

# *The Blessed Hope!*

***“Looking for that blessed hope, and the glorious appearing of the great God and our Saviour Jesus Christ;” –(Titus 2:13)***

*Diamond & Nugget #162*

## **Passport Scheme: Is the CCP Invading America Through Benedict Biden's Southern Border Loophole?**

Something strange is happening.

There are three confirmed invasions happening at our southern border. The obvious one is the sheer mass of illegal aliens from across the globe stealing our sovereignty. The other obvious invasion is that of drugs, particularly fentanyl, which are killing Americans at unprecedented rates. The third, less-discussed invasion is the ticking time bomb of known and unknown terrorists coming across with the aforementioned masses.

Is there a fourth invasion happening as well? We've known there are tens of thousands of Chinese illegal aliens coming across; over 13,000 have been apprehended since October. But what if these aren't just illegal aliens among the other masses from other nations? What if this is part of a planned infiltration?

Michael Yon noted that the Chinese Communist Party had recently given instructions to Chinese citizens coming into America through "irregular channels":

China openly invading USA: This is published today by LA Consulate General. It called Chinese people who lost passports entering U.S. "in abnormal ways" to apply for new passports in the LA Consulate General.

Very suspicious. Why does CCP help people get passports to leave China? They escape China with new passports, arrive in places like Istanbul, Amsterdam, Quito, Cancun, then ditch passports before crossing into USA. Now getting new passports from their government. CCP famously never is so helpful.

The recent posting from the Chinese consulate that Yon linked to instructs Chinese citizens on how to get their passports or emergency travel documents. But here's the thing. For them to have left China, they would have had to have their passports initially. Unlike the United States, China takes their border security very seriously in both directions and it's extremely difficult for people to leave the country without permission.

The only reason it would behoove Chinese citizens to use their passports to leave China, then lose their passports en route to the United States is if they were intentionally taking advantage of the Biden-Harris regime's border policies. If they enter legally, they can be easily expelled. If they "lose" their passports and enter through "irregular channels," they are treated by a completely different set of rules.

Most importantly, they get to stay under the Biden-Harris regime's policies.

Is this all an elaborate scheme to plant as many Chinese nationals loyal to the CCP on American soil, spread across American cities through the disbursement plans of the White House and state governors? Reports have indicated these groups are almost entirely made up of military-aged males. If the Chinese Communist Party wanted to infiltrate America at this time, that type of scheme seems like the most obvious.

Stay frosty, folks. Something's not right. In fact, very little seems to be right in America lately.

### **China Orders 15,000 Iranian Drones for "Potential war with Taiwan, Japan and Australia"**

HAL TURNER 11 JUNE 2023

China Orders 15,000 Iranian Drones for *"Potential war with Taiwan, Japan and Australia"*

A very serious development has taken place: China has placed an order with Iran for 15,000 "Shaheed 136" military drones, with differing types of engines for different war fronts. The entities with whom China expects war?

According to a Commander with the Iran Revolutionary Guards Corps (IRGC) which accepted the order, China is preparing for war in Taiwan, Japan, and Australia.

Iran has created a huge business opportunity for themselves selling these drones, which appear to be incredibly effective for Russia inside Ukraine right now.

Based on how many they are already selling to Russia, Iran must already have tens of thousands; which should give pause to their pipsqueak, but big-mouthed neighbor, Israel.

Historically, this is interesting because ancient Persians were known for shooting crazy amounts of arrows into the sky against their enemies to completely overwhelm them.

## Australia will soon start reducing cattle numbers to reduce methane emissions as part of Prince Charles “Sustainable Development”

Date: [June 12, 2023](#) Editor, [cairnsnews7](#)

**What about natural swamps and wetlands emitting massive amounts of methane?**

This ‘policing’ of farmers and pastoralists probably emerged from the Australian ‘high level’ attendance at the Global Methane Hub in Santiago, Chile. May 2023

<https://www.globalmethanehub.org/2023/05/17/major-livestock-producing-countries-commit-to-mitigate-methane-in-agriculture/>

As one might expect, these sociopaths are committed to reducing food production and livestock under the guise of limiting bovine flatulence / methane.

