The Blessed Hope!

"Looking for that blessed hope, and the glorious appearing of the great God and our Saviour Jesus Christ;" –(Titus 2:13)

Diamond & Nugget #123

Will The New Shemitah Cycle Be One Of The Biggest Turning Points In All Of Human History? This headline is not from a religious site, it is from a secular business site and it really adds to the excitement that builds in less than three weeks. *'IWB'* is *"Investment Watch Blog"* and heightens my excitement over September 26-28, which occurs in just over two weeks. I thought I would share it with readers of *"The Blessed Hope"* series. I will add any necessary comments at the close of the article by *'IWB'*. <u>September 6, 2022 8:34 am</u> by <u>IWB</u> Sharing is Caring!

A number of people have asked me about the Shemitah year lately, and so in this article I will attempt to provide some answers. According to Orthodox Judaism, the current 7 year Shemitah cycle will end and a new 7 year Shemitah cycle will begin when Rosh Hashanah arrives on the evening of September 25th. But that assumes that they have been calculating the Shemitah cycles correctly. There are some that believe that this is not actually a Shemitah year at all. There are others that believe that a Shemitah year should begin on the first day of the Biblical year and not on Rosh Hashanah. And then there is the debate between those that believe a full Jubilee cycle is 49 years long and those that believe a full Jubilee cycle is 50 years long. As you can see, researching this topic can quickly become extremely complicated. So let me start off by reviewing some of the basics. This is what Wikipedia has to say about how the Shemitah year is observed in the land of Israel today...

The Sabbath year (shmita; Hebrew: שמיטה, literally "release"), also called the sabbatical year or shəvi'it (שביעית, literally "seventh"), or "Sabbath of The Land", is the seventh year of the seven-year agricultural cycle mandated by the Torah in the Land of Israel and is observed in Judaism.

During shmitah, the land is left to lie fallow and all agricultural activity, including plowing, planting, pruning and harvesting, is forbidden by halakha (Jewish law). Other cultivation techniques (such as watering, fertilizing, weeding, spraying, trimming and mowing) may be performed as a preventive measure only, not to improve the growth of trees or other plants. Additionally, any fruits or herbs which grow of their own accord and where no watch is kept over them are deemed hefker (ownerless) and may be picked by anyone.

A variety of laws also apply to the sale, consumption and disposal of shmita produce. All debts, except those of foreigners, were to be remitted.

Unfortunately, a lot of man-made rules have been created to allow people to keep the Shemitah without really keeping it...

Even for those inclined to consider the Shemitah binding, Talmudic scholars developed a mechanism known as a pruzbul to effectively negate the loan-forgiveness aspects of Shemitah. This process hinges on the scriptural command to forgive the debts of a "friend or brother" (Deuteronomy 15:2), which Talmudic scholars chose to interpret as implying that only private debts are cancelled. Making a pruzbul transfers the debt to a public religious court, a beit din, so the debt is theoretically no longer between friends, brothers, or neighbors. According to this interpretation, the once-private debt is fully recoverable, and nothing is forgiven (see Mark 7:8–9).

Likewise, those interested in maintaining farms during a Shemitah Sabbath year have turned to a rabbinic interpretation, which effectively nullifies the law. By hiring non-Jewish hands to work the land, the landowner can claim to be following the Shemitah by not (himself) cultivating the land—others are doing it for him, and he is not laboring personally.

Obviously this is not what God originally intended. According to Leviticus 25, the Shemitah year is supposed to be a year of complete rest for the land...

Then the Lord spoke to Moses on Mount Sinai, saying: <sup>2</sup>Speak to the children of Israel, and say to them: When you come into the land that I give you, the land shall keep a Sabbath to the Lord. <sup>3</sup>For six years you shall sow your field, and six years you shall prune your vineyard and gather in its fruit, <sup>4</sup>but in the seventh year there shall be a Sabbath of complete rest for the land, a Sabbath for the Lord. You shall neither sow your field nor prune your vineyard. <sup>5</sup>That which grows by itself from your harvest you shall not reap, nor gather the grapes of your unpruned vines, for it is a year of complete rest for the land. (Lev. 25:3-5)

And according to Deuteronomy chapter 15, at the end of the Shemitah year there is to be "a relinquishing of debts"...

At the end of every seven years you shall grant a relinquishing of debts. This is the manner of the relinquishing: Every creditor that has loaned anything to his neighbor shall relinquish it. He shall not exact it of his neighbor, or of his brother, because it is called the Lord's relinquishment.

According to Orthodox Judaism, the last day of every Shemitah year falls on Elul 29 – the day right before Rosh Hashanah on the Biblical calendar. Interestingly, there have been some huge stock market crashes on Elul 29.

For example, on September 17th, 2001 (which corresponded with Elul 29 on the Biblical calendar), we witnessed the greatest one day stock market crash in U.S. history up to that time. The Dow Jones Industrial Average dropped 684 points, and that was a record that stood for precisely seven years until the end of the next Shemitah year.

In September 2008, we witnessed another historic stock market crash. On September 29th, 2008 (which corresponded with Elul 29 on the Biblical calendar), the Dow Jones Industrial Average plunged 777 points. That was another all-time record, and many felt that it was extremely significant that the Dow declined 777 points just as one 7 year Shemitah cycle was ending and another 7 year Shemitah cycle was beginning.

In 2015, the stock market was closed on Elul 29 because it fell on Sunday, September 13th. But we did witness a tremendous amount of financial shaking during the months of August and September that year.

This pattern does seem to strengthen the case of those that believe that 2001, 2008 and 2015 were Shemitah years.

If those three years were Shemitah years, then 2022 would be a Shemitah year as well. And that would make 2029 a Shemitah year too. In fact, many believe that the last Shemitah year in this current Jubilee cycle will be in 2029. And if Jesus died in 29 AD (as many believe), that would put the Shemitah year of 2029 precisely 2,000 years after Jesus died on the cross for our sins.

In addition, it appears that the end of the current Jubilee cycle will wrap up the 120 Jubilee cycles of 50 years each since the creation of humanity. As I detailed in my book entitled '7 *Year Apocalypse*', all throughout history there has been a belief that God has a 7,000 year plan for humanity. After 6,000 years of human rebellion is complete, Jesus will rule from Jerusalem for 1,000 years during the Sabbath Millennium.

