A new report reveals Dr. Anthony Fauci's ties to the Chinese Communist Party (CCP) and globalists who have profited from The China Act of War Virus chaos measures promoted by him as the leader of the U.S. Coronavirus Task Force

Dr. Fauci, 79, a registered Democrat, has been the major force behind research activities that enabled the CCP to manufacture lethal SARS coronaviruses, which in turn led to the Act of War release of SARS-CoV-2 from the Wuhan Institute of Virology (WIV)

In collaboration with the CCP and the World Health Organization (WHO), Dr. Fauci initially suppressed the truth about the origins and dangers of the virus, thereby enabling its spread from China to the rest of the world.

Dr. Fauci has supported and praised Director-General of the WHO, Tedros Adhanom Ghebreyesus, a member of a Marxist-Leninist Ethiopian political party with a corrupt past and terrorist ties who is accused of covering up deadly cholera outbreaks in Ethiopia.

Dr. Fauci recently published a paper in which he dismisses the possibility that SARS-CoV-2 was created in and released from the Wuhan Institute of Virology, arguing

instead for natural mutation. He also uses the disease to justify the “Green New Deal” and the globalist movement known as “the Great Reset”. He is very much in the camp of the World Economic Forum with Klaus Schwab. That fact alone makes Dr. Fauci a suspicious character in this global lockdown to bring on the 4th Industrial Revolution.

The Executive Summary of the report documents highly 15 questionable activities that Dr. Fauci has been engaged in, starting with the fact that he funded dangerous gain-of-function research on bat coronaviruses, both by individual Chinese researchers and the WIV in collaboration with American researchers. This research allowed the CCP and the PLA to create their own bioweapons, including SARS-CoV-2.

Dr. Fauci’s NIAID-funded gain-of-function research into bat coronaviruses was conducted in 2 parts. The 1st began in 2014 and ended in 2019, focused on “understanding the risk of bat coronavirus emergence.” It involved U.S. scientists Ralph Barric from the University of North Carolina and Charles Lieber from Harvard among others. Initial findings were published in *‘Nature Medicine’* in 2015. The cost came to \$7.4 million dollars in two equal payments of \$3.4 million dollars of taxpayer money! In unathorized expenditures.

The 2nd phase began in 2019 included additional surveillance of coronaviruses along with gain-of-function research to investigate how bat coronaviruses might mutate to affect humans. This 2nd phase was run by the EcoHealth Alliance, a nonprofit research group led by Peter Daszak, an expert on disease ecology.

The project proposal explained the research to be conducted as follows:

“We will use S protein sequence data, infectious clone technology, in vitro and in vivo infection experiments and analysis of receptor binding to test the hypothesis that % divergence thresholds in S protein sequences predict spillover potential’.”

In layman’s terms, ‘spillover potential’ refers to the ability of a virus to jump from animals to humans, which requires that the virus be able to attach to receptors in the cells of humans. SARS-CoV-2, for instance, is adept at binding to the ACE2 receptor in human lungs and other organs.

According to Richard Ebright, an infectious disease expert at Rutgers University, the project description refers to experiments that would enhance the ability of bat coronavirus to infect human cells and laboratory animals using techniques of genetic engineering.

In the wake of the pandemic, that is a noteworthy detail. Dr. Fauci has an agenda! To kill lots more people!

President Trump canceled funding for dangerous “gain-of-function” research on viruses in April 2020 after the Chinese-American collaborations became publicly known.

Dr. Fauci has garnered new funding that will almost certainly benefit Chinese scientists with CCP ties who are still working in various U.S. universities and other research facilities.

Part of the funding is again directed to the EcoHealth Alliance, which for years has outsourced its research projects to WIV and other Chinese researchers.

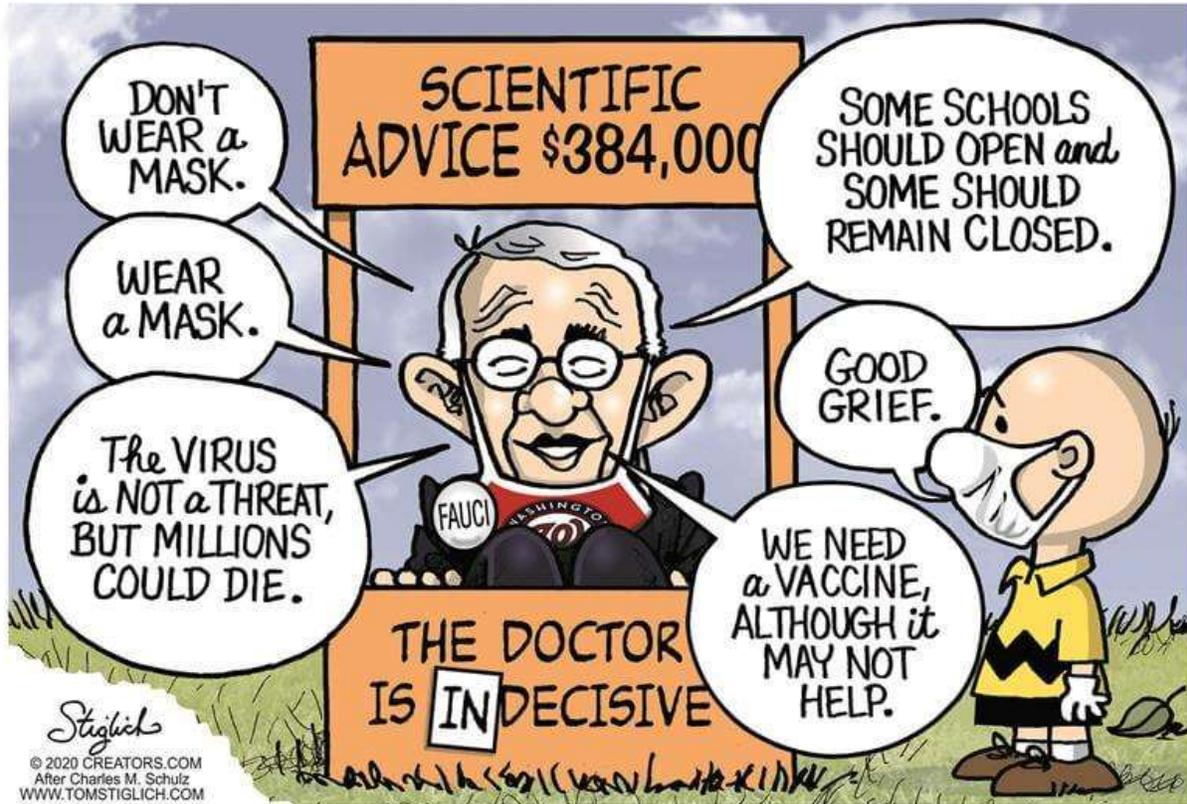

Recent reports indicate the NIH is now demanding the organization produce records detailing its work with the Wuhan lab before the funding is released.

