

Mask Free Sweden Nears Zero Daily Covid Deaths Guess What Else They Did Not Have!

July 31, 2021

As the CDC urges Americans to mask up against the Delta variant, Sweden's chief epidemiologist has argued that more data is needed about the strain's infectiousness. But there is something else Sweden does not have!

Anders Tegnell said on Friday that there was *“a lot we do not know”* about Delta and cautioned against drawing *“far-reaching conclusions”* about the coronavirus strain. He noted that the variant had been circulating in Sweden *“for quite some time”* with little effect, particularly in high-risk settings such as nursing homes.

His comments were made in response to newly released data from the Centers for Disease Control and Prevention (CDC) suggesting the Delta strain is more transmissible and could potentially cause more severe illness.

People who have been [fully vaccinated for COVID-19 yet still get infected with the delta strain](#) could transmit the infection to unvaccinated people, Centers for Disease Control and Prevention Director Rochelle Walensky said Tuesday in justifying renewed recommendations for mask-wearing.

The New York Times and other media outlets ran stories reporting that the CDC now believes the Delta variant is as contagious as chickenpox – but this comparison didn't seem to impress Tegnell.

“It is difficult to say how contagious Delta is, [as] when it comes to chickenpox, we have been able to follow the disease for several years. The infectivity [of Delta] seems to be very uneven – in some cases, one person infects a hundred people, then we have other occasions when an infected person does not infect anyone at all,” he [told Sweden's Aftonbladet](#).

In separate remarks, he pointed to the fact that one-third of the country's municipalities reported zero new Covid cases over the past week. At the same time, there was an uptick in cases among young people in Stockholm and other large cities.

And while U.S. health authorities are pressing Americans in “*high transmission*” areas to mask up, Sweden dropped its last remaining mask recommendation – related to public transport – on July 1.

While Sweden's public health agency has supported measures such as social distancing and remote working, it has no recommendations for the use of face coverings in public spaces.

Reviled by the media for refusing to impose harsh lockdowns, Sweden's less draconian approach to the health crisis appears to be paying off: The Scandinavian nation has [recorded](#) a total of eight Covid-linked deaths so far this month, an average of 0.25 deaths per day. One has to really wonder why Sweden has largely been untouched by the alleged Covid-19, which has never been proven to be true by the Koch Postulates.

Daily hospitalizations have also hovered near zero in July: On most days this month, the country saw between 0-2 Covid-cases requiring hospital treatment. At the same time, daily cases have fallen sharply since April.

Over the past fifteen months I kept reading about Sweden's open society, no lock downs, no masks, no Covid-19 or little if at all. I began to wonder could there be something so obvious that it was being overlooked! Most interesting is the fact that Sweden decided to delay auctioning and licensing the telecoms for the new **5G** wireless energy communications. I came across a report by Jamie Davies posted on November 18, 2019. Sweden has been late into the **5G** wireless communications picture. Sweden only began to roll out **5G** earlier this year compared to the U.S. and many other countries are from a year to two ahead of Sweden. Note this date; Sweden did not auction spectrum bands for **5G** until July 28, 2021.

This lag time of almost two full years between **5G** announcement and infrastructure construction since many countries were out of the starting gate in the fall of 2019, long before Sweden. This may be the explanation why for the past 18 months Sweden has been largely free of Covid-19, no lock-downs, no face diapers, and life as normal. After

all, if this was a “pandemic” as declared by the WHO in March, 2020, the pandemic escaped Sweden somehow. Sweden did face pressure by the globalists and were ridiculed for not complying, and now it becomes evident why.

Sweden decides to delay 5G spectrum allocation

The Swedish Post and Telecom Authority (PTS) has announced it will delay the allocation of spectrum in the 3.5 GHz and 2.3 GHz bands due to a security review.

The 3.5 GHz and 2.3 GHz bands spectrum bands are two of the most attractive when it comes to rolling out 5G services, blending together a palatable compromise between increased download speeds and coverage. These spectrum auctions have proven to be some of the most interesting, though the delay will be an irritant for the ambitious telecoms. That band spectrum happens to be the least harmful to life.

Pointing towards new security implications introduced in the country’s electronic communications law, which was implemented on January 1, 2020, the regulator felt it needed more time to continue discussions with police and security agencies. Details are thin on the ground for the moment, though this is hardly going to be viewed as a plus at the telecoms who have been demanding more spectrums be released.

In June, 2020 progress looked to be gathering momentum as PTS announced a public consultation to release spectrum in the 3.5 GHz and 2.3 GHz bands. 15 national blocks of at least 20 MHz in the 3.4 GHz-3.7 GHz band were set to be auctioned, as well as up to eight 10 MHz nationwide licenses at 2.3 GHz. The auction was to take place in the early part of 2020, though these plans were side-lined.

