

The Injection Fraud – It's Not a Vaccine

By Katherine Austin Fitts of the Solari Report

As an additional to Katherine Austin Fitts most important article, I want to add a link to a video that is from a former UK telecom executive that confirms everything that I have been reporting on regarding to 5G and 6G technologies. The video link is:

<https://www.bitchute.com/video/GBrKLI1BcLHg/> It settles the issue of the Plandemic Fraud.

This video is only 25 minutes at most and was first posted more than a month ago but I was unable to share it at the time because of broken linkage. This should work, and I highly recommend Katherine Austin Fitts, one of the savviest names in all of the alternative media and finance. She is a regular guest on Greg Hunter's news site. She exposed three years ago the theft of \$22-trillion dollars from the U.S. government.

"What's in a name? That which we call a rose by any other name would smell as sweet." ~ William Shakespeare

By Catherine Austin Fitts

I am not a scientist. I am not a doctor. I am not a biotech engineer. I am not an attorney. However, I read, listen, appreciate, and try to understand those who are.

I was an investment banker until politics made it impossible to continue to practice my art. I was trained as a portfolio strategist—so I map my world by watching the financial flows and allocation of resources. I was also trained as a conspiracy generator and foot soldier—conspiracies being the fundamental organizing principle of how things get done in our world. It was not until I left the establishment that I learned that those not in the club had been trained to disparage and avoid conspiracies—a clever trick that sabotages their efforts to gather power.

My response to living at war with agencies of the U.S. government for a time was to answer the questions of people who were sufficiently courageous and curious to solicit my opinion. Over many years, that response transformed into two businesses. One was The *'Solari Report'*, which continues to grow as a global intelligence network—we seek to help each other understand and navigate what is happening and contribute to positive outcomes. The other was serving as an investment advisor to individuals and families through Solari Investment Advisory Services. After ten years, I converted that business to doing an ESG screen. What those who use it want—that is not otherwise readily available in the retail market—is a screen that reflects knowledge of financial and political corruption. Tracking the metastasizing corruption is an art, not a science. When you help a family with their finances, it is imperative to understand all their risk issues. Their financial success depends on successful mitigation of all the risks—whether financial or non-financial—that they encounter in their daily lives. Non-financial risks can have a major impact on the allocation of family resources, including attention, time, assets, and money.

Many of my clients and their children had been devastated and drained by health care failures and corruption—and the most common catalyst for this devastation was vaccine death and injury. After their lengthy and horrendous experiences with the health care establishment, they would invariably ask, "If the corruption is this bad in medicine, food, and health, what is going on in the financial world?" Chilled by the thought, they would search out a financial professional who was schooled in U.S. government and financial corruption. And they would find me.

The result of this flow of bright, educated people blessed with the resources to pay for my time was that, for ten years, I got quite an education about the disabilities and death inflicted on our children by what I now call "the great poisoning." I had the opportunity to repeatedly price out the human damage to all concerned—not just the affected children but their parents, siblings, and future generations—mapping the financial costs of vaccine injury again and again and again. These cases were not as unusual as you might expect. Studies indicate that 54% of American children have one or more chronic diseases. Doctors who I trust tell me that number is actually much higher, as many children and their families cannot afford the care and testing necessary to properly diagnose what ails them.

One of the mothers featured in VAXXED—a must-watch documentary for any awake citizen, as is its sequel VAXXED II: The People's Truth—estimated that a heavily autistic child would cost present value \$5MM to raise and care for over a lifetime. When my clients who were grandparents insisted that they would not interfere with their children's vaccine choices because it was "none of their business," I would say, "Really? Who has the \$5MM? You or your kids? When your kids need the \$5MM to raise their vaccine-injured child, are you going to refuse them? You are the banker, and it is your money that is at risk here, so it is your business. Do you want to spend that \$5MM on growing a strong family through the generations or on managing a disabled child who did not have to be disabled?" Often, that \$5MM in expenditures also translates into divorce, depression, and lost opportunities for siblings.

My clients helped me find the best resources—books, documentaries, articles—on vaccines. You will find many of them linked or reviewed at The *'Solari Report'*, including in our Library.

Of all the questions that I had, the one that I spent the most time researching and thinking about was why. Why was the medical establishment intentionally poisoning generations of children? Many of the writers who researched and wrote about vaccine injury and death assumed it was an aberration—resulting from the orthodoxy of a medical establishment that could not face or deal with its mistakes and liabilities. That never made sense to me.

Writings by Forrest Maredy, Jon Rappoport, Dr. Suzanne Humphries and Arthur Firstenberg have helped me understand the role of vaccines in the con man trick of saving money for insurance companies and the legally liable.

Here is one example of how the trick may play out. A toxin creates a disease. The toxin might be pesticides or industrial pollution or wireless technology radiation. The toxin damages millions of people and their communities. Companies or their insurance provider may be liable for civil or criminal violations. Then a virus is blamed. A "cure" is found in a "vaccine." The pesticide or other toxic exposure is halted just as the vaccine is introduced, and presto, the sickness goes away. The vaccine is declared a success, and the inventor is declared a hero. A potential financial catastrophe has been converted to a profit, including for investors and pension funds. As a portfolio strategist, I admit it has been a brilliant trick and likely has protected the insurance industry from the bankrupting losses it would experience if it had to fairly compensate the people and families destroyed.

