

Worldwide 5G Genocide Starting in October

It is absolutely astonishing how ignorant people are of the evolving EMF cellular telecom industry is rolling out. 15,000 towers are being constructed each and every month, both large as well as the smaller utility pole mounted. Several sources have stated October 28th, 2020 is the debut for full power.

Here is why 5G built into our electrical system is so dangerous:

- 4G is 7GHZ or less
- 4.5G (4G Plus) is 7-12 GHZ (typical of TSA airport check bag scanner)
- 5G is 15-300 GHZ
- At 10 GHZ the human immune system starts to falter, sleep is impaired and healing is minimized
- At 10-30 GHZ, disorientation sets in, feeling tired, drowsy, weak, trouble sleeping, dry mouth, dehydration, poor cell turnover and lowered hemoglobin, depression, anxiety and other symptoms of radiation poisoning/ microwave syndrome.
- At 35 GHZ the oxygen molecules in the air and our bodies begin to spin, making it impossible for our hemoglobin to uptake oxygen causing hypoxia or asphyxiation. 75% of healthy people will die in the first 2-3 days of being exposed to 35 GHZ consistently. The healthiest will die within a week.

- At 50 GHZ, nothing survives, including birds, bees, trees etc.
- At 60 GHZ everything goes up in flames (similar to the wildfires in the US right now in 5G areas)
- They are currently experimenting daily with frequency changes (I feel every shift) to normalize people's symptoms and exposures so no one notices what is happening. They are experimenting to see how high they can go before people start noticing.
- Many areas where the map shows only 4G or even 3G and yet they have 5G frequencies already pulsing.
- They increase the frequencies at night so people sleep poorly, causing a weakened society, and lower it during the morning, increasing again in the afternoon.
- 5G is the most dangerous large-scale and immediate-acting bioweapon in all of history.
- 5G is the equivalent of having a loaded gun pointed to every single one of our heads, no matter where you live, where you work, what your race, what your social status or how much money or skills you have, you are the mercy of that dial.
- If you have electricity right now, you can be killed in an instant if they blast the frequency through your home at anything over 35 GHZ.
- <https://www.nperf.com/en/map/5g>

This is the genocide agenda:

- All 5G infrastructure is already in place. Look at receivers already placed on your streetlights, smart meters, your electrical outlets and appliances, the towers themselves, rooftop receivers, etc.
- Next is poisoning people with aerosols, and toxic food and water to falsify the second wave.
- Once people are in lockdown, they cannot leave their homes these areas are then easy 5G kill zones.
- The government can choose to increase the frequency anytime they decide and depopulate as much as they want, in any chosen area.
- Unless you are very far off-grid, without any electricity and no neighbors who have it either, you are, as we are, currently sitting in a potential kill zone.
- I have tried reaching out to colleagues, health pioneers and other popular leaders in the natural movement but everyone is afraid to share this as they feel they will be killed immediately and censored to block the sharing of this info.

Below is the copy of a letter sent to independent journalist Benjamin Fulford by one of his Web page subscribers. Ben Fulford is a Canadian independent journalist who covers news from Asia, and resides in Japan.

Dear Mr. Fulford,

I was badly poisoned on 2 recent humanitarian flights home from Central America, through Houston airport and on to Canada, as was my travel partner- we almost died.

The airlines were United and Air Canada. Upon trying to detoxify and researching what happened to us, I discovered that they are using new 'Fogging' nanotechnology chemicals, metals, and aerosols on aircraft under the guise of new anti-COVID 19 measures.

Through multiple holistic means, we were found to be actively poisoned with 'Benzalkonium chloride, benzyl chloride, chloro-aceto phenone', ammonia, radioactive aluminum, radioactive mercury, and nanobot technology. The first few chemicals used are on the list of WW1 chemical warfare agents on Wikipedia here (others are degradation products from the human body processing these poisons):

https://en.wikipedia.org/wiki/List_of_chemical_warfare_agents

The two nano-chemicals I believe were used on our aircraft are (confirmed by a private jet company as the main chemicals used for Fogging):

BACOBAN:

https://new.parkdentalresearch.com/shop/index.php?route=product/product&path=101103&product_id=351