Sweden was not in a unique position when it comes to a need to free-up valuable spectrum assets, though that will come as little comfort to those who were gearing-up for an auction in the coming months. Reviews like this create a sense of uncertainty in the minds of the telecoms, and uncertainty is the enemy of investment. You only have to look at the UK for evidence of this.

Thanks to the creation of the Supply Chain Review, the position of Huawei was still an on-going unknown. This has led the telecoms to falter with deployment plans. Unless Sweden wanted to encounter the same problems, such a security review had to be completed incredibly quickly. Obligations and conditions had to be considered and relevant, as the last thing anyone wanted was protest from industry, further delaying the critical element of certainty.

Many hoped such a security review does not enter the country into the same purgatory which the UK found itself in with the Supply Chain Review, but it would surprise few if it did.

It may come as a surprise but it is interesting that Sweden did not begin its licensing telecoms until this year, 2021, almost 2 full years before the rest of the world bought into the **5G** technology bidding war.

Swedish telecom operators are planning to cover almost the entire country with **5G** in the next two to three years after a spectrum auction by the country's telecom regulator PTS.

The auction between four bidders, which had been delayed for a security review and by a lawsuit filed by Chinese telecoms equipment maker Huawei, finally took place on Tuesday. The Swedish court upheld a decision to keep Chinese company Huawei out of Sweden for security reasons.

Bidders were units or joint ventures of telecom operators Talia, Tele2, Telenor and Tre. *"We are just really happy that the auction happened now, it is critical for our continued 5G rollout and to strengthen Sweden as a digital nation in the years to come,"* Staffa Kasson, CTO Talia Sweden, said.

The Swedish Post and Telecom Authority (PTS) announced the completion of a **5G** spectrum auction through which it awarded frequencies in the 3.5 GHz and the 2.3 GHz bands to the country's operators. The sale, which was delayed twice, once for security review and the second time over a lawsuit filed by Huawei, raised 2.32 billion SEK (226 million EUR), slightly above the 1.66 billion SEK (155 million EUR) reserve price.

In a statement, PTS noted all 320 MHz at 3.5 GHz was assigned. Full allocations are as follows:

- Talia secured 120 MHz (3500-3620 MHz) for 760.25 million SEK (75 million EUR).
- Net4Mobility (a joint initiative by Tele2 and Telenor's local units) won 100 MHz (3620-3720 MHz) for 665.5 million SEK (65 million EUR).
- Hi3G got 100 MHz (3400-3500 MHz) at 491.25 million SEK (48 million EUR).
- Turaco Group which took over Net1 in 2019 took all 80 MHz on offer in the 2.3 GHz band for a total of 400 million SEK (40 million EUR).

3.5 GHz spectrum was bought at 2.2 cur/MHz/Pop for 10 years, significantly lower than in Italy, the UK, or France, and at almost the same price as Finland.

The four 3.5 GHz licenses will be valid for a period of 25 years (from January 20, 2021, to December 31, 2045).

Regarding **5G** vendors, PTS demands that equipment from Chinese Huawei and ZTE must not be used in the construction of **5G** networks due to national security concerns. The regulator stated that if existing infrastructure for central functions is to be used to provide services in the concerned frequency bands, products from Huawei and ZTE must be phased out on 1 January 2025 at the latest.

In 2020, Finnish vendor Nokia announced its selection by Telia Company to deploy its nationwide **5G** RAN and SA core. Telia Company also contracted Ericsson to deploy **5G** equipment in Sweden and Estonia. Net4Mobility partners Tele2 and Telenor selected Ericsson and Nokia to deploy their nationwide **5G** RAN. Tele2 had previously named Nokia as its core network vendor for Sweden and the Baltics.

Four players out of five mobile providers provide **5G** commercial services to date. Telenor Sweden launched commercial **5G** services in October 2020 in central Stockholm. Rival operators Telia, Tele2 and Tre respectively launched **5G** services in May and June 2020.

Huawei had opposed the sale, saying that it would be difficult to redo the auction if the court subsequently concludes that the terms were unlawful.

“China will take all necessary measures to safeguard the legitimate rights and interests of Chinese companies,” a spokesman for China’s commerce ministry said on Thursday.

Sweden-based Ericsson, which gets some parts of its revenue by selling telecom equipment in China, had earlier criticized the exclusion of Huawei by Swedish regulators.

A Tele2 spokesman said the company aims to cover over 99% of the Swedish population within three years.

Tele2 launched its first public **5G** network in Sweden on **24 May 2020**. The next generation mobile technology brings increased speeds, higher reliability and new security solutions. Moreover, **5G** will satisfy the ever increasing demand for data in a more energy efficient way.

