

Show Me The Proof!

Dr. Bryan Ardis vs Skeptics

Snake Venom is Credible Evidence for Covid-19

This week brought a massive revelation to the hidden cause of the Covid-19 virus by Dr. Bryan Ardis, in the form of a video *"Watch the Water"* aired on Stew Peters. The next day, on Tuesday, April 12th, 2022, Mike Adams aired a 3-part interview with Dr. Bryan Ardis. Dr. Ardis has appeared on InfoWars.com with Owen Shroyer in the past day as well. The credibility of this story is being dissed and refuted if not broad-brushed with skepticism by some well-known web sites.

Right out of the starting gate this week was the label "Conspiracy Theory" tagged to Dr. Bryan Ardis and his message. I have viewed some ten hours of video interview of what first appeared on Stew Peters show entitled *"Watch the Water"*. The title for this revelation might have been titled something better but it's done. My contention with that title is that it does not name the most important aspect of disbursing pathogenic poisons, that being the aerial spraying we have dubbed "Chem Trails". Remember that it was during the Vietnam War, the U.S. Air Force sprayed Vietnam with "Agent Orange", a predecessor to Monsanto's "Round Up". The purpose was to defoliate the jungle cover for the NVA.

The history of weather warfare is well established going back decades and we are being distracted from the combined effects of weather modification through energy. The New

Manhattan Project by Peter Kirby has laid the ground work for bio warfare and electronic energy. One cannot grasp the depth of research and technology without reading Peter Kirby's book, *'Chemtrails Exposed: A New Manhattan Project'*.

Skeptics and critics are having a field day with Dr. Bryan Ardis message; however, it is not my mission to refute Dr. Ardis. I am open to hear what the alleged experts have to say but I am more interested in reconciling points of conflict of which respected web sites have been tossed into the mix. From my first viewing, I knew and expected that critics would hit out at Dr. Ardis and his "lightning rod" references to the Vatican and the Satanic spiritual war behind all of this. For those of you unfamiliar with the many strange and suspicious statues, fountains, facades and structures that occupy Vatican City, the Pope's Audience Hall stands out for its uncanny resemblance to a snake. Completed in 1971, the peculiar structure sits only partly within the actual boundary of the City/State, and the whole building, inside and out is unmistakably reptilian.

Think about it for a moment: If just one side of the statue gave the impression of a snake's head, we could brush this off as coincidence, but when it looks this way from all angles, and the entire building resembles a snake as well, it becomes much more difficult to ignore. One must begin to realize that this was purposefully designed to appear this way. The thought and planning that went into this would have to have been immense.

The reality is that there is an obvious reason for this imagery. You can see many images at Google of the pope's Audience Hall. Many articles have been written about this structure and what it has to say about the Vatican.

You may be asking what that reason is; why was this building built in such a way that the pope appears to be speaking from the mouth of a reptile? If you aren't asking that question, you're simply turning a blind eye. It's not that the evidence isn't present; it's that you are choosing not to see it. There are seven separate pieces that comprise the snake or reptile symbol. If it were one or two I would understand your skepticism — even three. But when seven pieces come together so beautifully, so perfectly, you know beyond any shadow of a doubt that it was intentional.

Oblivious to the world, the Catholic Church has built the biggest pagan institution that seeks to unite all the world's peoples in their religions just as the Tower of Babel was attempted. But none of that will deter Catholic critics of Dr. Ardis. The first web page to criticize Dr. Ardis and his message was Robert F. Kennedy Jr., lead attorney for the Children's Health Defense Fund. The Kennedy family is a known devout Roman Catholic and I would expect a devout Roman Catholic with his reputation to take issue with Dr. Ardis. We can expect others of this religious persuasion to do likewise.

That said, in my analysis, I actually see Dr. Ardis' credibility being strengthened by his bringing up the aspect of spiritual warfare, knowing how it would be a flash-point that some would capitalize upon. Of the critics surfacing so far, all have been from outside the fields of science or expertise that would qualify them to offer witness testimony.

Mike Adams, the Health Ranger took on the issue of snake venom today in his Friday podcast. You can listen to his program by going to his site below. Mike's post is an education in itself as to what all has been occurring in the use of snake venom and its use in biological weapons. The public is virtually ignorant of this aspect of clandestine biological warfare weapons, and so the content of today's broadcast proves to be of the most important in the information process.

A 2016 episode of [The Blacklist](#) even featured extensive predictive programming of these details. Bryan says that when he saw that episode, he knew he was right and that he was supposed to see that, *"Because it was confirmation to me that other people knew this was planned all along – which we've known [this is a plan](#) – the FBI figures out that it's actually peptides found in krait venom that poisoned Reddington..."*

"I believe this was the plan all along. They're using mRNA – I believe mRNA extracted from king cobra venom. The king cobra and I think they want to get that venom inside of you and make you a hybrid of Satan, no longer belonging just to God or a creation of God's."

Bryan turns to Stew Peters and says, *"When I say that the mRNA inside of the Pfizer and Moderna shots is derived from snake venom, it just sounds crazy, right? But I want you to read...from July 6th last year, 2021, the co-founder of Moderna, read the title, show it to the camera:"*

['Moderna co-founder using mRNA technology to treat venomous snake bites.'](#) Stew says.

The use of television and media predictive programming is a well-known tactic of the Illuminati whereby to tell in advance what they are going to do to humanity by incorporating their plan into movie and television series scripts. Stew Peters plays short segments in which words such as "Corona of death" is actually in the character's dialogue as he dies on camera searching for the antidote. The 2016 TV series "The Blacklist" presents the mysterious virus used to kill selective groups of people!

There are an endless number of clues that support Bryan's suspicions. As Canadian [Dr. Hoffe](#) noted, people who'd been vaccinated had elevated D-dimer levels but before the advent of COVID, elevated D-dimer numbers were commonly indicative of snake venom poisoning.

Bryan says, "The kidney failure caused by remdesivir is the number one organ targeted of king cobra venom. It's the number one!"

He says there isn't one symptom or adverse reaction from the COVID vaxxines that cannot be correlated back to snake venom from cobras, kraits and other poisonous snakes.

Last December, Dr. Bryan Ardis received a text message from an emergency room physician friend of his that sent him down an unexpected and bizarre rabbit hole that may explain the adverse events from the vaxxines that we've been reporting.

The text read: *"Hey Dr. Ardis...If you got bit by a rattlesnake, would you go to a hospital and get anti-venom?"*

Bryan had no idea what this meant and he immediately set about researching snake anti-venom. He discovered that most are either monoclonal- or polyclonal antibody treatments – just like the monoclonal antibodies that the CDC just removed as a COVID treatment, in favor of remdesivir, which is almost guaranteed to kill you but which is now nonetheless the ONLY government-approved treatment for infants and children with COVID in the U.S.

He says, "I realized, all of a sudden monoclonal antibodies ARE anti-venom. The Federal Government doesn't want us using anti-venom. Why are they fighting anti-venom and why are we finding anti-venom works against COVID? Is it not a virus? Is it a venom? This is what I want to know: Is COVID a venom and is this why they don't want you using monoclonal antibodies?"

Bryan checked the publications saying that the original source of COVID-19 was either from bats, snakes or pangolins and he noticed that every time anyone mentioned snakes, the fact-checkers would descend upon them and spin them towards the bats.

"There's no fact-checking about bats. They keep letting you look at bats," he says. This, despite the fact that Chinese experts were saying that it could not have been bats, because these bats hibernate and COVID broke out in the middle of winter.

Plus, when they studied the antibodies of those who were sick in Wuhan, they found that the genetic sequences were not like bats, they were most similar to two snakes; proteins from the [Chinese krait](#) and the king cobra.

Bryan continues, *"Then I find, in April of 2020 that there's a study in France where they're finding that the receptors in the brain called nicotinic acetyl choline esterase receptors, that these are actually bound most tightly to snake venom of krait and cobra. And that the spike protein from SARS-CoV-2 is most identical to Chinese krait and cobra venom."*

"Then, I find out that there's an actual doctor who works at the University of Pittsburgh in May of 2020, works in a computational lab doing genetic sequencing and he's been researching for 5 months, sequencing spike proteins, trying to solve the mystery of SARS-CoV-2 victims and he says he's got a big press release to announce all of their findings and Bing Liu is his name."

