

Mycoplasma

The Pathogen That Will Kill You without Your Knowledge!

Part 3

A while back there was a report that 90% of the employees of Tysons Meat processing plant in Waterloo, IA had been tagged as having Covid-19. Tyson Foods fired seven plant management employees after an independent investigation into claims that leaders at the company bet on how many workers would become infected with COVID-19, the company reported. The allegations against managers at the Waterloo, Iowa, plant were part of a lawsuit filed by the son of an employee who died of the coronavirus in April. Tyson Foods stated:

"We value our people and expect everyone on the team, especially our leaders, to operate with integrity and care in everything we do," Tyson Foods President and CEO Dean Banks said in a statement. "The behaviors exhibited by these individuals do not represent the Tyson core values, which is why we took immediate and appropriate action to get to the truth. Now that the investigation has concluded, we are taking action based on the findings."

The lawsuit, filed in early November, alleges that the plant manager of the Waterloo facility "organized a cash buy-in, winner-take-all betting pool for supervisors and managers to wager how many employees would test positive for COVID-19."

The suit further claims that supervisors were directed to "ignore symptoms of COVID-19," and workers were encouraged to come to work even if they showed symptoms of the virus. The suit also alleges the company failed to provide adequate personal protective equipment (PPE) and didn't implement proper social distancing measures.

CBS News previously reported that Tyson has denied many of the lawsuit's claims. When asked about the lawsuit on Wednesday, a spokesperson said the company is "saddened by the loss of any Tyson team member and sympathize with their families. Our top priority is the health and safety of our workers and we've implemented a host of protective measures at our facilities that meet or exceed CDC and OSHA guidance for preventing COVID-19."

Tyson said it suspended the managers accused of wagering on COVID tests days after the lawsuit was filed, and hired former Attorney General Eric Holder to conduct an independent review of the claims.

This is not the only time the plant has faced controversy over its handling of COVID-19. In April, The Associated Press reported that local lawmakers were urging the plant to

close, warning that the rapid transmission of the virus among workers was dangerous both to employees and to the community. At the same time, meat plants around the country were emerging as hot spots of the virus.

Tyson temporarily closed the plant on April 22, and invited its 2,800 employees to get tested at the facility, CBS affiliate KCCI-TV reported. The company reopened two weeks later — and at that time, officials said more than 1,000 Tyson workers had been infected, according to AP.

You may recall several months ago of quite a number of reports of meat plants across the country being shut down due to the epidemic of the alleged Covid infections. President Trump signed an order to keep the meat plants working during shut downs over Covid and I was attempting to see where the 5G connection was involved in this picture. There is a connection but not the way I would have thought. I began a review of the literature again on the Mycoplasma data. Then the lights went on. I remember that the U.S. military weaponized Mycoplasma, of which there are over 200 types of it.

Biological warfare

- In 1954, *B. suis* became the first agent weaponized by the US
- *Brucella* species survive well in aerosols and resist drying
- *Brucella* and all other remaining biological weapons in the U.S. arsenal were destroyed in 1971–72 when the U.S. offensive biological weapons (BW) program was discontinued
- The United States BW program focused on three agents of the *Brucella* group:
 - Porcine Brucellosis (Agent US)
 - Bovine Brucellosis (Agent AB)
 - Caprine Brucellosis (Agent AM)

Agents of Biological Warfare

- Characteristics of ideal BW agent
- Environmental survival
- Easily spread before detection
- Highly lethal

Three types of Brucella Mycoplasma focused on three specific agents. They were particularly adaptable for making bioweapons from the bacteria. This slide provides us a starting point link in this mystery.

As the slide notes, the Brucellosis Mycoplasma survived well in aerosols and resists drying. The U.S. military biowarfare program supposedly ended in 1974 when the program ended. There is an abundance of external evidence that the program became a covert program and as I have noted in parts 1 & 2 of this series, there was a high degree of secrecy cloaking the Brucella Mycoplasma.

Brucella melitensis was discovered by a British doctor and microbiologist, Sir David Bruce back in 1887. Members of this genus are pathogenic to animals from which they are transmitted to man causing "brucellosis".

