

# The Blessed Hope!

***“Looking for that blessed hope, and the glorious appearing of the great God and our Saviour Jesus Christ;” –(Titus 2:13)***

## *Diamond & Nugget #31-D*

Most people today are receiving marketing literature from their telecom provider promoting their “Great Offer”, in my case, I received AT&T’s “Great Offer” \$49<sup>99</sup> a month for AT&T Fixed Wireless Internet. Its not the first piece of marketing advertising I have received. Since AT&T began the push for its role out of its new 5G, I have received seven mailings, each of different design. Interestingly, the term 5G does not appear on any of the ad pieces. I will be calling the Louisville, KY office in the morning to get their explanation of the term “Fixed Wireless Internet”. Not that I do not know what the word ‘fixed’ means, I want to do some investigation of the small print on the advertisement.

We know the promoters of 5G Wi-Fi EMF never reveal that:

- There is NO safe dose of non-ionizing radiation
- Chromosomal mutations are often irreparable
- The effect is cumulative (the more you receive, the worse the effects)
- DNA changes are proven to lead to cancer.

Research shows that one in every 20 Americans has increased sensitivity to radiation. These are people with gene mutations that make them less able to repair x-ray damage to their DNA. Unfortunately, we don't have a quick and easy test to find out exactly who those individuals are.

Unlike some other mutagens, ionizing radiation has access to the genetic molecules of every internal organ, if the organ is within the x-ray beam... and has the chance of inducing damage that defies repair. The non-ionizing radiation once thought to be of little concern may be far more dangerous than initially believed.

Children are also more vulnerable to radiation damage, because they have more dividing cells at any one time.

Most people have forgotten one of the consequences of 9/11 was the airport body scanner. It was only a short while after the scanners were installed before the TSA employees were being diagnosed with cancer. But there's a practical problem, too, even if you don't mind strangers looking at you naked: the scanners expose you to a significant amount of radiation. Your total, lifetime exposure to radiation increases your risk of cancer, and every new exposure should be avoided when possible.

The use of airport scanners is certainly an optional, avoidable use of radiation and a needless addition to our cancer risk.

The pilots' union, Allied Pilots Association, publicly advised its members — who are scanned 2 to 3 times per day on every work day — to opt for private pat-downs instead of the scan... noting that airline pilots in the U.S. already receive higher doses of radiation on-the-job (cosmic radiation) than nearly any other category of worker, including nuclear power plant employees.

As a result of this exposure, some studies of frequent fliers — such as pilots and flight attendants — have elevated risks of certain malignancies.

One study conducted by the California Department of Health compared the cancer death rates of California-based female flight attendants to a control group of females.

They found no increased mortality among flight attendants... but they did find a 30% increased risk of breast cancer and twice the risk of malignant melanoma, according to information distributed by the Association of Flight Attendants. In other words, they get more cancer but they don't die at higher rates. Evidently they're successful at detecting and controlling the cancers their jobs expose them to. Add the excess radiation from airport scanners, and it seems prudent for airline professionals to take precautions.

Many scientists are wondering how the radiation exposure can be as low as the TSA claims. And many have concluded that the answer lies in how the manufacturer and government officials measure the dose. They average the exposure from the beam over the volume of your whole body, which is how scientists measure medical x-ray exposure (which zaps through bone and tissue). However, backscatter beams are different. They skim over your body's surface. Not all scanners are the same. Two types of full-body scanners are deployed nationwide: backscatter and millimeter wave.

Here are their similarities...

- They create black and white images.
- They may detect concealed non-metallic weapons or explosives that wouldn't be picked up by metal detectors.
- Both emit small doses of radiation.

And now for their differences — and this is where we pick up the controversy.

Millimeter wave scanners create a 3-dimensional image by bouncing electromagnetic waves off your body. According to the TSA, they emit about 10,000 times less radio frequency energy than your cell phone... a dose considered very trivial by the scientific community.

Backscatter scanners create a 2-D image by projecting X-ray beams over your body to create a reflection, similar to a sketch. They emit 10 microrem of emission, and are of concern to scientists.

Naturally, the TSA and the Department of Homeland Security maintain that the scanners emit safe levels of radiation... which the former DHS director Janet Napolitano says is the equivalent of the cosmic radiation you get in about 2 minutes of flying time.

The National Council on Radiation Protection and Measurement claims that an individual would need to be scanned 100 times for this dose to be considered worrisome. One thousand backscatter scans would be equivalent to one X-ray. What is as common as their remarks that EMF is harmless is the fact that all the different applications of Radar, i.e., radar speed detectors, commercial and military pilots, radar equipment, active denial equipment, are well-known to cause cancer.

Dr. John W. Sedat, Professor Emeritus in Biochemistry and Biophysics at the University of California, San Francisco, with expertise in imaging and a member of the National Academy of Science (NAS) — along with three colleagues, sent a letter of concern to President Obama's Assistant for Science and Technology on April 6, 2010. Their concern a decade ago has met with the usual ho hum yawn yawn!