Dr. Fauci continued outsourcing gain-of-function research to the WIV back in 2014, after then President Barack Hussein Obama ordered a stop to such research. At the time, Dr. Fauci continued to fund collaborations between U.S. and WIV researchers, led by Vineet Menachery, PhD, at the University of North Carolina.

Dr. Fauci defended and promoted gain-of-function research on bird flu viruses 10 years ago, saying such research was worth the risk because it allows scientists to prepare for pandemics. However, this kind of research does not appear to have improved governments’ pandemic responses at all. Keep in mind, “to prepare” can also mean “to cause”.

Dr. Fauci holds himself out as the ultimate source of objective scientific information and science-based conclusions. But in reality, he works with and empowers globalist pharmaceutical firms and globalist organizations such as WHO and the Bill and Melinda Gates Foundation.

These globalists gained power and influence as their policies and practices, including the shutdowns, continue to worsen conditions throughout the world as we are seeing in France, Germany and Thailand again today, but not in China.

The globalist, technocratic agenda also shines through Dr. Fauci's call for a political agenda that protects the population from pathogens by limiting or eliminating "aggressive" and manmade interventions into nature.

Dr. Fauci's utopian scheme, which overlaps with the "Green New Deal" would permanently suppress and disrupt the activities and lives of the 7.8-Billion people on Earth in the vain hope of reducing future viral diseases. As a Jesuit, the opposite is more likely to be the case.

He is the American official most responsible for the creation of SARS-CoV-2 in a Chinese lab but he blames its origins on human interventions into the environment and nature, thereby completely exonerating himself while holding humanity responsible.

At the same time he is using the pretext of protecting the people from viruses to impose a radical totalitarian agenda upon humanity. Indeed, the largest, most aggressive, and most dangerous human interventions into nature must include the Fauci-funded gain-of-function research in which viruses are taken out of nature and engineered into pathogens. These pathogens can be released into the world through chemtrail spraying! Fauci Continues to Hype COVID-19 Risks.

I furthermore promise and declare that I will, when opportunity present, make and wage relentless war, secretly or openly, against all heretics, Protestants and Liberals, as I am directed to do, to extirpate and exterminate them from the face of the whole earth; and that I will spare neither age, sex or condition; and that I will hang, waste, boil, flay, strangle and bury alive these infamous heretics, rip up the stomachs and wombs of their women and crush their infants' heads against the walls, in order to annihilate forever their execrable race. That when the same cannot be done openly, I will secretly use the poisoned cup, the strangulating cord, the steel of the poniard or the leaden bullet, regardless of the honor, rank, dignity, or authority of the person or persons, whatever may be their condition in life, either public or private, as I at any time may be directed so to do by any agent of the Pope or Superior of the Brotherhood of the Holy Faith, of the Society of Jesus.

In the main body of the report goes on to detail Fauci's role in the media fear-mongering that has allowed pandemic measures to stretch from an initial call for a 2-week lockdown to 8 months and counting.

Most people have very unrealistic fears about the risk of dying from COVID-19. This is due in part to the CDC and to Dr. Anthony Fauci who inflate the risk of COVID-19 deaths.

According to data released by the CDC just 6% of the total COVID-19-related deaths in the U.S. had COVID-19 listed as the sole cause of death on the death certificate. The remaining 94% had an average of 2.6 comorbidities contributed to their deaths.

Most people who die while being positive for SARS-CoV-2 are near to or past their average longevity. In addition to being elderly, the great majority are already ill with heart disease, cancer, or some other chronic illnesses that may in fact have caused them to die.

But even using the CDC's biased figures, the risk of death for most people is too small to require them to sacrifice the quality of their lives as the government demands under the threat of catching COVID-19.

In his rise to power, Dr. Fauci has done a great deal of additional damage.

For example, by suppressing the most effective, safest, and least expensive medication treatment, hydroxychloroquine in varied combinations, while manipulating his clinical research to promote Gilead's (NASDAQ:GILD) an ineffective, dangerous, and highly expensive drug remdesivir.

Dr. Fauci has also been supporting inflated COVID-19 case counts and reported deaths from the CDC, then using the inflated estimates to justify oppressive public health measures that have no precedent and little or no scientific basis, but add to his influence and power and to the wealth of his globalist associates.

It is time for President Trump to fire Dr. Fauci, to investigate this entire disaster, and to consider what needs to be done to protect the U.S. and the world from future lab-generated virus disease chaos, whether accidental or deliberate. The sad part is the President cannot fire this 37-year bureaucrat at will. It's not as simple as when Dr. Trump used to say on his television "Your Fired!"

During an interview with host Chuck Todd of NBC's 'Meet the Press' Dr. Fauci director of the National Institute of Allergy and Infectious Diseases did his best to spread fear and panic warning that something dramatic has to be done right away to once again bend the curve of covid infections across the country.

"Chuck, I'd have to say, honestly, unless something changes dramatically, which I don't see that happening because the curves when you look at the dynamics of an outbreak that you see usually three, four, five-week period of time before curves start really coming down," Fauci said.

Fauci then got down to his favorite subject, imposing restrictions on ordinary Americans.