In the past eight months, the number of worldwide **5G** stations has grown from 18,750 to a shade over 82,200 stations worldwide. In my area of Kentucky, primarily rural and small cities and towns, we have gone from a single **5G** station to five. I came across a post on Benjamin Fulford’s web site in an interesting ‘letter to the editor’. It appears to be from an intelligent person, and concerned about **5G**. It contained a wealth of insights and information the public should be aware of.

Worldwide **5G Genocide Starting in October**

By [Benjamin Fulford Letters to the Editor](#)

Dear Mr. Fulford,

I was badly poisoned on 2 recent humanitarian flights home from Central America, through Houston airport and on to Canada, as was my travel partner- we almost died. The airlines were United and Air Canada. Upon trying to detoxify and researching what happened to us, I discovered that they are using new ‘Fogging’ nanotechnology

chemicals, metals, and aerosols on aircraft under the guise of new anti-COVID 19 measures.

Through multiple holistic means, we were found to be actively poisoned with 'Benzalkonium chloride, benzyl chloride, chloro-aceto phenone', ammonia, radioactive aluminum, radioactive mercury, and nanobot technology. The first few chemicals used are on the list of WW1 chemical warfare agents on Wikipedia here (others are degradation products from the human body processing these poisons):

https://en.wikipedia.org/wiki/List_of_chemical_warfare_agents

The two nano-chemicals I believe were used on our aircraft are (confirmed by a private jet company as the main chemicals used for Fogging):

BACOBAN: https://new.parkdentalresearch.com/shop/index.php?route=product/product&path=101_103&product_id=351

VIRACLEAN: <https://www.catalog.md/drugs/vira-clean.html>

THE CHEMICAL DEGRADATION PROCESS AND ADDITIONAL POISONS PRODUCED:

https://en.wikipedia.org/wiki/Benzalkonium_chloride

<https://pubchem.ncbi.nlm.nih.gov/compound/Pyrithione-sodium>

https://en.wikipedia.org/wiki/Benzyl_chloride

The cognitive impairment from this experience cannot be described (from perfect health to vision loss, nausea, hearing loss, loss of equilibrium, inability to process information, inability to speak, read or write, seizures and so much more. I am blessed to work in health and to have gone on an immediate and rigorous detox program which helped significantly though long term-impairment may be the outcome as these are very noxious poisons. Others on our flight or other flights might not be as lucky.

THIS IS THE EXACT PROCESS THEY USE TO SANITIZE PLANES:

First, they spray a sheet of positively charged 'nano-glass' called electrostatic spraying (sometimes with chemicals and sometimes without), then they aerosol the entire plane with the active nano-particle chemicals (as shown on the websites above), which are said to self-replicate for up to 10 days after application, only they are using the chemicals between every single flight, and in some cases all night long for 8 hours straight. Traveler's then board the plane just 60 minutes after application.

Apparently the nano-material technology makes it so that the product cannot be re-applied repeatedly and once coated, it will reject more coating for the next 10 days back into the air.

This is advertised as making the product go-farther with less use' but when applied repeatedly as airlines are doing, the result is that these charged atoms spew back into the air as a potent positively charged aerosol being attracted to the next neutral or negatively charged atoms that enter the flight, such as the body and lungs of human beings.

As if this were not enough, they end the treatment with a UV light blast of the entire aircraft, using mercury lights which when turned on, release a potent mercury vapor into the air, to further cause harm to the coming passengers.

If you dig into this, you will quickly see that this is nothing short of an aerosol vaccine program meant to incept healthy humans with unapproved, unconsented poisons and nano-technology.

The worst part is that this is already happening in schools, and some public places, and soon to be in stores, malls, movie theaters, condo building lobbies and subways, buses and rental cars. Children around the world are being diagnosed with rare brain diseases and I believe it's from exposure in schools.

I have PDF's full of info I can send you if you want more info on Fogging, however, my own personal poisoning, awful as it is, is not why I contacted you.

Through this experience both my travel partner and I are now extremely EMF sensitive and upon returning to Canada, became incapacitated once in **5G** radiation. I became quickly aware that I am now (thanks to nanobot brain poisoning) a walking human Geiger counter. The nanobots in my brain allow me to sense with inhuman accuracy every single deviation in microwave frequency and I feel every **5G** tower, meter, street light, receiver long before I see it.

This led me to dig into the **5G**/ nanobot/transhumanism agenda rabbit hole and fell across what I believe is a global genocide agenda using **5G** frequency. This agenda is set to be rolled out this coming October (2020), and continued from city to city until next August and will result in hundreds of millions of deaths in the US, Canada and possibly much more worldwide.

