

The Vaccine Does Change Your DNA

Covid-19 was and is a Bioweapon

Part 2

In previous articles on the alleged Covid-19, I have offered up evidence to suggest that the virus does not exist, has never existed, and the various health agencies have not proved it exists. They tell other health agencies around the world that there are no samples to be had. Simply put, there is no virus; it's all a huge hoax being perpetrated on humanity.

This is not to say that we have seen the end of this scamdemic, in fact I look for more of it and at increased levels based upon the heavy chemtrail spraying during the first two weeks of January. In anticipation of what may be planned for Americans, it becomes necessary to produce evidence to the contrary that there is a so-called Covid-19. What follows are the views of professionals in the field along with some pretty bright minds that cannot be fooled. As it stands, I am the only one calling this a bioweapon and that it is being sprayed on the country like cockroaches. I've been exposing this agenda of global "Depopulation" since 1972. I've noted that "*Mycoplasma*" has long ago been discovered in the invisible soup being sprayed upon all life form. It is unlikely that any of those reading this knew what the word "*Mycoplasma*" was until I explained that it can be "electroporated" into the pores of your skin through 5G EMF beamed energy.

5G cannot pass through structural walls; that is unless you have it installed in your homes, apartments, schools and businesses, but it can drop you in your own footprint unbeknownst to you. But I will have a lot more and so let's consider what medical experts, virologists, and journalists who are smart enough to know we are being played for suckers, through the use of the fear-mongering media and public servants.

Andrew Kaufman, M.D., explains that no pure virus has been isolated in the coronavirus hoax, let alone been proven to cause the so-called COVID-19 disease. Did you read that? **No pure virus has been isolated; rather, some genetic material is taken from a sample of a sick person, partially gene sequenced, and then claimed to be within the coronavirus family based on the degree of similarity between the partial gene sequence and other coronaviruses.** However, in order for us to certainly know what we are dealing with, a pure virus needs to be isolated and then fully gene sequenced. After this is done, experiments need to be conducted to determine whether this pure virus truly causes the symptoms of the so-called COVID-19 disease. In other words, Koch's postulates must be fulfilled. Dr. Andrew Kaufman posted a video using a walnut tree analogy to help us understand what needs to be done vs. what has been done. What has been done gives us very little evidence to justify the level of controls and the testing put in place for this event.

Could There Be Something Wrong with the “Germ” Theory? Paul Fassa, writing for *‘Health Impact News’* states:

Our modern medicine’s paradigm is based mostly on the germ theory of microbes invading our bodies and causing disease, thus creating the need for a war against microbes to eliminate them all and conquer all diseases. Fear is the motivation for creating the weapons of antibiotics, antivirals, and vaccines befitting this concept, but our modern populations are sicker than ever.

Are the weapons creating chronic debilitating diseases in exchange for acute illnesses considered infectious that most manage to get over with a renewed resilience to the dreaded pathogenic microbes blamed for all illness? Are we actually destroying our immune systems with our war on microbes?

Ever since Pasteur’s claim to fame as the father of the germ theory, our overall health has decreased even while lifespans have increased. But during Pasteur’s late 19th century early 20th century media dominance and since then till now, there have been many scientists denouncing Pasteur’s model of disease, even providing evidence that he was a plagiarist and fraud.

Let’s focus on some of the few scientists and medical practitioners who have not agreed with the germ theory’s dogma that places microbes as agents of death that should be feared while ignoring other aspects of health. If any of the readers would like a grasp on the larger issue here, you must read *‘The Contagion Myth: Why Viruses (including “Coronavirus” Are Not the Cause of Disease)’* by Dr. Thomas S. Cowan, MD and Sally Fallon Morell. Apparently Amazon does not want you to buy it and Barnes & Noble was hacked and has decided not to sell it.

In this world of censorship, some books get lost intentionally, and I mean that in a serious way. I ordered my copy from Barnes & Noble when it was announced it was available. My copy took more than three weeks to get to my mailbox. The USPS tracking showed it went from the Chicago shipping point to Gary, IN, then to Smyrna, TN, back to Indianapolis, IN, then to Louisville, KY, then back to Smyrna, TN again before it returned to Louisville, KY and finally to my mailbox in Bardstown, KY. This was in June, 2020, long before the Christmas mail when the USPS gave priority to delivering Amazon packages over 1st class mail letter mail. A 1st class letter between Bardstown, KY and Pittsburgh, PA went from a routine of 4 days transit to 18 days. But Amazon deliveries get priority and deliveries on Sunday as well. Isn’t it strange when parcel post gets priority over 1st class mail?

The Analogy of Mosquito Larvae and Stagnate Water is used in the chart on the next page.

| GERM THEORY (PASTEUR) | CELLULAR THEORY (BECHAMP). |
|--|--|
| 1. Disease arises from micro-organisms outside the body. | Disease arises from micro-organisms within the cells of the body. |
| 2. Micro-organisms are generally to be guarded against. | These intracellular micro-organisms normally function to build and assist in the metabolic processes of the body. |
| 3. The function of micro-organisms is constant. | The function of these organisms changes to assist in the catabolic (disintegration) processes of the host organism when that organism dies or is injured, which may be chemical as well as mechanical. |
| 4. The shapes and colours of micro-organisms are constant. | Micro-organisms change their shapes and colours to reflect the medium. |
| 5. Every disease is associated with a particular micro-organism. | Every disease is associated with a particular condition. |
| 6. Micro-organisms are primary causal agents. | Micro-organisms become "pathogenic" as the health of the host organism deteriorates. Hence, the condition of the host organism is the primary causal agent. |
| 7. Disease can "strike" anybody. | Disease is built by unhealthy conditions. |
| 8. To prevent disease we have to "build defences". | To prevent disease we have to create health. |

As early as the late 19th century, right around the time Louis Pasteur made his questionable "germ" theory claims of germs "out there" causing disease in us, German biologist Dr. Rudolph Virchow, known as the "Father of Pathology" made this statement, which was included in Dr. Robert O. Young's book, *'Sick and Tired?: Reclaim Your Inner Terrain'*.

If I could live my life over again, I would devote it to proving that germs seek their natural habitat—diseased tissue—rather than being the cause of the diseased tissue; e.g., mosquitoes seek the stagnant water, but do not cause the pool to become stagnant.

This "inner terrain" model was echoed by two of Pasteur's most critical contemporaries, French scientists Antoine Bechamp and Claude Bernard. Bechamp was an advocate of the pleomorphic tendency of microbes to change from one type to another according to the blood or tissue where it resided. Bernard supported that view also, exclaiming the germ was nothing, the inner terrain is all.

In other words, any benign or more likely helpful microbes, which actually all exist in our bodies and outnumber our cells, when engulfed with some sort of imbalance, low pH, chronic inflammation, or toxic environmental influences, change into less desirable guests within our inner terrain, of which our immune system is a part, not the whole.

Pasteur violated Robert Koch's late 19th century rules for determining pathogens, known as Koch's postulates. Though not completely accepted in microbiology today, these conditions for determining pathogenic microbes was certainly applicable during Pasteur's time. The germ must be:

- found in all cases of the disease examined
- prepared and maintained in a pure culture
- capable of producing the original infection, even after several generations in culture
- retrievable from an inoculated animal and cultured again

Pasteur violated most of those rules, often simply injecting animals with the blood of other animals and not isolating and culturing the microbes.

But because of political favoritism from the French hierarchy at the time and his own ambitions, Pasteur's "germ" theory took over all other theories of disease. His one germ for one disease turned out to be highly profitable for the soon to rise pharmaceutical industry and this model controls contemporary Western medicine to this present day.

The Universal Microscope Proved Pleomorphism Correct

Despite widespread acceptance of Pasteur's germ theory, one germ for each disease, there were enough scientists who accepted the "pleomorphism" theory of microbial organisms, changing perhaps from helpful, benign, to pathogenic according to their immediate organic environments, or inner terrain.

Later in the 20th century, circa 1930, a brilliant scientist named Royal (Roy) Raymond Rife created what he called the Universal Microscope, a large complex instrument that was capable of magnifying even viruses in real time. He was able to report microbial changes of form and size, often up to 16 phases of transition within the same microbe. Those of the "pleomorphic" persuasion were thrilled to witness the proof of their beliefs with Rife's microscopic wizardry.

Until Rife's Universal Microscope, electron microscopes would not allow microbial organisms to thrive. The electron fields killed them. The practice of staining blood and tissue samples also destroys them before they even are placed under the microscope.

After determining the radio wave kill frequencies of several viruses in their pathogenic phases and curing cancer with 16 test subjects, Roy Rife and his radio frequency machines were destroyed after refusing to allow AMA henchman Morris Fishbein to buy him out. The incredible microscopes he had developed for his research into the pleomorphic tendencies were also destroyed.

Fast Forward to Today's Virus Wars: Does the Measles Virus Actually Exist?

A recent episode in Germany created a suppressed stir in the field of microbiology when microbiologist Dr. Stefan Lanka claimed he would award anyone 100,000 Euros who could prove the existence of the measles virus.

At first it appeared he had lost. But Dr. Lanka took his loss to a higher court with more experts and the backing of two independent laboratories. He wound up not having to pay. It turned out that the “proof” provided was a composite of several different electron microscope images. And the composite involved different components of damaged cells. The composite could not be duplicated. The German Federal Supreme Court confirmed that there was not enough evidence to prove the existence of the measles virus.

So how are they making MMR vaccines with attenuated measles viruses? That's Lanka's contention. He and several other virologists have also challenged the HIV virus as a valid viral entity and even if so, as the cause of AIDS. Some question how one virus can cause a myriad of diseases.

They all question the fact that the virus is not isolated in diagnosis. Instead, unreliable antibody tests are performed to put someone into life or death crisis over a virus that many claim really doesn't exist.

