

# The Blessed Hope!

***“Looking for that blessed hope, and the glorious appearing of the great God and our Saviour Jesus Christ;” –(Titus 2:13)***

## *Diamond & Nugget #148*

Monday morning the Presidential “doppelganger” went on TV at 8:00am to assure the world that the U.S. agencies have saved the day. Your funds in the bank are safe and secure, and you can sleep well tonight.

Precious metals expert and financial writer Bill Holter said last summer that the Fed rate increases would tank the economy. The collapse of SVB (Silicon Valley Bank) is the latest sign the Fed is breaking the financial system. Will it continue to raise interest rates as Fed Head Jay Powell said this past week? Holter says that is the biggest question out there because it comes down to picking what you want to save. It's the U.S. dollar or the financial system. Holter explains, *“They can save one thing or the other. They can save the financial system, or they can save the dollar. If they save the dollar, they will have to raise rates, and they will have to keep tightening. To save the financial system, they will have to loosen. They have tightened so hard and so fast over the last year they have raised rates and tightened faster than any time before. This is in the face of the biggest over-levered situation in history no matter how you look at it. . . . They can only do one or the other, and they already look like fools. The world is already laughing at the United States. Think of what Russia and China think when we are walking out some army general wearing a skirt. We are getting to the end game.”*

Holter, who is also a precious metals broker from Miles Franklin, says the bankruptcy of SVB is just the tip of the default iceberg. Holter says, *“The problem is a global bankruptcy. In order to avoid the bankruptcy, you don't go from bank A to bank B or some sovereign treasury. You don't go to paper because paper can bankrupt. It's going to dawn on people all of a sudden that gold and silver are the safe havens. That's going to create a 'failure to deliver' event, and when you get failure to deliver, all confidence is gone. This is all about confidence. Failure to deliver is coming soon because you are talking about big, big money, and there is not big, big supply. . . . My phone has been blowing up all weekend. People are wanting wiring instructions so they can wire money Monday morning. . . . This failure to deliver event is right in front of us.”*

You might think everything will be safe in the bank because of FDIC deposit insurance. That is not totally true because the government basically turned depositors into creditors in 2012. Holter says, *“In 2012 or 2013, the FDIC amended their rules and said there would no longer be bailouts, but bail-ins. People don't understand that when there is a*

*bail-in and a bank goes down, it takes all or part of the money they are holding on your behalf to make themselves solvent. It is no surprise that Janet Yellen (Treasury Secretary) is saying there are not going to be bailouts because it's been official policy for ten years or more. . . .There are cockroaches everywhere. The whole system is rotten to the core. The whole system is over-levered. The whole system is fraudulent. The entire system is a Ponzi scheme . . . . The government of the reserve currency of the world has to borrow a trillion dollars a year to stay solvent. That's ridiculous."*

Holter thinks big inflation is coming when the Fed has to cut rates to save the system. He says, *"The government will inflate or die."*

Only days ago, on March 6<sup>th</sup> the head of the FDIC, Chairman Martin Gruenberg stated: *"Banks across America are sitting on \$620 billion of 'unrealized losses' - assets which have decreased in value but have not yet been sold - - the head of the Federal Deposit Insurance Corporation warned."*

Yet the revelation about the 'unrealized losses' will only serve to raise concerns about the U.S. banking industry.

The ticking time bomb is due to U.S. banks buying Treasuries and bonds while interest rates were low, but, with interest rates now rising, finding these bonds have declined in value.

When interest rates rise, newly issued bonds start paying higher rates to investors, which makes the older bonds with lower rates less attractive and less valuable.

Most banks and pension funds are affected.

Speaking on March 6, at the Institute of International Bankers, he confirmed the \$620 billion figure.

'Most banks have some amount of unrealized losses on securities,' he said.

'The total of these unrealized losses, including securities that are available for sale or held to maturity, was about \$620 billion at yearend 2022.

'Unrealized losses on securities have meaningfully reduced the reported equity capital of the banking industry.'

Jens Hagendorff, a finance professor at King's College London, told CNN that the problem was widespread.

'Many institutions — from central banks, commercial banks and pension funds — sit on assets that are worth significantly less than reported in their financial statements,' he said.

'The resulting losses will be large and need to be financed somehow. The scale of the problem is starting to cause concern.'

But Luc Plouvier, senior portfolio manager at Van Lanschot Kempen, a Dutch wealth management firm, told CNN that most American banks would not be affected by the issue.

