

The Blessed Hope!

“Looking for that blessed hope, and the glorious appearing of the great God and our Saviour Jesus Christ;” –(Titus 2:13)

Diamond & Nugget #268

Pope Francis Authorizes WEF to Rewrite ‘Fact Checked’ Holy Bible

[Fact checked](#)

[December 24, 2023 Baxter Dmitry News,](#)

The World Economic Forum has been granted authorization by Pope Francis to rewrite the Holy Bible, according to a WEF insider who reveals the pope wants the new “fact-checked” version of the Bible to be far more political, with a central place for the primacy of nature, and far less about God.

Pope Francis has already declared that Klaus Schwab is more important than Jesus Christ and now he is determined to dismantle Christianity from the inside and replace God’s word with the demonic vision of the global elite.

Pope Francis’ decision has caused a storm in the Vatican, but should we really be surprised by his support for the elite’s New World Order? As an **Agenda Contributor** at the WEF, Pope Francis is fluent in blasphemy and is actively working to subvert the church and Christianity across the world.

Pope Francis’ inverted version of Christianity is confusing for many; however the picture becomes clear when you understand who the pontiff is *really* serving.

This is the pope who joined forces **with Bill Clinton** in September to announce that humanity must be urgently depopulated to save the planet.

And this is the pope who informed his flock that “relationships with Jesus are dangerous and harmful.” Breaking with centuries of Christian tradition, Francis sparked fears that he is an illegitimate pope with a sinister agenda when he told a crowd of 33,000 pilgrims in St. Peter’s Square that **“a personal, direct, immediate relationship with Jesus Christ”** must be avoided at all costs.

As though that wasn’t disturbing enough, Francis followed up by **ordering** Christians to stop bringing people from other faiths to Jesus and Christianity.

Pope Francis is a Satanist hiding in plain sight. This is a visible sign of the photo above.

The broken cross symbol is a cross with the arms broken. It has Pagan origins and can represent life or death depending on the direction. It is often used by Wiccans and Satanists to express their opposition to Christianity. It is also known as the peace symbol in modern times, but some Christians view it as a sign of despair, anti-Christ, and broken Jew.

There is a history behind the famous broken papal cross habitually associated with John Paul II who always carried it. Many Catholics are oblivious that it was not JP II, but Paul VI who commissioned it from Italian sculptor Lello Scorzelli in 1963 and used it for the first time December 8, 1965, at the official closing of the Second Vatican Council. In fact, not only was this condemnation ignored after Vatican II, but the crozier inspired by Servaes became a symbol of the pontificates of Paul VI, John Paul I, John Paul II & Benedict XVI. Francis I was quick to assume this horrific insignia in the first days of his papacy.

Anyone who looks closely at this gruesome crucifix, with the Christ whose hands look like claws, his legs rudely sprawled open, and his hidden downcast head, can see something devilish in it. It is no wonder the Church solemnly condemned the artist who inspired it. Now, we witness this sad sign of the times: That same cross has been assumed as a symbol of the conciliar Popes in open scorn of the previous condemnation by Benedict XV.

And then he ordered his lackeys in the Vatican to proclaim that Lucifer is the God of the Catholic Church.

That's right, according to Pope Francis' twisted mind, Lucifer is Jesus Christ's father and the God of the Catholic Church.

Obviously the new globalist Bible must be rejected out of hand by all self-respecting and god-fearing Christians. But what can we expect from this demonic text?

Yuval Noah Harari, who serves as Klaus Schwab's right hand man at the WEF, went on record stating that the Bible is "fake news" and full of hate speech, and the elites can use AI to replace the Bible and create a unified "religion that is actually correct."

Harari, who is known as 'The Prophet' in Davos circles, made the statement while giving a speech on the "future of humanity."

According to Harari, the power of AI can be harnessed and used to reshape spirituality to accept the WEF's globalist vision.

The people at The Economist know things that most people don't and their magazine covers have a long history of telling us in advance about the political, economic and cultural developments that the elite have in store for us.

Just one month before Harari's speech, the Economist appeared to be signing from the same hymn sheet.

Klaus Schwab famously boasted about how his Young Global Leaders have taken over the world and the WEF has penetrated cabinets in all of the leading democracies.

But it's not just the cabinets. The global elite understand their dark spirituality can only succeed in a world devoid of religion. So they decided to destroy the world's major religions from the inside.

WikiLeaks [emails](#) taught us that Francis was installed in the Vatican in a globalist coup orchestrated by George Soros, Hillary Clinton and Barack Obama.

And the globalist bulldog wasted no time repaying his globalist masters by repeating disturbing globalist rhetoric at every opportunity.

In 2017, Pope Francis called for a “one world government” and “*political authority*”, arguing that the creation of the one world government is needed to combat issues such as “*climate change*.”

Speaking with Ecuador’s ‘*El Universo*’ newspaper, the Pope said that the United Nations does not have enough power and must be granted full governmental control “*for the good of humanity*.”

Disturbingly, world religious leaders are also beginning to come together as one to preach from the same hymn sheet, instructing their sheep to accept the components of the New World Order’s one world government.

Now, Pope Francis is actively defying Biblical scripture by working to rewrite the Bible along globalist principles and create a “*one world religion*.”

First Francis shocked the Christian world by hosting Islamic prayers and Quran recitals in the Vatican.

Then he took off his shoes in Istanbul’s Blue Mosque, faced Mecca, and prayed to Allah.

Then came the pagan ceremony and brazen idol worship on Vatican grounds.

Somebody needs to remind Francis that the Bible says “*You shall have no other gods before me*.” This is expressed in **Exodus 20:3, Matthew 4:10, Luke 4:8** and elsewhere.

But its unlikely Francis would be interested. He is more interested in overruling God’s word and eradicating Christianity in favor of what he calls “*Chrislam*.”

The world is now at a tipping point, with a fierce battle raging for the soul of humanity. The globalists and their technocratic dreams of totalitarian rule threaten to consume humanity and destroy civilization as we know it.

It’s clear whose side Francis is on. And we haven’t even covered the pedophilia scandal that is rotting the Catholic Church from the inside out. People all too often forget that Pope Francis was and still is a Jesuit. It took nearly two millennia for the enemies of the Catholic Church to realize they could not successfully attack the Church from the outside. Indeed, countless nemeses from Nero to Napoleon succeeded only in creating sympathy and martyrs for the Catholic Faith. Read Taylor Marshall’s book ‘*Infiltration*’ ~ *The Plot to Destroy the Church from Within*. A second short document, ‘*Alta Vendita*’ ~ *A Masonic Blueprint for the Subversion of the Catholic Church*’ is important history.

