

Mass Murder

By Sovereign State Sanctioned Syringe Needle!
Part 85

There is one final report that begins on page 70 and if you read nothing, you must read the last few pages of this final segment in the Mass Murder series.

I now have an informant deep inside the CDC. There are two things I was surprised to learn.

This is NOT my informant. W. Mark Felt died in 2008.

My email to nearly 300 CDC employees paid off. One of them responded on a secure channel and I can now ask questions and get answers.

Here are two things I learned:

1. He believes that everyone at the CDC is drinking the Kool-Aid. In other words, as far as he knows, they all truly believe the vaccines are safe and effective, just like my blue-pilled friends. Even the top people. If there are any dissenters, they aren't speaking up internally. How does this happen?

It's group-think. What happens to critical thinkers? They leave. I thought for sure people like Tom Shimabukuro and John Su knew what they were doing, but they are clueless. They are just like my academic doctor friends: they truly believe that vaccines are safe and I'm nuts. Wow. Just wow. I still don't know (yet) how they can just brush off my point that they never point out the VAERS under-reporting factor during their presentations. However, it's true they really believe there is no corruption and no need to protect whistleblowers. Check out [this comment](#).

2. My Substack is blocked at the CDC. It is considered "unsafe."

You can't make this stuff up. You really can't.

A vaccine that has killed hundreds of thousands of Americans is "safe" and my Substack is "unsafe." Wow.

My leaker can't go public because she'd be attacked and marginalized by the press. The best way to crack this open is with a US Senator who will pursue this.

That Senator of course is Ron Johnson.

Based on what I'm seeing and in talking with other people, I think the best way to help him get re-elected is with the support of Democrats in Wisconsin.

So this is really important:

If you are reading this and you are a Democrat in Wisconsin, please [register here](#) if you are willing to help out. And even if you aren't a Democrat in Wisconsin, you can [register here](#) to register your skills. The more people registered, the better.

From what I know now, this may be the single best thing we can do.

If you work at the CDC, FDA, or NIH and want to chat...

I can always use additional sources inside the HHS agencies.

Use the [Contact Me form](#) and leave your protonmail account so I can talk to you anonymously without jeopardizing your identity.

My discussion with Lara Logan

The problem we face is getting any visibility in the mainstream press. I just got off the phone with former *60 Minutes* journalist Lara Logan. She cannot get any of her former friends to cover the Israeli safety story because it is counter-narrative. I asked, "*What reason do they give?*" She said it is a variety of "excuses" like "*too busy*," "*not in my area*," etc. The issue is the reporters actually believe the vaccines are safe and effective so they don't want to do anything that would create "*vaccine hesitancy*."

I asked her, *“So how do we crack this?”*

She said it is very very difficult. If it were easy, it would have been done long ago. For example, Andrew Wakefield had very damaging insider information from the CDC where the leaker was caught on tape, and it went nowhere.

In other news...

Today is the last day to join Dr. Henry Ealy's fight to get a Special Grand Jury to investigate Walensky, Becerra, and other individuals at these institutions. It takes about 15 seconds to sign the petition:

Here are some other things I learned recently

1. Hundreds of doctors are leaving Kaiser in disgust about what is going on. If you are a Kaiser doctor and are willing to talk to me off the record, please use the [Contact Me form](#).
2. Also heard from a nurse that other nurses “disappear” for long periods... She thinks these nurses are vaccine injured.
3. I heard that at Kaiser, they are now seeing new young patients with cancer at the rate of once a day. Before the vaccines, it was a few times a year.
4. Pilots on Southwest are NOT required to be vaccinated. They are giddy over this. Two of the pilots talked with one of our VSRF members today about all the health issues they’ve heard about from pilots at other airlines.

BILL GATES HIT WITH INDIAN HIGH COURT NOTICE OVER VACCINE DEATH

Billionaire Bill Gates has been issued with a notice from the Bombay High Court over a case that alleges the Microsoft co-founder is responsible for deaths related to COVID-19 vaccines.

This from slaynews.com.

The Hindustan Times reported:

A petition was filed in the court by a father who said the vaccine killed his daughter.

In relation to the case, the High Court also sent a notice to the Indian government (Maharashtra and Union government) and the biopharmaceuticals company Serum Institute of India (SII).

The petitioner, Dilip Lunawat, is seeking Rs 1,000 crore (\$125,451,200) compensation after his daughter, Dr. Snehal Lunawat, died after receiving the Covishield vaccine.

Mr. Lunawat blames the government, Bill Gates, and others responsible for spreading misleading information about the vaccine's safety.

Gates is accused of contributing to the government's mandates that forced medical professionals to get vaccinated.

The Bill and Melinda Gates Foundation also helped the Indian pharmaceutical company rush the vaccine into production.

Lunwat said:

[H]is daughter was compelled to take the anti-Covid vaccine at her college in Nashik on January 28 last year.

He said:

[S]he came under the category of health worker because she was a medical student.

Snehal was a doctor and a senior lecturer at SMBT dental college and hospital at Dhamangaon in Maharashtra

She was vaccinated with Covishield, which is developed by the SII.

Days later, she suffered severe headaches and vomiting and was rushed to a hospital.

The petition said:

Doctors found she was bleeding in her brain.

Lunwat says his daughter died as a result of side effects from the vaccine on March 1.

The petition relied on a report submitted by the Centre's Adverse Events Following Immunization (AEFI) committee on October 2.

The petitioner has also sought a response from Gates, whose organization—the Bill and Melinda Gates Foundation—had partnered with the SII to accelerate the process of manufacturing to deliver 100 million doses of the vaccine.

He also sought a response from the Union government, Maharashtra government, and the Drug Controller General of India.

According to the petition, Lunwat said:

[H]e is seeking justice for his daughter and many more people who are likely to be murdered due to similar cases of adverse effects.

On August 26, a division bench of Justices S V Gangapurwala and Madhav Jamdar issued a notice to all the respondents in the petition.

The case has been scheduled for a hearing on November 17.

Final thoughts: May many more similar lawsuits follow from throughout the world. And may Bill Gates be stripped of his wealth in conjunction with being prosecuted for crimes against humanity.

UPDATE

HHS Proposes Rule
Prohibiting Discrimination
in Healthcare - Just Not
Against the Unvaccinated.
Make Your Voice Heard
Today by Submitting a
Comment.

On August 2, 2022, the Department of Health and Human Services (HHS) [published](#) a proposed wide-ranging rule in the [Federal Register](#) addressing “non-discrimination” in healthcare. The rule, among other things, broadens the

range of healthcare providers subject to non-discrimination provisions.

The rule specifically prohibits discrimination on the basis of *“race, color, national origin, sex, age, or disability in certain health programs and activities.”* Notably absent from the rule is any prohibition on discrimination against patients based on their medical choices, in particular their refusal to modify their immune system through vaccination, even though this type of discrimination is pervasive throughout the country.

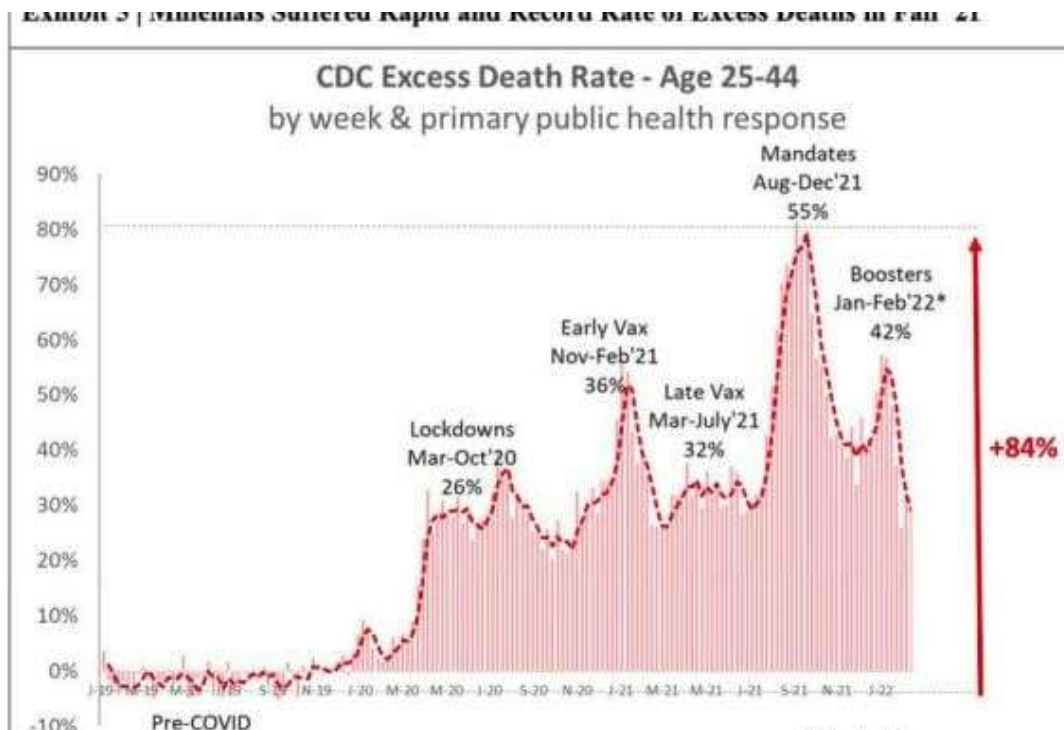

This insidious type of discrimination often affects the most vulnerable, as it frequently occurs in pediatric healthcare settings where physicians kick babies and toddlers out of their practice because their parents refuse to modify their immune systems with pharmaceutical products.

ICAN encourages you to make your voice heard on this widespread form of discrimination by [submitting a comment](#) on the proposed rule. Comments are due by October 3, 2022, so don't miss this important opportunity. Share your firsthand stories of any discrimination you or your loved ones have experienced by medical professionals.

Adults Aged 35–44 Died At Twice The Expected Rate Last Summer, Life Insurance Data Suggests [September 12, 2022 Epoch Times via ZeroHedge 1](#)

Death claims for working-age adults under group life insurance policies spiked well beyond expected levels last summer and fall, according to data from 20 of the top 21 life insurance companies in the United States. Death claims for adults aged 35 to 44 were 100% higher than expected in July, August, and September 2021, according to a report by the Society of Actuaries, which analyzed 2.3 million death claims submitted to life insurance firms. During the third quarter of last year, deaths in the 25-to-34 age bracket were 78% above the expected level and, for people aged 45 to 54, 80% higher than expected. Excess mortality was 53% above the baseline for adults aged 55 to 64. Most of the life insurance companies listed COVID-19 as the cause of death if it was listed anywhere on the death certificate, without doing any investigation into the true cause of death.

Hedge fund manager Edward Dowd pointed out that excess deaths peaked around the time the Biden administration mandated COVID-19 vaccines and companies rushed to comply. As of August 31, 2022, about 90% of Americans 18 or older had gotten at least the first dose of one of the COVID-19 vaccines, and 77% had gotten both a first and a second dose.

Death claims for working-age adults under group life insurance policies spiked well beyond expected levels last summer and fall, according to data from 20 of the top 21 life insurance companies in the United States.

Death claims for adults aged 35 to 44 were 100 percent higher than expected in July, August, and September 2021, according to a report by the Society of Actuaries, which analyzed 2.3 million death claims submitted to life insurance firms.

The [report](#) looked at death claims filed under group life insurance policies during the 24 months of the COVID-19 pandemic, from April 2020 to March 2022. The researchers used data from the three years before the pandemic to set a baseline for the expected deaths.

While COVID-19 played some role in the majority of the excess deaths for adults over the age of 34 during the two pandemic years, the opposite was true for younger people. For people 34 and younger, the number of excess non-COVID deaths was higher than those related to COVID, the data show.

During the third quarter of last year, deaths in the 25-to-34 age bracket were 78 percent above the expected level and, for people aged 45 to 54, 80 percent higher than expected. Excess [mortality](#) was 53 percent above the baseline for adults aged 55 to 64.

The Society of Actuaries (SOA) asked all 20 of the participating life insurance companies how they determine the cause of death for the purpose of recording claims. Of the 18 that responded, 17 said they list COVID-19 as the cause of death if it's listed anywhere on the death certificate, while eight of the 18 said they go further and communicate with relatives and the medical examiner and look at other sources to try to determine the true cause of death.

One life insurance company stated that it recorded COVID-19 as the cause of death only when it could be determined to be the primary cause of death on a death certificate.

The report also notes that white-collar workers had the highest number of excess deaths during the two years studied. The group, which includes accountants, lawyers, computer programmers, and most other jobs done in an office setting, had 23 percent more deaths than expected.

The sharp increase of deaths among working-age people was first brought to light by Scott Davison, CEO of the Indianapolis-based life insurance company OneAmerica, who said in a virtual press conference on Dec. 30, 2021, that his company and the life insurance industry as a whole was seeing a 40 percent increase in deaths among people ages 18 to 64.

Davison said at the time that this represented the highest death rates in the history of the life insurance business, and that an increase in mortality of just 10 percent would constitute a "three-sigma" event, a once-in-200-year catastrophe.

OneAmerica is one of the 20 companies that contributed data for the SOA report. The others include Aflac, Anthem, The Hartford, Lincoln Financial Group, MetLife, New York Life, and Principal Financial.

[Edward Dowd](#), a hedge fund manager who has been studying excess mortality for the past several months and has an upcoming book on the topic, [Cause Unknown](#), says the rate of deaths among young people is alarming. He pointed out that excess deaths peaked around the time the Biden administration mandated COVID-19 vaccines and companies rushed to comply.

"Temporally, in that three-month period, the change was such that, there was something that occurred," he said. "Well, we all know what occurred in August, September, and October. It was Biden's mandates on Sept. 9, and a lot of corporations anticipating those mandates."

President Joe Biden on Sept. 9, 2021, mandated COVID-19 vaccines for federal employees and health care workers in facilities certified by Medicare and Medicaid. The same day, the president tasked the Occupational Safety and Health Administration (OSHA) with implementing a nationwide vaccine mandate on private businesses with 100 or more employees.

The U.S. Supreme Court struck down the OSHA mandate in January but allowed the mandate for health care workers to remain in place.

The campaign to vaccinate the majority of the population against COVID-19 is the largest vaccination campaign in the history of the world.

As of Aug. 31, about 90 percent of Americans 18 or older had gotten at least the first dose of one of the COVID-19 vaccines, and 77 percent had gotten both a first and a second dose.

Dr. Robert Malone, a physician and research scientist credited with the invention of the mRNA technology for use in vaccines, says excess mortality must always be studied to determine whether a vaccine or medicine really is safe.

“Excess mortality should be a signal, a trigger,” he told The Epoch Times. “When we see excess mortality like that—basically if you’re running a clinical trial and you see this kind of excess mortality, you stop the trial. And you investigate the cause before you proceed. And if you’re marketing a drug, generally, with this kind of data, you stop the distribution of the drug until you have sorted it out.”

FDA gives green light to COVID-19 booster shots from Moderna, Pfizer CRIMINAL ACTIONS FURTHER PROOF THE GOVERNMENT WANTS YOU DEAD

by: [Sara Middleton, staff writer](#) | September 12, 2022

([NaturalHealth365](#)) As predicted, the U.S. Food and Drug Administration (FDA) recently made a [major announcement](#) regarding the latest iteration of mRNA COVID shots from pharmaceutical companies Pfizer and Moderna.

This announcement comes right on the heels of a similar decision by the United Kingdom's Medicines and Healthcare products Regulatory Agency (MHRA) – the decision to go ahead and authorize Moderna's so-called "bivalent" COVID booster.

Despite lack of adequate clinical trial data, FDA grants emergency use authorization for “updated boosters” from Pfizer, Moderna

On August 31, 2022, the FDA officially granted emergency use authorization (EUA) to newly updated versions of the gene-based COVID jabs from Pfizer and Moderna. “The bivalent vaccines, which we will also refer to as ‘updated boosters,’” the FDA explains, “contain two messenger RNA (mRNA) components of [SARS-CoV-2 virus](#), one of the original strain of SARS-CoV-2 and the other one in common between the BA.4 and BA.5 lineages of the [omicron variant](#) of SARS-CoV-2.” Pfizer’s bivalent version is authorized for use “as a single booster dose in individuals 12 years of age and older,” and Moderna’s is authorized for use “as a single booster dose in individuals 18 years of age and older.”

A bit strange to hear the government talking about us still being in an “emergency,” isn’t it? After all, the U.S. Centers for Disease Control and Prevention (CDC) recently relaxed its pandemic response rules, shifting toward a greater emphasis on individual decision-making – in fact, “unvaccinated people now have the same guidance as vaccinated people,” summarized NPR.

