decade, based on these projections. (See the math below.)

This explains why Biden and other world leaders don't care about legal challenges and the rule of law. They know that if they can bully these vaccines into people for just one more year, they will murder over **3.5 billion more human beings** from vaccine-induced deaths that kick in over the next decade.

That's why we have less time remaining than you might think. And that's why the vaccine zealots don't care if they get stopped over the next 2-3 years by court challenges. **By then it's too late for humanity.**

Even if we stop all covid vaccines right now, we're likely to still see **between one and two billion deaths** over the next decade as vaccine deaths take their toll. (See the numbers below.)

Disclaimer: The numbers presented here are estimates and projections based on early data available now. These estimates may substantially improve or worsen as new data become available. These conclusions are subject to change based on new data as it is

released for total mortality, cancer deaths and other factors. These conclusions are not peer-reviewed. Comments and suggestions are welcomed. See below for full details.

By the way, remember that **Reuters “fact checkers” are all compromised because Reuters is the propaganda arm of Pfizer.** They share some of the same board members. The job of Reuters is to pump out Pfizer disinformation and label it “facts.” These so-called “facts” are then used to suppress the truth on social media platforms like Facebook. It’s all a grand evil conspiracy involving Pfizer, Reuters, Facebook and a true depopulation agenda to mass murder billions of human beings.

The “mass casualty event” has begun

As [Dr. Robert Malone has recently pointed out](#), we are living through a “mass casualty event” that looks a lot like genocide: (emphasis ours)

*It is starting to look to me like the largest experiment on human beings in recorded history has failed. And, if this rather dry report from a senior Indiana life insurance executive holds true, then Reiner Fuellmich’s “**Crimes against Humanity**” push for convening new Nuremberg trials starts to look a lot less quixotic and a lot more prophetic.*

*AT WORST, this report implies that the federal workplace vaccine mandates have driven what appears to be **a true crime against humanity**. Massive loss of life in (presumably) workers that have been forced to accept a toxic vaccine at higher frequency relative to the general population of Indiana.*

*This article reads like a dry description of an avoidable **mass casualty event caused by a mandated experimental medical procedure**. One for which all opportunities for the victims to have become self-informed about the potential risks have been methodically erased from both the internet and public awareness by an international corrupt cabal operating under the flag of the “Trusted News Initiative”. George Orwell must be spinning in his grave.*

Looking at the evidence

The VAERS system is currently reporting roughly 21,000+ post-vaccine deaths in America. A well-documented URF (Under Reporting Factor) in normal times is around 40X reported figures. This reveals that at least **840,000 Americans** have already died from covid vaccines.

Yet we also know from credible sources such as attorney Thomas Renz and the Medicare whistleblower that **VAERS data is months behind** on data entry. The process of entering records into VAERS is being intentionally slowed to prevent these numbers from rapidly growing. **nurses are being actively ordered by doctors, hospitals and administrators to avoid submitting VAERS reports related to covid vaccines.** This is widely documented in articles [like this one from CitizensJournal.us](#):

Angela, a nurse for more than 25 years, confirms that in her hospital's emergency room, they say they are seeing more heart problems in young adults, which are never reported to the Vaccine Adverse Event Reporting System (VAERS) as potential adverse reactions to COVID "vaccinations."

Another nurse, Jennifer, says ER nurses privately say they are seeing "all the clotting, bleeding and things you would expect from the vaccine six months later — brain bleeds, heart attacks in younger 50-year-olds. No doctor will admit this is from the vaccine. They won't make the VAERS report."

When Daniel asked fellow nurses and practitioners if they report to VAERS, they looked at him like, "What's that?"

All nurses interviewed say they are seeing "ground-glass opacity" results in the CT scans of people's lungs who recently took the experimental vaccines — and that this is never reported to VAERS.

We also know from anecdotal evidence that **a shocking number of US doctors have no idea what VAERS is**. They make no reports whatsoever and aren't even aware of the existence of this system. This fact, combined with the realization that nurses are being actively ordered to *avoid* VAERS reporting on covid vaccines, means the URF of 40X is far too low. Given the environment of extreme suppression now leveled against doctors and nurses to try to cover up vaccine injuries, a more legitimate estimate of the URF would be 200X.

If accurate, this would mean that 21,000+ VAERS reports actually translated into **4.2 million US deaths from these vaccines so far**.

Bookmark that thought as we look at other numbers that paint a truly frightening picture. **Vaccines kill people in three phases, taking as long as a decade for all the vaccine-induced cancer deaths to play out.**

Although we've all seen people literally keel over dead from vaccine-induced heart attacks, most people who are on track to die from covid vaccines don't die right away.