"So I think we're going to be faced with another situation we're going to have to make decisions as a nation, state, city and family that we're in a very difficult time and we're going to have to do the kinds of restrictions of things we would like to have done particularly in this holiday season because we're entering into what's really a precarious situation because we're in the middle of a steep slope."

Fauci as is usual did his best to scare as many people as possible. Dr. Fauci is a fear-mongerer for his own devious purposes.

What's interesting is Florida is not on lockdown, no mask restrictions yet that state is not doing any worse than those state's imposing tight restrictions.

What do you think? Are you prepared for another extended national lockdown?

Dr Fauci warns that 'it's going to be months' before children get a COVID vaccine because doctors must see how the vaccination performs with adults first.

Dr Anthony Fauci, the nation's top infectious disease expert, said Sunday November 29th that it could be months before children get a COVID-19 vaccination. Fauci said it's important to see how the vaccine performs with adults before administering it to kids.

"It's going to be months. And the reason is traditionally when you have a situation like a new vaccine, you want to make sure, because children as well as pregnant women, are vulnerable," Fauci said on Meet the Press.

"So, before you put it into the children, you're going to want to make sure you have a degree of efficacy and safety that is established in an adult population, particularly an adult, normal population," he added.

The process will then involve a 'bridging study' which will look for similar results as the adult trials, Fauci said.

Dr Anthony Fauci, the nation's top infectious disease expert, said Sunday that it could be months before children get a COVID-19 vaccination. Fauci said it's important to see how the vaccine performs with adults before administering it to kids. □

"You can say, okay, now we have safety in the children. We have comparable immunogenicity, namely the same type of immune response," Fauci added.

"We can get this expeditiously approved for the children before going through a 30,000 person trial that may take a longer period of time."

Fauci also said on Meet the Press that it's 'not too late' for people traveling home after Thanksgiving to help curb the virus by wearing masks, staying distant from others and avoiding large groups of people.

The number of new COVID-19 cases reported in the United States topped 200,000 for the first time Friday, according to data from Johns Hopkins University. Since January, when the first infections were reported in the U.S., the nation's total number of cases has surpassed 13 million. More than 265,000 people have died. The fact that these numbers are no higher than any of the previous three years.

Fauci said the arrival of vaccines offers a *"light at the end of the tunnel"*. This coming week, the Advisory Committee on Immunization Practices will meet with the Centers for Disease Control and Prevention to discuss a rollout of the vaccine, he said.

He added that President-elect Joe Biden should focus on distributing vaccines in an *"efficient and equitable way."* Fauci also said he planned to push the new administration for a rigorous testing program.

"Health care workers will likely be among the first to get the vaccine, with the first vaccinations happening before the end of December, followed by many more in January, February and March," he said.

Dr. Fauci's buddy Dr. Birx says *"Americans who gathered at Thanksgiving need to assume they're infected with COVID-19, get tested this week."*

Dr. Deborah Birx said Americans *"may have made mistakes over the Thanksgiving time period,"* and urged everyone who attended holiday gatherings last week to assume they are infected with COVID-19 and to get tested this week. Birx, the coordinator of the White House Coronavirus Task Force, made the statements during an appearance on "Face the Nation."

"We know people may have made mistakes over the Thanksgiving time period," Birx said on Sunday. "If you're young and you gathered, you need to be tested about five to 10 days later. But you need to assume that you're infected and not go near your grandparents and aunts and others without a mask."

Birx noted, *"We're really asking families to even mask indoors if they chose to gather during Thanksgiving and others went across the country or even into the next state."*

Birx warned that she believes there will be massive spikes of coronavirus following Thanksgiving. The evidence does not support her statements. No one has proven the Covid-19 really exists. They failed to confirm the "Gold" Standard of virology known as Koch's Postulates. They have no science to back up their claims. Even their statistics are flawed by false positives, and the rigging the numbers, etc.

"Going into the Memorial Day weekend we had less than 25,000 a day, we had only 30,000 inpatients in the hospital and we had way less mortality, way under a thousand," Birx said. "We're entering this post-Thanksgiving surge with three, four and 10 times as much disease across the country," Birx said during the interview. "And so that's what worries us the most."

"We are deeply worried about what could happen post-Thanksgiving because the number of cases, 25,000 versus 180,000 a day, that's where- that's why we are deeply concerned," she said.

Birx said despite coronavirus cases and hospitalizations falling in the northern plains states, *"we're worried that all of that will be reversed"* because of Thanksgiving gatherings.

While some governors implement more stringent restrictions as the COVID-19 cases rise, Birx took aim at the freedom-embracing governors and mayors who have allowed their constituents to decide which activities they are comfortable in doing and not doing during the pandemic.

"To every American, this is the moment to protect yourself and your family," Birx stated. "So if your governor or your mayor isn't doing the policies that we know are critical — masking, physical distancing, avoiding bars, avoiding crowded indoor areas — if those restrictions don't exist in your state, you need to take it upon yourself to be restricted. You need to not go to these places. You need to protect your family now."

Birx revealed that she expects to provide a coronavirus briefing to the incoming Biden administration on Monday.

"The one thing that we will bring to the Biden administration in that discussion is to understand how they want to see the data because data isn't helpful if it's not actionable," she said. "And each group needs to see it the way it moves them to action." Birx will continue to brief Vice President Mike Pence everyday.

Dr. Anthony Fauci, director of the National Institute of Allergy and Infectious Diseases, said that if United States experiences the current rate of infection then [Americans should not hold Christmas celebrations](#) this year.

"What we expect, unfortunately, as we go for the next couple of weeks into December, is that we might see a surge superimposed on the surge we are already in," Fauci said during a ["Meet the Press"](#) interview on Sunday. "I don't want to frighten people, except to say it is not too late to do something about this."

Dr. Fauci cautioned that the upcoming holiday season is *"a precarious situation."*

White House coronavirus advisor Dr. Anthony Fauci said during an interview this week with the *'New York Times'* that convincing skeptics to take a COVID vaccine is a matter of paramount importance to safeguard the public health.