This is the real reason why I contacted you:

- I believe the above mentioned fogging chemicals are being dumped on us via chemtrails and in public spaces, and will be used to falsify a second COVID wave, as the new COVID symptoms are identical to those of Benzalkonium chloride and radiation poisoning.
- I believe this is an aerosol mass-vaccination agenda. The coming COVID vaccines will also contain nanobots and nano-technology.
- I believe that anyone infected like I am (and soon to be everyone) will be hyper-reactive to **5G** and will become a physical part of the electrical smart grid pulling frequencies to their brains as if they were a human tower. This enables mind control, implanting of emotional reactions, and thoughts via frequency manipulation and creates transhumanism.
- I believe they locked people down earlier this year under the false guise of a virus so they could roll out **5G** in every part of the world on current infrastructure so that nobody would notice.

- I have traveled extensively this last month trying to find a **5G**-free safe haven and there are none. Even remote areas of Canada and impoverished areas of Central America have **5G** infrastructure already in place and frequencies already being emitted.
- **5G** is NOT a WI-FI issue, this is an electrical agenda and the microwaves pulse into the house and environment via electrical wires, signals, smart meters, and house-hold appliances and plugs, NOT VIA WI-FI ROUTERS EXCLUSIVELY.
- Areas with 3G or less WI-FI strength actually have **5G** infrastructure already set up in their electrical systems.
- Areas around the world without WI-FI at all are still experiencing microwave pulsing throughout the day.
- Big Tech used the term 4.5G (4G PLUS) to build the **5G** infrastructure without drawing attention to **5G** itself which is highly controversial and not widely accepted by the population.
- I believe that the global plan is to vaccinate people (both through inoculation of the willing and forced aerosol poisoning of the resistant) with nanobots and then to blast **5G** anytime there is population resistance to first control people, then to actually kill them.
- I believe that **5G**, and only **5G**, is why people died in WUHAN in 2019, then Italy, Queens NY, now Sweden (being blasted as we speak) and so many other areas to come. They were dosed with, or vaccinated with nanotech, and then the frequency was increased as a test to see which frequencies had people falling dead and at which rate.

Here is why **5G** built into our electrical system is so dangerous:

- 4G is 7 GHz or less
- 4.5G (4G Plus) is 7-12 GHz
- **5G** is 15-300 GHz
- At 10 GHz the human immune system starts to falter, sleep is impaired and healing is minimized
- At 10-30 GHz, disorientation sets in, feeling tired, drowsy, weak, trouble sleeping, dry mouth, dehydration, poor cell turnover and lowered hemoglobin, depression, anxiety and other symptoms of radiation poisoning/ microwave syndrome.
- At 35 GHz the oxygen molecules in the air and our bodies begin to spin, making it impossible for our hemoglobin to uptake oxygen causing asphyxiation. 75% of healthy people will die in the first 2-3 days of being exposed to 35 GHz consistently. The healthiest will die within a week.
- At 50 GHz, nothing survives, including birds, bees, trees etc.
- At 60 GHz everything goes up in flames (similar to the wildfires in the US right now- in **5G** areas)
- They are currently experimenting daily with frequency changes (I feel every shift) to normalize people's symptoms and exposures so no one notices what is happening. They are experimenting to see how high they can go before people start noticing.
- I have been in areas where the map shows only 4G or even 3G and yet they have **5G** frequencies already pulsing.

- They increase the frequencies at night so people sleep poorly, causing a weakened society, and lower it during the morning, increasing again in the afternoon.
- **5G** is the most dangerous large-scale and immediate-acting bioweapon in all of history.
- **5G** is the equivalent of having a loaded gun pointed to every single one of our heads, no matter where you live, where you work, what your race, what your social status or how much money or skills you have, you are the mercy of that dial.
- If you have electricity right now, you can be killed in an instant if they blast the frequency through your home at anything over 35 GHz.
- Here is a woman who shares the global plan in more detail, with dates, escape routes and timelines if you are interested: <https://www.lindaemmanuel.com/index.html>
- See a **5G** map here (not super accurate or up to date as they are doing this in secrecy but shows the different classifications): <https://www.nperf.com/en/map/5g>

This is the genocide agenda:

- All **5G** infrastructure is already in place. Look at receivers already placed on your streetlights, smart meters, your electrical outlets and appliances, the towers themselves, rooftop receivers, etc.
- Next is poisoning people with aerosols, and toxic food and water to falsify the second wave
- Once people are in lockdown, they cannot leave their homes- these areas are then easy **5G** kill zones.
- The government can choose to increase the frequency anytime they decide and depopulate as much as they want, in any chosen area.
- I guarantee that unless you are very far off-grid, without any electricity and no neighbors who have it either, you are, as we are, currently sitting in a potential kill zone.
- I have tried reaching out to colleagues, health pioneers and other popular leaders in the natural movement but everyone is afraid to share this as they feel they will be killed immediately and censored to block the sharing of this info.