Here is a quote from John Kerry, representing the U.S. at the Global Methane Hub in Santiago, Chile. *“Mitigating methane is the fastest way to reduce warming in the short term. Food and agriculture can contribute to a low-methane future by improving farmer productivity and resilience. We welcome agriculture ministers participating in the implementation of the Global Methane Pledge,”* said **John Kerry, U.S. Special Presidential Envoy for Climate.**

All natural swamps and lowlands will have to be drained because of their methane input. How will the ALP do this? These people are all sociopaths and psychopaths and deranged to believe their measures will save anything.

## KLAUS SCHWAB'S WEF SETS AUTHORITARIAN GOAL: LIMIT 75% OF PRIVATE CARS BY 2050

In a push to counter the so-called 'climate change,' the globalist World Economic Forum (WEF), under the leadership of its founder and Executive Chairman, Klaus Schwab, has proposed a comprehensive plan aiming to limit 75% of private cars by the year 2050. This from [survivethenews.com](https://www.survivethenews.com).

The authoritarian objective is a part of WEF's broader vision for a 'sustainable and low-carbon future,' as outlined in its [Urban Mobility Scorecard Tool](#): Benchmarking the Transition to Sustainable Urban Mobility in collaboration with Visa in May 2023.

According to WEF's recently published white paper, by 2050, people are likely to travel twice as much within cities as they do now. If people don't change anything, this would mean that there would be 2.1 billion cars, buses, and other vehicles on the road, emitting 4.6 billion tons of carbon dioxide.

**The paper suggests if we can get more people using shared transport, like public buses or ride shares, and if we can switch to electric cars and self-driving vehicles, we could bring the number of vehicles down to just 500 million by 2050. This would dramatically reduce our carbon emissions – 'by 80%.'**

The reduction from 2.1 billion vehicles to 0.5 billion vehicles is a decrease of 1.6 billion vehicles. So, the reduction of vehicles from 2.1 billion to 0.5 billion represents a decrease of about 76.19%.

### Benefits of adopting a shared, electric, connected and automated (SEAM) approach to urban mobility by 2050

- Reduce vehicles from a potential 2.1 billion to 0.5 billion
  - Mitigate >80% of CO<sub>2</sub> from passenger transport
  - Free up 75% of urban public space
  - Decrease measured mobility costs by 40%
  - Save ~\$5 trillion per year
- Source: Fulton, L., Mason, J., & Meroux, D. (2017)\*

Source: The Urban Mobility Scorecard Tool: Benchmarking the Transition to Sustainable Urban Mobility (May 2023)

Moreover, WEF stated that switching to electric vehicles isn't enough to achieve these benefits. People need to combine it with more use of shared transport and changes to how our cities are designed. This means making cities more compact and easier to get around by walking or biking, and prioritizing public and shared transport.

[Lifesite News](#) reported:

The WEF recently ran a trial of its [Urban Mobility Scorecard Tool](#) and chose Buenos Aires, Argentina, Curitiba, Cota Rica, and Singapore as trial cities.

The white paper by the WEF names containing ‘the growth of private car use by boosting public transport, cycling, and shared mobility services’ as a major ‘ambition area’ for Buenos Aires.

‘The capital of Argentina is seeking to enhance sustainable mobility to keep people moving while offering more connected, integrated transport,’ the paper states.

The city is also ‘**embracing new solutions to reduce private car dependency and provide a well-integrated, multimodal transport system,**’ according to the WEF.

Journalist Tim Hinchliffe, editor of *The Sociable*, pointed out that ‘[t]he Urban Mobility Scorecard Tool white paper gives further credence to the WEF’s prediction that by 2030 **‘You’ll own nothing. And you’ll be happy.’**”

The phrase: “*You’ll own nothing. And you’ll be happy*” is associated with the WEF and its agenda for what it calls the “*Great Reset*.”

The “*Great Reset*” is a proposal by the WEF to rebuild the economy sustainably following the COVID-19 pandemic.

