

Planet 7X

What I am about to share with you is one of the biggest mysteries that I have been following since I purchased my first computer in 1997. Actually, I was interested in this as early as 1989. This mystery began with an astronomer at the United States Naval Observatory.

Robert Sutton Harrington (October 21, 1942 – January 23, 1993) was an American astronomer who worked at the United States Naval Observatory. For much of his career, he proposed the existence of a Planet X beyond Pluto and supported searches for it, collaborating initially with T. C. (Tom) Van Flandern.

Harrington worked at the USNO. Another astronomer there, James W. Christy, consulted with him after discovering bulges in the images of Pluto, which turned out to be Pluto's satellite Charon. For this reason, some consider Harrington to be a co-discoverer of Charon, although Christy usually gets sole credit. By the laws of physics, it is easy to determine the mass of a binary system based on its orbital period, so Harrington was the first to calculate the mass of the Pluto-Charon system, which was lower than even the lowest previous estimates of Pluto's mass. Harrington died of esophageal cancer in 1993, according to the news media.

An article appeared in a 1989 newspaper about the reported discovery of something huge at the outermost region of our galaxy by Dr. Harrington. As I recall reading the story, the story went dark the very next day and has been dark ever since in the mainstream media, even to the point of refuting any existence of such a planetary mass.

Six months before Harrington's death, E. Myles Standish had used data from Voyager 2's 1989 flyby of Neptune, which had revised the planet's total mass downward by 0.5%—an amount comparable to the mass of Mars—to recalculate its gravitational effect on Uranus. When Neptune's newly determined mass was used in the Jet Propulsion Laboratory Developmental Ephemeris (JPL DE), the

supposed discrepancies in the Uranian orbit, and with them the need for a Planet X, vanished. There are no discrepancies in the trajectories of any space probes such as Pioneer 10, Pioneer 11, Voyager 1, and Voyager 2 that can be attributed to the gravitational pull of a large undiscovered object in the outer Solar System. Although most astronomers agree that Planet X, as Lowell defined it, does not exist, as of January 2016 there is speculation concerning Planet Nine.

For at least ten years we have had reports and pictures taken by people around the world that pictured objects close together in proximity of our Sun. Many were debunked with the usual comments, such as lens flare, camera hoax, etc. My curiosity increased with the advent of chemtrails in the sky that began in 1995 or shortly before. After that initial news report of Dr. Harrington in 1989, all discussion or coverage disappeared from the media. I was living in Kentucky doing graduate work toward plans to earn a doctorate in theology, pastoring a church in central Kentucky, and came across numerous news articles about residents experiencing high levels of congestive respiratory issues. What set this apart as something unrelated to the coal industry was that these reports were in areas where no coal mining existed in areas where respiratory issues were being found.

The chemtrail issue continued to be followed by one Clifford Carnicom. I bought his book on his observations and chemical analysis of what rained down on his home, vehicles, and property foliage. Chemtrails are different from jet aircraft contrails. It did not take long to recognize the difference. Jet contrails were simply condensation passing through the jet engines of commercial and military aircraft. If you see a jet contrail, it will completely dissipate from visibility in roughly a quarter to a half-mile from the moving aircraft. Chemtrails; however, do not dissipate from view, but rather they spread out and remain near motionless, like a hazy cloud, for hours on end.

Eight years ago, we returned to central Kentucky to help with the raising of grandchildren. We lived in a tiny village of 200 residents, called Fredericktown, KY. I would go down to the mail box about noon at the end of the dead-end street we lived on, to walk our dogs and bring back the mail. A friend of mine from Pittsburgh called me and we chatted while the dogs smelled the nearby corn field and flowers. We talked for about twenty minutes and in our chat I mentioned that I had not witnessed any chemtrail in the first month since we

moved from Pittsburgh, PA. The sky above me was one of those beautiful blue skies, not a cloud in the sky days. It wasn't ten minutes when I glanced up to my west and what appeared was not just a chemtrail but an "X" pattern directly over my head. It was a perfect "X" pattern and not much longer than a football field in length for each pass of the aircraft pattern to make the "X" in the sky directly above. I was stunned by what just witnessed, and it was as if I had been singled out to send a message to, we are still around. There was no question in my mind that the pilot was letting me know he was listening and wanted to make a subtle point. He made it and I have never forgotten that day.

