

Why Are They Killing Us?

It's Simple – They Want Us Dead!

- 96 food processing and distribution facilities destroyed since Biden took office
- People who received all five shots recommended by their governments increased the likelihood of their dying within the year by 35%
- Why are our governments killing us and how is Hunter Biden involved?

It turns out that Charles McGonigal, the disgraced former New York FBI Counterintelligence Chief arrested and charged last week for taking bribes from Russian oligarch, Oleg Deripaska was in charge of the office that was monitoring Hunter Biden's business dealings with CCP spy and [CEFC China Energy](#) Vice Chairman, [Patrick Ho](#).

Hunter recorded himself describing Ho as China's "Spy Chief" during a phone call that he archived on his infamous Laptop from Hell.

Ho paid Hunter roughly \$1 million to represent him as his lawyer while he was under surveillance by McGonigal's FBI Counterintelligence Division office in New York.

As fate would have it, both Patrick Ho and Charles McGonigal would eventually be arrested by the FBI at JFK Airport, Ho in 2017 and McGonigal a couple of weeks ago. When Patrick Ho was arrested in November of 2017, he called Joe Biden's little brother, Jimmy, who later told The *'New York Times'* that he believed that the call had been meant for Hunter, who was his lawyer at the time.

[Garrett Ziegler](#), Founder of the Marco Polo Research Group and a Biden laptop archivist calls this admission by Jimmy Biden *"Insane, because it's clearly illegal, in that they're violating the FARA [Foreign Agents Registration Act]."*

In just these revelations, alone the Biden family committed dozens of FARA violations with the punishment for each being up to 5 years in prison. This is on top of the influence-peddling, the bribery, the money-laundering and the treason.

CEFC was one of the main exponents of Xi Jinping's [Belt and Road initiative](#), which seeks to indebt Third World countries with [infrastructure projects that fall apart](#) before they even go online.

The now-defunct CEFC, which was once a Fortune 500 company, collapsed under the weight of its own corruption and it was taken over by the Government of Shanghai in March of 2018.

And speaking of the Laptop from Hell, which 51 of America's top former intelligence officials told the world were "*Russian disinformation*", Hunter had remained silent over the past 2 years, while its contents were shared widely across the internet.

However, on Wednesday night, Hunter's attorney did an abrupt U-turn and now cast him as the victim, [calling on the Assistant Attorney General for National Security and Delaware's Attorney General](#) to go after the computer repairman, John Paul MacIsaac, along with Rudy Giuliani, his attorney Robert Costello, Steve Bannon, Garrett Ziegler, who we just saw, Jack Maxey and Yaacov Apfelbaum.

These are just a handful of people who had access to the contents of the Laptop from Hell and who sorted through and disseminated some of the information therein. There are many, many others who did the same, like Miranda Devine at *The 'New York Post'*, who also wrote an entire book, *'Laptop from Hell'* and others who are not named in Hunter's lawyer's letter.

So after lying to the American people for two years, the Bidens finally came out and recognized that Hunter's laptop was, indeed Hunter's laptop. Kind of. Because, on Thursday, Hunter Biden's attorney, Abbe Lowell told Fox White House Correspondent, Jacqui Heinrich that those letters that had just been sent out were NOT an acknowledgment that the laptop is, in fact, Hunter's. In a statement to *The New York Post*, she said that her letters, quote, "*Do not confirm MacIsaac's or others' versions of a so-called laptop, they address their conduct of seeking, manipulating and disseminating what they allege to be Mr. Biden's personal data, wherever they claim to have gotten it.*"

And then, the Deep State trotted out [disgraced former FBI Deputy Director, Andrew McCabe on CNN](#) to say that the computer repairman could face charges over Hunter Biden's laptop. Legal experts say [the case has little chance of going forward](#), being that MacIsaac handed over the laptop in 2019.

One wonders why the FBI refused to pick up the hard drive from MacIsaac for several months and allowed him to keep it, when they knew it was Hunter's and they knew there was National Security intel on it? Why did they allow the laptop and hard drive to be passed around and backed-up and copied all over the world for the past two years?

The clown car rolls on.

RT reports that Russia's Defense Ministry on Monday laid out more evidence that US-funded laboratories were working in Ukraine, [at least one of which was financed by Hunter Biden](#).