This phrase originates from a short video the WEF posted in 2016 on [Facebook](#), titled “**8 Predictions for the World in 2030.**”

One of the predictions listed in the video was that by 2030, “***You’ll own nothing. And you’ll be happy.***”

#### **8 predictions for the world in 2030.**

1. You’ll own nothing. And you’ll be happy.  
Whatever you want you’ll rent. And it’ll be delivered by drone.
2. The U.S. won’t be the world’s leading superpower.  
A handful of countries will dominate.
3. You won’t die waiting for an organ donor.  
We won’t transplant organs. We’ll print new ones instead.
4. You’ll eat much less meat.  
An occasional treat, not a staple. For the good of the environment and our health.
5. A billion people will be displaced by climate change.  
We’ll have to do a better job at welcoming and integrating refugees.
6. Polluters will have to pay to emit carbon dioxide.  
There will be a global price on carbon. This will make fossil fuels history.
7. You could be preparing to go to Mars.  
Scientists will have worked out how to keep you healthy in space. The start of a journey to find alien life?
8. Western values will be tested to the breaking point.  
Checks and balances that underpin our democracies must not be forgotten.

## **BEEF COMPANY CEO: “THE CLIMATE CHANGE ARGUMENT AGAINST COWS IS GARBAGE AND WE WILL NOT COMPLY”**

The push to replace real beef with other forms of protein has been ramping up in recent weeks.

The communist/globalist regime wants us to stop eating steaks and instead eat cricket burgers or lab-grown meat replacements for our protein.

Ireland is even considering culling 200,000 cows to meet their climate change virtue signaling goals.

This from [survivethenews.com](http://survivethenews.com).

But The Regime and the globalists' climate change argument is patently false—all based on unmitigated lies.

Recent studies have shown growing meat in a lab is actually as much as 25-times worse for the environment than producing the same amount of real beef. Corporate media is barely reporting on it, but they've been forced to mention it over the past couple of weeks thanks to the persistence of those championing the truth.

One such champion is Dr. Joseph Mercola who recently noted:

*“While the fake meat industry is being touted as an environmentally friendly and sustainable way to feed the world, the true intent is to recreate the kind of global control that Monsanto and others achieved through patented GMO seed development. In the end, lab-created meats are worse for the environment than livestock and will undoubtedly deteriorate human health to boot, just like GMO grains have.”*

Dr. Mercola also said:

*“Each kilo of cultured meat produces anywhere from 542 pounds (246 kilos) to 3,325 pounds (1,508 kg) of carbon dioxide emissions, making the climate impact of cultured meat four to 25 times greater than that of conventional beef.”*

Jason Nelson, CEO of freeze-dried food company [Whole Cows](#), has focused his team on producing as much shelf-stable all-American beef as they can have slaughtered. **It is his belief that beef cattle will be systematically removed from the American food supply in the coming years and even months with attacks from multiple angles.** The climate change argument is only one of them.

Nelson said:

*“They prey on the ignorance of the average mainstream media watcher who nods along as they’re being told cow farts will kill them.”*

*“It’s patently ludicrous but they need something shocking in order to get people to comply when they try to outlaw real meat. And they will. They’re already trying to do it.”*

Click [HERE](#) for more info on Whole Cows.

Nelson continued:

*“The day will come when they’ll ask my company to replace our real beef from all-American cows with their version of bovine protein.”*

*“I’ve already told everyone who works for me that we’ll shut it down before we freeze dry a single sliver of lab-grown fake meat.”*

As Dr. Mercola and Nelson have said:

*“The climate change reasoning for going after cows is just an excuse for the communist/globalist tyrants to exercise control over the people.”*

As Henry Kissinger famously said:

**Who controls the food supply controls the people.**

Beef has been readily available and relatively inexpensive for decades. Villainizing cows as culprits in their climate change hoax is diabolical, but it’s also effective. **Cities across the nation, invariably run by Leftists, are looking into limiting the amount of beef that can be sold, bought, and consumed.**

Nelson continued:

*“This isn’t just some ideological crusade.”*

*“We launched this company last year because we saw the writing on the wall and knew they’d try to make Americans eat bugs or pseudo-meat or something worse.”*

*“I didn’t serve this nation to then watch it implode over bald-faced lies.”*

Nelson, a former member of both the U.S. Army and U.S. Marines, resigned in 2021 due to the Covid-19 vaccine mandate. He then ran for Congress against RINO Pete Sessions in 2022, losing in the primaries.