That is one of the reasons why we are supposed to remember the Sabbath and keep it holy. We remember that God created the world in six days and rested on the seventh day, and it is also a prophetic picture that points to the time when the world will be at rest for 1,000 years after experiencing so much chaos for the preceding 6,000 years.

If we really are getting very close to the return of Jesus to this planet, that means that everything is about to change.

But as far as the Shemitah and Jubilee cycles are concerned, I want to stress that we cannot be too dogmatic about them.

We simply cannot prove that the Shemitah years have been calculated correctly.

And there is still a lot of debate about whether a Shemitah year should begin at the beginning of a Biblical year or on Rosh Hashanah. I believe that debate will eventually be resolved, but for now it is still an open question.

Having said all of that, what is exceedingly clear is that we are living in the end times and that the return of Jesus is drawing near.

So we should be expecting Biblical calendar cycles to converge, and I believe that is precisely what is taking place.

All of human history has been building up to a grand crescendo, and we get to be here for it.

What an exciting time to be alive! [I just figured out the name of the person who wrote this article on the 'IWB' web page.]

In Blessed Hope #122, I urged readers to watch the video by Mark Biltz Ministries. The recommended video by Mark Biltz. I was referring you to this video by Mark Biltz: When will the TRIBULATION begin? Where are we on the BIBLICAL Calender? (What Time is it?) Mark Biltz points out that we are on target for the Trifecta of Bible Prophecy: A new Shemitah cycle; A new Jubilee cycle; and last of all Daniel's 70<sup>th</sup> Week of Daniel 9:27. All three converge and coalesce on September 26-27 this

**year!** If you have not viewed the video by Mark Biltz, it is a must to explain the syncronization of these three cycles that converge on September 26-27, 2022.

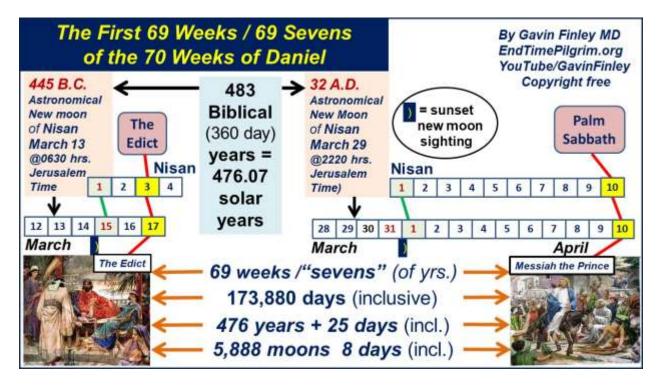

The writer of the *IWB* article claims to be a Christian, and has been exposed to the Hebrew concept of God's Plan of restoration. He is also an attorney and writes a busines and economics web site. <u>The Shimetah cycle is from where we get our bankruptcy laws in the U.S.</u> One can file legal bankruptcy every "seven" years and have debts discharged, with a few exceptions: Student loans, child support, and a few other situations are not covered by the various chapters used to seek relief in bankruptcy.

In the past few months, I have been seeking legal advice regarding around \$100,000+ in medical bills from 12-days in two hospitals and dozens of physicians that billed me. By legal terms I am indigent, have nothing that can be attached in debt collection. Government regulations regarding Social Security, I am exempt from garnishment,, which means they cannot touch an elderly person's monthly Social Security and that I cannot be sued for collection of those medical bills, and two attorneys have told me I am "judgment proof".

The problem with such articles as the 'IWB' article is that they may not always be correct on specifics such as the date and year of Jesus crucifixion and then the erroneous date will be repeated elsewhere.. This is the case with the writer of the above article on Shemitah cycles. As I noted above on page 4, I figured out the writer's name of the article. It is none other than Michael Snyder, author of 'The Rapture Verdict'. Michael does not understand the Bible even though he leaves his readers with the impression that he knows a lot about the Bible. In case you have not read Michael Snyder's book 'The Rapture Verdict', I would not recommend it. Michael believes the Church will go through the Tribulation that is just ahead. I did a critical review of his book on Amazon shortly after I bought his book in May of 2016. I gave it a 1-star review and my review was the #1 negative review for almost a year. My review was titled: "The Rapture Verdict" – "Case Dismissed!" My critical review on Amazon's reviews of Michael Snyder's book is still there but buried deep in the pages of negative reviews. Suffice it to say, Amazon's review policie are not always on the up and up! But let's move on to the discrepancies of Michael's article here on the Shemitah Cycle. A Bible scholar he is not! His ignorance raises serious questions as to his failure to do something as simple as basic research, something an attorney should want to have as an attribute in his J.D. tool kit!

Jesus was crucified on April 10, 32 A.D. not 29 A.D. The chart below by Gavin Finley confirms this in such a way to explain the metatonic cycle with an added month of Adar, AN EMBOLISMAL YEAR. Gavin Finley and others note that Jesus died on the cross on Nisan 14, 32 A.D. His study of this topic is without a doubt the most detailed study in the 19<sup>th</sup> or 20<sup>th</sup> century. This date is that which Dr. Chuck Missler also confirmed more than three decades ago. If one wants accurate data it becomes necessary to separate the "ignorance" level content from the true evidence of history.

The chart below is the definitive proof evidence that confirms the Bible's accuracy and truth. The mathematical precision is astonishing and has been tested and verified many times over the past several hundred years. It has been most unfortunate that traditional mainline Protestant churches largely are under the theological influence of the Roman Catholic Institution. Martin Luther's Reformation of Rome never really took hold or gained much traction. The Protestant Reformation was a still-born infant! Even as five hundred years of the Protestant Reformation have come and gone, the institutional church has not taken serious the accuracy of the King James Bible.