The genus includes

- *Br. melitensis*, causing infection in goats and sheep
- *Br. abortus*, causing abortion of cattle
- *Br. suis*, causing infection in pigs
- *Br. ovis*, causing infection in birds
- *Br. canis*, causing infection in dogs

Pathogenic types in humans:

- *Br. melitensis*, *abortus*, *canis* and *suis*

Zoonotic disease

We know the U.S. weaponized the *Brucella Suis*, known to cause disease in pigs. It was favored by biowarfare researchers for its ability to survive well in aerosol form and it had resistance to drying. We are beginning to see a pattern here if you can follow along with where I am going. Likewise, China was using pigs as well in its bioweapons program.

Who is at Risk for Brucella Mycoplasma? It is considered an Occupational Disease for cattle ranchers, dairy farmers, veterinarians, abattoir workers, meat inspectors, lab

workers, hunters; travelers; and consumers of unpasteurized dairy products and slaughterhouses/meat processing plants.

Transmission: There are three methods of transmission:

1. Ingestion – unpasteurized milk or dairy products, Ingestion is most common method of transmission,
2. □Inhalation – breathing in the aerosolized organism lab workers are at high risk.
3. Inoculation/Wound contamination – high risk occupations include hunters, slaughterhouse workers, meat packing plant workers and veterinarians.

Who is at Risk?

- Occupational Disease
 - Cattle ranchers/ dairy farmers
 - Veterinarians
 - Abattoir workers
 - Meat inspectors
 - Lab workers
- Hunters
- Travelers
- Consumers of unpasteurized dairy products

The meat plant workers symptoms were being falsely called Covid19, but were nothing more than Brucellosis Mycoplasma. Covid-19 does not exist and never proven to exist as I share further down in this report. No government health agency has confirmed its existence through the Koch Postulates testing. CDC, NIAID, and the WHO lied!

Keep fresh in your memory Mycoplasma is the smallest bacteria known to man. It is visible only under high microscope magnification. Since many physicians, labs, and health care workers are for the most part, are either unaware of its existence or are not

looking for it during the diagnostic process. pathogen at magnification of 80,000X power.

On the next page is a picture of this

Without going into all the data, we can safely assume that Brucellosis Mycoplasma has long ago entered the animal food chain through inhalation by the years of chem-trailing the skies over North America and Europe. Below is a link to a video in which the researcher is talking as he shows a Petri dish the Mycoplasma moving about in the cells when wireless energy from a public utility “smart” meter causes the Mycoplasma to attack the cellular structure. I had seen the video once before but months before I learned what I now know about Mycoplasma.

The mention of Mycoplasma damaging the cell structure begins at the 28-minute point. Utility “Smart” meters on residences function in the 3-7 GHz range. Months ago I viewed a similar video in which a “smart” phone did very much the same kind of attack on the cell structure of an individual. In that particular case, a honey bee was placed inside a wired strainer with a cell phone turned-on. Within 2-minutes the bee died.

<https://stateofthenation2012.com/?p=119957>

The next two slides note the points of entry to the human body and the various animals that are carriers of the Brucella Mycoplasma and specific occupational hazards where one can contact the bacteria.

The slides used here for illustration purposes are from a Medical university presentation on Mycoplasma. What I learned from viewing the entire presentation of over 100 slides, there is no cure for Mycoplasma. This is most important, and antibiotics are ineffective. Various treatments have been tried but with little to no remediation. Do not lose sight of this important fact as I continue with this article.

Transmission

Prevention/Infection control

- Pasteurizing milk and dairy products
- Eradicating infection from herds and flocks
- Live attenuated vaccine is used for cattle
- No vaccine is available for humans
- Observing safety precautions for occupational exposures including
 - rubber boots
 - wearing impermeable clothing
 - gloves and face masks
 - practicing good personal hygiene

In part 2 of this series, I stated that **“5G and Mycoplasma is the perfect Silent Weapon for a Quiet War.”** You have no idea of the lethality potential here. Think of Extinction Level terms! **“Wireless 5G EMF through Electroporation will activate the existing pathogen Mycoplasma”**. With what I have discovered in the U.S. military bioweapons program selecting Brucella Suis out from other genus the one that causes infection in pigs, I believe the particular pathogen here is the Brucella Suis. For years I have heard scientists say we should never eat pork products but never why so, but now I know Mycoplasma is the reason.