The United States Endeavors to Lead the 5G Race

In Sept. 2018 the FCC announced its [5G FAST Plan](#) in an effort to advance the country's position among the countries that have deployed **5G** networks. Part of this plan includes spectrum auctions. In March 2016, prior to the official start of the **5G** FAST plan, the FCC hosted an "[incentive auction](#)" that began repurposing spectrum and opening up low-band spectrum for wireless broadband that can be used for **5G** networks. A second auction of the upper 37 GHz, 39 GHz, and 47 GHz bands was set for 2019. Money raised from these auctions will be used to bring high-speed broadband to the rural U.S.

In August 2020, T-Mobile U.S. became the first telecom in the world [to launch an SA 5G network](#) with a **5G** core. This came after a merger with Sprint was completed in April 2020. This is significant, in that T-Mobile US surpassed AT&T, Verizon, and SK Telecom. AT&T was the expected winner of the race to **5G** in the U.S. and SK Telecom was the favorite to have the world's first SA **5G** network. Both had plans to have a network with SA [5G architecture](#) by early 2020 but did not meet those benchmarks.

AT&T and Verizon are still part of the **5G** conversation in the U.S., although it's debated which of those two was truly first to market. [In December 2018](#), AT&T was the first U.S. carrier to launch a standards-based mobile **5G** network servicing a dozen cities, albeit without any **5G**-enabled devices. In October 2018, Verizon was the first to have a non-standards-based deployment that was actually a fixed broadband network in four cities. In March 2019, Verizon turned on its standards-based **5G** network in Minneapolis and Chicago, also before mobile **5G** devices were available. Verizon began selling Samsung Galaxy S10 **5G** on May 16, 2019 and claims it will have **5G** in 30 cities by the end of 2019. As of August 2019, AT&T had deployed **5G** in 21 cities and claimed the **5G** network would be deployed in 30 states by the end of 2019.

5G GENOCIDE: The Most Lethal NWO Conspiracy of the Third Millennium

Why is the 5G freight train seemingly UNSTOPPABLE?

Because it's not just an out-of-control freight train; the 5G roll-out is a global Government-Corporate Juggernaut of immense and unparalleled proportions

The **5G** roll-out that's currently rolling across the land like a full-blown juggernaut is unlike anything the world has ever seen.

Volumes could be written about how the stealthy worldwide deployment of **5G** is unfolding like no other major technological implementation in modern history.

Not only has **5G** BROKEN all the rules of the required health and safety testing in nations large and small, the rapidly intensifying **5G** roll-out is occurring surreptitiously WITHOUT INFORMED CONSENT.

Here's what one very wise woman living in Manhattan just experienced while dealing with her [VERY SNEAKY] Internet service provider.

[Here's how they are stealthily doing the 5G roll-out in NYC—WITHOUT INFORMED CONSENT](#)

What's the real deal with 5G?

Like every [New World Order](#) globalist scheme to further control humanity and lock down the entire planetary civilization, **5G** is the capstone of the furtive **One World Government** project.

Toward that end, it ought to be easy to understand just how essential the “5th Generation” of cellular mobile communications really is.

5G is, after all, the critical piece of the *Internet of Things* (IoT) puzzle which represents the ultimate control mechanism designed to monitor and control the human race.

Only when TPTB throw the switch on **5G** will the [Internet of Things](#) truly be live and ready for prime time.

Unfortunately for humanity, when that day comes — if it comes — every person on the planet will be transformed into a ‘live wire’ ... and most will be unaware of it until they simply can't get out of bed one day.

But what's really driving this out-of-control juggernaut?

MONEY

In short, the ongoing global implementation of **5G** represents the single greatest business venture of all time.

There is nothing even close — not even the multi-decade hydrocarbon fuel paradigm that has made trillions by extracting oil and gas on land and in the seas— EVERYWHERE.

In point of fact, the **5G** international development project is the largest global enterprise on Earth today and we ain't seen nothin' yet.

Here's what the **Internet of Things** looks like.

Just for a moment, imagine what the build-out will look like to create (almost from scratch) an **Internet of Things** everywhere around the globe.

The Internet of Things is really the main driver — on one level, that is — of the premature push toward comprehensive **5G** implementation. The obvious reason is that the Internet of Things requires a much more powerful, resilient and extensive network to operate seamlessly and reliably. Therein lies the real problem.

You see, everyone wants their technology to function well and without interruption. Given the great variety of wireless devices hitting the market every year, the manufactured need of **5G** networks nationwide, which efficiently accommodates each device individually and collectively, has created extraordinary demands. Welcome to **5G**—the solution to all of those challenges and demands...and there are many.

Much more importantly, however, is that the IoT cannot really function as the comprehensive Global Control Matrix that it's meant to be until **5G** is firmly in place worldwide.