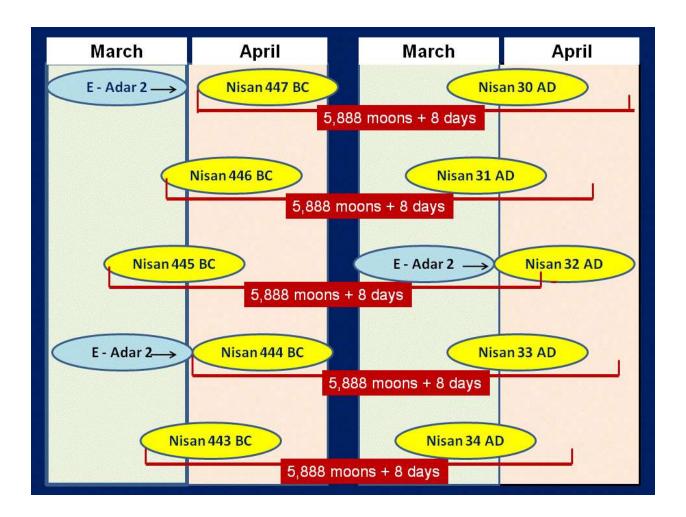

Gavin Finley M.D. - endtimepilgrim.org provides us a very comprehensive topical coverage in the pages that follow and unlocks the events of Daniel's Seventieth Week!

I submit to you this premise of Daniel's prophecy of Seventy Weeks being the key that unlocks most of the Bible's prophecies, and along with the research and work of Mark Biltz, Jonathan Cahn, and others enable Bible students to know with certainty, and no need to hedge with such disclaimers like that of Michael Snyder below are cope outs!

But as far as the Shemitah and Jubilee cycles are concerned, I want to stress that we cannot be too dogmatic about them. We simply cannot prove that the Shemitah years have been calculated correctly.

And there is still a lot of debate about whether a Shemitah year should begin at the beginning of a Biblical year or on Rosh Hashanah. I believe that debate will eventually be resolved, but for now it is still an open question.

#### 32 A.D., AN EMBOLISMAL YEAR, IS THE ONLY YEAR THAT HAS A LATE NISAN MOON TO ALLOW THE 173,880 DAYS TO CONNECT THE NISAN MOON OF NEHEMIAH WITH THE NISAN MOON OF THE CRUCIFIXION YEAR.

From the chart above we can see that our 173,880 day time-span is nearly a month longer than the 476 years as measured from equinox to equinox. This is a very long time span and it must begin in the Passover month of Nisan in Nehemiah's time and terminate in the month of Nisan in the crucifixion year. We can see that only a late Nisan in the year of the cross as provided by an embolismal year, (a year in which an extra month of Adar has been inserted), will accommodate this extra length. Passover, being pushed up later up into the year allows for this extra length of 24 days over the year.

Here are the facts of the matter. Only the year 32 A.D fits the bill. Timespans terminating in 30 A.D., 31 A.D., 33 A.D. or 34 A.D. just won't cut it. Time-spans ending in 31 A.D. and 33 A.D. land in Nisan months that occur too early in the year to fit the 173,880 days. And the time lines beginning in 446 B.C. and 444 B.C., (the latter favored by Professor Hoehner and others), actually **begin** in embolismal years. So they start late. These make for 476 year Nisan to Nisan time lines that are too short to fit. They

are lot long enough to fit in the required number of days for the 69 weeks(sevens) of years. Time spans other than the time span which terminates in 32 A.D. simply cannot accommodate this long 173,880 day period which overflows 25 days beyond the 476 years.

We can see that only the time span #2, beginning in the year 445 B.C. and terminating in 32 A.D. will fit. This is the time span advanced by <u>Sir Robert Anderson</u> in his classic work, <u>'The Coming Prince'</u>. Only this time-line will succeed in connecting into two Nisan moons, the beginning Nisan moon being the Nisan of Nehemiah and the ending Nisan moon being the Nisan of the <u>Passover</u> of our Lord's crucifixion.

Here are the details. A true and correct time span of the Seventy Weeks of Daniel will lay out the first 69 weeks bridging two auspicious dates in holy history according to the scriptures. The 69 weeks (or sevens) are 69 x 360 = 173,880 days. The time span of 173,880 days is close to an even number of years but not exactly. It is 476 years plus 25 days. And yet the 173,880 days must link the Nisan moon of Nehemiah chapter 2 to Nisan 10, Palm Sunday, in the Nisan Passover moon of the crucifixion year. This time span of 173,880 days is 476 years plus **that long and lanky extra 25 days.** Dear saints. This is very important! When we come to connect our 476 years and 25 days into two Nisan moons 476 years apart we need to do our homework properly. We need to set out our Nisan moons, as we have done up above. Then we need to ask the question.

#### Does the time line fit?!"

These extra 25 days over the year quite clearly make for a rather stretchy task. We must fit this long time line between Nisan months of year 'A' for Nehemiah with a point day ten days into the terminus Nisan moon for Passover, the Nisan month of year 'B'. When we stop and take a long hard look at the situation we realize that in order to fit the time line Year 'B' simply **must** be a late embolismal Passover Nisan moon. It **has** to be a late Passover in order to make that long and lanky time line fit into the two Nisan moons 476 years apart.

As can be seen from the diagram the 31 A.D. and 33 A.D. terminus dates fail here. They simply do not fit the bill. <u>Only 32 A.D. was a year with such a late Passover. 32</u> <u>A.D. was an embolismal year in which an extra month of Adar was inserted in the early</u> <u>spring</u>. Embolisms occur seven times every 19 years in a cadence known as the <u>metatonic cycle</u>. So the Passover month of Nisan was a late one for 32 A.D.. That is why it fits the bill for Passover and 33 A.D. does not. In addition to that, Nisan of 445 B.C., (-444 A.D.) was the 20th year of Artaxerxes Longimanus. When we add 476 years to -444 A.D. it brings us to 32 A.D. the correct year and an embolismal year with a late Passover. Only this year fits the bill.

When attempts are made to terminate the 173,880 day time span into the adjoining years 30 A.D. or 31 A.D or 33 A.D. or 34 A.D., the years before and after 32 A.D. these time lines just will not do. Only when the terminus of the 173,880 day time line is placed to terminate in 32 A.D. will the 173,880 days fit into two Nisan moons 476 years apart. It

seems that the lunar cycles have been neglected by Biblical scholars and investigators. They have concentrated on identifying years and Hebrew date connections only to translate them into our Roman solar calendar. They measure the time line by the sun. But God has given us two heavenly bodies for calculating time. The lunar cycles are the key here. And we seem to have forgotten them. And remember that God said that **both** the sun **and the moon** have been given for the determination of times and seasons.

The reason the time line terminating in 32 A.D. fits the requirement is simple. 32 A.D. was an embolismal year. The 2 years before and after 32 A.D. were not embolismal years. So their Nisan to Nisan time spans of 5,887 moons fail to fit 173,880 days The Passover month came late in 32 A.D. making it 5,888 moons. The extra moon allowed the extra days to be fitted in.