To further refine this statement above, it should read: **“Wireless 5G EMF through Electroporation will activate the existing pathogen of Brucella Suis Mycoplasma”**.

This largely unknown pathogenic bacterium has been sprayed upon the continents of the U.S. and Europe, contaminating all life form, the fields, crops, and vegetation, for at least two decades, and closer to upwards of three decade. It has been inhaled and ingested, by unsuspecting humans, livestock, and pets. In my research of Dr. Garth Nichols work, we learned that the U.S. biowarfare program created two versions of the Brucella Suis Mycoplasma, one that debilitated and weakened people; the second was to kill them out right. Dr. Garth Nichols believes that it was sprayed during the Gulf Wars in Iraq. Furthermore, he has stated that it is in his opinion the cause of the Gulf

War Syndrome. Today, many researchers contend the first version is the cause of all the illnesses we have today. Meaning we have been sprayed by the version that leads to debilitating health problems over an extended period of time or latency.

- ✓ fatigue
- ✓ general weakness
- ✓ respiratory issues
- ✓ sleeping difficulties
- ✓ loss of appetite
- ✓ bleeding gums
- ✓ dark circles around eyes
- ✓ bags under eyes
- ✓ excessive perspiration
- ✓ stomach issues
- ✓ acid reflux
- ✓ low body temperature
- ✓ cold hands/feet
- ✓ numbness/paralysis
- ✓ low vision/double vision
- ✓ memory loss/senility
- ✓ infections
- ✓ blood pressure issues
- ✓ ringing in the ears
- ✓ headache
- ✓ low immune system
- ✓ weight issues
- ✓ muscle/joint pain
- ✓ dry skin
- ✓ dizziness
- ✓ lack of coordination
- ✓ skin problems
- ✓ thyroid dysfunction
- ✓ adrenal fatigue
- ✓ hormonal issues
- ✓ PMS/infertility
- ✓ depression/anxiety
- ✓ mood changes
- ✓ suicidal tendencies
- ✓ emotional instability
- ✓ lethargy
- ✓ lack of empathy
- ✓ shaking/tremor
- ✓ allergies
- ✓ ulcers
- ✓ anemia
- ✓ heartburn
- ✓ glaucoma
- ✓ nausea
- ✓ heart disorders
- ✓ eating disorders
- ✓ autoimmune diseases
- ✓ personality disorders
- ✓ liver diseases
- ✓ cancers

If you believe that our government biowarfare program was suspended in 1974, you are grossly naïve or deceived. It was Dr. Anthony Fauci who violated the order not to pursue "Gain of Function" (increase its lethality and harm). One should be asking why Dr. Fauci was messing around with increasing the virility of a poison, unless he had plans for its dispersion. He paid the Chinese Communist Party a total of \$7.4 million in U.S. taxpayer money, and violated an Obama directive to shut down the program in 2013. President Trump eventually cut funding to the program. Dr. Fauci was being protected from prosecution by higher ups in the government. Clint Richardson,

producer of “Lethal Injection 2” says that Dr. Fauci is a criminal. He states that the alleged Covid-19 is actually a bioweapon, and that it can be released with enough viral “gain of function” to wipe out most of the world’s population. Dr. Fauci patented the SARS-cov2 virus in 2003, and that Covid-19 is part of that family of pathogens. Clint Richardson is a cancer survivor and has spent 30 years researching the world of viruses.

Mycoplasma are cell wall deficient

□ Cross-section of Mycoplasma bacteria

The U.S. Army’s labs at Fort Detrick, MD worked with other university biochemical research facilities around the country as well as abroad, so there is no way that the military biochemical and biological work was completely stopped. As the slide shows below, there is no cure or vaccine for Brucella Mycoplasma. Covid-19 is a man-made bioweapon, and this has been confirmed by scientists from around the world over the past year of 2020.

There is a growing body of evidence that ties together why 90% of Tyson Foods meat processing workers at plants in IA and elsewhere were shut down. As the slides above shows Brucellosis Mycoplasma is an occupational hazard. Local health clinics errantly mislabeled Covid-19, by intent or by omission.

