

# GREATEST SUCCESS EVER ACHIEVED BY GLOBAL TRUTH MOVEMENT

Posted on May 8, 2023 by State of the Nation

---

## SOTN Editor's Note:

The following statistical analysis (and its irrefutable interpretation) says it all: the Covid *Super Vaccination Agenda* has been stopped dead in its tracks.

First, it's essential to understand that the primary purpose of the COVID-19 *Plandemic* was to impose a mandatory Covid vaccination regime on the entire world community of nations.

The Khazarian perpetrators of this Covid injection genocide also planned for an entire decade of COVID-19 'vaccines' and boosters. They really wanted every person on the planet getting their 3 or 4 yearly jabs until they had been sufficiently poisoned and programmed.

However, the Global Covid 'Vaccine' Truth Movement unexpectedly emerged fast and furiously out of nowhere. In so doing, the vax truthers threw a ginormous wrench into the Covid jab juggernaut bringing it to a screeching halt.

## [Graph of daily COVID-19 'vaccine' doses administered to date reveals the inevitable termination of the Covid Super Vaccination Agenda](#)

The CV19 vaccination hard data now indicates that the whole Covid jab depopulation scheme has been thwarted to a great degree. And, that most nations have considerably slowed their respective weaponized Covid shot genocides.

Of course, it remains to be seen just how much of an uptick in Covid 'vaccine'-induced deaths and injuries occurs after the same perps flip the switch on the advanced build-out of the 5G power grids in the urban kill zones around the globe. See: [5G Super-Hotspots: You better know where the "kill zones" are located!](#)

## [State of the Nation](#)

May 8, 2023

N.B. When *Big Pharma* vaccine production data aligns with official Covid vaccination data as presented below, you know this *Plandemic* has not gone according to their nefarious NWO plans.

## **New COVID Vaccinations/Boosters Slow To A Trickle**

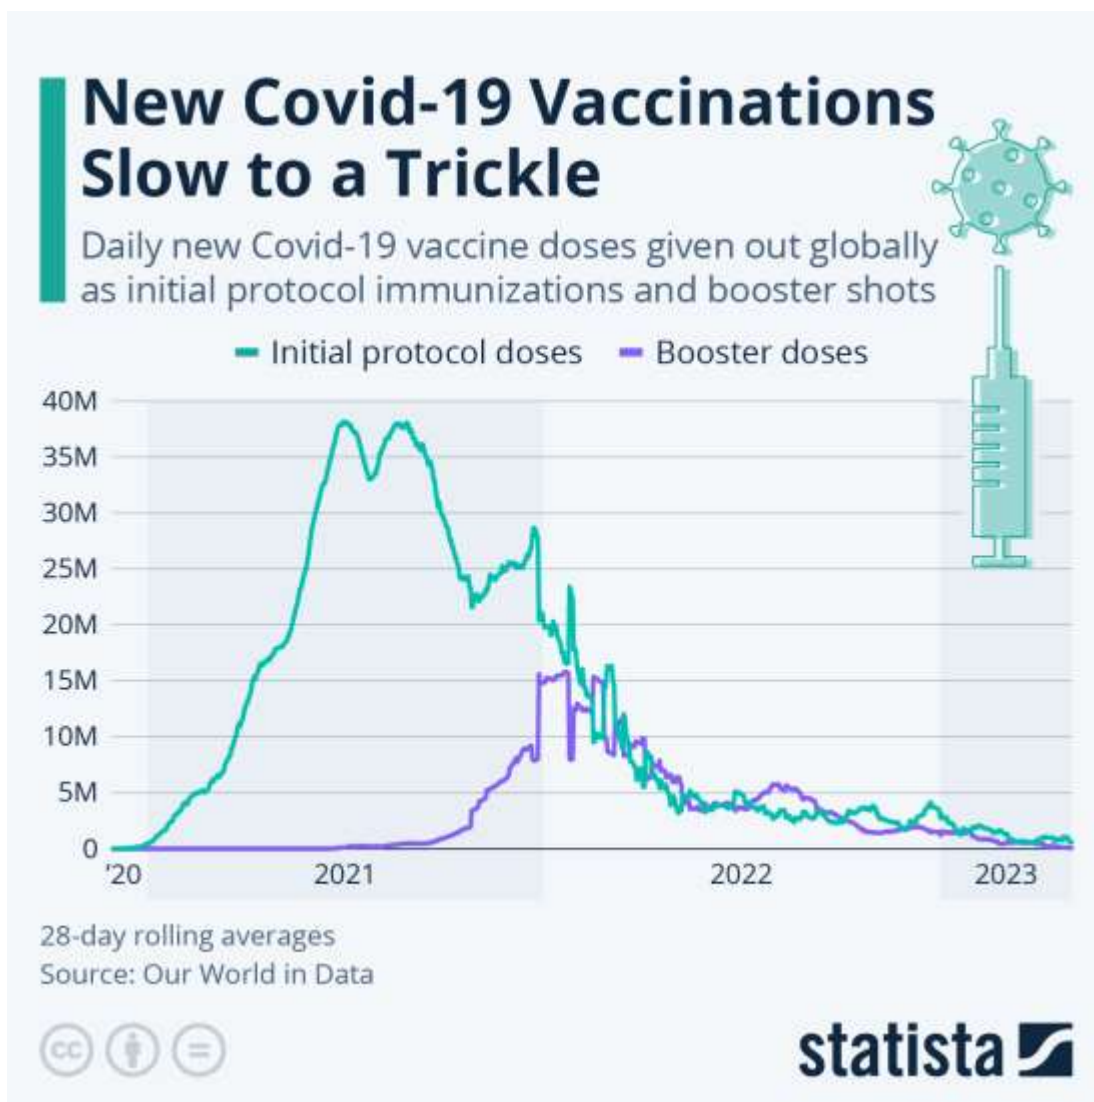

ZeroHedge.com

Pharma company [Pfizer](#), makers of popular [Covid-19 vaccine](#) Comirnaty, reported their Q1 financials yesterday.

While the company exceeded expectations, **there is nevertheless a big chunk of revenue missing** in this quarter's report compared to the same time last year. Total revenue was down 29 percent since Q1 of 2022.

[As Statista's Katharina Buchholz notes](#), **this change is closely related to the number of Covid-19 vaccines given out globally.** [Numbers from Our World in Data](#) show that **new vaccinations around the world have slowed to a trickle.**

While in mid-2021, an average of as many as 38 million doses were given out each day, this had decreased to between 500,000 to one million daily doses most recently.

Interestingly, **booster shots have generally not overtaken initial protocol immunizations, instead staying far behind them in 2023** after having been the

**most common type of Covid-19 vaccination for a short while in mid-2022.** Booster doses of Covid-19 vaccines have been available in many developed countries – which is where most coronavirus vaccines were given out in general – and have continued to be recommended at least for older people. However, uptake has been far from universal. [For example, while close to 70 percent of the U.S. population had received a full initial immunization](#) against Covid-19 most recently, only around 17 percent had received a booster. The numbers were 94 percent and 43 percent for those over the age of 65, respectively.

The number of Covid-19 booster shots might increase once more if an annual vaccination against the disease would be recommended. **In the United States, [the FDA in January voted in favor of such a regimen](#) that would work similar to the annual flu shot and could potentially start to be given out this fall.** More than one annual shot could still be recommended for older or immuno-compromised people.