Both the beginning and the end of the time span must abut into Nisan events. The Holy Scriptures absolutely and unequivocally require that the 69 weeks, or 173,880 days, fit neatly between the edict of Nehemiah, (which we are told in Nehemiah chapter 2 was in the month of Nisan), and Palm Sunday, (which was also in the Passover month of Nisan, Nisan 10). If we are running a time line 25 days over the 476 years then our Paschal Nisan connection, (Palm Sunday), simply must be a late Nisan. It must have been an embolismal year.

Did 32 A.D. see a Hebrew calendar with an extra month of Adar inserted in the early spring and pushing the month of Nisan further up in the year? Was 32 A.D. an embolismal year?

#### It certainly was!

## THE 444 B.C. TO 33 A.D. TIMELINE OF DR. HOEHNER FAILS TO ACCOMMODATE THE FULL 173,880 DAYS OF THE 69 WEEKS

Let us look now at the third time span offered by Dr. Harold Hoehner. He suggests that the 173,880 day timelime terminated in Nisan of 33 A.D.. But as we see from the graphic above, 33 A.D. was not an embolismal year. If the time span terminated in 33 A.D. it would have terminated in an early Nisan moon. Therefore, going back 476 years and 25 days we push the beginning of the time span back to a day which is very early in the spring of 444 B.C.. As we can see it is over 15 days before the spring equinox Such a time line, beginning in 444 B.C. would come to full moon status very early and before the spring equinox. So it would not even be a Nisan month. That moon would be too early to qualify as Nisan. It would actually be the 12th month, the month of Adar.

As we see in the diagram above, the new moon of this particular month would have occurred in the early hours of March 2nd. This particular moon would have become a full moon 14 days later on March 16. So this 13th month coming in the early springtime would have reached its fullness on March 16. Therefore that moon would have fallen short of the spring equinox 'E' (which is March 21), by 5 days. A short-fall of this magnitude would clearly disqualify this moon as a candidate for the Nisan moon that

year. It would therefore have been inserted as a 13th embolismal month in the Hebrew Calendar for that year and named as such as the second month of Adar or Adar 2.

So we must conclude that Professor Hoehner in his 444 B.C. to 33 A.D. has failed to connect his 173,880 day time line to the Nisan moon as Nehemiah specifies. Instead, connecting into an embolismal year for the **start** rather than an embolismal year at the **finish** he has actually connected it into the moon before the true Nisan, the month of Adar 2.

There is no way Nehemiah would have misjudged and called the month of Adar 2 the month of Nisan. He would surely have recognized that this moon beginning on March 2nd would have had to be declared the month of Adar 2 and not the month of Nisan. The rabbis, or any careful observer of the passages of the equinoxes and the new moons, would never have made a mistake of this gross a magnitude.

Here is another consideration. The Bible was written under the oversight of the Holy Spirit. The Holy Spirit never makes mistakes. And there is **no way** the Holy Spirit would have allowed such a mistake in the Hebrew calendar to be written into the Holy Scriptures.

So the Bible and the astronomical data have spoken. The 173,880 day time line 444 B.C. to 33 A.D. for the 69 weeks of Daniel falls short. It just fails to fit the facts. It fails to match the measuring line set by the astronomical courses of the sun and moon in the heavens.

As we have seen, 444 B.C. could not have been the year that Nehemiah went to the King. And 33 A.D. was not the year of the passion of Jesus. This long and lanky time span of 476 solar years and those extra 25 days does not connect into both Nisan moons for the years in question. Clearly the time span 444 B.C. to 33 A.D. is one year too late. Only the time line 445 B.C. to 32 A.D. fits the facts.

This is also confirmed by other scriptural evidence. History gives us plenty of evidence that the '20th year of Artaxerxes' Longimanus mentioned in Nehemiah 2 was in fact 445 B.C. And as we shall see below, the record of Dr. Luke in Luke 2 points clearly to Jesus ministry beginning in **the fall of 28 A.D.** His crucifixion would have occurred 3.5 years later during the Passover of 32 A.D.

#### FROM THE GOSPEL OF LUKE WE HAVE FURTHER EVIDENCE THAT THE CRUCIFIXION YEAR WAS 32 A.D. LUKE RECORDS THAT THE YEAR IN WHICH JOHN THE BAPTIST BEGAN HIS MINISTRY (AND THUS THE YEAR WHEN JESUS WAS BAPTIZED AND BEGAN HIS MINISTRY) WAS THE 15TH YEAR OF THE REIGN OF TIBERIUS CAESAR.

To find out when Jesus began His ministry we need only look up two things. First we find out which year of the reign of Tiberius saw John the Baptist begin his ministry. That was the year Jesus was baptized and the year He began His ministry. From the

passage below from Luke chapter 3 we see it was the **15th year of Tiberius's reign** when John the Baptist began his ministry, preaching and baptizing in the Jordan valley. Here is our scripture.

#### LUKE 3:1-3

1. Now in the **fifteenth year of the reign of Tiberius Caesar**, Pontius Pilate being governor of Judea, Herod being tetrarch of Galilee, his brother Philip tetrarch of Iturea and the region of Trachonitis, and Lysanias tetrarch of Abilene,

2. while Annas and Caiaphas were high priests, the word of God came to John the son of Zacharias in the wilderness.

3. And he went into all the region around the Jordan, preaching a baptism of repentance for the remission of sins, (<u>Luke 3:1-3</u>)

The second thing we need to nail down is what year Tiberius began his reign. This is a well known, well established, and well documented year and season In fact we even know the actual Julian date. A quick check of Google or the encyclopedia tells us that the first year of Tiberius Caesar began on the 19th of August in 14 A.D. Here below, are just two of many available references giving the date for the commencement of Tiberius's

#### It was August 19, 14 A.D.

#### Reference #1 and Reference #2.

Since the first year of Tiberius was after August 19, 14 A.D. then the fifteenth year of Tiberius was 14 years later and began on August 19 of 14 + 14 = 28 A.D.. So Jesus began His ministry in 28 A.D. in the fall of the year. Since we know from the Gospel accounts that Jesus saw four Passovers during his ministry of 3.5 years then the first Passover was in the following spring of 29 A.D.. The second was 30 A.D., the third was 31 A.D., and the fourth and final Passover, the passover of His crucifixion, was 32 A.D.