It is my view that this is all part of the global “Depopulation” agenda to reduce the world’s population. We are all being poisoned as part of a global “Depopulation” program that was agreed upon at the Rio Earth Summit in 1992 as part of Agenda 21 and Agenda 2030. 5G wireless EMF plays a huge part in the larger plan as we know 5G and wireless communications in general has confirmed what wireless electrical energy does to the human DNA. I have written 13 articles on the “Depopulation” agenda that goes back to 1968 and the UN organization “The Club of Rome.” The evidence would fill several large books. Dr. Len Horowitz did an expose on the HIV/AIDS scam of the 1980s in his huge book *‘Emerging Viruses: AIDS And Ebola : Nature, Accident or Intentional?’*

Treatment and Prevention

- Treatment
 - Tetracycline or erythromycin
 - Newer fluoroquinolones
 - They are relatively resistant to penicillins and cephalosporins
- Prevention
 - Avoid close contact
 - No vaccine

As recent as November, 2020, the Wyoming health professional Dr. Igor Sherman, himself a former bioweapons specialist in the former Soviet Union has stated that Covid-19 is a bioweapon. Do not discount this point in this stampede to get people to take any of the various vaccines being offered, it’s not likely holding any benefit of any kind whatsoever! All vaccines show a cumulative effect, meaning that the more vaccines one receives the greater harm to their natural God-given immune systems. The vaccine will contain the mRNA, an experimental vaccine, never used before on people let alone animal test trials. Since very few people have any knowledge of the Brucellosis Mycoplasma, it just might be hidden in the ingredients used for the Covid-19

vaccine. Remember, the U.S. military bioweapons experts in the 1950s created two versions, a mild one that caused debilitation among its victims, and a more lethal one created to kill the victims. Just a week or two ago, Australia cancelled its Covid-19 vaccine after samples showed elements of the HIV:AIDS in the vaccine!

Treatment and Prevention

- Treatment
 - Tetracycline or erythromycin
 - Newer fluoroquinolones
 - They are relatively resistant to penicillins and cephalosporins
- Prevention
 - Avoid close contact
 - No vaccine

There is no way to tell what is in any of the vaccines, and experts are advising against anyone taking a vaccine. We would expect those with evil intent to take measures to make sure that side effects or serious health issues might not be immediate, even timed latency for a future time, such as with a second dose, or when other health issues actuate the Brucellosis Mycoplasma that all of us have as a result of years of aerosol spraying. All of us have ingested it or inhaled it since the 1990s and so anyone is at risk of unforeseen effects.

Look around you, what do you see? Airlines mandating you receive a vaccine before flying, sport stadiums telling you that an Immunity Passport will be needed to attend events, countries like Israel and the nations of Europe using Green, Yellow and Red restricted zones. All this for a virus with a 99%+ recovery rate! Suspicious does not begin to describe the entire plandemic agenda. What is happening all around you right now is the prophesied New World Order foretold in the book of Revelation. At the very least, these mRNA vaccines have already caused 3,150 adverse reactions in the first

week of its distribution, and undoubtedly those numbers are going to skyrocket. But consider, real pandemics don't rely on faulty prediction models, biased reporting, politicized science, exaggerated mortality rates, and inflated death statistics. This scamdemic, a combination of the words scam and pandemic defines the mainstream media's orchestration in creating a Covid-19 hysteria. There is a more sinister agenda afoot than society may realize! Those whom fell victim to the alleged Covid-19 are all reported to have died of Hypoxia, a lack of oxygen. ER doctors reported the victims were blue in the face, a definitive symptom of lack of oxygen!

I have been compiling data, reports, videos, interview's with ER doctors, physicians, nursing staff, scientists, which now number in the many hundreds of reports, going back to the world military games in Wuhan China of October, 2019, when military athletes in the peak of health became sick and ill during the world military games.

Clinical manifestations

- Tracheo-bronchitis
 - 70-80% of infections
- Pneumonia
 - Approximately 10% of all atypical pneumonias
 - “Primary atypical pneumonia”
 - Mild disease but long duration

Growing List of Assassinations of COVID-19 Researchers

The recent death of the Russian scientist, Alexander ‘Sasha’ Kagansky, adds to the growing list of people engaged in coronavirus research dropping dead in mysterious circumstances.

Alexander Kagansky was working on a COVID-19 vaccine before allegedly being stabbed and thrown from the window of his 14th floor flat.