These are prominent virologists like Professor Peter Duesberg, whose contention that HIV does not cause AIDS (Acute Immune Deficiency Syndrome), has caused him to be cut from research funding and marginalized by many of his peers in the scientific community.

Saying AIDS is not from a virus but by simply running out one's inner terrain to the max and destroying oneself with lifestyle choices and the high use of legal “poppers” (amyl nitrite) was just unacceptable. But claiming a virus is the cause of AIDS and scaring everyone was okay. This was the positional view of Drs. Robert Gallo and Anthony Fauci, Director of the NIAID. Because Dr. Fauci controls grant money, researchers and scientists are reluctant to expose the late Dr. Gallo and Dr. Fauci. 38 years as the Director of NIAID, and the 3rd highest paid bureaucrat in Washington, D.C., he goes unchallenged about his “germ” theory. He holds personally, as many as seven patents on HIV “cocktails” deemed life essential for those diagnosed as having HIV.

Heavy antibiotic use also contributes to damaging one's inner terrain, especially beneficial gut bacteria that are needed for good digestion and immune responses.

Another suspect virus is Hepatitis C. No virus has been really isolated and proven according to Koch's postulates. Just another antibody test that proves antibodies exist, but for what if there is really no virus?

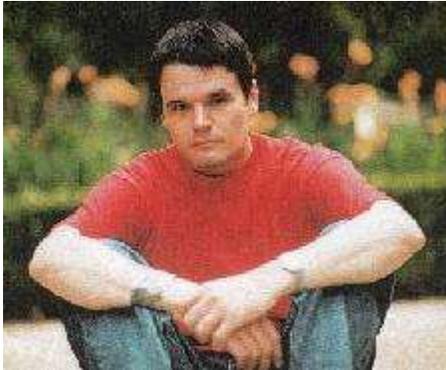

Objectively examine the results of all recent “epidemic” viral threats, including the bird flu, swine flu, Ebola, and Zika viruses. They certainly created the panic for more vaccines getting rushed into existence as well as more getting vaccinated.

And as the [U.S. vaccine court proves](#), many who get vaccinated wind up with minor, major, and chronic autoimmune diseases, sometimes paralysis, autism, and death. The

one germ one disease theory certainly seems to be a great business model for the medical/pharmaceutical industry complex.

This is where the “germ” theory has taken us. Wendy Myers explains that:

“Illness was practically always due to errors of diet or manner of living, the germs being present solely as scavengers of dead and waste tissues and foods, and not as the cause of the disease.”

Dr. Stefan Lanka, virologist and molecular biologist, is internationally mostly known as an "AIDS dissident" (and maybe "gentechology dissident") who has been questioning the very existence of "HIV" since 1994. In the past years, however, he stumbled over a breathtaking fact: **Not even ONE of the (medically relevant) viruses has ever been isolated; there is no proof of their existence.** Actually, Dr. Lanka has already stated three years ago, in the almost "legendary" **Zenger's interview:** "So for a long time I studied virology, from the end to the beginning, from the beginning to the end, to be absolutely sure that there was no such thing as HIV. And it was easy for me to be sure about this because I realized that the whole group of viruses to which HIV is said to belong, the retroviruses -- **as well as other viruses which are claimed to be very dangerous -- in fact do not exist at all.**" So he was thoroughly reading the literature on those "other viruses" again, and after he could still not find any paper which would provide the evidence, he encouraged people not to BELIEVE him but to ask the institutes and authorities themselves. This has actually taken place, mostly initiated by mothers. The responses were revealing. In September 2001 the German book "Impfen - Völkermord im dritten Jahrtausend?" (Vaccination - Genocide in the third millennium?) by Stefan Lanka and Karl Krafeld was published in which they state that **there is still no proof of any (medically relevant) virus.**

This movement (klein-klein-aktion ~ many little actions/steps) has a German website: **www.klein-klein-aktion.de** which I have taken (and translated) all the following texts from.

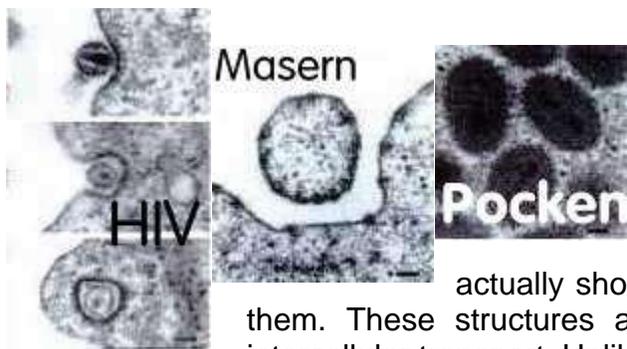

For almost one year we have been asking authorities, politicians and medical institutes after the scientific evidence for the existence of such viruses that are said to cause disease and therefore require "immunization". After almost one year we have not received even one concrete answer which provides evidence for the existence of those

"vaccination viruses". The conclusion is inevitable that our children are still vaccinated on the basis of scientific standards of the 18th and 19th century. In the 19th century Robert Koch demanded in his generally accepted postulates evidence of the virus in order to prove infection; at Koch's time this evidence couldn't be achieved directly by visualization and characterization of the viruses, because adequate technology wasn't available at that time. Methods of modern medicine have profoundly changed over the past 60 years, in particular by the invention of the electron microscope. And still all these viruses we get immunized against have never been re-examined using this technology?

Several images and explanations that we were pointed to and that were said to show resp. describe (characterize) viruses, we showed to **Dr. Lanka who gives his summarizing comments:**

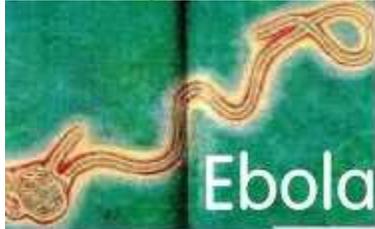

[The German original of the following text by Stefan Lanka you can find [here](#) (temporarily not available for technical reasons, Jan 11, 2003)] All these photos have in common that they, resp. the authors, can't claim that they present a virus, as long as they do not also provide the original publications which describe how and what from the virus has been isolated. Such original publications are cited nowhere. Indeed, in the entire scientific literature there's not even one publication, where for "viruses in the medicine" the fulfillment of Koch's first postulate is even claimed. That means that there is no proof that from humans with certain diseases the viruses - which are held responsible for these diseases - have been isolated. Nevertheless, this is precisely what they publicly claim. Now, regarding the photos submitted:

1. Many of the photos are colored. This is proof enough, that they are the (art)work of designers, because electron microscopic photos always appear in black and white.

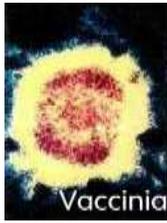

2. The images of the so called HIV-, measles (Masern)- and smallpox (Pocken) viruses clearly show, as the image descriptions partly already indicate, that these are cells wherein the viruses can allegedly be found. Thus, nothing has been isolated. The photos actually show cells and typical endogenous particles in them. These structures are well known and serve the intra- and intercellular transport. Unlike viruses of the same kind - that are always the same size and same shape (consistency) -, they differ in size and shape (consistency) and therefore can't be isolated.

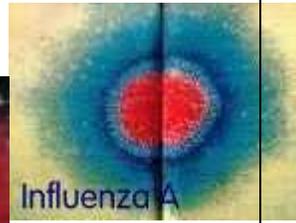

3. In the case of the influenza-
vaccinia-, polio-, adeno- and

viruses
each
photo

herpes-,
ebola-

shows only a single particle;
nobody claims that they're

isolated particles,
humans.

let alone particles that have been isolated from

These particles

above (#2) resp. typical artifacts which means: structures that accrue after inappropriate fixing and drying of the probes, while being prepared for the electron microscope.

are partially the cellular particles mentioned

4. The "isolated" polio viruses are artificial particles, generated by suction of an

indifferent mass through a very fine filter into a vacuum. Its structure (no characteristic structures) differ clearly from the ones of the "viruses" in the cells. Here the information is essential that a biochemical characterization of those "isolated" viruses, although "isolation" is claimed, has never been published anywhere nor has anybody even claimed such a characterization.

5. The photo of the hepatitis B "viruses" does not show isolated structures, but - as the

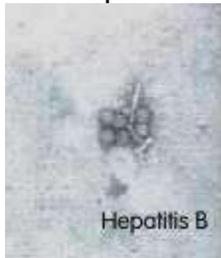

image title already says, an agglutinate. This is the scientific/medical term for proteins from the blood that are clumped together, as is typical for coagulations. Typically, thereby round and also crystal structures accrue - depending on the condition of the blood sample.

In summary, it must be said that these photos are an attempt of fraud committed by the researchers and medical scientists involved, as far as they assert that these structures are viruses or even isolated

viruses. To what extent the involved journalists and authors of textbooks have contributed to this fraud knowingly or only out of gross negligence, I don't know.

Everyone who starts a recherche in the medical literature, will quickly encounter statements and references that Koch's first postulate can't be fulfilled (i.e.

Großgebauer: Eine kurze Geschichte der Mikroben, 1997 ["a little story of the microbes"]; editor: Verlag für angewandte Wissenschaft). How these authors who claim the existence of viruses could overlook that, remains a riddle.

Could it be that the term "Contagium" = "Gift" (poison/toxin) = "Virus" from the 18th and 19th century was applied in the 20th century to the cell components which were named "viruses" since the electron microscope was introduced in 1931? And in order to hide

this, the "disease causing viruses" have often been described but never been isolated? And then they were used as seemingly logical explanation for poisonings and adverse effects of vaccination, as Luhmann (1995) (i.e.) writes about the symptomatic of Hepatitis B, which was observed for the first time in 1985 following smallpox vaccinations, and 1938 following measles vaccinations? The copies in the textbooks show only structures within cells and nothing that looks like isolation and thus homogenous. The biochemical characterization, which is crucial, lacks completely.