This fits perfectly with the calculation of the first <u>69 weeks</u> of the 70 weeks prophecy as laid out by Sir Robert Anderson. Jesus as 'Messiah the Prince' came into Jerusalem on the 10th of Nisan in the spring of 32 A.D.

I first discovered Dr. Gavin Finley's work on the Internet as far back as the late 1990s and it has withstood the scrutiny of the world's best known Bible scholars throughout that time. Dr. Gavin Finley to my knowledge has been a believer in the Pre-Tribulation Rapture since his web site began. A few years ago, he may have changed his view on this but I would not hold that against him, as I sensed from his writings that he was waffling about some points.

Mark Biltz of Mark Biltz Ministries makes the succint point by asking, "on what calendar are we?" In his videos, he challenges the viewer to answering this question. There are numerous calendars in play, but are we on God's Calendar and observing the correct dates that are part of the Biblical narrative in the Torah. On the next page, I have included a chart showing the calendar going back to 1916 for both the Hebrew and Gregorian calendars. The chart includes a financial narrative for the U.S. showing stock

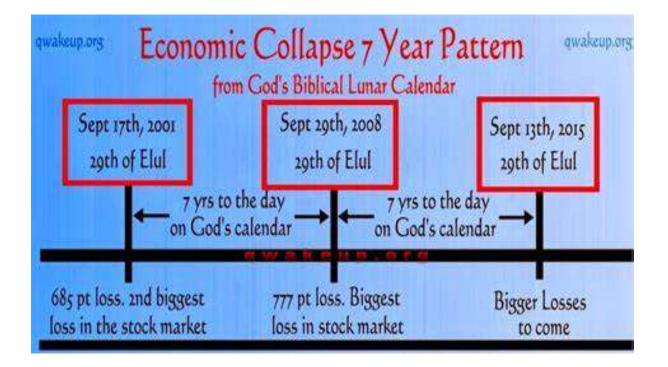

market crashes, economic recessions and examples of how the Shemitah "7-year" template fits like a calf-skin glove. Mark Biltz and Jonathan Cahn have resurrected the two cycles that are laid out in Leviticus 25. I fully understood the fact that because the Israelites failed to observe the Sabbath they were being punished for 490 years of disobedience that led to their being taken into captivity. I did not take to Jonathan Cahn's book at the outset since I failed to make the connection of the events of 9/11 being pertinent to the Shemitah cycle. I somehow could not related to the 9/11 events as being prophetic. I was looking at 9/11 from outside of the spiritual paradigm.

Hebrew Calendar [2]	The Gregorian Calendar, Dates Translated from column 1	A Fitting Narrative		
5677	28 Sept 1916 - 16 Sept 1917	Stock Market Crash: 1916 – 1917 DJIA lost 40% [4]		
5684	11 Sept 1923 - 28 Sept 1924	Recession of 1923 – 1924: industrial production declined 22% [7]		
5691	23 Sept 1930 - 11 Sept 1931	Stock Market Crash: 1929 – 1932 DJIA total loss: 86% [4]		
5698	6 Sept 1937 - 15 Sept 1938	Stock Market Crash: 1937 – 1938 DJIA lost 49% [4]		
5705	18 Sept 1944 – 7 Sept 1945	Recession of 1945: GDP declined 12.7% [7]		
5712	1 Oct 1951 – 19 Sept 1952	Next to Recession of 1953 – 1954, when GDP declined 2.6% [7]		
5719	15 Sept 1958 – 2 Oct 1959	Next to Recession of 1957 – 1958, when GDP declined 3.7% [7]		
5726	27 Sept 1965 - 14 Sept 1966	Year 1966 - US credit crisis creates deflation and huge economic slump [9]		
5733	9 Sept 1972 - 26 Sept 1973	Stock Market Crash: 1973 – 1974 DJIA lost 45% [4]		
5740	22 Sept 1979 - 10 Sept 1980	Recession of 1980: GDP dropped 2.2% [7]		
5747	4 Oct 1986 – 23 Sept 1987	Black Monday, October 19, 1987 DJIA lost 22% [6]		
5754	16 Sept 1993 - 5 Sept 1994	" in the spring to early summer of 1994, the Nasdaq peaked and went into a decline of 14% over 14 weeks." [8]		
5761	30 Sept 2000 – 17 Sept 2001	The collapse of the speculative dot-com bubble, a fall in business outlays and investments, and the September 11th attacks, brought the decade of growth to an end. Despite these major shocks, the recession was brief and shallow. Without the September 11th attacks, the economy might have avoided recession altogether. [7]		
5768	13 Sept 2007 - 29 Sept 2008	Stock Market Crash: 2008 – 2009 By March 6, 2009 the DJIA had dropped 54% [5]		
5775	25 Sept 2014 - 13 Sept 2015	Underway (for doomsayers)		
5882	21 Sept 2021 - 25 Sept 2022	Pending		

But what relevance does an obscure Levitical law have for a modern-day superpower like America? Plenty, says Cahn, and you don't have to be a farmer to feel its effects.

While the rules for farming may no longer apply, Cahn believes the broader principle of the seven-year cycle still holds the secret of how God deals with nations in terms of blessings and judgment. Is it possible that financial crashes, the rise and fall of nations, even empires, can occur within the patterns of seven-year cycles?

Cahn thinks so, and he lays out his case in the book, explaining that the judgments of nations begin with clear warnings, which tend to come in a series of "shakings" or increasingly catastrophic events. They often strike at the core of a nation's financial wealth or provision.

If you are waiting for the collapse of the Global Fiat Monetary System...IT'S ALREADY HAPPENING! Events in Europe during the Labor Day Weekend triggered the event that will go round the world. Edward Dowd said it would take six months to two years. I was sure that he was wrong. Just days after the shut off of gas/oil to Europe the derivative market has been ripped apart. Derivatives are exploding and will take everything down over the next six months.

\$1.5-Trillion in margin calls have already been given with much more to come. This is the popping of Warren Buffett's \$2 Quadrillion *"Weapon of Mass Financial Destruction!"* 

## ALERT! The End Game Has Begun! \$1.5T Needed for Derivative Bailout ASAP! Then MUCH MORE!! (Bix Weir)

https://youtu.be/f6BQxnZbjto

Also, here's the link to the video "Occult Mysteries of the Fed" which is a summary of the Road to Roota Theory by Greg Reese: <u>https://theinfowar.tv/watch?id=63188a74de65865123fb43ba</u>

The problem is not with the physical markets. Rather, we are being told that 1.5 trillion dollars in "liquidity support" will be needed because derivatives trading has gone completely haywire...