Below, five more cases of people who were involved in COVID-19 research or closely related to the events since the pandemic, and have either been killed or found dead in mysterious circumstances:

2. Canadian Scientist Frank Plummer

Frank Plummer – Canadian Scientist Key To Coronavirus Investigation Assassinated In Africa

In early February, renowned scientist Frank Plummer who received Saudi SARS Coronavirus sample and was working on Coronavirus (HIV) vaccine in the Winnipeg based Canadian lab was assassinated in Kenya soon after it was revealed in GreatGameIndia investigation that Frank Plummer was the key to the Chinese Biological Espionage case at Winnipeg's National Microbiology Laboratory.

It was from this Canadian lab that coronavirus was smuggled by Chinese Biowarfare agents and weaponized in Wuhan.

3. Professor Bing Liu, University of Pittsburgh

In May, Professor Bing Liu of the University of Pittsburgh, who was on the verge of a breakthrough in scientific understanding of the new coronavirus, was shot dead.

He was found in his townhouse with gunshot wounds to the head, neck, torso and extremities.

“Bing was on the verge of making very significant findings toward understanding the cellular mechanisms that underlie SARS-CoV-2 infection and the cellular basis of the following complications,” his colleagues at the university’s Department of Computational and Systems Biology said in a statement.

4. Gita Ramjee, an HIV scientist

Gita Ramjee, an HIV scientist died of Coronavirus when she was in London to deliver a lecture in March. On her return to South Africa she felt unwell and was hospitalised.

Her specialisation in HIV prevention and treatment research led her to lead the expansion of phase I through phase III HIV prevention and treatment clinical trials in the greater Durban area as the Clinical Trials Unit Principal Investigator.

5. WHO driver carrying Coronavirus samples shot dead

A WHO driver carrying Coronavirus samples was shot dead in Myanmar, in May. The World Health Organization (WHO) vehicle carrying coronavirus test samples came under attack, leaving the driver dead and a government official seriously injured.

Pyae Sone Win Maung was driving a well-marked United Nations vehicle when it was hit by gunfire in Rakhine State.

6. Vaccine Whistleblower Brandy Vaughan

Vaccine whistleblower Brandy Vaughan, a former sales executive for the pharmaceutical company Merck and the founder of LearnTheRisk.org, a website dedicated to educating people on the risks associated with vaccines, was found dead in her home beside her nine-year-old son on December 8.

On Monday, the Santa Barbara County Sheriff's Office announced an investigation into the circumstances surrounding her death.

Also read about the: [60+ Holistic Doctors Killed or Found Dead in Mysterious Circumstances in Just Over a Year](#)

Person of Interest in Coronavirus Investigation. There are also those researchers of interest who could be investigated for their shady role in manufacturing the worldwide pandemic of fear. Below we highlight a couple of them who are key to Coronavirus investigation.

The President of EcoHealth Alliance, Peter Daszak is the one who orchestrated the myth that COVID-19 is natural in origin.

Emails obtained by U.S. Right to Know show that a statement in The Lancet authored by 27 prominent public health scientists condemning "conspiracy theories suggesting

that COVID-19 does not have a natural origin” was organized by employees of EcoHealth Alliance.

EcoHealth Alliance interestingly is the same non-profit group that received millions of dollars of U.S. taxpayer funding to genetically manipulate coronaviruses with scientists at the Wuhan Institute of Virology.

Dutch Virologist Ron Fouchier

Dutch Virologist Ron Fouchier is a controversial figure in the field of Viroscience. He created world's deadliest virus strain and his research sparked a global controversy to de-fund and shutdown such experiments.

Experts have raised concerns legally that such experiments could not only lead to a global pandemic but could also lead to bio-terrorism.

However, Ron Fouchier is also a key to the COVID-19 investigation. He isolated the SARS Coronavirus smuggled out of Saudi Arabia which was sent to the Canadian scientist Frank Plummer, who ended up dead a week after GreatGameIndia's report was published.