[\(Source: **5G ROLL-OUT: An Ongoing National Emergency that Requires an Immediate Shutdown by the American People**\)](#)

When the IoT is fully operational across the USA, every home, every business, every government office building, every NGO, every corporate office, every vehicle, every mall, as well as every restaurant, retail store, hotel, motel, vehicle, smartphone etc. will be rewired and hardwired to accommodate the **5G** technological paradigm.

There will never be a bigger opportunity for the globalist control freaks who run the world today than **5G**.

We're talking about tens of TRILLIONS of dollars of investment capital necessary to carry out this clandestine scheme to chip every person after they newly hardwire every location on planet Earth to accommodate **5G**.

KEY POINT: The crux of this exposé is this: the vested interests aggressively promoting the **5G** roll-out are the most powerful investors in the world. The greatest economic and financial powerhouses in the West are perfectly aligned around this **5G** buildout. The forces of international commerce and trade are vastly arrayed and singularly determined to have their **5G**; therefore, IT APPEARS that only a [Phoenix Moment](#) can stop it at this late date.

So that's the short story about the high-pressure **5G** roll-out that this *Alt Media* platform will focus on during this month of April. More than any other driving force behind the **5G** juggernaut, it's the humongous projected corporate profits that are making everybody see **GREEN**, and not the **RED** flags flashing about a looming public health crisis.

The reader can now apprehend why even the *'Wall Street Journal'* is regularly featuring full-page ads extolling the virtues of **5G** ... before it's even tested for health concerns and medical risks.

The bankster-underwritten investment capital and corporate capitalization of *Big Telecom* now driving **5G** is so ginormous that not even industry insiders can conceive of how big this thing really is.

