

The Hidden Name of The Creator in Your DNA

Part 2

After two years of reading, studying, analyzing the larger issue of Covid, some months ago, I came to the conclusion that Covid-19 was a mixed bag of tricks; it was first a “cover” story for a global experiment to be tested on human guinea pigs of the various elements that will soon make up the ultimate cyborg specimen, that of being of a half human, half artificial intelligence. The other overarching issue in their bag of tricks is to transition from sovereign states to the global New World Order.

Covid became like yelling “Fire” in a crowded movie theater. Fear is one of the two major psychological motivators. The other is “Greed” but in this case, Covid was meant to scatter the sheeple and frighten them into doing something that they would not do otherwise.

No person in their right mind would volunteer to be a test subject for any of these elements found in the “gene” therapy “delivery system” as Pfizer calls it in their own literature. All are known to be toxic, i.e., graphene oxide, sProtein (PEG), Polysorbate 80, and the newest find, the Hydra Vulgaris. Whether one was to inhale, ingest, or inject any of these toxins, death is the ultimate outcome!

The planners behind this massive experiment simply engineered the common cold virus using CRISPR technology to insert 18 elements of the HIV1 genome (92% of the viral payload of full blown AIDS) and 4 elements of SARS2. With the help of the CCP, the U.S. agencies like DARPA, CIA, NIH, at some point formulated a plan to launch a novel rogue virus with the WHO’s blessings to frighten the world that “a novel, never before known virus was on the loose” and as Bill Gates told the media that 65 million would die. What an idea to get volunteers for your global experiment?

Dr. Vladimir Zelenko, nominated for The Nobel Peace Prize for his COVID-19 peer reviewed work has accumulated over 100 citations. Regarded as a “white hat” “David vs. Goliath”, in battling against global medical tyranny and genocide he took to Gab to reveal the dark forces behind the fake pandemic. He did an interview with X22 web page on October 29th, 2021.

Many of us older, independent researchers who have followed the machinations of the deep state for decades saw the evilness of the eugenics policy long ago when the sold out UN pursued man-made global warming as a devilish path to mass depopulation. If you go to my web page, you will find that I have written at least 23 specific segments on a series **“Depopulation, the #1 Global Issue Since 1968”**.

Thanks to climate science colleague, Dr. Tim Ball and others, the people mostly saw through that [Malthusian fraud](#) and **Dr. Ball won a multi-million-dollar judgment against UN climate fraudster “Dr.” Michael E Mann in the “science trial of the century.”**

The slimy coward, Michael Mann, still hasn’t ponied up. Instead, he ran away to Australia to dodge debt recovery.

Since Tim Ball's 2019 court room triumph, Vladimir Zelenko has emerged as the new science champion of the people. Dr. Zelenko's words sagely echo those of the Canadian climatologist. Both these greats of contemporary science proudly assisted President Donald Trump in his war on "The Swamp."

In a Gab post of October 25, 2021 Dr. "Zev" Zelenko spelled out precisely who were the psychopathic swamp criminals bent on killing us and our loved ones:

"I am a conspiracy realist. Vanguard and Black Rock are stake holders in all industry, media, academia, and politics.

Vanguard and Black Rock invest in each other through something called circular ownership."

Dr Tim Ball

Dr Vladimir Zelenko

"Thus, consider Vanguard and Black Rock as a monopoly that owns everything.

With due diligence you will discover that the major stake holders of this monopoly are:

- Rothschild family*
- Du Pont family*
- Rockefeller family*
- Carnegie family*
- Orsini Family*
- American Bush family*
- British Royal family*

They use the following foundations to ferment chaos around the world:

*Bill and Melinda Gates foundation
Soros Open Society foundation
Clinton foundation*

*These foundations are instrumental for geopolitical destabilization.
Chaos is good for business and power acquisition.*

*Only a divinely inspired force can overcome this Goliath.
The world will be redeemed by acts of goodness and kindness.
We need collective divine consciousness in order to merit divine intervention.*

The owners of the Vanguard/Black Rock monopoly are a manifestation of the primordial serpent.

I am VERY optimistic about an upcoming redemptive event that will rebalance our dark world.”

Fasten your seatbelts and enjoy the ride.

Vladimir Zev Zelenko MD”

Dr. Zelenko’s words struck a chord of hope for me and affirmed my faith in a “white hat” operation to bring down the Satanic global cabal. As one whom long ago saw the church as an instrument of control rather than a force for good, it is long past time that we reclaimed Truth and set ourselves free to live our lives in peace and harmony with our neighbors. The following information is further evidence of this Satanic plan to exterminate 7-billion people through the Jesuit poison needle. The Jesuits are the originators of vaccines and their money-making scheme

This past Thursday, October 28, 2021 the United States Food and Drug Administration (FDA) vaccines advisory committee voted 17-0, with one abstention, to allow pharmaceutical giant Pfizer access to America’s child population aged 5 to 11 years, paving the way for a new round of mass injections of the highly controversial experimental mRNA gene therapy jab. Interestingly, the name Pfizer in German means Lucifer! Is that coincidence or not?