His colleagues included Dr. Marc Shuman, an internationally known and respected cancer expert and UCSF professor, and Drs. David Agard and Robert Stroud, UCSF Professors, X-ray crystallographers, imaging experts and NAS members.

They expressed concern that since the dose is delivered primarily to the skin and adjacent tissue — and this is a tiny fraction of total body weight — the dose to your skin is now dangerously high... 10 to 20 times higher than the manufacturer's calculations.

Sedat's group also calls the TSA's comparison to cosmic radiation misleading... because those higher X-ray energies and health consequences are appropriately understood in terms of whole body volume dose.

Other points brought up by Sedat's group include:

- Independent safety studies do not appear to exist. The quantity of radiation exposure has not been assessed. Instead, only an indirect test based on whole body exposure was made.
- The danger is different -- and higher — for the large percentage of travelers over age 65, who are especially at risk from the mutagenic effects of X-rays (meaning the radiation causes gene mutations -- more on this risk in a moment...)
- A fraction of the female population is particularly sensitive to mutation-provoking radiation leading to breast cancer. Because these women have defects in their DNA repair mechanisms, they're particularly prone to cancer.
- Immune-compromised individuals — those with HIV or cancer -- are likely to be at higher risk for cancer by this high skin radiation.
- Risks to children and adolescents do not appear to have been fully studied. Ditto for pregnant women.
- Because of the testicles' proximity to the skin, this tissue is at risk for sperm mutation, presumably contributing to birth defects in the men's offspring.

- Effects of this radiation on the cornea and thymus do not appear to have been evaluated.

Their letter concluded with the following statement:

We would like to put our current concerns into perspective. As longstanding UCSF scientists and physicians, we have witnessed critical errors in decisions that have seriously affected the health of thousands of people in the United States. These unfortunate errors were made because of the failure to recognize potential adverse outcomes of decisions made at the federal level. Crises create a sense of urgency that frequently leads to hasty decisions where unintended consequences are not recognized. Examples include the failure of the CDC to recognize the risk of blood transfusions in the early stages of the AIDS epidemic, approval of drugs and devices by the FDA without sufficient review, and improper standards set by the EPA, to name a few.

Similarly, there has not been sufficient review of the intermediate and long-term effects of radiation exposure associated with airport scanners. There is good reason to believe that these scanners will increase the risk of cancer to children and other vulnerable populations. We are unanimous in believing that the potential health consequences need to be rigorously studied before these scanners are adopted. Modifications that reduce radiation exposure need to be explored as soon as possible.

Meanwhile, the TSA seemingly marches on with its agenda. The single-minded bullying and power-mongering of these big bureaucracies is a never ending source of wonder to me. I should be used to it at my age, but they always manage to surprise me by taking the oppression up a notch. WebMD a few years ago predicted that cancer rates would rise by 90% by 2030. In a previous article I noted the public health community predicted that cancer would rise to 1 out of ever 2 deaths in the near future.

The American public in particular, and the world as a whole, have been misled to believe that radiation, the non-ionizing kind, is harmless. As this information shows, even the ionizing kind has been dismissed as “trivial” or “minor”. The fact is both are dangerous. Its invisibility is perhaps the greatest thing going for those launching the 5G technologies debut to occur in late October, 2020.

I pointed out in a previous segment that the telecoms have a \$2.7-Trillion dollar investment, and they are not going to permit any one, or any group, or government to tell them to Stop! The date of October 28<sup>th</sup> is significant in several ways. All efforts to stop 5G role out had a deadline of appeal. **This deadline is October 28, 2020! This date happens to have huge Biblical significance,** which I will come back to shortly.

## **Danger**

**Here is why 5G built into our electrical system is so dangerous:**

- 4G is 7GHZ or less
- 4.5G (4G Plus) is 7-12 GHZ (typical of TSA airport checked bag scanner)

- 5G is 15-300 GHZ (this is determined by modulation of the controls)
- At 10 GHZ the human immune system starts to falter, sleep is impaired and healing is minimized
- At 10-30 GHZ, disorientation sets in, feeling tired, drowsy, and weak, trouble sleeping, dry mouth, dehydration, poor cell turnover and lowered hemoglobin, depression, anxiety and other symptoms of radiation poisoning/ microwave syndrome.
- At 35 GHZ the oxygen molecules in the air and our bodies begin to spin, making it impossible for our hemoglobin to uptake oxygen causing hypoxia or asphyxiation. 75% of healthy people will die in the first 2-3 days of being exposed to 35 GHZ consistently. The healthiest will die within a week.
- At 50 GHZ, nothing survives, including birds, bees, trees etc.
- At 60 GHZ everything goes up in flames (similar to the wildfires in the US right now in 5G areas)
- They are currently experimenting daily with frequency changes (My body feels every shift) to normalize people's symptoms and exposures so no one notices what is happening. They are experimenting to see how high they can go before people start noticing.
- Many areas where the map shows only 4G or even 3G and yet they have 5G frequencies already pulsing.
- They increase the frequencies at night so people sleep poorly, causing a weakened society, and lower it during the morning, increasing again in the afternoon.
- 5G is the most dangerous large-scale and immediate-acting bioweapon in all of history. It was originally developed as a weapons system for the military.
- 5G is the equivalent of having a loaded gun pointed to every single one of our heads, no matter where you live, where you work, what your race, what your social status or how much money or skills you have, you are the mercy of that dial.
- If you have electricity right now, you can be killed in an instant if they blast the frequency through your home at anything over 35 GHZ.