There are three phases of covid vaccine mortality, described in this chart below:

THE **THREE PHASES** OF COVID VACCINE MORTALITY

DEATHS

SHORT TERM 0-30 Days

- Blood Clots
- Thrombosis
- Myocarditis
- Strokes
- Heart Attacks
- Spontaneous Abortions
- Pulmonary Embolism
- Anaphylactic Shock

MEDIUM TERM 1-12 Months

- Vaccine-Induced Immoderacy
- Antibody Dependent Enhancement (ADE)
- Autoimmune Reactions
- Prion-Like Neurological Destruction
- Heart Failure

LONG TERM 1-10 Years

- Spike Protein-Induced Chromosomal Damage
- Cancers
- Severe Immunodeficiency
- Fatal Autoimmune Disorders
- Suppressed DNA Repair Mechanism NHEJ
- Infertility / Reproductive Disorders

TIME

**Covid vaccines are known to
cause myocarditis.**

**Myocarditis alone is fatal in 56% of patients
in less than 5 years. Giant-cell myocarditis
causes over 80% mortality in 5 years.**

Source = AHAjournals.org, "Circulation" Journal of the American Heart Association,
Feb. 14, 2006, Vol 113, Issue 6.

Remember that according to Dr. Ryan Cole, a Mayo Clinic trained, board-certified anatomic pathologist, 62% of patients injected with mRNA vaccines show micro blood clots. Dr. Cole presents this evidence in the following video from the White Coat Summit:

Micro blood clotting is an early sign of vascular damage and heart damage. People receiving covid vaccines are often diagnosed with myocarditis, which has a **56% fatality rate over five years.**

A [study published by the American Heart Association](#) — then widely censored by Big Tech — found that mRNA covid vaccines greatly increased the risk of vascular inflammation and therefore heart attacks and other vascular events. The risk of heart attack alone increased by 127% in a group of 500 patients, according to this one study.

[As DailyExpose.uk explains:](#)

A new study suggests the mRNA injections produced by both Pfizer and Moderna are raising inflammatory blood markers used to estimate the risk of a person suffering a heart attack.

Dr. Aseem Malhotra, a consultant cardiologist, points out that in the UK there have been 10,000 excess non-Covid deaths — many of which were due to heart attack and stroke. A few days after these ominous results came out, a whistleblower and researcher from a different group contacted Dr. Aseem Malhotra to say that in imaging studies they have found inflammation in the coronary arteries after vaccination. But they decided not to publish this yet because they are afraid of losing future grant money from the drug industry. The whistleblower was quite upset about this.

Dr. Charles Hoffe (Canada) is also reporting substantial increases in blood clotting among mRNA vaccine takers. [Via LifeSiteNews:](#)

The core problem he has seen are microscopic clots in his patients' tiniest capillaries. He said, "Blood clots occurring at a capillary level. This has never before been seen. This is not a rare disease. This is an absolutely new phenomenon."

Most importantly, he has emphasized these micro-clots are too small to show up on CT scans, MRI, and other conventional tests, such as angiograms, and can only be detected using the D-dimer blood test, a standard test that indicates whether blood clots are being actively formed somewhere within a person's vascular system.

Using the latter, he found that 62 percent of his patients injected with an mRNA shot were positive for clotting, not a small fraction that can be easily dismissed.

Myocarditis fatalities and inhibition of DNA damage repair

Through simple math, if we take 62 percent of covid vaccinated people who show micro blood clots — leading to myocarditis — and multiply by the known myocarditis 56% fatality rate over five years, this alone would mean that **36% of mRNA vaccine takers**

will be dead in five years. Granted, this assumes that all the micro blood clot people end up with myocarditis, and that relationship isn't yet satisfactorily documented. So this 36%, based entirely on heart attack deaths, may be too high by itself.

Yet this only begins to tell the story of deaths from other causes such as vaccine-induced cancer. Another fact we now know is that once mRNA vaccines start producing spike protein nanoparticles in a person's body, some percentage of those spike proteins **enter cell nuclei** and achieve about a 90% suppression of the NHEJ mechanism, which is the chromosomal repair mechanism that maintains genetic integrity for the body.

See this Nov. 2, 2021 article – [Vaccine spike protein enters cell nuclei, suppresses DNA repair engine of the human body, will unleash explosion of cancer, immunodeficiency, and autoimmune disorders and accelerated aging.](#)

That article cites a critical research paper entitled, "SARS-CoV-2 Spike Impairs DNA Damage Repair and Inhibits V(D)J Recombination In Vitro," authored by Hui Jiang and Ya-Fang Mei, at the Department of Molecular Biosciences, The Wenner-Gren Institute, Stockholm University, SE-10691 Stockholm, Sweden, and the Department of Clinical Microbiology, Virology, Umeå University, SE-90185 Umeå, Sweden, respectively. You can see an archived PDF of this study at:

<https://www.naturalnews.com/files/viruses-13-02056-v2.pdf>

In the conclusion of the paper, authors write, "*We found that the spike protein markedly inhibited both BRCA1 and 53BP1 foci formation (Figure 3D–G). Together, these data show that the SARS-CoV-2 full-length spike protein inhibits DNA damage repair by hindering DNA repair protein recruitment.*"

The study finds that the suppression of NHEJ activity exhibits a dose-dependent response to the presence of spike protein. This means that spike proteins in the cells will cause the suppression of chromosomal repair mechanisms, leading to **loss of genetic integrity over time.**

In effect, once people are injected with mRNA vaccines, when they are subsequently exposed to even mild sources of ionizing radiation — sunlight, mammography, high-altitude commercial air flights, food plastics chemicals, etc. — their bodies may initiate the growth of new cancer tumors that cannot be suppressed because the NHEJ system is no longer functioning.