Pfizer’s and Moderna’s greenlight from the FDA also comes despite doubts over the true effectiveness of these “updated boosters,” as well as the lack of adequate human trial data used to come to this conclusion.

Incredibly, within days of this announcement from the FDA, the White House came out with breaking news of its own – the need for, you guessed it, annual jabs.

Americans should prepare for endless booster shots, as predicted

On September 6, 2022, Dr. Anthony Fauci – outgoing head of the National Institute of Allergy and Infectious Diseases (NIAID) and Chief Medical Advisor to U.S. President Biden – admitted in a White House press briefing that the gene-based COVID jabs will become an “annual” affair for Americans.

“In the absence of dramatically different variants,” Fauci says, “we likely are moving towards a path with a vaccination cadence similar to that of the annual influenza vaccine, with annual updated COVID-19 shots matched to the currently circulating strains for most of the population.”

White House Covid-19 Response Coordinator Dr. Ashish Jha also spoke at the briefing, where he casually dropped an incredible admission: *“For the first time since December of 2020, these vaccines, our vaccines, have caught up with the virus.”*

December 2020, you’ll remember, was the *very first time* that these COVID shots were given to Americans outside of clinical trials. In other words, Dr. Jha seems to acknowledge that the heavily propagandized shots worked, *at best*, only within the first few weeks of the massive rollout ... yet another reason to call into question the so-called “safety and efficacy” of the third or more doses.

By the way, if the idea of annual COVID shots sounds familiar to you, it could be because plenty of individuals predicted that this is *exactly* the course that the COVID shot fiasco would take – a prediction that was met with backlash and downplaying earlier in the pandemic.

In light of this news, it's hard not to wonder: of all the individuals who used shame, guilt, and coercion to strong-arm others into taking COVID shots – from social media influencers to celebrities, politicians to executive leaders – how many of them will still dutifully take these booster shots year after year? If any previously vaxxed individual decides at some point that they want to defer or decline another dose, do you think they have the self-awareness to recognize the utter hypocrisy of their private medical decision?

The likelihood that many previously vaxxed individuals will opt out of future shots isn't low, by the way. Current CDC data shows that while 2 in 3 eligible Americans are double-jabbed, only 1 in 3 have received a recommended booster dose (a relevant statistic: the CDC says only half of eligible Americans got their annual flu shot during the 2020-2021 season). And yet here we are, watching our government push for even *more* booster doses as we head into the fall and winter months.

URGENT: CDC is now warning of a coming stealth variant, now emerging; you would have zero symptoms, you also test negative, you look & feel healthy & normal, yet you are likely infected, so ISOLATE & lockdowns, business closures, & school closures would continue due to possible asymptomatic spread they cannot verify until they get the transmission under control; CDC advises more details to come.

PSYOP-22 looks to now be in play. PSYOP-CLIMATE-CHANGE on deck.

by [Dr. Paul Alexander](#)

Beware and do not be confused, remain calm, you will test negative 100% of the time and have zero symptoms, and will feel very fine and you would test negative on multiple repeated tests, yet CDC and NIH indicates that you are still to consider yourself as likely infected and you must isolate and lockdown and shield away, with triple masks. Dr. Fauci of NIAID has indicated that double masks are being discouraged and will not do the trick with this variant. You must wear the mask indoors at all times and when outdoors also even if there is no one around you for 5 miles. Only above 5 miles radius should you consider removing the mask outdoors. A face shield with protective gloves will add an additional layer of protection as per Dr. Fauci until transmission is mitigated.

CDC and the NIH are collaboratively and urgently bringing it to our attention for action!

You are now likely saying WTF? And you would be right. But this is the inanity we lived through for 2.5 years. This is why we locked the world down.

Scientists Have Recreated World's Deadliest Flu Virus

Analysis by [Dr. Joseph Mercola](#) Fact Checked
September 08, 2022

STORY AT-A-GLANCE

- **Scientists in the U.S. and Canada have resurrected the Spanish flu virus through reverse genetics. Not surprisingly, the National Institutes of Health (NIH) and Dr. Anthony Fauci's National Institute of Allergy and Infectious Diseases (NIAID) are involved**
- **The scientists appear frustrated by the fact that their reverse engineered Spanish flu virus — even at the highest doses tested — was not lethal enough to kill the macaque species selected for the experiment. They argue we need to make a more dangerous version of the Spanish flu to be able to make better vaccines for it. This despite the fact that, until they resurrected it, it no longer existed in nature**
- **The argument that we need to create dangerous viruses “just in case” Nature comes up with something similar, so we can create vaccines for said viruses in advance, simply doesn't hold water. This is science gone mad, and it must be stopped**
- **Evidence points to SARS-CoV-2 being the product of gain-of-function research, and a number of U.S. institutions need to come clean about their work, including the EcoHealth Alliance (EHA), the University of North Carolina (UNC), the University of California at Davis (UCD), the NIH and the U.S. Agency for International Development (USAID)**
- **All of these agencies and institutions have conducted and/or collaborated on research that may be able to solve the mystery of where SARS-CoV-2 came from. But instead of transparently sharing their data, they've merely declared that they've “not been involved in any experiments that could have resulted in the emergence of SARS-CoV-2.” Blanket denials are no longer enough. They must produce the data for independent review and analysis**

Evidence points to SARS-CoV-2 being the product of gain-of-function (GoF) research. Indeed, attorney Tom Renz will soon release the results of a major legal investigation, which he claims will demonstrate — beyond a reasonable doubt — that SARS-CoV-2 was created as part of a GoF project.¹

Whether the outbreak was accidental, intentional or the result of negligence, the end result is the same — devastation of health, commerce, finance and civil life worldwide for years on end.

Now imagine what might happen if something like the Spanish flu got out — or worse, a turbo-charged, genetically engineered version of it. Incomprehensible as it may seem to the average person, scientists in the U.S. and Canada have resurrected this devastatingly lethal virus and, not surprisingly, the National Institutes of Health (NIH) and Dr. Anthony Fauci's National Institute of Allergy and Infectious Diseases (NIAID) are involved.

Mad Scientists Are Testing Recreated Spanish Flu on Monkeys
As reported by Renz, August 19, 2022:

"... this is so absurd that I am just starting with the reference document because I am concerned no one will believe it. Here it is: '[Spanish Flu GoF](#)'.³ Yes, that is right, Fauci and crew are now actively performing gain-of-function (GoF) work and infecting primates with the Spanish Flu ... Here is a quote from the document: '... Influenza virus A/South Carolina/1918 (H1N1) was generated by reverse genetics and handled in biosafety level 4 (BSL-4) containment at the National Microbiology Laboratory (NML).

Sequences of the 1918 influenza viral segments were based on data reported under GenBank accession numbers DQ208309, DQ208310, DQ208311, AF117241, AY744935, AF250356, AY130766, and AF333238.

1918 influenza virus was cultured using Madin-Darby canine kidney ... cells. MDCK cells were grown in minimum essential medium ... supplemented with 5% fetal bovine serum ... and 1 L-glutamine ...

A passage 2 (P2) virus stock was prepared using MEM supplemented with 0.1% bovine serum albumin (BSA) ... 1 L-glutamine, and 1 mg/mL N-tosyl-L-phenylalanine chloromethyl ketone (TPCK)-treated trypsin ...

This stock was used for animal inoculation. The mouse 50% lethal dose (MLD50) for this stock was determined previously to be 103.2 PFU; this value was confirmed prior to the use of the stock for macaque infection.'

I frankly do not care to debate the nuance of whether the recreation of generally extinct virus 'generated by reverse genetics' using pieces and parts of other animals qualifies as GoF; what I care about is that we have recreated the Spanish Flu and are experimenting with it on other animals."

Spanish Flu 'Not Lethal Enough'

As noted by Renz, the scientists appear frustrated by the fact that their reverse engineered Spanish flu virus — even at the highest doses tested — was not lethal enough to kill the two macaque species selected for the experiment.

Macaques were therefore deemed "not ideal for the development and testing of novel pandemic influenza-specific vaccines and therapies," necessitating "other physiologically relevant nonhuman primate models." Renz continues:⁴

"... given the result of the previous coronavirus GoF, can ANYONE possibly argue GoF work on the Spanish Flu is a good idea? Even the simple recreation of the disease demonstrates an incredible lack of respect for the disaster created by the coronavirus GoF.

So you may be asking, what moron could possibly be oblivious enough to support GoF work on the Spanish Flu while the world is still dealing with the nightmare that is COVID? The answer should not be surprising ... NIH and NIAID are involved.

Apparently Fauci does not mind what he did with funding the creation of COVID and is at it again. You might also note the vaccine development crew's involvement. A foundational point in this article is that the newly recreated Spanish Flu is not dangerous enough. Here is a pull-quote:

'However, 1918 influenza was uniformly nonlethal in these two species, demonstrating that this isolate is insufficiently pathogenic in rhesus and Mauritian cynomolgus macaques to support testing novel prophylactic influenza approaches where protection from severe disease combined with a lethal outcome is desired as a highly stringent indication of vaccine efficacy.'

This means that these people are arguing that we need to make a more dangerous version of the Spanish Flu so they can make 'better' vaccines for it ... despite the fact that until they recreated it, it likely no longer existed in nature."

As noted by Renz, elected officials really need to answer the question, "Why is this kind of research allowed to continue on your watch?" Why are we reverse engineering the most lethal viruses the world has ever seen — after they've already been eradicated?

The argument that we need to create dangerous viruses "just in case" Nature comes up with something similar, so we can create vaccines for said viruses in advance, simply doesn't hold water. Stop creating these monstrosities, and we won't need the vaccines! This is science gone mad, and it must be stopped.

Besides, what are the chances that a virus would emerge naturally that just so happens to perfectly match the virus we now have a vaccine against? The entire premise is irrational from start to finish. It's biowarfare research and nothing else.

The Intentional Cover-Up of SARS-CoV-2's Origin

Fauci, former NIH chief Dr. Francis Collins, EcoHealth Alliance president Peter Daszak and other members of the scientific community have spent the last two and a half years actively stifling debate about the genesis of SARS-CoV-2.

And, coincidentally, most of them have clear-cut connections to bat coronavirus GoF research and/or the Wuhan Institute of Virology (WIV), which appears to be the lab from which the virus somehow escaped.

So, it appears those who insist SARS-CoV-2 is of natural origin, despite all the evidence to the contrary, are doing so because they don't want risky virological research to be blamed for the COVID pandemic. That would *"blow their cover"* and raise questions about the sanity of funding such research.

Some may be so enamored with their chosen careers, they cannot imagine doing anything other than tinkering with pathogens. For them, pulled funding is a threat to their livelihood. But for others, the underlying incentive may be more nefarious. Like I already said, there's really no reason for this kind of research other than the creation of weapons of mass destruction.

Whatever incentive any given player may have had, what's clear is that Fauci, Collins, Daszak and many others intentionally undermined efforts to get to the bottom of where SARS-CoV-2 came from.

Corrupted Science

[Video Link](#)

Attesting to this corruption of science is Jeffrey Sachs, Ph.D., professor of economy at Columbia University, a senior United Nations adviser and chair of The Lancet COVID-19 Commission, convened in June 2020.

Sachs originally assigned Daszak to lead and organize the COVID-19 Commission's task force to investigate the virus's genesis (one of 11 task forces under the COVID Commission). Sachs ended up dismissing Daszak from the task force in June 2021, after he realized just how serious Daszak's conflicts of interest were,⁵ and that Daszak was lying to him.⁶

Eventually, he realized Daszak wasn't the only rotten apple in the bunch. Other members of The Lancet Commission's COVID Origins task force were also working against their mandate to investigate the pandemic's origin. The final straw came when Sachs sacked Daszak and several task force members suddenly attacked him for being *"antiscience."*

Shortly thereafter, a Freedom of Information Act (FOIA) request brought previously hidden NIH documents to light, and Sachs realized that those who

were attacking him also had undisclosed ties that made their ability to get to the truth doubtful at best. At that point, in September 2021, he disbanded the whole task force.

Lack of Transparency Breeds Mistrust

In mid-May 2022, Sachs published a frank opinion piece in the journal PNAS,⁷ together with Neil Harrison, calling for a truly independent inquiry into the origin of SARS-CoV-2.

Much may be gleaned from information found in U.S.-based research institutions that were working with Wuhan-based institutions, including the WIV. Yet such material has not been disclosed for independent analysis.

In their article, Sachs and Harrison argued that while transparency on the part of Chinese authorities would be "enormously helpful," much may be gleaned from information found in U.S.-based research institutions that were working with Wuhan-based institutions, including the WIV. Yet such material has not been disclosed for independent analysis. Here's an excerpt:⁸

"This lack of an independent and transparent US-based scientific investigation has had four highly adverse consequences. First, public trust in the ability of US scientific institutions to govern the activities of US science in a responsible manner has been shaken.

Second, the investigation of the origin of SARS-CoV-2 has become politicized within the US Congress; as a result, the inception of an independent and transparent investigation has been obstructed and delayed.

Third, US researchers with deep knowledge of the possibilities of a laboratory-associated incident have not been enabled to share their expertise effectively. Fourth, the failure of NIH, one of the main funders of the US–China collaborative work, to facilitate the investigation into the origins of SARS-CoV-2 has fostered distrust regarding US biodefense research activities.

Much of the work on SARS-like CoVs performed in Wuhan was part of an active and highly collaborative US–China scientific research program funded by the US Government (NIH, Defense Threat Reduction Agency [DTRA], and US Agency for International Development [USAID]), coordinated by researchers at EcoHealth Alliance (EHA), but involving researchers at several other US institutions.

For this reason, it is important that US institutions be transparent about any knowledge of the detailed activities that were underway in Wuhan and in the United States. The evidence may also suggest that research institutions in other countries were involved, and those too should be asked to submit relevant information ..."

Sachs and Harrison go on to name a number of U.S. institutions that need to come clean about their work, including the EcoHealth Alliance (EHA), the University of North Carolina (UNC), the University of California at Davis (UCD), the NIH, NIAID and the U.S. Agency for International Development (USAID).

All of these agencies and institutions have conducted and/or collaborated on research that may be able to solve the mystery, but instead of transparently sharing their data, they've merely declared that they've "not been involved in any experiments that could have resulted in the emergence of SARS-CoV-2."

Blanket Denials Are Not Good Enough

As noted by Sachs, before we can believe such claims, we need to be able to confirm their veracity, and that requires independent analysis of all the data.

"Blanket denials from the NIH are no longer good enough. Although the NIH and USAID have strenuously resisted full disclosure of the details of the EHA-WIV-UNC work program, several documents leaked to the public or released through the Freedom of Information Act (FOIA) have raised concerns," Sachs and Harrison wrote.⁹

"These research proposals make clear that the EHA-WIV-UNC collaboration was involved in the collection of a large number of so-far undocumented SARS-like viruses and was engaged in their manipulation within biological safety level (BSL)-2 and BSL-3 laboratory facilities, raising concerns that an airborne virus might have infected a laboratory worker.

A variety of scenarios have been discussed by others, including an infection that involved a natural virus collected from the field or perhaps an engineered virus manipulated in one of the laboratories."

Suspicious 'Coincidences' Abound

Sachs and Harrison go on to discuss the problem of an unusual furin cleavage site (FCS) in SARS-CoV-2 that makes it more transmissible and pathogenic than related viruses.

While it's not yet known how this feature came to be within SARS-CoV-2, whether by natural evolution or intentional insertion, "We do know that the insertion of such FCS sequences into SARS-like viruses was a specific goal of work proposed by the EHA-WIV-UNC partnership within a 2018 grant proposal ('DEFUSE') that was submitted to the U.S. Defense Advanced Research Projects Agency (DARPA)," Sachs wrote.

That particular DARPA proposal was never funded, but as noted by Sachs, *"we do not know whether some of the proposed work was subsequently carried out in 2018 or 2019, perhaps using another source of funding."*

"Information now held by the research team headed by EHA, as well as the communications of that research team with US research funding agencies, including NIH, USAID, DARPA, DTRA, and the Department of Homeland Security, could shed considerable light on the experiments undertaken by the US-funded research team and on the possible relationship, if any, between those experiments and the emergence of SARS-CoV-2," Sachs and Harrison wrote.¹⁰

"We do not assert that laboratory manipulation was involved in the emergence of SARS-CoV-2, although it is apparent that it could have been. However, we do assert that there has been no independent and transparent scientific scrutiny to date of the full scope of the US-based evidence."

In an August 2, 2022, Current Affairs interview,¹¹ Sachs again reiterated that he believes the NIH and allied scientists colluded to impede The Lancet Commission's investigation, for the simple reason that the virus was the result of U.S. research.