Next thing you know, the young Dr. Bing Liu was dead in a lurid [murder-suicide](#).

"And that's when I freaked out," Bryan says. "When I say to you that they have lied about everything in relationship to COVID, they've even lied about the viral part of COVID."

Bryan cites a [massive study published in January 2020](#) gene-mapping all of the proteins and peptides in king cobra venom, which isolated 19 venoms and peptides that specifically target organs in the body.

He says, "I am convinced that COVID-19 is not a respiratory virus of any kind. It is actually venom poisoning and they're using, I believe, synthesized peptides and proteins from venoms of snakes and they're administering them and targeting them to certain people."

"The amazing thing about these 19 toxins found in cobra venom, they're specifically sequenced to target specific organs, like the pancreas in a diabetic, like the heart in a heart disease patient, like the liver in a hepatitis patient."

"This is the most original of all bioweapons, ever. Snake venom... When I say this is the most evil thing I have ever encountered in my entire life, could you ever have imagined that the one greatest symbol of evil in all of Christendom...the Serpent."

"Can you think of anything more evil than envenomating the entire world with snake venom and the injecting snake venom into your veins and then using mRNA technology that they've been isolating from snake venom for years, that they know are unusually stable – more stable than any other mRNA they've isolated from other natural organisms for decades."

"In 2015, they took mRNA that they isolated from cobra venom and krait venom and they actually wrapped the mRNA in nanoparticle hydrogel...and they made it even more stable. Then, they add what's called dynabeads to those nanoparticle hydrogels, surrounding the mRNA of snake venom and it made it even more stable and made it last longer, made it easier to get inside of your cells. You know what [dynabeads](#) are? [Magnetic metal nanoparticles](#)."

A 2016 episode of [The Blacklist](#) even featured extensive predictive programming of these details. Bryan says that when he saw that episode, he knew he was right and that he was supposed to see that, "Because it was confirmation to me that other people knew this was planned all along – which we've known [this is a plan](#) – the FBI figures out that it's actually peptides found in krait venom that poisoned Reddington..."

"I believe this was the plan all along. They're using mRNA – I believe mRNA extracted from king cobra venom. The king cobra and I think they want to get that venom inside of you and make you a hybrid of Satan, no longer belonging just to God or a creation of God's."

Bryan turns to Stew Peters and says, *"When I say that the mRNA inside of the Pfizer and Moderna shots is derived from snake venom, it just sounds crazy, right? But I want you to read...from July 6th last year, 2021, the cofounder of Moderna, read the title, show it to the camera:*

'Moderna co-founder using mRNA technology to treat venomous snake bites.' Stew says.

There are an endless number of clues that support Bryan's suspicions. As Canadian [Dr. Hoffe](#) noted, people who'd been vaccinated had elevated D-dimer levels but before the advent of COVID, elevated D-dimer numbers were commonly indicative of snake venom poisoning.

Bryan says, *"The kidney failure caused by remdesevir is the number one organ targeted of king cobra venom. It's the number one!"*

He says *"there isn't one symptom or adverse reaction from the COVID vaxxines that cannot be correlated back to snake venom from cobras, kraits and other poisonous snakes."*

PHARMA SNAKES: Thirteen irrefutable FACTS about snake venom, Big Pharma and biological weapons

Friday, April 15, 2022 by: [Mike Adams](#)

([Natural News](#)) As the concept of “venom theory” has reverberated around the world this week, many people are shocked to realize how many pharmaceutical medications are derived almost entirely from rattlesnake venom, Gila Monster reptile venom, pit viper venom, scorpion venom and other such sources.

A pain treatment drug named Prialt ([see Prialt.com](#)) is actually synthesized by copying the poison of the Magical Cone Snail (*conus magus*). This poison produces hallucinations, confusion, altered states of consciousness and more. The [insert sheet for the Prialt drug](#) carries bizarre warnings such as, “*Patients have become unresponsive or stuporous while receiving PRIALT.*”

Patients who are made unconscious by the drug may appear to be perfectly conscious, almost as if they are in a zombie state. The warning sheet explains, “*During these episodes, patients sometimes appear to be conscious and breathing is not depressed. If reduced levels of consciousness occur, discontinue PRIALT until the event resolves...*”

We acknowledge that drugs like Prialt may have practical, beneficiary applications for people who are suffering chronic pain, yet who are unable to take highly addictive opioids for a variety of reasons. However, we take issue with the fact that **drug companies and doctors seem to be hiding the origins of these medications from patients.** Most doctors aren't even aware that toxins, poisons and venoms are used as the templates to synthesize extremely toxic peptides that are frequently used in prescription medications, including drugs for heart attacks, diabetes, high blood pressure and more.

Reptile venoms can be weaponized and turned into large-scale chemical weapon systems.

Even worse, **these reptile venoms can be weaponized and mass produced**, then used in a large-scale chemical attack on the population by introducing these toxins into food, water, air or contact surfaces. Just as fentanyl can be weaponized through aerosolization and drone delivery, these reptile venom peptides can also be weaponized and used to mass murder large numbers of people.

Some observers believe this has already happened, and that the mRNA “vaccines” currently being injected into people may deposit instructions for **venom peptide synthesis** into the cells of the body. If true, this would turn your body into a reptilian venom factory *from the inside*.

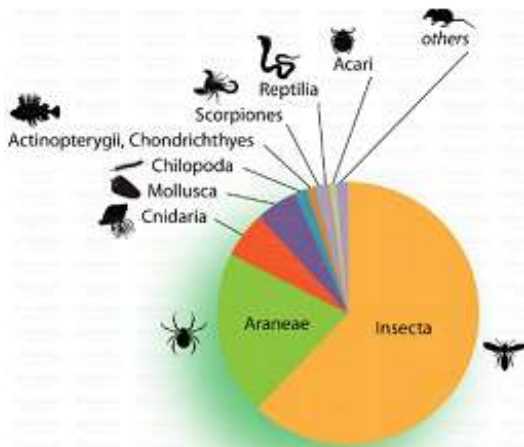

It might also explain why so many side effects of covid vaccines seem to align so closely with the known effects of envenomation (being bitten by a snake, a viper, a scorpion, etc.).

Dr. Bryan Ardis covers this in detail in part 3 of my recent interview with him. Many people say this third part is by far the most informative, and it's all backed by meticulous scientific research:

Brighteon.com/0d74ac38-dcf9-44e6-99f6-96c6a59abcf9

As ToxinTech.com explains on their website, touting the pharmaceutical potential for the venom peptides in their library:

The biological function of animal venoms is to immobilize and kill prey or predator in seconds to minutes... venom toxins target... neuromuscular, cardiovascular, hemostatic and other life functions. Toxins bind to targets with high affinity and are chemically stable.

Unparalleled arsenal: Nature's 20 million toxins, from 150,000 venomous animal species, were selected by evolution to target key ion channels, receptors, and enzymes.

Evolution-tested

The biological function of animal venoms is to immobilize and kill prey or predator in seconds to minutes. Perfected by millions of years of evolution, venom toxins target a plethora of vital receptors key to neuromuscular, cardiovascular, hemostatic, and other life functions. Toxins bind to targets with high affinity and are chemically stable.

Of 150,000 venomous animal species, there is an estimated 20 million toxins.

For the record, we do not ascribe nefarious intent on the part of ToxinTech. However, we recognize that ToxinTech's venom library may be exploited and misused by bad actors to create weapons of mass destruction, all based on venom peptides which are engineered to kill.

Interestingly, the ToxinTech home page feature image asks a rather blunt question that could be easily misconstrued: *Designed Toxins... Have a Target?*

In the context of biosciences, this means a molecular target such as a specific enzymatic pathway or channel such as calcium channels or sodium channels. **But to the mind of a bad actor with nefarious intent, they might wish to target *humanity*, for example, with a venom-based depopulation weapon.**

13 irrefutable facts about snake venom, Big Pharma and bioweapons

We've spent much of this week researching the venom peptide industry, and what we've found is rather astonishing. In fact, I think it's one of the biggest stories in the history of modern pharmaceutical medicine. Here's what we know so far:

Fact #1 – Big Pharma routinely uses venom and venom peptides for drug discovery. Around 150,000 animal species are known to produce toxins, and scientists estimate that 20 million toxins exist (only a small fraction have been studied).

