

Pfizer CEO calls People Spreading Vaccine 'Misinformation' Criminals

PHOTO: Pfizer CEO Albert Bourla talks during a press conference in Puurs, Belgium,

Pfizer CEO Albert Bourla has blamed people spreading “*misinformation*” on Covid-19 vaccines for the loss of “*millions of lives*,” and declared that things can only go “*back to normal*” once they take the jab.

Speaking to the NATO-backed [Atlantic Council](#) think tank on Tuesday, Bourla said that a “*very small*” group of people are spreading “*misinformation*” on Covid-19 vaccines, his company’s own shots included.

“*Those people are criminals*,” he told Atlantic Council CEO Frederick Kempe.

They’re not bad people. They’re criminals because they have literally cost millions of lives.

Bourla’s words echo those of US President Joe Biden, who during the summer accused social media platforms of “*killing people*” by offering a platform to vaccine skeptics and opponents. Though Biden later walked his comments back, he still insisted that “*bad information*” was supposedly responsible for deaths.

While studies have shown the efficacy of Pfizer's vaccine to wane with time, and although the vaccinated can still catch and become sick from Covid-19 regardless, Bourla insisted that mass vaccination will result in daily life going "back to normal."

"The only thing that stands between the new way of life and the current way of life is, frankly, hesitancy to vaccinations," he told Kempe.

At the same time, should any cases of side effects of Pfizer's vaccine emerge; the developer will not be held criminally accountable. Pharmaceutical companies are shielded from liability in the event of vaccine-induced injuries or deaths in the US, UK, EU, and multiple other jurisdictions.

Both the World Health Organization (WHO) and America's Centers for Disease Control and Prevention (CDC) have declared Pfizer's vaccine 'safe and effective'.

However, Albert Bouria, view is questionable from many points of view, and so it is important to hear from Karen Kingston. Karen has appeared on the Stew Peters show, Greg Hunter, the USA Watchdog, etc.

Karen Kingston is a former Pfizer employee and top biotech analyst who has researched and written about many cutting edge pharmaceutical issues. Kingston contends the so-called vaccines are in fact bioweapons and she can prove it with the FDA's own data.

Kingston also says the FDA's own research shows they have known it is the vax bioweapons that have caused all the deaths and injuries.

Kingston explains,

*“More people got Covid 19 (from the vax) than they got from placebos, but they pulled 409 people out of the vaccine group because now they are saying that was a side effect. **The side effect is the disease.** The FDA document is incriminating evidence.*

If Janet Woodcock (Janet Woodcock is the Acting Commissioner of the FDA) would read this in front of the Senate, she should be put in handcuffs for conspiring to commit aggravated assault and murder of American children and adults through poison. . .

They are calling them side effects. When you have a meeting two months before you approve and you list a bunch of severe chronic diseases that induce morbidity and mortality in children and adults, and you say you know this is going to happen, that is not a side effect.

That is an intended consequence. That is the effect of the vaccines. The effect of the vaccines is to cause havoc within your immune system. That immune imbalance results in heart attacks, heart inflammation; it results in neurological disorders ranging from fatigue to paralysis to brain fog to rapid onset to disorders, to narcolepsy, to death, to pregnancy stillborn, birth defects and miscarriages. They knew this was going to happen.

In the FDA data for Pfizer, they say, look, more people got Covid 19 that got vaccinated. They said that was a side effect. It is not a side effect—it is the effect. . . .

The majority of people are in agreement that the Wuhan lab spike protein that was put up on the genome web January 10th of last year is a bioweapon. If you read the FDA approval letter, what is the vaccines' ingredients?

It is the “synthetic” mRNA code, the computer generated artificial intelligence generated code, which was injected in your body that produces, and I am telling you this verbatim, it says it produces the ‘Wuhan-Hu-1 full sequence spike protein from genome web.’ It says in the (FDA) approval letter the vaccine produces the bioweapon. It says in the data that more people are getting Covid19 from the vaccine than from not being treated.

“People say I should be an expert witness. I don’t need to be an expert witness. We just need the FDA to read their own documents.”

In closing, Kingston says, *“I think we can work with science at the molecular level to heal this, but if people don’t know they are sick, then millions of Americans are going to die and our children are going to be part of this sacrifice. I am filled with deep, deep sorrow.”*

Karen Kingston: Pfizer vaccine approval part of a conspiracy to harm children – Brighteon.TV.