Indeed, aside from what Sachs brought up in his PNAS article, there are patents spanning decades to suggest that's true (see "[Patents Prove SARS-CoV-2 Is a Manufactured Virus](#)").

Sachs also opened up about his concerns and misgivings in an August 20, 2022, interview with Robert F. Kennedy Jr. (video above). He admits believing in the zoonotic spillover theory early on, only to, over time, come to change his mind as he realized he was being lied to, over and over again.

Today, he believes the lab-leak theory is the most likely explanation for the pandemic — and that the U.S. government, the NIH, the NIAID and the rest are suppressing the truth for the simple reason that they're responsible for its creation, even if only in part.

Final Thoughts

To circle back to where we started, is it really prudent to reverse engineer the Spanish flu virus, and further tinker with it to make it even more lethal — all in the name of vaccine development?

Think back over the past few years. Mull over the deaths — an estimated 18 million from COVID-19 alone — the suicides (deaths of despair), the lost businesses, lost education years, the loss of freedoms and Constitutional rights, the COVID job injuries, and the massive wealth transfer that has occurred.

All of that may have been because of this kind of mad science. Do we really want to repeat it in the future, but with a far more lethal pathogen? Most sane persons would say no. It's time for legislators to take definitive steps to ensure mankind is not wiped out by scientific hubris.

Pfizer rakes in massive profits thanks to its risky mRNA COVID shots

by: [Sara Middleton, staff writer](#) | September 5, 2022

([NaturalHealth365](#)) Want to make money during the pandemic? Apparently, all you have to do is get on the good side of U.S. public health officials and churn out a brand new drug that will be heavily propagandized by the government and effectively coerced onto the American public. **In a separate news headline, Pfizer said it has made \$54 billion profit on its Vax program. Blood Money would be a more accurate term for its profits!**

In all seriousness, when looking at recent [pharmaceutical company profit](#) projections, there's no question that making medication is good business ... at least for Big Pharma stakeholders.

Pfizer DOUBLES its revenue thanks to mRNA COVID shot!

At a time when thousands of small businesses in America are experiencing “significant” financial hardships due to the pandemic – over 40% of small businesses (out of 5,800 total surveyed) in one July 2020 study published in *Proceedings of the National Academy of Sciences* faced temporary closure because of COVID-19 – major pharmaceutical companies are enjoying record profits, and often at the expense of the thousands upon thousands of citizens harmed by their novel gene-based drugs.

According to Children's Health Defense, COVID shot maker Pfizer enjoyed a cool \$81.3 billion in revenue in 2021, about double what it earned in 2020. Of those billions, nearly half (about 45 percent) came directly from its mRNA COVID jab).

This is not to suggest that there is anything unethical *per se* about a company turning a profit. But consider the situation that Pfizer finds itself in: positioned as the drug of choice for the pandemic, with contracts that guarantee the company gets paid while being absolved of any and all liability for injuries and deaths caused by its drug.

Meanwhile, the Biden Administration ordered another 105 million doses of Pfizer's COVID shots at the end of June 2022 – to the tune of \$3.2 billion worth of taxpayers' money – despite having thrown away more than 82 million expired doses of [COVID jabs](#) as of mid-May.

According to the U.S. Department of Health and Human Services, *“The contract announcement follows a June 28 meeting of the U.S. Food and Drug Administration's (FDA's) Vaccines and Related Biological Products Advisory Committee meeting, which recommended the inclusion of an Omicron component for COVID-19 booster vaccines in the U.S.”*

News flash: viruses evolve. This is certainly the justification they use for issuing new flu shots every year. Can we expect to see a future of updated mRNA COVID shots year after year, too? Will healthcare workers and other citizens be forced

to inject themselves again and again with these drugs simply to put food on their families' tables?

In its June 29 press release announcing the ordering of 105 million extra COVID doses, HHS Secretary Xavier Becerra is quoted as saying that "Vaccines have been a game-changer in our fight against COVID-19, allowing people to return to normal activities knowing that vaccines protect from severe illness." Notice the sneaky implication of that statement: that the majority of Americans would face serious illness from COVID-19 unless vaxxed. But this is simply *not true* for virtually all age groups, and COVID-19 remains a highly survivable illness for the majority of people who contract it (about 98.2%, to be exact, according to a "fact-checking" article by AP News), and thank goodness for that.

Also note: despite using taxpayer dollars to order another 105 million doses ("with options for up to 300 million doses," according to HHS), there is absolutely NO mention of the shots stopping SARS-CoV-2 transmission. Remember when we were told that these jabs WOULD stop transmission? Interesting how that's no longer a talking point and that pro-vaxxers will claim that it was "never" about stopping transmission in the first place...

Cash cows: Here are other top-selling drugs making Big Pharma folks rich. The mRNA COVID shot from Pfizer is certainly set to be among the most profitable drugs of all time. But, just so you know, here are ten of the bestselling drugs earning Pharma companies billions upon billions of dollars:

1. Humira (Adalimumab) for rheumatic diseases and inflammatory bowel diseases
2. Eliquis (Apixaban) for blood clots
3. Revlimid (Lenalidomide) for multiple myeloma
4. Keytruda (Pembrolizumab) for cancer chemotherapy
5. Enbrel (Etanercept) for rheumatic diseases
6. Herceptin (Trastuzumab) for breast cancer chemotherapy
7. Eylea (Aflibercept) for wet macular degeneration
8. Opdivo (Nivolumab) for cancer chemotherapy
9. Avastin (Bevacizumab) for cancer chemotherapy
10. Rituxin (Rituximab) for rheumatic diseases and cancer chemotherapy

Notice these drugs are largely used to treat diseases that are shown to have lifestyle-related risk factors. Now just imagine if we took even a fraction of those Pharma profits and used them to incentivize people to exercise more, quit smoking, or make healthier food choices (think: free gym memberships, farmer's market food vouchers, healthcare premium discounts, etc.)

The Worst Is Yet To Come as Death and False Flag Threats Are Planned by the State

“At some point, the governing criminals will come after all those not willing to be injected, and will make living very difficult for all of us... This could become a very dangerous country in a short amount of time for people demanding freedom. Our whole practical government is grounded in mob psychology and the Boobus Americanus will follow any command that promises to make him safer.”

The final push toward a totalitarian state is upon us, and an all-out assault on society seems imminent.

With most of the population still going along with these scams, still obeying every order, and still unable to muster any courage..., what are those of us that are informed and willing to defy ‘authority’ to do?

What is coming will be a combination of extreme propaganda, fear-mongering, false flag attacks, fake ‘virus’ attacks, a deadly flu season due to ‘vaccination,’ more ‘vaccine’ mandates, and power and water grid shutdowns, creating an environment to allow for full or partial martial law.

This will set the stage to reinstate lockdowns, quarantines, and isolation, to advance bogus ‘climate change’ agendas, and to create a regulatory climate so restrictive as to mirror that of a total dictatorial state.

First and foremost, the ‘variant’ threat will be easily advanced because many more will likely die this fall and winter... due to widespread immune system failures because of...millions of poisonous injections...

Deaths... will still be blamed on a ‘virus’ or ‘variant’ that does not exist, and this tactic will allow the purposeful spreading of extreme fear.

This government... will then go after the children by planned injection of the toxic ‘Covid vaccine throughout the ... indoctrination centers called ‘public’ schools. This will begin with children 12 and older, and... will be targeting every child down to babies and infants with this deadly concoction.

With more death and sickness, new and more severe lockdowns will be attempted...

This plot will be enhanced due to planned cyber attacks that are ‘expected’ to shut down power and water grids across the nation. These so-called attacks will certainly be false flag terror against the masses, and could easily cause civil unrest, violence, and extreme aggression by the state in response to any dissent.

As the year progresses, more division will occur in an us-versus-them situation, pitting ‘vaccinated’ against those unvaccinated. ...

At some point, the governing criminals will come after all those not willing to be injected, and will make living very difficult for all of us...

Don't forget about the fictitious manmade 'climate change' agenda, as it looks like the drive toward radical policy decisions based on climate are already in the works.

Every single government of the westernized world in 2022

This is very troubling, as it adds another dangerous level of tyranny to a society already consumed by dictatorial madness. It could easily be used to force more quarantines, travel bans, and allocation of utility services, that are all virtually controlled by this government and its partners.

What comes with this agenda is mass restriction of life-giving water and power, the decimation of food production and distribution, supply line shutdowns, and unstoppable runaway inflation, especially concerning the most vital needs of this

citizenry. When food becomes so scarce that many are starving, total chaos will ensue.

Economically speaking, any or all of these things happening will disrupt all economic activity for the masses, but will be used by the claimed 'elite' ruling class to continue to steal the wealth from all of you, just as has happened over the past year and a half.

This has been the biggest wealth transfer in history, and it is not over yet. The powerful that are destroying the lives of billions, are continuing to live like kings while claiming ownership of all money and property. The goal of course, is for you to own nothing and be happy about it.

CONCLUSION

...The more that refuse to accept this totalitarian domination, the better, as time has run out, but if a very large number of excess deaths occur this fall and winter as I expect, the wheels of tyranny will turn faster and faster in an attempt to finish this long-planned coup to capture and control the bodies and minds of humanity.

At that point, we will have already lost, especially those living in the highest population areas such as cities.

I realize all this sounds far-fetched to most, but then most have no idea of what is coming. We are not in Kansas anymore.

Are the COVID-19 mRNA jabs Causing a Cancer Epidemic?

by: Sara Middleton, staff writer | September 8, 2022

[NaturalHealth365](#)) Could different types of cancer be future side effects of these heavily propagandized COVID-19 injections? Are we about to see a wave of new cancer diagnoses within the next decade?

We recently discussed how some doctors believe rising cancer rates could be linked to gene-based COVID jabs. Now, [a new analysis](#) published by The Daily Exposé offers yet another perspective on this concerning trend.

Do COVID injections cause cancer? This data analysis offers compelling and concerning evidence.

A simple way to think about cancer is *"cell growth gone out of control."* DNA damage, which occurs due to the cumulative effects of everything from aging to stress to unhealthy lifestyle choices, is a key trigger of this uncontrolled cellular growth. And one of the most valuable ways our bodies can *prevent* this DNA damage is through a mechanism known as the homologous recombination DNA repair pathway. Here's why this has profound implications for COVID jabs and [cancer](#):

It has been shown recently that the SARS-CoV-2 spike protein effectively destroys this DNA repair process in white blood cells known as lymphocytes. *“The viral spike protein was so toxic to this pathway that it knocked 90% of it out,”* Joel Smalley of The Exposé writes, adding that the entire spike protein found in the body after a natural infection is unlikely to get into a cell nucleus and hang around long enough to cause cancer.

“Unfortunately,” he continues (emphasis his), *“the experimental mRNA toxshot induces [spike protein](#) to be produced ... in and around the cell nucleus and is produced for at least 60 days and almost certainly longer,”* citing multiple scientific sources in his claim, including a 2021 study from Sweden by authors Hui Jiang and Ya-Fang Mei.

It is important to note that the Mei and Jiang study has *since been retracted* due to so-called spurious *“expressions of concern.”* But despite this retraction (which was allegedly spearheaded by individuals with obvious conflicts of interest, such as an association with the National Institutes of Health, a major funder of Moderna), Smalley claims that *“the [vax-induced] spike protein circulating in large quantities, in the direct vicinity of the cell nucleus, for elongated periods of time, still has the potential to induce cancer in [ovary, pancreas, breast, prostate, and lymph node] cells. These cancers can take years to develop, and so it’s possible that we don’t see much of a safety signal for 5 or 10 years.”*

As for the common counterclaim from mainstream vax advocates who say that the vax-induced spike protein *doesn’t* get into the cell nucleus, Smalley says mRNA creators submitted pictures of spike proteins getting into cell nuclei “as part of their emergency use application,” so the claim doesn’t seem to hold weight.

Jabbed or not, you can protect your health by knowing these early warning signs of cancer.

Let’s be clear (and *not* alarmist): you can’t tell from signs and symptoms alone whether you have cancer. Indeed, many of the following cancer signs and symptoms can also be caused by other conditions, including conditions that are far less serious.

That said, you should consult with a trusted healthcare provider if you notice any of the following issues in yourself or a loved one, as they can be early warning signs of cancer, according to the American Cancer Society:

- Extreme fatigue, lethargy, and/or tiredness that doesn’t get better with rest
- A recent unintentional weight gain or loss of at least 10 pounds without a known reason
- Difficulty eating or swallowing, or an unexplained lack of appetite

- Persistent abdominal bloating, nausea, and/or vomiting
- Lumps and swelling anywhere in the body
- New, unexplained pain, especially if this pain persists or gets worse
- Changes in the skin, including scaly rashes, new or changing moles, sores that don't heal, or yellow discoloration of the skin and even whites of the eyes (jaundice)
- A persistent cough or hoarseness to the voice
- Sores, bleeding, and/or pain or altered sensations in the mouth
- Unusual bleeding or bruising
- Unexplained changes in bowel and bladder function, including unusual-looking stool, persistent constipation or diarrhea, blood in the urine or stool, pain while passing urine or stool, and new urgency or frequency
- Night sweats and fever
- Vision and/or hearing problems
- Headaches

In addition to being aware of any unusual signs and symptoms – and never feeling “bad” or worried about “*overreacting*” by talking to a trusted doctor about these symptoms – it may also help to be aware of your individual cancer risk factors. These include family history and environmental factors such as diet, weight, toxin exposure, and smoking history.

As with most health conditions, the earlier you get an accurate diagnosis, then the better your chances of a good outcome, at least in most cases. So, don't be afraid of what you don't know, and trust that you can take responsibility for your health by taking a proactive approach to your well-being.

Warning: Gates-Funded Factory Breeds 30 Million Mosquitoes A Week For Release In 11 Countries

By [Amy Mek](#)

Billionaire Bill Gates, who is funding the project, “assures” us it’s not a scene from a horror movie.

Inside a two-story brick building in Medellín, Colombia, scientists work in muggy labs breeding 30 million genetically modified mosquitoes weekly in labs. They tend to the insects’ every need as they grow from larvae to pupae to adults, keeping the temperature just right and feeding them generous helpings of fishmeal, sugar, and, of course, blood. They are then released into the wild in 11 countries. Great way to infect people with the vaxxes.

Billionaire Bill Gates, who is funding the project, assures us it’s not a scene from a horror movie. *“The factory is real. And the mosquitoes that are released do not terrorize the locals. They help save and improve millions of lives.”* Just as his ‘covid vaccines’ have ‘saved’ millions of lives or his [previous vaccination projects](#) have left thousands of women [sterile](#) in [India](#) and Kenya. Or even his Polio vaccines have caused paralysis, seizure, and febrile convulsions in Sub-Saharan Africa, Afghanistan, Congo, and the Philippines.

Wolbachia Bacterium

“The mosquitoes grown in this factory carry the Wolbachia bacterium, which prevents them from transmitting dengue and other viruses – including Zika, chikungunya, and yellow fever – to humans. By releasing them and breeding them with wild mosquitoes, they spread the bacteria, reducing virus transmission and protecting millions of people from disease,” [claims Gates](#) – just as his ‘covid vaccines’ have ‘reduced’ virus transmission and have ‘protected’ millions of people from disease.

Research conducted in Indonesia has shown that mosquitoes carrying *Wolbachia* offer 77 percent protection against dengue fever, and 86

percent are effective against hospitalization. Just like his 'corona vaccines' offer almost 100 percent 'protection' against covid and hospitalization.

The mosquitoes are released in Colombia, Brazil, Mexico, Indonesia, Sri Lanka, Vietnam, Australia, Fiji, Kiribati, New Caledonia, and Vanuatu – eleven countries total.

Gates plans to breed hundreds of millions of Wolbachia mosquitoes. Did Gates and his researchers consider all the variables that are likely to occur with a program where a new vector of spreading a bacteria by an insect that bites humans and other animals and, in the process, injects that bacteria into them? Where is the one, two, five, and ten-year report on the safety of such a program from a controlled environment?

The 'World War' on COVID — An Arsenal of High-Tech 'Weapons' of Social Control

If we carefully analyze each aspect of the “world war” on COVID-19, we can see how each tactic and high-tech “weapon” has harmed human health, destabilized civil society and possibly disrupted the ecological balance between the human population and the virus, while enriching private interests and empowering financially captured government regulators.

By W. Aaron Vandiver

Bill Gates has called the global response to COVID-19 a “world war.” His militaristic language has been echoed by Dr. Anthony Fauci and other architects of COVID-19 policy for the last two and half years.