**This is the genocide agenda:**

- All 5G infrastructure is already in place. Look at receivers already placed on your street lights, smart meters, your electrical outlets and appliances, the towers themselves, rooftop receivers, etc.
- Next is poisoning people with aerosols, and toxic food and water to falsify the second wave.
- Once people are in lockdown, they cannot leave their homes these areas are then easy 5G kill zones.
- The government can choose to increase the frequency anytime they decide and depopulate as much as they want, in any chosen area.
- Unless you are very far off-grid, without any electricity and no neighbors who have it either, you are, as we are, currently sitting in a potential kill zone.
- I have tried reaching out to colleagues, health pioneers and other popular leaders in the natural movement but everyone is afraid to share this as they feel they will be killed immediately and censored to block the sharing of this info.

In Part 31-C, I noted the slip of the tongue made by Secretary of State, Mike Pompeo, and what was taking place when the fake virus was alleged to be released in Wuhan, China. This story had to be shared in segments in order that the reader could grasp the full impact of what is just over four weeks from major genocidal depopulation of the world.

The Deagel Report since 2014 was reporting that 225 million people would be gone from the U.S. by 2025. If you knew that military authors such as Tom Clancy use the mysterious website called Deagel.com, which was recently linked to the depopulation agenda in America, to gather information for their books, would it quickly become easier to prove Deagel's legitimacy as an agent with knowledge of future mass death in America? The linked report excerpted from Dave Hodges told us back in 2014 all we needed to know about Deagel. With Deagel now saying their website was HACKED, leading to the skewed population data in America,

Just who is Deagle? The power and influence of the corporation that you never heard of is staggering. This is the modern day Zapata Oil, which was a CIA front corporation run by George H. W. Bush which in turn facilitated much of the Air America "drugs for guns" program in Latin America.

Deagel is the same exact kind of organization as Zapata Oil. Deagel ran guns through the Ambassador Chris Stevens and subsequently delivered them al-Qaeda in Libya and in Syria at the time of Steven's death. Deagel was intimately involved in Benghazi in ways that will be revealed in later article.

Deagel is a group that gets their hands dirty and they play both sides of the fence. They do business with the Russian Defense Procurement Agency, but they are largely an American contractor with ties into the U.S. Navy, the NSA and the CIA, through Stratfor. If anyone wanted to make the case that I have the "Bastard Banksters from Basel" control both sides of the coming WW III for fun and profit, the data trail of Deagel exemplifies this point. Deagel is not the focus of my series other than to confirm the existence of the elimination of 225 million people was planned at least ten years ago, and probably much earlier. Here is a link to Deagel's page:

<https://www.deagel.com/country/United%20States%20of%20America>

Now, why is this so important? In part #31-C, I dealt with the faux pau (blunder) of Mike Pompeo, pointing out this ["we're in a live exercise here"] was really a Beta-test for the coming world-wide full live mode of 5G EMF wireless communications. I probably should do another couple segments on this because so few seem to grasp what is taking place, but I am going to wind it up with this segment. The importance of the issue eugenics and depopulations has been front and center for half a century. The UN did not have your interests in its agenda when it commissioned the Club of Rome in 1968. I have followed the issue of the Georgia Guide Stones and its planned goal of keeping humanity to 500,000,000 million. The search for Silent Weapons for a Quiet Wars commenced by 1972, following the publishing of *'The Population Bomb'* in 1967.

All the rhetoric and bantering between China's leaders and the U.S. is exactly that. There is no intent of going to war between these two world economies. This is fear porn out there intended to keep the world off balance and confused. Think of it as the Hegelian Dialectic at work. I had an interesting insight the other day: the pandemic security theater to which we're being subjected; the authoritarian lockdowns, the mask mandates, the closed businesses that have bankrupted millions of people - all of this is designed with the purpose of discrediting the whole idea of representative government. NGO's like the CDC and WHO are running the governments of the world!

If the people you elect and the government to which you pay taxes will so unconcerned bankrupt you and heckle you about wearing masks, your eventual reaction will be to "burn it down," as BLM and Antifa are wont to do. It looks like all of us, on every side are being manipulated toward this outcome.

The "solution" is a purely AI-driven technocratic order, where everyone and everything is tokenized and put on the Internet of Things, with as many human decision-makers as possible removed from the equation. An important function of this network would be to disable the ability of dissenters to financially transact, effectively canceling them, as described by Aaron Russo, from a conversation he had with Nick Rockefeller in the late 1990s. The content of that conversation can be found in the movie *"From Freedom to Fascism"*. Use your favorite search engine and you can see what has been in the works for decades.