Many of these people *"actually don't think that this is a problem,"* Dr. Fauci said during a conversation with the Hastings Center. He also pointed out that many people simply don't accept the fact that a vaccine was developed so quickly, especially since experts during the early days of the outbreak warned that a vaccine could take years.

After slamming all the *"fake news"* surrounding the virus and the vaccine, Dr. Fauci complained that he was *"stunned"* by peoples' reluctance to believe in the virus.

After the NIH estimated that 75% of the US population would need to receive the vaccine to establish "herd" immunity, Dr. Fauci insisted that he would like to see *"the overwhelming majority"* of people to receive the vaccines so we could *"essentially really crush this outbreak."*

"Despite a quarter million deaths, despite more than 11 million infections, despite 150,000 new infections a day, they don't believe it's real. That is a real problem," Fauci said. They don't believe it because there is no evidence the virus exists.

Speaking earlier this week at the NYT's Dealbook virtual conference, Dr. Fauci said that *"if we have an effective vaccine and 50% of the population refuses to take it, you still have a considerable public-health challenge."*

Many Americans have pointed to the speed at which the vaccine was developed for making them uncomfortable with taking it. But Dr. Fauci tried to explain that the speed is largely a factor of scientific advances that helped unlock the mRNA approach being used by Pfizer and Moderna.

Additionally, once the data is ready for review - Pfizer is submitting its vaccine for an EUA on Friday, the company said - Dr. Fauci explained that the data are reviewed by both internal and external committees and researchers.

"By the time you get the FDA deeming that this is a safe and efficacious vaccine, you've had a independent and transparent process decide," Fauci said. *"We've got to keep hammering that home because for the group of people who are concerned about the process, the process is sound."*

At this point, only the naive should believe that Dr. Fauci is sincere in his hopes to convince skeptics to take the vaccine. In the end, only one thing is going to force people to take the vaccines, and that's the "soft" pressure of exclusion - or a more heavy handed approach, like mandatory vaccination orders.

"So if we can hang together as a country and do these kinds of things to blunt these surges until we get a substantial proportion of the population vaccinated, we can get through this," Fauci said.

Fauci also warned that the US may see 'surge upon a surge' of the coronavirus in the weeks after Thanksgiving, and he does not expect current recommendations around social distancing to be relaxed before Christmas.

The director of the National Institute of Allergy and Infectious Diseases, told ABC's This Week that the level of infection in the US would not 'all of a sudden turn around'.

"So clearly in the next few weeks, we're going to have the same sort of thing. And perhaps even two or three weeks down the line ... we may see a surge upon a surge," he said.

Fauci addressed the school issue, saying that spread *"among children and from children is not really very big at all, not like one would have suspected."*

"So let's try to get the kids back, but let's try to mitigate the things that maintain and just push the kind of community spread that we're trying to avoid," he said.

Meanwhile, in a major reversal, New York City Mayor Bill DeBlasio said the nation's largest school system will reopen to in-person learning. The mayor's reversal came after city hall was bombarded with protests.

With every open mouth statement that Dr. Fauci utters, we find one inconsistency after another. Here is what Dr. Judy Mikovits has to say about the vaccines Dr. Fauci wants you to be injected into your arm.

The Vaccines Are Worse Than Dr Mikovits Thought

Dr Judy Mikovits said that this coronavirus vaccine could kill 50 million Americans over the next 40 years. The versions being released by Pfizer and Moderna require storage at minus 70 degrees Celsius (minus 94 F) and might be far more deadly than even she originally estimated.

Why so cold? Children’s Health Defense explained in an August 6th article, “*mRNA vaccines undergoing Covid-19 clinical trials, including the Moderna vaccine, rely on a nanoparticle-based “carrier system” containing a synthetic chemical called polyethylene glycol (PEG).*”

The use of PEG (polyethylene glycol) in drugs and vaccines is increasingly controversial due to the well-documented incidence of adverse PEG-related immune reactions, including life-threatening anaphylaxis.

PEG (polyethylene glycol) if I recall correctly is “Antifreeze!” Now, if it is poisonous when ingested, why should anyone assume it is safe to be injected with it?” I did a reference check and this is what I got:

Propylene glycol, on the other hand, is considerably less toxic than ethylene glycol and may be labeled as “non-toxic antifreeze”. It is used as antifreeze where ethylene glycol would be inappropriate, such as in food-processing systems or in water pipes in homes where incidental ingestion may be possible. As confirmation of its relative non-toxicity, the FDA allows propylene glycol to be added to a large number of processed foods, including ice cream, frozen custard, salad dressings and baked goods, it is also often a main ingredient of E-cigarette liquid (E-liquid or E-juice). (YIKES!!!!!!) It still seems to be something that is not good for my system!

Ethylene glycol is poisonous to humans and other animals. Its metabolism produces calcium oxalate, which crystallizes in the brain, heart, lungs, and kidneys, damaging them; depending on the level of exposure, accumulation of the poison in the body can last weeks or months before causing death, but death by acute kidney failure can result within 72 hours if the individual does not receive appropriate medical treatment for the poisoning. –(Pastor Bob)

Roughly seven in ten Americans may already be sensitized to PEG, which may result in reduced efficacy of the vaccine and an increase in adverse side effects.

If a PEG-containing mRNA vaccine for Covid-19 gains FDA approval, the uptick in exposure to PEG will be unprecedented—and potentially disastrous.

Moderna documents and publications indicate that the company is well aware of safety risks associated with PEG and other aspects of its mRNA technology but is more concerned with its bottom line.

Lipid nanoparticles cause hyperinflammatory responses in the body, leading to severe reactions, hospitalization and potentially Death.

Why are LNPs (Lipid Nanoparticles) used in these vaccines? As Children’s Health Defense further explains:

Lipid Nanoparticles (LNPs) “encapsulate the mRNA constructs to protect them from degradation and promote cellular uptake” and, additionally, rev up the immune system (a property that vaccine scientists tamely describe as LNPs’ “inherent adjuvant properties”)

In other words, the LNPs are adjuvants, meaning they are designed to cause hyperinflammatory responses in human beings, once injected. This is done in an effort to induce the creation of antibodies that then allow the vaccine manufacturer to claim high “effectiveness” rates, even when those very same adjuvants cause severe adverse reactions.