*"Liquidity support is going to be needed,"* Helge Haugane, Equinor's senior vice president for gas and power, said in an interview. The issue is focused on derivatives trading, while the physical market is functioning, he said, adding that the energy company's estimate for \$1.5 trillion to prop up so-called paper trading is *"conservative."* 

According to '*Zero Hedge*', it is now being projected that energy bills in Europe will increase by a total of 2 trillion euros and will ultimately reach 20% of all disposable income. Needless to say, we are now in unprecedented territory.

We have already started to see absolutely massive protests in major European cities, and Italian politician Matteo Salvini is openly admitting that this crisis has brought Europeans to *"their knees"*...

Many have warned that Europe is plunging into a *"recession"*, but the truth is that what the Europeans are facing is much more serious than that. This is going to be very bad. A nuclear war between Russia and NATO/U.S. is not out of the picture since the West believes it must destroy Russia. China and North Korea are likely to jump into the fray that will become a global WWIII.

Hilton Sutton once said when he was alive, "When the bombs are descending, the saints will be ascending." That made sense back in the 1990's and it makes even greater sense today. It might become a case of who blinks first: Russia because of its need for hard currency or Europe because of its need for energy.

The collapse is speeding up... are you 100% ready for it?! You have just over two weeks to make your peace with your Creator.

Things are far worse than you are being told according to Michael Snyder. He is correct on this point at least. Michael Snyder says, "Over the past few months, I have been carefully documenting facts that show that global food production is going to be way down in 2022. Unfortunately, most people out there don't seem to understand that the food that isn't being grown in 2022 won't be on our store shelves in 2023. We are potentially facing an absolutely unprecedented worldwide food crisis next year, but the vast majority of the population doesn't seem very alarmed about this. So I would encourage you to help me get this warning out by sharing this list with as many people as you possibly can. As you will see below, we now have so many data points that it is impossible to deny what is coming. The following is a list of 33 things we know about the coming food shortages...

#1 The hard red winter wheat crop in the United States this year "was the smallest since 1963". But in 1963, there were only 182 million people living in this nation. Today, our population has grown to 329 million.

#2 It is being projected that the rice harvest in California will be "half what it would be in a normal year".

#3 The U.S. tomato harvest will come in at just 10.5 million tons in 2022. That is over a million tons lower than a normal year.

#4 This will be the worst U.S. corn harvest in at least a decade.

#5 Year-to-date shipments of carrots in the United States are down 45 percent.

#6 Year-to-date shipments of sweet corn in the United States are down 20 percent.

#7 Year-to-date shipments of sweet potatoes in the United States are down 13 percent.

#8 Year-to-date shipments of celery in the United States are down 11 percent.

#9 Total peach production in the U.S. is down 15 percent from last year.

#10 Almost three-fourths of all U.S. farmers say that this year's drought is hurting their harvests.

#11 Thanks to the endless drought, the total number of cattle in Oregon is down 41 percent.

#12 Thanks to the endless drought, the total number of cattle in New Mexico is down 43 percent.

#13 Thanks to the endless drought, the total number of cattle in Texas is down 50 percent.

#14 One beef producer in Oklahoma is now predicting that ground beef "could eventually top \$50 per pound".

#15 At least 40 percent of the United States has been suffering from drought conditions for 101 consecutive weeks.

#16 Overall, this is the worst multi-year megadrought in the United States in 1,200 years.

#17 Europe is currently experiencing the worst drought that it has seen in 500 years. In some parts of central Europe, river levels have fallen so low that "hunger stones" are being revealed for the first time in centuries.

#18 Corn production for the entire EU could be down by as much as one-fifth in 2022.

#19 We are being warned that there will be crop losses in France of up to 35 percent.

#20 It is being projected that crop losses in some areas of the UK could be as high as 50 percent.

#21 It is being reported that there will be crop losses "of up to 50 percent" in some parts of Germany.

#22 Some farmers in Italy have already lost "up to 80% of their harvest".

#23 Agricultural production in Somalia will be down about 80 percent this year.

#24 In eastern Africa, the endless drought has already resulted in the deaths of at least seven million animals.

#25 In China, they are facing the worst drought that they have ever experienced in recorded history.

#26 India normally accounts for 40 percent of the global rice trade, but we are being warned that production in that country will be way down in 2022 due to "considerable rainfall deficits in key rice producing states".

#27 A third of the entire nation of Pakistan was under water after recent floods absolutely devastated that nation, and agricultural areas were hit particularly hard. As a result, the vast majority of the crops in the country have been "washed away"...

It has also been estimated that roughly 65 per cent of the country's food basket — particularly crops like rice, cotton, wheat and onion — have been washed away.

Pakistan Foreign Minister Bilawal Bhutto-Zardari, in an interview to CGTN earlier this week, offered an even starker outlook by saying that "about 80 to 90 per cent" of the country's crops have been damaged by the floods.

#28 The prices of some fertilizers have tripled since 2021, while the prices of some other fertilizers have actually quadrupled.

#29 One payment company is reporting that the number of Americans using their app to take out short-term loans for groceries has risen by 95 percent.

#30 Demand at U.S. food banks is now even worse than it was during the height of the COVID pandemic.

#31 The World Health Organization is telling us that millions of people in Africa are now potentially facing a very real possibility of starving to death.

#32 According to the World Food Programme, 828 million people around the world go to bed hungry each night. Needless to say, that number will soon be much higher.

#33 UN Secretary General António Guterres has publicly stated that he believes that it is likely that there will be "multiple famines" in 2023.

As global food supplies get tighter and tighter, so will the risk of civil unrest.

In fact, this has already been happening...

The risk of civil unrest has surged this year in more than half of the world's countries, signaling a coming period of heightened global instability fueled by inflation, war, and shortages of essentials, a new analysis says.

According to Verisk Maplecroft, a UK-based risk consulting and intelligence firm, 101 of the 198 countries tracked on its Civil Unrest Index saw an increase in their risk of civil unrest between the second and third quarters of this year.