That all changed in the mid-19th century, when clandestine societies populated by Modernists and Marxists hatched a plan to subvert the Catholic Church from within. Their goal: to change Her doctrine, Her liturgy, and Her mission. We should keep a very close eye on this Jesuit pope during these pivotal years.

Bill Gates & WEF Implicated in Global Depopulation Plot

Hunter Fielding December 23, 2023

Explosive government documents have emerged that implicate Bill Gates and the World Economic Forum (WEF) in a plot to depopulate the planet.

The scheme was revealed in a leaked government report that ties Gates and WEF founder Klaus Schwab to Big Pharma giant Pfizer.

If an experimental vaccine were to damage the heart and immune system in a significant number of individuals who received it, it is possible that it could lead to a decline in the overall population size.

This could occur for several reasons.

- First, damage to the heart could lead to an increase in cardiovascular diseases, which are a leading cause of mortality worldwide. This could result in a higher number of deaths among individuals who received the vaccine.
- Second, damage to the immune system could leave individuals more susceptible to other infections and diseases, which could also contribute to an increase in mortality.
- Last, but by no means least, the negative impacts of the vaccine on fertility and reproductive health could lead to a decline in the number of births, further contributing to a decline in the overall population size.

If such a vaccine were to be developed and distributed, it could potentially lead to depopulation due to increased mortality and decreased fertility.

Unfortunately, the world has found itself in a situation where powerful institutions and Governments have coerced millions of people into getting an experimental COVID-19 vaccine that causes all of the ill-fated things mentioned above.

Official Government reports and confidential Pfizer documents prove it.

Therefore, you are witnessing mass depopulation unfold before your very eyes.

The push for mass Covid-19 vaccination isn't about combating a virus, but about reducing the global population.

This goal aligns with the interests of certain powerful corporations and individuals who stand to benefit from a smaller, more manageable population.

Regardless of the specific cause, the implications of what is currently occurring in the real world are significant.

Millions have 'Died Suddenly'

Did you know that data on excess deaths in 15% of the world's countries can be found on the website of the [Organisation for Economic Co-operation and Development \(OECD\)](#)?

This includes major countries like the USA, Canada, and the UK.

Additionally, we were able to extract even more up-to-date data on 28 European countries from [EuroMOMO](#).

'Unlabeled and Unregulated': Synthetic Milk Protein with 92 Unknown Compounds Used by More Than a Dozen Food Brands

By Suzanne Burdick, Ph.D.

Testing by the Health Research Institute found 92 unknown compounds in Bored Cow's synthetic milk — produced from a “form of genetic engineering” — in addition to significant nutrient deficiencies. Over a dozen companies use similar formulations in products like cream cheese, smoothies and ice cream.

Recent testing revealed 92 unknown molecules — and a fungicide — in “synthetic” milk now sold in common grocery chains, according to the Health Research Institute (HRI).

The product, sold by [Bored Cow](#), uses a fake whey protein called “ProFerm” made by [biotech company and partner Perfect Day](#). [Perfect Day](#) uses genetically modified “[microflora](#)” to produce the synthetic milk protein.

According to Bored Cow, their product is a new kind of “*animal-free*” milk alternative “[made with real milk protein from fermentation](#).”

[HRI](#), a nonprofit independent lab based in Fairfield, Iowa, examined multiple samples of Bored Cow's "original" flavor milk using [mass spectrometry](#) to test the claim that the synthetic protein it contained was the same as real milk protein.

Synthetic milk has never before been consumed by humans and has not undergone safety testing by the U.S. Food and Drug Administration (FDA), according to HRI's Chief Scientist and CEO [John Fagan, Ph.D.](#)

The testing results have yet to be published, but Fagan shared a few highlights with [The Defender](#), including that the synthetic milk lacked many important micronutrients found in natural milk such as an omega-3 fatty acid, vitamin E and some B vitamins. It also contained a host of compounds that could be harmful to human health, Fagan said.

This news comes as [Italy last month banned](#) the sale of synthetically-produced meat, making it the [first country to ban synthetic food](#), according to the [Organic Consumers Association](#).

Fagan — a molecular biologist and former cancer researcher at the National Institutes of Health — has been a worldwide pioneer in testing genetically modified organisms (GMOs).

Commenting on his lab's findings, he told The Defender, *"The 92 unknown molecules we found have never been studied by scientists. So we don't know whether they're safe or dangerous, whether they are nutrients or toxics."*

Only eight compounds were identifiable. The rest were "uncharacterized" by scientific literature. Fagan explained:

“In any natural material, you’re going to probably find a majority of compounds that science has not studied.”

“Human beings have this arrogant idea that they know everything, but in fact, we know just a little fragment of what there is to know about the living world ...”

“[For example, a sample of] wheat will have many compounds that are unknown to science. But the difference is that you and I — our ancestors going back 4,000 years — have been eating wheat. And so we know from traditional use that whatever’s in wheat, it’s safe for us to eat.”

“We can’t say that about the synbio milk. It’s what is called, in Europe and in Canada, a ‘novel food.’”

Such countries require that novel foods be tested for safety before they’re put on the market, he added, but not the U.S.

Fagan said he found it concerning that the Bored Cow samples contained a pesticide — a fungicide called [Benthiavalicarb-isopropyl](#).

“I think the reason this fungicide is present is because they added it to the fermentation process to inhibit the growth of fungi that could contaminate the production system,” he said, *“So the things that we see here are not really good for us, let me put it that way.”* HRI compared these results to samples of natural milk from grass-fed cows.

69 important nutrients in natural milk absent in synthetic milk

“There were 69 important nutrients present in natural milk, most of which were completely absent in synbio milk. A few were present in small or trace amounts,” Fagan said.

For example, Bored Cow’s milk only had a trace of [riboflavin](#), known as vitamin B2, while natural milk has very high levels, he said. [Pantothenic acid](#), known as vitamin B5, was *“absolutely absent in the synbio milk.”*

Similarly, vitamin E was *“essentially absent yet present in substantial levels in natural milk,”* he said.

Additionally, forms of [carnitine](#) that are “really important for energy metabolism” were either missing or only present in trace amounts in the synbio product, he said.

The synthetic milk had *“only a tiny trace of the important omega-3 fatty acid [alpha-linolenic](#).”*

Alpha-linolenic acid is *“the most abundant omega-3 fatty acid in plants.”* Natural milk from grass-fed cows typically has *“significant levels”* of it, Fagan explained.

Fagan added that “a number of other lipids or fats — diglycerides and mono and triglycerides — were undetectable in the synbio milk.”

These results contradict [Perfect Day's claim](#) that its product — used by Bored Cow — is “*identical to what cows make.*”

Industry calls it ‘precision fermentation’ rather than ‘genetic engineering’
Bored Cow is one of at least ten [companies selling “synthetic”](#) or “synbio” dairy products.