VIRACLEAN: <https://www.catalog.md/drugs/vira-clean.html>

THE CHEMICAL DEGRADATION PROCESS AND ADDITIONAL POISONS PRODUCED:

https://en.wikipedia.org/wiki/Benzalkonium_chloride

<https://pubchem.ncbi.nlm.nih.gov/compound/Pyrrhione-sodium>

https://en.wikipedia.org/wiki/Benzyl_chloride

The cognitive impairment from this experience cannot be described (from perfect health to vision loss, nausea, hearing loss, loss of equilibrium, inability to process information, inability to speak, read or write, seizures and so much more. I am blessed to work in health and to have gone on an immediate and rigorous detox program which helped significantly though long term- impairment may be the outcome as these are very noxious poisons. Others on our flight or other flights might not be as lucky.

THIS IS THE EXACT PROCESS THEY USE TO SANITIZE PLANES:

First, they spray a sheet of positively charged 'nano-glass' called electrostatic spraying (sometimes with chemicals and sometimes without), then they aerosol the entire plane with the active nano-particle chemicals (as shown on the websites above), which are said to self-replicate for up to 10 days after application, only they are using the chemicals between every single flight, and in some cases all night long for 8 hours straight. Traveler's then board the plane just 60 minutes after application.

Apparently the nano-material technology makes it so that the product cannot be re-applied repeatedly and once coated, it will reject more coating for the next 10 days back into the air.

This is advertised as making the product go-farther with less use' but when applied repeatedly as airlines are doing, the result is that these charged atoms spew back into the air as a potent positively charged aerosol being attracted to the next neutral or

negatively charged atoms that enter the flight, such as the body and lungs of human beings.

As if this were not enough, they end the treatment with a UV light blast of the entire aircraft, using mercury lights which when turned on, release a potent mercury vapor into the air, to further cause harm to the coming passengers.

If you dig into this, you will quickly see that this is nothing short of an aerosol vaccine program meant to incept healthy humans with unapproved, unconsented poisons and nano-technology.

The worst part is that this is already happening in schools, and some public places, and soon to be in stores, malls, movie theaters, condo building lobbies and subways, buses and rental cars. Children around the world are being diagnosed with rare brain diseases and I believe it's from exposure in schools.

I have PDF's full of info I can send you if you want more info on Fogging, however, my own personal poisoning, awful as it is, is not why I contacted you.

Through this experience both my travel partner and I are now extremely EMF sensitive and upon returning to Canada, became incapacitated once in 5G radiation. I became quickly aware that I am now (thanks to nanobot brain poisoning) a walking human Geiger counter. The nanobots in my brain allow me to sense with inhuman accuracy every single deviation in microwave frequency and I feel every 5G tower, meter, street light, and receiver long before I see it.

This led me to dig into the 5G/ nanobot/transhumanism agenda rabbit hole and fell across what I believe is a global genocide agenda using 5G frequency. This agenda is set to be rolled out this coming October, and continued from city to city until next August and will result in hundreds of millions of deaths in the US, Canada and possibly much more worldwide.

This is the real reason why I contacted you:

- I believe the above mentioned fogging chemicals are being dumped on us via Chemtrails and in public spaces, and will be used to falsify a second COVID wave, as the new COVID symptoms are identical to those of Benzalkonium chloride and radiation poisoning.
- I believe this is an aerosol mass-vaccination agenda. The coming COVID vaccines will also contain nanobots and nano-technology.
- I believe that anyone infected like I am (and soon to be everyone) will be hyper-reactive to 5G and will become a physical part of the electrical smart grid pulling frequencies to their brains as if they were a human tower. This enables mind control, implanting of emotional reactions, and thoughts via frequency manipulation and creates transhumanism.