Fact #2 – Massive venom libraries already exist (20,000+ venom peptides) and are marketed to the pharma industry for drug discovery. Two such companies are [Venomtech](#) (UK) and [ToxinTech](#) (USA).

Fact #3 – One venom library company celebrates how its venoms for Big Pharma are able to “immobilize and kill prey .. in seconds or minutes.” They explain that venoms are “Perfected by millions of years of evolution” in order to target “neuromuscular, cardiovascular, hemostatic and other life functions.” ([ToxinTech.com](#) home page, sourced April 14, 2022) This means that **venom library licensing companies recognize the toxicity of the compounds they are offering to drug companies.** In fact, they state so in their own marketing materials.

Fact #4 – **Reptile venoms can be weaponized and made into biological weapons. Protein sequences are provided by the venom library companies, allowing gain-of-function research to engineer venom peptides into viral payloads or mRNA therapeutics. Because venoms are poisons, the knowledge of how to engineer and synthesize those poisons at the amino acid level is also knowledge of how to build biological or chemical weapons.**

Fact #5 – Dozens of pharmaceuticals derived entirely from animal venom already exist. Many are FDA approved. A full chart has been [published by Natural News](#) and is also shown below.

Fact #6 – Pharma appears to be HIDING the venom origins of their products, making few or no disclosures on marketing websites about the actual origin of their drugs. You would have to read the insert sheets and understand Latin names to know that their drugs come from animal venom.

Fact #7 – Nearly zero doctors or patients know about the venom origins of venom-derived medications. Thus, patients are swallowing actual reptile venom molecules but being told by their doctors that it is “medication.” The FDA’s approving of a venom as a medication does not magically transform it into something that is non-toxic. The toxicity is simply reframed as “therapeutic” by the FDA, which then hands the pharmaceutical company a market monopoly to sell a molecule that was actually pirated from nature.

Fact #8 – Venom molecules and venom peptides are mass synthesized in pharmaceutical factories. This is a common practice. This is referred to by numerous scientific and bioscience resources, [including the World Economic Forum](#).

Fact #9 – Venoms and venom peptides are synthesized as “chemically stable” (ToxinTech.com) and are routinely delivered via liquid solutions without any preservatives. (They need no special preservatives to maintain their structure and function.) Nanocarriers are also available to further stabilize the venom peptides. (<https://pubmed.ncbi.nlm.nih.gov/31223083/>).

Fact #10 – Venoms can be touted by pharmaceutical companies as “naturally occurring,” because they are. Yet this label can be misleading since people equate the word “natural” with “healthful” or “safe.”

Fact #11 – Because venom peptides are stable in solution, they can be weaponized and mass produced, then distributed via air, water, food or contact surfaces. This means that it is entirely *plausible* that mass poisoning via venom peptides could be accomplished through the water supply, or the food supply, or dropped on cities via drones, etc. These are not outlandish ideas in the least. The U.S. Dept. of Homeland Security [just recently conducted chemical weapons simulation tests in New York City](#), releasing “non-toxic gas” in city parks and subway stations in order to study this very thing. If it’s a “crazy conspiracy theory,” then somebody needs to tell DHS, because they’ve been drilling for this exact scenario.

Fact #12 – Some toxins are skin-penetrating and can be absorbed merely by TOUCHING. (Not a venom, but a toxin or poison.) This was all admitted in an Ecohealth Alliance proposal to DARPA, as covered in this story: [Leaked DARPA document, DRASTIC analysis confirms attack on humanity using aerosolized, skin-penetrating nanoparticle spike proteins](#).

Fact #13 – Venoms and venom peptides produced for pharma are so stable that they survive stomach acid, which means the venom peptides are stable in solution, including in rather acidic (reactive) solutions. This means they do not automatically break down in city water, either. If venom toxins were not highly stable molecules, they would not be very good venoms in the first place. As ToxinTech explains, “millions of years of evolution” has perfected the functionality of these molecules.

Here’s a list of some of the pharmaceuticals which are derived from venom, as sourced originally from *The Encyclopedia of Toxicology*, 3rd edition, vol. 1:

PHARMACEUTICALS DERIVED FROM VENOM

GENERIC NAME (BRAND NAME)	SPECIES ORIGIN OF VENOM TOXIN	MECHANISM OF ACTION	INDICATION (DISEASES)
APPROVED DRUGS AND THERAPIES IN CLINICAL USE			
captopril (CAPOTEN®)	 Jararaca pit viper snake (Bothrops jararaca)	angiotensin-converting enzyme (ACE) inhibitor	hypertension, cardiac failure
enalapril (VASOTEC®)	 Jararaca pit viper snake (Bothrops jararaca)	angiotensin-converting enzyme (ACE) inhibitor	hypertension, cardiac failure
exenatide (BYETTA®)	 Gila monster lizard (Heloderma suspectum)	glucagon-like peptide-1 receptor agonist	type 2 diabetes mellitus
exenatide (BYDUREON®)	 Gila monster lizard (Heloderma suspectum)	glucagon-like peptide-1 receptor agonist (extended release)	type 2 diabetes mellitus
ziconotide (PRIALT®)	 Magical cone marine snail (Conus magus)	Ca _v 2.2 channel antagonist	management of severe chronic pain
bivalirudin (ANGIOMAX®)	 European medicinal leech (Hirudo medicinalis)	reversible direct thrombin inhibitor	anticoagulant in percutaneous coronary intervention
lepirudin (REFLUDAN®)	 European medicinal leech (Hirudo medicinalis)	binds irreversibly to thrombin	anticoagulation in heparin-associated thrombocytopenia; thromboembolic

Today's Situation Update podcast discusses venoms, Big Pharma, vaccines, mRNA transfection, animal-reptile transhumanism and more:

[Brighteon.com/9c7dbfe4-8acb-424d-be9c-2e12e556d19d](https://www.brighteon.com/9c7dbfe4-8acb-424d-be9c-2e12e556d19d)

Big Pharma uses snake venom to develop drugs and vaccines: here's the proof

Friday, April 15, 2022 by: [Ethan Huff](#)

[\(Natural News\)](#) The establishment is already contesting that snake venom is used in the development of pharmaceuticals, calling it a “*conspiracy theory*.” But the evidence is there for anyone wanting to investigate it.

Many “*life-saving*” drugs, [the World Economic Forum \(WEF\) announced back in 2018](#), are made from the venom of snakes. And it is not just the king cobra: There is also the pit viper, the cone snail and the Gila monster as well.

Each of these reptiles produces a different type and composition of venom that the drug industry has figured out how to manipulate in order to develop what are known as peptide therapeutics, which differ from small molecule therapeutics.

Peptide therapeutics belong to an entire field of scientific analysis known as venomics, which the WEF says offer groundbreaking solutions to health problems ranging from heart disease to diabetes to chronic pain, and so much more.

There are at least six different snake venom-based drugs that are currently approved by the U.S. Food and Drug Administration (FDA) for use in the United States. One of them is Captopril, an angiotensin-converting enzyme (ACE) inhibitor that is used to treat high blood pressure and improve survival after a heart attack.

The main ingredient in Captopril comes from a unique species of pit viper found in Brazil.

Another drug called Prialt that is used by some 22 million adults in the U.S. who suffer from severe and chronic pain. That one's main ingredient comes from the venom of cone snails.

Then there is Byetta, a type of drug that lowers blood glucose levels in patients with type 2 diabetes. Its main ingredient, exendin-4, comes from the saliva of the Gila monster, a large lizard species that is native to the U.S. Southwest and northern Mexico.

An expert in venomics by the name of Dr. Mandë Holford explained how it all works to the WEF's Alex Gray.

"Prialt is a breakthrough in treatment for pain that is non-addictive," he said. "Prialt doesn't target the same thing, so it doesn't have the same side effects."

"This has ushered in a whole new way for pharmaceutical industries to treat pain, they are now looking for things that target something other than opioid receptors."

The reason why venom works so well in these applications has to do with the way it works in the animal kingdom. It is a *weapon* that snakes use to defend themselves, or to catch prey.

"I like to describe venom as a cluster bomb," Holford said. "Its job is to shut down the normal function of the prey and in doing so, it fans out (and) hits several targets, which is a great thing for pharmaceutical development because you have several avenues to explore."