This sign-off was the result of intense industry lobby pressure on U.S. elected representatives and federal officials in Washington, DC, which sets the stage for yet another fast-tracked rubber-stamped ‘authorization’ in just days.

Big Pharma’s own private promotional mainstream media outlet, ‘*Bloomberg News*’, celebrated the announcement as giddy investors prepare to reap even bigger financial gains from the U.S. government’s newly established *laissez faire* regulatory process. This latest move will all but guarantee an unlimited pipeline for repeated “*Covid booster shots*” targeting the country’s school-aged children population. Moreover, the federal seal of approval’ will also give school administrators increased license to demand total

vaccine compliance as a requirement for a child to attend in-person teaching and other school activities.

In an incredible feat of propaganda gymnastics, big pharma industry copywriters at 'Bloomberg' exclaimed how the benefits of the experimental gene therapy injection exceed any risks:

"The benefits of a Covid-19 vaccine for young children made by [Pfizer Inc.](#) and [BioNTech SE](#) exceed its risks, according to a panel of U.S. experts, putting a shot for the youngest school-age children on track for a likely clearance.

Think about that for a minute, from a company "Pfizer", which in German means **Lucifer! That should send chills up your spine!**

The incredible claim that children are somehow at any noticeable risk of Covid-19 and that there are no serious risks of injecting the experimental mRNA gene-based compound into the bloodstreams of the country's youth – goes against a steadily growing body of data and peer reviewed science which clearly shows how [children are statistically at near zero risk](#) of ever getting seriously ill from Covid-19, let alone any risk of dying.

However, U.S. regulators seem to have deliberately chosen to ignore [mounting evidence](#) of the increased risk of potential crippling and fatal heart inflammation directly resulting from injecting the children with the corporation's experimental genetically-modified compound. Incredibly, the FDA even admitted to these risks in [their own recent reports](#), yet chose to minimize those obvious dangers in their final conclusion – in favor of fast-tracking the increasingly problematic pharmaceutical product.

'*Bloomberg*' goes on to advance another lie in its sub-headline, saying that, "**Shots for kids, boosters could recharge U.S. immunization push,**" implying that the experimental genetic injections provide *immunity* to COVID-19, which in fact they do not – something the manufacturers have even admitted from the beginning of the rushed roll-out.

Readers should note that the Pfizer-BioNTech Covid vaccine is still in clinical trials until what the company claims is the "estimated study completion date" of Jan. 31, 2023 (see [here](#)), so these are in effect, still experimental products – only the bigger uncontrolled trial has now been extended to the general population of the planet, something which is unprecedented in history, and which carries an infinite amount of unknown health and medical risks which no one, not least of all the pharmaceutical manufacturers pushing the product, can rightly claim to know.

Before the shots can be rolled out, the FDA will have to formally authorize the vaccine, and the Centers for Disease Control and Prevention (CDC) must also weigh in with its own recommendations — but the Biden administration's announcement last week that it has already ordered 68 million doses of the pediatric vaccine suggests Pfizer's request will sail through.

According to the [FDA website](#), as of Oct. 25, the agency had received 139,470 comments from the public prior to today's meeting — a number federal officials described as strikingly high.

The dose for younger children would be one-third the strength given to people 12 and older, with two shots given three weeks apart. The larger issue is this: Does it contain the spike Protein which replicates itself upon injection?

Based on [CDC data](#) presented during the meeting, among children 5 to <12 years of age, there have been approximately 1.8 million confirmed and reported COVID cases since the beginning of the pandemic, and only 143 COVID-related deaths in the U.S. through October 14.

In this same age group, there were 8,622 COVID-related hospitalizations through September 18.

"This translates to cumulative incidence rates of approximately 6,000 and 30 per 100,000 for confirmed COVID cases and COVID-related hospitalizations, respectively, among children 5 to <12 years of age," Pfizer's application said.

Children with underlying medical conditions, such as asthma, diabetes and obesity, made up two-thirds of severe COVID cases.

Pfizer provided safety data on two study cohorts of children ages 5 to 11, both of roughly equal size. The first group was followed only for about two months, the second for only two-and-a-half weeks.

The two-month cohort included 2,268 children ages 5 to 11. Of the 2,268 children, 1,518 received the vaccine and 750 received a placebo. Each received two shots spaced three weeks apart.

Pfizer's study found its vaccine was about 91% effective against symptomatic COVID in children, based on 16 cases of COVID in the placebo group and three cases in the vaccinated group over the brief follow-up period.

Most side effects occurred within a couple of days and included pain at the injection site, fatigue, headache, muscle pains and chills, Pfizer said.

[According to Pfizer](#), the number of participants in the current clinical development program was “too small to detect any potential risks of [myocarditis](#) associated with vaccination.”

Long-term safety of Pfizer's COVID-19 vaccine “to evaluate long-term sequelae of post-vaccination myocarditis or pericarditis” in participants 5 to <12 years of age will not be studied until after the vaccine is authorized for children,” Pfizer's application noted.