Documents and materials recovered by Russian troops showed that Western pharmaceutical companies operating in territory under Kiev's control conducted HIV/AIDS research on Ukrainian military personnel.

The commander of Russia's Nuclear, Biological and Chemical Defense Forces, Lieutenant General Igor Kirillov, presented Ukrainian-language documents referring to HIV infection studies that began in 2019. The list of targeted groups shows service members alongside prisoners, drug addicts and other *"patients at high risk of infection."*

According to Kirillov, the Russian military has recovered more than 20,000 documents and other materials related to the biological programs in Ukraine, while interviewing eyewitnesses and participants. The evidence *"confirms the focus of the Pentagon on creating biological weapons components and testing them on the population of Ukraine and other states along [Russia's] borders,"* the general told reporters.

Based on documents originating with the Pentagon's Defense Threat Reduction Agency (or DTRA), the Russian military identified eight more individuals involved in the US-funded research in Ukraine. Among the names Kirillov singled out was Karen Saylor of Labyrinth Global Health, previously of Metabiota, a company that was financed by Hunter Biden's firm, Rosemont-Seneca.

Karen Saylor is also a member of USAID and she conducted bat coronavirus research with Metabiota's Nathan Wolfe as recently as 2022. Saylor and EcoHealth Alliance CEO, Peter Daszak were co-authors of ["Predicting the potential for zoonotic transmission and host associations for novel viruses"](#) along with Zhengli Shi of the Wuhan Institute of Virology in 2022.

Kirillov said the latest trove of documents, belonging to the company Pharmbiotest, was unearthed in Luhansk early in January, He said, quote:

"Clinical samples and patient records with their personal data were buried, and not cremated or destroyed in a proper fashion. This suggests that the destruction of this evidence was carried out in extreme haste."

This ties in with a decree sent out by Ukrainian President Zelenskyy a year ago for government officials to destroy all information on the Ukrainian facilities that worked with Metabiota scientists, who were funded by Hunter Biden, [as reported by Clandestine on his Substack last summer.](#)

"A Ukrainian document released to Russian media outlet, Izvestia, showing the decree from Zelenskyy to destroy all files on Ukrainian defense service members, employees and staff of the state, and any involvement with Hunter Biden's biolab Metabiota, was dated February 24th, 2022, the same day the air strikes on Ukraine began."

Just as the third largest egg farm in the U.S. burnt down during an egg shortage that has caused the price of a dozen eggs to escalate to almost ten dollars in some regions,

we're learning that a popular chickenfeed manufactured by Purina may be causing chickens to lay less eggs all over the country – now, it's emerged, in multiple recent studies published by the NIH that [chicken egg yolk antibodies, called "IgY" act as a neutralizing agent against the SARS-CoV-2](#) and they have an inhibitory effect on the binding of the coronavirus spike protein mutants to human ACE2 receptors and that egg yolk antibodies might be a feasible tool for the prevention and control of COVID-19.

Dr Andrew Huff, the former Vice President of EcoHealth Alliance, the company contracted by Anthony Fauci to do Gain of Function research on the SARS virus and who has since become a whistleblower, he says he believes he knows who may be behind the attacks on our food supply. Prior to taking the job at Wuhan, Dr Huff was a food security specialist and he had government data simulating what would happen if there was an attack on the food supply and he analyzed which facilities were the most vulnerable that he obtained from the Department of Homeland Security's Food and Agriculture Sector Criticality Assessment Tool, which is called FASCAT.

Subsequent to his whistleblowing, his hard drives with the data on this topic were raided by the FBI and since then, there have been about 200 food factory attacks around the world, most of them in the U.S. But Huff had another backup and he analyzed the attacks and it turned out that the attacks exactly matched the most critical systems in his data set. He reported this to the Department of Homeland Security and the FBI but never received a response. [He told Emerald Robinson that he suspects that a government-funded actor or a globalist group like the World Economic Forum is behind the attacks.](#)

Everybody's talking about the Chinese spy balloon, with even [General Mike Flynn](#) tweeting, *"Nothing to see here. Only a giant bus-sized pool toy floating over the United States big enough to carry an EMP device. All Lems can go back to what you're doing. You should ask DOD if they're actually using that space program of yours. Appears not."*

[The DoD bafflingly refuses to shoot it down](#), saying they're worried about causing casualties on the ground. We're talking about a fabric balloon floating over what is the least-populated area of the country. Well, former CIA contractor Tore Maras has some interesting observations about this, reminding us that the balloon is hovering near Minot Air Force Base is in North Dakota, which is where U.S. nuclear missiles are located and that, coincidentally, China has purchased a ton of real estate in the area, estimating that China owns up to 50% of the real estate in Fargo, North Dakota, which they bought through venture firms. And then, she has these chilling words to say.