I have come across a web site devoted to debunking the element of 5G behind the alleged Covid-19, but they overlook or discuss some very essential factors in the larger picture. I have connected a number of dots with the science and here is the elements of the big picture as I have studied this:

- 25-years of Chemtrail Aerosol Spraying
 - Poisoning the Land, Livestock, Pets, and People
 - Inhaled and Ingested from Meat, Food, and Crops Sprayed
 - Brucellosis Suis Mycoplasma found in Chemtrail Samples
 - A Latency for Lethality (debilitation to death - days to years)
 - 5G Electroporation Wireless Energy Penetrating Human Pores
 - Activating the Brucellosis Mycoplasma Decomposition of Cell Structure.

Clint Richards of "Red Pill Sunday School" says these viruses are not natural, meaning they are not found in nature anywhere, which confirms they are man-made laboratory produced bioweapons. Clint Richards is a 30-year cancer survivor and has studied the subject of diseases and states Covid is a bioweapon. Clint Richards has studied what are the documents/conference minutes of Dr. Fauci and his colleagues in what they are doing. Clint stated the documents are boring as hell but they reveal exactly what they are doing. This additional bit of information below should be further evidence that the world is being pushed into a global psyop fraud.

It's confirmed: The pandemic is driven by the faulty PCR tests, just like Pfizer's ex-Chief Science Officer, Dr. Michael Yeadon, told us months ago. "Almost all" of the tests for Covid-19 are producing false positives, Dr. Yeadon warns.

Today we learn that 22 highly renowned scientists conclude that the PCR test produces 97% false positives.

So out of all of the Covid patients we've ever seen, 97% never had Covid. STOP PCR TESTING NOW!

The study is available here and here.

<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC6988269/>

Review report Corman-Drosten et al. Eurosurveillance 2020

22 Highly Renowned Scientists: Out of All of the Covid Patients We've Identified With the PCR Test, 97% Never Had Covid

The NCBI database for nucleotide sequences has led to a stunning discovery. One of the WHO primer sequences in the PCR test for SARS-CoV-2 is found in all human DNA!

The sequence "CTCCCTTTGTTGTGTTGT" is an 18-character primer sequence found in the [WHO coronavirus PCR testing protocol document](#). The primer sequences are what get amplified by the PCR process in order to be detected and designated a "positive" test result. It just so happens that this *exact same* 18-character sequence, verbatim, is also found on Homo sapiens chromosome 8! As far as I can tell, this means that the WHO test kits should find a positive result in all humans. Can anyone explain this otherwise?

Mycoplasma at 80,000 x magnification.

In my bullet point summary on page 16 of [Brucellosis Suis Mycoplasma](#) I will explain this in as basic a way the reader can easily understand. We have been sprayed with chemtrails for at least 25+ years. (see pictures below). Analysis of the chemtrails have proved they contained a toxic soup of chemicals and biological agents. They have found a toxic brew that includes toxic heavy metals including aluminum barium, chromium, cadmium and nickel, and other pollutants like mycoplasma mold spores, mycotoxins, polymer fibers, and ethylene dibromide. These toxins are absorbed through the skin, inhaled, ingested from contaminated water, and foods. Once inside the human

body, they will lay dormant for months or years. This is a very innocuous or what seems to be harmless bacteria to most of the scientific community. But it is anything but harmless, it was weaponized by the U.S. Army in 1950s and kept classified as Top Secret for decades.

The **Brucellosis Suis Mycoplasma** once inhaled or ingested into the body lays dormant for years, even decades. It has no cell structure of its own, and requires a host cell to live on. During this hibernation or dormant state, it is watching and waiting. There are four specific things that it is monitoring during this dormant stage:

1. Body liquid pH
2. Blood-oxygen level
3. Immune system
4. Stressors

As we get older and our body wears down, cell structure damage begins to occur. This cell structure damage sends out chemical and biological messages that are picked-up in these four things in the body and the **Brucellosis Suis Mycoplasma** is activated and goes to work consuming dying cells, and moves on to consuming healthy cells. There is a growing body of scientists who believe the **Brucellosis Suis Mycoplasma** causes cancer and many of the modern diseases that were not common a hundred years ago.

The last two bullet points relative to wireless EMF energy of 5G goes unnoticed because of its being invisible. This wireless energy can be beamed into your sweat glands like a ray gun. At specific Gigahertz levels, some of the damage that occurs is listed in the illustration below. This damage results in the **Brucellosis Suis Mycoplasma** beginning its destruction and ultimate death.