"Because it's so fast acting, so potent and highly specific to its target, venom has all of the ingredients necessary for making a drug."

Does the covid bioweapon contain snake venom components?

On April 12 of this year, a company called Venomtech [announced a collaboration with Charles River Laboratories, International Inc. to explore more ways to utilize venom-derived compounds in pharmaceuticals.](#)

Calling snake venom a “*unique natural resource*,” the Venomtech announcement explains how venom-derived peptides can be manipulated to target highly specific areas of the body, including the hardest-to-hit drug targets.

“Venomtech’s Targeted-Venom Discovery Array™ (T-VDA™) libraries provide researchers with a straightforward solution to rapidly screen thousands of individual venom fragments, with each array specifically designed to maximize hits for a specific target,” the announcement explains.

“Through the new collaboration, Charles River will be able to use this innovative resource – closely supported by Venomtech – to accelerate its clients’ pipelines, addressing difficult therapeutic targets, uncovering new mechanisms of action and minimizing off-target effects.”

Company CEO Paul Grant added that such research has been going on for at least the past decade at Venomtech, and that a wider array of therapeutic options is available to the industry because of the innovative technology.

“In collaboration with Venomtech, we can now offer our clients access to bespoke venom libraries, potentially accelerating their discovery pipelines using this powerful natural resource,” added Charles River’s Director of Biology Vad Lazari.

“This arrangement will enable us to draw on Venomtech’s specialist biological knowledge to quickly follow up hits and promising leads, helping our clients to overcome longstanding specificity challenges and exploit novel modes of action.”

The reason we are drawing your attention to this is because there is [mounting evidence](#) to suggest that the Wuhan coronavirus (Covid-19) may actually be a snake venom-based bioweapon of some sort, which is why anti-venom remedies [such as green chiretta](#) work well at treating it.

It is also important to bring this all up in order to counter the propaganda claiming that snake venom use in medicine is just some wild conspiracy theory. Snake venom has clearly played a prominent role in emerging therapeutics over the years, and continues to do so as science discovers how to manipulate it using DNA and RNA as well.

“These peptides have a particular structure and that structure dictates their molecular target,” Holford is quoted as saying about the DNA and RNA use of snake venom in pharmaceuticals. *“So when we get the primary sequence, we look for those codes that indicate what the structure of this peptide would be like.”*

These 16 pharmaceutical drugs are made from animal venom
Sunday, April 17, 2022 by: [Ethan Huff](#)

[\(Natural News\)](#) A biomedical scientist by the name of Zoltan Takacs created a biotechnology startup called ToxinTech that [currently lists](#) some 16 different pharmaceutical drugs that are made from the peptides of snake and other animal venom.

ToxinTech [houses a library of 'designer toxins'](#) that researchers can access in order to study new drug development ideas.

"We're actually not only creating toxin libraries, we're doing a twist," Takacs told CNN back in 2020 during the height of the Wuhan coronavirus (COVID-19) *plandemic* when some doctors were using venom-based drugs like Integrilin, which is made from the venom of the pygmy rattlesnake, to treat COVID blood clots.

"If we have a target for which there is not a good molecule which blocks that target, for example, then we look (to) nature. What kind of toxins around the world exists which target that particular molecule?"

Takacs went on to explain that these animal venom peptides are made using biotechnology (GMO). The end result is *"mosaic toxins"* that he says still contain the same *"evolutionary wisdom"* as the real venom found in animals.

Did you know this many drugs were made from animal venom?

The following venom-based drugs are listed on ToxinTech as being approved and currently in clinical use:

- captopril (CAPOTEN), an angiotensin-converting enzyme (ACE) inhibitor drug made from the venom of the jararaca pit viper snake (*Bothrops jararaca*)
- enalapril (VASOTEC), another angiotensin-converting enzyme (ACE) inhibitor drug made from the venom of the jararaca pit viper snake (*Bothrops jararaca*)
- exenatide (BYETTA), a glucagon-like peptide-1 receptor agonist drug made from the venom of the Gila monster lizard (*Heloderma suspectum*)
- exenatide (BYDUREON), an extended release version of BYETTA also made from the venom of the Gila monster lizard (*Heloderma suspectum*)
- ziconotide (PRIALT), [a Cav2.2 channel antagonist drug](#) made from the venom of the magical cone marine snail (*Conus magus*)
- bivalirudin (ANGIOMAX), a reversible direct thrombin inhibitor drug made from the venom of the European medicinal leech (*Hirudo medicinalis*)
- lepirudin (REFLUDAN), a drug that binds irreversibly to thrombin and that is also made from the venom of the European medicinal leech (*Hirudo medicinalis*)
- desirudin (IPRIVASK), a selective and near-irreversible inhibitor of thrombin, similar to REFLUDAN, that is also made from the venom of the European medicinal leech (*Hirudo medicinalis*)
- tirofiban (AGGRASTAT), an antagonist of fibrinogen binding to the GPIIb/IIIa receptor drug made from the venom of the saw-scaled viper snake (*Echis carinatus*)
- eptifibatide (INTEGRILIN), a drug that prevents binding of fibrinogen, von Willebrand factor, and other adhesive ligands to GPIIb/IIIa, that is made from the venom of the pigmy rattlesnake (*Sistrurus miliarius*)
- batroxobin (DEFIBRASE), a drug that cleaves A α -chain of fibrinogen and is made from the venom of both the common lancehead snake (*Bothrops atrox*) and the Brazilian lancehead snake (*Bothrops moojeni*)
- platelet gel (PLATELTEX-ACT), a drug similar to DEFIBRASE that is made from just the venom of the common lancehead snake (*Bothrops atrox*)
- fibrin sealant (VIVOSTAT), a drug similar to the previous two that is made from the venom of just the Brazilian lancehead snake (*Bothrops moojeni*)
- thrombin-like enzymes, a class of fibrinogenase drugs made from the venom of the Chinese moccasin snake (*Deinagkistrodon acutus*), the Siberian pit viper snake (*Gloydius halys*), or the Ussuri mamushi viper (*Gloydius ussuriensis*)
- hemocoagulase, a drug that cleaves A α -chain of fibrinogen; factor X and/or prothrombin activation, and is made from the venom of the common lancehead snake (*Bothrops atrox*), jararaca pit viper snake (*Bothrops jararaca*), or the Brazilian lancehead snake (*Bothrops moojeni*)
- medicinal leech therapy, which as its name suggests is made from the venom of the European medicinal leech (*Hirudo verbena*) or other species

Does Covid-19 Contain Genetic Sequences From Snake Venom?

[By Guy Hatchard | April 14, 2022](#)

An article in *Scientific American* back in January 2020 reported:

“Snakes—the [Chinese krait and the Chinese cobra](#)—may be the original source of the [newly discovered coronavirus](#) that has triggered an outbreak of a deadly infectious respiratory illness in China this winter.”

The article originated from a Chinese authored paper published in the *Journal of Medical Virology* on 22 January 2020 entitled [Cross-species transmission of the newly identified coronavirus 2019-nCoV](#) and said:

“Our findings suggest that 2019-nCoV has most similar genetic information with bat coronavirus and most similar codon usage bias with snake.”

The essence of the article was the supposition that Covid-19 made its way from snakes to bats and then to the Wuhan wet market, expressed as follows:

“An origin-unknown homologous recombination may have occurred within the spike glycoprotein of the 2019-nCoV... The squared Euclidean distance indicates that the 2019-nCoV and snakes from China have the highest similarity in synonymous codon usage bias compared to those of bat, bird, *Marmota*, human, *Manis*, and hedgehog”

This idea subsequently gained little traction, because of the improbability of such a train of interspecies transfer, and because public discussion of its conclusions was vigorously suppressed by *fact checkers*.

The suggestion of the authors to do more research disappeared from view. It has been largely forgotten until now. The premise of the paper confirms much of what Bryan Ardis puts forth in his recent interview with Stew Peters, Mike Adams and others.

Were Some of These Recombined Genetic Sequences From Snakes?

Recent discussion of the origin of the Covid-19 spike protein has suggested that it could be the result of recombinant techniques in the laboratory which joined a number of genetic sequences together as part of research to develop deadly pathogens, and then investigate possible cures.