Thanks to the work of Robert Kennedy and Mary Holland of Children's Health Defense, I now understand the enormous profits generated by so-called "vaccines" subsequent to the passage of the National Childhood Vaccine Injury Act of 1986 and the creation of the National Vaccine Injury Compensation Program—a federal no-fault mechanism for compensating vaccine-related injuries or deaths by establishing a claim procedure involving the United States

Court of Federal Claims and special masters. Call a drug or biotech cocktail a "vaccine," and pharmaceutical and biotech companies are free from any liabilities—the taxpayer pays. Unfortunately, this system has become an open invitation to make billions from "injectibles," particularly where government regulations and laws can be used to create a guaranteed market through mandates. As government agencies and legislators as well as the corporate media have developed various schemes to participate in the billions of profits, significant conflicts of interest have resulted.

The Public Readiness and Emergency Preparedness Act (PREPA or the PREP Act) became law in 2005, adding to corporate freedoms from liability. The Act "is a controversial tort liability shield intended to protect vaccine manufacturers from financial risk in the event of a declared public health emergency. The act specifically affords to drug makers immunity from potential financial liability for clinical trials of . . . vaccine at the discretion of the Executive branch of government. PREPA strengthens and consolidates the oversight of litigation against pharmaceutical companies under the purview of the secretary of Health and Human Services." (~ Wikipedia)

Over time, this has evolved to the engineering of epidemics—the medical version of false flags. In theory, these can be "psyops" or events engineered with chemical warfare, bio-warfare, or wireless technology. If this sounds strange, dive into all the writings of the "Targeted Individuals."

I learned about this first-hand when I was litigating with the Department of Justice and was experiencing significant physical harassment. I tried to hire several security firms; they would check my references and then decline the work, saying it was too dangerous. The last one took pity and warned me not to worry about electronic weaponry, letting me know that my main problem would be low-grade bio-warfare. This bio-warfare expert predicted that the opposing team would drill holes in the wall of my house and inject the "invisible enemy." Sure enough, that is exactly what happened. I sold my house and left town. That journey began a long process of learning how poisoning and nonlethal weapons are used—whether to move people out of rent-controlled apartments, sicken the elderly to move them to more expensive government-subsidized housing, gang-stalk political or business targets, or weaken or kill litigants—and the list goes on. Poisoning turned out to be a much more common tactic in the game of political and economic warfare in America than I had previously understood. After I finished my litigation, I spent several years detoxing from heavy metal toxicity—including from lead, arsenic, and aluminum. As I drove around America, I realized it was not just me. Americans increasingly looked like a people struggling with high loads of heavy metals toxicity. In the process of significantly decreasing my unusually high levels of heavy metals, I learned what a difference the toxic load had made to my outlook, my energy, and my ability to handle complex information.

This brings me to the question of what exactly a vaccine is and what exactly is in the concoctions being injected into people today as well as the witches' brews currently under development.

In 2017, Italian researchers reviewed the ingredients of 44 types of so-called "vaccines." They discovered heavy metal debris and biological contamination in every human vaccine they tested. The researchers stated, "The quantity of foreign bodies detected and, in some cases, their unusual chemical compositions baffled us." They then drew the obvious conclusion, namely, that because the micro- and nano-contaminants were "neither biocompatible nor biodegradable," they were "bio-persistent" and could cause inflammatory effects right away—or later (<http://medcraveonline.com/IJVV/IJVV-04-00072.pdf>)

Aborted fetal tissue, animal tissue, aluminum, mercury, genetically altered materials—and what else?

Whatever the ingredients of vaccines have been to date, nothing is more bizarre and unsettling than the proposals of what might be included in them in the future.

Strategies—already well-funded and well on the way—include brain-machine interface nanotechnology, digital identity tracking devices, and technology with an expiration date that can be managed and turned off remotely. One report indicates that the Danish government and U.S. Navy had been paying a tech company in Denmark to make an injectible chip that would be compatible with one of the leading cryptocurrencies.

I was recently reading Mary Holland's excellent 2012 review of U.S. vaccine court decisions ("Compulsory vaccination, the Constitution, and the hepatitis B mandate for infants and young children," Yale Journal of Health Policy, Law, and Ethics) and I froze and thought, "Why are we calling the injectibles that Bill Gates and his colleagues are promoting 'vaccines'? Are they really vaccines?"