Four years ago I have learned that the chemtrails consist of aerosol-coal fly ash. Disposal of coal fly ash is not as simple as hauling it to a dump or waste site somewhere. The analysis of the chemtrails show that it contains large amounts of aluminum, barium, strontium, and lesser amounts of waste common to that of coal-fired power plant fly ash.

There are pictures on the Internet, showing the interiors of the aircraft that disperse the soupy mix into the atmosphere. The pictures that I have viewed on the Internet include the sprayer nozzles, their locations, interior tanks used to hold the liquid mix. In fact, two years ago, there were pictures of President Trump touring the inside of a large aircraft with all the tanks and apparatus used to disperse the aerosol mix. Supposedly, this program is run by the United Nations from my research findings. The kinds of aircraft equipped to disperse this waste range from small 2-engine prop private aircraft, to Air National Guard C130's, to giant Boeing 747, and various aircraft types in between.

The term most commonly known or used by our own government is called "Operation Cloverleaf", among others. They spray at all hours of the day and night. When I lived back in the Pittsburgh area, I would often see aircraft spraying against a backdrop of a full or nearly full moon. Spraying is more common during hours of darkness and when it is raining since the clouds obscure the actual spraying.

Were it not related to the idea of blocking out visibility of the Sun and anything that might appear near the Sun, I might not have concluded that there is a relationship between chemtrail spraying and another unknown planet, that the powers in control of the world might not want us to see or know about, I might

have blown this off as nothing. But I am well-informed and have read a great deal of how the government sprayed cities and conducted experiments using the populous as lab rats as far back as the 1950's. So when the FCC granted the telecommunications a blank check to roll out the 5G Weapon of Mass Destruction under the guise of being able to download a movie for your convenience in seconds, without any safety testing for medical or health issues that might suggest it is not as safe as they say it is, I became alarmed. I saw a report days ago that 250,000 workers, installers, technicians, have been harmed from the 5G millimeter wave technology. I have done 3 articles on 5G posted on my web page at www.pastorbobreid.com/

You probably saw the short video that I linked from:

VIDEO-End Times Signs, Wormwood,(OR IS IT PLANET X,NIBURU), Is Now visible near the Sun!

This short 6-minute video that was posted on Steve Quayle's web site 10/21 or 10/22/2019, immediately brought me back to my nearly 25-years of researching, reading, which has been off and on and now back again. In hind sight, Dr. Harrington's report in 1989, suggests to me that chemtrail spraying may not be a coincidence since chemtrail spraying began only a few years later and have continued almost unabatedly ever since.

Then I learned of the 10-meter South Pole Telescope being erected. The South Pole Telescope achieved first light on February 16, 2007, and began science observations in March 2007. The SPT is a 10-meter (394 inch) diameter telescope located at the Amundsen–Scott South Pole Station, Antarctica. The telescope is designed for observations in the microwave, millimeter-wave, and submillimeter-wave regions of the electromagnetic spectrum, with the particular design goal of measuring the faint, diffuse emission from the cosmic microwave background (CMB).

At the South Pole you have to ask why? Well, as I recall, this was the area in which Dr. Harrington suggested that this object might be located. There are videos of Dr. Harrington discussing this on the Internet. Shortly after the SPT began operating, two photographs mysteriously posted on the Internet, in which confirmed a massive body in the southern sky.

Above: Picture of the South Pole Telescope.

Then there is the binary-lens telescope atop Mount Graham, Arizona, interestingly run by the Jesuits and called “Lucifer”. Various articles suggest that the Mount Graham site is perfect to study the sky in the southern hemisphere in the direction of the South Pole in Antarctica.

The first major survey with the SPT—designed to find distant, massive, clusters of galaxies through their interaction with the CMB, with the goal of constraining the dark energy equation of state—was completed in October 2011. In early 2012, a new camera (SPTpol) was installed on the SPT with even greater sensitivity and the capability to measure the polarization of incoming light. This camera operated from 2012–2016 and was used to make unprecedentedly deep high-resolution maps of hundreds of square degrees of the Southern sky. In 2017, the third-generation camera SPT-3G was installed on the telescope, providing nearly an order-of-magnitude increase in mapping speed over SPTpol.