Still, one might understand the appeal of a faceless but efficient, automated government, if we could be spared having to countenance the Nancy Pelosi, the Adam Schiffs and the Ilhan Omars of the world perverting the law; the Gavin Newsoms and the Gretchen Whitmers keeping us indefinitely unemployed and the Bill DeBlasios and the Jenny Durkans inciting felons by dismantling the police.

We know that Covid-19 is a highly-scripted Globalist exercise, because Mike Pompeo accidentally admitted as much last March and also because it's evident that governments and media around the world are all following the same script promoted by Internationalist entities, like the UN, the World Economic Forum and the Rockefeller Foundation.

In May 2010, the Rockefeller Foundation published "**Scenarios for the Future of Technology and International Development**", in which they proposed various scenarios that would put enormous stress on society in order to gauge the response and therefore, to anticipate future trends in technology and development.

The first scenario, entitled, "**Lock Step**", describes a world of total government control during a pandemic that would allow national leaders to flex their authority and impose airtight rules and restrictions that would remain after the pandemic faded.

Reading what was written ten years ago is like reading the script of what happened in 2020:

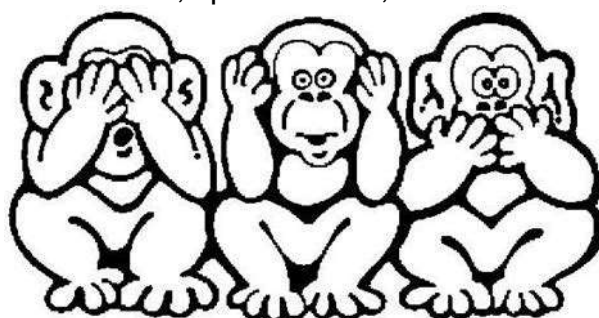

*"At first, the notion of a more controlled world gained wide acceptance and approval. Citizens willingly gave up some of their sovereignty — and their privacy — to more paternalistic states in exchange for greater safety and stability. Citizens were more tolerant, and even eager, for top-down direction and oversight, and national leaders had more latitude to impose order in the ways they saw fit. In developed countries, this heightened oversight took many forms: biometric IDs for all citizens, for example, and tighter regulation of key industries whose stability was deemed vital to national interests."*

Toward the end of the Lock Step scenario, something plays out, which may be the actual intended outcome of this whole exercise:

*"Protestors in Nigeria brought down the government, fed up with the entrenched cronyism and corruption. Even those who liked the greater stability and predictability of this world began to grow uncomfortable and constrained by so many tight rules and by the strictness of national boundaries."*

What I am saying here by implication, China is very much part of a massive global depopulation program of the Illuminati New World Order. On October 28<sup>th</sup>, 2020, when the global 5G network goes live ["modulated" turned up from its relatively benign 10-Ghz to 60-Gigahertz], hundreds of millions of people will be put down inside five to ten seconds! The Beta-test run worked perfectly as planned! Before you dismiss my premise, you should go back a number of years when the 'Earth Summit' was held.

105 countries signed on in support of the collective efforts to reduce the world's population. The leaders of these 105 countries knew well in advance of the Corona virus plan-demic what was coming! They knew of the larger plan but were like the three monkeys, "see no evil, hear no evil, speak no evil,"

**SEE NO EVIL. HEAR NO EVIL. SPEAK NO EVIL.**

You need to wake up to the fact that every one of those leaders of the 105 signatory nations were committed to push the so-called Corona virus and its larger plan to reduce the population of their corresponding country. The master plan behind all of this is 5G Wi-Fi plan to implement the "Silent Weapon for a Silent War" in the form of subsequent Chemtrail spraying of pathogens which when activated through the 5G EMF 60-Gigahertz, will kill hundreds of millions of people without their knowledge and awareness. The world leaders can claim plausible deniability, like the three monkeys, which enable them to control the "Fear" narrative that comes with the herd!

If you do not know the name Bill Cooper, then it is unlikely you know anything about the minds and plans of the collective elite. *'Silent Weapons for a Quiet War'*, dated May 1979, was allegedly found on July 7, 1986, by the late Bill Cooper, in an IBM copier that had been purchased at a surplus sale. It is believed by many researchers, including Cooper, who was later assassinated by police in front of his home on June 11, 2001, that it is the doctrine adopted by the Policy Committee of the Bilderberg Group during its first known meeting in 1954. I have Bill Cooper's book *'Behold a Pale Horse'* published back in 1991. You can read it on the Internet, for free. Bill Cooper, a former United States Naval Intelligence Briefing Team member, revealed information that remains hidden from the public eye to this day. This information has been kept in **Top Secret** government files since the 1940s. Those who email me and reflect their skepticism of what I share despite their lack of knowledge impacts their belief or challenge my knowledge, I respond by asking them if they know anything of Bill Cooper?