According to recent vaccine trials conducted by Moderna, 100% of human subjects in the high-dose vaccine trial group experienced adverse reactions.

So why are Moderna and Pfizer using mRNA (messenger RNA) in a vaccine? They want to reprogram human DNA as an experiment and see what happens to our progeny. Critics in the UK say a side effect is sterilization which is good for the Powers That Ought Not To Be because they want to rid the earth of 6 billion plus commoners.

Update at 4:50 AM. From the Australian Independent:

These new vaccines are in an entirely new class all by themselves. They are known as “messenger RNA” (mRNA) vaccines, and they work by hijacking the protein-making machinery in your cells...

When Moderna was just finishing its Phase I trial, The Independent wrote about the vaccine and described it this way: *“It uses a sequence of genetic RNA material produced in a lab that, when injected into your body, must invade your cells and hijack your cells’ protein-making machinery called ribosomes to produce the viral components that subsequently train your immune system to fight the virus.”*

“In this case, Moderna’s mRNA-1273 is programmed to make your cells produce the coronavirus’ infamous coronavirus spike protein that gives the virus its crown-like appearance (corona is crown in Latin) for which it is named,” wrote The Independent.
End Update:

The Astra Zeneca vaccine does not require minus 70 degree Celsius storage and transport facilities because they are not using mRNA to reprogram the human body. But they are using a human fetus as an adjuvant. An adjuvant helps the vaccine to develop a heightened immune response. In this case they are using MRC-5 which is from the lung tissue of an aborted 14 week old Caucasian male. Adjuvants stir up your immune system. MRC-5 which is the DNA from that aborted baby is seen by your body as an invasion and mounts a defense.

American children have so many vaccine injuries by the time they are 21 that over half have diseases and syndromes that nobody had seen in these numbers before the 1960s when Big Pharma began rolling out so many more vaccines.

Now we know why Israel has opted to use the Russian vaccine and refused Pfizer, Moderna and Astra Zeneca's offers.

The modern diet, the pesticides, the herbicides, the vaccines and the drugs of Big Pharma have created an epidemic on inflammatory conditions in modern men, women and children. Are we prepared to treat hyperinflammatory cases by the tens of millions? The Englishwoman in the video below shows the Astra Zeneca insert which admits to using MRC-5 or human fetus body parts. She also says that the British government is looking for an AI system to help them collate and interpret the information when vaccines injuries and deaths mount up.

Bill Gates once smirked and said people are not paying attention to this virus but they will pay attention to the next one. (Are you prepared for Bioweapon 2?)

I think it is best that we skip this vaccine. Let everyone in the Gates family, in Big Pharma, in Corporate Media, on Wall Street, in the House and Senate, at the CDC and NIH take this vaccine first.

I confess to a love for animals so I think it is best that we skip animal testing when there are plenty of despicable human beings available.

Of course I would still refuse these vaccines because I do not believe Bill Gates should have the right to reprogram the DNA of 7 billion people just because he thinks it is a good idea.

The death rate is very low for people who were not going to die anyway from heart disease, cancer, COPD, drug overdoses, terminal kidney and liver diseases, automobile wrecks and suicide. If we all took vitamin D-3, the covid death rate would be less than the flu. I would add Quercetin and zinc to bring it even lower.

This is the article in which Dr. Mikovits said 50 million Americans could die from this vaccine. But notice she does not mention the nanoparticles which could very easily be far more dangerous to human health than regular molecules which do produce inflammations. Hyperinflammations might cause serious illness and death.

Dr Mikovits: Vaccine Could Kill Tens of Millions in America

<https://vidrebel.wordpress.com/2020/10/13/dr-mikovits-vaccine-could-kill-tens-of-millions-in-america/>

I mentioned Bill Gates smirking while hinting at the release of Bioweapon 2.
Bill Gates Smirked. Will People Die?