Robert Koch and colleagues, Prof. Rush, Prof. Max von Pettenkofer, and Prof. Virchow have shown, for instance by experiments and by observation of the Henle-Koch's rules that by transmission of bacteria, the supposed contagium vivum, it was not possible to cause the *same disease*. So Robert Koch modified (weakened) the 3rd postulate of his teacher, the German anatomist Henle, in the form that the generation of a *similar symptom* in animal experiments would be sufficient to prove this hypothesis of disease cause, namely the hypothesis of infectious bacteria. (See Großgebauer: Eine kurze Geschichte der Mikroben).

So it does not surprise me that Prof. Alfred Fischer writes in his book "Vorlesungen über Bakterien" ("[academic] lectures on bacteria") from 1897 (!): *"as is true for any infectious disease - the fact that it does not only take the addition of the bacteria but also the unknown something of individual predisposition, goes without saying."*

Dr. Stefan Lanka is a German National and because of his nationality does not hesitate to challenge and expose the likes of Dr. Anthony Fauci and Dr. Robert Redfield. He is a renowned virologist in his own right and calls into question in Europe the so-called "Germ" theory upon which Jesuits Fauci and Redfield forcefully defend. I have listened to Dr. Stefan Lanka presentations on a number of occasions and he makes the point that many American researchers state privately. They recognize Dr. Fauci's control of research grant money needed to do science and will not cross Fauci that could destroy their careers.

Dismantling The Viral Theory

by Dr. Robert O. Young

HAS THE EXISTENCE OF POLIO, MEASLES, HIV, CMV, EBV, HEP C, EBOLA, THE FLU, ZIKA AND NOW CORONA VIRUSES BEEN DEMONSTRATED AND SCIENTIFICALLY PROVEN?

The first isolation of a virus was achieved in 1892 by Russian bacteria hunter Dimitri Iwanowski, who gathered fluid from diseased tobacco plants. He passed this liquid through a filter fine enough to retain bacteria; yet to Iwanowski's surprise, the bacteria-free filtrate easily made healthy plants sick. In 1898 a Dutch botanist, Martinus Willem Beijerinck, repeating the experiment, also recognized that there was an invisible cause and named the infectious agent "tobacco mosaic virus." In the same year as Beijerinck's report, two German scientists purified liquid containing filterable viruses that caused foot-and-mouth disease in cattle (viruses were at one time called "filterable viruses," but eventually the term "filterable" came to apply only to viruses, and was dropped). Walter

Reed followed in 1901 with a filtrate responsible for yellow fever, and soon dozens of other disease-causing viruses were found.

In 1935 another American, Wendell M. Stanley, went back to the beginning and created pure crystals of tobacco mosaic virus from a filtered liquid solution. He affirmed that these crystals could easily infect plants, and concluded that a virus was not a living organism, since it could be crystallized like salt and yet remained infectious. Subsequently, bacteriologists all over the world began filtering for viruses, and a new area of biology was born-virology.

Historically, medical science has vacillated on the question of whether a virus is alive. Originally it was described as nonliving, but is currently said to be an extremely complex molecule or an extremely simple microorganism, and is usually referred to as a parasite having a cycle of life. (The term “killed” is applied to certain viral vaccines, thus implying an official conviction that viruses live.) Commonly composed of either DNA or RNA cores with protein coverings, and having no inherent reproductive ability, viruses depend upon the host for replication. They must utilize the nucleic acids of living cells they infect to reproduce their proteins (i.e., trick the host into producing them), which are then assembled into new viruses like cars on an assembly line. Theoretically, this is their only means of surviving and infecting new cells or hosts.

The Replicating Virus Theory

Then it was discovered that, when bacteria slowly begin to die, bacteria create tiny, apparently lifeless forms of survival, the so-called spores. It was then suspected that these spores were toxic and that they were the so-called pathogenic poisons. This was then refuted, since the spores are rapidly developing into bacteria when their vital resources are being restored. When scientists in the laboratory observed that the weak, highly inbred bacteria perished very quickly while turning into much smaller structures than the spores, it was first believed that the bacteria were being killed by the alleged pathogenic poisons, called viruses, and that the viruses were thereby replicating.

The Invention of Bacterial Viruses

Due to the belief that these – at the time of their discovery still invisible- structures were killing the bacteria, they were called phages/bacteriophages, “eaters of bacteria”. Only later it was determined that merely highly inbred and therefore almost non-viable bacteria can be made to turn into phages, or bacteria which are being destroyed so fast that they do not have time to form spores.

The introduction of the electron microscopy led to the discovery of the structures resulting from the biological transformation or pleomorphism of bacteria when these were suddenly dying or when the metabolism of the highly inbred germs was overwhelmed by processes triggered by the adding of “phages”. It was also discovered that there are hundreds of types of different-looking “phages”. The discovery of phages, the so-called bacterial “viruses”, reinforced the wrong assumption and the belief that there were human and animal viruses that looked the same and had the same structure. This is not and cannot be the case, for several different reasons.

After introducing chemical examination techniques in biology, it was discovered that there are thousands of types of phages and that phages of one type always have the same structure. They consist of a particular molecule, made of nucleic acid, which is covered in a shell of proteins of a given number and composition. It was only later discovered that merely the bacteria which had been highly inbred in the test tube could turn into phages themselves, by contact with phages, but this never applied to natural bacteria or bacteria which had just been isolated from their natural environment. In this process, it was discovered that these “bacterial viruses” actually serve to provide other bacteria with important molecules and proteins, and that the bacteria themselves emerged from such structures.

Before it could be established that the “bacterial viruses” cannot kill natural bacteria, but they are instead helping them to live and that bacteria themselves emerge from such structures, these “phages” were already used as models for the alleged human and animal viruses. It was assumed that the human and animal viruses looked like the “phages”, were allegedly killing cells and thereby causing diseases, while at the same time producing new disease poisons and in this way transmitting the diseases. To date, many new or apparently new diseases have been attributed to viruses if their origin is unknown or not acknowledged.

This reflex found an apparent confirmation in the discovery of the “bacterial viruses”. It is important to note that the theories of fight and infection were accepted and highly praised by a majority of the specialists only if and when the countries or regions where they lived were also suffering from war and adversity. In times of peace, other concepts dominated the world of science.[272]

It is very important to note that the theory of infection – starting from Germany – has only been globalized through the third Reich, when the Jewish researchers, most of which had opposed and refuted the politically exploited theories of infection, were removed from their positions.[273]

The Detection of Phages and Biological Transformation – The existence of phages can be proved rapidly. Bacterial pHage being born out of a blood and/or body cell. A biological process known as pleomorphism.

First step: their presence is confirmed through an effect, namely the transformation of bacteria into phages, and also through an electron micrograph of those phages. The control experiments show that phages do not appear if bacteria do not change or if bacteria randomly start decomposing due to extrinsic sudden annihilation, without forming phages.

Second step: the liquid containing the phages is concentrated and applied on another liquid, which has a high concentration at the bottom of the test tube and a low concentration at the top of the test tube. The test tube with the phages is then powerfully spun (centrifuged) and all the particles gather according to their mass and weight to the place of their own density. The density is the ratio of weight (mass) per

unit of volume, expressed as Kg/l or g/mg, respectively. That is why this concentration and purification step for particles with the same density is called density gradient centrifugation.

The layer where many particles of the same density gather becomes “cloudy”, which is called a “band.” This step is being documented, then the particles concentrated, purified and sedimented in a “band” are removed with a syringe needle. The extracted concentrated amount of particles is called an isolate. A fast and simple electron micrograph will confirm the presence of phages in the isolate, which at the same time is an indication for the purity of the isolate, if the micrograph shows no other particles but the phages. The appearance and the diameter of the phages will also be established with the help of this micrograph.

The control experiment performed for this step consists in treating and centrifuging the liquid from bacteria which did not form any phages, where no phages appear at the end of the procedure.

After the step of successfully isolating the phages, the decisive biochemical characterization of the phages follows. The biochemical characterization of their composition is essential for identifying the specific type of phage, since different types of phages often appear to be similar. The isolate obtained through the density gradient centrifugation is now divided in two parts. One part is used to determine the size, type and composition of the nucleic acid; in a separate procedure, the other part is used to determine the amount, size and morphology of the proteins of the phages. Since the 1970s, these tests have been simple standard techniques that are learned by every biology student in their first semesters.

These tests represent the biochemical characterization of the phages. In almost every case, these results have been and are being published in only one publication, since a phage has a very simple structure which is very easy to analyze. The control experiments for these tests use liquid from bacteria which do not form phages and thus cannot present any biochemical proof. The existence of approximately two thousand different types of phages have been scientifically demonstrated this way.

The So-Called Pathogenic Viruses

The “bacteriophages,” correctly defined as incomplete mini spores and building blocks of the bacteria, have been scientifically isolated, while the so-called pathogenic viruses have never been observed in humans or animals or in their body fluids and have never been isolated and subsequently biochemically analyzed. To date, none of the researchers involved in virology research seems to have realized this very important point.

The use of electron microscopy and the biochemistry were very slowly returning to normal after 1945 and no one had realized that not one pathogenic virus had ever been isolated in humans or animals; thus, as of 1949 researchers started applying the same idea used for the (bacterio) phages, in order to replicate the human and animal

“viruses.” John Franklin Enders, born in 1897 in the family of a rich financier, was active in various fraternities after having finished his studies, then he worked as a real estate agent and studied foreign languages for four years before turning to bacterial virology, which fascinated him. He then simply transferred the ideas and concepts that he learned in this area of research to the supposed pathogenic viruses in humans.

Unscientific Experiments and Interpretations Gave Birth to Virology

With his unscientific experiments and interpretations that he had never confirmed through negative controls, Enders brought the entire “viral” infectious medicine to a dead end. It is important to note at this point that Enders, like many infectious diseases specialists, worked for the U.S. military, which had always been and remains to date a huge victim of the fear of contagions. It was mainly the U.S. military which spread its erroneous belief that besides chemical weapons there were also biological weapons in the form of bacteria and viruses.