He concluded:

*“We’re proud of our product. As far as we know we’re the only company in America that offers freeze dried Ribeye, NY Strip, Tenderloin, and Sirloin that’s shelf-stable for over a decade. Other prepper food companies sell ‘beef crumbles’ and cow scraps they buy for cheap that barely passes as food. I’d almost rather eat bugs. Almost.”*

**China is preparing to build an elaborate spy station on Cuba, only 100 miles from the United States coast, the Wall Street Journal reported on June 8<sup>th</sup>.** The new facility is expected to enable Chinese intelligence operatives to listen in on electronic communications throughout the southeastern United States.

The Wall Street Journal’s report is based on testimony from U.S. officials privy to highly classified American intelligence. The officials said China is paying the Cuban government several billion dollars for permission to build this espionage station near Florida, and once it is online it will enable Chinese intelligence operatives to conduct signals intelligence, or SIGINT. This means being able to snoop on phone calls, e-mails and satellite transmissions.

Meanwhile, a separate report said China has already been operating a different spy base in Cuba since at least 2019.

This brash geopolitical challenge from China comes just months after the Chinese floated a spy balloon over America. It comes as China keeps sending armies of its people into the U.S. to spy and steal secrets. It also comes as China’s legions of hackers continue to infiltrate American targets and even compromise critical infrastructure. Clearly there is a dogged and disturbing determination by the Chinese to spy on America and extract its secrets—especially in the military realm.

**The US is sending depleted-uranium ammo to Ukraine capable of piercing Russian tank armour, report says**

[Tom Porter](#)

Jun 13, 2023, 8:46 AM EDT

An M1A2 Abrams at the Army Armor School at Fort Benning in Georgia on April 29, 2022.

- **The US is set to approve depleted-uranium tank shells for Ukraine, the WSJ said.**
- **The shells are capable of blowing up Russian tank armor.**
- **There were doubts over providing the shells for environmental and health reasons.**

The US is sending depleted-uranium shells to Ukraine that are capable of penetrating Russian tank armor, [the Wall Street Journal reported.](#)

For several months the Biden administration has been debating whether to provide the shells to Ukraine following concerns over their environmental and health impacts, the outlet reported.

But an administration official said that there were now no major obstacles to providing the ammunition.

Insider has contacted the White House for comment.

Depleted uranium, a by-product of the nuclear enrichment process, is used because it is extremely dense. When used in tank shells, the material is effective because its bulk can penetrate through enemy armor.

As Insider's [Jake Epstein](#) previous [reported](#), uranium shells also heat up and may catch fire, potentially causing fuel or ammunition explosions.

The weapons could hand Ukraine an advantage in tank battles as it launches its campaign to drive Russian forces back from territory they occupy in south and eastern Ukraine.

The material is considered by [the US EPA](#) as a radiation health hazard when inhaled as dust or shrapnel, but it does not emit enough radiation to penetrate the skin from outside.

According to United Nations Environment Program the metal's "chemical toxicity" is the biggest danger, and "it can cause skin irritation, kidney failure and increase the risks of cancer."

The UK was the first of Ukraine's allies to provide the country with the ammunition, which is used in the Challenger tanks it provided to Ukraine.

The decision by the UK to provide Ukraine with the weapons was denounced by Russian President Vladimir Putin at the time, [who said](#) the weapons have a nuclear component and that Russia would be forced to react.

US officials, the WSJ reported, believe it's vital for Ukraine to make decisive gains in its counteroffensive while bipartisan support for the country remains high.

Putin has lost at least two-thirds of his tanks since the invasion began, Oryx, [a Netherlands-based open source intelligence website, said](#) in May. The take away from this past year of the war is that it is largely a "drone" war which changes the larger picture of war! Ukraine's losses far exceed Russia's tank and artillery losses.

Russia has been "reactivating" tanks from the 4-5,000 it has in reserve to be deployed to the front line. Many of these tanks are from the Soviet-era.

This action is the equivalent of crossing the Rubicon, as it has not been a huge secret the U.S. is using this client state strategy to wage war against Russia. The U.S. has done nothing to settle the Ukraine issue diplomatically, nothing! The U.S. has used the Ukraine as a base of bioweapons research, and has admitted to operating some 40+ bioweapons labs in the Ukraine. The U.S. has given Ukraine approximately \$157-billion dollars in military aide; another \$2.1-billion this week. One would have to be very stupid to believe they can supply a client-state to conduct a war and not expect to face retribution and retaliation. Putin has shown great reserve in not retaliating against the UK, Germany, U.S. and other NATO countries supplying the Ukraine.