Josh Stirling is the top-ranked insurance analyst who's been collaborating in the background with securities analyst, Ed Dowd to collect the excess mortality data from all over the world in the wake of the Globalist vaccine mandates. What he found were very consistent numbers throughout Western countries, of a 7% increase in mortality in the first year, directly correlated to receiving either the Pfizer and Moderna injections plus an additional 7% increase in mortality for each successive shot received, saying that if

you received all five shots, then [your likelihood of dying within the year increased by 35%](#).

In other news, just after Project Veritas hidden cameras revealed that [Pfizer is involved in mutating viruses](#) for the purpose of creating new so-called vaccines, we now find out that a drug designed by Merck, a pill called Lagevrio, that's meant to treat COVID, is causing the virus to mutate in patients. Some researchers worry the drug may create more contagious or health-threatening variations of the disease. The drug was recently cleared in China.

So, the question becomes "Why?" Why are our governments trying to kill us? [Sasha Latypova posted about this on her Substack](#) and she refers to a recent article by former Assistant Housing and Urban Development Secretary Catherine Austin Fitts and she explains that:

"Bankrupt governments are different from bankrupt corporations because they can print the money to stall the bankruptcy (instead of being forced to restructure by a bankruptcy court). However, that method is not limitless either. At some point the printing and stealing can no longer continue."

Catherine believes that the "pandemic" was pre-planned specifically for this eventuality and it was kicked-off to both cover this up (temporarily) and enable to shut down the economy while unleashing a tsunami of printed money to further grab centralized power, cheapened assets, de-stabilize and remove power from any possible opposition.

"Every person regardless of age is a 'claim on assets' in the form of usage of the dollar supply (or whatever succeeds the dollar). Incidentally, that's why the push for life expectancy curtailing 'vaccinations' is so massive in the West and seems much less so in Africa (they are not worth that much per head in dollar terms)."

"The current war on the people is part of the restructuring that the globalist 'owners' (owners of the central banks) are attempting - going direct reset and attempted CBDCs. This is also the fight over whose fake digital token is going to be the 'global reserve', and so we have the US fighting the Euro zone and Russia and China in various stages of economic/bioterrorism warfare progressing to kinetic war. While Russia and China and the Euros are also frantically restructuring their balance sheets by murdering and terrorizing their own citizenry."

"In order to succeed the owners need to install a global system of totalitarian control through various technological surveillance means, reduce the population, and utterly impoverish and terrorize the survivors. I personally believe they will not succeed because they do not have the tech they claim and will not be able to bridge it in time before the situation totally unravels. The more we are aware and educated about what exactly is going on the better our chances of surviving this mess. Acknowledging the reality is the only way forward. Despite the horror of what has transpired, I feel optimistic"

about the future in part because I met people like Catherine Austin Fitts on this literal trip to hell."

And now, for your [Moment of Zen](#).

Running Time: 30 mins

[Below are a few of the articles, links I have saved that speak to the title of this article above. Many are asking the same questions but few are willing to call it for it really is. This is not conspiracy theory; these are facts that support the premise that the U.S. government wants American citizens dead or dying. I have saved hundreds of articles that focus on this topic, however, listed but a handful of reports the government wants you dead!]

Jim Stone, Freelance Journalist posted this report on Thursday, February 2nd, 2023. The reason behind ridiculous egg prices has been medically proven for a while, *but no one caught this until now*.

REASON: eggs screw up the MRNA vax and stifle Covid also

Look at the dates. ***They knew at the beginning of covid that eggs screwed up the spike protein, which is why they started killing chickens and burning chicken farms.*** The relevant date here is Nov 2020, right about the time that eggs skyrocketed and they were destroying chickens left and right.