- I believe they locked people down earlier this year under the false guise of a virus so they could roll out 5G in every part of the world on current infrastructure so that nobody would notice.
- I have traveled extensively this last month trying to find a 5G-free safe haven and there are none. Even remote areas of Canada and impoverished areas of Central America have 5G infrastructures already in place and frequencies already being emitted.
- 5G is NOT a WIFI issue, this is an electrical agenda and the microwaves pulse into the house and environment via electrical wires, signals, smart meters, and house-hold appliances and plugs, NOT VIA WIFI ROUTERS EXCLUSIVELY.
- Areas with 3G or less WIFI strength actually have 5G infrastructure already set up in their electrical systems.
- Areas around the world without WIFI at all are still experiencing microwave pulsing throughout the day.
- Big Tech used the term 4.5G (4G PLUS) to build the 5G infrastructure without drawing attention to 5G itself which is highly controversial and not widely accepted by the population.
- I believe that the global plan is to vaccinate people (both through inoculation of the willing and forced aerosol poisoning of the resistant) with nanobots and then to blast 5G anytime there is population resistance to first control people, then to actually kill them.
- I believe that 5G, and only 5G, is why people died in WUHAN in 2019, then Italy, Queens NY, now Sweden (being blasted as we speak) and so many other areas to come. They were dosed with, or vaccinated with nanotech, and then the frequency was increased as a test to see which frequencies had people falling dead and at which rate.

This letter to Ben Fulford has been one of the most recent incidents by someone who has a grasp on what is occurring as this 5G technology is close to its official debut in the U.S. By and large few seem to understand the serious nature of what is happening throughout the U.S.

Electromagnetic hypersensitivity from microwave technology has been medically proven since 2015. Catherine Frompovich, who writes on EMF technology posted an article on November 20, 2015.

Finally, there's documented medical proof that electromagnetic hypersensitivity is a real-time health issue that actually can be verified using standard medical procedures and testing capabilities.

An international group of researchers aced it when they published their findings from the clinical study "Metabolic and Genetic Screening of Electromagnetic Hypersensitive Subjects as a Feasible Tool for Diagnostics and Intervention" in the November 2014 issue of [Mediators of Inflammation](#).

So, the million-dollar-question has to be, “*When will utility companies get up to speed on the latest in microwave technology damage to the human body?*” Also, “*When will public utility commissions nationwide institute proper procedures to protect consumers from such damage?*”

Pennsylvanians currently are being bombarded by non-thermal health problems from public utility companies’ electric, natural gas and water Smart Meters, which operate using microwave technology.

Furthermore, the PA House Consumer Affairs Committee Chair Robert Godshall sits on Opt-Out Bills that will permit electro sensitive consumers and others to keep safe analog meters, which have been in use for decades.

Below is the Press Release Pennsylvania Smart Meter Awareness (PASMA) released November 19, 2015, which discusses pertinent issues to EHS and Smart Meters.

**MEDICAL STUDIES CONFIRM ELECTROMAGNETIC HYPERSENSITIVITY:
ARE UTILITY SMART METERS CAUSING HEALTH PROBLEMS FOR
PENNSYLVANIANS?**

Electromagnetic hypersensitivity, or electro sensitivity (EHS), is a condition affecting more and more individuals who are exposed to electromagnetic fields (EMFs) and

radiofrequencies (RFs) from radios, televisions, Wi-Fi, “dirty electricity” coming over household wires from utility companies smart meters (SMs), microwaves, photocopiers, plus cell phones and towers. Worldwide, the numbers of people affected by EMFs and RFs increase exponentially, and add to other environmentally sensitivity-related illnesses such as multiple chemical sensitivity (MCS), chronic fatigue syndrome (CFS), sick building syndrome, Persian Gulf War veteran syndrome, and amalgam disease.

In Pennsylvania, children’s and adults’ health is being harmed by electric, natural gas, and water utility companies’ smart meters!

The World Health Organization (WHO), in a December 2005 Background paper, stated: EHS is characterized by a variety of non-specific symptoms that differ from individual to individual. The symptoms are certainly real and can vary widely in their severity.

Whatever its cause, EHS can be a disabling problem for the affected individual. [...] For EHS individuals with long lasting symptoms and severe handicaps, therapy should be directed principally at reducing symptoms and functional handicaps. This should be done in close co-operation with a qualified medical specialist (to address the medical and psychological aspects of the symptoms) and a hygienist (to identify and, if necessary, control factors in the environment that are known to have adverse health effects of relevance to the patient).

Treatment should aim to establish an effective physician-patient relationship, help develop strategies for coping with the situation and encourage patients to return to work and lead a normal social life.

