

Technological Terror: 10 Reasons why 5G could/will Cause a Global Catastrophe

01/27/2020 / By [Lance D Johnson](#)

Fifth generation wireless technology (5G) will forever alter human evolution, inundating human cells and subtle energy systems of the human body with constant pulses of [radio-frequency radiation and electromagnetic fields](#). 5G is a technological terror and could cause a global catastrophe of human health problems. Here are ten reasons why 5G must be stopped:

Disruption of voltage-gated calcium channels in human cells

5G alters cellular activity by activating the body's voltage-gated calcium channels. According to EMF scientist Dr. Martin Pall, 5G electromagnetic fields force excess calcium ions to release into cells. This sets off a chain of reactions that increase peroxynitrite formation and free radical activity, damaging DNA and causing premature aging.

Deep EMF penetration and oxidative stress

The studies of Professor Hässig and his colleagues in Switzerland find microwave frequency EMFs to cause oxidative stress deep within the body of animals. Animals that grazed near cell phone towers were born with increased incidence of cataracts.

Multi-generational mitochondrial damage

Exposure to millimeter wave frequency EMF radiation causes damage to the mitochondria of cells and contributes to brain cancer. The DNA damage is cross-generational, mutagenic and can be inherited by offspring.

Neuro-psychiatric effects

The impacts of EMFs on the brain are subtle at first, but with cumulative, repeated exposure, can cause headaches, irritability, sleep disturbances, altered memory and depression.

Pulsed wave EMFs proven more dangerous and cause breaks in cellular DNA

EMF scientist Dr. Pall points to thirteen studies proving why 5G's pulsed wave EMFs are more active and dangerous than the old continuous wave EMFs. Pulsed wave EMFs can cause single strand and double strand breaks in cellular DNA, while oxidizing cellular bases in cellular DNA. This is one way to [cause cancer in the body](#).

Manipulation of the skin through sweat duct antennae

The frequencies that emanate from 5G can affect sweat ducts across the human body, potentially manipulating how the body regulates temperature. Because sweat ducts work like helical antennae's, they absorb the electromagnetic energy from 5G radiation between 75 and 100 GHz. If the sweat ducts can be manipulated by 5G, then a person's body can be manipulated into stress through this external channel.

Potential to become a direct energy weapons system

5G hardware uses a dielectric lens and can reportedly be operated in the sub-gigahertz range. Because of this, it will ultimately allow autonomous vehicles to communicate with one another. This technology could eventually double as a weapons system, because it is similar to long range radar, phased array radar, and directed energy weapons. In fact, the same technology is already used for crowd dispersal.

Potential to manipulate crowd movement

Because 5G uses short wavelength frequencies in the millimeter range, it could ultimately be used to hurt and manipulate crowds of people. These [same short wavelength frequencies are used](#) by the military's non-lethal Active Denial Systems to disperse crowds. When the waves hit a person, the person feels a burning sensation and will move.

Phased array densification

In order for 5G to work, there will need to be significantly more cell towers, stations and bases. Cities and residential neighborhoods will become polluted with new sources of radiation, which will send frequencies into homes, through brick walls and concrete. This influx of 5G infrastructure will include thousands of new small phased array antennas shooting out radiation in all directions, penetrating homes and human bodies.

Re-Radiation inside the body

Radiofrequency researcher Arthur Firstenberg explains that 5G pulses are shorter and must be delivered in multiple bursts. Because of this, the bursts are capable of re-replicating, over and over inside the body. In 2002, Firstenberg wrote, "... when extremely short electromagnetic pulses enter the body, something else happens: the moving charges themselves become little antennas that re-radiate the electromagnetic field and send it deeper into the body ..."

5G promises faster internet speeds, but ushering in this new world of hyper-connectivity comes with multiple risks to human health. [Some nations are banning 5G](#), while others are openly embracing it, without any care.

Lance Johnson offers a layman's high points on the dangers of 5G and so I share this for those of you less technical yet concerned nonetheless about the damages of this fifth generation of Wi-Fi communications. People are at a disadvantage by the general concept that this is an invisible threat to all forms of life. The fact that it is an invisible threat seems to escape the concern of most people as something that can't harm! Wrong, and you should be concerned if not alarmed!