In 1949, Enders announced that he had managed to cultivate and grow the alleged polio virus in vitro on various tissues. The American expert opinion believed everything immediately. What Enders did was to add fluids from patients with poliomyelitis to tissue cultures which he claimed to have had sterilized, then he alleged that the cells were dying because of the virus, that the virus was replicating in this way and that a vaccine could be harvested from the respective culture. At that time, summer polio epidemics (polio = flaccid paralysis) were very frequent during summer and they were believed to be caused by the polio virus.

Pastor Bob Insert:

They never accounted for the military spraying of DDT as the real cause of polio, which largely disappeared once DDT was banned in 1972! Yet Bill Gates continued to give polio in his vaccines in third world countries like Africa and India. Yes, “he gives polio-laced vaccines” in his so-called vaccines! His wealth and celebrity status really masks his belief in Eugenics. Speaking of Mr. Vaccine himself, did you know that he is the #1 farmland owner in the U.S.? Fact: 268,984 acres in 18 states!

A vaccine was to help eradicate the alleged virus. After the polio vaccine was introduced, the symptoms were then re-diagnosed among other things as multiple sclerosis, flaccid acute paralysis, aseptic meningitis etc. and later polio was claimed to have been eradicated. During his experiments, Enders et al. sterilized the tissue cultures in order to exclude the possibility of bacteria killing the cells. What he didn't take into consideration was that the sterilization and the treatment of the cell culture when preparing it for the alleged infection was exactly what was destroying and killing the cells. Instead, he interpreted the cytopathic effects as the existence and the action of a so-called polio virus, without ever having isolated a single virus and describing its biochemistry.

The necessary negative control experiments, which would have shown that the sterilization and the treatment of the cells prior to the “infection” in the test tube was

killing the cells, have never been performed. However, for this “performance” Enders received the Nobel prize in 1954.

**The Invention of the Polio Virus and ‘YES’ the Measles Virus Too!
NOW We Have The Invention of the Coronavirus!**

1954 is also the year in which Enders applied and introduced the same technique in order to allegedly replicate the measles virus. As he had been awarded the Nobel prize for the alleged polio virus the same year, all researchers believed his technique to be scientifically valid. Thus, to date, the entire concept of polio and measles has been based upon this unscientific technique and fraud.

Thus, the polio and measles vaccines do not contain viruses, but particles of dead monkey kidney tissue or human cancerous body cells. To date, no negative control experiments have been done with respect to the so-called polio and measles viruses either, which would have shown that it was the laboratory procedures that lead to the cytopathic effects on the cells.

Additionally, all claims and experiments made by Enders et al. and subsequent researchers lead to the only objective conclusion, that in fact they were observing and analyzing the cellular particles or fragments and the activity thereof in the test tube, misinterpreting these as particles and characteristics of the alleged polio and/or measles viruses

Cellular Debris NOT So-Called Viruses

ALL Viruses from HIV, EBV, CMV, Hepatitis C, West Nile Virus, Ebola, Measles, Zika, and Now the Coronavirus, are ALL Phantom Viruses – Viral Existence Has NEVER Been Scientifically Demonstrated and Never Proven!

The following explanations applies to all the so-called (human or animal) “pathogenic viruses”. The six papers provided by Dr. Bardens in the course of the “measles trial” as proof for the existence of the measles virus described in a didactically ideal way the various steps of the chain of misinterpretations up to the belief in the existence of a measles virus.

The first paper was published in 1954 by Enders et al.: “Propagation in tissue cultures of cytopathogenic agents from patients with measles” (Proc Soc Exp Biol Med. 1954 Jun; 86 (2): 277–286).

This publication can be found on the internet, like all the other publications presented at the measles trial. In that experiment, Enders et al. cut down dramatically on the nutrient solution and added cell-destroying antibiotics to the cell culture before introducing the allegedly infected fluid. The subsequent dying of the cells was then misinterpreted as presence and also isolation of the measles virus. No control experiments were performed to exclude the possibility that it was the deprivation of nutrients as well as the antibiotics which led to the cytopathic effects.

Enders' and his colleagues' blindness can be explained by the fact that he truly wanted to help people, while the 'virus hysteria' was intensifying after the war and during the cold war. It can also be explained by the fact that Enders and many of his colleagues had no idea about medicine or biochemistry and they were competing with the Soviet Union for the development of the first measles vaccine. Such a pressure for success can also explain why Enders and his colleagues ignored their own reservations and cautions expressed in 1954, when they had observed and noted that many cells also died after being treated normally (i.e. without being "infected"), which they thought to have been caused by unknown viruses and other factors. All these facts and cautions were subsequently disregarded.

The second paper presented by the claimant in the 'measles trial' was published in 1959[274] and, for the reasons presented above, the authors concluded that the technique introduced by Enders was not appropriate for the isolation of ANY virus. This rebuttal is not only NOT being discussed by ALL the other researchers, but it is being ignored completely!

The 'Viral Dogma' of Pathogenic Viruses is Still Being Promoted Today!

In a third paper[275], the authors photographed typical cellular particles inside the cells and misinterpreted these as measles virus. They did not isolate any virus. For unexplained reasons, they failed to determine and describe the biochemical structure of what they were presenting as a virus in a separate experiment. In the short description of the methods used, one can read that the authors did not apply the standard isolation technique for viruses, i.e. the density gradient centrifugation. They simply centrifuged fragments of dead cells at the bottom of a test tube and then, without describing their biochemical structure, they misinterpreted the cellular debris as viruses.

Cellular Debris NOT So-Called Viruses

From the way the experiments were performed, one can only conclude that cellular particles were misinterpreted as viruses. We find the same situation in the fourth[276] and the sixth[277] publication put forward by the claimant as proof of the existence of a measles virus. The fifth publication[278] is a review describing the consensus process as to which nucleic acid molecules from the dead cells would represent the so-called genome of the polio or measles virus. The result is that dozens of research teams work with short pieces of cell-specific molecules, after which -following a given model – they put all the pieces together on paper.

However, this jigsaw puzzle made of so many pieces was never scientifically proven to exist as a whole and was never isolated from a virus, for a polio, measles, HIV or Hepatitis C, Ebola, Zika or the Corona viruses have never been seen, neither in humans nor in a test tube. Referring to this publication, the court-appointed expert stated that it described the gold standard, i.e. the entire virus genome. It is obvious that the expert did not read this paper, whose authors stated that the exact molecular composition and functions of the measles virus genome will have to be the object of further research, which is why they had to rely on other virus models in order to achieve a consensus on the structure and functions of ANY virus genome. The easiest thing for anyone to notice

is that in all of these publications, as well as in all other publications on the “measles virus” and other pathogenic viruses, including HIV, EBV, CMV, Ebola, Zika and the Coronavirus, no control experiments have ever been performed. No researchers used the density gradient centrifugation technique; instead, they only centrifuged cellular debris at the bottom of a test tube. This technique, used to collect all the particles from a fluid, is called pelletizing. From a logical and scientific perspective, it can be said that in all publications on the so-called “pathogenic viruses”, the researchers demonstrated in fact only particles and characteristics of cells. I would also like to point out that the so-called giant viruses[279] , i.e. an enwrapped nucleic acid can be found everywhere in the sea and in basic organisms. Like all bacterial phages, not only are they harmless, but they have beneficial functions. They can be also isolated by using the density gradient centrifugation, which proves their existence (see the graphic above).

I also recommend Prof. Lüdtke’s relevant review (1999).[280] He noted that at the early beginnings of virology, the majority of virologists always concluded that the structures they had mistaken for viruses turned out to be components of the cells and thus, they were only the result of the experiment and not the cause of the changes observed.

After the discovery and characterization of the phages and after introducing the dogma that the nucleic acid was the genome of all cells and viruses, the consensus was born, according to which such viruses must exist in humans and animals as well. In 1992, the dogma stating that the nucleic acid is the genotype of all cells was retracted in the scientific community. The ‘viral dogma’ of pathogenic viruses, however, is still being promoted today to the harm of billions of people. – for what?

The Bottom Line Concerning Phantom Viruses and the Polio and Measles Virus

The bottom line still holds the truth that the terrain or internal environment is everything and the germ or so-called virus is NOTHING! The germ or so-called virus can only be a symptom of cellular breakdown due to an imbalance of the delicate alkaline pH balance of the body fluids and NOT the cause of that breakdown. That is why years ago I Robert offered any scientist in the World a finder’s fee of \$5 million U.S. dollars if they could prove the existence of the HIV virus using Koch’s postulates. It has now been over 20 years and I am still waiting even though currently I no longer have the funds to pay the prize due to political assassination! It is unfortunate that a former \$5 million U.S. dollar prize offered 20 years ago was not enough money to change the current medical viral dogma that is currently paying out trillions of dollars to guess who?[281]

Robert O. Young PhD and Galina Migalko MD were the Key Note Speakers in Dubai on June 18th and 19th, 2019 for the Annual Conference on Bacterial, Viral and Infectious Diseases.

The Dismantling of the Viral Theory by Robert O Young CPT, MSc, DSc, PhD, Naturopathic Practitioner

Abstract

There is now over 100 years of documented history and research on the Polio virus and whether or not its treatment by inoculation has been successful in eradicating Polio. I

am suggesting in this article and in my lecture that there are significant findings based on historical and past and current research, including my own that the viral theory of Polio and possibly other modern-day diseases, such as Post-Polio Syndrome, Polio Vaccine-Induced Paralysis, Legionnaires, CNS disease, Cancer, HIV/AIDS and now Zika may be caused by acidic chemical poisoning from DDT (dichloro-diphenyl-trichloroethane) and other related DDT pesticides, acidic vaccinations, and other factors including lifestyle and dietary factors rather than from a lone infectious virus. I will present ten historical graphs outlining the history of Polio, the production of DDT, BHC, Lead, Arsenic, Polio vaccinations and the author's theory that chemical poisoning, vaccination, and lifestyle and dietary choices are a more likely causes for the symptoms of Polio, neurological diseases, Cancer, HIV/AIDS and now Zika.