'[Falling bond prices are] only really a problem in a situation where your balance sheet is sinking quite quickly and you have to sell assets that you wouldn't ordinarily have to sell,' he said.

Gruenberg's remarks were made four days before Silicon Valley Bank collapsed and was taken over by the federal government.

By the way, in the above photo of Janet Yellen the man next to her is not President Joe Biden, it's one of his doppelgangers. The government lies about everything including the fact the real Joe Biden is dead! On February 22, 2023, I sent an article of this fake with seven pages of photos proving he is not Joe Biden, to more than two dozen senators and congress members. Not a single one has acknowledged that the person standing on the steps of the Ukrainian capital in Kiev, Ukraine is not Joe Biden. I mailed

the article to elected members of both houses who have taken this stand-in to task over his policies. I even sent a copy to the feisty female congress lady from Georgia, Marjorie Taylor Greene. Every envelop with the seven pages of pictures was mailed to their home office where they call home. Absolute silence, no response, and that tell me they already knew and this is all kabuki theater.

SVB's implosion caused shockwaves: the bank, which caters largely to tech clients and start-ups, is the 16th largest in the United States.

It was closed on Friday, and investors left panicking as to whether they would get their money back - only the first \$250,000 is insured by the government.

On Sunday evening, however, the Federal Reserve announced that all deposits would be protected. Hours earlier Janet Yellen, the Treasury Secretary, said there would be no government bail-out.

The Federal Reserve statement said no taxpayer money would be involved. The Federal Reserve is not funded by taxpayers. Instead, it is funded directly from its own financial operations, via interest.

The cash will come from a Deposit Insurance Fund. The DIF is funded by fees from banks and interest earnings from DIF investments in government obligations.

'Any losses to the Deposit Insurance Fund to support uninsured depositors will be recovered by a special assessment on banks, as required by law,' the statement said.

They added that 'the Federal Reserve Board on Sunday announced it will make available additional funding to eligible depository institutions to help assure banks have the ability to meet the needs of all their depositors.'

Joe Biden on Sunday evening reassured those who bank with SVB, but said those 'responsible for this mess' must be brought to justice. (Biden's doppelganger said it but don't expect it to happen. Bankers never go to jail, and that's why they continue to steal from the public.

*'The American people and American businesses can have confidence that their bank deposits will be there when they need them,'* he said.

*"I am firmly committed to holding those responsible for this mess fully accountable and to continuing our efforts to strengthen oversight and regulation of larger banks so that we are not in this position again."*

What no one is telling the public is that the FDIC does not have the funds to insure all banks once "Contagion" starts the fearful run on the banks. Do not think for a moment that it can't happen, because it can and will. Bill Halter's words are true as the grass is getting green. When the "you know what" hits the fan, gas will go to \$7 or \$8 a gallon. There are 4,844 banks in the FDIC program and the fund is at around \$122-billion dollars. That may seem a lot to you but it amounts to less than 2% of all bank assets. Total bank assets are around \$7-trillion dollars. In the event of "Contagion" the FDIC could not pay off nearly \$7-trillion in existing depositors' deposits. So to put it plainly, Joe Biden's doppelganger is full of bovine excrement!!!!

Steve Cortes: *"The bond market is revolting against Biden's inflationary policies. Inflation is out of control, and it's going to get worse."*

Former Wall Street trader and strategist Steve Cortes is not so optimistic. He made an appearance on Steve Bannon's War Room Monday to give his interpretation of the current state of the economy.

*"Cortes, your theory of the case is 'Hey, Bannon. This is 10x worse than 2008.' Why is that Steve Cortes?"* asked Steve Bannon.

Mr. Cortes responded, *"I think it's a more dangerous moment in many ways than 2008 and 2009. And here's why."*

- We went into the 2008-2009 crisis “with the federal balance sheets, both on the fiscal and monetary side, in relatively good shape,” explained Mr. Cortes. Our Federal debt at that time was \$8 trillion. Now it is above \$31 trillion.
- “The Fed balance sheet heading into 08-09 was \$1 trillion. And it had been stable there for a very long time, a very manageable amount, actually, for a country as big as the United States. It is now \$9 trillion.”