In effect, **people will become mutants** because they can no longer maintain genetic integrity due to the spike protein suppression of the NHEJ repair mechanism.

We are already seeing reports of alarming increases in cancers among the vaccinated. For example, as [reported from Cancer.news:](#)

Women recently injected with experimental covid vaccines are showing symptoms of BREAST CANCER

A group of Utah doctors have discovered something terrifying in recent mammogram screenings taken at the Breast Care Centre in Salt Lake City, Utah. Women who were recently injected with experimental COVID vaccines suffer from abnormal inflammation of the lymph nodes in their breasts. According to the Intermountain Healthcare doctors, women who take the covid-19 vaccines are showing symptoms of breast cancer.

Dr. Brett Parkinson, MD., warns, “Whenever we see these on a normal screening mammogram, we call those patients back because it can either mean metastatic breast cancer which travels to the lymph nodes or lymphoma or leukemia.” Instead of dealing with the cause of this problem (vaccines), the doctors are now telling women not to get mammograms after vaccination.

And from Vaccines.news: [Idaho doctor reports “20 times increase” in cancer among those “vaccinated” for covid:](#)

In a video produced by the Idaho state government’s “Capitol Clarity” project, Cole revealed how he is now seeing a 2,000 percent chronic illness increase in folks who took [the vaccine].

“Since January 1, in the laboratory, I’m seeing a 20-times increase of endometrial cancers over what I see on an annual basis,” Cole stated in the video.

“I’m not exaggerating at all because I look at my numbers year over year, and I’m like ‘Gosh, I’ve never seen this many endometrial cancers before.’”

In a “normal” year, there are around **600,000** cancer deaths in the United States. With the spike protein suppressing NJEH by 90%, and with doctors already reporting a 2000% increase in one type of cancer (endometrial) from early 2020, it’s clear that cancer deaths are going to substantially increase in the coming years due to covid vaccines.

Add that data point to the big picture here.

A 40% increase in all-cause mortality, says life insurance CEO

Providing an additional clue to all this, we have recently [reported on the shocking interview with Scott Davison, CEO of OneAmerica, a life insurance company](#). Davison reveals that **all-cause mortality is up 40%** among their life insurance policy holders, which covers a wide range of people, aged 18 – 64. Davison refers to this as, “the highest death rates we have seen in the history of this business – not just at OneAmerica.”

This observation is based on third quarter data from 2021. The numbers for Q4 will look far worse due to the well documented fact that VE numbers (Vaccine Effectiveness) plummet with each passing week after vaccination, representing a continued destruction of the immune system. As more time goes by, those who took the vaccines have weaker and weaker immune systems, making them more vulnerable to common infections and flu strains that would normally be of little threat. This is confirmed by

official government data from the UK as well as independent research such as this study from the Francis Crick Institute in the UK: [Pfizer vaccine destroys T cells, weakens the immune system – study](#):

A study from the Francis Crick Institute in the United Kingdom has found that the Pfizer-BioNTech Wuhan coronavirus (COVID-19) vaccine destroys T cells and weakens the immune system... It found that only 50 percent of the people who received a single dose of the Pfizer vaccine had a quantifiable neutralizing antibody response against the alpha variant of COVID-19. This number decreased even further to just 32 percent and 25 percent for the delta and beta variants, respectively.

A 40% increase in all-cause mortality, if applied across all age groups, means that an additional **3,100 Americans** are dying each day. That's over 90,000 people per month being killed by the vaccine as of Q3, 2021. (The normal pre-covid death rate is around 7,700 per day in the USA.)

We estimate that by the time Q1, 2022 data are available, we will likely see up to a 60% increase in all causes mortality, leading to **an additional 4,600 deaths per day**. This alone is nearly **1.7 million deaths per year**, or about half a percent of the entire US population.

My (conservative) prediction is that as post-vaccine cancer deaths take hold, we are going to see, at minimum, a **400% increase in cancer deaths** starting in 2022. That's roughly **2.4 million vaccine-related cancer deaths per year** for the foreseeable future, very likely continuing through the next decade.

93% of post-vaccine deaths attributed to the vaccine itself

One more factor to consider in all this is the astonishing research conducted by Drs. Bhakdi and Burkhardt, [commented on by Steve Kirsh at Substack.com](#).

Although the sample size was small (15 autopsies), it showed that 93% of people who died after being vaccinated were, in fact, **killed by the vaccine**. As Kirsh explains:

The coroner or the public prosecutor didn't associate the vaccine as the cause of death in any of the cases. However, further examination revealed that the vaccine was implicated in the deaths of 14 of the 15 cases. The most attacked organ was the heart (in all of the people who died), but other organs were attacked as well. The implications are potentially enormous resulting in millions of deaths. The vaccines should be immediately halted.

Importantly, as Dr. Bhakdi explains on video, these autopsies showed that people were killed by **killer lymphocytes attacking their own organs such as the heart and lungs**. In other words, mRNA covid vaccines caused the body's own immune system to start growing lymphocyte tissues in places where it doesn't belong, such as the heart and other organs.

This shocking finding caused former Pfizer VP Mike Yeadon to write Steve Kirsh and explain, “This is about the worst 15 min (video) I’ve ever seen. Mass covid19 vaccination is leading to mass murder.”