I have not included the resource reference list for Dr. Young's paper, but will make it available if anyone wants a copy. It constitutes close to 300 references refuting the so-called "Germ" theory of Louis Pasteur. Decades later we learn the Louis Pasteur was a fraud, a fake, admitting at the end of his life *"The microbe is nothing, the terrain is everything."*

No virus has ever been isolated from a human and shown to be contagious or the cause of a specific disease. Not one. Not ever. It's all speculation and assumption.

"The microbe is nothing, the terrain is everything" –The last words of Louis Pasteur

It might surprise many of you that the U.S. holds patents on dozens of vaccines that earn approximately \$5-6 billion dollars in royalties yearly to such people as Dr. Anthony Fauci. What is wrong with that is their work was paid for by your tax dollars!

The government of the United States of America holds patents on the following viruses: Ebola, Patent number #CA2741523A1, Swine Flu, Patent number 8124101, HIV, Patent number #5676977, the cure for cancer, Patent number #6630507.

David Martin, PhD, a financial technology entrepreneur, stood in front of the Senate Office Building at a freedom rally last week and read the crimes by Dr. Anthony Fauci, Dr. Robert Redfield and Alex Azar, the Secretary of Health and Human Services:

1. 18 US Code § 2339 Funding and conspiring to engage in acts of terror against the citizens of the United States

2. 18 US Code § 2331, Section 802 of the Patriot Act, Willfully lying and coercing a population to induce fear in that population for self-interest.

3. 18 US Code § 1001 In October of 2020, Lying to Congress

4. 15 US Code §1 – 3 Conspiring to commit criminal activity by appropriating U.S. taxpayer dollars to funnel the taxpayer money into their market selected corporate interest, including Moderna, Pfizer, Gilead Sciences and others.

5. 15 US Code § 8 Engaging in market manipulation and market allocation by price fixing the prices of vaccines and therapeutic interventions for COVID-19.

6. 15 US Code § 19 A federal felony crime of interlocking directorates, controlling the means, motive and message around the COVID-19 campaign.

7. 35 US Code § 206 Violation of disclosure of government interest as Fauci failed to disclose 40 patents worth \$40 billion per year from which he personally benefits.

8. 35 US Code § 101 Violation of patent law by patenting nature.

Dr. Martin said that Americans have been forced to participate in a clinical trial that violates the Federal Trade Commission Act that forbids the promotion of the treatment or prevention of disease by an untested medical technology. This is the same act that the government has used to shut down natural medicine solutions for the past 115 years.

Dr. Martin said that the U.S. Department of Defense patented the weaponization of biological agents, which is an act of war and an act of treason. He further stated that \$191-billion of taxpayer money has been appropriated by Congress and distributed to over 6,500 organizations, more than half of which are foreign agents. He says this is a bioweapon terror attack on the United States. He is calling for law enforcement to stand up to the crimes that he listed.

In this last statement by Dr. Martin, you have confirmation of what I have stated relative to the alleged Covid-19 virus. It is a bioweapon and has been disbursed across the nation through chemtrail spraying, also known as geoengineering. Covid-19 is a label given to a biological weapon. When I was a recruit in basic training in 1956, we were given training in CBW [chemical-biological-warfare]; later renamed to NCBW [nuclear-chemical-biological-warfare].

Viruses and vaccines are a racket, a money making scheme by Big Pharma and agencies like CDC, NIH, NIAID, WHO. As Dr. Robert O. Young's paper shows, **NOT A**

SINGLE VIRUS IN SEVENTY YEARS HAS BEEN VALIDATED BY EVIDENTIAL TESTING. ASSUMPTION IS NOT Science.

Parents have been coerced by public health agencies and Big Pharma into receiving at the present time, 72 different shots from birth until the age of 18. Big Pharma wants that market to grow by mandating and requiring adults to begin receiving a schedule of vaccines that they want to establish.

In order to learn about the harm caused by vaccines so that you will not allow them to be administered to your children under any pretenses, people need to know the facts as we have presented in this article.

A more careful look at viruses shows that the diseases associated with a virus in fact are not caused by a virus. In fact, there is no such thing as an infectious disease virus. Dr. Anthony Fauci is a criminal, a murdered by stealth, as director of the National Institute of Allergy and Infectious Diseases. The fact that Dr. Fauci is a Jesuit is equally concerning, since it was the English Dr. Edward Jenner, himself a Jesuit, who is known as the father of vaccines. The history of Dr. Edward Jenner as a fraud is equal to that of Louis Pasteur.

As a reminder, diseases we vaccinate against associated with viruses are: measles, polio, smallpox, hepatitis, rubella, mumps, chicken pox, influenza, meningitis, Varicella-zoster (shingles), human papillomavirus (HPV), and rotavirus.

Around 1890, German physician Robert Koch and bacteriologist Friedrich Loeffler hypothesized that if diseases are caused by a virus, it should be possible to isolate the virus organism, and then use that isolated organism to create the same disease in another otherwise healthy animal. These criteria are known as Koch's postulates.

Koch's Postulates give us standards to determine the isolation of a virus

1. The microorganism must be found in abundance in all organisms suffering from the disease, but should not be found in healthy animals.
2. The microorganism must be isolated from a diseased organism and grown in pure culture.
3. The cultured microorganism should cause disease when introduced into a healthy organism.
4. The microorganism must be reisolated from the inoculated, diseased experimental host and identified as being identical to the original specific causative agent.

They seem pretty straightforward. But we have to take on faith, not scientific proof, that modern viruses that have been discovered have indeed been isolated under these reasonable terms to denote scientific proof.

Koch's Postulates Thrown Out the Window in Modern Times

As technology has steadily improved since Koch's time, science should have been able to conclusively prove the existence of viruses under Koch's postulates, and to have

isolated a virus under the microscope. However, no one has been able to isolate any viruses to prove that they do exist. Naturally one would expect that the medical establishment would announce this astonishing scientific discovery that disease causing viruses do not exist. But instead they did something far more sinister: they pretended to have isolated the virus by following the acceptable protocols under Koch's postulates; Claiming that a virus existed even though they could not clearly and definitively isolate it.

In other words, there is no such thing as a virus. When scientists claim to have isolated a virus, what they really have isolated is a mass of cellular material in which they believe a virus exists. If this material is filtered from sick animals believed to have a disease, and the material will kill cells in a Petri dish, then it is believed that the deadly virus has been discovered. Researchers then take some of these blended and partially filtered animal parts and look for RNA strands. If they find an RNA strand they report to the world that they have "mapped" the virus. That is science by assumption! This is a despicable misrepresentation of junk science.

THE PUBLIC HAS BEEN LIED TO SINCE THE 1950's

Devvv Kidd from the web site "News With Views writes more about this deception and deceit to which the American public has been defrauded.

It's been ten long months since COVID-19 burst onto the world's stage. What I present in this column will not be believed by millions of Americans. Why? Because of something called cognitive dissonance. *"A term used to describe how people experience mental discomfort when faced with conflicting beliefs. If someone is presented with new information that dramatically clashes with what they believed, the person will try to explain it away or compartmentalize it so as not to deal with new information."*

While I doubt there's any credible statistics, I would guess many millions of us experience cognitive dissonance at one time in our life. Let me give you two examples that might cause people to experience cognitive dissonance because *they believed something that wasn't true.*

[Is Dr. Anthony Fauci Guilty of Negligent Homicide?](#), Oct. 27, 2020: *"In 2009, Dr. Anthony Faucico-authored a paper about the Spanish Flu Epidemic that rated it as the most devastating modern pandemic. It swept the entire planet in the wake of the First World War and caused millions of deaths."*

*"In studying this major and actual pandemic, what did Dr. Fauci and his colleagues find? They discovered that most of the victims of the Spanish Flu didn't die from the Spanish Flu. **They died from bacterial pneumonia.** And the bacterial pneumonia was caused by.... wait for it, wait for it.... wearing masks."*

“The intention then, as now, was to halt the spread of the disease by wearing masks, but what actually happened was that an “unobserved” pandemic of bacterial pneumonia was unwittingly created instead.”

October 6, 2020: [Medical Doctor Warns that “Bacterial Pneumonias Are on the Rise” from Mask Wearing.](#)

Americans have believed for 110 years it was the Spanish flu that allegedly killed 20 million Americans when in fact, the majority died from wearing face masks all day long, as well as deplorable hygiene. And please remember: EVERY SINGLE ONE OF THESE FLU OUTBREAKS ARE NOTHING BUT ESTIMATES INCLUDING COVID-19 CASES.

And:

[Swine Flu Cases Overestimated?](#) October 21, 2009: If you’ve been diagnosed “probable” or “presumed” 2009 H1N1 or “swine flu” recent months, you may be surprised to know this: odds are you didn’t have H1N1 flu. In fact, you probably didn’t have flu at all. That’s according to state-by-state test results obtained in a three-month-long CBS News investigation.” The CDC lied to the American people again.

In the case of COVID-19, I can say with confidence, millions of Americans, out of fear pounded into their minds relentlessly for the past ten months by liars-for-hire aka MSM, politicians with an agenda and medical professionals, cannot and will not acknowledge We the People have been lied to from the beginning. The destruction, financially and mentally from COVID-19 destruction is so massive, millions will simply reject science and truth for mental comfort.

On the financial end, big box stores like China Mart aka Walmart and others as well as Amazon have hauled in more than a TRILLION dollars in profits while the backbone of our economy, small businesses have been wiped out in certain states; more than 215,000 to date with tens of thousands more if the big lie isn’t exposed.

I have never once said COVID-19 was a hoax. People were dying and are still dying using COVID-19 as the prime cause. With a small fraction of the huge numbers blasted daily by the lying MSM dying from COVID-19 itself (allegedly), the vast majority of those who’ve passed away have died with COVID-19, not because of it.

