

THE DOCTORS ARE IN BIG TROUBLE

Posted on January 30, 2023 by State of the Nation

Each and every doctor, who administered the extremely dangerous and deadly Covid vaccines, needs to be sued out of their medical practices before they are criminally prosecuted to the fullest extent of the law for conspiring to commit genocide against the American people.

KEY POINT: Operation Warp Speed was purposefully run by the Pentagon after being planned as a DoD fake emergency response to the COVID-19 bioweapon which was actually created by an ultra-secret joint US-UK-Israel project not too unlike the Manhattan Project (e.g. DARPA was the US arm). Physicians everywhere were then conscripted to the front lines of this fabricated bio-war after the stealthily bioengineered 'SARS-CoV-2' (it's not a coronavirus) was first launched by the U.S. Armed Forces at

the 2019 Military World Games in Wuhan, China from the 18th through the 27th of October.

There should be no question about the dire necessity of the harsh penalty stated above for doctors who killed and injured their innocent patients. For all physicians across the USA, who chose to obey their Big Pharma and Big Government masters before they served the needs of their trusting patients, are guilty of nothing short of mass murder.

Truly, the entire American Healthcare System is culpable of perpetrating the most complex and convoluted criminal conspiracy — EVER — to both murder and main the U.S. citizenry. Physicians in every major medical center and community hospital, urgent care facility and walk-in clinic, doctor's office and participating pharmacy carried out this massacre by weaponized Covid injections with seeming impunity.

Not only was this crime spree executed with extraordinary premeditation, speed and efficiency, it has been remarkably covered up by many institutional co-conspirators throughout the Mainstream Media, Big Social Media and Big Tech. In point of fact, the cover-up of this ongoing genocide has been so effective that the "family doctor" is not even yet suspected of being the primary hitman for the all-powerful *Medical Mafia*.

Much of Corporate America colluded with doctors everywhere to inject the lethal Covid 'vaccines' into their employees as did most colleges, private universities and public university systems. Likewise, virtually every major NGO throughout civil society coordinated with the local medical community to ensure that every employee and volunteer was jabbed, willingly or unwillingly.

The profound level of betrayal committed by medical professionals nationwide through the administration of the Covid killshots and clotshots is such that only swift and severe justice is now in order. Having opted to take the unconscionable financial incentives for injecting the patently poisonous shots, these doctors must now be held fully responsible for their odious wrongdoings and egregious malpractice.

Because of the sheer enormity and gravity of this killshot crime wave, every collaborating medical doctor is now vulnerable to the serious retribution, particularly from their victims. In some places around the world, vigilante justice has already been exacted and with gruesome effect.

Surely, both the Criminal and Civil Justice Systems will soon be overwhelmed, if not paralyzed altogether, by the profusion of future criminal prosecutions and civil lawsuits. And, anyone who points to the illicit legislation that was unconstitutionally passed by the US Congress known as the PREP Act, which granted total immunity from liability "*if something unintentionally goes wrong*" with the Covid 'vaccines', should be aware of this ruling handed down by the US Supreme Court in [UNITED STATES v. THROCKMORTON](#).

To paraphrase that landmark SCOTUS decision, particularly where it concerns the administration of an injurious 'vaccine' by a physician: **FRAUD VITIATES EVERYTHING**. Hence, any doctor or physician who participates in such a harmful fraud can be similarly held liable for all injuries sustained by their victims. Both the 'vaccine' companies and the vaccinating medical staffs are fully responsible for all of the compensatory and punitive damages awarded under the law.

Conclusion

In light of the easily accessible VAERS data, it should have been apparent to every doctor that they were perpetrating an extremely dangerous series of vaccinations which would inflict serious vaccine-induced injuries or, much worse, bring about a vaccine-induced death (aka homicide).

Ignorance of the law, any legitimate and necessary law, is never a justifiable excuse for breaking it. And, the greater the harm caused by transgressing certain laws, the greater the consequences will be.

In other words, because physicians across America knowingly chose to remain in a state of willful ignorance about the extreme risks and dangers associated with the highly experimental EUA Covid shots, they unwisely exposed themselves to the punishments commensurate with such an unparalleled capital crime spree.

What else can be said about the inevitable fate of those countless offending doctors who profoundly violated their Hippocratic Oath except:

"If you can't do the time, don't do the crime."