His audiences heard the truth unfolded as he writes about the assassination of John F. Kennedy, the war on drugs, the Secret Government and UFOs. Bill was a lucid, rational and powerful speaker whose intent was to inform and to empower his audience. Standing room only was normal at his venues. His presentation and information transcended partisan affiliations as he clearly addresses issues in a way that has a striking impact on listeners of all backgrounds and interests. He had spoken to many groups throughout the United States and appeared regularly on many radio talk shows and on television. In 1988 Bill decided to "talk" due to events then taking place worldwide, events which he had seen plans for back in the early '70s.

Since Bill began "talking," he correctly predicted the lowering of the Iron Curtain, the fall of the Berlin Wall and the invasion of Panama. All Bill's predictions were on record well before the events occurred. Bill was not a psychic. His information came from Top Secret documents that he read while with the Intelligence Briefing Team and from over 17 years of thorough research. Bill Cooper was the world's leading expert on UFOs. The actual document found on that surplus copier, ***"Silent Weapons for Quiet Wars"*** was published in a small book form and can be purchased from Amazon. I began to listen to Bill Cooper back in 1989. As to the UFO's, they are U.S. assets, not aliens from another world!

The Biblical narrative of **Noah and His Ark, 5G Wi-Fi EMF, and the Rapture** are so intertwined that in order to reveal the connection, it was necessary to deal with each of these apart from the other before tying them together in the larger plan to kill much of humanity. The Biblical Old Testament **Exodus** event serves as God's motif for the New Testament era in God's deliverance before executing judgment on an unbelieving and disobedient world, along with God's bringing His Chosen ones to repentance. Keep in mind that God acted at the Red Sea in what would have to be considered a crisis juncture in the life of the Israelites fleeing Egypt! God's timing was executed perfectly, He snatched defeat from the jaws of victory of Satan!

Whether in war, sports, or any other endeavor, we always love the happy ending sometimes known as "snatching victory from the jaws of defeat." We root for the

underdog and are thrilled when he or she prevails against all odds, often at the very last possible moment, triumphing against the oppressor or against the ringer who was a shoe-in to win.

In Scripture, examples are abundant like David as a youth felling the giant Goliath -(1<sup>st</sup> Samuel 17), Gideon defeating the mighty Midianite armies with 300 men -(Judges 7); and the repentant thief on the cross. Although the thief was no doubt a “loser” and a criminal, justly condemned, by his own admission, to an agonizing death, he had a totally unexpected blissful ending. Rather than spending eternity in hell to suffer everlasting punishment for his sins, he recognized Jesus as his Lord. Because of his faith and God’s grace, Jesus promised him that he would be with Him in Paradise that very day -(Luke 23:40-43).

This story in and of itself proves that we are saved not by our own merit or works, which are like filthy rags -(Isaiah 64:6) in God’s sight, but only by God’s grace through our faith. The thief had no time to do any good works or even to be baptized, yet Christ pardoned him immediately and accepted him into His Kingdom. Numerous other passages support salvation by grace, not works -(2<sup>nd</sup> Timothy 1:9; Acts 15:11; Ephesians 2:5-9).

No doubt the crowd that day could not appreciate the thief’s story, much less its significance. Crosses were tall structures erected high on the hillside, where they would serve as a severe warning to all who might be tempted to break the law. So when the unrepentant thief mocked Jesus and the other thief acknowledged Him as Lord, the onlookers may not have heard their faint cries, or their feeble, dying gasps. If they did, they probably dismissed the thief’s prayer and Christ’s promise as gibberish from oxygen-deprived brains.

Rather, the crowd probably thought that Barabbas was the one who had snatched victory from the jaws of defeat. Also a hardened criminal and even a murderer, he escaped a gruesome death when the crowd’s hatred for Jesus demanded that Pilate release Barabbas instead, as it was the custom at Passover for one on Death Row to be pardoned -(Mark 15:7-15; Luke 23:17-25).

As the saying goes, God is not so much interested in our location as in our direction. No depth of depravity is too low for His grace to reach -(Psalm 139:8), and no pinnacle of our own achievement is so lofty that we do not need His grace even to take our very next breath -(2 Samuel 1:19,25; John 15:5). So in God’s eyes, it is far better to be the thief on the cross who turned away from his sin and to Christ, than to be a privileged king who drifted away from God to false idols.

The devil was so overpowered by his own evil attributes of hate and malice, that, when given an opportunity to slay Christ - Satan could not control himself; he could not hold himself back from doing that which he knew would result in his own defeat and death. Satan’s first mistake was rebelling against God in heaven. His other mistake was killing Christ on earth. Satan knew at that point he was finished!

From my vantage point, and understanding of God's plan to bring glory to Himself, as noted in Scripture, I am seeing the same evil agenda being played out on the global stage as we watch the seconds click off. 35 [7 x 5] verses address this core message!

In the previous segment, Part 31-C, I noted the events that occurred in the history of the Israelites, during the month of Heshvan. I am highlighting the events of what brings this series to its high point. Note the date which Noah and family entered the Ark of their salvation. I think you would agree with me that this was God's **Moedim** with Noah and family; a reflection on God's Grace bestowed on one who found righteousness in Noah and who walked with God –(Genesis 6:9).