“[Synbio](#)” — short for “synthetic biology” — is a method that uses genetic engineering to modify microorganisms like yeast, algae or bacteria to produce novel products, according to the Non-GMO Project.

The [Non-GMO Project](#) said, “*The biotechnology industry is marketing this method as ‘precision fermentation’ because it exploits a natural process ... but it’s actually a form of genetic engineering.*”

Indeed, Perfect Day avoids describing its production process as involving “GMOs” and, instead, explains on its website “[how we teach microflora to create sustainable protein.](#)”

Meanwhile, critics — including groups like the nonprofit [GMO/Toxin Free USA](#) that consider the product to be GMO — say synbio milk needs to undergo safety testing before the FDA allows it to be sold.

GMO/Toxin Free USA released a [list of 12 brands](#) they found to include synbio milk in their products, such as alternative dairy ice cream, milk, whey protein and cream cheese.

In addition to Bored Cow, the brands were Brave Robot, Nick’s, Coolhaus, Strive Nutrition, Nestle Cowabunga, Whey FWRD, JuiceLand, Apollo, Modern Kitchen, Nurishh and Mars CO2COA.

The Non-GMO Project [named more companies](#), including The Urgent Company, California Performance Co. and Betterland Foods. Even [General Mills now sells products](#) made with synbio milk, according to Bored Cow.

Perfect Day also lists [partnerships with Nestlé](#), Mars, Myprotein, Renewal Mill and Bel Group.

GMO/Toxin Free USA said, “*This is yet another [corporate attempt to use Americans as their lab rats.](#) NO THANK YOU.*”

Experts Warn – WEF’s Net Zero Goals Will Kill 4+ Billion People.

BY PATRICIA HARRITY ON DECEMBER 23, 2023

The World Economic Forum (WEF) and its fellow unelected globalist leaders are pushing for governments around the world to phase out fossil fuels. **Leading experts have spoken out against their plans and are warning the public that the WEF’s “Net Zero” goal to eliminate fossil fuels will result in the deaths of over four billion people or more.**

The “Net Zero” target to end fossil fuel use is part of the WEF and UN’s “Agenda 2030” and “Agenda 2050” plans for humanity and involves dramatically reducing fossil reliance by 2030 and completely eliminating their use by 2050.

The WEF continues to push its agenda and has been calling for taxpayers worldwide to pay \$3.5 trillion per year, which they insist is necessary to fund the noble global power in order to meet the globalist organization’s “Net Zero” goal of “decarbonizing” the planet.

However, critics argue that “decarbonization” is just a euphemism for the WEF’s [anti-human agenda](#) and experts are raising the alarm about what this will actually mean for civilization, which includes the death of over four billion people.

Starvation

Danish statistician Bjørn Lomborg is just one who has warned that ending fossil fuel use will lead to the deaths of around half of the world’s population through starvation alone.

“4 billion people are dependent on fossil fertilizer for food,” Lomborg notes. “Without, 4 billion will starve to death. “It is time to call out the astoundingly destructive & misanthropic campaigners,” he declared.

The article Lomborg was responding to was by British economist Neil Record in the ‘Telegraph’, who argued that the number of people that might die was closer to six billion.

Six Billion Would Die in a Year.

Neil Record [reported](#): *“If we literally just stopped using fossil fuels and “did without the natural resources on which the world, its economies and populations depend, most likely six billion people would die within a year.”*

Breaking down what would happen in a world without fossil fuels, Record notes that most people would suffer blackouts due to the grid being so seriously compromised, possibly fatally, and they may be widespread and permanent.

From day one, gas users would be the first to feel the change of no more mining of coal; the world’s [oil wells shut down](#); the world’s gas fields likewise, and in 10 or 15 days, the UK would have to turn off its gas distribution system as it would be unable to maintain pressure.

In turn, the domestic supply would be shut down too – gas would stop flowing, and some 21 million households (74% of the population) would no longer have heating, hot water, and cooking facilities.

“In their panic, people might turn to electricity for their cooking and heating, but wait...” says Record, who adds, *“The [UK electricity grid relies on natural gas as its “buffer”](#) energy source. Every day, demand varies according to consumer demand, and the other main energy supplier, renewables, are highly variable and can only power the grid when gas is picking up the lion’s share of the gap between their output and consumer demand.”*

So the moment that the main gas distribution system is de-pressurized, the grid-balancing system fails and power cuts ensue.

Electricity demand would have rocketed through the switch to electric space heating, cooking and water-heating, and so it seems very likely that the sudden excess demand would be undeliverable, and therefore that the grid would spiral into uncontrollability resulting in no electricity. This also means there would be no communication systems no mobile phones and no television.

Without power, there will be no running water and no heating and the most vulnerable people will start to die, according to Record. Initially, this will be the elderly in their own homes, then in hospitals when the diesel backup generators run out of fuel. Within the

first 25 days new “*existential problems emerge for ordinary people in the form of food availability and distribution.*”

Britain's biggest oil importers

Thousand tonnes of oil

SOURCE: DIGEST OF UK ENERGY STATISTICS

Starvation Begins From **Day 25**

Day 25 – By the twenty-fifth day, diesel and petrol are likely to have run dry, although, Record says that he is probably being generous with the timing here, but what this will mean is that food distribution would fail, and so as most of the population are entirely dependent on bought food they will begin to starve.

Interestingly, it will be only the isolated rural communities, and those who are agriculturally self-sufficient would be relatively unaffected.

Day 50 – Many people in urban areas would now be near death from starvation, Record claims, and “*law and order would have broken down*” and due to the “*increasingly desperate search for the means of survival*” he suspects there will have been “*mass conflict and slaughter taking place.*”

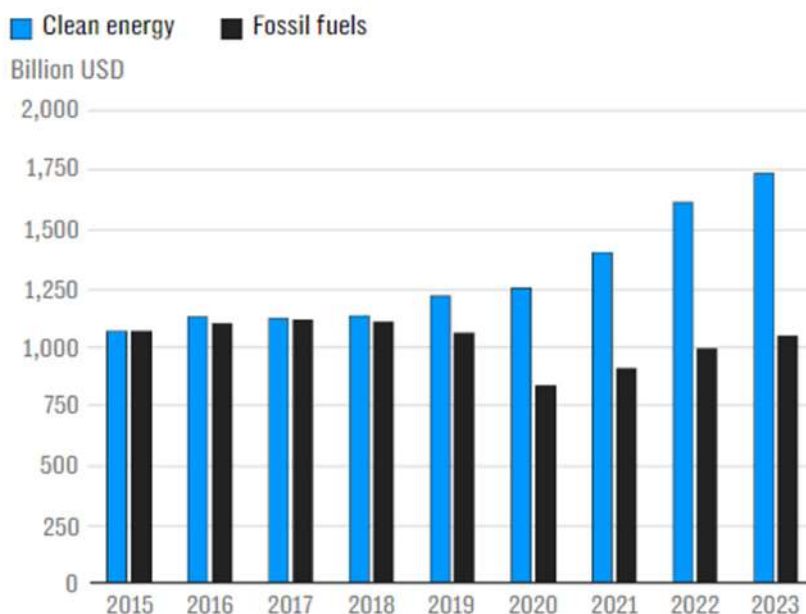

Without the sanitary conditions that we have due to power, water supply, and sewage flow, we will see a return of Victorian diseases such as cholera and dysentery.