Facebook, You Tube and Google have censored more than one million articles on COVID-19 as well as hundreds of videos by epidemiologists, virologists, scientists who all deal with infectious diseases. Videos all banned by You Tube. From doctors with decades of experience all ridiculed, reprimanded and in some cases fired from their jobs for questioning the “official” narrative.

Governors, mayors and unelected bureau-rats in health departments throughout this nightmare have listened only to *approved* sources of “scientific” information and guidance, i.e, the CDC, WHO and their state health “experts”.

When presented with scientific analysis by someone other than the above, governors and mayors have all ignored those sources, each with decades of experience. They ignore and blow off analysis or scientific opinions of individuals who know more about viruses than they ever will. The same applies to doctors in hospitals. They simply all march in lockstep to what's called groupthink – a powerful tool used to convince masses of individuals to all think the same thing even if it's not true. I know as I had my own go around with a hospital last month ago over my mother.

“Believe science” has been the mantra during this year of destruction. Alright, let's start at the beginning. Americans get sick and start dying. We are told a new ‘novel’ coronavirus was brought to America by the Communist Chinese. Americans were told in late February. However, we're told Americans were actually dying from this virus as early as late Nov. and Dec.

As I wrote back in March and [again Nov. 23, 2020](#), this hit during the annual influenza flu season when it's *estimated* tens of millions of Americans catch each year; many die every year from the flu because of underlying serious health conditions and weak immune systems because of poor eating habits. Symptoms of COVID-19 and the influenza flu are very similar. In fact, more epidemiologists and scientists than I can fit in this column have called this virus a flu from the beginning. Here's one epidemiologist, Knut Wittkowski, with 35 years of experience who began trying to get the truth to Americans back in March:

“I'm not paid by the government, so I'm entitled to actually do science. There are no indications that this flu is fundamentally different from any other flu. The virus could be eliminated in weeks and herd immunity developed quickly if most people were allowed to lead normal lives.”

“Social distancing was employed to prevent hospitals from overflowing, which did not nearly happen. It was not needed then and it is not needed now. Everything done to date was a useless precaution. The number of infections does not matter The number of asymptomatic cases matters. We have a political pandemic, not a medical one.”

“What people are trying to do is flatten the curve. I don't really know why. But what happens is if you flatten the curve, **you also prolong, to widen it, and it takes more time**. I don't see a good reason for a respiratory disease to stay in the population longer than necessary.”

“With all respiratory diseases, the only thing that stops the disease is herd immunity,” Wittkowski continued. “About 80 percent of the people need to have had contact with the virus, and the majority of them won't even have recognized that they were infected, or they had very, very mild symptoms, especially if they are children. So, it's very important to keep the schools open and kids mingling to spread the virus to get herd immunity as fast as possible, and then the elderly people, who should be separated, and the nursing homes should be closed during that time, can come back and meet

their children and grandchildren after about four weeks when the virus has been exterminated.”

“We are experiencing all sorts of counterproductive consequences of not well-thought-through policy.”

“Well, we will see maybe a total of fewer cases—that is possible. However, we will see more cases among the elderly, because we have prevented the school children from creating herd immunity. And so, in the end, we will see more death because the school children don’t die, it’s the elderly people who die, and we will see more death because of this social distancing.

“If we had herd immunity now, there couldn’t be a second wave in autumn. Herd immunity lasts for a couple of years, typically, and that’s why the last SARS epidemic we had in 2003, it lasted 15 years for enough people to become susceptible again so that a new epidemic could spread of a related virus. Because typically, there is something that requires cross-immunity, so if you were exposed to one of the SARS viruses, you are less likely to fall ill with another SARS virus.”

He is just one of *thousands* the majority of adult Americans have never heard of thanks to censorship. I’ve covered this extensively in past columns as have so many others. Social distancing is based on NO science whatsoever. It is pure nonsense.

Lockdowns are based on NO science whatsoever. That ‘theory’ was dreamed up by a high school student. That’s a fact.

If locking down a state, social distancing and wearing a face mask were effective, why then does this alleged virus continue to infect people similar in pace to the annual influenza flu season?

I say alleged because this all goes back to science. As I have highlighted in past columns, Jon Rappoport has written some of the most informative, accurate, thoroughly researched articles on this COVID-19. Put aside all the noise and let’s concentrate on the most basic scientific protocols. I’m no scientist but like many other issues, I’ve had to learn, in-depth, about viruses.

One thing I’ve learned about a virus: you have to isolate it first and go from there. To date, neither the CDC or other governments have isolated this COVID-19 virus. They’ve used trickery. Let me repeat this truth: **To date, neither the CDC or other governments have isolated this COVID-19 virus.** Why not?

Now, if you cannot isolate it, how then do you diagnose this alleged virus?

How then do you lockdown an entire country over a virus no one has isolated?

How then do you demand people wear face masks which lowers your immune system, destroys your health and what surfaced after about seven months of this hysteria, people developing serious problems with their gums and teeth over a virus no one has isolated?

How then do you demand people practice nonsense called 'social distancing' to "help stop the spread of this virus, think about your neighbor" over a virus no one has isolated?

If this virus has not been isolated, which it has not, what basis has been used to magically create vaccines in record time to immunize you? **So exactly what are you being immunized against?**

Now cognitive dissonance sets in.

Covered all this in past columns. Every new test is counted as a new case even when it's the same person being tested 2-3 times because the RT PCR tests do NOT test for the phantom COVID-19. As I covered in past columns, by April, states throughout the country received for hospitals per 'outbreak patient' from the bankrupt U.S. Treasury: \$306,000 Alaska, \$132,000 Delaware \$131,000, California \$145,000 and Texas \$184,000. [You can find your state here.](#)

Tests. Covered every which way from Sunday in previous columns. In my October 7, 2020 column, [International Class Action Lawsuits Against Corona PCR Test Manufacturers](#), I covered the class action lawsuits that are going to be filed by Dr. Reiner Fuellmich and his team over in Germany. In an email exchange with Dr. Fuellmich on December 14, 2020, he informed me the first lawsuits will likely be in Canada. Those tests are defective and that's a scientific fact.

My mother fell in November; she's 93 with advanced dementia. She broke her toe and fractured her ankle. They took her to the ER who tested her for COVID-19 and was moved into their ICU. I was furious. She had zero symptoms. First thing I did was order the hospital that under no circumstances was my mother to be put on a ventilator. I hold her Power of Attorney, Medical POA and am executor of her will. I am her advocate, not the hospital.

I ended up speaking with a really nice lady at the hospital whose expertise is infectious diseases. I explained to her my mother did not have COVID-19 and why. She simply stated that they used the CDCs tests and guidelines. After her I spoke with one of the doctors assigned to mother and told her the same thing. The PCR test does not test for COVID-19. Response: Well, that's what we use.

Let me use this analogy: Your doctor tells you he's going to test you for diabetes but, Mr. Smith, the test being used doesn't actually test for diabetes.

A week later they put her in isolation; one bed room. I spoke with a new doctor and told him my mother did not have COVID-19 and the problem with the PCR test. He said

they would give her another test, the antigen test. Another worthless test. I was then told they were looking for a short-term nursing home to take her but California was in full capacity. I said, for what? The flu?

The next day I spoke with the woman at mother's assisted living facility about mother's diet when she finally goes back to her apt. She said, oh, your mom should be here in about 15 minutes. I said, what? Yesterday they were looking for short term nursing for a little rehab. Sure, enough, mother was transported back to her apt; I was not told by the hospital. So what happened with their fancy antigen test? I don't know yet but I've ordered up her records for that last stay.

Two months ago, the CDC cancelled the 2020-21 influenza season. That's right. They will not be doing their annual '**estimates**' on the number of cases. I thought to myself: Everyone will get one of those defective tests at a hospital or in the ER and everyone this flu cycle will be a COVID case and not the flu because that's where the big money is – next to vaccines.

It's my fervent wish that Americans who were forced into ICU's at hospitals who use the 'gold standard' PCR test (rapid or otherwise) and antigen test kits recommended by the CDC sue hospitals for medical malpractice. They use a test which does not test for COVID-19. Many Americans have only Medicare and not a secondary health insurance carrier which means they are liable for 20% of the bill. That will bankrupt many. Not to mention the fear misdiagnosing the patient, loss of time at work and other mental and financial hardships.

It's unfortunate governors and mayors can't be sued for their part in lying to the people of their state, like mine here in Texas, our governor, Greg Abbott [R].

As for the vaccines, I feel truly sorry for our military that will be forced to take a vaccine for this phantom virus as well as medical personnel, teachers and other workers who will be treated with unemployment if they refuse. All over a lie bigger than the universe.

My August 31, 2020 column, [I Will Not Take A Covid-19 Vaccine](#), covers why. Appendix 1 is a list of videos and articles on vaccines now being given across the country. I am not one of the insulting "anti-vaxxer's" maligned by the media. As a child I was given three vaccines. I only allowed those three for my daughter back in the late 1970s.

President Trump has once again been had by the big pharmaceutical CEOs with their "safe vaccine" lies and Fauci and the rest of those who stand to benefit from a vaccine. Congress has rewarded those COVID-19 vaccine manufacturers with immunity regarding safety and YOU are their guinea pig.

I have done the work in providing you with the most accurate sources of information and data on this nightmare, but Americans **must, must take the time to verify for**

themselves. These are a handful from Jon Rappoport, whose written more than 150 pieces on this phantom virus in addition to his many interviews.