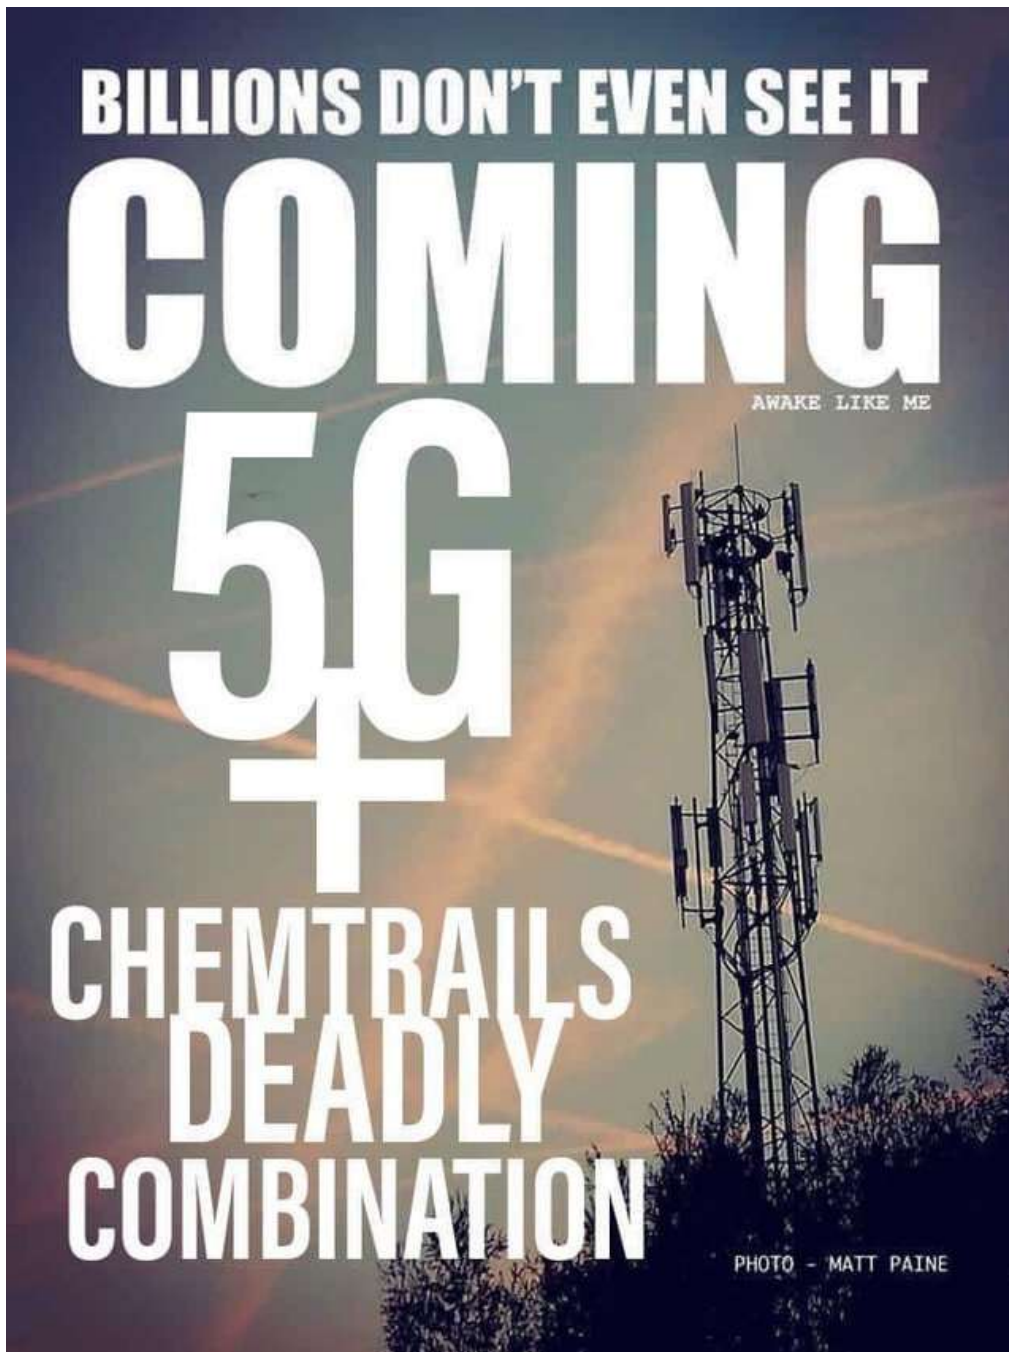

The following video provides a rare glimpse into the real workings of the juggernaut. What you'll see is Big Telecom's version of Dr. Strangelove when a deranged Tom Wheeler was the FCC Chairman and the primary cheerleader for the national 5G roll-out.

[**5G NUTCASE: FCC Pitchman Demanded Buildout Now, No More Safety Studies Necessary Before 5G Rollout \(Video\)**](#)

There you have it!

We really are dealing with a globalist cabal itching to exert total command and control over every square inch of Earth.

Their maniacal and malevolent push to get this done is truly symptomatic of the camarilla of incorrigible criminally insane psychopaths who are calling the shots. They really can't help themselves they're so giddy with the prospect for profits that would make King Solomon's treasure pale in comparison. As well as the potential to control everyone, everywhere, all the time.

Extinction Level Event

Lest the reader incorrectly surmise that this article contains even an iota of hyperbole, please read the following “global appeal” which links to numerous scientific research papers documenting the extremely serious health risks associated with **5G**.

[Wireless Radiation: Stop the 5G Network on Earth and in Space, Devastating Impacts on Health and the Environment](#)

We hear a lot about ELEs these days because many of the most critical trajectories are truly reaching points of no return in all the vital spheres of life. As a matter of fact, the environmental and ecological breaking points are so profound and pervasive that the biosphere is now under severe threat.

In fact, the coalescence of some of these downward spirals, if left alone as they race to the bottom, will certainly spell the end of the human race. However, in view of the military-type deployment of **5G** now taking place, some of those trajectories will surely be put on SUPER STEROIDS.

Here in America, for instance, there are now several major cities that are undergoing the covert buildout of infrastructure in locations that will guarantee a mini-*Apocalypse* whenever they do flip the switch.

That's exactly how this slow-motion *Extinction Level Event* will transpire over the coming years. The USA will see a series of highly localized EMF and Microwave-driven ELEs, each with their own unique set of public health disasters and medical crises.

The different manifestations will vary because of the types and levels of EMFs and Microwave Radiation that are disseminated in each city. Similarly, each community will be victimized by various chemical geoengineering programs where the composition of the chemtrail aerosols dictates the effects within the respective **5G** environments. In other words, the perps can produce different desired effects by conveying **5G** frequencies and radiation through varying chemtrail aerosol formulations. And each particular combination of **5G** and chemtrail brew results in a different outcome.

These predictable **5G** + Chemtrail realities will translate to many inscrutable health predicaments that will be extremely difficult to properly diagnose, much less successfully treat. The creators of the **5G** platform may not even know the extent to which populations exposed to this regimen will suffer greatly, on both individual and collective basis, because of how elusive will be the invisible causation.

For these and other significant reasons, the only way to avoid an ELE is to prevent the deployment of **5G** from occurring. The crucial point here is that it's always much more challenging to get rid of a menace after it's firmly established; and much easier to stop it before it's gotten off the ground.

KEY POINT: Unlike most highly organized genocides, the **5G** depopulation conspiracy is unusually indiscriminate and brazen. This is the one we've all been hearing about for years and how they plan to reduce the global population from 7 billion plus to 500 Million. What makes **5G** vastly different from so many other fastidiously controlled genocides is that the power elite themselves will become collateral damage. Why? Answer: [Why does the World Shadow Government destroy its own home \(planet\)?](#)

Action Plan

There's only one way out of this *Extinction Level Event*!