**10th**

[Birth](#) of Gad in 2198am. [Midrash Tadshei](#)

**11th**

Methuselah died. *Yalkut Shimoni 56, Sanhedrin 108b*

[Noah](#), his wife, [three](#) sons, and their wives enter the ark to [mourn](#) for Methuselah.

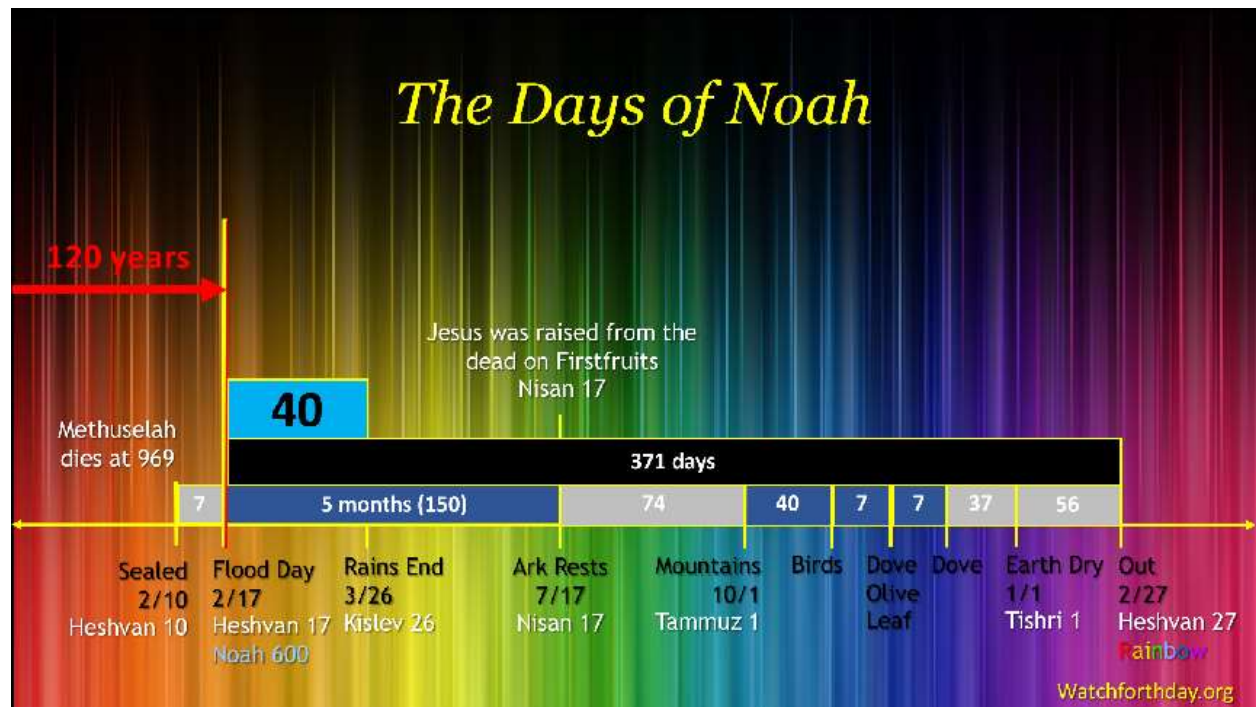

Some see an apparent problem: In reading Genesis 7 it may appear that the Lord told Noah to enter the ark seven days before the flood began (verses 1-4), but verse 13 seems to indicate that Noah and his family entered the ark on the very day the the flood began.

In verse 1 God invites them to come and enter. In verse 4 they are told that they have seven days to do this. [Usually it takes us at least several hours to pack for a trip. It is

not unreasonable that it took Noah and his family a week to pack an ark and make final preparations.]

In verse 10 we learn that the flood began in seven days.

Verse 13 says that in that very day (the day of the flood) Noah and his family entered. The verb "**entered**" is pluperfect: "**had come.**" According to Hebrew language experts Keil and Delitzsch, "*the idea is not that Noah, with his family and all the animals, entered the ark on the very day on which the rain began, but that on that day he had entered, had completed the entering, which occupied the seven days between the giving of the command (vs. 4) and the commencement of the flood (v.10).*" Leopold agrees and says that Noah would have seven days to complete preparations: "*The perfect tense 'came' points to the moment when their entering was an accomplished fact: 'had come' is a permissible rendering.*"

The chart above is from Dan Matson's great site, Watchfortheday.org. I have not covered all the many symbols and types that make the Noah's Ark narrative to strengthen the case, that would have required a couple more segments. In the previous segments of this series I hinted of the identity of a date that coincidentally coalesces with the events of **Noah** and the **Ark**, with **5G EMF**, the contemporary equivalent of the first **Exodus** event, and the **Rapture**. Heretofore, what event could rival the Genesis Exodus event in such magnitude?

Dan Matson has previously done several charts in the past with this date of Heshvan 10. As most of you know, Jewish historical dates float on their calendar in such a way that repeated occurrences can span a two-month time period when converted to our

Gregorian calendar. I have purchased Dan's two books in years past, they are a wealth of information for anyone wanting to be familiar with the End Times events. The above chart illustrating the Days of Noah are pregnant with huge potential. Note the date on the chart where Jesus was raised from the tomb on Nisan 17, it was also the date that the Ark rested on the same day of Nisan 17. A few years ago I did an article entitled "God's Special Day."