April 7, 2020. This is a long, but must read (Not one of Jon's): [Was the COVID-19 Test Meant to Detect a Virus?](#)

April 10, 2020: [Corona: Creating the Illusion of a Pandemic Through Diagnostic Tests](#)

June 1, 2020: [Contact tracing in the circus of robots](#)

August 6, 2020: [COVID: How self-entitled frauds at Imperial College changed the world](#)

August 26, 2020: [Why didn't researchers do a proper study to discover whether the COVID virus exists?](#)

October 8, 2020: [The Smoking Gun: Where is the coronavirus? The CDC says it isn't available.](#)

“Buried deep in the document, on page 39, in a section titled, “Performance Characteristics,” we have this: “Since no quantified virus isolates of the 2019-nCoV are currently available, assays [diagnostic tests] designed for detection of the 2019-nCoV RNA were tested with characterized stocks of in vitro transcribed full length RNA...”

“The key phrase there is: “Since no quantified virus isolates of the 2019-nCoV are currently available...”

“Every object that exists can be quantified, which is to say, measured. The use of the term “quantified” in that phrase means: the CDC has no measurable amount of the virus, because it is unavailable. THE CDC HAS NO VIRUS.”

“A further tip-off is the use of the word ‘isolates.’ This means NO ISOLATED VIRUS IS AVAILABLE. Another way to put it: **NO ONE HAS AN ISOLATED SPECIMEN OF THE COVID-19 VIRUS. NO ONE HAS ISOLATED THE COVID-19 VIRUS.**”

October 9, 2020: [COVID: The Virus That Isn't There: The Root Fraud Exposed](#)

“The CDC is admitting the virus hasn't been isolated. In other words, its existence is unproven. You need to realize the CDC, during its own published confession (see below), is discussing this explosive situation in the context of instructing the world how to perform the PCR test.”

“The test to detect a virus that isn't there. This would be on the order of NASA issuing a guide for navigating a fleet of ships to a planet whose existence has not been established—and the population of the whole world is going to board those ships for the voyage.”

“The CDC is saying: here is how you detect the virus in a human, here is the test on which we're going to rely, here is the test on the basis of which we're going to identify all case numbers and demand all lockdowns—except we don't have the virus.”

“Why don't they have it? Because they can't isolate it. That's obvious. If they could isolate it, they would.”

Oct. 12, 2020: [The fake coronavirus and the missing study: the secret in plain sight](#):
“Stopping the production engine of the world on the pretext of finding a new virus, when no new virus has been correctly found and isolated, is a crime that supersedes the sweat and effort of doing proper science.”

“As far as what is actually going on in labs where researchers are fiddling with genetic sequences of this and that and making vast proclamations; don’t talk to me about science. Talk to me about liability and prison.”

October 22, 2020: [The virus that isn’t there, genetic sequencing, and the magic trick](#)
In Jon’s Dec. 18th column, [SARS-CoV-2 has not been proven to exist; I can do this forever](#), he links to a web site for researcher, Christine Massey, “Her latest communication reads: *“Freedom of Information reveals Public Health Agency of Canada has no record of ‘SARS-COV-2’ isolation performed by anyone, anywhere, ever”* [1]

“I urge readers to visit Massey’s site and read her new article and follow all the links. Her findings are stunning. She and her team have made about 40 FOI requests to public health agencies in various countries, requesting proof that SARS-CoV-2 has been isolated. You’ll see from the responses that not one agency has records demonstrating isolation.”

“This means exactly what it seems to mean: the virus has not been proven to exist.”
Audio interviews with Jon Rappoport: [The Creation of a False Epidemic with Jon Rappoport – Parts I – III](#) – Well worth the time to listen; I do while cooking and other chores.

I did go to [her web site](#) and spent a couple hours poring over evidence. As Jon says, it’s stunning. Also, this from her site:

Dec. 23, 2020: [Email Exchange With UK MHRA – Exposing the genomic sequence of SARSCov2](#): “When I read the Wuhan study in Feb 2020 I was mortified by the monkey kidney & foetal cell-lines which were used as a “culture” before rt-PCR amplification. Isolation was never satisfactory at any stage thereafter. I honestly felt sick. The genome sequence was computed from this.

“I set about proving that the vaccine has been created from a computer generated genomic sequence & not one isolated from an infected person, either in Wuhan or anywhere else in the world since. The Pfizer BioNTech vaccine was approved by UK MHRA (Medicines and Healthcare products Regulatory Agency) & I initiated a polite exchange of emails with them as follows:” Rest at link. Near the bottom: *“The DNA template used does not come directly from an isolated virus from an infected person.”* Case closed.

So, I again ask these questions:

How can you test for a virus which has NOT been isolated?

How can you have millions of cases for a virus that has NOT been isolated?

How can you force people to wear masks to protect from a virus that has NOT been isolated?

How can you lockdown an entire country to “keep everyone safe” from a virus that has NOT been isolated?

What are these vaccines produced in record time immunizing you for?

[Kelleigh Nelson's column](#), August 18, 2020: Historically and by definition, quarantines had always been about sequestering the sick. **Never before had anyone beat a virus by quarantining the healthy.** We were not told that quarantining healthy people was a first-of-its-kind experiment. And the experiment failed. The experiment failed she refers to is a link her column: [COVID19: A Controlled Study](#) by Colleen Huber, NMD, **May 24, 2020** – Lockdowns failed to reduce deaths in the US.

Any studies more recently? [Ivor Cummins on Why Lockdowns Don't Work and Cause Harm: CRUCIAL Viral Update Dec 7th](#) – Europe and USA Explained, Dec. 9, 2020 and December 10, 2020: [Lockdowns Do Not Slow COVID Spread, Three Studies Show](#) and Cambridge virologist: Lockdowns and masks are ‘greatest hoax ever’ – [‘Utterly unfounded public hysteria driven by the media and politicians’](#), November 18, 2020

This is also a must read which I printed out and will include this week in my package to the school board: [German Neurologist On Face Masks: ‘Oxygen Deprivation Causes Permanent Neurological Damage’](#): *“To deprive a child’s or an adolescent’s brain from oxygen, or to restrict it in any way, is not only dangerous to their health, it is absolutely criminal. Oxygen deficiency inhibits the development of the brain, and the damage that has taken place as a result CANNOT be reversed.”*

Nov. 17, 2020: [Don't believe the COVID case numbers; it's a scam Boom: Florida forcing labs to report number of PCR test cycles—game changer](#)

What can you do? Click on Appendix1 & 2 below. 1 is on vaccines, 2 is the updated flyer everyone must to get out into your cities and towns. I give them out around town, to my doctor, dentist and anyone I can. Only by massive numbers and resistance (which IS growing) will We the People be able to stop this nightmare of lockdowns and restrictions destroying lives and jobs, masks, social distancing and the lies.

Our next city council meeting is Jan. 12th. I will take a stack of my flyer (it's double-sided) and put them on the table for people to carry home with other things made available at the table. Attend your county commissioner meetings and hand out flyers. This week I will be sending the new flyer to my county commissioners and our independent school board. You must wear a mask to attend their public meetings and I refuse. I have not been in the classroom this year because I am NOT going to wreck my health by wearing a mask all day based on a lie. I am always polite in my cover letters.

Get together with friends and hand out the flyers on public property – the sidewalk at your post office. **Show this country will millions of them.** Sadly, many will put up a wall of resistance – cognitive dissidence – because they simply will not believe they've been lied to by those they trusted.

Do NOT blame President Trump. His heart is in the right place but as they say, the road to Hell is paved with good intentions. The individuals to blame are the CDC and those who manufacture PCR and antigen and anti-body tests. CDC Dr. Redfield should be hauled in front of a grand jury to explain why this alleged virus has not been isolated. Don't forget to send a flyer to your mayor, state rep and senator after they've been sworn in in a week or two as well as your congress critter. They may never read it, but their staff will and that's what counts. Americans are hungry for the truth, we must give it to them.

This COVID-19 is not a hoax, it's a crime for lying and deceiving the American people and bringing America to her knees through fear.

SARS-CoV-2 has not been proven to exist; I can do this forever

by Jon Rappoport

December 18, 2020

First of all, very high praise goes to Christine Massey, for her work in exposing the coronavirus fraud. In a half-sane world, she would have received many awards by now.

Her latest communication reads: *"Freedom of Information reveals Public Health Agency of Canada has no record of 'SARS-COV-2' isolation performed by anyone, anywhere, ever"* [1]

I urge readers to visit Massey's site and read her new article and follow all the links. Her findings are stunning. She and her team have made about 40 FOI requests to public health agencies in various countries, requesting proof that SARS-CoV-2 has been isolated. You'll see from the responses that not one agency has records demonstrating isolation.

This means exactly what it seems to mean: the virus has not been proven to exist.

As for the people who keep chanting that the virus has been isolated, I can keep explaining why this is not so. I can do this forever. [2] [3]

Whether it's a scientist, a gaggle of scientists, a government official, a person waving a study around like a newspaper with a hot headline from an old movie, my response is the same, and I make it knowing that some people will intentionally refuse to understand it:

ONE: SAYING the virus has been isolated is not the same thing as proving it's been isolated.

TWO: Researchers routinely twist the meaning of the word “isolated” to mean it’s very opposite.

Isolation is absurdly taken to mean: “We have the virus in a soup in a dish in the lab. It is not separated out (isolated) from the soup. The soup contains various cells—human, monkey—and an array of (toxic) chemicals and drugs. We know the virus is there, because it is infecting and killing some of the cells.”

A reasonably bright junior high school student would immediately realize this is not a description of isolation.

A reasonably bright high school student would point out that there is no proof the virus is infecting and killing cells, because the toxic chemicals and drugs in the soup are sufficient to do the cell-killing. He might also mention the cells in the soup are being starved of nutrients, and this alone could cause their death.

Therefore, there is no evidence that “the virus” is actually in the soup.

Therefore, there is no evidence in this situation for claiming the virus exists at all.

On to the next factor: the ever-present claims of having “sequenced the genetic structure of the virus.” Again, SAYING the sequencing has been achieved is not the same thing as proving it.

And proving it is impossible, if you don’t already have the virus in a purified and isolated state. Instead of proof, you have shady inference and assumption and guesswork and deception.