In recent weeks, we have seen absolutely massive protests in cities all over the planet. But conditions aren't even that bad yet. So what will things be like in 2023 when it finally becomes exceedingly clear that there simply will not be enough food for everyone?

Wealthy countries will have the resources to buy up much of what is available on the market, and that means that many poor countries will deeply suffer.

If everything that you have read in this article sounds familiar, that is because we have been warned for years that such conditions were coming.

In 2023, there will be famines and civil unrest all over the globe.

This is not a drill. An extremely serious global food crisis has already begun, and I would encourage you to get prepared for what is ahead while you still can."

Michael Snyder is right when it comes to global economics, but he is not a Bible scholar!

## The US Economy Is Still Being Artificially Supported By Trillions In COVID Stimulus

#### BY TYLER DURDEN

TUESDAY, SEP 06, 2022

Last week Joe Biden announced that \$1 billion in federal grants would be generated for manufacturing, clean energy, farming, biotech and other industries in 21 regional partnerships across the US. The money is part of a \$1.9 trillion covid relief package that was instituted way back in March of 2021. That's right, if you thought the covid funds were gone for good, you were mistaken. While certain elements of the original covid stimulus packages have dried up, there are still vast sums of fiat dollars being held in the coffers of various federal and state programs.

The issue of covid stimulus remains a key problem for the U.S. economy for multiple reasons – First and foremost, it was the covid stimulus packages that sent our stagflationary crisis into overdrive.

In 2020, over \$6 trillion of stimulus money was created from thin air by the Federal Reserve and injected directly into the U.S. economy by Donald Trump (and continued by Joe Biden) through covid relief checks, PPP loans and bailouts for numerous corporations. Again, in 2021, Biden instituted the 'American Rescue Plan Act' which added \$1.9 trillion to the pile. That's at least \$8 trillion in helicopter money dropped on top of the U.S. economy.

The results have been mixed, but are mostly disastrous.

While Biden and the media consistently point out initially high retail sales and low unemployment numbers as a sign that all is well, what they conveniently ignore is the effects of the covid money bonanza. When you dump \$8 trillions into the system in the span of two years (continuing into 2022), what you are doing is creating a massive spike in artificial demand. People, businesses and government agencies are going to go out immediately and spend that money with wild abandon. By extension, that spending will create a need for more workers and more jobs.

However, this momentum is impossible to maintain because as trillions of dollars are created the value of the money diminishes. Inflation or stagflation is the inevitable result. Prices skyrocket while wages remain frozen or are unable to keep up. All those jobs the government conjured from thin air are meaningless because they do nothing to balance out demand. They are not manufacturing jobs or jobs that drive production;

they are bartender jobs, retail jobs, waitress jobs, etc. Without increased production of goods, inflation continues to rise.

Inevitably, the gravity of inflation pulls down all other elements of the economy. Furthermore, the Federal Reserve will also continue to raise interest rates into economic weakness as a means to disrupt inflation (at least that's what they claim they are doing). The jobs market will crash right along with everything else as the cost of debt for businesses climbs right along with the cost of materials. The one thing keeping the system afloat is that precious covid stimulus cash still circulating through the system, but it's also poisoning the system at the same time.

Only a small portion of Biden's American Rescue Plan funds have gone to original funding goals. Just 12% of the over \$100 billion earmarked for elementary and secondary schools has been spent so far, according to federal statistics. And according to Treasury Department figures, as of the end of March 2022 only about \$70 billion of the \$350 billion allocated for state and local governments had been spent on listed goals.

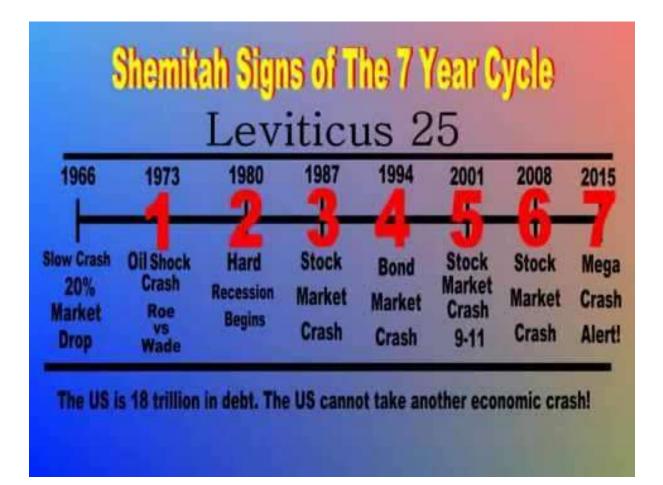

Where is the money really going? It's hard to say, but there has been some exposure of questionable allocations of the money by state and federal organizations. For example, the lowa state government has earmarked millions in taxpayer and covid stimulus cash to pay for a "Field Of Dreams" baseball stadium, named after the Kevin Costner film. The stadium is expected to create 250 jobs.

Some of the money has gone into the operations of government owned golf courses (which is apparently a thing).

Other funding has been allocated directly to creating even more government jobs and also bonuses for government employees. An independent analysis of 5,000 school districts covering 75% of districts' American Rescue Plan funds shows that nearly 60% of funds are committed to staffing, academics, and mental and physical health. Only 23% is committed to keeping schools operating safely; the original intent of the bill. Meanwhile government workers have received almost \$1 billion in bonuses taken from covid relief funds.

Even now, Biden is pushing for more covid cash through emergency measures. The administration officials laid out the new requests, totaling \$47.1 billion, on Friday ahead of the long Labor Day weekend. The largest individual piece of the White House proposal seeks \$22.4 billion to cover "ongoing needs" associated with the COVID-19 pandemic. The White House is pretending as if the country did not move on from the pandemic a long time ago.

While covid cash did not do much in the way of direct job creation, what is is doing is fueling money velocity, which is not necessarily a good thing. Without production to match the money supply and consumer demand, the stimulus creates a massive financial bubble and a fragile illusion in the jobs market. It is only a matter of time

## Shemitah Signs of The 7 Year Cycle

1973	1980	1987	1994	2001	2008	2015
Oil Shock Crash	Hard Recession	Stock Market	Bond Market	Stock Market	Stock Market	Crash Alert!
End of Bretton Woods	Begins	Crash	Crash	Crash 9-11	Crash	

The US is 18 trillion in debt. The US cannot take another economic crash!