A paper published in *F1000Research* entitled [“Toxin-like peptides in plasma, urine, and faecal samples from COVID-19 patients”](#) in April 2020 concluded that:

“The presence of toxin-like peptides... suggests a possible association between COVID-19 disease and the release in the body of (oligo-)peptides almost identical to toxic components of venoms from animals.... The presence of these peptides opens new scenarios on the etiology of the COVID-19 clinical symptoms observed up to now, including neurological manifestations.”

What are Some of the Neurological Effects of Snake Venom?

A study published in 2002 entitled [“Cardiac Involvement in Snake Bite”](#) reports:

“Myocardial involvement is seen on occasions and may rarely contribute to morbidity and mortality. ECG changes are usually transient but when persistent they are attributed to direct myocardial damage due to the toxin.”

Other [reported neurological effects of snake bite](#) include:

- pro and anticoagulant activity leading to ischemic or hemorrhagic stroke,
- muscle paralysis through inhibition of neuromuscular transmission leading to respiratory failure.

All of these neurological, thrombotic, and cardiac effects are similar to reported adverse effects of both Covid infection and mRNA vaccination.

Is Covid-19 a Recombination of a Virus and a Toxin?

mRNA vaccines specifically train the human physiology to produce the suspect spike protein. Did this expose vaccine recipients to a toxin? It appears this might be the case.

In which case, the essential design of the mRNA vaccine would have been a grave error. It was training the physiology to produce a toxin.

These discussions are speculative. We now know that early genetic sequences of Covid-19 appear to have been suppressed by NIH on the instructions of the Wuhan Virology Lab.

Was the genetic similarity between snake genetics and Covid-19 too explosive to admit, whether they came from snakes or not? Certainly, this possibility should have been investigated vigorously.

It might have led to an understanding of the origins of Covid, but more importantly, it might have led to more effective treatments for Covid.

It might also have shed light on the source of the wide range of neurotoxic effects of both Covid and mRNA vaccination.

Whatever the eventual conclusion of further investigative research: biotechnology experimentation to research and develop pathogens and toxins must stop now. It amounts to a ticking time bomb.

Below is a link to the interview between Dr. Jane Ruby and Dr. Bryan Ardis

<https://rumble.com/v1154In-live-the-ardis-bombshell-and-review-of-the-world-premier-of-watch-the-water.html>

Last weekend the web page Patriot Streetfighter.com posted two interviews, one with Dr. Bryan Ardis and the second with Dr. Tau Braun.

An important 2-hour long interview of Dr. Bryan Ardis was aired on the: 4.11.22 Patriot Streetfighter.com w/Dr. Bryan Ardis, 'Exposing The Serpent of CV-19'.

Then on the 4.12.22 program an interview w/Patriot Streetfighter Dr. Ardis follow up, 'Venom Theory Originator Dr. Tau Braun – Dr. Tau Braun.'

Dr. Tau Braun has maintained a low profile having likely been the first to discover the cause of Covid back in 2020 and ignored by the FBI. Dr. Tau Braun had a special high level role as a U.S. National EMS & Counterterrorism Advisor + Trainer.

"Synthetic biology is a field of science that involves redesigning organisms for useful purposes by engineering them to have new abilities. Synthetic biology researchers and companies around the world are harnessing the power of nature to solve problems in medicine, manufacturing and agriculture."
U.S. Department of Health and Human Services (2021).

Scientists who work in synthetic biology can stitch together long stretches of DNA and insert them into an organism's genome. These synthesized pieces of DNA could be genes that exist in other living organisms or are entirely novel and do not exist in nature.

"Although the contributions synthetic biology can make in these and other areas hold great promise, it is also possible to imagine malicious uses that could threaten U.S. citizens and military personnel. Making informed decisions about how to address such concerns requires a realistic assessment of the capabilities that could be misused."
National Academies of Sciences, Engineering, and Medicine (2018).

Jesse Bloom (Ph.D.) studies evolution using viruses and viral proteins as models. By focusing on the fast-evolving influenza virus, Professor Bloom aims to understand how mutations in viral genes shape the pathogen's ability to infect and spread. He uses computational biology and real-world data to build evolutionary models and examine different scales of viral evolution, from evolution within a single host to change on a global scale.

When searching for genomic data from the early stages of the pandemic, Professor Bloom discovered that sequences were mysteriously missing from the database.

In June of 2021, Bloom reported in an academic preprint paper that partial SARS-CoV-2 sequences from the early outbreak in Wuhan were removed from a U.S. government database by the scientists who deposited them. In August, the

Journal of Molecular Biology published his findings. It is not clear why researchers at Wuhan University asked for the sequences to be removed from the Sequence Read Archive (SRA), a repository for raw sequencing data maintained by the National Center for Biotechnology Information (NCBI), part of the U.S. National Institutes of Health (NIH).

Professor Bloom worked diligently and was able to find most of the genomic code saved on other servers. Bloom reported that the data he recovered was sufficient to determine the viral sequences of SARS-CoV-2 from Wuhan early on in the pandemic did not match expected genetic sequences to the most similar bat coronavirus relatives.

Does the mismatch and recovered genetic code give any evidence of the use of synthetic biology in SARS-CoV-2? Does the code reveal synthetic venom on the Spike Protein? From discovered data in the fall of 2021 there is a lot of evidence to this question.

[Field Notes](#)

**Dr. Tau Braun's HYPOTHESIS:
COVID IS AN ENVENOMATION CAUSED BY REPLICATING VENOM ON THE
SPIKE PROTEIN OF SARS-COV-2**

Dr. Tau Braun may have been the first scientist to have discovered what has been shared by Dr. Bryan Ardis.

All of these neurological, thrombotic, and cardiac effects are similar to reported adverse effects of both Covid infection and mRNA vaccination.

Is Covid-19 a Recombination of a Virus and a Toxin?

mRNA vaccines specifically train the human physiology to produce the suspect spike protein. Did this expose vaccine recipients to a toxin? It appears this might be the case.

In which case, the essential design of the mRNA vaccine would have been a grave error. It was training the physiology to produce a toxin.

These discussions are speculative. We now know that early genetic sequences of Covid-19 appear to have been suppressed by NIH on the instructions of the Wuhan Virology Lab. (ER: See this we published back in January of this year – [Virus Hunter Peter Daszak Wanted to Keep COVID Sequencing Data Hidden From Public](#))

Was the genetic similarity between snake genetics and Covid-19 too explosive to admit, whether they came from snakes or not? Certainly, this possibility should have been *investigated vigorously*.

It might have led to an understanding of the origins of Covid, but more importantly, it might have led to more effective treatments for Covid.

It might also have shed light on the source of the wide range of neurotoxic effects of both Covid and mRNA vaccination.

Whatever the eventual conclusion of further investigative research: *biotechnology experimentation to research and develop pathogens and toxins must stop now*. It amounts to a ticking time bomb.

Dr. Bryan Ardis initial interview has been validated to be correct by the scientist Dr. Tau Braun. The skeptics, critics, and naysayers are unfamiliar with the bioweapons field that has emanated from what is referred to as “Synthetic Biology”. Most pharmaceutical firms are “venom based”.

Snake Venom – It's Beyond Wake Up Time [VIDEOS]

April 17, 2022 TLB Staff GOVERNMENT,

ER Editor: We're putting together 3 things below: one (of several) video/podcast by Health Ranger Mike Adams, who especially focuses on Big Pharma and the globalists; a piece by Guy Hatchard, who explores, among other things, some scientific papers showing genetic similarities between toxins found in Covid patients and snake venom; and part of a longer piece from *'The Exposé'* on the researcher who first discovered the snake venom link, Dr. Tau Braun (we recommend reading it in full).

We confess to being among those who had simply no idea about the widespread use of snake venom. In this 30-minute video/podcast, science commentator Mike Adams gives us a little education about the topic. He's also surprised, as we are, at the *automatic* dismissal of the topic, including Dr. Bryan Ardis' hypothesis about it being behind the various aspects of Covid: transmission, infection itself, vaccination, Remdesivir treatment, etc. In this broadcast, he gives us a little education. He had previously interviewed Ardis.

Adams pointedly addresses the dispersion-through-water hypothesis, noting that it isn't the first time, if true, that our water has been poisoned on a regular basis. To those like Cliff High who declare transmission through water is impossible because literally too much synthetic venom would have to be manufactured, what does he imagine has been going on with DAILY / HOURLY chemtrail dispersion over most of the globe every day for many YEARS? How much toxin has had to be produced for that nefarious program (which backchannel sources have told us is extremely expensive)?