Day 100 – money and status will be irrelevant as time passes and just three months after the world stops oil, Neil Record, guesses that around half of the world’s population of approximately four billion, people would be dead “*The first to die would be the urban poor; then the middle and upper classes*”

Again, the survivors would be those in rural areas and able to live off local agricultural produce or live off dwindling food stocks.

Fossil fuel investment lagging behind clean energy

Global energy investment

SOURCE: IEA

For fifty-five percent of people in urban areas, it will be almost impossible to access food and safe water as there will be none of the normal distribution routes for food or storage facilities (chillers/freezers) without electricity, and without pumped water, clean water would be unavailable, or close to impossible to access. [Source](#)

A Year Without Oil – Murder and Mayhem.

Day 365 – after a year without oil Record says *“perhaps a further two billion people would have starved or frozen to death, leaving, say, two billion left alive remaining food stocks would have been exhausted or spoiled, and the inevitable breakdown of law and order would have meant many would meet a violent end.”*

“Competition for scarce resources, so elegantly solved by the invention of markets and prices, would be replaced by murder and mayhem”

There is now no going back as the means to reverse the just stop oil experiment would have gone.

“The mass extinction would have robbed societies of their cultures, education, and survival techniques. A new dark age would ensue” and as Record says this is a nightmarish scenario, but claims that everything in this scenario is well supported by fact. [Source](#)

Meadows Depopulation

Members of the WEF have [repeatedly suggested](#) that mass reductions in the number of humans on earth would help the organization reach its green agenda goals, and as Slay News has [reported](#), Dennis Meadows who is a *“celebrated member of the WEF, has called for a staggering 86 percent reduction in the population of humans”*.

Meadows who is one of the main authors of the Club of Rome’s 1972 pro-depopulation book *“[The Limits to Growth](#).”* and an [honorary member of the Club of Rome](#) as well as a [member of the World Economic Forum](#). argues that the goal can be achieved “peacefully.”

Meadow’s book was published over 50 years ago, but his ideology appears to still align with the WEF’s anti-human, depopulation agenda, of today. He argued that *“most of the world’s population must be wiped out so that the survivors can “have freedom” and a “high standard of living.”*

“The survivors” are a select few, however, and it is unlikely that many of us will be included. (It’s that big club again). [Source](#)

One Way or Another

Experts who have warned of the dangers associated with stopping oil should not be ignored, it is blatantly obvious that our unelected leaders are not interested in our well-being. Those who have been promised a privileged position in the depopulated world of the future, have many ways they hope to achieve their aims, whether it be through,

chemtrails, vaccines, pharma products, toxic substances in food, water, etc., etc., they aim to get us, one way or another and stopping oil is just one more way.

Deagel's Depopulation Forecast confirmed by Heavily Censored Pfizer Documents

BY THE EXPOSÉ ON DECEMBER 24, 2023

A controversial forecast by Deagel, a global intelligence and consulting firm, gained attention in 2020 for its startling prediction of a significant depopulation event across the Western World by 2025.

This was a very bold claim to make.

'Your Government is trying to kill you' is even bolder.

But unfortunately, these bold claims are now backed up with a mountain of evidence, and most of that evidence can be found in the confidential Pfizer documents that the U.S. Food & Drug Administration has been forced to publish by court order.

And sadly, the evidence strongly suggests that Covid-19 vaccination is causing mass depopulation.

What is Deagel?

The [Deagel corporation](#) is a minor branch of U.S. military intelligence, one of the many secretive organizations which collect data for high-level decision-making purposes and prepares confidential briefing documents for agencies like the National Security Agency, the United Nations, and the World Bank.

It is known to have contributed to a Stratfor report on North Korea. With this kind of pedigree, Deagel should be seen as a legitimate player in the intelligence community and not merely a disinformation asset.

This means its population predictions for 2025, as well as its industrial output predictions on a nation-by-nation basis, are not mere fantasy but instead based on strategic assumptions which are shared and well understood by other players in the intelligence community.

What has Deagel Predicted?

[Deagel.com's](#) [infamous] 2025 [forecast](#) was removed from their website sometime in 2020. However, [thanks to the Wayback Machine / Internet Archive](#), we are able to view the original predictions before discovered by critical thinkers.

Deagel predicted in 2020 that the United Kingdom would see its population decline by 77.1% by the year 2025. [Full list of data charts can be accessed by clicking on the link below. Due to the length of the report, I have not included the charts, graphs, data but you can access them below.]

- [Deagel's Depopulation Forecast confirmed by Heavily Censored Pfizer Documents Deagel predicted in 2020 that the United States would see its population decline by 68.5 % by the year 2025.](#)

[Source](#)

Deagel predicted in 2020 that the United States would see its population decline by **68.5 %** by the year 2025.

[Source](#)

Deagel predicted in 2020 that Germany would see its population decline by **65.1%** by the year 2025.

[Source](#)

Deagel predicted in 2020 that Australia would see its population decline by **34.6%** by the year 2025.

[Source](#)

While also predicting a huge decline among many other Western countries.

[Source](#)

A full list of Deagel's original apocalyptic depopulation predictions can be viewed [here](#).

Sadly, the confidential Pfizer documents coupled with staggering deaths among children suggest Deagel's depopulation figures were not just an estimation, but a target.

The Confidential Pfizer Documents

The [US Food and Drug Administration](#) (FDA) attempted to delay the release of Pfizer's COVID-19 vaccine safety data for 75 years despite approving the injection after only 108 days of safety review on [December 11th, 2020](#).

But in early January 2022, Federal Judge Mark Pittman ordered them to release 55,000 pages per month. They released 12,000 pages by the end of January.

Since then, PHMPT has posted all of the [documents](#) on its website. The latest drop happened on 1st June 2022.

One of the documents contained in the data dump is ['reissue 5.3.6 postmarketing experience.pdf'](#). Page 12 of the confidential document contains data on the use of the Pfizer Covid-19 injection in pregnancy and lactation.