Chicken Egg Yolk Antibodies (IgYs) block the binding of multiple SARS-CoV-2 spike protein variants to human ACE2

<https://pubmed.ncbi.nlm.nih.gov/33191178/>

Abstract

The SARS-CoV-2 virus is still spreading worldwide, and there is an urgent need to effectively prevent and control this pandemic. This study evaluated the potential efficacy of Egg Yolk Antibodies (IgY) as a neutralizing agent against the SARS-CoV-2. We investigated the neutralizing effect of anti-spike-S1 IgYs on the SARS-CoV-2 pseudovirus, as well as its inhibitory effect on the binding of the coronavirus spike protein mutants to human ACE2. Our results show that the anti-Spike-S1 IgYs showed significant neutralizing potency against SARS-CoV-2 pseudovirus, various spike protein mutants, and even SARS-CoV in vitro. It might be a feasible tool for the prevention and control of ongoing COVID-19.

Why COVID-19 Mass Vaccination is a Military Operation

[by Dr. Peter McCullough | America Out Loud](#)

November 6th 2022, 4:54 pm

The mRNA vaccines were not a product of Operation Warp Speed and developed in just a few months -- rather, DARPA has been working on them with companies such as Moderna since 2011.

In an [exclusive](#) interview with Alexandria (Sasha) Latypova, MBA, who is a former pharmaceutical executive and independent analyst. She has made it clear with her prior reports on TrialSite News that deaths reported in VAERS after COVID-19 vaccination are not randomly distributed according to manufacturing lots as they are with influenza vaccines; instead, they are aggregated in specific “hot lots.”

For example, from data on 33 lots of the Pfizer vaccine, 80% of the deaths have arisen from 35% of the lots. For Moderna, its only 24% of the lots account for 80% of the deaths. Lot sizes were small initially, and some were contaminated by the metallic beads used in the manufacturing process. This explains reports and videos of injection site magnetism early in the campaign and why over time, these claims dissipated.

The lot sizes became larger, and the rushed nature of vaccine manufacturing invariable loads specific lots with more viable intact mRNA, while others have considerably less genetic material and or broken fragments of mRNA. Because the U.S. Department of Defense, under the Emergency Use Authorization countermeasures program, is the “developer” of the vaccines, there is a complex array of biological defense contractors that make the components of the vaccines.

Specifically, private contractors do the fill-and-finish manufacturing, and the DOD or its designees has material possession of the products until delivery at a vaccine center. So what are the roles of Pfizer and Moderna?

At this stage, they are essentially marketing shields or the corporate “face” of the military program. But Ms. Latypova is clear, by the U.S. EUA regulations, COVID-19

mass vaccination is a DOD operation, and the signal to “go” is given by the U.S. Secretary of Health and Human Services (HHS). Under Trump, it was Alex Azar, and now with Biden, it’s Xavier Becerra.

Essentially if the HHS Secretary believes a national medical emergency exists, then DARPA, the branch of the military dealing with biological threats, is activated, and the process starts. Here is a quote from the DARPA website:

“As part of the Autonomous Diagnostics to Enable Prevention and Therapeutics (ADEPT) program in 2011, DARPA began investing in nucleic acid vaccines. The hypothesis was that rather than delivering antigens to the immune system, we could deliver genes that encode the antigen and allow the human body to produce the antigen from its own cells, triggering a protective immune response. In December 2020, former ADEPT performer Moderna’s RNA vaccine received FDA Emergency Use Authorization (EUA) approval for the prevention of COVID-19.”¹

So, it is fully disclosed that the genetic vaccines were not a product of Operation Warp Speed and developed in just a few months; rather, DARPA has been working on them with companies such as Moderna since 2011. What is the role of the FDA?² Latypova points out it is largely “theatre.” In other words, the FDA is giving sham approvals to versions of the vaccines as they move forward since they are powerless to stop it.

His interview is gripping and a must-listen for those trying to comprehend the mild-blowing reality of forced vaccination resulting in record injuries, disabilities, and death. Our music contribution is from John Gouveia Psalm 2 – Why Do the Nations Rage?³

One of the earliest on revelations on SARS-CoV-2 and its ties to Covid-19 was the work of Dr. Luc Montagnier, the 2008 Nobel Peace Prize recipient for his work in identifying HIV1. Dr. Montagnier confirmed the work of a group of Indian scientists who quickly identified elements of key inserted HIV1 and SARS2 into the Coronavirus. Their work was published their findings of the presence of 18 genomic fragments of HIV-1 within the mRNA sequence of SARS-CoV-2.