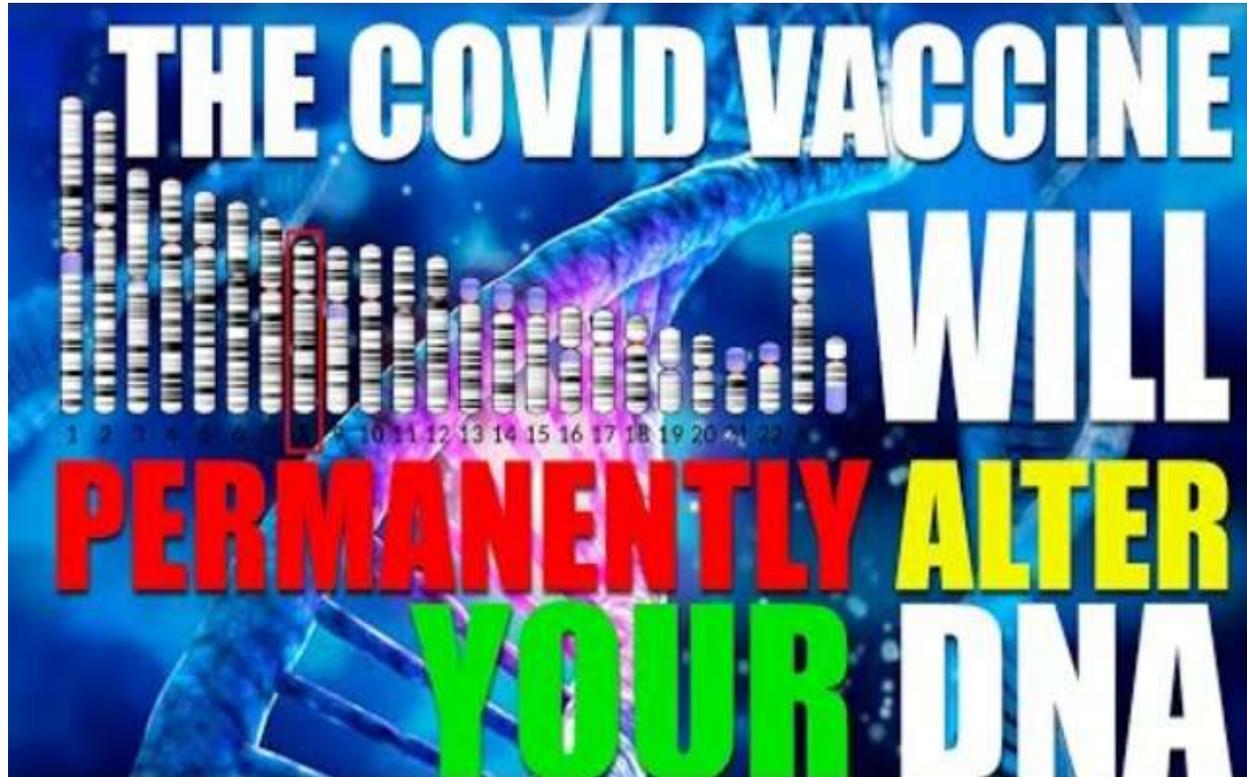

<https://vidrebel.wordpress.com/2020/07/06/bill-gates-smirked-will-people-die/>

I implied that the Corporate Media are as despicable as politicians and Big Pharma.

Matt Lauer made \$25 million a year reading the morning news. He had perks. He demanded a button be placed on his desk so that he could electronically lock Gentile women inside his office. Matt Lauer raped women so badly that ambulances had to be called to his NBC office. But that was before The MeToo# Movement.

Whopping Tales Of The Mainstream

<https://vidrebel.wordpress.com/2020/06/01/whopping-tales-of-the-mainstream>

Robert F. Kennedy, Jr. had this to say: ***“I would like to draw your attention urgently to important issues related to the next Covid-19 vaccination. For the first time in the history of vaccination, the so-called last generation mRNA vaccines intervene directly in the genetic material of the patient and therefore alter the individual genetic material, which represents the genetic manipulation, something that was already forbidden and until then considered criminal.”***

This intervention can be compared to genetically manipulated food, which is also highly controversial. Even if the media and politicians currently trivialize the problem and even stupidly call for a new type of vaccine to return to normality, this vaccination is problematic in terms of health, morality and ethics, and also in terms of genetic damage that, unlike the damage caused by previous vaccines, will be irreversible and irreparable.

Dear patients, after an unprecedented mRNA vaccine, you will no longer be able to treat the vaccine symptoms in a complementary way. They will have to live with the consequences, because they can no longer be cured simply by removing toxins from the human body, just as a person with a genetic defect like Down syndrome, Klinefelter syndrome, Turner syndrome, genetic cardiac arrest, hemophilia, cystic fibrosis, Rett syndrome, etc.), because the genetic defect is forever!