To fight their “world war,” Gates and Fauci and their allies have deployed an arsenal of high-tech “weapons” and tech-enabled tools of social control — contact tracing apps, PCR tests, QR codes, digital passports, lockdowns, mask mandates, mRNA vaccines, social media censorship, mass surveillance and so on — with devastating consequences for civil societies, human health and even the environment.

As an advocate for wildlife conservation, I have been appalled as virtually all environmentalists, and most others on the left, have supported this disastrous high-tech “war” on COVID-19.

I believe that an ecological perspective reveals many of the flaws inherent in an aggressive high-tech attack on a pathogen, although most environmentalists have been too blinded by progressive political ideologies and the hysteria surrounding COVID-19 to see this truth.

In addition to criticisms leveled at pandemic policies by civil libertarians and public-health experts such as the authors of the Great Barrington Declaration —

critiques that I appreciate — I tend to view the pandemic in accord with insights I have gained while trying to protect the planet's biodiversity, a point of view that many critics may not have thought about, and may even be inclined to dismiss.

To me, the “war” on COVID-19 has been characterized by a destructive set of attitudes, beliefs and behaviors that appear to be deeply engrained in our political and economic institutions, and which form a pattern that should be recognizable to conservationists and ecologists:

1. Aggressive intervention in complex natural processes using new, poorly understood technologies designed to achieve narrowly defined short-term goals, with disregard for the potential long-term ramifications;
2. Profiteering by private interests that own the technologies, enabled by government entities and “experts” that have been financially captured by those interests;
3. Followed by a cascade of unintended consequences.

Each aspect of the “war” on COVID-19 can be understood in these terms.

To explain, I will first elaborate on how I see the global response to COVID-19 through the lens of ecology.

Ecology and aggressive technological “wars” against complex living systems
“The first rule of ecology is that everything is connected to everything else,”
wrote the ecologist [Barry Commoner](#) in the 1970s.

Or as the legendary naturalist John Muir, founder of Sierra Club (recently [canceled](#) by his own organization), wrote a hundred years before,
“When we try to pick out anything by itself, we find it hitched to everything else in the universe.”

Ecological damage often ensues when people aggressively try to control complex natural processes to achieve short-term goals without truly understanding how those living systems work, or what the full range of ramifications will be, usually with new technologies that promise “progress” but have a variety of consequences that cannot be managed over the long run.

In my opinion, this is one reason why our global industrial economy, which interferes in natural processes on a massive scale across the planet, has brought about a multi-faceted [ecological crisis](#) that has seen a dramatic collapse in the [planet's biodiversity](#), including an average 70% decline in [Earth's wildlife populations](#) since 1970, among other symptoms of environmental degradation (I won't even mention the “C” word).

An example of an ecologically destructive practice that fits this pattern is the [Big Ag/ Big Pharma](#) industry's worldwide chemical "war" on plant and animal pathogens using herbicides, pesticides, antibiotics and other pharmaceuticals.

The world's most popular herbicide, [glyphosate](#), has harmed global biodiversity over the last five decades and has potentially caused many [human health problems](#), including cancer. (Acknowledging these harms is not to endorse the anti-farmer measures recently enacted in the Netherlands, Canada and elsewhere).

The "war" on insects waged via the widespread application of the chemical insecticide DDT in the mid-20th century also caused vast ecological damage across many species that Rachel Carson exposed in her book "*Silent Spring*" giving rise to the modern-day environmental movement.

[Studies](#) still link DDT to elevated risks of cancer in children and grandchildren of women who were exposed to the chemical decades ago.

A similar ecologically destructive practice is the "war" that has been waged for decades on apex predators like wolves, bears and big cats at the behest of industrial agricultural interests, often accomplished through the large-scale spreading of [chemical poisons](#) across landscapes, triggering negative ["trophic cascades"](#) throughout U.S. and global ecosystems.

I cannot help but notice that the high-tech "war" on COVID-19 resembles these industrial "wars" against the natural world in many respects.

The whole "war" concept is based on a militaristic, mechanistic way of thinking that is obsessed with exerting technological control over natural processes to achieve short-term aims — often eradication of a "threat" like a pathogen or a predator — but cannot recognize the long-term consequences of interfering in the complex set of biological relationships that support natural ecosystems, and that ultimately provide the basis for human health and well-being.

[Gates](#) exemplifies this mindset, with his techno-utopian beliefs that human pathogens are like computer viruses, that human biology can be manipulated like computer code, and that vaccines can be regularly "uploaded" into the human body like software updates.

He has a wrongheaded, [war-like notion](#), as observed by economist Jeffrey A. Tucker, that "*with enough money, intelligence, and power, along with technological know-how at the helm, [a virus] can be stopped in its tracks.*"

Gates's militaristic COVID-19 strategy of retreat (lockdowns and masks) and attack (mass mRNA vaccination) was never based on a holistic understanding of

how human populations interact with pathogens and co-exist with them over time, how individual citizens remain healthy or how human societies thrive.

“The pandemic is not a war,” says Indian activist [Dr. Vandana Shiva](#), one of Gates’s staunchest critics, and one of the only prominent ecologists to criticize his COVID-19 policies.

“In fact,” she says, *“we are part of the biome. And we are part of the [virome](#) [the set of all viruses present in the human body]. The biome and the virome are us.”* In other words, co-existence with pathogens is the rule in ecology, eradication of a pathogen from nature is the [rare exception](#) and declaring “war” on any part of a complex living system can have significant unintended consequences.

But for Gates and Fauci and others in power, waging high-tech “wars” on viruses is far more amenable to their interests than a humble approach based on the subtle principle of ecology (or the traditional precepts of public health prior to March 2020).

Using new technologies to control natural processes for short-term gain, with disregard for long-term ecological consequences, is the business model. In fact, the more ecological damage that is caused, the more that further technological interventions can be justified, raising the question of whether “unintended” consequences are in some cases intended.

As explained further below, the failure of each aspect of the “war” on COVID-19 can be described and understood in ecological terms, including lockdowns, masks, mRNA mass vaccination and even the origins of the virus itself.

Origins of the virus: Who is the real bio-terrorist, Mother Nature or Anthony Fauci?

One of the great ironies of the global response to COVID-19 is that one of its prime architects, [Fauci](#), may have been partly responsible for the pandemic.

Fauci and other powerful figures in the international bio-security establishment have long ignored the ecological risks of tampering with natural viruses using bio-weapons technology.

This is an important factor that may have led to the initial outbreak of COVID-19 in [Wuhan, China](#).

As soon as the pandemic started, Fauci immediately and vigorously began promoting the unproven theory that SARS-CoV-2 jumped naturally from wild animals to humans, and he even orchestrated a [behind-the-scenes campaign](#) to discredit alternative theories.

But evidence has been steadily mounting that the novel coronavirus quite possibly came from [“gain-of-function” research](#) at the Wuhan Institute of Virology, funded in part by U.S. government grants approved by Fauci himself.

Jeffrey Sachs, a prominent Democrat and professor of sustainability at Columbia University, chaired a commission for The Lancet that investigated the origins of SARS-CoV-2 for two years.

He has [said](#), *“I’m pretty convinced it [the virus] came out of U.S. biotechnology, not out of nature . . . So it’s a blunder of biotech, not a natural spillover.”*

Sachs has [compiled evidence](#) supporting the lab-leak theory, particularly regarding the existence of an unusual feature on the virus called a *“Furin Cleavage Site,”* which may have been artificially inserted in SARS-CoV-2.

I find Sach’s reasoning and the evidence he has presented persuasive, although as a wildlife conservationist I remain concerned about the potential for natural *“spillover”* of viruses from wild animals to humans.

Environmentalists, journalists, scientists and others who focus their attention exclusively on [computer models](#) of zoonotic transmission and [statistical studies](#) favoring the natural transmission theory, while turning a blind eye to the hard evidence supporting the lab-leak theory laid out by Sachs and others, including [Matt Ridley and Alina Chan](#), authors of *‘Viral: The Search for the Origins of COVID-19,’* are missing an important story. (Even Fauci now says he has an [“open mind”](#) about a possible lab leak.)

Most fail to realize that Fauci and other proponents of *“gain-of-function”* have long shown a reckless disregard for the risks of tampering with natural viruses, expressing a [paranoid attitude](#) toward nature that is the antithesis of respect for ecology.

Fauci and others claim that [“Mother Nature Is the Ultimate Bioterrorist”](#) to justify their Frankenstein-like efforts to [hunt down](#) the most dangerous viruses that exist in wild nature, take them to labs like the one in Wuhan and tinker around with them to make them more dangerous and deadly.

Their twisted logic seems to be that if they intentionally create super viruses, they can somehow anticipate and prepare for natural pandemics.

Most objective observers, however, say that *“gain-of-function”* is a military-industrial boondoggle that has [no practical benefit](#) whatsoever and dramatically increases the risk of pandemics (which, when they do occur, substantially increase the wealth and power of those funding and conducting the experiments). *“Gain-of-function research of concern involves the creation of new health threats,”* Dr. Richard Ebright of Rutgers University [recently testified](#) before the

U.S. Senate, *“health threats that did not exist previously and that might not come to exist by natural means for tens, hundreds, or thousands of years.”*

If environmentalists and others on the left were being true to their principles, they would denounce Fauci’s funding of bio-weapons experimentation and cry out for a worldwide ban on *“gain-of-function”* research in the same way that earlier generations of activists sought to limit the proliferation of nuclear weapons.

“Gain-of-function” is already illegal under U.S. laws that Fauci appears to have found his way around.

It remains [inconclusive](#) whether *“gain-of-function”* research actually caused the COVID-19 pandemic, but its potential to have done so is a vivid example of how powerful actors like Fauci use technological tools to interfere with natural processes, with disregard if not outright contempt for the long-term ecological consequences, thereby creating opportunities to exercise more power.

Lockdowns: A failed bio-warfare strategy

Since 9/11 it has been part of U.S. bio-warfare planning to *“lock down”* the population in response to a deliberate biological attack or the accidental release of an engineered pathogen, which according to Sachs is exactly how SARS-CoV-2 escaped the bio-technology lab in Wuhan, China. (See chapter 12 of Robert F. Kennedy Jr.’s book, [“The Real Anthony Fauci,”](#) for a comprehensive summary of bio-warfare planning over the last 20 years).

In the Spring of 2020, this bio-warfare tactic — lockdown! — was unleashed on hundreds of millions of healthy Americans and billions of others worldwide without any understanding of the true long-term effects on human health and well-being, the vitality of our complex civil societies or the biological relationship between the population and the virus.

Authorities justified lockdowns and associated policies with oversimplified [computer models](#) that did not reflect biological reality, and which were based on the utterly false premise that limiting social contacts through the brute force of modern technology (contact tracing apps, QR codes, digital passports, mass testing, online schooling, social media messaging, etc.) would somehow “flatten the curve” of infections in some meaningful, non-temporary way.

The [Great Barrington Declaration](#), authored by epidemiologists Jay Bhattacharya, Martin Kulldorff, and Sunetra Gupta, of Stanford, Harvard and Oxford Universities, correctly predicted that lockdowns were incapable of containing or controlling the spread of the virus, which is now ubiquitous in every corner of the globe despite numerous countries enforcing lockdowns throughout 2020 and 2021.

Complex human societies — vast networks of relationships and flows of material and energy — are in many ways like complex ecosystems that cannot simply be turned on and off like a machine.

Indeed, shutting down social activity violated the first rule of public health articulated by the renowned Dr. D.A. Henderson, who patiently conducted slow and methodical work on smallpox, the only human disease ever to be eradicated (after a century-and-a-half of effort and a vaccine that prevented infection and transmission).

Henderson said:

“Experience has shown that communities faced with epidemics or other adverse events respond best and with the least anxiety when the normal social functioning of the community is least disrupted.”

By disrupting the normal functioning of society to the maximum extent, lockdowns caused immense [collateral damage](#) to the most vulnerable and [marginalized](#) people on Earth, including the global poor (100 million pushed into [dire poverty](#) by lockdowns in 2020, and 263 million more could crash into extreme poverty this year), working classes (\$3.7 trillion in [lost earnings](#) in 2020 alone and now [crippling inflation](#)) and children (massive educational deficits and an unprecedented [mental-health crisis](#)).

Lockdowns led to deaths of despair from suicide and drug and alcohol addiction, depression, skipped medical treatments and other direct [harms to human health](#), including the impairment of millions of immune systems due to [lack of exposure](#) to pathogens, leading to [surges of infection](#) with adenovirus, rhinovirus, respiratory syncytial virus (RSV), human metapneumovirus, influenza and parainfluenza, in addition to COVID-19.

Meanwhile, billionaires who own the technological armory of lockdown added a total of \$5 trillion to their [wealth](#) from March 2020 to November 2021, and the world’s ten richest men, including Gates, [doubled their fortunes](#) due to the increase in the value of their holdings in Big Tech and Big Pharma attributable to [“pandemic super profits.”](#)

According to [Oxfam International](#), *“for every new billionaire created during the pandemic — one every 30 hours — nearly a million people could be pushed into extreme poverty in 2022.”*

Lockdowns also empowered government bureaucrats (under the influence of Big Pharma, Big Tech and other multinational corporate interests) to rule by emergency decree, circumventing democratic processes and causing a massive worldwide rollback of basic civil liberties and [human rights](#), which fell to various forms of tech-enabled control: free speech gave way to social media censorship, free movement to digital passports, and freedom to earn a living or get an

education to bans on “*nonessential*” activity that forced commerce and schooling online.

The real story here is how elites used lockdowns to exert an unprecedented degree of control over society and each one of us.

At the height of global lockdown mania in 2020, Vandana Shiva described their destabilizing and dehumanizing effect from her perspective as an activist who has long tried to protect India from policies that [Gates](#) and other global elites have forcefully imposed on her country, especially industrial agricultural policies that take control of the land away from traditional farmers and give it to giant multinational corporations.

Shiva used ecological terms to illustrate how technocratic elites seek to control us in the same way that they control the land:

“The coronavirus pandemic and lockdown have revealed even more clearly how we are being reduced to objects to be controlled, with our bodies and minds the new colonies to be invaded. This linear, extractive logic [of lockdown and similar policies] is unable to see the intimate relations that sustain life in the natural world. It is blind to diversity, cycles of renewal, values of giving and sharing, and the power and potential of self-organizing and mutuality. It is blind to the waste it creates and to the violence it unleashes.”

Just as an ecologically short-sighted intervention in a complex living ecosystem can destabilize it, lockdowns severely destabilized our complex civil societies, exposing them and each of us to exploitation.

For many years, we will be living with the catastrophic consequences of this heavy-handed and poorly understood bio-warfare tactic.

Toxic masquerade: The effects of petrochemical masks on health and the environment

Masks are “*weapons*” in the “*war*” on COVID-19 manufactured by the petrochemical industry that have caused enormous collateral damage to [human health](#), civil society and even the environment.

Yes, surgical and N95-style masks are made from synthetic petrochemical fibers, i.e. plastic. As I have written about previously, billions of [plastic masks](#) have already ended up in the world’s oceans, where they directly harm marine life like sea turtles, whales and especially sea birds — masks are devastating bird populations around the world. Masks also pollute the water with countless tiny particles called “micro plastics” that infiltrate the marine food chain. Billions more plastic masks have been buried and burned in landfills and incinerators, where they release petrochemicals into the soil, water, and air.

At the height of the pandemic, the world was throwing away about [3 million masks per minute](#).

The petrochemicals in masks are toxic. Many surgical and N95 masks contain [PFAS](#), known as “Forever Chemicals.”

[One study](#) found that *“wearing masks treated with high levels of PFAS for extended periods of time can be a notable source of exposure and have the potential to pose a health risk.”*

The U.S. Environmental Protection Agency (EPA) recently warned that certain PFAS compounds are more [dangerous to human health](#) than previously thought and present a risk to human health even in very tiny quantities.

Recent studies have also found micro plastics in [human blood](#) and [deep lung tissue](#) for the first time ever. Those studies were not about masks, but they raise obvious questions about the effects of breathing through plastic material worn over the nose and mouth.

A [research team](#) from the Hull York Medical School in the UK found polypropylene and PET or polyethylene terephthalate, which are fibers from synthetic fabrics such as the material that surgical and N95 masks are made from, in lung tissue.

“The surprise for us was how deep it got into the lungs and the size of those particles,” their team leader said.

Clearly, public-health agencies never paused their mask campaign long enough to consider the obvious risks that petrochemicals pose to human health and the environment.

And notwithstanding these risks, Big Plastic manufacturing giants like 3M, which sold [\\$1.5 billion](#) of surgical and N95 masks in 2021, have every incentive to keep plastic masks rolling off the assembly line.