For the scientific technical information that validates the points made in this report, go to Dr. Martin Pall's 90-page scientific study on the dangers of 5G. It is in my analysis the definitive study that discredits the entire 5G roll out. That said, there is great push back by those minions who want to attack the hundreds of world-renown scientists who have been speaking up at this late stage of the game. I have actually read Dr. Martin Pall's study and for some it can be challenging. The so-called internet "fact checkers" are all sold out [bought or bribed] and so the industry is counting public ignorance to steam roll their agenda. Dr. Pall's study is still available on the Internet, and the title is just below.

5G: Great risk for EU, U.S. and International Health! Compelling Evidence for Eight Distinct Types of Great Harm Caused by Electromagnetic Field (EMF) Exposures and the Mechanism that Causes Them

It can be accessed at: <http://emfsa.co.za/news/martin-pall-document-on-emf-effects/> In researching for documents quite often the censors will block pages that refer to a topic using the exact title like that above, but one can find it through secondary references or links in articles that get passed the censors. In order to locate a link for readers I came across two which I was blocked as "inaccessible". The link above was good, but it was obtained indirectly. Dr. Martin Pall's work is an example of a scientific "heavy-weight" in the field.

Another link that will yield the report by Dr. Martin Pall is [Download 5G EMF Hazards- Dr Martin L. Pall -EU-EMF2018-6-11US3](#) .

1. A 9-minute video by Dr. Martin Pall is found at <https://phibetaiota.net/2019/03/dr-martin-pall-5g...>

If you do research on any kind or anything of particular interest on the Internet, it is important not to be easily discouraged. In twenty-five years on the Internet, I have learned a lot about tracking, not hacking, in order to get important knowledge that makes a difference in exposing lies. Do not rely on on-line “fact checkers” they are all fakes and are bought and paid for by a particular industry. It was revealed a few weeks ago that Bill Gates has spent \$250-million dollars for fake sources to front their claims.

You need to know some background information to help grasp the implications of what I and others have been talking and writing about.

A communications satellite uses 2,400 watts of power (about the same as used by 2 hair dryers). A microwave oven uses 1,000 watts (1 kilowatt) of energy. The satellite gets the energy from solar panels and the microwave gets it from your electric utility (the electrical power grid).

A microwave oven’s internal magnetron, which is virtually the same as that of a radar- or cellphone tower, transforms that electrical energy into microwaves. The magnetron inside a microwave oven can be easily adapted into a very lethal ray gun – which is demonstrated by the military LRAD and ADS systems.

The cables leading into a typical cellphone tower, which is like “A giant microwave oven on a stick,” capable of releasing 3,000,000 watts (3 megawatts) of output power to the tower’s magnetron – or even more megawatts, if there is an amplifier at the top.

To put this into perspective, one (1) watt from your cellphone can go 25 miles to the nearest cellphone tower, to relay your call’s signal to the person on the other end of the line. The US Federal Communications Commission (FCC) limits the amount of energy that a cellphone tower can release to 400 watts.

These megawatts of extra power are NOT for data transfer – nothing close to that amount of energy is required for data transfer – which is an important point, because this suggests to him that cellphone towers are easily capable of being switched to Weaponized Mode.

The fact that cellphone towers are wired with the capability to release millions of watts of microwave radiation makes them veritable “towers of death”, the perfect weapons against an “invasion” – or the mega-slaughter of the domestic population.

Virtually all towns, all over the world have the amount of towers necessary to fry the populations in their vicinity. All that needs to happen is for an Artificial Intelligence program from Google – or an action by “The real people who brought us 9/11” – or if whoever we elect “...turns out to be so crazy, evil, that they could fake a reason to turn on the ‘Last Line of Defense,’ the ‘Anti-Foreign Invasion’, ‘Anti-Zombie Apocalypse Network’...to cook the entire population within the city limits within an hour, in the middle of the night,” with robot armies to mop up the people living in the countryside... All these contingencies are out there, ladies and gentlemen.

Why? Many of us believe that whoever is behind this wants to exterminate the majority of humans, in order to have the Earth all to themselves, in the incredibly shallow belief that they can upload their minds into robotic avatars and live in a Virtual Reality “Matrix”, happily ever after – forever, in a post-human future.