What I have not been able to determine is precisely when this information was recognized as the perfect weapon by the globalists in their plan to seek **“Silent Weapons for Quiet Wars.”** This document was discovered inside an IBM copier purchased for parts at a government-surplus sale by an employee of Boeing Aircraft who gave the document to someone knowledgeable of the globalist group known as the

Club of Rome, and later published after 1988. The person possessing the forgotten document inside the scrap copier never copyrighted the document and so it only became available in 2000. The belief is that it was a presentation for the globalist Bilderberg Group. The leaders of the world have been fixated on Depopulation since Paul Ehrlich wrote his book, *'The Population Bomb'* in 1968.

5G was rolled out last September, 2019 around the world. It is unknown whether the cruise industry was a victim of collateral damage since most of the 320 cruise ships were retrofitted with 5G satellite antenna during the summer of 2019. I doubt seriously whether the cruise ship operators knew of the risk that 5G EMF wireless technology brings to its cruise passengers. The military knew as far back as the 1950s of the health risks and damage that wireless communication could inflict on life. 5G was developed as a weapons system decades before it became the rave of cellular and Wi-Fi in the past couple years. 5G was rolled out as the U.S. Army ADS or Active Denial System in 2010. The active denial system is a non-lethal, directed-energy, counter-personnel weapon system owned by the U.S. military. It consists of a gyrotron, which generates and focuses a high-energy millimeter-wave radio frequency beam (a type of electromagnetic radiation) onto a specific target.

PAIN WITHOUT INJURY

'Active denial systems' deter attackers by sending a nonlethal millimeter-wave of electromagnetic energy, causing a burning sensation.

Wave penetrates the skin to 1/64 of an inch, causing a feeling similar to being on fire

Two-second burst can heat skin to 130° F

98.6° F Normal

122° F People pull away reflexively

130° F

Antenna focuses the invisible energy

Note: Drawing is schematic

Transmitter
Produces 95 GHz frequency waves

Source: GlobalSecurity.org

AP

However, what the U.S. military does not reveal in what it says about the ADS system is that has the potential to deliver a lethal dose of 5G wireless EMF. By "modulating" the controls it is able to deliver an energy beam in excess of 95 GHz noted in the illustration

on the previous page. It is a proven medical fact that a beam at 60 GHz energy will absorb 98% of the oxygen in a person's lungs, resulting in instant death. So, do not be deceived about the military claim that ADS is non-lethal! It is a killing device!

Back to the 5G energy generated, it uses a narrow-band beam that can be beamed directly into the open pores of the human skin, activating the **Brucellosis Suis Mycoplasma**. **The energy level beamed at humans determines whether death is a slow process or instantly.**

I have written at least five articles on 5G as the death knell of the cruise ship industry, and more than seventy articles on toxic 5G wireless EMF. This is the third article on the mysterious bacterium Mycoplasma that has been shrouded in military secrecy since the 1950s. Looking at my summary points on page 18, each in of itself might not seem as serious as they are. It's not until you look at the "Big Picture" when you recognize what we are facing. Dr. Martin Pall, retired chairman emeritis of Biochemistry and Medical Science at the University of Washington, calls it an "*Extinction Level Event!*" Dr. Barry Trower who was the head of the UK Radar program for more than two decades, said, "*If you have daughters forget about having granddaughters!*"

Part 4 of this series will contain a lengthy list of military bioweapons activities going back decades. It is huge but I will post it as documented evidence of what our military has done in my lifetime.

Part 5 will focus on what I have learned (despite there is no cure) to help mitigate against Mycoplasma and wireless energy. As I have previously stated, I have Lymphedema-Lymphorrhea, which began a week after having Wi-Fi installed in 2010. A major University Hospital doctors could not even diagnose my problem then and subsequently discharged me from the hospital. As recent as five years ago, intensive research yielded the answer, there is no known cause and no known cure. My research of a few thousand hours on the Internet, and reading more than a dozen medical books, I have put together an affordable and effective therapy plan that has kept me alive so far and seems to be working well for me. The Lymphorrhea issue has greatly diminished and is less severe than what I have dealt with in the past eight years.

This is bigger than all of us and you should not take this as something minor!

Blessings,

Pastor Bob, EvanTeachr@aol.com