The global elite have had lots of practice disseminating their noxious products.

NOTES

Topics Mike Adams talks about:

- The snake venom theory has been dismissed out of hand yet Big Pharma routinely use, and are currently exploring uses of, snake venom. VenomTech is a company collaborating with Charles River Labs. Int. that is exploring venom-derived compounds. Venom (or a derivative of it) is used in drugs, pesticides and cosmetics. So the minimum Ardis has done is to expose this practice.
- Snake venom COULD be in the water because water is a long-used vector for poisoning people, e.g. all US cities have had their water poisoned with fluoride (a neurotoxin) and other chemicals (which often come from China, incidentally). It's not a stretch to say this water has had venom peptides added. Recall Flint, MI. Yes, the CDC has 100's of waste-water monitoring systems, but we also need to remember that somebody's waste water is also somebody's SOURCE water. The Mississippi River is a good example of this. It starts somewhat pure in Montana, but further down, *recycled water* along the chain becomes someone else's *source water* downstream of that. So while the CDC is monitoring 'waste' water, it's simultaneously monitoring 'source' water, i.e. it's exactly the same thing.
- The World Economic Forum in November 2018 (the Global Future Council) talked about 'lifesaving drugs' made from 'deadly venom' or 'venomics'. A variety of drugs (for blood pressure, diabetes, pain management, etc.) are made from venom. The site also mentions the historical practice of using snake and spider venom, in addition to plants, for treating diseases. Historically, venom would be injected into rodents to monitor the effects. Today, DNA/RNA of venom has already been identified, synthesized and tested (on people?). The WEF talked in 2018 about being able to synthesize and MASS PRODUCE the venom. (So what would they want to do with all this?)
- A PubMed article from 2020 ("Nanoparticles Functionalized with Venom-Derived Peptides and Toxins for Pharmaceutical Applications") discusses a wide variety of applications for the peptides. Critically, they discuss how a nano-carrier has been developed to carry the venom molecule and stabilize it. Hence, this is how the venom molecule can be put into water and how it survives once in there.
- A 2017 PubMed paper ("Snake Venom: From Deadly Toxins to Lifesaving Therapeutics") shows that venom is a COCKTAIL of diverse molecules that can be used in a variety of ways for new drugs. Some of these have been developed, some are in development.
- So it's all out there – studies, abstracts, press releases, etc. And for Pharma, it's a promising area of drug development for a variety of conditions. And this is just scratching the surface. What are they ultimately trying to achieve here? Is it just therapeutic or is it nefarious? At the globalist level, they're obviously trying to kill us, so why wouldn't they use something like this. "It's rather obvious at this point."

Does Covid-19 Contain Genetic Sequences From Snake Venom?

GUY HATCHARD

An article in Scientific American back in January 2020 reported:

“Snakes—the [Chinese krait and the Chinese cobra](#)—may be the original source of the [newly discovered coronavirus](#) that has triggered an outbreak of a deadly infectious respiratory illness in China this winter.”

The article originated from a Chinese authored paper published in the ‘Journal of Medical Virology’ on 22 January 2020 entitled [Cross-species transmission of the newly identified coronavirus 2019-nCoV](#) and said:

“Our findings suggest that 2019-nCoV has most similar genetic information with bat coronavirus and most similar codon usage bias with snake.”

The essence of the article was the supposition that Covid-19 made its way from snakes to bats and then to the Wuhan wet market, expressed as follows:

“An origin-unknown homologous recombination may have occurred within the spike glycoprotein of the 2019-nCoV....The squared Euclidean distance indicates that the 2019-nCoV and snakes from China have the highest similarity in synonymous codon usage bias compared to those of bat, bird, Marmota, human, Manis, and hedgehog”

This idea subsequently gained little traction, because of the improbability of such a train of interspecies transfer, and because public discussion of its conclusions was vigorously suppressed by *fact checkers*.

The suggestion of the authors to do more research disappeared from view. It has been largely forgotten until now.

Were Some of These Recombined Genetic Sequences From Snakes?

Recent discussion of the origin of the Covid-19 spike protein has suggested that it could be the result of recombinant techniques in the laboratory which joined a number of genetic sequences together as part of research to develop deadly pathogens, and then investigate possible *cures*.

A paper published in F1000Research entitled [“Toxin-like peptides in plasma, urine, and faecal samples from COVID-19 patients”](#) in April 2020 concluded that:

“The presence of toxin-like peptides...suggests a possible association between COVID-19 disease and the release in the body of (oligo-)peptides almost identical to toxic components of venoms from animals....The presence of these

peptides opens new scenarios on the etiology of the COVID-19 clinical symptoms observed up to now, including neurological manifestations.”

What are Some of the Neurological Effects of Snake Venom?

A study published in 2002 entitled “[Cardiac Involvement in Snake Bite](#)” reports:

“Myocardial involvement is seen on occasions and may rarely contribute to morbidity and mortality. ECG changes are usually transient but when persistent they are attributed to direct myocardial damage due to the toxin.”

Other [reported neurological effects of snake bite](#) include:

- pro and anticoagulant activity leading to ischemic or hemorrhagic stroke,
- muscle paralysis through inhibition of neuromuscular transmission leading to respiratory failure.

All of these neurological, thrombotic, and cardiac effects are similar to reported adverse effects of both Covid infection and mRNA vaccination.

Is Covid-19 a Recombination of a Virus and a Toxin?

mRNA vaccines specifically train the human physiology to produce the suspect spike protein. Did this expose vaccine recipients to a toxin? It appears this might be the case.

In which case, the essential design of the mRNA vaccine would have been a grave error. It was training the physiology to produce a toxin.

These discussions are speculative. **We now know that early genetic sequences of Covid-19 appear to have been suppressed by NIH on the instructions of the Wuhan Virology Lab.** (ER: See this we published back in January of this year – [Virus Hunter Peter Daszak Wanted to Keep COVID Sequencing Data Hidden From Public](#))

Was the genetic similarity between snake genetics and Covid-19 too explosive to admit, whether they came from snakes or not? Certainly, this possibility should have been *investigated vigorously*.

It might have led to an understanding of the origins of Covid, but more importantly, it might have led to more effective treatments for Covid.

It might also have shed light on the source of the wide range of neurotoxic effects of both Covid and mRNA vaccination.

Whatever the eventual conclusion of further investigative research: *biotechnology experimentation to research and develop pathogens and toxins must stop now*. It amounts to a ticking time bomb.

From Snakes to Spike Protein to Injections; Some Things to Consider RHODA WILSON for 'THE EXPOSE'

...
Letter to the FBI

Dr. Tau Braun is a U.S. National Counterterrorism & EMS Advisor and Trainer, Chief Scientist, Counter Bioterrorism Division, BioChem Engineering and Executive Director of the Violence Prevention Agency. **He also researched and discovered the *origin of Covid 19 was snake venom.***

The bulk of the work Dr. Braun does is in the realm of threat assessment and threat management, with the core of his work being training and helping people to analyze and understand a threat.

In June 2021 Dr. Braun **emailed two departments of the FBI** including Assistant Director Don Always, Weapons of Mass Destruction:

*"I have been working with scientists and medical professionals since the beginning of the Pandemic to understand the biological mechanisms of SARS2 ...
"The Spike Protein has numerous "fingerprints" pointing to a manufactured biological weapon, it can be aerosolized and can easily be deployed as a chemical weapon with devastating short term and long-term impacts.*

"SARS2 was rapidly labelled a respiratory disease. However, my research has revealed that the primary destructive mechanism of SARS2 and the S-Protein is an envenomation. I have revealed and alerted the scientists and medical professionals that I have been collaborating with, and I aim to publish my findings within the next few weeks."

Dr. Braun claims he has proof that snake venom peptides were used to cause the entire Covid "pandemic." He is known to the FBI having worked with them as an outside consultant but the only response he got from the FBI was "received, thank you." The FBI, the organization not the individual agents, has been "badly compromised," he told Dr. Bryan Ardis in an interview the day after the premiere of '**Watch the Water**' on **The Stew Peters Show**.

When Dr. Braun said he would "go public" with his research within a couple of weeks, colleagues warned him that he should enter a witness protection program before he publicly released the information.