Our only defense is to stop them, now from creating this technology and from creating Borg armies or clone armies, etc. because as soon as they’ve succeeded in obtaining these, they will proceed with our extermination. This technology is weeks away and its owned by people who are not our friends; people who control the food supply, our water supply, our air supply – and their endgame is the death of humanity.

Do not under-estimate what I’m suggesting. To help you grasp what others are experiencing around the world, the following reporting and experiences with 5G is included as a sampling of what is in store for Americans, if not worse.

The First Report of 5G Injury from Switzerland

July 20, 2019 / February 29, 2020

The first reported injury of 5G in a news report comes from Switzerland, where 5G has been launched in [102 locations](#). The weekly French-language Swiss magazine L’Illustré interviewed people living in Geneva after the 5G rollout with alarming details of illness. In their article, [With 5G, We Feel Like Guinea Pigs](#), posted July 18, 2019, they

report neighbors met to discuss their many common symptoms and many unanswered questions.

Update 2/29/20

5G: It's Legal but Not Safe

As soon as the antennas were installed, several residents and entire families in the heart of Geneva reported similar unusual symptoms of loud ringing in the ear, intense headaches, unbearable earaches, insomnia, chest pain, fatigue and not feeling well in the house. 29-year-old Geneva resident, Johan Perruchoud, called up Swisscom and was told that indeed the 5G cell towers were activated on the same day he began to feel the symptoms. When others called Swisscom they were told everything is legal and within guidelines.

Swiss Physician Denounces 5G and Calls for a 5G Moratorium

Dr. Bertrand Buchs, who has also called for a 5G moratorium, states he has seen more and more patients with similar symptoms. He notes, *"In this case, our authorities are going against common sense ... we risk experiencing a catastrophe in a few years... no serious study exists yet, which is not surprising when we know that this technology was developed in China, then to the United States. In Switzerland, we could open a line for people who feel bad, listen to these complaints and examine them. Our country has the means and the skills. The debate must be launched because the story is not about to end."*

Swisscom: Millions of Fast Connections

[Swisscom states](#), "5G will create new opportunities for residential customers and businesses across Switzerland. 5G is the new mobile communication standard for digitization, enabling the extremely fast connection of millions of devices, things and people." Will those millions of fast connection enable communication, or instead disable people from communicating due to illness?

Dear Diary: Loud Humming, Lots of Pain, Nausea, No Sleep

These stories parallel that of Anne Mills, author of **"All EMF'd Up"**, who suffered wireless radiation poisoning in Germany when her husband was stationed there for work. She wrote a diary with identical symptoms of those in Geneva. As noted in the Swiss magazine L'illustré article, her concerns, like those in Geneva, were dismissed. She consulted with German physician, Dr. Horst Eger, to confirm her symptoms were that of microwave illness seen in military radar personnel and those working on microwave towers. **All EMFd Up (Electromagnetic Fields): My Journey Through Wireless Radiation Poisoning and How You Can Protect Yourself. (2019) Anne Mills**

"Mystery Illness" In Cuban and Chinese Diplomats is Microwave Poisoning

The New York Times and CBS reported unexplained symptoms in diplomats living in China and Cuba in 2017 and 2018. The source was found to be microwave radiation. UC San Diego Professor of Medicine, Dr. Beatrice Golomb, published an [article](#) in Neural Computation in September 2018, discussing the symptoms of the diplomats living abroad. The symptoms that diplomats and their families experienced,

i.e. sleep problems, headaches, strange auditory sounds, anxiety and dizziness were similar to those with microwave illness reported in [military studies](#) from pulsed microwave radiation. See also news articles below

- [Cuban Diplomats](#) Likely Hit by Microwave Weapons. Sept 4, 2018
- [U.S. Diplomats in China](#) Suffer Brain Trauma from High Powered Microwaves. March 20, 2019

Residents in Sacramento, California Experiencing Symptoms

After 5G towers were installed in a Sacramento neighborhood, a family began to experience generalized health issues, including headaches. This was such a concern that the father set up a [website](#) and petition to gain support for halting 5G expansion. Sacramento was one of the [first](#) in the U.S. to permit 5G cell towers, with health concerns being raised well before the towers were in place. The question remains about exactly what frequencies of radiation and what levels of radiation are emitted by these neighborhood 5G cell towers which reportedly will use 4G frequencies as well. Should there be independent testing? The Sacramento city manager is apparently doing a review of 5G towers according to a September 12, 2019 news [report](#).