### **Scenarios of a direct conflict between Russia and NATO are being studied in Moscow**

Air Defender 23 cover for a real attack? 200 aircraft from NATO will be conducting war games for a week close to the Russian border risking mistakes and misreading by Russian defense forces in the area near Finland region.

NATO today begins its largest air exercise in history, called "Air Defender 2023". Air Defender 23 represents the most extensive air force deployment exercise in the history of the North Atlantic Treaty Organization.

But is the "exercise" a cover for a real attack??

Another NATO exercise "BaltOps-2022" was used as a cover for the installation of explosives in the NordStream 2 gas pipelines. This was revealed by journalist Seymour Hersh, who showed that the Biden administration planned the Nord Stream bombing.

Coincidentally, the exercise will be held outside the Ukraine-Russia conflict zone and at a time when the Ukrainian Army has suffered heavy casualties with defeat edging ever closer.

So for NATO to come into direct conflict, there must be some action or event that would "justify" NATO's entry into the war. How can this incident be created?

The information indicates what the following scenarios are in plan:

#### SCENARIO "A"

- 1) Ukraine grants NATO permission to enter its airspace to establish a national no-fly zone. NATO agrees and enters.
- 2) Russia has already warned that it will engage and destroy foreign aircraft. Whatever it is.

#### SCENARIO "B"

- A) "Ukrainian F-16s" enter the fray and launch attacks on the real Russia. Belgorod is the likely attack zone. But because there are no qualified Ukrainian pilots, the planes will be flown by British and American pilots.
- B) Russia shoots down the planes either in Ukraine or inside Russia.
- C) When the pilots are either captured alive or killed in action, their bodies will prove they were British and American.
- D) Russia declares that it has been attacked by the U.S. and NATO and declares war on them.

#### SCENARIO "C"

Includes both scenario "A" and scenario "B" above.

- 1) NATO gets permission to enter Ukrainian airspace to create a no-fly zone and NATO enters.
- 2) Ukrainian F-16s enter Russia and attack.
- 3) NATO planes warn Russian pilots that they cannot attack Ukrainian planes or they will be hit by about 200 NATO planes.
- 4) Russia gives NATO an ultimatum and starts hitting them all.

All of this comes on top of the report that Ukraine's spring offensive has largely been crushed in the first few days of the attack this week of June 12<sup>th</sup>. Russian forces had destroyed a group of German Leopard tanks and several U.S. Bradley APCs. The Washington administration is besides themselves because Zelensky is faltering and U.S. Joint Chiefs of Staff, General Milley is urging Zelensky to push on. Under Secretary of State for Political Affairs Victoria Nuland delayed the U.S./NATO invasion from June 12<sup>th</sup> to now July 11/12<sup>th</sup>, and that may prove to be her undoing given the 4 scenarios noted above provides Russian leadership more time to assess their options.

Keep in mind folks, In the book of Revelation, chapters 8 and 9 talks about a third of man will die in what can only be interpreted as meaning a nuclear war. Structurally speaking, these two chapters correlate with the chronology of the early or first part of the Tribulation period. The Biden administration and the mainstream media have deceived the American people into believing that Ukraine had been winning the war. Deception has been an issue by both Russia and the West but Ukraine is the smaller of the two nations and Russia has conducted their Special Operations under a different strategy of conflict.

### **YES, OF COURSE, COVID WAS A SCAM—HERE ARE TEN LESS OBVIOUS GIVEAWAYS THAT UNMASK COVID AS AN ORCHESTRATED EVENT**

We the People are typically very savvy and distrustful of anything from the federal government.

Pandemic Panic Theater quickly became one of our top concerns with the Plandemic roll out in 2019.

Although we still occasionally spot a knucklehead wearing a surgical mask, we've dedicated almost zero concern the past several months—we even perhaps have begun to look back and question whether the pandemic was all that bad.

But as with so many bad things happening in the world today, we're confident it was real, it was bad, and there are those on the Left who intend for it not to be over.