"There are government entities involved, but more importantly, you've got even more danger when it comes to corporate entities that have their money in

something. You have entities, and personal people, that are willing to kill people to make sure that their criminal enterprise can function,” Dr. Braun said.

Over the past two years, Dr. Braun was able to dissect, understand and work out some of the basic mechanisms of Covid. *“This is a serious subject because ultimately this has been a culling. A form of senicide ... the bulk of the deaths around the world have been of the aged and the vulnerable,” Dr. Braun said, “this has been a genocide.”*

Dr. Braun has tried to reach out to people and has been, for example, censored by LinkedIn for attempting to bring his information to the attention of professionals who should have been reviewing and considering his research. Dr. Braun is not worried about being censored by LinkedIn, but he wants LinkedIn to realize they are *“colluding and conspiring in crimes if they bury evidence that’s going to point to how people are getting killed. So, I will probably see LinkedIn in court at some point, or in testimony in congress or the senate because this needs to stop,”* he said. Adding that if people are silenced and censored, it makes the world an unsafe place.

“In high concentrations, this spike protein acts as nerve gas. You can see that in the videos ... why are we calling it a [lab] leak when you can see these are massive clouds or some other form of purposeful attack, just like China said. “You can use this particular weapon with or without a viral component.”

In a 1977 paper, a lectin – a form of venom, a plant-based venom – was attached to, or combined with, a coronavirus. *“You really need to think about glycoproteins, venom and plant-based venom, which are called lectins – you need to think of them like two sides of Velcro and there’s interplay between the two of them. Ultimately, they act as switches and so when your body needs to understand what it’s dealing with, it will have places in the body where lectins and venoms combine. And that sets off all kinds of chain reactions,”* Dr. Braun said.

There are two homologues, synthetic versions of the venom, in the spike protein. *“You can call it a cobra venom but it may not actually be from the cobra snake. It is from a lab and even then, more importantly, it doesn’t have to actually come from the cobra snake. That venom could be a perfect match, evolutionary, to a cone snail ... it could also come from parasites ... There are two venoms that are in the S protein of SARS-CoV-2 and they are cobra and krait, a coagulant and an anti-coagulant. And you have all kinds of disruptive mechanisms of those two weapons ... the venom aspect is just one aspect of this multipurpose tool that makes up the spike,”* Dr. Braun explained.

“There is already loads of data, there is already loads of science, around the fact that the viral component is only one part of this problem. The bigger problem is the spike protein ... They took that highly lethal pathogenic short-term and long-

term poison, a venom, a venom-based poison – I cannot be any more clear – they took that and they gave you, if you took the vaccine, a code. And that code is a trick – a cell that would not normally accept that code was told ‘hey suck this code in and start printing more of this poison’.”

Click on the image below to watch Dr. Braun’s [interview on Rumble](#).

The Dr. Ardis Show: The Doctor Who Figured It Out Before Dr. Ardis, 12 April 2022 (70 mins) ([Click on Dr. Tau Braun above](#))

On the other side of the debate, Dr. Richard Fleming discussed among other things the snake venom theory with InfoWars on 14 April, watch [HERE](#) (40 mins).

Snake-like enzyme could be driving Covid deaths

In August 2021, researchers from the University of Arizona [published a paper](#) that found a certain enzyme that could be driving Covid deaths.

“We found evidence that there was an enzyme, a snake-like enzyme, in the blood of people who were in extraordinarily high levels,” said Dr. Floyd Chilton, the senior author of the study with the University of Arizona, College of Agriculture and Life Sciences.

ABC15: Snakes used in COVID-19 research, 2 September 2021 (3 mins)

Read more:

- [University of Arizona researchers find link between COVID deaths and snake venom](#), ABC15, 1 September 2021

- [Group IIA secreted phospholipase A2 is associated with the pathobiology leading to COVID-19 mortality, JCI, 24 August 2021](#)

We are in a war, and unfortunately that war is against humanity. You and I are caught up in a global genocidal eugenics program. *"The first casualty when war comes is truth,"* was coined by Hiram Johnson a Republican politician from California who served in the United States Senate for nearly 30 years, beginning in the midst of World War I and concluding with his death in 1945--as it happens, on the same day the U.S. dropped its first atomic bomb on Hiroshima...

When Dr. Bryan Ardis released his interviews a week ago, pushback came within a few minutes by those refuting the truth of Dr. Bryan Ardis. With the evidence presented to the reader here we can clearly see there is much more to this story than the world knows. The global elite even with all their wealth and power have not been spared exposure for their Satanic "Depopulation" Eugenics Genocide agenda. Scripture notes several places that at the time of the end all secrets will be made known. Luke 12:2 has come to the forefront since 2000, and with incredible clarity we are witness to the exposure of evil on an almost daily basis.

Dr. Ray Hermann eloquently exposes the greedy evil people in this world are usually secretive about their plans and actions. You will find them in government, in the banking industry, in pharmaceutical manufacturing, and in all types of corporations, both large and small. You will find them in the church, as well. Not everyone in these enterprises is bad, of course, but enough of the agents of Satan are lurking there to throw suspicion upon them all.

These evildoers do their best to hide their true personality and intentions — that is until something happens that brings their actions into focus and our suspicions to the surface. A recent example is the coronavirus pandemic, with its numerous lockdowns and associated vaccines and mandates. This medical event is slowly presenting the true face of most organization types listed in the previous paragraph.

The purpose of this article is not to bring the facts to light about the flu virus debacle, for I've written about that problem also, as have many other authors. My intention here is to let you know about a great awakening which is fast approaching. Will you be part of it?

There was an awaking during the time of Christ. Our Lord called out the evil of hypocrisy within Judaism at that time. Hypocritical behavior fools many people but eventually it is uncovered and made known. Everything said and done in private will become public knowledge. In speaking about the hypocrisy of the Pharisees religious sect, Luke reports Jesus saying the following.

“Beware of the yeast of the Pharisees, that is, their hypocrisy. Nothing is covered up that will not be uncovered, and nothing secret that will not become known. Therefore whatever you have said in the dark will be heard in the light, and what you have whispered behind closed doors will be proclaimed from the housetops” -(Luke 12:1-3).

It is unreasonable for anyone to think they can get away with some evil thing just because they hide it from the public. God sees everything; nothing is concealed that will not be revealed and nothing is secret that will not be known. ***“We will be judged and held accountable. We are in control of our decisions and each one has a positive or negative consequence. Don’t be surprised or try to defend yourself when you have made a bad choice.”***

That may be a specific use for the idea of secrets made known, but like other parables and sayings of Jesus, there are other applications, too. Earlier in Luke, we find similar Scripture: ***“For nothing is hidden that will not be disclosed, nor is anything secret that will not become known and come to light. Then pay attention to how you listen; for to those who have, more will be given; and from those who do not have, even what they seem to have will be taken away”*** (Luke 8:17-18).

As one commentator points out, these verses consist of what are called ‘floating sayings’ because they are found in other contexts (Matthew 10:26, 25:29; Luke 12:2). The sense of these sayings “is appropriate to the revealing quality of parables, in contrast to their concealing or secretive quality. Jesus came to reveal, to give light, and those who attend diligently to his words will experience increasing understanding.”

A deduction can be made and applied to the current lying, deceit, and cover-ups in modern government, corporate, and church circles. Christians (either now or soon) will be able to discern the evil amongst those who wish to manipulate the world into a place without Christian moral and ethical values. Those who want this planet under their complete control are currently in the process of accomplishing what they have set out to do — bring about a new world order.

Christians who are following the teachings of Jesus are waking up to the deception and are seeing the ‘light’. Those who are not true Christians (or who are atheists, or just unconcerned), are nothing but spectators and as the evil truths become apparent and rise to the surface, they will be confused and lack understanding.

Hopefully, the revealing of truth will convert many unbelievers. I think we will soon see what happens. And how the world responds to God’s revelation, in the end, will bring everything to light. Soon there will be no use of concealing anything, for all will know how they have been deceived. The day is coming when all hidden things will be disclosed, everything seen as it is, and everyone will get what they deserve -(1st Corinthians 4:5).