3M and other large companies in the multibillion-dollar petrochemical industry routinely lobby officials in Washington D.C. about the supposed benefits of masking and have been handsomely rewarded with [huge public contracts](#) to provide masks to the government.

The petrochemical industry has also engaged in [heavy lobbying](#) to defeat efforts to regulate the toxic chemicals, PFAS, found in masks and other plastic products. In addition to the direct harmful effects of the toxic petrochemicals and micro plastics in masks, countless negative social, emotional, educational, and [health-](#)

related harms have been suffered by the public due to the simple act of covering people's faces, especially those of children.

Forcibly covering people's faces in plastic material, or useless cloth, is not "*low impact*" in any sense, as public-health officials wrongly declare.

Despite all this collateral damage, masks made little to no difference in the spread of the virus throughout the U.S. and the world. As with lockdowns, public-health officials rationalized mask mandates with oversimplified computer models, and with ridiculous studies on mannequins, as well as small inconclusive observational studies, not a robust scientific understanding of disease transmission in complex human societies.

Randomized controlled trials conducted before and during the pandemic showed that mask policies did not significantly reduce community transmission of respiratory viruses including COVID-19.

Even if masks were shown to have some modest effect, officials who mandated masks across vast swathes of society relied on the same faulty short-term logic that characterized lockdowns: the simple-minded notion that temporarily "tamping down" transmission of a respiratory virus is a legitimate and meaningful goal, regardless of the collateral damage.

Petrochemical masks are yet another failed, but profitable, bit of industrial technology produced by the "war" economy that has sprung up around COVID-19. mRNA mass vaccination: What can we learn from Big Pharma's "war" on plant and animal pathogens?

The biggest "*weapons*" deployed in the "war" on COVID-19, Pfizer and Moderna's mRNA vaccines, are brand-new technologies that are unlike any other vaccine in history. Despite their technological novelty, the U.S. Food and Drug Administration (FDA) determined with unprecedented "*warp speed*" that mRNA shots are "*safe and effective*," and initially approved them for use on an emergency basis after shockingly brief tests.

"*Operation Warp Speed*" was, in fact, a gargantuan military-industrial project involving four generals and dozens of other military officers. Bio-warfare planners have zeroed in on mRNA products because they can be quickly formulated and manufactured in response to a biological attack or an accidental lab leak.

Clinical testing, however, takes years to complete and cannot be sped up, only curtailed. Long testing delays are unacceptable in a "*war*." Putting "*shots in arms*" as quickly as possible is the measure of success.

But what are the long-term consequences for human health, as well as the ecology of the viral-host equilibrium in the population, due to hastily injecting nearly the entire human species with brand-new, lightly tested mRNA technologies developed by Big Pharma with “warp speed”?

We may have no way of knowing for certain, and even trying to answer the question exposes someone to the pejorative “*anti-vaxxer*.” There are many rational critics of mRNA vaccines who deserve credit for standing up to name-calling and censorship, and there are some irrational critics, too. I will not wade through all of those arguments here.

Instead, as a conservationist, I tend to look for answers in the worldwide industrial “war” waged by Big Pharma (in conjunction with its corporate cousin, Big Ag) against plant and animal pathogens.

To my mind, that chemical and pharmaceutical war is an important global precedent that has some disturbing parallels to the current mRNA assault on COVID-19 and may hold important lessons about what we can expect.

For example, over three hundred million pounds of the chemical herbicide, [glyphosate](#), are now dumped on U.S. soil every year.

Glyphosate is manufactured by Bayer, which recently acquired the original manufacturer, [Monsanto](#), in a \$66 billion merger between Big Ag and Big Pharma (a confluence of corporate interests in which Bill Gates is an interested party, through his program to “revolutionize” global food production called [Gates Ag One](#)).

The [EPA](#), under the industry-friendly leadership of the Trump administration, determined that glyphosate is “safe” and “effective.” In June, however, a [U.S. Court of Appeals](#) ordered the EPA to set aside that order and reassess the risk that glyphosate poses to human health and the environment due to accumulating evidence of harms, including [biodiversity loss](#) in soils and waters laced with glyphosate.

The U.S. Supreme Court recently refused [Bayer’s appeal](#) of a major multi-million-dollar judgment based on the company’s failure to warn about glyphosate’s cancer risk.

Nevertheless, glyphosate use remains at extraordinarily high levels, particularly on crops that have been genetically modified to withstand exposure to the chemical. As weeds growing on about 150 million acres of U.S. soil have become [resistant](#) to glyphosate — you might call them weed variants — more and more glyphosate and other powerful herbicides are used to kill “super weeds” in a perpetually escalating chemical war against natural plant pathogens.

Similar practices are carried out by the Big Ag/ Big Pharma industry in the animal agriculture sector.

The widespread overuse of antibiotics and “leaky” vaccines that fail to prevent infection or transmission have created [“superbugs”](#) and “*super viruses*” in livestock animals.

A “leaky” vaccine for Marek’s Disease in chickens may have stimulated the evolution of viral variants that made the disease much more deadly, as explained in a 2015 article in ‘Science’ magazine (with a title that could never be printed today) titled [“Do Some Vaccines Make Viruses More Deadly?”](#)

The authors said:

“Vaccines save millions of lives every year by teaching our immune systems how to combat certain viruses or bacteria. But a new study suggests that, paradoxically, they could sometimes teach pathogens to become more dangerous as well . . . Some vaccines don’t prevent infection, but they do reduce how sick patients become . . . such ‘imperfect’ or ‘leaky’ vaccines could give deadlier pathogens an edge, allowing them to spread when they would normally burn out quickly.”

Yet the industry continues to engage in these kinds of ecologically risky (but profitable) agricultural practices on a global scale.

The parallels between Big Ag/ Big Pharma’s chemical and pharmaceutical “wars” on plant and animal pathogens and Big Pharma’s current mRNA “war” on a human pathogen include these striking similarities:

- Determination by corporate manufacturers and government regulators that chemical / pharmaceutical products are “safe” and “effective” before the long-term effects can possibly be known.
- Accumulating evidence of adverse health effects after widespread use. We now know, after hundreds of millions of people have received shots in the U.S. alone, that mRNA vaccines can cause [myocarditis](#), blood clots, facial paralysis, disruption of the [menstrual cycle](#) and a drop in [sperm count](#), among other problems. A [major pre-print study](#) that re-examined the original mRNA vaccine clinical trials concluded that “[t]he excess risk of serious adverse events of special interest [caused by the mRNA vaccines] surpassed the risk reduction for COVID-19 hospitalization relative to the placebo group in both Pfizer and Moderna trials.”
- Use of “leaky” vaccines. In March of 2021 Director of the CDC, Rochelle Walensky, [said](#) on CNN that “vaccinated people do not carry the virus, don’t get sick,” and a few months later Fauci guaranteed MSNBC host [Chris Hayes](#) that “when people get vaccinated they can feel safe that they are not going to get infected.” But we now know that although mRNA vaccines temporarily reduce symptoms of disease (an effect that did not

decrease [all-cause mortality](#) in countries that used them), they fail to prevent infection or transmission. Even Gates himself [acknowledges](#) that the shots are “not good at infection blocking.”

- Possible generation of new variants due to “leaky” products. Vaccinology expert [Geert Vanden Bossche](#) believes that mass vaccination with “leaky” mRNA shots is putting [evolutionary pressure](#) on the virus to generate new vaccine-resistant variants, and that mass mRNA vaccination has disrupted “*the equilibrium in the viral-host ecosystem*.” He has pointed to the Marek’s Disease vaccine in chickens as one potentially relevant precedent. We do not yet know whether he is right, but we do know that vaccine-resistant variants are emerging regularly. The new Omicron sub variants, [BA.4 and BA.5](#), are [highly resistant](#) to vaccine-induced immunity. A [study in the UK](#) has shown that people who receive multiple boosters after being infected with the original strain of the virus are more susceptible to Omicron infection.
- Perpetual escalation of the “war” against new variants in a vicious, but highly profitable, cycle. Pfizer CEO Albert Bourla sees no end to this cycle, as he predicts “[constant waves](#)” of COVID-19 variants accompanied by regular booster shots. Pfizer and its corporate partner BioNTech, along with Moderna, collectively had over [\\$60 billion](#) in vaccine revenue in 2021. They intend to keep the recurring-revenue business going for as long as possible, regardless of whether their own products are to blame for the emergence of variants.
- The financial “capture” of government regulators. The FDA, the CDC, the National Institute for Allergy and Infectious Diseases (NIAID), the National Institutes of Health (NIH) and the World Health Organization (WHO) get much of their funding directly from [the pharmaceutical industry](#), and from “[charitable](#)” [foundations](#) with close financial ties to that industry, including the Bill and Melinda Gates Foundation. Serious financial [conflicts of interest](#) exist at every level of the drug-approval process. Dr. Marty Makary of Johns Hopkins School of Medicine and Dr. Tracey Hoeg at the Florida Department of Health recently [wrote an article](#) about the relentless calls and text messages they are receiving from doctors and scientists at the top levels of the NIH, FDA and CDC regarding conflicts of interest and pressure to approve mRNA shots and boosters. Florida Governor [Ron DeSantis](#) summed it up best when he said, “What this whole year and a half has shown us is that these regulatory agencies of the federal government have basically become subsidiaries of the pharmaceutical industry.”

Conclusion:

If we carefully analyze each aspect of the “world war” on COVID-19, we can see how each tactic and high-tech “weapon” has harmed human health, destabilized civil society, and possibly disrupted the ecological balance between the human population and the virus, while enriching private interests and empowering financially captured government regulators.

The “war” has been characterized by the distinct pattern that I described at the beginning of this essay:

1. Aggressive intervention in complex natural processes using new, poorly understood technologies designed to achieve narrowly defined short-term goals, with disregard for the potential long-term ramifications;
2. Profiteering by private interests that own the technologies, enabled by government entities and “experts” that have been financially captured by those interests;
3. Followed by a cascade of unintended consequences.

This destructive pattern appears to be deeply ingrained in our institutions and in the outlook of our leaders. It largely defines our society’s dysfunctional relationship with the natural world.

An ecological perspective that keeps this pattern in mind, and takes into account all of the consequences of launching high-tech “wars” on pathogens or any other part of our environment may help us avoid similar catastrophes in the future, or at least to recognize them.

COVID-19 Vaccines Reprogram the Immune System to ATTACK important organs

09/01/2022 / By [Kevin Hughes](#)

The Wuhan coronavirus (COVID-19) vaccines purportedly reprogram the immune system to turn against the body, causing lymphocytes [to attack important organs](#).

Arne Burkhardt and Walter Lang, two pathology professors from Germany, [held a press conference](#) to explain this phenomenon. They presented an analysis of 10 autopsies from people who died soon after their COVID-19 vaccination. All 10 individuals were aged 50, and died at various intervals in the two weeks following their vaccination.

Microscopic studies of tissue samples from the deceased individuals yielded an interesting find – the occurrence of a “*lymphocyte riot*.” Burkhardt and Lang discovered an alarming number of lymphocytes in various organs such as the liver, kidneys, spleen and uterus. The lymphocytes vigorously attacked the tissues in the organs and caused serious damage. (Related: [Evidence shows COVID vaccines cause serious damage to the immune system](#).)

This autoimmune horror could only be attributed to the COVID-19 vaccination. Burkhardt and two other pathologists attested to this, verifying that the vaccines triggered this pathogenesis in five of the 10 deceased individuals.

However, the medical examiners refused to acknowledge the COVID-19 shot's role in the demise of the victims. Two of the cases reported the vaccination as a *"probable"* cause of death, while two others were noted as *"rather coincident"* or *"possibly"* caused by the vaccine.

Regardless, Burkhardt emphasized that autoimmune diseases were among the deadly side effects of the COVID-19 shot. He outlined such conditions found in the vaccinated victims such as Sjogren's syndrome (lymphocytes attacking the glands that produce tears and saliva), leucoclastic vasculitis of the skin (blood vessels in the skin becoming inflamed) and Hashimoto's disease (inflammation of the thyroid gland).

Several of the deaths were caused by lymphocytic myocarditis, which is caused by the lymphocytes attacking and damaging the heart muscle. While the disease occurs in both young and old people after their COVID-19 vaccination, it is often misunderstood as a general infarction and blamed on other factors.

Burkhardt also criticized medical coding standards utilized for finalizing death certificates that were currently in place. He dubbed these as *"completely unsuitable"* and *"ultimately statically worthless,"* because they make unclear arguments and do not refer to specific medical evidence.

Vaccines kill: Burkhardt and Lang's findings confirm results of an earlier analysis. Burkhardt and Lang's findings attested to the results of an earlier analysis, which looked at more autopsies. Back in August 2021, Dr. Peter Schirmacher [examined 40 autopsies of people](#) who died within two weeks of getting their COVID-19 vaccine dose.

Schirmacher, a professor at [Heidelberg University](#), concluded that one-third of the people died from the vaccination immediately, either through cerebral vein thrombosis or autoimmune diseases. He displayed microscopic details of serious tissue damage induced by the vaccines to back up his claim.

Despite criticism from health authorities, he received support from his fellow pathologists. The Federal Association of German Pathologists threw its support behind Schirmacher, stating that more autopsies of vaccinated people who died within a certain time frame after vaccination should be performed.

For his part, Schirmacher responded to the criticism by denying that he lacked competence. *"The colleagues are definitely wrong, because they cannot assess this specific question competently,"* he said.

Schirmacher also denied allegations that he was trying to spread panic and rebuked allegations that he was an opponent of vaccinations, citing the fact that he himself was vaccinated.

Watch the video below to know how the COVID vaccines [completely destroy the immune system](#).

This video is from the [TruthAndFreedom1 channel on Brighteon.com](#).

THE NEXT VAX: Big Pharma pushing to release ANOTHER mRNA “vaccine,” this one for RSV (respiratory syncytial virus)

Friday, September 02, 2022 by: [Ethan Huff](#)

[\(Natural News\)](#) After seeing the success, aka *dollar signs*, of the Wuhan coronavirus (Covid-19) “vaccine” rollout, the pharmaceutical industry – and specifically Moderna – is now [setting its sights](#) on a new mRNA (messenger RNA) injection for respiratory syncytial virus, also known as RSV.

Javara, a clinical trial company, is reportedly teaming up with Privia Health Group on behalf of Moderna to recruit clinical trial participants for the new mRNA jab. Participants from Georgia, Maryland and Texas will be asked to roll up their sleeves for the shot, which, like the mRNA shots for covid, is experimental. (Related: Big Pharma is [also pushing](#) an all-new mRNA *nasal spray* for the Chinese Virus.)

Javara claims that more than 177,000 people 65 years of age and older are hospitalized for RSV every year in the United States. Some 14,000 of them end up dying, while treatment for the others costs about \$3 billion annually.

“Second only to the flu when it comes to causing significant respiratory illness in adults, RSV represents an often unrecognized yet very real and imminent threat to our older population,” says Michael Clay, Javara’s Chief Operation Officer. *“Being able to vaccinate against this virus would save lives, prevent hospitalizations, and conserve healthcare resources.”*

“By taking this opportunity to test a promising preventive RSV vaccine, older adults increase the possibility that they will be protected from the discomforts and dangers of this virus. At the same time, by helping to move this research forward, these trial participants will be doing their part to prevent suffering and save lives around the world.”

Beware the wave of new mRNA drug products that will soon hit the market.

According to the death care industry, there is no *approved* treatment or vaccine for RSV at the current time. There are plenty of *unapproved* treatments, however – these include *not getting vaccinated* in the first place since vaccines have [been shown](#) to damage the immune system.

Moderna says its new RSV jab candidate contains the exact same mRNA technology as the company's Fauci Flu shots, which are linked to myocarditis and a host of other deadly conditions.

"Because it does not use a weakened or inactive form of RSV, mRNA-1345 cannot cause RSV infection," a news release from the company states.

As always, the clinical trials that have been conducted so far on the new RSV injection *"showed promising results,"* according to Moderna – because when has a drug company ever said its products are not *"safe and effective?"*

The second round of trials, which are being put together right now, will look more closely at how the mRNA injections for RSV affect elderly people.

Moderna also announced plans to unveil a multi-valent combination influenza, covid and RSV injection with mRNA technology that it claims could change the *"immunizations landscape."*

According to Francesca Ceddia, senior vice president of respiratory vaccines at Moderna, the combination drug is still in the early stages of development. By the end of this year, the company plans to launch the first phase of clinical trials.

"We have observed in preclinical results a very strong immune response against all the antigens," Ceddia claimed in an interview. *"That's another important feature of mRNA vaccines, particularly our mRNA platform, which allows for including more and more antigens in combination."*

In the future, Ceddia added, a person will be able to go to the pharmacy and receive one shot containing all of Moderna's mRNA drugs. This will be especially appealing for children, she says, as parents will no longer have to return for multiple different shots as part of a schedule.