The study was published in the September, 2020 issue of ‘Entangled’ magazine, published by Anthony Patch. The February, 2023 issue of ‘Entangled’ magazine has just been published and as a tribute to Dr. Luc Montagnier and his colleagues, the full study has been shared, which clearly and succinctly confirming evidence that illegal

“Gain-of-Function” was introduced into the mRNA sequence of SARS-CoV-2, weaponizing as a “bio-weapon”.

Since the 1983 discovery of the virus, HIV, by Dr. Luc Montagnier and his group at the Pasteur Institute, and his receiving of the 2008 Nobel Prize in Physiology or Medicine, research into the development of a vaccine against HIV has been ongoing. During the early months of the outbreak of the SARS-CoV-2 virus, Dr. Luc Montagnier and fellow scientists, published their findings of the presence of 18 genomic fragments of HIV-1 within the mRNA sequence of SARS-CoV-2. They concluded that the virus was man-made as part of ongoing gain-of-function research in Wuhan, China involving the genomes of both mRNA SARS and HIV-1.

In summary, it would appear that crossovers in research regarding the treatment of HIV, and now SARS-CoV-2/COVID-19, have been underway since the 1980s. Given the widespread employment of draconian measures in vaccinating the global population against SARS-CoV-2, I believe it is appropriate to surmise such early research was diverted into the weaponization of the SARSvirus. A new, synthetic SARSvirus, according to scientists like Dr. Luc Montagnier, was man-made in the Wuhan, China Level 4 biolab, and either accidentally, or, purposefully released upon the world.

The National Human Genome Research Institute describes a retrovirus, including HIV-1: a retrovirus is a virus that uses RNA as its genetic material. When a retrovirus infects a cell, it makes a DNA copy of its genome that is inserted into the DNA of the host cell. There are a variety of different retroviruses that cause human diseases such as some forms of cancer and AIDS.

In this case, the DNA resides within the nucleus of human cells. Once fused, the DNA copy of HIV-1 and 2019-nCoV/COVID-19 permanently alters the existing DNA of the human host.

This process illustrates how SARS-CoV-2 accomplishes two tasks. First, acting as a vector for the entry of HIV-1 fragments into the cytoplasm of a cell. Second, entry of both HIV-1 fragments and the SARS-CoV-2 virus into the cell nucleus, thereby gaining access to the host (human) cell's DNA to permanently alter it.

There is a biological symmetry between SARS-CoV-2 and HIV-1, with one requiring the natural characteristics of the other. They work in concert with one another, each acting as a vector for the other. A vector is an organism that does not cause disease itself but which spreads infection by conveying pathogens from one host to another.

Within their respective papers, research scientist s Prashant Pradhan, et al., and (cited below) Dr. Montagnier and his co-researcher Jean Claude Perez noted within the complete genomic mRNA sequence of SARS-CoV-2, the fragments (inserts) of HIV-1. Meaning, the SARS-CoV-2 virus itself exists due the presence of these fragments of HIV-1. The spread, or transmissability of SARS-CoV-2 is also dependent upon these same 18 fragments. This is the aforementioned "gain of function". Once infected, the

DNA of the host cell produces a new single strand of m RNA. One consisting of both the original DNA of the host, and the new (chimeric) DNA of SARS-CoV-2 and genomic fragments of HIV-1.

The conclusions of these scientists and others cited herein are; the genome of SARS-CoV-2 was man-made in a laboratory and contains not simply 4 inserts as cited by Prashant , et al. but 18 of human or simian retroviruses (HIV-1).

With respect to the "gain of function" objective, this is for the purpose of increasing the rate of infection, the pathogenic transmissibility (morbidity) of a virus within a host population. Not necessarily leading to an increased number of mortalities. This is leveraging the natural processes of a virus in increasing the quantity of infected hosts, without killing them off.

This is accomplished by enhancing the ability of a virus to penetrate into a host cell. The presence of HIV-1 genetic material, the 18 RNA fragments, indicates the targeting of host cell DNA. The natural molecular biological process of all retroviruses like HIV-1 is to fuse its genetic material to that of the host DNA, thus permanently changing it . From there, this modified (chimeric) DNA naturally produces a single strand of m RNA containing the virus and moves on as a Provirus to infect the next host cell. It "goes viral".