The WHO published online information about that workshop on electromagnetic hypersensitivity in 2004 [here](#)

PASMA wants to remind the Pennsylvania state legislature and the PA Public Utility Commission (PUC) that EHS is a harmful health—and even-life-threatening—issue for those affected, which utility companies are remiss about, in understanding that harm, by denying that such effects are medically proven and that SM-caused EHS cannot—and will not—be mediated by replacing AMI SMs with EMF-free analog meters, which were used safely for decades, and which other states’ utility companies are allowing. The control factor in the environment relevant to many EHS problems is traceable to the installation of smart meters on home properties.

PASMA further wants to point out what the WHO stated at the EMF workshop, which utilities, the PA legislature and PA PUC need to implement: *help develop strategies for coping with the situation and encourage patients to return to work and lead a normal social life.*

For those EHS individuals impacted by SMs, legal opt-outs from SMs are a necessary ethical and medical exception to PA 129, and must be granted. SM-induced health issues are serious matters, which need to be addressed intelligently by state officials,

and very soon, as too many Pennsylvanians cannot lead normal lives due to Smart Meters.

PASMA respectfully directs PA legislators and the PA PUC to clinical studies in the journal *Mediators of Inflammation* Volume 2014, Article ID 924184, where researchers published their results regarding EHS.

In their clinical study “Metabolic and Genetic Screening of Electromagnetic Hypersensitive Subjects as a Feasible Tool for Diagnostics and Intervention” published as an open access article, they say,

Till now, no causal relationship between electromagnetic fields exposure and onset of clinical symptoms has been clearly proven. [...]

The profiles of metabolic parameters’ alteration observed in EHS subjects were comparable to those of the “pure MCS” group, though generally less pronounced (Figures [5–8](#)). Similarly to those MCS patients self-reportedly nonelectrosensitive, the EHS cohort showed a highly significant-versus-control decrease in the erythrocyte GST activity and an increase in GPX activity levels (Figure [5](#)), coupled with a marked decrease of GSH levels (Figure [6](#)). [...]

A second parameter proved to be significantly different () between EHS and MCS groups that is the ratio omega-6/omega-3 polyunsaturated fatty acids in the erythrocyte membrane phospholipid fraction (Figure [7\(c\)](#)). [...]

Further developments must necessarily include a more objective and standardized classification of individual electromagnetic sensitivity scores, to conclusively assess the proposed parameters as a distinctive and specific panel of disease biomarkers for EHS. Our findings will hopefully contribute, in combination with the so-far putative genetic-risk factors, a better molecular definition of environmental-borne sensitivity-related illnesses and a tool to discriminate single SRI comorbidities, based on sufficiently proven molecular evidences able to gain clinical consensus.

Smart Meter technology is based on microwaves, which is damaging the health of Pennsylvanians; has to be corrected by the PA legislature and PA PUC, since it’s counter to and, undoubtedly, violates the Nuremberg Code, including the Third Amendment to the U.S. Constitution, which states: “The right of the people to be secure in their persons...shall not be violated.”

Certainly, Pennsylvania’s children’s and adults’ health status is being compromised and violated 24/7/365 from EMFs, RFs, and the dirty electricity produced by Smart Meters.

In France, Over 60 Mayors and Officials Call for a 5G Moratorium

A petition addressed to Prime Minister Jean Castex, signed by over sixty elected officials including Jean-Luc Mélenchon (deputy of Bouches-du-Rhône (FI)), Manon Aubry (European deputy (FI)) or Michèle Rubirola (mayor of Marseille) who urged the

government to decide on a moratorium on the deployment of 5G. The petition references the increase in wireless exposure and the need to assess environmental effects before deploying 5G.

“We, mayors and elected officials are immediately proposing a moratorium on the deployment of 5G at least until the summer of 2021. During this moratorium, we are asking for a decentralized democratic debate on 5G and on digital uses. We ask the municipalities for the right to subsidiarity concerning the application of the precautionary principle.”

“The 5G wave emissions are added to those of previous technologies, 4G, 3G and 2G, which will lead to an increase in the level of exposure of the population to the waves. Likewise, it is urgent to question the health impact of the proliferation of hyper-connected objects.”