Most people are familiar with how Bill Gates made and kept his fortune. He acquired an operating system that was loaded into your computer. It was widely rumored that the U.S. intelligence agencies had a back door. The simultaneous and sudden explosion of computer viruses then made it necessary to regularly update your operating system, allowing Gates and his associates to regularly add whatever they wanted into your software. One of my more knowledgeable software developers once said to me in the 1990s—when Microsoft really took off—"Microsoft makes really sh*y software." But of course, the software was not really their business. Their business was accessing and aggregating all of your data. Surveillance capitalism was underway.**

The Department of Justice launched an antitrust case against Microsoft in 1998, just as the \$21 trillion started to disappear from the U.S. government—no doubt with the help of specially designed software and IT systems. During the

settlement negotiations that permitted Gates to keep his fortune, he started the Gates Foundation and his new philanthropy career. I laughed the other day when my tweet of one of Robert Kennedy Jr.'s articles from Children's Health Defense—describing the gruesome technology Gates is hoping to roll out through "injectibles"—inspired a response: "Well, I guess he is finally fulfilling his side of his antitrust settlement."

If you look at what is being created and proposed in the way of injectibles, it looks to me like these technological developments are organized around several potential goals.

The first and most important goal is the replacement of the existing U.S. dollar currency system used by the general population with a digital transaction system that can be combined with digital identification and tracking. The goal is to end currencies as we know them and replace them with an embedded credit card system that can be integrated with various forms of control, potentially including mind control. "De-dollarization" is threatening the dollar global reserve system.

The M1 and M2 money supply have increased in the double digits over the last year as a result of a new round of quantitative easing by the Fed. The reason we have not entered into hyperinflation is because of the dramatic drop in money velocity occasioned by converting Covid-19 into an engineered shutdown of significant economic activity and the bankrupting of millions of small and medium-sized businesses. The managers of the dollar system are under urgent pressure to use new technology to centralize economic flows and preserve their control of the financial system.

Just as Gates installed an operating system in our computers, now the vision is to install an operating system in our bodies and use "viruses" to mandate an initial installation followed by regular updates.

Now I appreciate why Gates and his colleagues want to call these technologies "vaccines." If they can persuade the body politic that injectible credit cards or injectible surveillance trackers or injectable brain-machine interface nanotechnologies are "vaccines," then they can enjoy the protection of a century or more of legal decisions and laws that support their efforts to mandate what they want to do. As well, they can insist that U.S. taxpayers fund, through the National Vaccine Injury Compensation Program, the damages for which they would otherwise be liable as a result of their experiments—and violations of the Nuremberg Code and numerous civil and criminal laws—on the general population. The scheme is quite clever. Get the general population to go along with defining their new injectible high-tech concoctions as "vaccines," and they can slip them right into the vaccine pipeline. No need to worry about the disease and death that will result from something this unnatural delivered this quickly. The freedom from liability guaranteed by the PREP Act through the declaration of an emergency—and the ability to keep the emergency going through contact

tracing—can protect them from liability for thousands if not millions of deaths and disabilities likely to follow such human experimentation. Ideally, they can just blame the deaths on a virus.

A colleague once told me how Webster's Dictionary came about. Webster said that the way the evildoers would change the Constitution was not by amending it but by changing the definitions—a legal sneak attack.

I believe that Gates and the pharma and biotech industries are literally reaching to create a global control grid by installing digital interface components and hooking us up to Microsoft's new \$10 billion JEDI cloud at the Department of Defense as well as Amazon's multibillion cloud contract for the CIA that is shared with all U.S. intelligence agencies. Why do you think President Trump has the military organizing to stockpile syringes for vaccines? It is likely because the military is installing the roaming operating system for integration into their cloud. Remember—the winner in the AI superpower race is the AI system with access to the most data. Accessing your body and my body on a 24/7 basis generates a lot of data. If the Chinese do it, the Americans will want to do it, too. In fact, the rollout of human "operating systems" may be one of the reasons why the competition around Huawei and 5G telecommunications has become so fractious. **As Frank Clegg, former President of Microsoft Canada has warned us, 5G was developed by the Israelis for crowd control.**

In the face of global "de-dollarization," this is how the dollar syndicate can assert the central control it needs to maintain and extend its global reserve currency financial power. This includes protecting its leadership from the civil and criminal liability related to explosive levels of financial and health care fraud in recent decades.

Which brings me back to you and me. Why are we calling these formulations "vaccines"? If I understand the history of case law, vaccines, in legal terms, are medicine. Intentional heavy metal poisoning is not medicine. Injectable surveillance components are not medicine. Injectable credit cards are not medicine. An injectible brain-machine interface is not a medicine. Legal and financial immunity for insurance companies does not create human immunity from disease.

We need to stop allowing these concoctions to be referred to by a word that the courts and the general population define and treat as medicine and protect from legal and financial liability.

The perpetrators of this fraud are trying a very neat trick—one that will help them go much faster and cancel out a lot of risk—at our expense. I understand why they are doing it.

What I don't understand is why we are helping them. Why are we acquiescing in calling these bizarre and deeply dangerous concoctions "vaccines"? Whatever they are, they are not medicine.

So, what shall our naming convention be? What name shall we give to the relevant poisons, neurologically damaging metals, and digital shackles?

Whatever we call them, I know one thing. THEY ARE NOT MEDICINE, WHICH MEANS THEY SURE ARE NOT VACCINES.