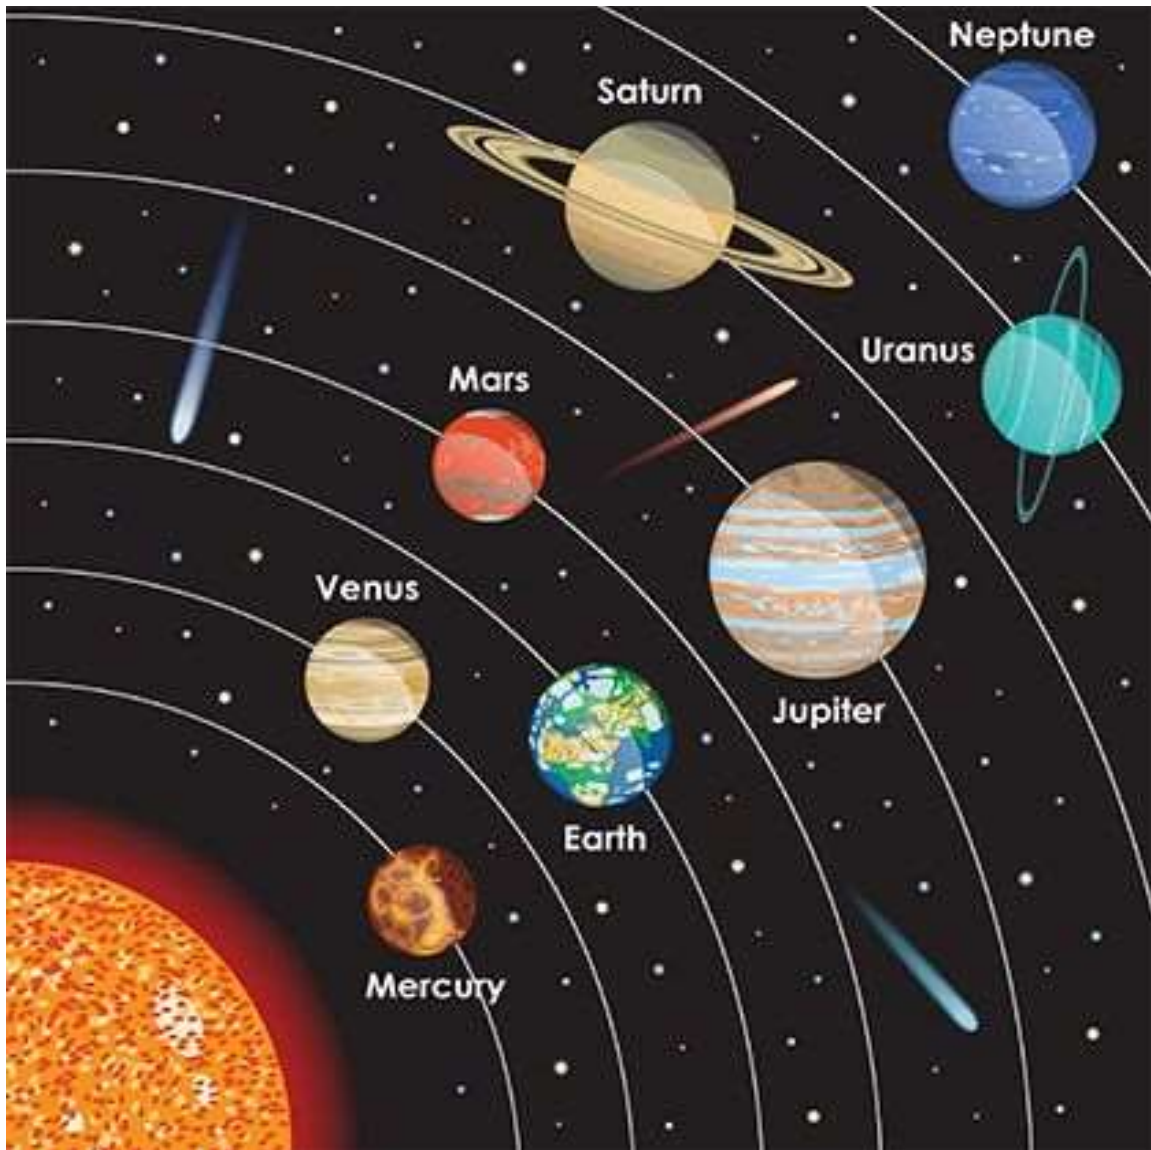

The SPT collaboration is made up of over a dozen (mostly North American) institutions, including the University of Chicago, the University of California, Berkeley, Case Western Reserve University, Harvard/Smithsonian Astrophysical Observatory, the University of Colorado Boulder, McGill University, The University of Illinois at Urbana-Champaign, University of California, Davis, Ludwig Maximilian University of Munich, Argonne National Laboratory, and the Fermi National Accelerator Laboratory. It is funded by the National Science Foundation and the Department of Energy.