That video is shown here:

[Brighteon.com/2d124f9e-e8f3-4938-a4ab-f9358d580a52](https://www.brighteon.com/2d124f9e-e8f3-4938-a4ab-f9358d580a52)

Essentially, what Dr. Bhakdi’s findings reveal is that **far more people are now dying from the vaccine than from natural causes**. This would imply that the pre-covid daily death rate of 7,700 Americans (that’s per day) is about to be dwarfed by vaccine-induced deaths which will, at some point, emerge as a *multiple* of 7,700.

It’s not unreasonable to imagine that over the next few years as cancer tumors and lymphocyte attacks accelerate, we could start to see *daily* deaths in America exceeding 16,000 or even 30,000 as the post-covid vaccine deaths accelerate.

At 30,000 deaths per day, by the way, the number of dead in a year reaches nearly 11 million people, or about 3.3% of the total U.S. population expiring in a given year. Over a decade, that’s about a third of the current population. These are projections, of course, but they are rooted in early evidence and observation.

Conservatively, one-third of all who received covid vaccines will likely die over the next decade... and another third will be debilitated

Based on the cancer deaths, myocarditis deaths, autoimmune deaths, heart attack deaths and the increased risks of strokes, neurological disorders and organ failure, we can conservatively conclude that roughly:

- One-third of those who took mRNA covid vaccines will be dead over the next ten years.
- One-third will be injured or debilitated and unlikely to be capable of participating in society in a meaningful way.
- One-third will be relatively unaffected.

Interestingly, this appears to coincide with the statistical analysis of covid vaccine lot numbers, where roughly one-third of the lots are associated with heart attacks and deaths, another third are associated with injuries (but not death), and a final third appear to be harmless (suspected to be saline).

Again, these are rough numbers and there will be disagreement about many of the projections made here, but this is an **early snapshot and projection** based on what we know so far. Obviously, these conclusions are subject to change as new data appear, and the final number by the end of 2032 could be radically different from these projections (far worse or perhaps far better).

30 million people per day are being vaccinated around the world

Now let’s look at what this means globally if we conclude that roughly one-third of vaccinated people will die over the next decade.

Right now, about **30 million people** are being vaccinated each day across the globe, [according to OurWorldInData.org](https://ourworldindata.org).

That same site says that **58.5%** of the world's population has been vaccinated with at least one dose, and that **9.25 billion** doses have been administered (data accessed on 1/4/2022).

If one-third of vaccinated people are set on a path to die from the vaccine over the next decade, then each day that these vaccines continue, **about 10 million people are being sentenced to death**.

If this continues for just one more year — 365 days — this would mean an additional **3.65 billion people** will be exterminated by vaccines and die from vaccine-induced fatalities over the next decade or so. That's roughly **half the world's population**, by the way.

If you're wondering how more than one-third of the world's population can be exterminated if only one-third of the vaccine lots are so-called "kill shots," remember that people are being given multiple injections via "boosters." Thus, one person can be injected five or six times with mRNA shots, and even if only one-third of those shots are "kill shots," their chances of escaping the kill shot dwindle rapidly. It's like playing *vaccine roulette*.

Statistically speaking, here are the odds of **EVADING** a kill shot if a person continues to take more injections, given the assumption that one-third of the lots are deadly:

1st injection: 66.6% chance of evading death.

2nd injection: 44.4% chance of evading death. ($.666^2$)

3rd injection: 29.5% chance of evading death. ($.666^3$)

4th injection: 19.7% chance of evading death. ($.666^4$)

5th injection: 13.1% chance of evading death.

6th injection: 8.7% chance of evading death.

As you can see, if the governments of the world can coerce people into taking six shots, they can kill over 90% of the world's population, given that one-third of vaccine lots are kill shots and assuming a 100% kill rate over time.

Thus, the only way to stop this vaccine holocaust is to stop the vaccines.

For each additional day that the depopulation globalists run their vaccine holocaust campaign, they are likely exterminating an additional 10 million people over time.

That's a **World War II Nazi Holocaust every 14.4 hours**, in terms of innocent lives destroyed.

It also means that nearly 7,000 lives are being destroyed *per minute* as this vaccine holocaust continues.

This also means that each day *earlier* that we stop the holocaust, **we potentially save 10 million lives.**

Hence the urgency of our mission. If we stop the vaccine holocaust right now, we still lose 1.5 billion human beings from vaccine-induced deaths over the next ten years. Importantly, **human civilization can probably survive such a hit**, as devastating as it might be.

But if this vaccine holocaust continues for just one more year, globalists could have set into motion the deaths of potentially an additional 3.6 billion people on top of the 1.5 who are already on the death clock countdown. That means we could lose **over 5 billion human beings** in the next decade, simply stemming from our inability to stop this holocaust in the next 365 days.

The important question becomes: Can human civilization remain intact if we lose over 50% of the population?

I don't have the answer to that, but given the complexity of our modern society, it seems likely that a systemic collapse — “great reset” — would be inevitable. It also seems that **this is what the globalists are trying to achieve.**

Note carefully that no one in government power is suggesting we pause the vaccines, wait a year and see how many people die. No, they prefer to charge ahead at full speed — damn the consequences! — and then blame the unvaccinated for the mass deaths of the vaccinated.