Confidential Pfizer Documents reveal 90% of Covid Vaccinated Pregnant Women lost their Baby

Pfizer state in the document that by 28th February 2021 there were 270 known cases of exposure to the mRNA injection during pregnancy.

Forty-six-percent of the mothers (124) exposed to the Pfizer Covid-19 injection suffered an adverse reaction.

Of those 124 mothers suffering an adverse reaction, 49 were considered non-serious adverse reactions, whereas 75 were considered serious. This means 58% of the mothers who reported suffering adverse reactions suffered a serious adverse event ranging from uterine contraction to foetal death.

- 146 non-serious mother cases reported exposure to vaccine in utero without the occurrence of any clinical adverse event. The exposure PTs coded to the PTs Maternal exposure during pregnancy (111), Exposure during pregnancy (29) and Maternal exposure timing unspecified (6). Trimester of exposure was reported in 21 of these cases: 1st trimester (15 cases), 2nd trimester (7), and 3rd trimester (2).
- 124 mother cases, 49 non-serious and 75 serious, reported clinical events, which occurred in the vaccinated mothers. Pregnancy related events reported in these cases coded to the PTs Abortion spontaneous (25), Uterine contraction during pregnancy, Premature rupture of membranes, Abortion, Abortion missed, and Foetal death (1 each). Other clinical events which occurred in more than 5 cases coded to the PTs Headache (33), Vaccination site pain (24), Pain in extremity and Fatigue (22 each), Myalgia and Pyrexia (16 each), Chills (13) Nausea (12), Pain (11), Arthralgia (9), Lymphadenopathy and Drug ineffective (7 each), Chest pain, Dizziness and Asthenia (6 each), Malaise and COVID-19 (5 each). Trimester of exposure was reported in 22 of these cases: 1st trimester (19 cases), 2nd trimester (1 case), 3rd trimester (2 cases).

[Source – Page 12](#)

A total of 4 serious fetus/baby cases were reported due to exposure to the Pfizer injection.

- 4 serious foetus/baby cases reported the PTs Exposure during pregnancy, Foetal growth restriction, Maternal exposure during pregnancy, Premature baby (2 each), and Death neonatal (1). Trimester of exposure was reported for 2 cases (twins) as occurring during the 1st trimester.

But here's where things get rather concerning. Pfizer state that of the 270 pregnancies they have absolutely no idea what happened in 238 of them.

But here are the known outcomes of the remaining pregnancies –

There were 34 outcomes altogether at the time of the report, but 5 of them were still pending. Pfizer note that only 1 of the 29 known outcomes were normal, whilst 28 of the 29 outcomes resulted in the loss/death of the baby. This equates to 97% of all known outcomes of Covid-19 vaccination during pregnancy resulting in the loss of the child.

When we include the 5 cases where the outcome was still pending it equates to 82% of all outcomes of Covid-19 vaccination during pregnancy resulting in the loss of the child. This equates to an average of around 90% between the 82% and 97% figure.

So here we have our first piece of evidence that something is amiss when it comes to administering the Pfizer Covid-19 injection during pregnancy.

Here's the guidance taken from the UK Government's '**REG 174 INFORMATION FOR UK HEALTHCARE PROFESSIONALS**' document –

'Pregnancy

There are no or limited amount of data from the use of COVID-19 mRNA Vaccine BNT162b2.

*Animal reproductive toxicity studies **have not been completed**. COVID-19 mRNA Vaccine **BNT162b2 is not recommended during pregnancy.***

*For women of childbearing age, pregnancy should be excluded before vaccination. In addition, women of childbearing age should be advised to **avoid pregnancy for at least 2 months after their second dose.***

6

Breast-feeding

It is unknown whether COVID-19 mRNA Vaccine BNT162b2 is excreted in human milk. A risk to the newborns/infants cannot be excluded. COVID-19 mRNA Vaccine BNT162b2 should not be used during breast-feeding.

Fertility

*It is **unknown** whether COVID-19 mRNA Vaccine BNT162b2 has an **impact on fertility.**'*

That's how the guidance read in December 2020 anyway. Unfortunately, just a month or so later, the UK Government and other Governments around the world revised that guidance to read as follows –

4.6 Fertility, pregnancy and lactation

Pregnancy

There is limited experience with use of the COVID-19 mRNA Vaccine BNT162b2 in pregnant women. Animal studies do not indicate direct or indirect harmful effects with respect to pregnancy, embryo/foetal development, parturition or post-natal development (see section 5.3). Administration of the COVID-19 mRNA Vaccine BNT162b2 in pregnancy should only be considered when the potential benefits outweigh any potential risks for the mother and foetus.

Breast-feeding

It is unknown whether the COVID-19 mRNA Vaccine BNT162b2 is excreted in human milk.

Fertility

Animal studies do not indicate direct or indirect harmful effects with respect to reproductive toxicity (see section 5.3)

[Source – Page 7](#)

This is still the official guidance as of June 2022, and leads to several questions requiring urgent answers when we consider since early 2021 pregnant women have been told Covid-19 vaccination is perfectly safe.

You only have to look at the things women were told to avoid during pregnancy prior to being told it's perfectly safe to take an experimental injection to realise something just isn't right here –

- Smoked fish,
- Soft cheese,
- Wet paint,
- Coffee,
- Herbal tea,
- Vitamin supplements,
- Processed Junk foods.

These are just to name a few, and the list is endless.

So let's start with the 'Pregnancy' section of the official guidance. In December 2020 the guidance stated '*Covid-19 vaccination is not recommended during pregnancy*'. Just a month or so later this guidance stated '*Animal studies do not indicate harmful effects with respect to pregnancy etc.*'

So let's take a look at the animal studies in question.

But before we do it's worth pointing out that the official guidance states, as of June 2022, that '*administration of the COVID-19 mRNA Vaccine BNT162b2 in pregnancy should only be considered when the potential benefits outweigh any potential risks for*

the mother and foetus'. So why on earth has every single pregnant woman up and down the land been actively coerced into getting this injection?

Pfizer and Medicine Regulators hid dangers of Covid-19 Vaccination during Pregnancy due to Animal Study finding an increased risk of Birth Defects & Infertility

The limited animal study talked about in the official guidance actually uncovered the risk of significant harm to the developing foetus, but medicine regulators in the USA, UK and Australia actively chose to remove this information from public documents.

The actual study can be viewed in full [here](#) and is titled '[Lack of effects on female fertility and prenatal and postnatal offspring development in rats with BNT162b2, a mRNA-based COVID-19 vaccine](#)'.

The study was performed on 42 female Wistar Han rats. Twenty-one were given the Pfizer Covid-19 injection, and 21 were not.