[\(Natural News\)](#) Former Pfizer employee Karen Kingston told Dr. Bryan Ardis that the *Food and Drug Administration's* (FDA) emergency use authorization of the Wuhan coronavirus (COVID-19) vaccine was part of a [conspiracy to harm children](#). She made this claim during the Nov. 3 episode of “The Dr. Ardis Show” on [Brighteon.TV](#).

Ardis had strong words for the FDA advisers who voted in favor of allowing the vaccine to be injected into children aged five to 11. *“Shame on the FDA committee members who voted yes to inject five- to 11-year-old Americans. I actually am so disgusted. I think you’re all complicit in any murder of children who die from myocarditis as a result of this. Citizens in this country should hold you accountable,”* he said.

Kingston agreed with Ardis, saying: *“This is nothing short of conspiring to commit aggravated assault and murder of children and adults through coercion. That’s what the FDA is doing. These are all criminal acts.”*

She quoted the Pfizer vaccine’s [Aug. 23 approval letter](#), which mentioned the risk of myocarditis or heart muscle inflammation. Kingston said: *“If you take a look at the FDA approval letter, it says ‘a known serious risk of myocarditis.’ So this is not a side effect, this is intentional. They are intentionally inflicting harm, inflammation, morbidity and mortality upon our children and our military.”*

According to the former Pfizer employee, there is a more sinister purpose to the vaccine approval.

"I think it's actually [a] plot to do harm. You actually are plotting and [intentionally wanting to hurt children](#) and teenagers, or you're being bought off or bribed. Regardless, you're complicit in the maiming and injuring of children," she said. (Related: [Covid vaccines harmed and killed more teens in 2021 than all other FDA-approved vaccines combined.](#)) "I feel that people need to understand that they were deeply betrayed. I mean – some people got two shots [and] a booster, [but] they're still wearing masks ... [and] getting PCR tests. This is not for your health; this is for you to be obedient to a sickness program."

Kingston: No shot is superior to children's natural immunity

Kingston also pointed out that no vaccine can surpass the protection granted by children's own immune systems. *"It's very clear that it is clinically and statistically impossible to make a vaccine that's more effective than a child's or teenager's natural immune response,"* she said.

"Their natural immune system – what God gave them – is more powerful than this computer-generated artificial intelligence genetic code that generates disease-causing spike proteins in your body. The whole thing is just beyond criminal."

Kingston's comments on children's natural immunity mirrored her sentiments during [her Nov. 2 appearance](#) on "Real Talk with Dr. Eric Nepute" on [Brighteon.TV](#). She emphasized to the Missouri-based chiropractor that children's natural immunity trumps the protection afforded by vaccines.

She told Nepute: *"Children do not get SARS-CoV-2 and they don't develop COVID-19, so it's statistically and clinically impossible to develop a vaccine that's going to be more powerful than their natural immune system. Why would we then inject them with a synthetic viral code to infect their bodies [and] override their natural immune system?"*

"It's nothing more than to harm the children, to kill the children. There's no scientific or medical argument to vaccinate children. They don't get [COVID-19] and they don't infect other people," Kingston continued.

Ardis mentioned that injecting children with the Pfizer vaccine goes against the precepts of [the Nuremberg Code](#). *"The Nuremberg Code consists of 10 points of ethics around human experimentation that were designated back in 1947 and adopted worldwide,"* he said.

"You can't use an experimental drug on humans without providing informed content to the individuals. You have to give them all the benefits and all the risks associated with these. Intellectually, he has [to have] enough information to let you experiment on them with this drug."

The code puts informed consent first and foremost. Its first point explicitly states that persons *"should have legal capacity to give consent; should be so situated as to be able to exercise [free power of choice](#), without the intervention of any element of force, fraud,*

deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision.”

Ardis pointed out: *“Do you really think a five- to 11-year-old child has the ability to give you informed consent? Children are at zero risk of death from COVID-19 or any other cold virus on the planet. These things are upsetting.”*

The host of “The Dr. Ardis Show” emphasized that the FDA advisers who voted yes to inject the COVID-19 vaccine into young children should be *“held accountable worldwide to an international health crime court.”*

He said: *“It is what it is – crimes against all humanity. This is maiming and murdering on a grand scale.”* (Related: [Dr. Bryan Ardis: FDA approved COVID-19 vaccine for kids despite being aware of its risks – Brighteon.TV.](#))

Watch [the full Nov. 3 episode](#) of “The Dr. Ardis Show” featuring Karen Kingston below. “The Dr. Ardis Show” airs every Wednesday at 10-11 a.m. on [Brighteon.TV](#).