Whether we see a resurgence of Covid, a renewed push for more jobs, or something new, we can expect there to be more gaslighting and medical tyranny in our near future. This is why the post below by Dr. Simon Goddek is so important.

**We cannot forget what they did.  
We cannot ignore what they continue to do.  
And we cannot become complacent  
as the next states of their plan unfold.**

Here is the list from [Dr. Goddek](#):

1. **Fear-mongering the Public:** Instead of reassuring the populace during the crisis, our media and politicians had them living in perpetual dread, contradicting historical wisdom.
2. **Vaccine Data Manipulation:** A brave whistleblower recently exposed the distorted data behind the BioNTech/Pfizer vaccine approval. Rather than probing the vaccine's benefits and efficacy, nations rushed to make booster shots mandatory.
3. **Pressurizing the Healthy:** Despite minimal risk to children, teens, and healthy adults from Covid, they were strongly urged to take an experimental drug to "protect others." Non-compliance often led to job loss, and some countries even considered detention.
4. **Shifting Vaccine Narrative:** Vaccines, once advertised for self-protection, were suddenly everyone's obligation to "protect yourself and others," despite similar transmission rates amongst the vaccinated and unvaccinated. Troublingly, getting vaccinated seemed to raise the likelihood of dying with or from Covid.
5. **Questionable PCR Test Peer-Review:** The speedy peer-review process for the Covid PCR test publication, whose author was conveniently on the journal's editorial board, raised eyebrows. Circumventing the peer-review process might be classified as scientific fraud. Furthermore, the author, Christian Drosten, was reported to receive external briefings, casting a shadow on his credibility.
6. **Mask Misinformation:** A historical study during the Spanish Influenza deemed masks ineffective and potentially unhygienic if worn all day. Recent research mirrored these findings, concluding that masks might pose significant health risks without reducing transmission. It seemed like an attempt to muzzle the public under a politically motivated guise.
7. **The Death-Age Paradox:** The average age of those who died with or due to Covid matched the general life expectancy, unlike during the Spanish Influenza where these figures greatly differed.

8. **Demonizing Dissenters:** Publicly branding dissenters as “terrorists” and “tyrants” felt like a ploy to revoke the unvaccinated individuals’ rights to bodily integrity and human dignity.
9. **Undermining Immunity:** Governments closed gyms, sports clubs, and banned social interactions during lockdowns, thus neglecting essential factors for a strong immune system such as sunlight (Vitamin D), physical exercise, social interaction, gut health, and exposure to pathogens.
10. **Silencing the Experts:** Social media platforms were actively blocking and restricting accounts of scientists and experts who disagreed with the mainstream narrative, curbing their freedom of speech in a flagrant affront to the principles of an open society.

Final thoughts: Add to the rationale why the Left believes they must stop President Trump at all costs the fact that he may very well be the only one who will ensure the Covid Scamdemic perpetrators see justice for their crimes against humanity.

Don’t doubt Dr. Goddek’s call on Covid-19, I have 81,000 documents, reports, videos, confirming this as a “slam dunk” crime against humanity. I was tracking this so-called virus before it ever got to the media. It was written up by the Rockefeller Foundation in 2010 as a project called “Lockstep”, you can find it on the Internet under that name! The WEF wants to reduce the world’s population by 90%, so expect more of the same!

Humanity has never been at this point on the Doomsday Clock before. This symbolic clock of the Atomic Scientists is set at a time of unprecedented danger: **It is currently set at 90 seconds to midnight!**

We don’t have much time by any measure so look up and be ready for the trumpet call. I do believe the **9<sup>th</sup> of Av** portends of the Rapture event specifically to allow the nation of Israel to be dealt with as Ezekiel writes and makes it clear only He, God the Creator of the Universe will come to their hour of need.

