

Warning!

CHD v. FCC

Stopping the OTARD Rule, NO 5G Antennas on Homes!

Hi All,

We need your help.

Have you received a flyer, email, or any other communication offering you money in exchange for installing an antenna on your home? Please read this email even if you haven't, because you may receive one soon.

On March 29, 2021, the FCC's OTARD rule amendment went into effect. As a result, fixed wireless companies can now install base station antennas (for 5G, voice, and Wi-Fi) on private homes. Companies don't need to get a permit or even notify neighbors that an antenna will be installed. They only need to contract with the homeowner. This rule change will be used to enable the most significant proliferation of wireless and 5G ever, creating a wireless "Wild West."

Since the rule went into effect, wireless companies covered by OTARD (known as fixed wireless companies) have been contacting people to ask if they would be interested in

installing an antenna on their house in exchange for payment. Here is an example of a flyer we got a hold of:

“Earn \$600 – Get paid for doing nothing while helping your community. Be the first person to provide the Internet of Things coverage in your neighborhood.”

As part of CHD’s efforts to slow down OTARD antennas deployment, we are tracking the areas in which these companies are looking to install antennas on homes.

In case any of you receive one of these flyers being sent out by the telecoms, you need to be aware of what the risk entails. The telecom industry will tell you this is not an issue and you will be paid for being a showcase 5G operation in your community.

The facts are far more dangerous than anyone really knows and so you should be prepared to know what your risks are. Before you take that extra \$600, there are real risks that can endanger your family and neighbors.

EMF radiation poisoning has been proven to cause 172 physical diseases and adverse effects to the human body. See the chart on the following page.

5G will be the worst of both worlds. Because 5G frequencies are subject to more obstructions and interference, they expect to need a 5G mini cell tower every 2 to 8 houses. So we will have more 5G Radiation emitting sources around us, and closer to us. And they will be more powerful, continuous emissions.

There are literally hundreds of peer reviewed [scientific studies](#) from around the world that have linked this “non-ionizing” form of electromagnetic radiation to things like cancer, DNA damage (especially in infants and fetuses), and infertility. And [Kevin Mottus](#) of the US Brain Tumor Association says that within the radio frequency portion of the electromagnetic spectrum, the higher the frequency, the more dangerous the radiation is.

Mini 5G Cell Tower In Your Home

Many people do not realize that they already have a mini cell tower emitting high levels of RF Radiation in their homes and offices right now. We call them Wi-Fi routers. (If you have a 5G wireless router emitting the 60 GHz frequency, then you have a 5G mini cell tower in your home.)

Just like a cell tower, a Wi-Fi router emits at full power 24 hours a day 7 days a week, or as long as you have it turned on. Its range includes your entire home and beyond. Its radiation is the exact same RF Radiation that a cell tower emits, or that your microwave oven uses to cook your food.

For example, my Wi-Fi router is a Netgear 5 GHz router that emits both at the 5 GHz and 2.4 GHz frequencies. A microwave oven uses 2.45 GHz frequency to cook food.

The new 5G Wi-Fi routers that are available now use the 60 GHz, 5 GHz and the 2.4 GHz frequencies. That is a lot of RF Radiation we are exposing ourselves and our families to.

It is possible to protect yourself from the RF Radiation emitted by the mini cell tower in your home we call your Wi-Fi router. By far the best way to protect yourself is to hard wire your home with Ethernet cables (preferably ["low emf Ethernet cables"](#)). Then you can turn off the Wi-Fi completely so that your router does not emit any RF Radiation.

| SYMPTOMS OF ELECTRO HYPERSENSITIVITY | | | | | |
|--------------------------------------|--|-------------------------------|---------------------|-------------------------------------|--------------------------------------|
| Neurological | | Cardiac | Respiratory | Dermatological | Ophthalmologic |
| headaches | depression | palpitations | sinusitis | skin rash | deteriorating vision |
| difficulty concentrating | anxiety | pain or pressure in the chest | asthma | facial flushing | pain or burning in the eyes |
| muscle and joint pain | insomnia | low or high blood pressure | bronchitis | itching | pressure in/behind the eyes |
| memory loss | fatigue | shortness of breath | pneumonia | burning | floaters |
| dizziness | weakness | arrhythmias | | | cataracts |
| nausea | tremors | slow or fast heart rate | | | |
| irritability | muscle spasms | | | | |
| numbness | leg/foot pain | | | | |
| tingling | "Flu-like" symptoms | | | | |
| hyperactivity | fever | | | | |
| altered reflexes | | | | | |
| OTHER | | | | | |
| digestive problems | abdominal pain | testicular/ovarian pain | enlarged thyroid | great thirst | dehydration |
| nosebleeds | internal bleeding | hair loss | pain in the teeth | deteriorating fillings | |
| swollen lymph nodes | loss of appetite | hypoxia | allergies | frequent urination and incontinence | night sweats |
| immune abnormalities | redistribution of metals within the body | impaired sense of smell | ringing in the ears | altered sugar metabolism | dryness of lips, tongue, mouth, eyes |

More severe reactions can include seizures, paralysis, psychosis, and stroke

Chart of the Electromagnetic Spectrum

Blessings,