The Bible records many miracles occurring on Nisan 17. No other day except Passover is mentioned as many times in the Bible for major Hebrew events. According to the Torah and traditional Jewish interpretation, other events that occurred on Nisan 17 include the following:

- Nisan 17, Noah's Ark safely rested on Mt. Ararat -(Genesis 8:4) Note that the seventh month was later designated as the first month at the time of the Exodus - (Exodus 12:2).
- Nisan 17, Hebrews entered Egypt -(Exodus 12:40-41) 430 years before deliverance.
- Nisan 17, Moses led the Israelites through the Parting of the Red Sea -(Exodus 3:18, 5:3).
- Nisan 17, Israel entered and ate the first fruit of the Promised Land -(Joshua 5:10-12).
- Nisan 17, The cleansing of the Temple by Hezekiah (eight hundred years after entering the promised land. -(2nd Chronicles 29:1-28).
- Nisan 17, Queen Esther saved the Jews from Elimination -(Esther 3:12, 5:1).
- Nisan 17, The Resurrection of Messiah (think about it).

The odds of just two of these events both happening accidentally on the same day of the Hebrew year (360 days) are one in 129,600.

The odds of these particular seven events all happening coincidentally on the same day of the Hebrew year are **One in 783 quadrillion, 864 trillion, 876 Billion, 960 Million or one chance in (783,864,876,960,000,000).**

This number is determined by multiplying the seven major events occurring on the same day of the Hebrew year. In mathematics this is known as compound probability. In the realm of science and advanced mathematics, any number larger than one in 150,000,000,000-billion is considered to be the result of intelligent design and therefore impossible as the result of coincidence or random chance occurrence.

From the beginning man was a recipient of God's grace. The Bible mentions 5 specific people grace was given (the number "5" is the number of grace) to in the Old Testament Noah -(Genesis. 6:8); Abraham -(Genesis 18:3; 24:27); Lot -(Genesis 19:19); Jacob - (Genesis 32:10; 33:5); and Joseph -(Genesis 39:21; 43:29). Noah was saved before he ever built the ark. He had "found grace in the eyes of the Lord" -(Genesis 6:8). Noah had no actual evidence of an approaching flood since no one had ever seen it rain or flood, but he believed God. And still he built the Ark by God's instructions, lived through

men mocking him and was saved from the deluge with his family -(Genesis 6:13-22; 7:23). That is grace that God bestows on those who obey Him (faith) even though they may not understand what is taking place at the time.

**Heshvan 10 occurs on October 28, 2020**, just one month away! Now, what do we have here is the potential of another Exodus event, with God. Keep in mind that God acted at the Red Sea in what would have to be considered a crisis juncture in the life of the Israelites fleeing Egypt! God's timing was excuted perfectly, He snatched defeat from the jaws of victory for Satan! But what does the roll out of 5G MEF wireless play in this picture? If you have forgotten what I said a couple segments ago, the global roll out of 5G goes live globally on October 28, 2020! The world's elite has used the common cold masked with the image of something akin to the Spanish Flu as an instrument of fear during this period the telecoms were readying their "weapons" system for executing the billions of "useless" eaters as Dr. Henry Kissinger has referred us to as being. 5G as a military weapons system has been around since the 1950s. The cell phone became their device for delivering the Silent Weapon for a Quiet War!

Some in the know refer to this grand plan of genocide as the “frog in the pot of boiling water” scenario, where the frog is placed into a pot of water and the heat is gradually

turned higher and higher and the frog is paying no attention to the rising temperature until it is too late to jump out, and the frog then dies.

The source of the below 5G Strategy Plan is from a former insider, who for obvious reasons, is on the run. The plan is for another fear pandemic, an even harder “lock down” than that which occurred. Spain has already instituted a second lock down, and the UK will shortly, with the U.S. and Canada to follow. Australia and New Zealand went full Fascist police state three weeks ago.

## **5G Strategy and Agenda**

### **Smart Meters**

NOTE: Average Smart Meter (4G) is ~7 gigahertz. Airport security scanning machines are ~10 gigahertz. [Smart Meters unlike cell towers are not installed nationwide. There are 300,000 cell towers across the country.]

#### **Day 1 (October 28th)**

Meter 10 gigahertz – People are not noticing that their smart meter has been slightly cranked up.

#### **Day 7 (November 4th)**

Meter 20 gigahertz – Some people are now noticing change in frequency but do nothing.

#### **Day 10 (November 7th)**

Meter 35 gigahertz – At this frequency, electrons on oxygen are spinning and people begin to feel symptoms of oxygen deprivation (shortness of breath, dizziness, tiredness, and difficulty in breathing) but are not leaving “kill” zone. In all probability the media is telling them they have the corona virus.