Abraham Lincoln is attributed with saying *“You can fool all the people some of the time and some of the people all the time, but you cannot fool all the people all the time.”* Although that is not exactly what he really said, the meaning is the same. This is what is going on in the world today. Every day the few who know the truth are spreading the word and more and more people are becoming wiser. There will be a point when the flood gate of truth will open showing the world the enormous amount of deception that has clouded our view of everything.

¹³*“And the LORD God said unto the woman, What is this that thou hast done? And the woman said, The serpent beguiled me, and I did eat. ¹⁴And the LORD God said unto the serpent, Because thou hast done this, thou art cursed above all*

cattle, and above every beast of the field; upon thy belly shalt thou go, and dust shalt thou eat all the days of thy life: ¹⁵And I will put enmity between thee and the woman, and between thy seed and her seed; it shall bruise thy head, and thou shalt bruise his heel.” -(Genesis 3:13-15)

The evidence from many different threads, coincidences, publications on related studies and work with a wide range of research from behind the scenes of the pharmaceutical industry are surfacing daily, piling up in such fashion that we can begin to see a picture emerging from the connect-the-dots image of something more sinister and evil than being a fluke but rather are an indictment of those producing the silent weapons for their quiet wars.

Dr. Bryan Ardis claims are not so outlandish at this point when we know that the medical community was doing and recommending all the wrong treatment therapies for an alleged novel rogue virus that was called a pandemic on the flimsiest basis of evidence. Evidence to the fact that suggests of a global cover-up far greater than the original claim does suggest that the health authorities around the world are complicit in maiming and murdering people on such a grand scale that it begs answers and prosecution of those still pushing booster shots that have little efficacy.

I did a series of articles on Dr. Anthony Fauci, noting that he is a Jesuit Coadjutor, as was Dr. Robert Redfield, noting that Donald J. Trump was also educated at a Jesuit institution of higher learning, Fordham University. The science of vaccination and vaccines are traceable to the origin of Edward Jenner and Louis Pasteur, Jesuit trained in the craft of the poison needle. Edward Jenner was a Master Mason and Jesuit-educated, at the time the Jesuits had infiltrated the Masonic Lodge.

Below is a picture of the Fauci family crest, By the way, Dr. Anthony Fauci comes from the Swiss family line of Abys, whose family crest pictures a crowned serpent eating a child. Fauci's mother was Eugenia Abys (1917-1965). The Abys (also, Abyss) family came from the town of Chur.

The image of the Fauci family crest raises the question why would anyone choose as their image to represent the family name. The crown atop the snake's head sends the message of the King Cobra venomous snake.

Pictured below on page 34 is Dr. Anthony Fauci with his left-hand “hidden” inside his suit coat, a well-known Masonic hand sign used to quietly broadcast to his Lodge brothers that he is one of them.

As a matter of credibility or credence as to Dr. Brian Ardis and his King Cobra venom argument, if he was not on the up and up, he would never have brought into this discussion any mention of the Satanic role of the Jesuit-controlled Vatican. To do so was an invitation to be slandered and attacked by the Jesuit organization, of which Pope Francis is a card carrying Jesuit. It is my perspective that Dr. Brian Ardis and

others coming forth know well they risk the wrath of the Vatican for linking them to this Satanic agenda to “Depopulate” the world through the poison needle of the syringe.

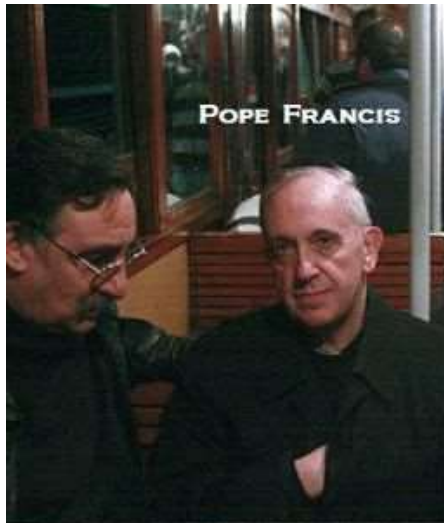

Abyz

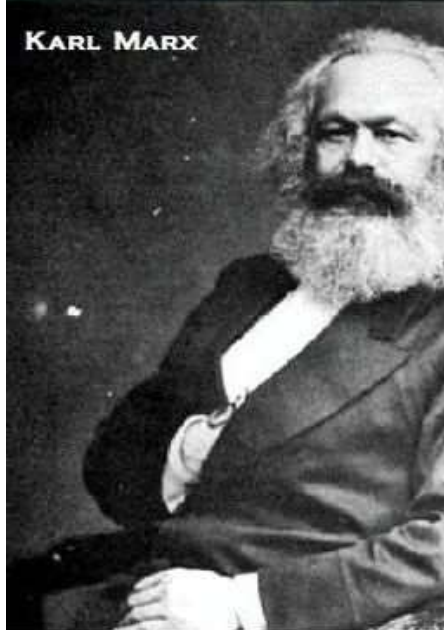

On the next page are examples of the Masonic “Hidden Hand” sign used to speak through signs, a familiar practice with Masonic Lodge brothers, and a page from the Masonic ritual handbook.

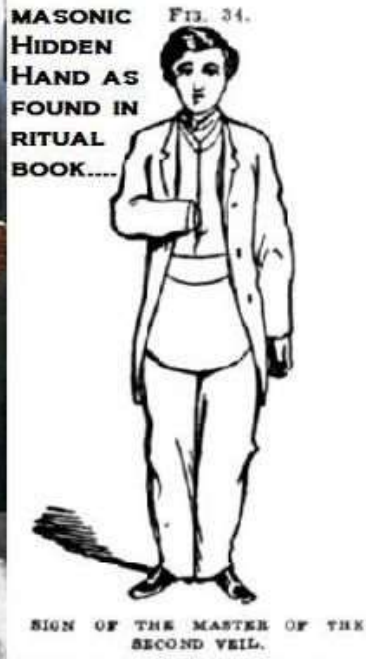

Even Barack Hussein Obama is a Lodge brother of Freemasonry. (Photo upper right).

POPE FRANCIS

KARL MARX

VLADIMIR LENIN

JOSEPH STALIN

Notice in the above illustration you will find a picture of Pope Francis when he was the archbishop and cardinal of Argentina years ago. You might wonder how it is that a Roman Catholic pope can be a Freemason and a Jesuit at the same time. The Society of Jesus is the formal name for the Jesuits and Adam Weishaupt, himself a Jesuit convert founded the Illuminati with the House of Rothschild. The Jesuits fled Bavaria to Paris, France where they infiltrated the Scottish Rite of Freemasonry. They virtually rewrote the rites and rituals of Freemasonry at the College of Clermont in Paris.

The history and background is extensive and elaborate but Mason's carryout the instructions of their Jesuit superiors and handlers. The Jesuit Superior-General is Fr. Arturo Sosa, and is known as the 'Black Pope'. His office is a few blocks away from St. Peters in Rome, Italy.

Freemasonry is a secret society inside a secret society. Masons of the lower degrees in the Blue Lodge are unaware of the activities in the higher degrees. Masons of the 19th Degree and higher know their god is Lucifer of the Bible. As a Lodge brother ascends in the hierarchy of Freemasonry, it is in the 19th Degree rites and rituals that they are told they serve and worship Lucifer. To reach the level of the 30th Degree through the 33rd Degree, they have to commit the act of Sodomy and to be Sodomized. This fact is revealed in P.D. Stuart's book '*Codeword Barbelon*', chapter 31.

The following link will address this point: [**P. D. Stuart Chapter 31 THE ... - Grand Design Exposed**](#)

granddesignexposed.com/pdf/barbelon.pdf

"Novus Ordo Seclorum" is a Jesuit-Masonic Enterprise to control the world.

The phrase Novus Ordo Seclorum (Latin for "New Order of the Ages") appears on the reverse of the Great Seal of the United States, first designed in 1782 and printed on the back of the United States one-dollar bill since 1935. The phrase also appears on the coat of arms of the Yale School of Management, Yale University's business school. The phrase is also mistranslated as "New World Order" by many people who believe in a conspiracy behind the design; however, it does directly mean "A New Secular Order". (That means without God.) So if you have any doubts about Pope Francis, Arturo Sosa, Dr. Anthony Fauci, Dr. Robert Redfield, Jesuits, or Freemasons, they are all Satanists through and through.

Blessings,

Pastor Bob, EvanTeachr@aol.com