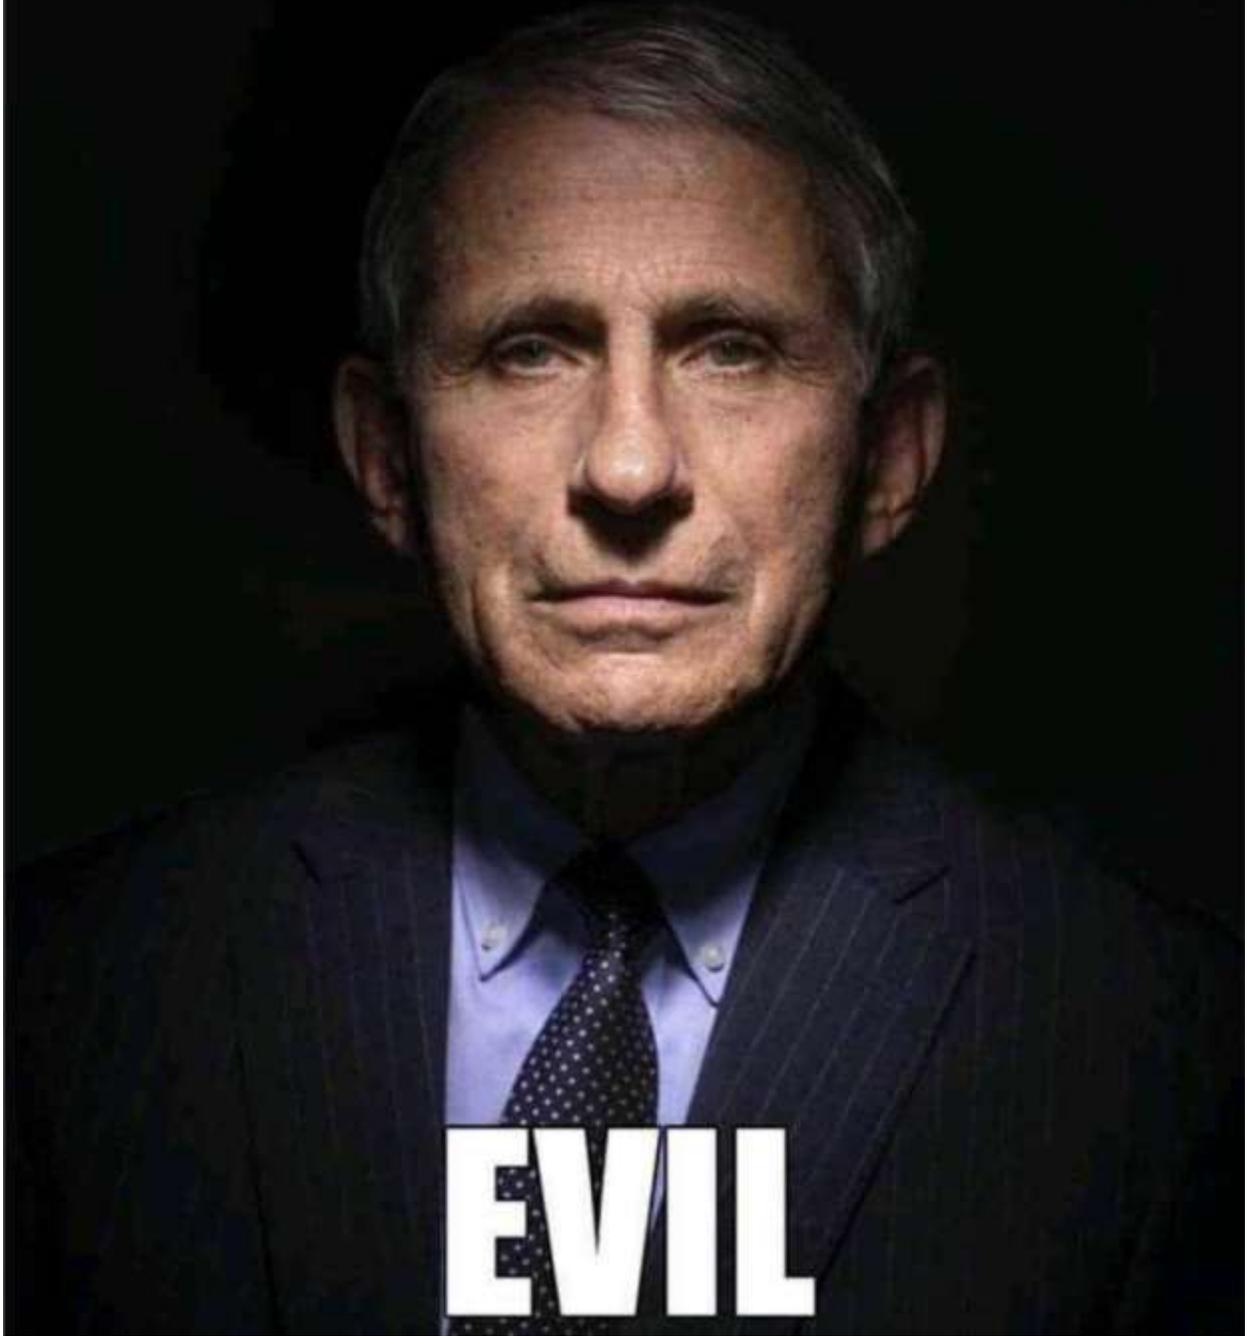

This means clearly: **“if a vaccination symptom develops after an mRNA vaccination, neither I nor any other therapist can help you, because the damage caused by the vaccination will be genetically irreversible.** In my opinion, these new vaccines represent a crime against humanity that has never been committed in such a big way in history. As Dr. Wolfgang Wodarg, an experienced doctor, said: In fact, this “promising vaccine” for the vast majority of people should be FORBIDDEN, because it is genetic manipulation! ”

The vaccine, developed and endorsed by Anthony Fauci and funded by Bill Gates, uses experimental mRNA technology. Three of the 15 human guinea pigs (20%) experienced a “serious adverse event”. We were never told what those “serious adverse events” were.

Note: messenger RNA or mRNA is the ribonucleic acid that transfers the genetic code of the DNA of the cell nucleus to a ribosome in the cytoplasm, that is, the one that determines the order in which the amino acids of a protein bind and act as a mold or pattern for the synthesis of that protein.

An excerpt from the Torsten Engelbrecht & Konstantin Demeter offguardian.org piece reads as follows:

When US president Donald Trump committed a kind of blasphemy by attacking Anthony Fauci, his pandemic consultant and practically the spokesperson for the White House regarding COVID-19, saying that:

People are tired of hearing Fauci and all these idiots. He's been here for 500 years. Fauci is a disaster. If I listened to him, we'd have 500,000 deaths."

A remarkable statement of historical dimension, since Trump is the first American head of state to cast doubt on Dr. Fauci, who has acted as the virus tsar for no less than six presidencies: Reagan, Bush, Clinton, Bush Jr., Obama and Trump.

You probably do not recognize the name of Torsten Engelbrecht as I've posted numerous times on how his "must read" book, *'Virus Mania: How the Medical Industry Continually Invents Epidemics, Making Billion-Dollar Profits at Our Expense,'* prepared me for what we are going through today. Engelbrecht has been onto the virus scam for a long, long, long, long time. Explanation of book here:
<https://www.torstenengelbrecht.com/en/virus-mania/>

The article might seem unduly rough, but you must understand COVID-19 is not Anthony Fauci's first rodeo. The singular big cheese at NIAID for 6 presidencies, Fauci is the gatekeeper to research funding and has more power than one man should ever be given.

Here's a summary of the article, although I highly recommend reading the entire article:

1. Not wearing a face mask has not lead to a single, extra death.
2. The COVID-19 death rate shows the viral cause for excess mortality is virtually impossible.
3. Fauci has been telling one lie after another for decades with a complicit mass media regurgitating his lies.
4. Fauci has a long habit of silencing and ignoring critical questions.
5. In order to understand the abundance of lies one has to understand that PCR tests are scientifically meaningless in detecting so-called SARS-CoV-2 infections, that according to orthodox researchers it is not excessively dangerous, and those referred to as COVID-19 victims probably did not die of it, but of non-viral factors and serious underlying diseases.
6. The viral narrative has become a fairy-tale.
7. The beginning of the fairy-tale; however, started with AIDS when "virus hunters" enjoyed god-like status accomplished by lies and deceit.
8. 50 million were persuaded to get vaccinated during the 1976 swine flu disaster, which resulted in severe side-effects including paralysis and death in 20-40%.

9. Due to “unsettled political waters” at the end of the 70’s, the NIH and CDC, “increasingly needed a major epidemic to justify its existence,” according to Red Cross office Paul Cumming. The HIV/AIDS theory was just the ticket.

10. According to Kary Mullis, the inventor of the PCR, *“All the old virus hunters from the National Cancer Institute put new signs on their doors and become AIDS researchers.”* All of a sudden everyone was fully employed, including Robert Gallo who just happened to need a new career at the time.

11. AIDS research started with big lies, specifically Gallo’s announcement that “the probable cause of AIDS has been found.”

12. After he filed a patent application for an antibody test, Gallo’s papers were printed, so nobody was able to review his work for a time, which is a severe breach of professional scientific etiquette.