Pfizer data insufficient, kids' risk of vaccine injury greater than COVID risk, experts say

Experts [raised concerns](#) over the lack of safety and efficacy data presented by Pfizer for use of its COVID vaccine in younger children, and they pointed to increasing safety signals based on reports to the Vaccine Adverse Event Reporting System (VAERS).

They also questioned the need to vaccinate children — whose risk of dying from COVID is “almost nil” — at all.

According to Dr. Meryl Nass, member of the [Children's Health Defense](#) Scientific Advisory Panel, Pfizer once again did not use all of the children who participated in the trial in their safety study.

“Three thousand children received Pfizer's COVID vaccine, but only 750 children were selectively included in the company's safety analysis,” Nass said. “Studies in the 5-11 age group are essentially the same as the 12-15 group — in other words, equally brief and unsatisfying, with inadequate safety data and efficacy data, with no strong support for why this type of immuno-bridging analysis is sufficient.”

Nass said, *“All serious adverse events were considered unrelated to the vaccine.”*

During the [meeting](#) and in its [FDA application](#), Pfizer argued children should be vaccinated to prevent SARS-CoV-2 transmission, yet the company did not assess asymptomatic transmission.

Dr. Ofer Levy, a VRBPAC member, asked for evidence that Pfizer’s vaccine prevents transmission.

Dr. William Gruber, senior vice president of Pfizer Vaccine Clinical Research and Development, said they did not assess whether the vaccine prevents transmission, but said there is evidence the vaccine prevents transmission in adults.

When questioned further, Gruber was unable to cite specific evidence to back his assertion.

Steve Kirsch, founder of the [COVID-19 Early Treatment Fund](#), asked the panel how they could do a risk-benefit analysis with Pfizer’s COVID vaccine if they did not know the CDC’s VAERS [under-reporting factor](#) (URF).

Kirsch asked:

“How can you do a risk-benefit of analysis of COVID vaccines if you don’t know the URF? This is extremely, extremely important. You have been assuming it has been one. It is not one. Using a URF of 41, which is calculated using CDC methodology, we find over 300,000 excess deaths in VAERS. If the vaccine didn’t kill these people, what did?”
“How many Americans have to die before you pull the plug?” Kirsch asked.

Kirsch also questioned the panel on why [Maddie de Garay’s](#) severe adverse reaction to the Pfizer vaccine, which left her paralyzed, was not reported by the company to the FDA.

Dr. Jessica Rose, viral immunologist and biologist, told the panel EUA of biological agents requires the existence of an emergency and the nonexistence of alternate treatment.

***“There is no emergency and COVID-19 is exceedingly treatable,”* Rose said.**

In a [peer-reviewed study](#) co-authored by Rose, myocarditis rates were significantly higher in people 13 to 23 years old within eight weeks of the COVID vaccine rollout. In 12- to 15-year-olds, Rose said, reported cases of myocarditis were 19 times higher than background rates.

“In an act of censorship, this paper has been temporarily removed and it has now been killed without criticism of the work,” Rose said, noting the timing of the removal was strange.

Rose said tens of thousands of reports have been submitted to VAERS for children ages 0 to 18.

I know to go this route, you will be removed from the “Lamb’s Book of Life!” - (Revelation 21:27) – ***“And there shall in no wise enter into it any thing that defileth, neither whatsoever worketh abomination, or maketh a lie: but they which are written in the Lamb's book of life.”***

The readers of the Book of Revelation are warned that when the New Jerusalem comes down from heaven, only those whose names are written in the Book of Life will share its glory. These are the redeemed of all ages. All others will be in outer darkness, completely outside the entire new heavens and new earth.

These who will never enter the city are specified here first as anything that defiles. This will include anything unclean, impure, or common (in the sense of being touched by any kind of impurity), that is, not cleansed by God -(Acts 10:15, 28; 11:9, 18). Second, they will include whatever works abomination, whatever practices abomination, or whatever

is detestable in God's sight. Third, they will include whatever or whoever makes a lie or practices falsehood or false religion or makes a false profession of loyalty to Christ.

God keeps records, and the names of all those who can enter the New Jerusalem will be in the Lamb's Book of Life.

If you receive one of the marketed vaxxes, your DNA will be changed from your God-given DNA to man's re-write to the QuantumDot/Hydrogel ID2020 Luciferase patented by Bill Gates, Richard Rothschild, and their patented "Synthetic DNA Biology". This is the abomination of desolation, and results in your being removed from the Lamb's Book of Life". I urge you to resist as your eternal destiny are on the line!

The proof confirming that I am correct was posted in a short video last week, 10/24/21, **"Divine Image Destroyed"** has since been blocked by censors. If you go to my site and click on that article, you will get a 404 error message that says Not Found! That video confirms what I am saying in this post and other articles on this. Lucifer's minions do not want Christians to know the evidence as to why the vaxx is the Biblical Mark of the Beast. Not every detail of the "Mark" of the Beast is in effect simultaneously, however, it is introduced as a system of "Symbiotic Relationship". In biology this means that all elements are mutually equal in importance, and that the whole needs all the parts or it is unable to function. Ask yourself, when have you seen a house be built in a day? Never!

Blessings,

Pastor Bob, EvanTeachr@aol.com