Here’s the point: *“The credit card has already maxed the national credit card.”*

*“So we are heading into this crisis in a far more precarious, far weaker financial condition, which means we will have a lot less ammunition to throw at any crisis,”* conveyed Mr. Cortes. *“That is the reality right now.”*

Steve Cortes stressed, *“This wasn’t some sudden storm right that happened upon us.”* *Instead, he argues, “this inflationary nightmare has been steadily building ever since Biden took office.”*

Last March, Mr. Cortes tweeted, *“The yield curve inverted this week (March 19, 2022) because of Biden’s inflation explosion. Even for those who don’t follow capital markets closely, this ominous bond market sign points to a recession — and likely a severe one.”*

A World Economic Forum insider has been caught boasting that the Silicon Valley Bank crash was an orchestrated plot that went to plan perfectly – and the crash will have a domino effect on the banking industry, leading to a global financial meltdown.

Joseph Gentile does the bidding of the global elite and has confirmed that the SVBank collapse was orchestrated by the World Economic Forum. Joseph Gentile was the Chief Financial Officer behind the collapse of the Lehman Brothers collapse in 2008; and before that he was at Enron when Enron collapsed in 2001. Some coincidence in Joseph Gentile’s being at the helm of three massive financial banking collapses! My rabbi friends will tell you that in Hebrew there is no word for “coincidence!”

News Punch posted a video today exposing Joseph Gentile and his role as CFO for the three largest banking failures. 3 for 3 is an incredible record.

We are all in the “Titanic” sinking financial ship, and most people are asleep at the moment. It’s going down and there is only one life saver out there that will come to your rescue. Any of you reading this cannot delay in repenting of your sins, and calling out to the Lord Jesus Christ to save you. Romans 10:12 says **“For whosoever shall call upon the name of the Lord shall be saved.”**

This follow up on Monday’s “Blessed Hope #147” comes from the wealth of information being leaked or revealed by sources that are in the know about this conspiracy foretold in the Bible thousands of years in advance. People call it Bible Prophecy, but I prefer to express it as God’s revealing “History told in Advance” I have over a span of thirty-five

years built a file of trusted sources, experts in their own right in areas few of you would be familiar with because the forces of evil have been dumbing down the public to Lucifer's grand plan that will play out over Daniel's "Seventieth" Week. Unless one knows the specifics to search for data and information today, most searches that folks do are manipulated by mathematical algorithms that send you up rabbit trails until one gives up in frustration.

## **Silicon Valley Bank Collapse and Closure Foreshadows the Controlled Demolition of the Global Economic & Financial System**

This is not a time to panic and while all may appear to be doom and gloom, we should not be surprised in the slightest. It was there for you to see in your Bible. Speaking of the Bible, over the past two weeks I have posted four segments of Bible Diamonds & Nuggets. These four segments provide absolute confidence that God is the Author of the Bible and that the Lord has everything under full control. The four segments that I have posted so far reveal how God has used Gematria, Biblical Numerics, ELS Codes, all to demonstrate God's mathematical genius to deliver His Word at a different level than could have ever been imagined. Linked articles below:

It is getting chaotic in ways that we could never have described months or years ago as things are unfolding around us. That said do not dismiss the "Blessed Hope" of Titus 2:13. What we are seeing on a global scale the past three years is but a foretaste of hell that will break upon the Earth as God takes out His Elect Bride, those "in Christ" and keep the faith. Revelation 3:10 is your watchword of hope! ***"Because thou hast kept the word of my patience, I also will keep thee from the hour of temptation, which shall come upon all the world, to try them that dwell upon the earth."***

I see the dates of most importance to you and me as believers in Christ Jesus are between March 23<sup>rd</sup> and April 9<sup>th</sup>, 2023. This window of time corresponds with the end of the Biblical year 5782 and beginning 5783. The Biblical year begins on Nisan 1, and in our calendar that is the date for Thursday, March 23<sup>rd</sup>, 2023. April 9<sup>th</sup>, 2023 is Resurrection Sunday.

If you are still a skeptic of the Bible and the evidence of what I have offered on the previous page is insufficient for changing your mind, may God have mercy upon you in the coming Seven years of Jacob's Troubles. Daniel's 70<sup>th</sup> Week prophecy is reserved for the Disobedient Jews and the Synagogue of Satan noted in Revelation 2:9 and 3:9.

Those who realize they have made the wrong choice will be hunted down and martyred for their faith. God has made it clear, it's your call you have the choice now or later.

**ADMIT THAT YOU  
ARE A SINNER.**

**BELIEVE THAT JESUS  
PAID FOR YOUR SIN  
ON THE CROSS. †**

**CONFESS THAT JESUS  
IS LORD AND CALL UPON  
HIM FOR SALVATION.**