People everywhere must make their demands known ... to every elected representative and government official and corporate CEO/President and Chairman of the Board who are misguidedly supporting this planet-wide calamity.

Here's the strategy in a nutshell.

The administrators in the middle — in government, corporate and NGOs — need to have their feet held to the fire like never before.

In other words, those responsible for making the decisions and executing the **5G** implementation plans need to have the living excrement scared out of them.

KEY POINT: Every **5G** booster in any leadership capacity needs to be denounced as a political pariah and the menace to society that they truly are. Any leader, in any community, who hawks **5G** for Big Telcom should be lambasted mercilessly for being the corporate prostitutes that they really are. In this way **5G** can be elevated as the most influential hot-button issue during the 2020 campaign season. Only in this fashion can the American people hope to stop the **5G** juggernaut dead in its tracks.

Only when these order-following folks are more afraid of *We the People* than they are of their *Deep State* handlers and **Shadow Government** masters will they make decisions and act in the best interest of their respective constituents and customers.

This well-planned **5G** genocide and depopulation plot is clearly “**The Most Lethal NWO Conspiracy of the Third Millennium**”. For those who still refuse to believe, please watch the following MUST VIEW video.

[**5G WEAPONRY: Microwave Radiation Technology Being Deployed as Depopulation Warfare, Full Spectrum Dominance & Total Human Control**](#)

Conclusion

If ever there was a defining moment in human history for people of every nation to come together to terminate the New World Order agenda with finality, that time is now.

The past 100 years has seen many opportunities for the Truth Movement to confront the dark side. The number of outright assaults on both personal and national sovereignty is staggering ... and yet here we still sit like frogs — in the proverbial stew pot as it gets hotter by the minute.

May we suggest that every concerned reader deeply contemplate what's at stake with an unimpeded **5G** rollout. Think about the children and the grand-children who will not even have a chance coming out of the womb as the first toy put in their tiny hands is a smartphone.

What's the point?
If not us, then who?

**If not now, then when?
If not here, then where?
If not this, then what?**

In other words, this bold and life-threatening **5G** energy attack on all of us represents the final battle between the forces of light and the forces of darkness. Hence, there's really no other option but to fight with all our heart and mind, body and soul.

One excellent way to do this is to make **5G** the biggest campaign issue of the 2020 election cycle. If this strategy is effectively carried through, the electorate should see every candidate — at the federal, state, county and municipal levels — screaming at the top of their lungs about how they will kill **5G** however they can. The best way to rain on the **5G** parade, then, is to get them all to beat each other up with anti-**5G** speeches and campaign spots, legislation and rule changes.

By the way, each and every one of us can begin by speaking truth to power about **5G** hazards like there's no tomorrow, because if we don't, there just may be no tomorrow.

Even the anti-**5G** global advocacy movement is still unaware of many of the radioactive truths and inconvenient facts contained in this post. Hence, it's of paramount importance to circulate this link far and wide; for right knowledge is the key to winning this decisive battle in this highly consequential information war.

Gary G. Kohls, MD has said, *"I have been trying to link that article to people. One guy told me it has nothing to do with contagious virus.... I told him people are getting sick from **5G** and they are calling it Coronavirus to create a crisis they can use. Just look at a list of hardest hit countries, they are all developed, 1st world countries, and they all are building new networks. Even Iran is building a new "4.5 G" system. Switzerland band any new **5G** installations back in November for health concerns. They already had built and released some **5G**."*

News from China is heavily controlled. It all depends on whether you want to listen to scientists from around the world who have clearly stated that even 3G and 4G damage the Human DNA leave alone **5G** which KILLS people. Looks like you prefer the response given by businessmen in suits. And that's your choice. I stick to broadband at 3G which is fast enough and also limit internet use to a couple of hours per day and that works well for me. We are hooked onto internet and so telecom companies are now on steroids dumping their Gs on us without approval from truthful independent scientists. Eventually they will come to their senses for a world full of sick people or dead people will not serve their purpose of carrying on business as usual. And having to live in a dangerous environment means they will eventually get very sick or drop dead too unless they live in bubbles out of Space. So let's hope good sense will prevail in the long run

Yes. Covid 19 = Covid 5G satellite technology !!

Coronavirus doesn't exist. It is the 5G satellites and transmitters that are killing the people worldwide.

Sweden by delaying 5G was saving people's lives. Throughout the two year delay, Sweden had no lockdown, no face masks, no Covid-19, and almost no deaths.

5G technology carries massive atomic radiations. These radiations are airborne and randomly frying the people's blood oxygen and their entire immune system.

They called it coronavirus just to create a crisis under the New World Order of the 1% Corporate Elite and to depopulate humanity with fake massive poisonous vaccination. Bill Gates and Pope Francis are enemies number one of our World.

Blessings,