Here are the results of the study –

[Source](#)

The results of the number of foetuses observed to have supernumerary lumbar ribs in the control group were 3/3 (2.1). But the results of the number of foetuses to have supernumerary lumbar ribs in the vaccinated group were 6/12 (8.3). Therefore on average, the rate of occurrence was 295% higher in the vaccinated group.

Supernumerary ribs also called accessory ribs are an uncommon variant of extra ribs arising most commonly from the cervical or lumbar vertebrae.

So what this study found is evidence of abnormal foetal formation and birth defects caused by the Pfizer Covid-19 injection.

But the abnormal findings of the study don't end there. The 'pre-implantation loss' rate in the vaccinated group of rats was double that of the control group.

[Source](#)

Pre-implantation loss refers to fertilised ova that fail to implant. Therefore, this study suggests that the Pfizer Covid-19 injection reduces the chances of a woman being able to get pregnant. So, therefore, increases the risk of infertility.

So with this being the case, how on earth have medicine regulators around the world managed to state in their official guidance that "*Animal studies do not indicate direct or indirect harmful effects with respect to pregnancy*"? And how have they managed to state "*It is unknown whether the Pfizer vaccine has an impact on fertility*"?

The truth of the matter is that they actively chose to cover it up.

We know this thanks to a 'Freedom of Information (FOI) request made to the Australian Government Department of Health Therapeutic Goods Administration (TGA).

A [document](#) titled '[Delegate's Overview and Request for ACV's Advice](#)' that was created on 11th January 2021 was published under the FOI request. Page 30 onwards of the [document](#) shows a 'review of the product information', and highlights changes that should be made to the 'Non-clinical evaluation report' prior to official publication.

The changes were requested to be made by Pfizer prior to the next product information update.

Some of those requested changes were as follows –

The Module 4 evaluator requested Pfizer remove their claim that “Animal studies do not indicate direct or indirect harmful effects with respect to reproductive toxicity”.

Why?

The Module 4 evaluator told Pfizer that 'Pregnancy Category B2' was considered appropriate and requested that they added the following line –

“A combined fertility and developmental toxicity study in rats showed increased occurrence of supernumerary lumbar ribs in fetuses from COMIRNATY- treated female rats”.

But here's a reminder of how the [official document](#) issued to the general public reads – [Source – Page 7](#)

The pregnancy category was changed to 'B1', no line was included on the increased occurrence of supernumerary lumbar ribs in fetuses, and they instead included the line that was requested to be removed claiming “*Animal studies do not indicate direct or indirect harmful effects with respect to pregnancy...*”.

Here's the official description of the pregnancy categories – [Source](#)

That's quite a big difference between the two categories. But the fact that the Module 4 evaluator even thought Pregnancy Category B2 was appropriate is highly questionable when you consider the results, as we revealed above, of the “inadequate” and extremely small animal study that was performed to evaluate the safety of administering the Pfizer Covid-19 injection during pregnancy.

So not only do we have evidence that the Pfizer vaccine may cause between 82% and 97% of recipients to lose their babies, we also now have evidence that the Pfizer vaccine leads to an increased risk of suffering infertility or birth defects.

Both of these examples alone support the suggestion that Covid-19 vaccination is going to lead to depopulation. But unfortunately, the evidence doesn't end there.

Confidential Pfizer Documents reveal the Covid-19 Vaccine accumulates in the Ovaries

[Another study](#), which can be found in the long list of confidential Pfizer documents that the FDA have been forced to publish via a court order [here](#), was carried out on Wistar Han rats, 21 of which were female and 21 of which were male.

Each rat received a single intramuscular dose of the Pfizer Covid-19 injection and then the content and concentration of total radioactivity in blood, plasma and tissues were determined at pre-defined points following administration.

In other words, the scientists conducting the study measured how much of the Covid-19 injection has spread to other parts of the body such as the skin, liver, spleen, heart etc.

But one of the most concerning findings from the study is the fact that the Pfizer injection accumulates in the ovaries over time.

An 'ovary' is one of a pair of female glands in which the eggs form and the female hormones oestrogen and progesterone are made.

In the first 15 minutes following injection of the Pfizer jab, researchers found that the total lipid concentration in the ovaries measured 0.104ml. This then increased to 1.34ml after 1 hour, 2.34ml after 4 hours, and then 12.3ml after 48 hours.

The scientists, however, did not conduct any further research on the accumulation after a period of 48 hours, so we simply don't know whether that concerning accumulation continued.

But official UK data published by Public Health Scotland, which can be found [here](#), offers some concerning clues as to the consequences of that accumulation on the ovaries.

Figures for the number of individuals suffering from ovarian cancer show that the known trend in 2021 was significantly higher than 2020 and the 2017-2019 average.

Ovarian Cancer – [Source](#)

The above chart shows up to June 2021, but the charts found on Public Health Scotland's dashboard now show figures all the way up to December 2021 and unfortunately reveal that the gap has widened even further with the number of women suffering Ovarian cancer increasing significantly.

That concludes our third piece of evidence. So now we know –

- Confidential Pfizer documents show a miscarriage rate between 82 and 97%,

- The only animal study performed to prove the safety of administering the Pfizer vaccine during pregnancy indicated an increased risk of infertility and birth defects,
- and further confidential Pfizer documents reveal the vaccine accumulates in the ovaries.

Unfortunately, we also have evidence that Covid-19 vaccination increases the risk of newborn babies sadly losing their lives, and it also comes from the Public Health Scotland 'Covid-19 Wider Impacts' dashboard.

Newborn Baby Deaths hit critical levels for 2nd time in 7 Months in March 2022

[Official figures](#) reveal that the rate of neonatal deaths increased to 4.6 per 1000 live births in March 2022, a 119% increase on the expected rate of deaths. This means the neonatal mortality rate breached an upper warning threshold known as the 'control limit' for the second time in at least four years.

The last time it breached was in September 2021, when neonatal deaths per 1000 live births climbed to 5.1. Although the rate fluctuates month to month, the figure for both September 2021 and March 2022 is on a par with levels that were last typically seen in the late 1980s.

[Source](#)

Public Health Scotland (PHS) did not formally announce they had launched an investigation, but this is what they are supposed to do when the upper warning threshold is reached, and they did so back in 2021.

At the time, PHS said the fact that the upper control limit has been exceeded "*indicates there is a higher likelihood that there are factors beyond random variation that may have contributed to the number of deaths that occurred*".

Our final piece of evidence to support the claim that Covid-19 vaccination is going to lead to depopulation comes in the form of more real-world data, but this time from the USA.