Clearly, they are bad faith actors. They are not trying to save lives; they're working to exterminate them.

[Brighteon.com/72f2d8d5-0d32-474f-af5e-85ef8d227475](https://www.brighteon.com/72f2d8d5-0d32-474f-af5e-85ef8d227475)

The government's official death statistical data report for Covid-19 ending December 31st, 2021 was **822,914** and this is the equivalent or **0.24861450151057%** of 331,000,000 or just **2/10th of one percent**. Because of inflated numbers encouraged by CDC, NIAID, NIH, and WHO we will never know the true figures. This is proof that Covid-19 was nothing like Bill Gates, Deborah Birx, Robert Redfield, Francis Collins, or Dr. Teflon Anthony Fauci have made it out to be. Mass Murder it still is because of the vaxxes and the toxic ingredients of those vaxxes. Now let's look at the global stats at the global level.

At the end of 2020 I became convinced we were all being force-fed a giant load of absolute bovine excrement. Don't believe me? Look at world population statistics. Here's a sample. At the end of 2018, the world population was 7,631,091,040 and that year 57,625,149 people died. This showed an overall death rate of 0.76%. I know some of you are shocked by this, but yes, 57 million people died of all types of causes in 2018. When you reach the end of your life, you die.

At the end of 2019, the world population was 7,713,468,100 and 58,394,378 died. Naturally, because we had more people reaching the end of their lives, more people died. The death rate that year was 0.76%. Now let's see what 2020 brought us. The year of the pandemic. At the end of 2020, the world population was 7,794,798,739 and 59,230,795 died. The death rate was 0.76%. Yes. That's right. In the year of the deadly pandemic the world's population grew by 81,330,639 people and the death rate did not change by even a hundredth of a percent. The media never once pulled back the lens to show this, they continued to show the narrow focus of case counts and Covid deaths. Even going so far as to change reported causes of death so that someone who died "with" Covid in their system was counted as someone who died "of" Covid.

The Western world shut down over a disease about as deadly as the common cold and flu. And our rights were shut down along with it. Despite this disease having a non-existent effect on the overall death rate of the world's population the call came out for a mass vaccination. Since I was already skeptical of the pandemic, I was naturally skeptical of the need for a "vaccine". But you can see what the motivation of "Fear" can do to people.

The one field where this kind of data is critical is the insurance industry. The insurance industry employs the best actuarial statistician's money can afford. Throughout the past two years insurance rates have not changed so much as a fraction. Dr. David L. Martin in a video last year pointed out the business model of the Insurance Industry is based upon mortality rates, stacked or designed to profit the insurance industry.

Life insurance voided because covid vaccines are "medical experiments"?

Published on January 14, 2022

Written by dclothesline.com

Getting "vaccinated" for the Wuhan coronavirus (Covid-19) could mean [losing your life insurance coverage](#).

According to reports, many who took the experimental gene therapy from "Operation Warp Speed" program are now coming to the realization that their death benefits have been voided.

Apparently the life insurance industry considers the emergency use-authorized injections to be an "experimental medical intervention" – which is exactly what they are. Consequently, they do not qualify for a payout.

Only vaccines that have undergone the normal testing and vetting process are covered, in many cases. These rushed-to-market injections, conversely, are not covered.

“Some insurers are delaying applications if you are currently testing positive for coronavirus and need to provide medical evidence, but this does not mean you cannot apply again in the future,” reports indicate.

Some insurers are still covering their existing clients who got jabbed while others are “delaying” applications for new clients who got their shots before applying.

Among the questions that life insurance carriers are now asking their potential clients include the following:

- Have you tested positive for coronavirus?
- Are you currently in self-isolation?
- Have you had any symptoms of coronavirus?
- Have you been in direct contact with anyone who has been diagnosed or suspected of having a coronavirus?

“Note in the last question that it asks about having a coronavirus, not just the ‘novel’ coronavirus,” reports *Principia Scientific*.

“This means that anyone who is testing ‘positive’ for any coronavirus, including the one associated with the common cold, could be denied life insurance coverage.”

Answering yes to any of the above questions could result in an applicant’s decision being “delayed” until he or she has “recovered.”

“The decisions may vary between insurers,” reports explain.

Covid “positive” patients could be denied coverage until they fully recover.

“Some insurers are delaying applications if you are currently testing positive for coronavirus and need to provide medical evidence, but this does not mean you cannot apply again in the future,” reports further explain.

Even testing positive for the common cold, which is a type of coronavirus, could disqualify a person from coverage until he or she is able to procure a negative test suggesting a clean bill of health.

“High-risk” people who answer yes to any of the aforementioned questions could be denied coverage *forever* if they also have other health conditions such as diabetes, asthma, autoimmune disease or heart disease.

“This is why getting tested and playing the *plandemic* game is a no-go for people who still want their lives to be insured for the safety and protection of their families in the event that they die from the vaccine or some other cause,” *Principia Scientific* reports.

Since SARS-CoV-2, as they are calling it, has never actually been isolated, there is no true test for it that could ever be accurate. Not only that, but the jabs themselves have [been shown](#) to potentially prevent a person from ever acquiring true and lasting immunity.