“The environmental impact induced by digital uses continues to increase, and, with the explosion of uses, the gains expected by the falsely called “dematerialization” have not been demonstrated. ...In addition, the deployment of 5G will exponentially accelerate the exploitation of non-renewable natural resources, pollution due to the extraction of rare metals, and the generation of a quantity of waste that can hardly be recycled. At present, a very small number of mobile phones in circulation and on sale are compatible with 5G. The deployment of this mobile network will therefore involve the renewal of a large part of the equipment, further increasing the ecological footprint and the weight of waste, in an attempt to benefit from a technological innovation whose usefulness remains to be demonstrated. A preliminary environmental impact study on 5G is therefore necessary before considering its deployment.”

[Link to Petition of France Mayors and Elected officials](#)

A rapidly growing list of governments is investigating 5G amidst the growing awareness of health and environmental impacts. Many are suspending deployment while the issue is examined. Examples include [Slovenia](#), [Nigeria](#), [PaPau New Guinea](#), [Belgium](#), [Netherlands](#), and [Australia](#). Over [415 Cities in Italy](#), several [Cantons in Switzerland](#), and several municipalities in the [United Kingdom](#) and [Ireland](#) have passed resolutions to halt the roll out.

There is a large and growing body of scientific evidence indicating that the densification of 5G and small cells will create serious health and environmental impacts due to the increased radiofrequency radiation exposure. [Read published research HERE.](#)

This petition from France joins numerous official calls to halt 5G. For example:

The [majority of scientists worldwide](#) oppose 5G until studies show that it's safe. Since 2018 there have been reports of people and animals experience symptoms and illnesses after it was installed (see [1](#), [2](#), [3](#), [4](#)). Of course [other sources of wireless radiation](#) and [Electromagnetic Fields](#) (aka "[Electrosmog](#)") can cause [symptoms and illnesses](#) too. LAST YEAR the [World Health Organization](#) issued a warning about a significant percentage of people being affected by exposure.

5G opposition isn't isolated to increased radiation risks (see [1](#), [2](#), [3](#), [4](#)). For one thing, experts predict it will cause [millions of people to lose their jobs](#).

President Trump plans to nominate Nathan Simington, currently a senior advisor in the National Telecommunications and Information Administration (NTIA), to the FCC, the White House announced on Tuesday. The nomination must be confirmed in the Senate.

Simington served as senior counsel to Brightstar Corporation from June 2017 until June 2020, when he joined the NTIA as senior advisor. At NTIA, he works on spectrum allocation, 5G security and internet freedom issues, the latter of which timely correlates to his nomination to the FCC.

Trump had nominated current FCC Republican Commissioner Michael O'Rielly for another term on the FCC, but abruptly withdrew that in August, presumably after

O’Rielly gave a speech where he expressed concerns about regulating social media content.

CSPs need to evolve from legacy OSS and hardware networks to cloud-native, software-enabled networks. See who's leading.

In May, the Trump administration drafted an executive order requiring the NTIA to petition the FCC for new regulations on social media practices related to Section 230. Simington helped draft that executive order, [according to The Verge](#). Section 230 of the 1996 Communications Decency Act protects social media companies from liability for content created by their users and allows them to remove objectionable posts.

Wireless industry lobbying group CTIA congratulated Simington on his nomination. *"He has a wide range of experience in the public and private sectors and strong knowledge of the wireless industry, which will be important as the FCC continues its work to help America lead the emerging 5G economy,"* said CTIA President and CEO Meredith Attwell Baker in a statement.

While at Brightstar, Simington negotiated deals with companies across the spectrum of the telecom and internet industries, including most of the world’s leading wireless carriers, the White House noted. As the head lawyer on the advanced mobility products team, he spearheaded numerous international transactions in the devices, towers and services fields and forged relationships with leading telecom equipment manufacturers. Originally from Saskatoon, Canada, he became an American citizen in 2017, according to his bio.

Brightstar, a wireless distributor, was founded in 1997 by former Sprint CEO and Chairman Marcelo Claure, who is now at Softbank, which bought a majority stake in Brightstar back in 2013. Claure is serving as CEO of Softbank Group International and executive chairman of WeWork; he also is on the T-Mobile Board of Directors.

Blessings,

Pastor Bob, EvanTeachr@aol.com