Covid-19 Vaccination increases risk of suffering Miscarriage by at least 1,517%

According to the Centers for Disease Control's (CDC) [Vaccine Adverse Event Database \(VAERS\)](#), as of April 2022, a total of 4,113 foetal deaths had been reported as adverse reactions to the Covid-19 injections, 3,209 of which were reported against the Pfizer injection.

4,113 Fetal Deaths following COVID-19 vaccines 17 Months Time Period

Table

↓	↑	↓
Vaccine/Manufacturer	Count	Percent
TOTAL	† 4,382	† 106.54%
COVID19 / PFIZER/BIONTECH	3,209	78.02%
COVID19 / MODERNA	996	24.22%
COVID19 / JANSSEN	140	3.4%
UNK / UNKNOWN MANUFACTURER	21	0.51%
COVID19 / UNKNOWN MANUFACTURER	10	0.24%
HEPA / UNKNOWN MANUFACTURER	2	0.05%
TDAP / GLAXOSMITHKLINE BIOLOGICALS	1	0.02%
TD / SANOFI PASTEUR	1	0.02%
IPV / SANOFI PASTEUR	1	0.02%
FLUC4 / SEQIRUS, INC.	1	0.02%
† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 4113 (the number of cases found), and the Total Percentage is greater than 100.		

Credit: [Health Impact News](#)

The CDC has admitted that just 1 to 10% of adverse reactions are actually reported to VAERS therefore the true figure could be many times worse. But to put these numbers into perspective, there were only 2,239 reported foetal deaths to VAERS in the 30 years prior to the emergency use authorisation of the Covid-19 injections in December of 2020. ([Source](#))

And a further study which can be viewed [here](#), found that the risk of suffering a miscarriage following Covid-19 vaccination is 1,517% higher than the risk of suffering a miscarriage following flu vaccination.

The true risk could however actually be much higher because pregnant women are a target group for Flu vaccination, whereas they are only a small demographic in terms of Covid-19 vaccination so far.

63,060% increase in Child Excess Deaths across Europe

In the scorching summer of 2021, a momentous decision swept across Europe, sparking a whirlwind of emotions among parents, who had fallen for the 24/7 propaganda, eagerly awaiting a ray of hope for their children.

The European Medicines Agency (EMA) had finally granted emergency use approval for the use of the Pfizer COVID-19 vaccine in children aged 12 to 15.

Relief and elation surged through the hearts of countless naive parents who saw this as a beacon of protection against the alleged pandemic.

Yet, the winds of fortune took an unexpected turn as the vaccine rollout for children commenced. Startling reports emerged, revealing a distressing surge in excess deaths among the young ones across the continent. The sense of optimism quickly faded among the thousands of families affected, and was replaced by a grim reality that cast a shadow over the hopes of many.

Tragically, the statistics paint a haunting picture, with a staggering **63,060% surge** in excess deaths among children aged 0 to 14 by the twenty-second week of 2023. These numbers whisper a chilling tale of consequences that were foreseen by many silenced and heavily censored voices.

During week 21 of 2021, the European Medicines Agency extended the emergency use authorization of the Pfizer COVID-19 vaccine, first to children aged 12 to 15 and later to the age group of 5 to 11.

[Source](#)

However, the weeks following the approval witnessed a shocking rise in excess deaths among children, an upward trend that persisted unabated.

Between week 22 of 2021 and week 52 of 2021, an alarming tally of 919 excess deaths among 0 to 14-year-old children should have sent shockwaves through the continent. But the data was suppressed.

The contrast couldn't have been starker, as the period between week 1 and week 21 of 2021 saw 218 fewer deaths than expected.

[Source](#)

And the fact the surge in excess deaths aligns perfectly with the EMA's approval of the Pfizer COVID-19 vaccine for children aged 12 to 15 cannot be merely dismissed as coincidence.

The distressing trend continued throughout 2022, with a total of 1,639 excess deaths among children aged 0 to 14 across the 26 European countries, painting a grim reality that cannot be dismissed.

[Source](#)

Sadly, as week 22 of 2023 arrived, the haunting truth emerged as 590 more excess deaths were recorded, bringing the heart-wrenching total to 3,148 deaths among children.

[Source](#)

The somber figures reveal an unprecedented 63,060% surge in excess deaths since the European Medicines Agency extended emergency use authorization of the Covid-19 vaccine to children aged 12 to 15.

The contrast with the previous period couldn't be starker.

From week 21 of 2019 to week 21 of 2021, 5 fewer deaths occurred among children aged 0 to 14 than expected.

[Source](#)

The entirety of 2020 witnessed a notable decline of 230 fewer deaths than expected, painting a chilling narrative.

[Source](#)

Meanwhile the year 2021 up to week 21 prior to emergency use authorisation of the Covid-19 injection for children across Europe witnessed 218 fewer deaths than expected.

[Source](#)

The staggering increase in excess deaths among children aged 0 to 14 across 26 European countries, including the UK, France, Spain, Italy, and Germany, paints a bleak picture of an astounding **63,060%** surge since the European Medicines Agency extended emergency use authorization of the Pfizer COVID-19 vaccine to children aged 12 to 15.

This distressing reality raises serious concerns, considering the experimental nature of the injections and its previous avoidance due to the risks of antibody-dependent enhancement (ADE) and Vaccine-Associated Enhanced Disease (VAED).

Moreover, administering the vaccine to children, who were not at significant risk from the alleged Covid-19 virus, seems perplexing in light of the 449 fewer deaths recorded among children aged 0 to 14 across Europe in 2020, from the onset of the alleged pandemic to the year's end.

[Source](#)

With the risk of this turning into an essay that concludes our evidence for today, but there is plenty more of it out there and we will make sure to report on it.

But with –

- Confidential Pfizer documents showing a miscarriage rate between 82% and 97%,
- The only animal study performed to prove the safety of administering the Pfizer vaccine during pregnancy indicating an increased risk of infertility and birth defects,
- Further confidential Pfizer documents revealing the vaccine accumulates in the ovaries, data from Scotland revealing cases of Ovarian cancer are at an all time high,
- Further data from Scotland revealing deaths of new born babies have hit critical levels for the second time in seven months,
- CDC VAERS data showing Covid-19 vaccination increases the risk of suffering a miscarriage by at least 1,517%,
- And EMA approval of the COVID Vaccine for Children causing a shocking 63,060% increase in Child excess deaths across Europe;

It looks like we already have more than enough evidence to make the claim that Covid-19 vaccination is causing mass depopulation, and Deagel's apocalyptic figures for the Western World in 2025 are on track to be realized.

Cambridge Scientists: 25% of Vaxxed Now Have VAIDS

By Hunter Fielding December 24, 2023

Research scientists at the world-renowned Cambridge University in the UK have revealed that 25 percent of vaccinated people have now developed a chronic condition known as vaccine-acquired immune deficiency syndrome (VAIDS).