#### **Day 10-14 (November 7<sup>th</sup> thru 11<sup>th</sup>)**

Meter 35 gigahertz – Extreme symptoms of oxygen deprivation. People are rushing to hospitals. By November 11<sup>th</sup>, the majority (~75%) of people are dead.

#### **Day 15-18 (November 12<sup>th</sup> thru 15<sup>th</sup>)**

Meters 50 gigahertz. By Day 16 ALL LIFE in the “kill” zone is dead. Inside “kill” zone there are “pockets” of “safe” zones. Deep inside the “safe” zones, life is still surviving. (People living on the fringes of the “safe” zone are now dead.) People living deep inside the “safe” zones, may not know it, but they are now trapped inside the “kill” zone.

#### **Day 19 (November 16<sup>th</sup>)**

“Kill” zone meters cranked up to 60 gigahertz. There are people still alive deep inside the “safe” zones inside the “kill” zone. They believe they are still safe. The 60 gigahertz frequency surging through the “kill” zone smart meters causes mass explosions and all the houses and buildings in the “kill” zone burst into flames and are reduced to ashes.

People deep inside the “safe” zones are absolutely terrorized (planned agenda) out of their wits as they witness the “kill” zone holocaust.

### **Day 20-21**

(See Cell Towers Agenda for how people in the “safe” zones die.)  
Go to Tower Agenda (next page)

## **Cell Towers**

### **Day 1-9 (October 28<sup>th</sup> thru November 6<sup>th</sup>)**

Cell towers in the “kill” zones 10 gigahertz. People are experiencing effects, for example, ringing in ears, headaches and other signs of the 4G. Some may complain but the majority of people will go on with their daily lives. Cell towers in the “safe” zones 4G (7 gigahertz).

### **Day 10 (November 7<sup>th</sup>)**

Cell towers in the “kill” zone 35 gigahertz – At 35 gigahertz, electrons on oxygen are spinning and people begin to feel symptoms of oxygen deprivation (shortness of breath, dizziness, tiredness, and difficulty in breathing) but are not leaving “kill” zone. In all probability the media is telling them they have the corona virus. Cell towers in the “safe” zones 4G (~7 gigahertz).

### **Day 10-14 (November 7<sup>th</sup> thru 11<sup>th</sup>)**

Cell towers in “kill” zone are 35 gigahertz – Extreme symptoms of oxygen deprivation. People are rushing to hospitals. By November 11<sup>th</sup>, ~75% of people are dead. Cell towers in the “safe” zones 4G (~7 gigahertz).

### **Day 15-17 (November 12<sup>th</sup> thru 14<sup>th</sup>)**

Day 15, cell towers in the “kill” zone 50 gigahertz. By Day 16, ALL LIFE in the “kill” zone is dead. Inside “kill” zone there are “pockets” of “safe” zones. Deep inside the “safe” zones, people are still alive. (People living on the fringes of the “safe” zone are dead.) People who are alive deep inside the “safe” zones do not know they are now trapped inside the “safe” zone. Cell towers in the “safe” zones still 4G (~7 gigahertz).

### **Day 18-21 (November 15<sup>th</sup> thru 18<sup>th</sup>)**

Day 18, “kill” zone towers cranked up to 60 gigahertz. Absolutely nothing will be able to survive in the “kill” zone now. People are still alive deep inside the “safe” zones. They believe they are safe. However, they begin to experience oxygen deprivation from the effect of the “kill” zone towers’ 60 gigahertz frequency. “Safe” zone towers are still at 4G (~7 gigahertz).

Day 19 the same day “safe” zone people witness “kill” zone holocaust, “safe” zone towers are cranked up to 35 gigahertz. Terrorized and traumatized, “safe” zone people

are feeling the full effect of oxygen deprivation. People panic as they realize they are trapped in a “kill” zone. Some try to escape out of the “kill” zone, only to be “cooked” alive by the “kill” zone towers’ 60 gigahertz frequency, an even more horrible and painful death than if they had stayed.

Day 20, painfully suffering from severe oxygen deprivation, the few remaining “safe” zone people are filled with anxiety and despair, as they realize they are dying and will share the same fate as those who were incinerated in the “kill” zone on Day 19th.

Day 21, ALL LIFE in the entire “kill” zone is dead. The “safe” zone meters are cranked up to 60 gigahertz. All houses and buildings in the “safe” zone immediately explode, ignite and burn and are reduced to ashes.

### **Day 22-50 (29 days)**

Day 22, cell towers in the “kill” zone are cranking out 60 gigahertz frequency. Soon, all plant life in the “kill” zone will be “cooked” and dead. Anyone attempting to enter the “kill” zone will die within two days.

Day 50, the cell towers in the “kill” zone are shut down. Not until **one year** has passed will the “kill” zone have enough breathable oxygen to sustain life.

My inclination is simply to say, we probably have just a month to “get in the Ark” day! From what I know about 5G EMF it will likely be an Extinction Level Event, and one of the best reasons for you to turn to the Lord Jesus Christ and ask for His forgiveness and offer of a pardon that only He can provide.

Blessings,