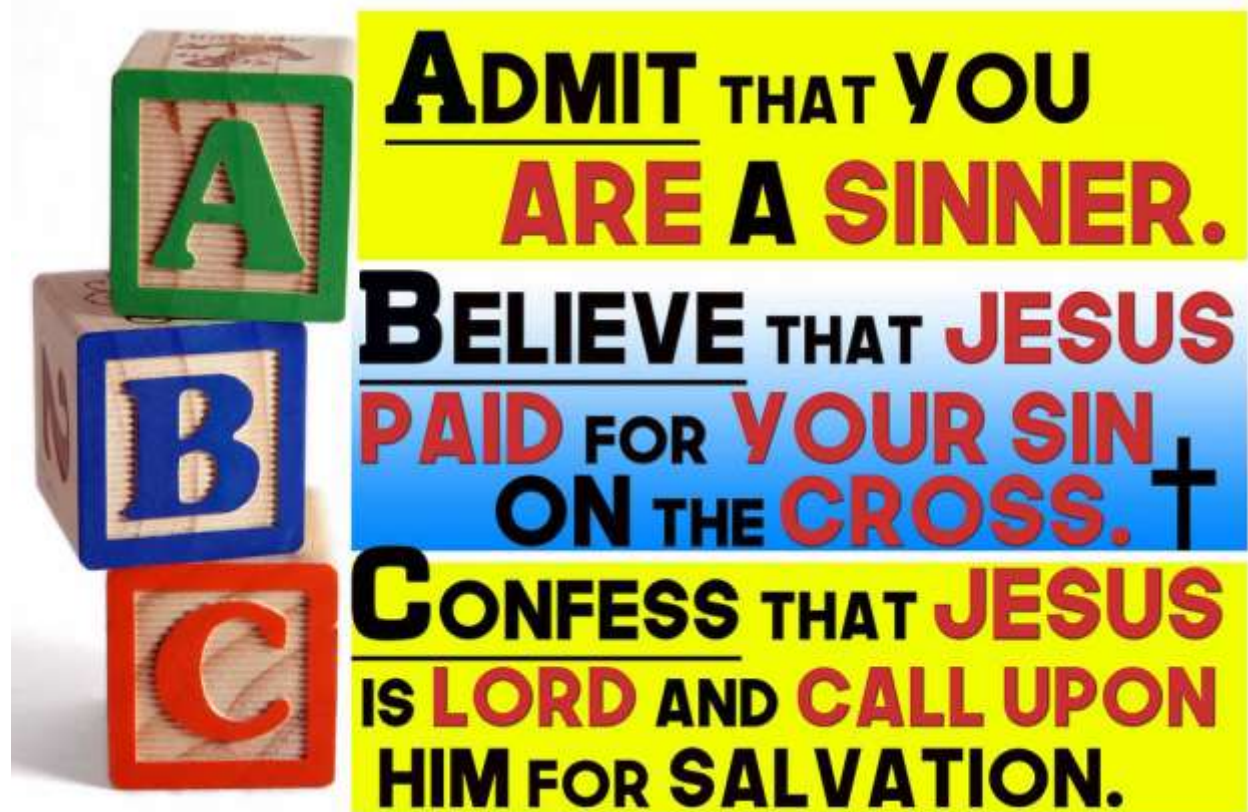

Other possible dates for the Rapture could be the **summer equinox on June 20/21<sup>st</sup>** and the **Fourth of July**, a target date for China or Russia to attack the U.S.A. and raining bombs down on the National holiday! Then there is Victoria Nuland’s revised date for an **attack on Russia of July 11<sup>th</sup>**. For years, the words of Hilton Sutton have echoed in my mind: *“When the bombs are descending, the saints will be ascending!”*

Remember this – this is God’s War between The Antichrist and the true Christ of the Bible. Regardless of what credentials Prince Charles has counterfeited, he cannot win. God has given him only “seven” years before the Antichrist will be terminated. Ephesians 6:12 warned the church – **“For we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of**

***this world, against spiritual wickedness in high places.***” If you read a few verses later we are told to put on the full armor of God.

Ephesians 6:13-20 is for us today in dealing with the essentials for occupying until we are called home! The Apostle Paul stressed the expression to “withstand” in the evil day! Folks we are there and Jesus Christ will win this war. The Bible told that to us in advance as well so that we would know what he said came true we would remember where we read it!

Praise God!

Blessings in the Precious Name of Jesus Christ,

Pastor Bob, [EvanTeachr@aol.com](mailto:EvanTeachr@aol.com)  
[www.pastorbobreid.com](http://www.pastorbobreid.com)