As per the research findings, one in four individuals who received the experimental Covid mRNA injections are now experiencing an “unintended immune response.”

The scientists claim in their paper that this particular “unintended immune response” caused by the mRNA vaccine was “generated by a glitch.”

While the Cambridge scientists and mainstream media refer to the impact on immune systems as a “glitch” or “unintended” response, experts have long been sounding the alarm about the potential effects on individuals’ immune systems.

“Cambridge scientists found such vaccines were not perfect and sometimes led to nonsense proteins being made instead of the desired Covid ‘spike’, which mimics infection and leads to antibody production,” the UK Telegraph [reports](#).

“It was thought the minor tweak to uridine caused no problems in cells, but a team of researchers at the University of Cambridge’s Medical Research Council (MRC)

Toxicology Unit have now found when this partially synthetic code is read, the protein-making machine in the body sometimes struggles with the uridine analogs.”

“These findings were shared with medicines regulator MHRA around a year ago, the scientists say, and updated vaccines that use the improved form of mRNA are in the works for cancer jabs, and other therapeutics,” the report adds.

Mainstream media outlets are working tirelessly to cover up the impact of the study.

A report from Science magazine has distorted the scientists’ findings, asserting that the unintended proteins generated by the injections may not be inflicting any harm.

However, Science published another article in July confirming COVID-19 shots are linked to the development of VAIDS.

The report from the outlet highlighted that mRNA injections have the potential to induce conditions like small fiber neuropathy and postural orthostatic tachycardia syndrome (POTS).

In alignment with the Cambridge study, it was revealed that Covid shots generate a “nonsensical and harmless protein” that becomes the target of the body’s attack, consequently triggering an immune system flare-up.

Contrary to the notion presented by the media outlet, an immune system flare-up is far from a “harmless” issue.

The impairment inflicted on the immune system could be linked to various adverse reactions.

A case in point is political commentator Megyn Kelly, who reportedly developed an autoimmune issue following her Covid shot.

The former Fox News star disclosed in September that she had been diagnosed with VAIDS, attributing the damage to her immune system to the Covid vaccine.

In a recorded statement, Kelly expressed regret over her decision to take the vaccine, stating, *“I regret getting the vaccine even though I am a 52-year-old woman because I don’t think I needed it. I think I would have been fine. I’ve gotten COVID many times, and it was well past when the vaccine was doing what it was supposed to be doing.”*

“For the first time, I tested positive for an autoimmune issue at my annual physical,” Kelly added. “And I went to the best Rheumatologist in New York, and I asked her, ‘do you think this could have to do with the fact that got the damn booster and then got COVID within three weeks?’

“And she said. ‘yes. Yes.’

“I wasn’t the only one she’d seen that with.”

Global demands for a comprehensive investigation into the shots have been escalating.

Despite these calls, the vaccines remain readily accessible in most Western nations.

Regrettably, for millions worldwide, it is a situation that comes too late, as many have already succumbed or suffered permanent damage due to the experimental mRNA technology.

Prince Charles Christmas Address!

I watched HRH Prince Charles pre-taped Christmas message on the Royal Channel this morning at 10:01 AM; 3:01 PM London time. The message was pretty much a typical Royal holiday message. It did not offer any insights to those of us waiting for what is yet to come regarding his previous statements that January 1st, 2024 begins the “seven” year program of mandates and or actions taken by the COP28 attendees. The opening was Royal pageantry of music, assorted clips of members of the family engaging in their so-called charity work, and singing by a children’s choir.

🌲 The King is pictured in the Centre Room at Buckingham Palace during the filming of this year's Christmas Broadcast.

The Centre Room opens onto the Buckingham Palace balcony and overlooks The Victoria Memorial and The Mall, where crowds gathered to celebrate The Coronation in May. The Victoria Memorial is the largest monument to a monarch anywhere in the world. The tree speaks of trusting the king to sustain you. Pick the fruit of his SDGs and partake in it and you may find yourself deceived and ensnared in the time of trouble to come.

📺 You can watch the re-Broadcast on the Royal Channel on YouTube. Here is the link to the Royal Channel on YT. <https://www.youtube.com/@royalchannel/videos>

Lest you think the Royal family enjoy doing all these charity events, public service appearances, visiting schools, the Farm at Surrey, or children's orphanages, they are compensated quite well by the government. There have been complaints by some members in the House of Parliament about how much they get to do these gigs. Prince William earns a quarter million a year for his public appearances like those shown in the Christmas address of HRH Prince Charles.

Following the Queen's death, Prince William and Kate Middleton have not only been given a raft of new titles, but they also became billionaires overnight.

Prior to Thursday's news, William received funds from the Crown Estate, Sovereign Grants, and from his inheritance from his late mother Princess Diana.

His net worth was estimated to be about \$40 million (£34 million), which isn't too shabby.

However, his net worth has skyrocketed by \$1.3 billion (£1.1bn), taking his total net worth up to \$1.34bn. The reason for this huge spike in wealth is because Prince William and Kate have inherited King Charles' former titles.

As well as being the Duke and Duchess of Cambridge, they are now Prince and Princess of Wales, as well as the Duke and Duchess of Cornwall.

Significantly, the Duchy of Cornwall comes with a huge £1.1 billion portfolio of land and various assets across the country.

The estate is around 52,000 hectares (128,000 acres), spans across 20 counties in England and Wales (bizarrely most of it isn't actually in Cornwall) and consists of farmland, parts of Dartmoor national park, cricket grounds, and even a prison.

Prince William and Kate Middleton are now the Prince and Princess of Wales.

Charles was previously the Duke of Cornwall for over five decades, making him the longest-serving Duke of Cornwall in history.

The ownership of the estate paid him £21 million (\$24m) in the last fiscal year.

The King voluntarily paid the top rate of income tax (45 percent) on the property. However, as the duchy is not considered a company according to tax laws, Charles didn't have to pay corporate or capital gains tax.

This has drawn criticism from the public and MPs alike and is particularly controversial as the estate owns land that used to be used for mining, and the duchy owns the mine's mineral rights.

Charles also set up a food company three decades ago, named Duchy Organics, which many argue connects the estate and title with the company. The brand was acquired by Waitrose and is now separate to the Duchy, but the controversy persists.

After acquiring the estate, William will now make all decisions on shaping its future. The new Prince of Wales released a moving tribute to his grandmother the Queen which read in part: *"She was by my side at my happiest moments. And she was by my side during the saddest days of my life. I knew this day would come, but it will be some time before the reality of life without Grannie will truly feel real."*