“They created a phantom and capitalized on public trust to pretend that suddenly people were dying of it and the crappy false PCR test used to confirm the fiction, when people, particularly the elderly were not dying in any more numbers than normal,” one commenter wrote.

“The scare of the virus did kill some people because of abused and neglected medical care, such as the over use of ventilators and making sure that the elderly got ill by placing sick people in their presence. Overall, the flu season, aka Covid-19, was not a bad one.”

REVELATION: Only the “vaccinated” died during the 1918 Spanish Flu Wednesday, December 29, 2021 by: [Ethan Huff](#)

(Natural News) Everything you thought you knew about the infamous “Spanish Flu” outbreak of 1918 is probably wrong.

It turns out that one of the most well-known pandemics from recent history was actually caused by the “vaccines” that were supposedly introduced to stop it – much like how the Wuhan coronavirus (Covid-19) “vaccines” of today are spreading more covid.

Dr. Sal Martingano, FICPA, explains that mass vaccination during the Spanish Flu is what actually caused people to die. In fact, the only people who ended up dying during the ordeal were those who got jabbed.

In her book ‘*Vaccination Condemned*,’ Dr. Eleanor McBean, Ph.D., N.D., explains how she is an “unvaccinated survivor” of the 1918 Spanish Flu. She continues to urge people to revisit the historical event with a new lens, which she helps readers to do in her book.

McBean actually wrote a second book called ‘*Vaccination ... The Silent Killer*’ that expounds upon the revelations contained in her first book. The evidence she provides points to the vaccines, and not the flu itself (if there ever even was one...) as the true culprit that resulted in tens of millions of deaths.

“McBean’s coverage of the 1918 ‘Spanish Flu,’ as a reporter and an unvaccinated survivor, requires that the historical basis of the event needs to be revisited, not as a ‘conspiracy theory’ but with evidence that will ‘set your hair on fire,’” writes Dr. Martingano.

“McBean provides evidence that not only were the historical events of the 1918 ‘Spanish Flu’ compromised, but also those of the Polio and Swine Flu epidemics.”

The first case of Spanish Flu occurred at a military base in Kansas where vaccine experiments were taking place.

Because Spain remained neutral during both the first and second world wars *and* did not censor its press like was occurring elsewhere, it would become the first country in the world to report a flu epidemic in 1918.

This would explain why Spain ended up being scapegoated for what would later be called the “Spanish Flu.” However, it turns out that that first real case of the deadly disease actually occurred in Kansas at a military base where vaccine experiments were taking place.

In preparation for World War I, military servicemen at Fort Riley, where numerous prior vaccines had been developed, conducted a massive vaccination experiment. This would lead to “patient zero” appearing in the United States rather than Spain.

If history was honest, it would actually be called the 1918 United States Military Flu. However, thanks to prolific influence from the likes of the Rockefeller family and other Big Pharma globalists, the blame got shifted to Spain.

“The fledgling pharmaceutical industry, sponsored by the ‘Rockefeller Institute for Medical Research,’ had something they never had before – a large supply of human test subjects,” explains Martingano.

“Supplied by the U.S. military’s first draft, the test pool of subjects ballooned to over 6 million men.”

There was no Spanish Flu: it was bacterial meningitis caused by vaccines

It would take until long after the war for autopsies to show that the millions of people who died from the “Spanish Flu” actually died from vaccine-induced bacterial meningitis. (RELATED: The polio outbreaks of the past were similarly caused by man-made chemicals rather than an airborne disease.)

“It was caused by random dosages of an experimental ‘bacterial meningitis vaccine,’ which to this day mimics flu-like symptoms,” Martingano explains. *“The massive, multiple assaults with additional vaccines on the unprepared immune systems of soldiers and civilians created a ‘killing field.’”*

Interestingly, the only people who were not affected by the so-called Spanish Flu were those who avoided taking the injections. Those people, including McBean, would go on to live normal lives and even tell all about what they witnessed at that horrific time.

While it all started out with mostly soldiers getting the injections, a massive leftover cache of the shots would eventually be given to civilians. This resulted in mass death on a wide scale among the American civilian population.

“Fearing that soldiers coming home would spread diseases to their families, the U.S. government pushed the largest vaccine ‘fear’ campaign in history,” Martingano writes.

“They used the human population as a research and development lab to field test experimental vaccines ... Tens of millions of civilians died in the same manner as did the soldiers.”

Just like today, the doctors of that day mostly ignored what they were witnessing occur as a result of the mass injection campaign. Instead of stopping it in order to save lives, they actually proceeded to intensify the jab drive, resulting in many more deaths.

“Seven men dropped dead in a doctor’s office after being vaccinated,” McBean writes in her book about the propaganda that was being spread at the time. *“Letters were sent to their families that they had been killed in action.”*

In total, WWI soldiers from the U.S. were given anywhere from 14-25 untested, experimental injections, all within just a few days of one another. This triggered a cascade of intensified diseases all at once, which the medical system blamed on the “Spanish Flu.”

"The doctors called it a new disease and proceeded to suppress the symptoms with additional drugs or vaccines," Martingano further explains.

This sobering account of what really happened during the so-called Spanish Flu pandemic of 1918 explains a lot about what the world is currently facing with the latest fraudulent *plandemic* episode called "covid." It was all a lie back then, and is still a lie today.