How can you sequence something you don’t have? You can’t.

I’ve used several analogies to explain this nonsense. Here is another one:

An art restorer, conservationist, and historian is called to the home of a well-known mob enforcer.

The enforcer tells him he has something to show him in the attic. On the way, they pass through the living room, where several open suitcases are sitting on the floor. They’re spilling over with stacks of cash. Automatic weapons and boxes of ammo are laid out on a long table. In an open closet, the art expert sees a row of jackets with designations indicating: FBI, BATF, Federal Marshal, sheriff, local police.

In the attic, the mob enforcer points to a small pile of tiny chips on the floor.

“These are from a lost Rembrandt self-portrait,” he says. “Collect them, go to work on them, give me a favorable report. Or else.”

Back in his lab, the obedient art expert quickly divides the chips into three groups. The first group is water-color chips from a child's toy set. The second group is mid-20th-century acrylic chips. The third group is lead white chips, used for a hundred years on either side of the rough date when Rembrandt could have painted the lost self-portrait.

The art expert finds that Rembrandt (and hundreds of other painters) used this general type of lead white.

The expert constructs, from other scholars' work, an essay claiming there was and is a lost Rembrandt self-portrait. He excludes commentary that denies the existence of this painting.

He "sequences" all this information and conjecture and guesswork (and con) into a convincing report, which points to the small pile of chips in the mob enforcer's attic.

(It turns out the enforcer intends to accuse a rival mob boss of stealing the "lost Rembrandt self-portrait.")

The existence of the self-portrait is thus "established," which is to say, it is put together, cobbled from various sources, concocted, smoothed out by ignoring counter-information—employing a vast generality about lead white paint.

Of course, in all this ridiculous invention, the self-portrait itself is not there, it is not in hand, its existence has not been demonstrated, and it is a story, THERE IS NO ISOLATION OF IT from surrounding assumption and gimcrackery.

So it is with SARS-CoV-2. Pieces of data that reference prior supposed RNA sequences in libraries are all strung together, to resemble what is claimed to be a new and unique coronavirus—without having the actual virus, without having shown it exists at all.

In past articles, I've quoted two key documents, one from the CDC, and one from "the Drosten group." These documents were describing how to perform the PCR test for the new virus—and in both documents, the authors state they don't have the virus.

So...a test for what? The virus you don't have.

All claims that these authors eventually DID obtain the virus are based on the crooked definition of "isolated" I've explained above.

Yes, they got hold of "isolated virus," meaning the soup in the dish in the lab—and we're back where we began. Isolation meaning non-isolation.

I've explained all this several times, in detail, in past articles, and of course people here and there continue to send me studies claiming isolation.

I can do this forever.

People can say, *“Well, we know from photos of Martian soil samples that on the second Tuesday in March, 1843, there was a picnic on Mars attended by three virologists from the Martian Institute of Epidemiology, and they ate baloney sandwiches on rye toast and drank Miller Lite.”*

I enjoy these fictional tales in a vacuum. I would leave them alone, except that the failure to prove the existence of SARS-Cov-2 is at the bottom of all the lies that have been used to steal the freedom and assets and livelihoods from at least a billion people. I won't leave that alone.

Neither should you.

“...but wait, Mr. Rappoport, here is a study from Outer Mongolia that states the virus has been isolated. This seems to settle the science on this issue, once and for all.”
Sure. Sure it does. And the sun sets every day at noon in Cincinnati.

After a year we are hearing propaganda like this: I am sure we all heard about this one days ago. COVID Vaccine maker Moderna CEO said we will have to live with the virus forever, it is not going away.

Surprise! Shocked! Dismayed!

“SARS-CoV-2 is not going away. We are going to live with this virus, we think, forever.”
[Moderna CEO Stephane Bancel](#)

Give me a break. We knew this all along. We could have predicted it coming from Big Pharma.

Back in March of 2020, [Dr. Fauci said SARS-CoV-2 would become seasonal](#). Then we had this one, [Scientist: Coronavirus 'Will Be With Us Forever'](#).

We knew back then this show would be never ending. So open it all up already. [Lockdown's do not help](#) anyway. These headlines only show how much of a farce this whole COVID pandemic really is.

Meanwhile, the data shows there are no excessive health related deaths in the United States year over year. The data also shows the seasonal flu has all but disappeared! So

we know our government and media is perpetrating a massive lie on us and the people of the world.

- [Johns Hopkins: “No Evidence That COVID-19 Created Any Excess Deaths”](#)
- [Has COVID Killed Off The Flu?](#)

Here is another thought.

Tech companies continue to gear up for a COVID-19 Passport, a subject we have discussed many times last year. Add to the fact, vaccine manufacturers now have a green light to produce and profit off yet, another vaccine.

All for a virus with a [99.98% survival rate](#). If that does not document how we are being controlled and conditioned to the whims of government, I don't know what does.

Speaking of, there are now trends to wear two masks, because two is better than one right?

How insulting to the intelligence of the people, and many continue on with the lie. Even when the [CDC, WHO, And Scientific Journals Admit Face Masks Are Not Effective, And Maybe Harmful](#).

A second mask will not help you, but it will cause you more fear, panic, and anxiety. It will also make it even harder to breathe. The more we wear the masks, the more we enable the lie. Just remember that.

So the shot does not give immunity.
Does not eliminate the virus.
Does not prevent death.
Does not guarantee you won't get it.
Does not prevent you from getting it.
Does not stop you passing it on.
Does not eliminate the need for travel bans.
Does not eliminate the need for business closures.
Does not eliminate the need for lockdowns.
Does not eliminate the need for masking.
So...what the hell is it actually doing?

The liars did not change their tune, they dragged up another more virulent virus and are fear-mongering the public with this propaganda. We are being scammed by the bully pulpit into submission by quacks and scammers like Edward Jenner and Louis Pasteur.

At least 10 state health departments in the United States have (allegedly) detected the highly contagious B.1.1.7 variant of COVID-19, the disease caused by the CCP (Chinese Communist Party) virus, according to a new report.

The U.S. Centers for Disease Control and Prevention (CDC), in an update on January 15, said that a *“more highly transmissible variant of SARS-CoV-2, B.1.1.7, has been detected in 10 U.S. states.”* SARS-CoV-2 is another name for the coronavirus that is believed to have emerged in Wuhan, China, in late 2019.

Health officials warned that models have shown the B.1.1.7 strain of the virus has the potential to increase *“the U.S. pandemic trajectory in the coming months”* and *“warrants universal and increased compliance with mitigation strategies, including distancing and masking.”*

Increased vaccinations may need to be achieved to fight the virus, the CDC said. This comes as no surprise as the narrative of the alleged Covid-19 unravels like a ball of yarn. I anticipated this to be the next phase of this entire scandemic. Fear of death is cheap and useful propaganda for those wanting to exploit the death statistics. We are in winter and the CDC chose not to report the yearly flu data for this flu season and have lumped flu data into the alleged Covid-19 statistics.

As a case in point, they reported 3,928 Covid-19 deaths for January 15th, 2021. I do not down play or denigrate death, but in terms of numbers, this number of 3,928 deaths is insignificant. 3,928 is approximately 1.2 deaths per county in the U.S. As I pointed out in my articles on “Media Exaggeration”, the fear-mongering media would have you believe this is a pandemic, or an epidemic. It is neither! In a country of 331-million, a fatality rate of 1% would mean the death of 3,310,000. As I have showed before, we are not even close to such numbers.

This variant was first reported in the UK in mid-December, although the CDC noted that it may have emerged in September, 2020. Meanwhile, B.1.1.7 has been detected in more than 30 countries, the agency said, while adding that it is easier to transmit than other CCP virus strains.

In the United States, the strain was first reported by state authorities in a rural area in Colorado, hours away from Denver. Other than Colorado, the B.1.1.7 variant was discovered in Pennsylvania, New York, Illinois, California, and more, according to reports published in recent weeks.

“The modeled trajectory of this variant in the U.S. exhibits rapid growth in early 2021, becoming the predominant variant in March. Increased SARS-CoV-2 transmission might threaten strained health care resources, require extended and more rigorous implementation of public health strategies, and increase the percentage of population immunity required for pandemic control,” said the CDC.

UK authorities said last year that the new variant of the virus was the reason for the increase in infection rates in London and southeastern England. But they said there’s no evidence that the variant makes people sicker.

The CDC, in its update, did not appear to recommend any new mitigation strategies.

“Further, strategic testing of persons without symptoms of COVID-19, but who are at increased risk for infection with SARS-CoV-2, provides another opportunity to limit ongoing spread,” according to the CDC. *“Collectively, enhanced genomic surveillance combined with increased compliance with public health mitigation strategies, including vaccination, physical distancing, use of masks, hand hygiene, and isolation and quarantine, will be essential to limiting the spread of SARS-CoV-2 and protecting public health.”*

Previously, the CDC noted that so far, there have been a number of mutations to the virus.

“Among these possibilities, the last—the ability to evade vaccine-induced immunity—would likely be the most concerning because once a large proportion of the population is vaccinated, there will be immune pressure that could favor and accelerate emergence of such variants by selecting for ‘escape mutants,’” the CDC said. *“There is no evidence that this is occurring, and most experts believe escape mutants are unlikely to emerge because of the nature of the virus.”*

As a final thought we cannot ignore what Dr. Judy Mikovits said ten months ago. MANDATORY COVID VACCINES WOULD KILL AT LEAST 50 MILLION AMERICANS, DO NOT VAX!! That figure is based upon what researchers learned about the number of Americans who already have the pathogens already in their body based upon previous virus studies. This is not a number grabbed out of thin air. Dr. Judy Mikovits exposed Dr. Anthony Fauci more than 25 years ago. I have both of her books and have read each of them twice to date. Some virologists suggest that 90% of Americans may already have the antibodies for this alleged virus.

Blessings,

Pastor Bob, EvanTeachr@aol.com