White Clots Are Self-Assembling Circuits

Dr. Jane Ruby reports that, *"Self-assembling electrical circuit material"* are the results from Mike Adam's near-final lab analysis of the rubbery white clots that are being found by morticians in veins and arteries of the prematurely-deceased jab victims all over the world.

Mike is the only microscopy expert who's been willing to step forward and analyze these unprecedented clots and he gives us his in-depth analysis, here.

MESSAGE TO THE UNVACCINATED

[Note: there are no dead nor live attenuated virions in these COVID "vaccines"; thus, they are not vaccines proper, but, rather, slow kill bioweapons.]

2nd Smartest Guy in the World

MESSAGE TO THE UNVACCINATED:

"Even if I were pollinated and fully vaccinated, I would admire the unvaccinated for withstanding the greatest pressure I have ever seen, even from partners, parents, children, friends, colleagues and doctors.

People who were capable of such personality, courage and critical ability are undoubtedly the best of humanity. They are everywhere, in all ages, levels of education, states and ideas. They are of a special kind; they are the soldiers that every army of light wants to have in its ranks. They are the parents that every child wants to have and the children that every parent dreams of having. They are beings above the average of their societies, they are the essence of the people who have built all cultures and conquered horizons. They are there, next to you, they look normal, but they are superheroes.

They did what others could not, they were the tree that withstood the hurricane of insults, discrimination and social exclusion. And they did it because they thought they were alone, and believed they were the only ones.

Banned from their families' tables at Christmas, they never saw anything so cruel. They lost their jobs, let their careers sink, had no more money ... but they didn't care. They suffered immeasurable discrimination, denunciation, betrayal and humiliation ... but they kept going.

Never before in humanity has there been such a "casting", now we know who are the best on planet Earth. Women, men, old, young, rich, poor, of all races or religions, the unvaccinated, the chosen of the invisible ark, the only ones who managed to resist when everything collapsed.

That's you, you passed an unimaginable test that many of the toughest Marines, Commandos, Green Berets, astronauts and geniuses could not withstand.

You are made of the stuff of the greatest who ever lived, those heroes born among ordinary men who glow in the dark."

The mass culling of the HUMAN HERD is now under way... Here's Exactly How it's Being Accomplished to Achieve Mass Extermination

Monday, August 22, 2022 by: Mike Adams

([Natural News](#)) Globalists see humanity as cattle (or sheeple) to be exploited for as long as needed, then culled like cattle herds when they are no longer useful. As globalist advisor Yuval Harari is now saying (paraphrased), the age of humans is coming to an end on planet Earth, and globalists have activated a multi-faceted plan to "cleanse" the planet of all human beings.

If someone were to have some sick, twisted desire to kill off a herd of cattle, they could simply shut off the water and the food. Death would come in a matter of days or weeks at most. The same is happening right now to humans.

The water supply is being cut off via geoengineering, causing global droughts and widespread crop failures. Entire cities like Los Angeles and Los Vegas are being threatened with a terminated water supply in the years ahead.

The food supply is being decimated by cutting off fertilizer supplies and causing diesel fuel prices to go sky high while also attacking the supply chain that supplies agricultural equipment parts.

The result? Both the water supplies and food supplies are being cut off. The human herd is being culled in some of the same ways a herd of cattle might be eliminated.

Vaccines are designed to kill the gullible billions, and starvation will get the rest.

Vaccines represent another kill vector for global depopulation. Because vaccines are voluntary, they are intended to easily kill off the gullible masses who are so ill-informed that they actually believe Big Government and Big Pharma wants to save their lives. In reality, of course, [the vaccines are biological weapons](#) designed for infertility and depopulation. A huge percentage — we don't yet know the final number — of those who have already taken the vaccines will die from [self-assembling clots that we now know contain high concentrations of conductive elements](#) such as Aluminum, Tin and Sodium.

Those who resist the vaccines are harder to kill because they don't line up and beg for death injections like the vaccine zealots do. Globalists intend to starve them to death with global food scarcity.

Right now, we already know there isn't enough food in the pipeline to feed the world throughout 2023. It simply isn't getting planted and harvested in sufficient quantities to feed 8 billion people.

Continued government attacks on the food supply — such as [The Netherlands ordering ranchers to cull their herds](#) — are designed to worsen food scarcity and accelerate mass starvation.

Relatively few people are getting prepared with backup food supplies. When the shelves are empty, they will panic.

Globalists know a massive civilian uprising is just months away.

In today's Situation Update podcast (below), I explain that the [globalist vaccine depopulation scheme](#) has failed to kill off billions of people in the short amount of time that was intended. With food scarcity, energy scarcity and water scarcity now reaching critical levels, mass uprisings are mere months away. Western Europe, in particular, is going to see civilian revolts this coming winter as millions find themselves freezing and starving.

The globalists know that worldwide food scarcity is already baked in. They also know the mass uprisings will commence as starvation and scarcity worsen. Thus, there is a countdown timeline in play that cannot be rescheduled.

As a result, they are in a huge hurry to kill off billions of human beings before the uprisings get out of hand and snowball beyond the ability of these governments to contain.

This is the real purpose behind the recruiting and arming of [87,000 new IRS agents](#) who are being told they will need to use “deadly force” against the American people. In France, [the Ministry of the Interior is hiring thousands of “green police”](#) who will join armed brigades to supposedly prosecute “environmental crimes.” Yet the real purpose of all these armed government agencies in the USA, France, UK, Germany, Canada, Australia, etc. is to carry out mass executions of civilians as the government’s war on humanity kicks into high gear.

The purpose of having a rogue FBI, armed IRS agents (armed with a massive new cache of ammunition and firearms), armed ATF agents, etc., is to have a private army that answers to the executive branch of government and that doesn’t fall under the jurisdiction of the US military, which cannot legally wage war on US soil. Federal agencies, however, can and will wage war against the American people. They are already doing it, with ATF agents now going door to door, demanding civilians surrender gun parts they legally purchased, for example. It’s going to be up to state governors to defend their residents against these federal tyrants, and that will spark regional warfare with states literally going to war with rogue federal agencies run by the illegitimate fake “resident in chief” Joe Biden.

Democrats, media and government are preparing to call for mass executions of all Christians and conservatives.

Even right now, democrats, government and the media are [claiming that all conservatives are terrorists](#), implying they all deserve to be exterminated. As Everett Piper writes in the Washington Times:

This past Tuesday, Democrat adviser Kurt Bardella called all Republicans a “domestic terrorist cell.” MSNBC’s Tiffany Cross agreed and said there should be no distinction between Republicans and “right-wing extremists.” At the same time, Peter Wehner, a contributing writer for The Atlantic, likened the Republican Party to a “dagger pointed at the throat of American democracy.” All this while the FBI Director Christopher Wray added that any American flying the Gadsden — “Don’t Tread On Me” — flag is suspect of violent extremism.

Does it concern you that a group of Democrats holding power is now defining all Republicans as being “right-wing extremists” and a “threat to American democracy?”

Democrats, government and the media are gearing up to try to morally justify their “purge” of all conservatives, Christians, gun owners, pro-lifers and Trump supporters.

Remember, these Democrats are the same people who mutilate the genitalia of their own children in the name of transgenderism. If they will mutilate their children, what do you think they will do to their perceived political enemies? ...Especially if they can convince themselves that their enemies represent a *“threat to democracy.”*

To the skeptics who say ignorant things like, *“The IRS is going to use those guns and ammo on the American people,”* we ask: *Who else would they be planning to use it on?* Of course it’s intended to use on Americans! Anyone who hasn’t yet come to realize that simple fact is probably not going to survive the next year in America.

Other vectors of depopulation are being accelerated.

If you’re wondering what can kill billions of people faster than mass starvation and crop failures, think grid-down scenarios. Any western government can sabotage their own domestic power grid and blame the Russians for *“cyber-attacks.”* When the power grid is down, the financial system grinds to a halt. Chaos ensues. Mass looting and violence in the streets. Cops bug out. Civilians who are left behind get murdered, robbed and raped. This will happen in nearly every blue city in America.

Within just a few months of a grid-down scenario, up to 90% of the population is dead from violence, starvation, exposure or disease. Understand that heating and air conditioning will not function. Municipal water systems won’t work, meaning there will be no tap water. Cell towers will not function. If you need to charge an electronic device, you’ll need solar panels and a solar generator. If you want to enjoy communications, you’ll need a satellite phone or satellite text messaging device. If you want to eat, you’ll need stored food. If you don’t want to die from dehydration, you’ll need a water filter and a water source that you can safely and frequently access. You’ll also need lots of containers for storing and transporting water, because you’ll need far more water than you think. (Figure 10 gallons per person per day as an absolute minimum.)

Understand that the globalists have only just begun to deploy their weapons against humanity. There’s much more they can unleash as needed, and if they don’t get the kill rate they’re wanting, they will just crank up the chaos until a sufficient number of billions are dead.

Humanity is being culled like cattle. Those who don’t see it will be among the first to be exterminated by it. But those who prepare have a realistic chance of making it through the genocide and participating in the rebuilding of human civilization on the other side.

Today’s Situation Update podcast spells it out in even more detail:

More Than 1,000 Reports of Adverse Events After COVID-19 Vaccination in Children 5 and Younger, CDC Data Shows

More than 1,000 reports of adverse events have been lodged with U.S. authorities following COVID-19 vaccination in children aged 5 and younger.

By The Epoch Times

By Zachary Stieber

More than 1,000 reports of adverse events have been lodged with U.S. authorities following [COVID-19](#) vaccination in children aged 5 and younger.

As of Aug. 21, 996 non-serious reports have been entered into the Vaccine Adverse Event Reporting System ([VAERS](#)) for children 4 or younger who received a Pfizer vaccine and children 5 or younger who received a Moderna vaccine, Dr. Tom Shimabukuro said on Sept. 1.

Shimabukuro is a researcher with the [Centers for Disease Control and Prevention](#) (CDC), which runs VAERS with the U.S. Food and Drug Administration.

Most of the adverse event reports have been for outcomes designated non-serious, or events that did not include death, a life-threatening illness, hospitalization or prolongation of hospitalization, permanent disability, congenital anomaly or birth defect.

Of the reported events, 19 were designated serious, with nine for children who received a [Moderna vaccine](#) and 10 for children who received a [Pfizer vaccine](#). Details omitted.

The serious events were not detailed.

“Those details should not have been left out of the information released to ACIP [Advisory Committee on Immunization Practices] and the public,” Barbara Loe Fisher, co-founder and president of the National Vaccine Information Center, told The Epoch Times in an email.

[Shimabukuro was presenting](#) the [data to the ACIP](#), which advises the CDC on vaccine guidance.

The most commonly reported events after receipt of Pfizer’s vaccine were errors in dosing, such as an incorrect dose being administered. Fever, rash, vomiting, fatigue and diarrhea were also commonly reported. The most commonly reported events after receipt of Moderna’s vaccine were fever, rash, vomiting and hives.

The number of reports represented 0.06% of the doses administered to children aged 5 or younger, who only became eligible for a vaccine in mid-June.

Shimabukuro said the data from VAERS and other systems did not reveal any new safety concerns.

Anybody can make reports to VAERS, but making a false report subjects a person to a criminal charge. Health care professionals are required to report [adverse events](#) for the vaccines under emergency use authorization. Both the Pfizer and Moderna vaccines are under emergency use authorization for young children.

However, research has found that the number of reports submitted to VAERS is an undercount of the actual number of adverse events.

“Even though not every adverse event reported to VAERS is causally related to vaccination, it is also true that one [CDC-funded study](#) estimated that less than one percent of vaccine adverse events that occur are reported to VAERS,” Fisher said.

Myocarditis

No cases of heart inflammation have been reported following COVID-19 vaccination in young children.

Myocarditis and pericarditis, forms of heart inflammation, were also not detected in the original clinical trials. Studies have since [conclusively linked](#) them to the [Moderna and Pfizer](#) vaccines.

The reported rates of [myocarditis](#) after dose 2 of a primary series are elevated for males aged 5 to 49 and females aged 12 to 29. The highest reported rate is 78.7 per million second doses administered, for males between 16 and 17 years old.

The reported rates remain elevated for males 12 to 29 after a booster dose, Shimabukuro said. The rates do not remain elevated for females of any age after a booster dose, according to the VAERS data.

The CDC has verified 131 of the myocarditis case reports among people [aged 5 and up](#) after [booster shots](#).

Data from another surveillance system run by the CDC, the Vaccine Safety Datalink, showed a safety signal for a first booster for myocarditis and pericarditis after a first booster.

The Pfizer vaccine caused 61.7 excess [heart inflammation](#) events for males aged 12 to 15 and 189 excess events for males aged 16 and 17. The vaccines caused 30.9 excess events for males aged 18 to 39.

The rates were higher for both males and females aged 16 and 17 after a booster of Pfizer's shot, though the higher rates were not statistically significant because of the low number of events, Shimabukuro said.

Zachary Stieber covers U.S. and world news for The Epoch Times. He is based in Maryland.

[The Epoch Times](#)

The Epoch Times' mission is to bring a truthful view of the world free from the influence of any government, corporation or political party.

In one of two [blockbuster interviews](#) conducted by Alex Jones this week, [Steve Kirsch](#) joined InfoWars to discuss how the COVID hoax is falling apart amid Fauci's announcement of his resignation from NIAID.

Last week, Steve made broadcasting history when he told Fox News' Brian Kilmeade that, *"What I found was that hundreds of thousands of Americans have been killed by this vaxxine and millions have been injured and clearly, you are more likely to be injured or dead from the vaxxine than if you were unvaxxinated."*

Brian was quick to say on-air that Fox can't "verify" Steve's claims. Steve went ahead and backed-up his claims on his [Substack](#), where he called-out Brian, saying, "You mean you 'can't' because Fox won't let you, right?"

Steve tells Alex here that Brian *"Was actually telling people the truth, because Fox News has contractual commitments that don't allow them to speak poorly about the vaxxines. So they can't say anything antivax on Fox News and so they*

can't verify my numbers, because if they did, they would have to be admitting that the vaxxines are not safe and not effective."

Steve says, "The White House has spent a billion dollars influencing media and giving money to media to promote these vaxxines. And we don't know what the contracts say, it's pretty clear there was no interest at Fox in validating the numbers".

"Now, if what I said is true and we really have killed hundreds of thousands of people, you would think that Fox News would be interested in covering that and looking at my data."

"So after the interview, I talked to the producer and I said, 'Hey, would you like to see the data?' And there was no response. They don't want to see the data."

Steve has run many surveys and he has consistently found that it is the vaxxinated who are getting sick and it is the hospital protocols that are killing people.

Alex asks Steve what he thinks is going on, with Deborah Birx saying that she never thought the vaxxine would help and with Fauci resigning.

Steve thinks the wheels are falling off the hoax, saying, ***"This is the greatest killer of all time. This is unprecedented. The numbers here are so large...this is killing people at a much higher rate than heart disease is. It's the new Number One killer and the CDC is silent on all of this."***

Steve says he approached [Carol Crawford at the CDC](#), who's in charge of "stopping misinformation spreaders" and he told her, he'd gather the top 20 "misinformation spreaders" in the same room and she could present her hot topics and they could present theirs and they could have a nice, civil discussion.

He says, ***"She's not interested in that, which tells me she's not interested in stopping the 'misinformation-spreading' because she knows damned well we're not talking misinformation, here. It would be exposed for them to go on-camera. This is why we're being ignored by the FDA, the CDC, the NIH..."***

"We can look at the death tolls and the injury tolls ten different ways and we'll get the same results."

On his [Substack](#), Steve wrote about being [accused of making false statements](#) by Media Matters, an organization of which he was an original donor. He was then de-platformed from their website's comment section after he offered to provide them with the data so they could verify his claims.

He wrote, *"It appears that nobody in the world is confident that I am lying because [I've offered up to \\$1M](#) to anyone who thinks they can challenge me and [there are no acceptances of any of my 15 debate offers.](#)"*

He tells Alex here, *"Donald Trump was the one who created the vaccine in the first place. If he comes out with the truth about the vaxxine, Boy, that's gonna wake up a lot of people...the truth always comes out...You always want to be on the right side of history and if you're Trump, you like to never be wrong. He doesn't like to admit he's wrong – but he has to, in this case."*

"But the point is that if he does that, then he becomes on the right side of history and that forces the Democrats to dig in deeper, defending the vaxxine, which makes them lose bigger and bigger and bigger, over time, because the truth does come out and it's amazing to me that these people who have left the CDC and the FDA, Boy, they don't want to talk to anyone...because they don't want to incriminate themselves for participating in this."