# What's Next For America?

before the bubble bursts. This is why we have a stagflationary crisis today and why there will be a reckoning in unemployment in the near future. Covid stimulus measures

		and the second	bilee Ch enesis 6:	State of the state		
From Greation	40th Jubilee	50th Jubilee	60th Jubilee	70th Jubilee	80th Jubilee	120th Jubiled
2000 years		12 A	Section 201	) yrs 500		0 years
	Abraham Born Noah Died	The Exodus	Complete	Decree to restore Jerusalem	Christ's 1st Coming	Christ's Reign Begins

created a fever dream of false prosperity in retail sales and the jobs and soon the country will have to wake up.

If you expect to be *"taken out"* of this world in the Rapture, Mark Biltz's video becomes an must viewing. Mark Biltz believes that we are living in the seventh year of a Shemitah cycle which ends on Elul 29 – September 25<sup>th,</sup> 2022; and that September 26-27 begins a new Shemitah Cycle, and it also begins a final Jubilee Cycle as well; not to forget Daniel's 70<sup>th</sup> Week prophecy. Three cycles occur simultaneously 7-year cycle, Jubilee, and Sabbaths. I refer you to this video by Mark Biltz: <u>When will the</u> <u>TRIBULATION begin? Where are we on the BIBLICAL Calender? (What Time is it?)</u>

Mark's video demonstrates how all this fits like meshing gears in a fine timepiece or clock, which is an appropriate interpretation of God's Biblical Clock. Rather than to try to interpret Mark Biltz's video, it would be better to watch his video and listen to his explanation on how these events come together. Mark actually posted this video in May of 2021, so this is not something new for Rapture watchers. In fact, for myself, it seems I needed a year to grasp the larger significance, integrating all the many varied aspects as they fit a much larger topic of God's Restoration Plan even though I understood what he was telling us in the spring of 2021.

The esential point of this video is that September 26-28, 2022 is the big day we are awaiting. September 26-28 is "one long day" of Rosh HaShanah. Our window of anticipation for the Rapture begins at sundown September 26<sup>th</sup> through sundown September 28<sup>th</sup>. In Hebrew and Jewish studies Rosh HaShanah or the Feast of Trumpets is known as "ONE LONG DAY". It is the only Feast or Festivals of the Lord that takes place on a "NEW MOON", all others take place on FULL MOONS.

It appears that the end of the current Jubilee cycle will wrap up the 120 Jubilee cycles of 50 years each since the creation of humanity. As Jonathan Cahn detailed in his book all throughout history there has been a belief that God has a 7,000 year plan for humanity. After 6,000 years of human rebellion is complete, Jesus will rule from Jerusalem for 1,000 years during the Sabbath Millennium.

We remember that God created the world in six days and rested on the seventh day, and it is also a prophetic picture that points to the time when the world will be at rest for 1,000 years after experiencing so much chaos for the preceding 6,000 years.

If *"The handwriting is on the wall"* we really are getting very close to the return of Jesus to this planet, that means that everything is about to change.

But as far as the Shemitah and Jubilee cycles are concerned, Michael Snyder and others want to stress that we cannot be too dogmatic about them. We simply cannot prove that the Shemitah years have been calculated correctly. I am not inclined to hedge my comments and remarks. As the past five segments of this series has shown, we are already in the eye or center of the storm. Economic events transpiring in the past few days are a clear indicator of a global financial collapse,

It is interesting and disturbing as well to see even the big names in Bible Prophecy largely silent other than to predict the end is coming soon! I do not proffer with disclaimers or try to soften the message nor do I echo Chicken Little's *"The sky is falling, the sky is falling!"* I am convinced we are witnessing the Biblical calendar cycles converging in a couple weeks, and I believe that is precisely what has been taking place the past few years. The data does not lie! The charts on the above pages provide a conclusive correlation from which the wise shall understand, as noted in Daniel 12:10, Psalm 107:43, and Hosea 14:9.

All of human history has been building up to a grand crescendo, and we get to be here for it. I recall well the first day of chapel at Waynesburg College back in 1965, the College chaplan began his message with four questions and that we needed to address them in our education as students there. They were:

- 1. "Where have we come from?"
- 2. "Why are we here?"
- 3. "Where are we going?"
- 4. "How do we get there?"

The Bible answers that we were created by the sovereign, omnipotent God. Second, the Bible tells us we are here to know God personally and serve Him with purpose as members and witnesses of His universal kingom. The Bible states that we are headed either for eternal blessing or eternal punishment. All of us were borni into a world of the kingdom of Satan, which has a sentence of divine judgment waiting to be executed against it. But because Jesus Christ paid the full penalty for our sins, our membership can be transferred to the kingdom of God, and all judgment can be removed from us if

we will trust Him personally to be our Saviour –(Romans 8:1; Colossians 1:13-14). One would be stupid to turn down such a wonderful offer.

You have to recognize what an exciting time it is to be alive! I trust that I have been obedient and faithful in my witness as Pastor Bob, <u>EvanTeachr@aol.com</u> I pray that my work has been a blessing to you during this period of history!

# Satan wants us dead! He does not care how it happens! He simply wants to steal, kill, and destroy.

# God wants everyone to have life and to have it more abundantly.

"The <u>thief</u> cometh not, but for to steal, and to kill, and to destroy: I am come that they might have life, and that they might have it more abundantly." -(John 10:10)

Your faith and trust in the Lord Jesus Christ will assure you a place at the table in the Millennial reign of Jesus Christ. The Rapture is a mystery promise but well supported and the Bible amplifys God's Promises in fulfillment. Revelation 3:10 is our confirmation promise. "Because thou hast kept the word of my patience, I also will keep thee from the hour of temptation, which shall come upon all the world, to try them that dwell upon the earth."

## THE ABC'S OF SALVATION

ADMIT Admit you are a sinner and have made mistakes.

### BELIEVE

Believe that Jesus is God's Son, died on the Cross for you, and rose up from the grave on the third day.

### CONFESS

Confess Jesus as the Lord of your life. And commit yourself to a life of following Jesus, and serving others.

(Romans 3:23; John 1:12; Romans 10:9)

# Amen

Blessings,

Pastor Bob, <u>EvanTeachr@aol.com</u> <u>www.pastorbobreid.com</u> <u>http://jesusisthewaythetruththelife.com/node/22</u>