13. Review later showed Gallo’s studies did NOT prove the virus thesis.

14. Kary Mullis is quoted as stating Montagnier, Gallo, nor anyone else has published papers describing experiments which leads to the conclusion that HIV probably causes AIDS. Mullis personally asked Montagnier for a reference proving HIV causes AIDS but he couldn’t name one.

15. When Engelbrecht asked Fauci and NIAID several times for such a study, he was told, “Dr. Fauci respectfully declines to respond to the questions that you emailed.”

16. This failure to respond to scientific questions is typical of misconduct cases and “runs like a golden thread through Fauci’s 36-year history as director of the NIAID.” Please see original article for specific examples – and there are many.

17. The approval of AZT, the 1st authorized AIDS medication, is a perfect example, as many labeled the study it was all based upon a “fraud,” “a gigantic botch-up,” and “seriously flawed.” Even a FDA toxicologist analyst stated there was insufficient data to support approval of AZT. Please refer to the original article for the study’s many flaws. Stopped after four months, the study was financed by AZT manufacturer Wellcome, which is now GlaxoSmith Kline. (All of this is quite reminiscent of what is currently happening with Remdesivir which recently obtained EUA approval for COVID-19 despite lack of results)

18. Fauci only appears in the media when critical questions are not asked. On the rare occasion when he was asked why AZT was the only drug available he stated numerous lies: “that it was safe”, “that there have been scientifically controlled trials”, and that “it’s effective”. AZT is a highly toxic drug, the FDA trials were not scientifically controlled, and about the only thing AZT is effective for is destroying bone marrow. Even the creator of AZT “dumped it on the junk pile, didn’t keep the notebooks, and didn’t even think it was worth patenting.”

19. Despite Fauci's promise of an AIDS vaccine 35 years ago – which has been given over a trillion US dollars so far, and an annual budget of around 35 billion dollars, it hasn't happened yet.

20. Fauci predicted the so called "bird flu" would cause 2-7 million deaths. WHO estimated by May 2006 it had killed only 100 people. He stated serious adverse events for the fast-tracked swine flu vaccine was "very, very, very rare," yet cases of narcolepsy came pouring in.

21. Fauci has pushed for preexposure prophylaxis of ART for HIV prevention in those that are HIV negative, i.e. giving highly toxic drugs to completely healthy people. Engelbrecht sent Fauci a list of important question about this but was told again, "Dr. Fauci respectfully declines to respond to the questions that you emailed."

22. Regarding the anti-viral Remdesivir which recently obtained EUA status for COVID-19, the Alliance for Human Research and Protection (AHRF) brings up the fact Fauci has a vested interest the drug as he sponsored the clinical trial – which has not even been peer-reviewed. To date, he still has not made public his financial relations with Gilead the manufacturer. Instead of using science, he made the promotional announcement sitting on a couch in the White House, without allowing for review of the data. At the time he also failed to disclose to the public that the primary outcomes of the study were changed, which the AHRF considers "dubious and suspicious", of which the mainstream media ignored, but should raise serious red flags. He then shrugged off a randomized, double-blind, placebo-controlled, multi-center peer-reviewed, published Chinese study that was stopped due to serious adverse events.

23. Remdesivir has caused serious kidney problems and the WHO "Solidarity" trial showed it did not produce any measurable benefit in mortality, the need for ventilators, or the length of hospital stay, but Fauci is silent on these findings. In a bizarre twist, Gilead came out with a statement that conclusive findings cannot be drawn from the trial because hadn't been peer-reviewed or published yet, despite the WHO stating that the large, international study was designed to generate the robust data needed to show which treatment are most effective. Gilead failed to mention that the study used to promote Remdesivir was not peer-reviewed or published before it was given EUA status. When it was finally published it was in the New England Journal of Medicine, the same journal as the fraudulent pivotal trial of AZT. The study only stated that there was a shorter recovery time. Engelbrecht states this has no validity because of the flawed data and the fact participants did not receive a true placebo. FYI: we are talking about BIG money here. According to this, the mediocre drug has already brought in \$873 million: <https://www.nytimes.com/2020/10/29/health/covid-remdesivir-gilead>

24. Fauci maligns anything that competes with his lucrative products. In the case of COVID, this includes HCQ which had numerous studies stacked against it from the beginning, from giving patients high killer doses to poorly done studies which were eventually retracted. Engelbrecht states that the Virology Journal study lacks validity

because the science behind SARS-CoV-1 & 2 is totally unfounded and was a cell culture study, not a patient trial.

25. Fauci is all about Big Pharma – not life-style factors. Robert F. Kennedy points out that while HCQ costs a measly 30 cents, it competes with Moderna's vaccine which Fauci's agency owns half the patent and has invested \$500 million in taxpayer money. He is aligned with numerous powerful industries and sits on the Bill and Melinda Gates Foundation Council, which in turn invests millions directly into Fauci's NIAID. But Fauci maintains he is apolitical and neutral.

26. There is a petition circulating titled #Fire Fauci.

Torsten Engelbrecht is an investigative journalist from Hamburg, Germany. The updated version of his book '*Virus Mania*,' co-authored by Claus Köhnlein MD was published in 2020. In 2009 he won the German Alternate Media Award. He was a member of the Financial Times Deutschland staff and has also written for OffGuardian, The Ecologist, Rubikon, Süddeutsche Zeitung, and many others. His website is www.torstenengelbrecht.com.

Konstantin Demeter is a freelance photographer and an independent researcher. Together with the journalist Torsten Engelbrecht he has published articles on the "COVID-19" crisis in the online magazine Rubikon, as well as contributions on the monetary system, geopolitics, and the media in Swiss Italian newspapers.

This is not the first article I have written on the little Jesuit, who the governor of New York Andrew Cuomo speaks with every night, according to his own words. As I was closing this article, I asked my wife, who is no scientist or an expert in anything, do you know what polyethylene glycol is? She watches crime programs and without thinking, said it's Antifreeze! She went on to say that many a murderers use it to poison their victim! I rest my case in this article.