The Vaccine Adverse Event Reporting System (VAERS) is a web-based vaccine adverse event self-reporting system monitored by the FDA that is widely thought to be inaccurate and that it may only reflect as little as 1/100th of the actual numbers. They stopped reporting the data two weeks ago!

Kirsch conservatively estimates that the underreporting to VAERS is by a factor of 41 and that VAERS is only capturing around 2% of the actual adverse events.

To get the real numbers, he says you have to multiply the official VAERS numbers by 41 – and when you do that, you get over half a million deaths in the US.

But Steve appears to be referring to an earlier VAERS report, because [VAERS' current COVID Vaccine Reported Deaths](#) is at 30,347, which multiplied by 41 is over 1.2 million deaths, which is a conservative estimate. Many people think it's over twice that amount.

Up next, Steve recently wrote, *"I'll be posting an interview where people will go on the record about illegal falsification of medical records and death certificates. Did you know that in America today, if you died shortly after vaccination, even when there is a VAERS report, that your medical records will not reflect this and it will be omitted from your death certificate as well?"*

Yuval Noah Harari spills the beans: 'We Just Don't Need the Vast Majority of the Population'

Technology will 'make it possible to replace the people'

Top World Economic Forum adviser Yuval Noah Harari has declared in a recent interview that the “*vast majority*” of the world’s 7.5 billion people are simply no longer needed due to technological advances in artificial intelligence, machine learning and bioengineering.

In one sentence, Harari validated what we “conspiracy theorists” have been saying for years, that globalist power elites want to rid the world of people deemed “*useless*” in their eyes. That’s why we call them global *predators*.

“*We just don’t need the vast majority of the population,*” said Harari, who is a historian, futurist, popular author and, most importantly, the chief adviser to Klaus Schwab, founder and director of the extremely influential WEF.

Every year the WEF entertains thousands of devoted followers at its headquarters in Davos, Switzerland. These devotees include heads of state, congressmen, governors, top corporate CEOs, even Hollywood entertainers and stars from the sports and music world. They are being fed a full diet of propaganda cooked up by Luciferian-influenced intellectuals like Harari and Schwab.

Shocking

Data Reveals COVID Vax Has Killed 5 To 12 MILLION People Worldwide

This article was originally published by [Rhoda Wilson at The Exposé](#).

What is the number of deaths, worldwide, from Covid injections? By doing a rough calculation Steve Kirsch arrives at a ballpark figure of 12 million.

To give the number some context, that is 40x the number of Americans who were killed in World War II (“WWII”). It’s more than double the number killed by Covid, Kirsch wrote.

WWII is recognized as beginning on [3 September 1939 when Great Britain and France declared war on Germany](#) after Germany invaded Poland. It ended in 1945 after Japan formally surrendered.

[According to Britannica](#), about 298,000 Americans died during WWII. In total, an estimated 40,000,000 to 50,000,000 people died worldwide over the six years of WWII.

The first Covid shot was delivered by [Great Britain on 8 December 2020](#) “marking the start of a historic mass vaccination program.” France [delivered its first shot](#) 19 days later on 27 December 2020.

The Covid shot campaign has, so far, been going for 20 months. According to *Our World in Data* 12.46 billion shots have been delivered, 5.89 million per day. However, [according to data collected by Bloomberg](#), “the latest rate was roughly 8.46 million doses a day ... 159 shots for every 100 people worldwide.”

Yesterday, on 15 August, [Britain became the first country](#) in the world to approve Moderna’s “next generation” Covid shot – Spikevax Bivalent.

[Margaret Anna Alice](#) asked if anyone could estimate the global death toll from the Covid shots.

In my opinion, a reasonable estimate is to divide the number of doses by 1,000.

If you do that for the 600 million doses delivered in the U.S., you get 600,000 deaths which is right in the ballpark.

A more conservative number is to divide the number of doses by 2,500. This is the number [Mathew Crawford estimated from global data: 411 deaths per million doses](#). Earlier, I offered a \$1 million reward to anyone who found a significant error in his work. No takers. This is [documented on my Substack](#) and in my Twitter stream, but, of course, everything I tweeted was deleted by Twitter as being unsafe. A free \$1 million no strings attached. Nobody accepted.

So that conservative estimate gets you to 5 million killed (only 16x the number of Americans killed in World War II).

We are approaching the [6 million Jews killed in the Holocaust over 12 years](#).

But we are killing people worldwide at a rate at least 6x faster than the Germans did.

We are killing nearly close to 10,000 people every single day (the latest rate was roughly 8.46 million doses a day).

Interestingly, this is not self-limiting because [385,000 babies are born every day](#). So, the killing can go on indefinitely, even if the birth rate drops by 90% due to the shots.

In case you were wondering. I just thought I’d point that out.

Dose data was from this Bloomberg article: [More Than 12.4 billion Shots Given: Covid-19 Vaccine Tracker](#).

Summary:

We are killing an awful lot of people, but world leaders are looking the other way and saying nothing while all of us watch the high number of death reports in the media of people who died “unexpectedly” and hear no explanation from the medical community or the CDC.

We are supposed to trust that they have things well in hand, even though they won’t appear on camera in front of anyone who doesn’t have scripted, pre-approved questions.

The vaccine is never mentioned in any of these unexplained death reports.

Yet people all over the world have noticed that these unexpected deaths are ONLY happening to the vaccinated. Hmmm.... I wonder why?

The CDC will not require medical examiners to do the proper tests to make the association. They could easily do that. But they won’t. That tells you everything you need to know about the corruption.

So, it will be an unexplained rise in unexplained deaths due to unknown causes because nobody in the mainstream media is ever going to admit they were wrong and ask a few unscripted questions.

Even Donald Trump is afraid to speak out about what is going on. He remains silent too.

This is why we have no debates, only censorship.

Hundreds of people at the CDC are aware of what is going on, but they aren’t going to speak out or they will lose their job. Even the people who have resigned are remaining silent. It’s really stunning.

So, the killing continues unabated.

An Inspirational Message to the Unvaccinated

September 02, 2022

Dr. Pierre Kory, who has been outspoken in his criticism of the COVID-19 shots, has shared a message that is circulating the internet. The message comes complete with an “award” — a certificate of achievement to all the unvaccinated for “surviving the greatest psychological fear campaign in human history.”

The written message goes on to say, *“Even if I were pollinated and fully vaccinated, I would admire the unvaccinated for withstanding the greatest pressure I have ever seen, even from partners, parents, children, friends, colleagues and doctors ...*

They did what others could not, they were the tree that withstood the hurricane of insults, discrimination and social exclusion. And they did it because they thought they were alone, and believed they were the only ones ...

Never before in humanity has there been such a “casting,” now we know who are the best on planet Earth. Women, men, old, young, rich, poor, of all races or religions, the unvaccinated, the chosen of the invisible ark, the only ones who managed to resist when everything collapsed ... You are made of the stuff of the greatest who ever lived, those heroes born among ordinary men who glow in the dark.”

Top 7 most UNEXPECTED adverse events from the gene-mutating COVID jabs

Friday, September 09, 2022 by: [S.D. Wells](#)

([Natural News](#)) Over the past two years, there have been thousands of stories, cases, studies and adverse events reported regarding horrific “side effects” and health detriment caused directly or indirectly by the COVID-19 “vaccines.” Most people have heard about, read about, experienced, or had a loved one experience physical damage from the Fauci Flu jabs, including the most popular kind, including blood clots, myocarditis, pericarditis, heart attacks, strokes, and SADS (sudden adult death syndrome). Yet, there is more, and much more damage going on than all of that, unfortunately.

Though the vaccine industry and pharma in general are protected from liability of their health-decimating “medicines,” and though mainstream media never publishes anything negative about vaccines, there are many adverse events happening that you probably don’t know about, and many of the victims are spreading the word, and even winning settlements and lawsuits.

Here are the top 7 most UNEXPECTED adverse events from the toxic spike protein injections, and the attributed/linked very serious health consequences

- #1. [Shingles develops](#) (even in the eye)
- #2. Sciatica [shooting pains](#) (often down the center of legs)
- #3. [Restless leg syndrome](#) (RLS)
- #4. Loss of motor skills and critical [nerve damage](#)
- #5. Catch COVID [multiple times](#) after the shots
- #6. [Going blind](#), including developing optic neuritis (inflammation damages the optic nerve that sends visual info from the retina to the brain)
- #7. [Long, fibrous clots](#) that lack post-mortem characteristics (not same as blood clots)

COVID-19 vaccines have been linked to the reactivation of the virus that causes shingles.

New studies suggest a link between the Fauci Flu jabs and REACTIVATION of the shingles virus. This happens after the reactivation of the varicella-zoster virus (VZV), that can happen several times for some people. Several case reports indicate these shingles “flare-ups” and “eruptions” are happening shortly after getting a COVID-19 vaccine. In 2021, an article published by [Trusted Source via NIH](#) reported several cases of shingles eruptions after vaccination with mRNA jabs.

Serious nerve damage becoming a much more common “side effect” from the Fauci Flu stabs.

There are two main types of nerve cells: sensory nerves (carry messages of pain, pressure, sensations) and motor nerves (tell muscles to move). These nerves are fragile and can be damaged rather easily, including by spike proteins blocking the flow of blood and neurons to key areas, plus damage to the protective covering (myelin sheath) of nerves, leading to weakness and sometimes paralysis.

Certain vaccines, like the COVID jabs, can cause acute nerve damage by causing inflammation of the brain and spinal cord (ADEM). Since the spike proteins travel throughout the body, polluting vital organs, other nerve damage gets done, and some of it is irreversible.

COVID “vaccines,” as they are mislabeled, can also cause brachial neuritis (a.k.a. Parsonage-Turner syndrome) that affects nerves that control muscles in the shoulders, arms, and hands. Symptoms include burning sensations, pins and needles feeling, and loss of function after the vaccine.

Blood clots caused by COVID jabs can result in devastating injuries, including permanent blindness and deafness.

Blood clots can result in devastating injuries just about anywhere in the vasculature of the body. When clots occur in the brain in microvasculature (tiny blood vessels that distribute blood within tissues) of the eye, the person can experience impairment or total loss of vision. This is known to happen following vaccines, including COVID jabs.

Though the mass media and social media remain quiet about these events (ban, censor and delete posts as “misinformation” or “disinformation”), that does not mean they are not happening, and more often than one may think.

As it turns out, a quite large number of these incidents have been reported to government regulatory agencies, including VAERS (US system), the UK “Yellow Card” system, and Europe’s “EudraVigilance” database. In other words, mass numbers of visual injuries from COVID jabs are being reported worldwide. It’s actually a hot topic, and investigations are underway. Plus, add to that

chaos [sudden hearing loss](#) followed by deep vein thrombosis and pulmonary embolisms cause by the Fauci clot shots.

Restless Leg Syndrome – Pilot study from 2021 reveals as much as 7% of those who receive COVID-19 vaccinations suffer from RLS.

Nearly 3/4ths of those injected with spike proteins who suffer from Restless Leg Syndrome (RLS) afterwards had NEVER had RLS before in their lives. More than 13 percent of these victims of vaccine violence say that RLS did not go away after the first few days, meaning RLS for them could be long-term or even permanent. The conclusion of the pilot study also reveals that COVID-19 vaccination “may have provoked or lowered the threshold for RLS symptoms” in participants with previous RLS.

Triple-vaccinated for COVID show highest rate for catching COVID, repeatedly.

Reports worldwide reveal that COVID-19 “vaccine” effectiveness continues to drop, even though the effectiveness was very weak to begin with. Now, studies show that humans who are TRIPLE-INJECTED are now three to five times more likely to become infected with Wuhan “gain-of-function” disease than the unvaccinated. Let that sink in for a moment.

These results are evident for all age groups, not just the elderly or immune-compromised.

What’s worse is that deaths are skyrocketing for the fully injected, meaning they’re either dying from the virus or from the toxic jabs, that cause blood clots and heart stress.

“The figures show that the case-rates are highest among the triple vaccinated in all age groups,” reports Daily Exposé (of the UK)... “But not just by a little bit, instead by a million miles. And the gap between the unvaccinated and triple vaccinated has been getting worse by the month.”

Do you believe you were injured by the toxic Fauci Flu jabs? Maybe you have strange, long, fibrous clots that no doctor has ever seen before. These are most likely from the Fauci Flu jabs, that [collect heavy metals](#) and form nano-particle clots that can be fatal.

Take the [Vaccine Injury Claim Eligibility Quiz](#) now to see if you are eligible to file a claim for compensation for a vaccine injury. It’s quick and easy. Then, bookmark [Vaccines.news](#) to your favorite independent websites for updates on experimental “vaccines” that cause blood clots, myocarditis, and severe, chronic inflammation.

Huge U.S. Crimes!

THIS IS MURDER SANCTIONED BY THE STATE!

Scientists with ties to Bill Gates and Anthony Fauci Admit to Developing Vaccine that Spreads Like a Virus

08/04/2022 / By Mary Villareal

Scientists linked to Bill Gates said they are developing a [vaccine that spreads like a virus](#).

The research is subsidized by high-profile funding organizations with longstanding and close financial ties to the Bill & Melinda Gates Foundation. It is also supported by the National Institutes of Health, the mother agency of Dr. Anthony Fauci's National Institute of Allergy and Infectious Diseases.

[Self-spreading vaccines](#) are rooted in efforts to reduce pest populations. The virally-spread immune-contraception hijacks the immune systems of infected animals like non-native mouse species, preventing them from fertilizing offspring.

The earliest self-spreading vaccine efforts targeted two highly lethal infectious diseases in the European rabbit population in 2001. Spanish researchers field-tested a vaccine in the wild rabbit population on a small island just off Menorca. The vaccine spread to over half the 300 rabbits on the island, and the trial was said to be a success.

While the researchers may intend to make self-spreading vaccines, there could be ways to repurpose this science to develop biological weapons, which may prove uncontrollable and irreversible.

Humans have been weaponizing biology since 2000. A new virus has been released every two years since 2000. Dr. David L. Martin has been studying the patents issued since the late 1990s and has confirmed this to be TRUE!

Humans have already weaponized biology on several occasions. As the apartheid-era South African bio-warfare program showed, social, political and scientific pressures can lead to the misuse of biological innovation.

Project Coast, as it was called, was South Africa's program primarily focused on covert assassination weapons for use against individuals deemed a [threat to the racist apartheid government](#). In addition to producing contraptions to inject

poisons, Project Coast researchers developed techniques to lace sugar cubes with salmonella and cigarettes with *Bacillus anthracis*.

There had been many bio warfare programs, including several that were far more elaborate and sophisticated, but the South African program is important in thinking through malicious uses of self-spreading vaccines. One of Project Coast's research projects aimed at developing a human anti-fertility vaccine.

This idea came at a time when there was widespread concern over population explosion. Schalk Van Rensburg, who oversaw the fertility-related work at Project Coast, believed that this could bring his lab international acclaim and funding. (Related: [The Bill Gates globalist vaccine depopulation agenda... as revealed by Robert F. Kennedy, Jr.](#))

Van Rensburg and the director of the bio warfare program, Wouter Basson, said the military needed an anti-fertility vaccine for female soldiers not to become pregnant.

Other scientists involved in the project denied awareness of ulterior intentions or even their fertility work as part of a military endeavor. However, Van Rensburg and lab director Daniel Goosen said the real intention of the project was to selectively administer the contraceptive in secret to unsuspecting Black South African women.

In the end, the anti-fertility vaccine was not produced before Project Coast officially closed down in 1995 – 12 years after it was initiated. It ended with an earlier version tested in baboons, but never in humans. (Related: [Bill Gates pushes for a 90 percent vaccination rate worldwide.](#))

South Africa was not the only country to try to forcibly sterilize its population. European countries like Sweden and Switzerland sterilized members of the Roma minority in the early half of the 20th century, while countries like Slovakia continued beyond that.

More recently, analysts alleged that the Chinese government has been sterilizing women in Xinjiang, which is a province with a large population of Uyghur Muslims.

The Defense Advanced Research Projects Agency (DARPA) has also gotten involved in the research. The [University of California, Davis](#) has been working on a DARPA-administered project that is creating the first prototype of a self-disseminating vaccine designed to induce a high level of herd immunity against the Lassa virus and Ebola.

World governments at Agenda 21 in 1992 at Rio di Janeiro, Brazil launched a silent war upon their own people, using quiet weapons, lies and propaganda. The mainstream media is enabling this deception and genocide. Our mission in this war is to bring you the truth.