As the list of names suggest, this is not a minor project, not in the least. Other than the two pictures that were mysteriously leaked to the Internet back in 2009, we have been told virtually nothing! But we are quite confident that there is something coming into our galaxy from an orbit different than the existing planets.

The small illustration above suggests that this object (Planet X) has an orbit different than that of the Earth or the known planets below.

The suggested orbit of Planet X in the upper illustration is in one of the links that I linked at the end of the article. It is more defined and legibility is much better. I show it here so that one can get an idea of why the SPT was constructed at the South Pole and not in Hawaii or some Pacific island. The SPT initial cost as I recall was around \$10-million but has cost infinitely more since it went into operation.

In 2012, I came across the name of Gil Broussard, a modest man from Louisiana. Gil Broussard worked in the oil and gas industry and is an amateur astronomer. I saw Gil Broussard interviewed in an interview on the Internet with one of the alternative news sites that captivated my interest. Prior to learning about Gil Broussard and his discovery with an 8-inch optical telescope of what he calls "Planet 7X", I had been following Marshall Masters at his web site YOWUSA, and his work on tracking "Nibiru". That was the name most often mentioned when the subject of a rogue planet somewhere out there coming from a southern direction. The following Important names in this search for Planet 7X include:

Dr. Robert S. Harrington, U.S. Naval Observatory
Planet 7X
Nibiru
Marshall Masters YOWUSA
Gil Broussard
South Pole Telescope
Chemtrails/Geoengineering

At the bottom of this article is a list of links to these men above and related videos of interest.

Planet 7X has been determined to be **8X** times larger than the mass of the planet Earth. Back in 2012 when I first came across the work of Gil Broussard, the guess was that Planet 7X would be visible to the human eye, or with binoculars, somewhere around 2016. All dates, from those familiar with this topic have been estimated speculation, and recent suggestions are now narrowing down, pointing at 2020 and 2021, when it enters our galaxy.

What I found very interesting about Gil Broussard's work, is that he has established a Biblical timeline in which previous visits of Planet 7X to our

atmosphere have been described in the Bible with events mentioned in the Old Testament. Gil's timeline chart is a general approximation of events recorded in the Old Testament. I do have some reservations about his forthcoming dates in relation to his Bible prophecy timeline. Regardless, I would encourage the reader to view all of Gil Broussard's videos and judge for you self of his work. You will find it to be very interesting.

One cannot dismiss the fact that the world has been given little information shared by the powers at be in thirty years. Along with the mysterious deaths of NASA scientists, as many as 25 under suspicious circumstances, we have little knowledge of the purpose of chemtrails; for which I hold the belief that the elite of the world does not want this information made public. It might be that Planet 7X has been the reason behind the government constructing below ground facilities for the (COG) "continuity of government", such as that beneath the Denver International Airport, Mount Airy in Pennsylvania, and many other locations around the U.S. Even Russia has built vast underground cities in the Ural Mountains of Russia capable of holding upwards of 50,000 people per underground city.

In the past few years Dr. Mark Skidmore, at the University of Michigan and Katherine Austin Fitts, publisher of the '*Solari Report*' have discovered there is an amount of \$40-trillion dollars that the U.S. government cannot locate or account for.

It would certainly be in the best interests of government authorities around the world to keep any and all cosmological events from the public. We can only imagine and speculate what might ensue in the event it can no longer be obscured by chemtrails spraying, becoming visible and panic breaks out all over Earth.

We can't say with absolute certainty that Planet 7X is an Extinction Level Event as some believe. Gill Broussard states that Planet 7X will pass around Earth and return to its southern orbit. Gill states the effects experienced on Earth will be largely related to the debris field that follows in the wake behind the movement of Planet 7X. Somewhere in my computer, I have all the Scripture passages that have cosmological significance. Their meanings are enhanced by

what we learn from Gill Broussard's study. The following list is of passages fall into the category of astronomy. There are others that I will add when possible.