One of the facts that I have learned in the past two decades is that the vaccine business nearly died out by the 1970s. Many diseases died out by the late 1970s. Elimination of many diseases came from greater safety, clean water, improved sanitation, better living conditions, banning of specific toxic chemicals and pollutants. As an example, polio in the U.S. died out when the government banned spraying of DDT. Once the industry stepped up its political campaign to introduce vaccines in the schedule for children attending public school, injury of children began to increase steadily.

In 1989 Autism was less than 1 in 10,000 children. In 2021, Autism is stated to be 1 in 44 boys. Autism is not an issue in the Amish and Mennonite communities in the U.S. It is essentially non-existent in this religious community. They do not accept vaccines of any kind! The evidence is staring us in the face.

This is a clear indictment of the vaccine industry of the crimes being committed against our children in the name of health and safety. We have been deceived, defrauded, and children have been denied a future due to this criminal act. We have a group of people in this country that can be used as a control population for a comparison standard for those who do not get vaccines, and they are the 345,000 Amish and Mennonite in PA, OH, IN, and KY. The Amish and Mennonite communities do not take injections on religious grounds. In my research and study of the topic of vaccines, it seems to me that they have substantial evidence for their belief system and justification for others on religious grounds.

God gifted to humanity an incredible immune system to fight off pathogenic bacteria and viral attacks. It presents a cogent argument for the anti-vaccine movement and shows that man's ways are not always better than God's ways.

WHAT HAPPENED IN 1986?

- In 1986, Reagan passed a law that gave legal immunity to vaccine manufacturers.
- They could no longer be sued for injuries or death caused by their products. Safe vaccines wouldn't need such protection.
- Once that law passed, we suddenly 'needed' 48 additional doses of vaccines. (Do you remember any outbreaks in 1989?)
- Also, since that law was passed, U.S. Federal Government has paid out more than \$4 Billion in vaccine injury compensation, and that's only a fraction of actual injuries.
- The U.S. gives more vaccines than most developed countries, yet we have the sickest kids

GUESS WHAT?

The CDC has only ever tested MMR and Thimerosal for a link to autism. The remaining 15 vaccines and 37 common ingredients remain untested for links to autism.

For more information and sources, please visit www.InformedChoiceUSA.org
THERE ARE RISKS | YOU HAVE CHOICES

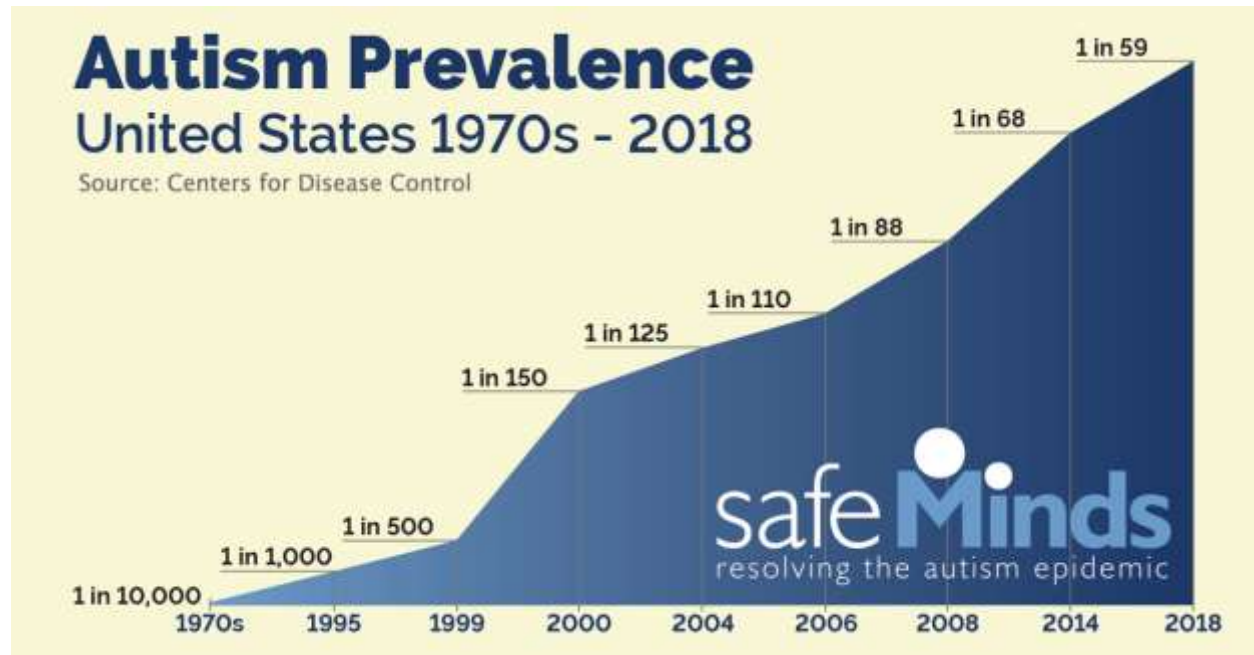

What should be a concern for American citizens is that the vaccine industry has been seeking to increase the required vaccines on children to be expanded to adults in order to expand their business. This is a result of push-back from parents regarding new vaccines being added. The chart above shows what has occurred in the past fifty years. I have included two charts below that confirm the epidemic of Autism in the U.S. They correlate a relationship that began with the introduction of the MMR vaccine.