Because I am not recognized as a trained scientist, I AM NOT CONSIDERED TO BE A CREDITABLE to prove my contention that Covid-19 was genetically engineered through the use of CRISPR-Cas9 “gene” engineering methods. I have done my homework and diligence on this premise. The growing data and various studies provide more than just a circumstantial evidence (if not causal) that the spike protein as a vector was manipulated in an infinite number of ways to confuse the medical and scientific community. With the VAERS reporting system showing 30,000+ deaths to the vaxxes is ample evidence to validate my original premise that this is not about a hoaxed virus but is about Genocide by State sanction! Never in the history of the pharmaceutical industry has there been such ignoring the death numbers caused by the “gene” therapy. The swine flu vaccine was suspended after 27 deaths were reported in the initial phase of vaccinating the American public. This is premediated murder by the big pharma/health agencies/government!

It was Pfizer’s CEO, Albert Bourla and Moderna’s Tal Zak who said that *“We cracked the Code of Life”*. He called his vaxx a *“Delivery System”* which in itself infers that it was delivering more than a vaccine. We know with total certainty that it is delivering a spike Protein that continues to replicate itself once injected into the human body. Dozens of articles shared in this series have confirmed human manipulation of what people were injected with is not therapeutic but toxic and potentially fatal! It is the use of CRISPR-Cas9 “gene” editing that can be used for good but can also be used for evil nefarious applications!

Each day brings us another piece of the puzzle of what is the bringing into focus in how the global elite are pulling off this crime against humanity! Although this segment is perhaps the longest, it is also loaded with facts and evidence confirming everything I have said from the beginning of the Covid scandemic!

**Our Government wants you DEAD!
This includes the CDC, NIH, NIAID,
and the World Health Organization!!
The “Depopulation” agenda began
Shortly after the 1968 publication of
“The Population Bomb”
by Dr. Paul Ehrlich and his wife Anne.**

“Depopulation has been the World’s #1 Issue since 1968!” It underlies every global issue since. Whether it is climate change or the Global Reset, “depopulation**” is at the core of everything!! It’s all about Prince Charles of Wales’ and his Sustainable Development for the planet! Excuse me, I did not forget to call him King Charles now that the Queen Mum has passed at 96! It was in 1980, the International Union for Conservation of Nature published a world conservation strategy that included one of the first references to sustainable development as a global priority and introduced the term “sustainable development”.**

Anyone who is a skeptic of my statement should Google search the term “Georgia Guidestones” and read their goal engraved in granite stone back in 1980. The stone structure calls for the eradication of 93% of the world’s population. This is both an unsigned confession as well as a “Projection” of what they planned to do in their global genocidal plan.

At 4:00 AM, Wednesday, July 6th, 2022, unknown parties blew up the Georgia Guidestones. The following day an excavator was brought in to demolish the standing portion. Investigative journalist Jim Stone stated surveillance video tape taken from two different directions

showed no one approaching the monument before the detonation, and suggested that it may have been an inside job.

The Internet contains ample photos of the Georgia Guidestones when they were standing on the hills of Elberton, GA.

The “Sustainable Development” movement considers humanity as a cancer upon the Earth. During November of late 2021, Prince Charles made it clear that the 194 countries of the world and signatories to the Climate Change Conference held at Glasgow, Scotland hosted by Prince Charles of Wales had better step up to their commitment to the environment. Prince Charles, a.k.a. “The Antichrist of Revelation believes this cancer has to be eliminated, if we hope to restore the climate before the oceans flood the worlds.

This is a picture of a Electric car charging station that are popping up everywhere. Here's an interesting fact.... That 350kw generator uses 12 gallons of diesel fuel per hour, and it takes 3 hours to fully charge a car to get 200 miles. That's 36 GALLONS for 200 MILES!!! 5.6 mpg.

Proof you can't fix stupid...

Interestingly, California two weeks ago were asking its residents not to charge their electric vehicles; California Gov. Gavin Newsom is asking all Californians to not charge their electric vehicles between the hours of 4 p.m. to 9 p.m. while California grapples with an energy shortage as a heat wave bears down on the state. California also asked its residents to turn up their thermostats and turn off their lights. Governor Newsom made the request the same day he said there would be no more gas powered vehicles after 2035 in CA! Go figure! You can't fix stupid!

Leaked Video Suggests Israeli Health Officials Covered Up Serious Safety Problems With Pfizer COVID Vaccine

By Suzanne Burdick, Ph.D. | *The Defender* | September 8, 2022

A [leaked video recording](#) reveals researchers in June shared data with the Israeli Ministry of Health (MOH) showing serious and long-term side effects associated with Pfizer's [COVID-19](#) vaccine.

However, the MOH did not disclose the researchers' findings to the [expert committee that met later that month](#) to decide on recommending the vaccine for children under age 5, or with leaders of Israel's COVID-19 vaccine [booster program](#).

Additionally, the MOH on Aug. 2 issued a [report](#) — on adverse events following the Pfizer COVID-19 vaccine from Dec. 9, 2021, to May 31, 2022 — that contradicted the data presented during the early-June meeting.

“In fact, the report completely contradicts what was said in this discussion,” [Retsef Levi](#), Ph.D., a professor at the Massachusetts Institute of Technology and member of the [Israeli Public Emergency Council for the Covid19 Crisis](#), told [GB News](#) in an Aug. 21 [interview](#).

[Yaffa Shir-Raz](#), Ph.D., health communication and pharmaceutical companies public relations strategy researcher at Reichman University in Herzliya, Israel, translated the June meeting from Hebrew into English.

The English translation shows the research team [warned MOH officials](#) they should think carefully about how to present the researchers' findings to the public because they posed a potential legal risk, as the findings contradicted MOH's claims that serious side effects are rare and short-term.

Shir-Raz tweeted on Sept. 1 an excerpt from the recorded meeting in which the research team warned MOH seniors they would have to think of the legal ramifications of the team's findings.

According to the video recording, the researchers [informed MOH officials](#) about the many reports of serious and long-term side effects of the Pfizer vaccine, including side effects Pfizer didn't list on the patient information leaflet, such as digestive side effects — especially abdominal pain in children — and back pain.

Additionally, Levi told GB News:

“On the free text part of the form, where patients were allowed to report whatever they wanted to, they [the researchers] observed and got many, many reports of neurological side effects — some not currently listed by Pfizer as side effects of the vaccine.”

The researchers also noted many cases of what Levi called the “re-challenge phenomenon” — or the recurrence or worsening of a side effect following repeated doses of the vaccine — which the researchers said indicated there was most likely a causal link between the vaccine and many side effects.

“The research team repeatedly stressed during the discussion,” Shir-Raz said in her [translation and summary in English](#), “that their findings indicate that — contrary to what we were told so far — in many cases, serious adverse events are long-term, that last weeks, months, a year, or even more, and in some cases — ongoing, so that the side effect still lasted when the study was over.”

The side effects included menstrual irregularities and various neurological side effects, muscle-skeletal injuries, GI problems and kidney and urinary system adverse events, Shir-Raz said.

According to Levi’s review of the meeting footage, the researchers expressed a sentiment of “concern” and felt their “conscience” bothered them by the reality of their findings.

The researchers told the MOH officials their findings contradicted the MOH’s prior messaging that the vaccine was safe and side effects were both rare and short-lasting.

In 50% of the reports in which a duration was specified by the individual, the researchers said, the duration was over six months, [according to the video’s English subtitles](#).

Moreover, in 65% of the neurological cases that mentioned a duration, the individuals reported their symptoms were ongoing, Levi said.

“Now it turns out that the reality is not what the narrative was promoting,” Levi said. “The side effects are long-term and serious.”

The research team told the MOH officials:

“You have to think very very carefully about how you communicate this to the public because you may open yourself to legal lawsuits and liability issues because what you promoted is, in fact, not the reality in what we see in the reports.”

Despite the importance of this discussion, [Dr. Sharon Alroy-Preis](#), head of public health services at MOH — and the person who signed the contract with Pfizer — was not present during the meeting. The researchers [repeatedly asked](#) MOH officials to make sure Dr. Alroy-Preis saw their findings.

The MOH commissioned the Shamir Medical Center team of researchers with experience in pharmacovigilance to analyze the data from the adverse effects reporting system launched in Dec. 2021.

Although Israel began its COVID-19 vaccination campaign in 2020, it did not have an adverse effect reporting system until the end of 2021.

Steve Kirsch, executive director of the Vaccine Safety Research Foundation, commented on the news in a Sept. 2 [Substack post](#), asking, “*Why didn’t they release the original presentation made by the safety team?*”

“There needs to be an investigation ASAP into what happened, but the head of the MoH, [Nitzan Horowitz](#), isn’t calling for one,” he said.

“The precautionary principle of medicine now demands an immediate halt to the COVID vaccination program,” Kirsch said.

Kirsch also commented on the lack of media coverage of the Israeli researchers’ findings:

“Dr. Sharon Alroy-Preis, the Health Ministry’s head of public services and a top COVID adviser to the Israeli government, issued no public statement. Leaders of our ‘trusted institutions’ all over the world said absolutely nothing after the news broke on August 20, 2022.”

“This suggests that there is widespread corruption in the medical community, government agencies, among public health officials, the mainstream media, and social media companies worldwide: they will not acknowledge any event that goes against the mainstream narrative.”

“This is a level of corruption that is unprecedented. The atrocities here are clear-cut.”

“Everyone should be speaking out and calling for a full investigation and fully evaluating the safety data collected by the Israel government.”

Suzanne Burdick, Ph.D., is a reporter and researcher for The Defender based in Fairfield, Iowa. She holds a Ph.D. in Communication Studies from the University of Texas at Austin (2021), and a master’s degree in communication and leadership from Gonzaga University (2015). Her scholarship has been published in Health Communication. She has taught at various academic institutions in the United States and is fluent in Spanish.

The final article that I am about to share came as no surprise when it was posted on Friday, September 16, 2022. It has been long believed to have been the story when it came to 9/11 attacks on the WTC 1 & 2. In recent years we have been

blessed with a series of news reports of “deathbed” confessions, along with many whistleblowers that were courageous to risk their lives and safety by coming forth with exposing the demonic actions of demented minds. This story below is in many ways a fulfillment of Bible prophecy. At the end of humanity as we know it all lies and truth will be made known to the world.

CIA Agent Confesses On Deathbed: ‘We Blew Up WTC 7 On 9/11’

Published on September 16, 2022

Written by christendtimeministries.com

79-year-old retired CIA agent, Malcom Howard, has made a series of astonishing claims since being released from hospital in New Jersey on Friday and told he has weeks to live. Mr. Howard claims he was involved in the “[controlled demolition](#)” of World Trade Center 7, the third building that was destroyed on 9/11.

Mr. Howard, who worked for the CIA for 36 years as an operative, claims he was tapped by senior CIA agents to work on the project due to his engineering background, and early career in the demolition business.

Trained as a civil engineer, Mr. Howard became an explosives expert after being headhunted by the CIA in early 1980s. Mr. Howard says has extensive experience in planting explosives in items as small as cigarette lighters and as large as “80 floor buildings.”

The 79-year-old New Jersey native says he worked on the CIA operation they dubbed “*New Century*” between May 1997 and September 2001, during a time he says the CIA “*was still taking orders from the top.*” Mr. Howard says he was part of a cell of 4 operatives tasked with ensuring the demolition was successful.

Mr. Howard says the World Trade Center 7 operation is unique among his demolitions, as it is the only demolition that “*we had to pretend wasn’t a demolition job*”. He claims he had no problem going through with the deception at the time, because “*when you are a patriot, you don’t question the motivation of the CIA or the White House. You assume the bigger purpose is for a greater good. They pick good, loyal people like me, and it breaks my heart to hear the shit talk.*”

[\[John Kerry Admits WTC 7 Was Brought Down By Controlled Demolition\]](#)

But even he admits that now, looking back, “*Something wasn’t right.*” “*No good has come from this. This isn’t the America we envisioned.*”

Explaining how the building was brought down, Mr. Howard says, *"It was a classic controlled demolition with explosives. We used super-fine military grade nanothermite composite materials as explosives. The hard part was getting thousands of pounds of explosives, fuses and ignition mechanisms into the building without causing too much concern. But almost every single office in the Building 7 was rented by the CIA, the Secret Service, or the military, which made it easier."* Mr. Howard explains that WTC 7 was *"loaded with explosives in strategic places"* in the month leading up to the day that changed the course of American history. On September 11th, while the North and South towers burned, fuses were ignited in World Trade Center 7, and nanothermite explosions hollowed out the building, destroying the steel structure, removing the reinforcements, and allowing the office fires to tear through the rest of the building, hollowing it out like a shell.

World Trade Center 7 collapsed into its own footprint at 5:20pm, seven hours after the destruction of WTC 1 and 2. The building shocked witnesses by coming down at the speed of freefall, indicating that it encountered zero resistance on the way down.

Mr. Howard and his colleagues had done their job.

"When the building came down, it was such a rush. Everything went exactly to plan. It was so smooth. Everybody was evacuated. Nobody was hurt in WTC 7. We were celebrating. We kept watching replays of the demolition, we had the whiskey and cigars out, and then all of a sudden the strangest thing happened. We all started to worry that it looked a bit too smooth."

We watched the tape again and again and again and we started to get paranoid. It looked like a controlled demolition. We thought shit, people are going to question this. And then we heard that people from the street were reporting that they heard the explosions during the afternoon.

When we were told that the [BBC botched their report](#) and announced to the world that the building collapsed 20 minutes before it actually did... At that point we really thought the gig was up."

According to the official 9/11 report issued by the government, WTC 7 collapsed due to "[uncontrolled fires](#)" that were caused by debris that floated over from WTC 1 and 2, which had been hit by passenger planes. If the official narrative was true, WTC 7 would be the [first tall building in the world to ever collapse](#) due to uncontrolled fires, and the only steel skyscraper in the world to have collapsed into itself, due to "office fires."

Mr. Howard and his colleagues feared the public would see through the official narrative and rise up against the government, demanding to be told the truth.

"There were so many loose ends, so much evidence left behind. We thought the public would be all over it. We thought there would be a public uprising that the media couldn't ignore. They'd be funding investigations and demanding to know why they were being lied to. We thought they'd find chemical composites in the area that would prove Building 7 was blown up.

“We thought there would be a revolution. It would go all the way to the top, to President Bush. He’d be dragged out of the White House.

“But none of that happened. Almost nobody questioned anything. The media shot down anyone who dared question anything they were told.”

Follow The Money

Mr. Howard claims he has ***“no direct knowledge”*** about the destruction of North and South Towers of the World Trade Center, explaining that ***“CIA operations are very specific”*** and that it is common to be working on a larger project while only understanding a small piece of the puzzle.

[\[9/11: Larry Silverstein Designed New WTC-7 One Year Before Attacks\]](#)

But he has advice for investigators seeking to understand the entire puzzle and work out who was behind the most devastating attack on American soil in history.

“Follow the money.”

“When you want to find out who is behind something, just follow the money. Look at the trades made just before 9/11. These are the guys that knew what was coming. The sons of CIA agents, government officials. Close relatives of the most powerful men in America. Cheney, Rumsfeld. They all got rich. It wasn’t just the contracts awarded to their friends in the construction business and the wars and the kickbacks.”

“It was insider trading.”

Many countries including Britain, France, Germany, Italy, Japan and Monaco launched insider trading investigations in the wake of the 9/11 attacks, believing that if they could prove Al-Qaeda operatives profited on the stock market then they could prove the terror organization was behind the attacks.

And all the evidence pointed to **[heavy insider trading](#)** around 9/11.

Italy’s foreign minister, Antonio Martino, **[said](#)**: ***“I think that there are terrorist states and organizations behind speculation on the international markets.”*** German central bank president, Ernst Welteke, **[said](#)** his researchers had found ***“almost irrefutable proof of insider trading.”***

Even CNN reported that regulators were seeing ***“ever-clearer signs”*** that someone ***“manipulated financial markets ahead of the terror attack in the hope of profiting from it.”***

Mr. Howard says that a serious study of who profited on the stock market from 9/11 would ***“tear the heart out of the oligarchy in America.”***

“There is only one organization that spans the entire world, and let me tell you now, it isn’t and it never was al-Qaeda.”

It’s the CIA.

“There could never be a real investigation. The entire shadow government, as you call them now, are implicated.”

The 79-year-old, spending his final weeks at home, said he doesn’t expect to be taken into custody following his confession because *“then they’d have to go after everyone else. They will just use the media to attack me. They are all on the payroll to suppress everything around 9/11.”*

Mr. Howard’s “deathbed” confession confirms to all Bible-believing Christians that there is such a thing as “Cosmic Justice!” And it is coming sooner than most people realize.

Blessings,