Further statements by Montagnier were made during an appearance on the French podcast, Pourquoi Docteur, dated April 17, 2020, in which he said: *"Covid 19 derives from a failed HIV vaccine"*. Montagnier said the coronavirus had escaped in an "industrial accident" while Chinese scientists at the Wuhan city laboratory were trying to develop a vaccine against HIV. *"In order to insert an HIV sequence into this genome, molecular tools are needed, and that can only be done in a laboratory,"* said Montagnier. One has to question whether this was a failed HIV vaccine; or an intentional effort to "Depopulate" the human species. Dr. Montagnier may have been too generous in his remarks and not skeptical of the source attended purpose.

HIV preferentially infects immune cells carrying a cell surface protein called CD4. Once HIV attaches to the cell, it fuses with it. In many cases, the virus makes copies of itself that are active and can continue infection. But in some cases the RNA virus makes a DNA copy of its genome, which gets integrated into the host 's DNA as a Provirus.

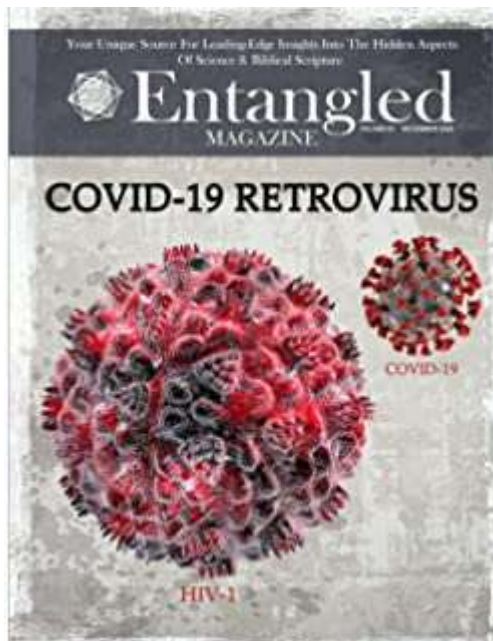

When it was known as early as March, 2020, that HIV1 and SARS2 had been inserted into the SARS-CoV-2 pathogen, why did the World Health Organization rebuff the work of Dr. Luc Montagnier and the Indian scientists who strongly were able to identify the HIV1 genomic and SARS2 genomic inserted genome. In a previous report, we learned that it was none other than Dr. Anthony Fauci who inserted himself into the situation by getting the Indian scientist to withdraw their paper, unless they wish to be denied future NIH and NIAID funding for future research. That fact casts a diabolical shadow on the "Gain-of-Function" work for which Dr. Fauci is noted for in a negative way.

The investigative work of independent journalist George Webb points out in his book '*Citizen Journo*' tracks the contracts for the Covid-19 vaxxes back to the World Health Organization and a ranking NATO official, which suggests they rejected Dr. Luc Montagnier because they had other reasons to vaxx the entire world.

What we have seen since 2021 has been an explosion in the excess mortality rates of "all-cause" death data and insurance claims for death benefits. This growing base of evidence data from countries around the world continue to confirm the spike of death rates have declined from a high of 37% in 2021 down to about 27% currently. Before Dr. Luc Montagnier said before he died of cancer in February of 2022 was that anyone receiving the HIV1/SARS2 vaxxes would be dead in 5 years.

Does that not suggest that the vaxxines are the real virus kill shots?

The September, 2020 issue of '*Entangled*' magazine pictured below is available from Amazon if anyone cares to obtain the report of Dr. Luc Montagnier's findings. The current issue February, 2023 is a tribute to Dr. Luc Montagnier, who died of cancer on February 10, 2022. It is clear that the World Health Organization is corrupt, unethical, and is part of a UN plan to enslave the 194 countries of the world. To control the world requires that based upon the Georgia Guidestones, reduce the world population to 500 million, down from 8 billion on the planet today.

This issue of "Entangled" magazine was the first publication that linked Covid and the Covid vaxxes with HIV1. In the past year of data, the term VAIDS has been debunked by national public health services, despite it can be confirmed to be a vaccine-induced pathogen.

With the information provide, what more evidence do we need to know that this is a global conspiracy to “Depopulate” the planet through State-Sponsored Genocide!

Blessings,

Pastor Bob, EvanTeachr@aol.com