As the required vaccination schedule for attending public school has grown we have a correlary directly related to the growth of Autism since vaccination was made mandatory in order to be able to attend public school. There is no better example showing a relationship between vaccines and Autism. Catherine Austin Fitts stated that the lifetime care needed for an autistic child can be as much as \$5-million dollars a child.

Manufacturers of "special needs" equipped school buses have noted the growth in the years following the outbreak of Autism in the period since 1990. It was in 1990 when Congress passed the Americans with Disabilities Act, or the ADA, to bar discrimination in other areas of society. ADA was updated to be called IDEA or Individuals with Disabilities Education Act (IDEA).

CDC Autism Rate by Year

Avoid the Covid FREE test Kits if you want to remain "Unvaxxed!"

This past week the Biden administration was promoting the availability of FREE virus test kits to the public. The original order was to be for 500-million self or home test kits and on Thursday, Biden or Arthur Roberts, Biden's double increased the order by an additional 500-million.

There have been numerous problems with the test kits over the past weeks. Recalls were related to a variety of issues. Three or four weeks ago I shared a report of the test kits containing toxic chemicals found to be lethal, or fatal.

On January 11, 2022, the U.S. Food and Drug Administration (FDA) is warning people to stop using the LuSys Laboratories COVID-19 Antigen Test (Nasal/Saliva) and the LuSys Laboratories COVID-19 IgG/IgM Antibody Test. The performance of these tests has not been adequately established and the FDA believes there is likely a high risk of false results when using these tests. Neither test has been authorized, cleared, or approved by the FDA for distribution or use in the United States.

The LuSys Laboratories COVID-19 Antigen Tests (Nasal/Saliva) and COVID-19 IgG/IgM Antibody Tests may also be sold under the company names Luscent Diagnostics or Vivera Pharmaceuticals, or with the trade name EagleDx. The FDA believes that these tests were distributed for use in laboratories or for at-home testing.

Abbott BinaxNOW C-19: Home Test KIT HAS Lethal Substance

Omicron variant and the hysteria around it made Americans panicking, and they tested themselves for the minor ailment to make sure they did or didn't have C-19.

The testing sites in many urban zones made people stand in lines waiting outside in the cold. NYC is a place where you can see thousands of asymptomatic and mildly ill people waiting to get their C-19 nasal swabs. Thousands of New York City residents have been waiting in lines in below-freezing temperatures for hours to get tested for the new COVID Omicron variant, which typically presents with symptoms similar to the common cold.pic.

So, a lot of people decide to get home test kits only to avoid the crowd. So, it increased the demand for test kits in the holiday season.

The Biden admin. invoked the Defense Protection Act to give \$3 billion so the Americans could get the home testing kits. It's crucial to mention that kits aren't FDA approved. They have emergency use authorization.

The C-19 testing kit has a lethal ingredient causing past deaths even in small doses. Abbott's BinaxNow C-19 Antigen Self Test is the item that is questioned for having the ingredient called sodium azide.

The CDC shared some facts about sodium azide:

- Sodium azide is a rapidly acting, potentially deadly chemical that exists as an odorless white solid.
- When it is mixed with water or an acid, sodium azide changes rapidly to a toxic gas with a pungent (sharp) odor. It also changes into a toxic gas (hydrazoic acid) when it comes in contact with solid metals (for example, when it is poured into a drain pipe containing lead or copper).
- The odor of the gas may not be sharp enough, however, to give people sufficient warning of the danger.

"Survivors of serious sodium azide poisoning may have heart and brain damage," according to the public health agency.

There is a warning on the instructions saying:

11. Do not dip the swab into the liquid reagent or other liquid before inserting the swab into the nose.

However, who will read the instructions before they use the test kit? So, people aren't aware of the dangerous ingredient. The test could be administered to young children at two or three. Open your eyes and read carefully.

If that is not enough, reports go so far as to say there are a dozen ways that can make the tests unreliable.

There are other reports of issues with the vaxx test kits and what the public does not realize is that we are engaged in a nano-war where the weapons are invisible to the eye

and therefore everything has to be viewed as suspect. My issue is that we know of so many aspects confirming this is a war against the citizenry and their agenda is to “depopulate” through stealth. I have been monitoring their methods and means since 1967/1968. When I say they want us dead, it is based upon fifty-years of evidence.

The presumption suggests to me that if they can get you to do a home test, peaking your curiosity, they got you and getting a second opinion is not so easy. The fear of variants has lowered one’s resistance and increases the chance of being vaxxed out of fear and being disarmed by those behind the vaxxes. Remember, Covid has still not been verified to exist under the protocols of Koch Postulates. My wife and I received our marketing letters from CMS (Center for Medicare & Medicaid Services), on Thursday, January 13, 2022. What I found interesting was the fact that rather than sending separate letters to us individually, both were mailed in the same envelop.

In their determination to get every man, woman, and child vaxxed, it is likely that we will receive more of these marketing propaganda letters.

Blessings,

Pastor Bob, EvanTeachr@aol.com