Here is a video of testimony of a mother whose children fell ill after a cell antenna was placed outside their house in June 2019.

Doctors Protesting 5G Communications and Calling for 5G Moratorium

In October 2019 about 3 dozen physicians in white coats protested at the State Ministry in Stuttgart, Germany, calling for a moratorium on 5G until safety of the new technology has been proven. The protest was covered in the German publication [Stuttgarter News](#). Mental health professional Jörg Schmid stated in the article, “*We have more and more patients in our practices that are hypersensitive to electrosmog.*” Symptoms they reported included headaches, tinnitus, difficulty concentrating and cardiac arrhythmias.

Dr. Cornelia Mästle, an internal medicine physician and cardiologist from Winterbach was to the point at the protest announcing, “***We are calling for prevention strategies to protect the population, further research needs and a moratorium on the expansion of 5G mobile radios.***” A letter was also sent to the State Ministry and a formal appointment was made with the physicians to discuss this issue.

Demo at the State Ministry in Stuttgart: Doctors are protesting 5G mobile communications. Thomas Durchdenwald, 10/23/19. <https://www.stuttgarter-nachrichten.de/inhalt.demo-am-staatsministerium-in-stuttgart-protest-gegen-5-g-in-weissen-arztkitteln.f964401b-85f9-4915-a236-4f3177597300.html>

STOP 5G International Protests

Around the world citizens in every profession are protesting the 5G rollout as well. A volunteer group called [Stop 5G International](#) has organized this effort. The [first global protest](#) was January 25, 2020. The next worldwide protest is scheduled for Saturday, [April 25, 2020](#).

Palestinians in Prison Hunger Strike to Stop Headaches from Phone Jammers

An article from the Palestinian News Network reported on headaches in prisoners in Israeli Jails when radiofrequency phone jammers were turned on and boosted the levels. There have been many recent reports of severe headaches in prisoners in a variety of jails associated with phone jammer operations. Dozens of prisoners have been on a hunger strike for 14 days now. These symptoms are backed up by research by many, including J Wang et al (2017) who published their article, [Mobile Phone Use and The Risk of Headache: A Systematic Review and Meta-analysis of Cross-sectional Studies](#), in Nature magazine. The comprehensive meta-analysis of studies linking cell phone radiation to headaches showed positive findings in the robust studies. He concluded that mobile phone use may increase the risk for headache. He notes, "In Stalin's study and Chiu's study the prevalence of MP[mobile phone] usage among adult and children was 69.8% and 63.2% respectively in their study population," He warns that, "It is imperative that health care professionals, clinicians and common people are educated about the deleterious influence of MP [mobile phone] on headache. And it is reasonable to instruct children and adolescent about a prudent use of MPs." A new study by (Movahedi (2018)- [Short-term exposure to mobile jammer radiofrequency radiation adversely affects the human hearing](#) reveals hearing loss in a significant number of medical students tested after only one hour of exposure.

Many Others Suffer Microwave Illness/Electrosensitivity

It is reported that 3% to 30% of the population have symptoms similar to Microwave illness or electro sensitivity, depending on the reporting country and if mild to severe symptoms are reported.

Dr. Scott Eberle describes how a physician learned about his own electro sensitivity published originally in 2014 in the Sonoma Medicine and later reprinted in the Santa Clara County/Monterey County Medical Association Bulletin. You can read Dr. Scott Eberle's [What's the Diagnosis Doctor?](#) He has also written "An Underworld Journey: Learning to Cope with Electromagnetic Hypersensitivity." Safer Alternatives to Wireless Networks: SAFE G

Fiber-optics to premises and cabled networks are safe and just as fast as 5G. Considering that the 5G networks will depend on a backbone of fiber optic cables it makes sense to bypass the 5G wireless towers for these cabled alternatives. See
